Lisle D. Hodell, Manager of FHP Manufacturing, is shown in the pictures above at the presentations of Meritorious Safety Awards. In the upper left corner, he is addressing the safety committees from Divisions 13, 14 and 17. In the photograph at the right (l. to r.) are R. C. Dennison, Supt. of Div. 17; H. E. Koehlinger, Supt. of Div. 13; Fred Campbell, Supt. of Div. 14, and Mr. Hodell.

In the center photograph, E. W. Lankenau, Manager of the Decatur plant, is shown receiving a certificate from Mr. Hodell.

Mr. Hodell is shown in the bottom pictures during his talk to the FHP safety committees at the Broadway plant. With Mr. Hodell, in the picture at the left, are D. H. Hanson, Supt. of Div. 33; H. G. Siebold, Supt. of Div. 15;H. E. Boles, Supt. of Div. 16, and W. H. Franke, Supt. of Divisions 19 and 20.

Meritorious Safety Performance certificates were presented to the FHP Motor divisions at their regular Safety Committee meetings recently. Divisions 15, 16, 19, 20 and 33 received their certificates, Monday, April 11, in the conference room of Bldg. 8-2; the safety committees for Divisions 13, 14 and 17 were given their certificates, Tuesday, April 19, at a meeting in the Taylor St. cafeteria, and the award was made at the Decatur plant, Monday, April 18.

Lisle D. Hodell, Manager of Manufacturing for the Fractional Horsepower Motor divisions, made the presentations to the superintendents of each division.

More Hurt at Home

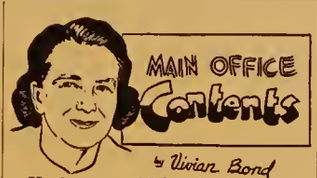
In his talk to the safety committeemen, Mr. Hodell pointed out that there are over twice as many people hurt in the home as there are at work; he stressed the need for calling people's attention to off-the-job hazards.

He then congratulated the safety committees on their work and stated:

"I am very happy that of the 19 divisions in this Works that are receiving safety awards, Fractional has over half of them. Of our 12 divisions, 11 received awards, and five of them have most outstanding records. One division has passed the two and one-half million, accident-free-hours mark; two have passed the two million mark, and two others have passed the one million mark."

Stresses Housekeeping

Mr. Hodell then cited the need for good housekeeping and added:



"The division that has the best safety record, as shown in our report for 1948, is also the best in housekeeping in the Fractional Horsepower Motor divisions. This is Division 14 at Taylor St., with a record of 2,536,280 man hours without a lost-time accident."

Following Mr. Hodell's talk, each superintendent accepted a certificate on behalf of his division.

Apprentice BROADCAST

By Mildred Ellis

Wanted: By every married apprentice is someone to do housecleaning at a reasonable fee. The fellows feel that housecleaning should never have been made to come during the softball, fishing or golfing season. But from their wives' viewpoint, they may feel that they are doing the boys a good deed by getting them in condition so early in the season. . . . Inventors of the Week: Harry Meads and Mark McNulty. Harry has invented a "round-the-corner hammer." This deluxe item is ideal for getting dents out of fenders. Not to mention any names but a couple of members of Class F should be especially interested in this item. Marks' invention is still a big secret, so we don't know if he's trying for a patent or pulling a fast one on his fellow workers. Your guess is as good as mine as to what something resembling a snake catcher could be used for. . . . Recent speakers to our industrial organization class have been I. H. Freeman, Herschel Smith and teacher Perry Zahn. We are grateful to the above three as well as to L. P. Persing for his talk on time and motion study to Class C. . . . Fellows, if you hate to shave, see Ward Staley for his once a week special. Of course, Ward should warn you that it is very painful and it may remove your eyebrows and eyelashes; and also will give your complexion a very rosy hue. His experience was that he didn't shave for over a week. . . . "Butterfingers Birkenbeul" they call him now. That's an awful name to get at the start of the softball season, because it's sure to stick for a long time. . . . For speedy delivery on paper clips, see Howard Morton. He also hauls ashes (in very small quantities.) . . . Some of the fellows in the school are quite proud of their new cars and even Dick Wagner is proud of his not quite so new "29" Ford. He rattles right down Calhoun Street honking at everyone he knows. At least he still has a good horn. . . . Joe Rowan went out over the week-end to have a look at the Apprentice Major team. He reports that the boys did pretty well for their first game of the season, but were not able to win the ball game, losing it to St. Andrew's 3-2. With a few more games before the league opens, the boys are going to be hard to beat.

by Vivian Bond

Ho hum, could be the lost hour, the rainy Sunday, the sudden interest in cotton dresses, as evidenced by the general parade in Bldg. 18, or the reflection of E. G. Waldschmidt's new Mercury, that is the cause of this sudden slump, in news that is! . . . Oh well, if we don't write it our editor won't have to cut out so much, it is an ill wind you know. . . . To J. H. Gargett, who retired on the Company Pension Plan, last Friday, we extend our best wishes and a hope that the fish will be biting at Lake James. . . . We are happy to report that A. E. Leider is now recuperating from his recent operation at his home near Roanoke. Take it easy and enjoy some of the fine literature that has been sent to you! . . . Flash! Thelma Stone went to Chili—Indiana, that is, to attend her high school Alumni banquet. . . . The clocks have been set ahead one hour, except in the Data Bureau where they started the week at the old time. Is this a technical operation? . . . The Glen Forests (Gladys works in Bldg. 18-1) spent the week-end at the Dunes State Park. . . . We are sorry that Mary Brouwer, Bldg. 18-2, is ill. . . . To Edward Hagadorn in Bldg. 18-4, please accept our sincere sympathy in the death of your mother. . . . Our congratulations to Fred Andrews, Bldg. 18-4, whose daughter, Roberta was married to Dick Geip. . . . The storied mouse of Bldg. 18 has found another resting place. Jeanette Burkhardt, Bldg. 18-4, put on her work shoes and loudly exclaimed, "What is it?" Out jumped our furry friend and now she hesitates to change her shoes. . . . Guess everyone in Bldg. 18 is in the midst of the spring epidemic of painting, cleaning. I much prefer to just admire the beauties of nature. Have you taken time out to really appreciate the beautiful array of flowers, trees and velvet grass. You know they didn't just happen—why not take time to be thankful for them. . . . The Fort Wayne management has issued invitations to the members of the Foremen's Assn. and Supervisors' Club to attend a dinner May 11. They will hear W. V. Merrihue, manager of Employee and Community Relations, Apparatus Department.

Few women fail to sight a sale when they go down to see.

Campbell Dies

William Campbell, 51, died after a heart attack at his home, 358 W. Baker St., Monday, May 2.

Mr. Campbell was employed as a punch press operator in Bldg. 22, and later became an inspector. He left the Company in 1929 and returned in 1942 as a patrolman. In 1945 he transferred to the Wire division where he was a wire drawer. At the time of his death he was a stator insulator at Taylor St.

He was a member of American Legion Post 47, where he was a charter member. He was also a member of the Summit City Lodge No. 170 of the Masons, and was a 32nd Degree and Scottish Rite Mason.

Services were held yesterday at the Mungovan and Sons Mortuary, the Rev. K. A. Hawkins officiating. Burial was in the Lindenwood Cemetery.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

It is said that Elmer Minnick, well known agriculturist and key seating machine operator in Bldg. 19-3, has acquired a complicated new machine on his farm, namely: an all purpose milking machine, with a haircutting attachment. It is possible, however, from the appeance of Elmer's latest haircut, that some of the bugs may have to be taken out of the haircutting attachment. It leaves the head looking like it might have gotten mixed up with a flock of sheep at a shearing. . . . We received a letter from Mart Heider, postmarked Tall Timbers, Ind., announcing that he is now out of hibernation and may visit us soon. . . . Bill Irmscher was seen at the minstrel show at the Waynedale school recently. We hope he enjoyed himself. . . . Howard Musselman is still looking for that farm. So far, no luck. Maybe some reader can help him out. . . . Johnny Campbell learned recently not to trust his fellowmen, especially a certain person whose initials are Joe Burton. Joe is definitely on Johnny's you-know-what-kind-of list. For details ask Campbell. . . . William Stute, Bldg. 27, and wife, also Linwood V. Kelley, Bldg. 19-3, wife and granddaughter, were among the thousands who trekked to the nation's capital, recently, to see the cherry blossoms. They were indeed a beautiful sight. . . . Storm windows removed day or night by Ollie Fox. In view of the lake season about to open, Ollie has been doing his redecorating at home a little early. He finished enameling his bathroom. The inconvenience of taking the storm window off, he decided it wouldn't be necessary to open the window anyway. But in the wee hours of the morning, Mrs. Fox became very ill due to the paint fumes, so poor papa Ollie rolled out of bed at three in the morning, got out the ladder and removed the storm window. Let that be a lesson, fellows. . . . Congratulations to Mr. and Mrs. Ward Hall on that new daughter, Janet Sue.

Tech Students Tour Lab

Three seniors from Indiana Technical College toured the Taylor St. Laboratory Friday, April 29. They are shown looking at apparatus in the mechanical section. Left to right are Oscar Rodewald and L. G. Reith of the Works Lab, and the Tech students, Bob Murray, Bob Cleary and Frank Eiben.

With the month of May here, everyone in the section is making his or her plans on what to do over the Memorial holiday that comes at the end of the month. . . . Harold Mettler, complete with a large awkward bandage plus a sling to carry his injured hand in, found that a head piece telephone was necessary to conduct his phone calls. After the necessary installations were made, Harold awaited his first call — only to fumble around adjusting the new gadget in vain, because the voice at the other end asked for Dal Smith! . . . . . Question of the week: Is there any food better enjoyed by Ed Bowser than hamburgers? . . . That Smith named Ray acquired another nickname the past week. Henceforth Ray is known as "Duz"! For further explanation contact him. . . . Speaking of house cleaning and wallpaper hanging, Jack Payton has taken top honors with a purchase of some paper at $32 per roll. Jack, we know of some far less expensive paper that can be purchased at any A & P store!

Lichtenberg Addresses Indiana Tech Graduates

Chester Lichtenberg, Assistant to the Works Manager, was the third speaker in a current series of lectures for graduating seniors at Indiana Technical College. "Responsibilities of Engineers" was his topic.

TALL TALE: Last Saturday Norm Oetting and Walt Gerke spent the day fishing (and not together) so the story goes. Norm caught two and Walt caught none. It seems that every story has two sides and a common grade school error tells the tale—two times 0 equals 0 and not 2, Norm. . . . CORN OF THE WEEK: Things are looking brighter in the AC Drafting Section since some of the desk tops and boards were painted white. Quote one man to another while observing a very attractive middle aged lady—an old barn always looks like new with a new coat of paint, doesn't it? Unquote. . . . "O SOLE MIO": It is rumored that G. P. Baker was requested not to sing quite so loud, as his voluminous voice caused the very walls to tremble. The suspense seems to have irritated some people. . . . SO SORRY: Tom Dole had to return home after one day at work having battled with a "strep" throat for several previous days. Hope you have it licked this time, Tom. . . . SO HAPPY: To see Helen Conrad and Owen Vaught back after several days illness. . . . WELCOME: To Jay Strong, a new test engineer in the DC Section. . . . JOKE? Pauline Meehan, Payroll Section, intended to play a joke on Glenn Seabold by holding up his pay check. It so happened that in the rush of things, she kept C. B. Smith's instead. . . . HAPPY ENDING: After 30 years Abbie Hartman has found her father, who is now 75 years old and in excellent health. It seems that he saw a picture of her nephew's fiancee and read about the approaching marriage in the paper. He resides in South Bend. . . . DAY DREAMS: Jack Jennings is busy in his spare moments making strategic plans for the "Divot Diggers," who will again be swinging in the Office League at Brookwood . . . SUCKER: Bill Caruso and Don Spaulding looked slightly chagrined after having bitten into a rubber hot dog passed to them the other night. Bill, who must be complimented upon his excellent "bite" and determined nature, emerged with bits of rubber in his teeth. Don's only comment was, "and I was just trying to be sociable too." . . . WHAT WILL THE INSURANCE MAN THINK? Hugh Stephenson pulled a good one last week-end. It seems that he is the owner of not one but two Chryslers. He backed one into the other, smashing a fender on both. Even Steven, huh, Hugh! . . . ANOTHER FATALITY: George Klein wishes to report another telephone accident this week, not quite, but almost fatal.

Gossip is something that goes in one ear and comes out.

It's Windy Here

FHP Motor Division 17 Office

By Joan Aubrey

We were all very sorry to hear of the death of Walter Larimore last week-end. All the sports fans in the office will miss his friendly baseball arguments and his talk about his favorite team the Brooklyn Dodgers. Our deepest sympathy to the family and to Mrs. Larimore. . . . We also wish to express our sympathy to Fred Hagadorn upon the death of his mother. . . . Today is the last day for our smiling Eleanor Lambroff. She is getting married in three weeks and then moving to Gary, Ind. Our very best wishes, Eleanor, and we will miss you around the office. . . . Happy birthday to Ed Schlotter, May 9, and to Gordon Smith on May 11. . . . Now that the bowling season is over and golf has started we will start hearing some new stories. Hugh Neely was out Sunday to try his luck, but he didn't have much to say about it on Monday morning. . . . When Gene Foster has dark circles under his eyes these mornings, he has a good excuse. It seems as though Mike likes to get up early and when he wakes up he wants company, consequently Gene gets up early too.

Five Employees Go On Retirement

G. C. Liby

Grover C. Liby left the Company for retirement after working for G-E 29 years.

His first job was doing armature work in Bldg. 4-1, and later he did small drilling. Mr. Liby then became a drill press operator. From 1942 until his retirement he was a multiple spindle operator in Bldg. 4-3 and later at Taylor St.

Lydia Schnitt

Lydia Mae Schnitt left the Company for retirement May 1 after 24 years of service.

She began her G-E career in 1925 doing armature work in Bldg. 4-5. In the latter part of that year she transferred to Bldg. 4-1 to hand wind stators. Mrs. Schnitt was doing winding work at the Taylor St. plant at the time of her retirement.

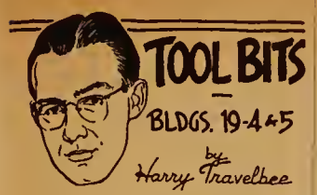
H. R. Haberkorn

Harrison R. Haberkorn, Supervisor of Inspection and Test in Bldg. 4-3, retired after 43 years' service with the General Electric Company.

Starting work in 1906 as a working-foreman in assembly, Mr. Haberkorn has been a sub-foreman and foreman. He has held his present position since 1943.

Clara Schnieder

Clara Krudop Schneider retired May 1 after 25 years service with the Company.



She started work at G-E in 1924 as an inspector in Bldg. 19-4. In 1936 she became an electrical inspector and later was a finisher. In 1938 she worked at placing leads on commutators. At the time of her retirement, she was a coil insulator.

F. A. Murray

Floyd A. Murray, General Service Div., retired May 1 after 32 years' service with General Electric.

Mr. Murray began working for the Company in 1917 as a helper. He later became a winder in the Transformer Division. From 1919 until 1922 he was a wireman in Bldg. 20-1, and since that time he was an electrician.

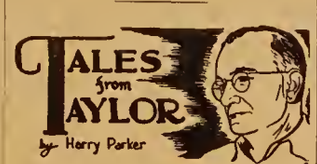
The big day for Mr. and Mrs. James Ehresman was April 28. The twins, Jean and Jim, were exactly one year old. The question in my mind, Jim, is whether you had two cakes with a candle on each or just one cake with two candles? . . . I was driving down the Reckeweg Road last week and noticed a house being torn down. With further investigation, I found out that it was only the residence of Mart Walsh getting a few minor changes. In other words, when Mart remodels, he just raises the roof and builds a new house underneath it. . . . Art Dicke, the famous authority on bass casting and pike fishing, advises one and all to sell his tackle and buy a cane pole and a can of night crawlers. He is now an excellent authority on this method after spending three days and nights with great success. Oh yes, he hooked a mighty six-inch catfish. . . . If you have any doors that need to be slammed or closed, make sure Hank Gerdom isn't near because that cut on his head didn't come from riding a bicycle. . . . Pearl Schoaff tells us that he and his wife caught five bass weighing almost two and a half pounds. His wife caught three of the bass—which proves that she is a good fisherwoman and Pearl is an honest man. You fellers will have to lay up the bass tackle now for a while and be satisfied with bluegills and perch. . . . Myron Auer was at Chicago Saturday to see the Cards win from the Cubs. . . . John Roemer thinks that it is a good idea to stand at a distance when pouring gasoline on an open fire—good idea, John. Did you need a shave after that experience? . . . What a big broad smile our boy Del Meyers displayed when he saw his one and only Millie's picture in the WORKS NEWS. . . . Our councilman, Jule Franke, is taking quite a ribbing these days. First, the News-Sentinel printed a cartoon of him sitting on the fence and second some of the die-hard Republicans always ask Jule "Why wait? Let's elevate." . . . Bill Trumbower says the only thing that hasn't gone wrong with his tractor is that the wheels haven't fallen off. Also, he claims his fence charger knocks him down at 10 feet from the source, but 20 feet away, he or Daisy (his pet cow) neither one can hardly feel a shock. . . . We thought B. B. Byanski told them all, but Walter Greiner made me take all that back. He claims he was at Rome City last week and he saw a carp three feet long jump clear out of the water practically in the boat. Let's send this one to the Wisconsin Liar's Club. . . . Ed Steward fishes out of the "Journal-Gazette." He's been planning a trip all spring to a certain lake, only to see a picture in the paper where someone caught them all last week. Better luck next time, Ed. . . . Chet Stoner is thinking of wearing safety shoes all the time, especially at home. Chet was using a motor drill and as the drill went through the piece he was drilling, it proceeded through his shoes, just missing his toes. Aren't you glad you had your big shoes on, Chet? . . . Ed Kayser gave a good demonstration of how to keep away from cigarettes last week as he produced a holder about three feet long which really puts the cigarettes a long way away from him.

Apparatus Department Organizes Safety Committee

Members of the newly-formed Apparatus Department Safety Committee are shown above, (l. to r.) J. J. Scott, Philadelphia Works; H. J. Jennings, West Lynn; T. I. Patterson, Elmira; J. P. Keane, River Works; H. A. Weber, Erie Works; S. L. Marsh, Fitchburg; J. E. Mercure, Pittsfield; C. B. Boshart, Service Shops; W. H. Evans, Schenectady Works; H. L. Smith, Fort Wayne; and Chairmon, F. T. Clarke, Supervisor of Safety for the Department.

Safety representatives from the various Apparatus Department Works met in Schenectady recently to organize a Department Safety Committee under the direction of Fred T. Clarke, Safety Supervisor for the Department.

"For many years," said Mr. Clarke, "safety activities in General Electric were coordinated by a general safety committee. This committee was made up of representatives from all plants and departments in the Company. However, because of the wide range of problems which confronted this committee, it was decided to reorganize safety on a departmental basis."



"At the present time," said Mr. Clarke, "there is still a General Company Safety Committee made up of representatives from each of the G-E operating departments. As the Apparatus Department representative on that committee, I hope to tell them of our latest plans and policies, and to learn the safety practices followed by the other departments."

General Electric has always had a good safety record probably because of the close cooperation between the Company and the men and women who work in the many plants and offices. Actually, statistics indicate that because of our well planned and directed safety program, employees are safer at work than at home or on the streets.

With the General Company Safety Committee formulating board policy for all departments, and our own Apparatus Department Committee coordinating the best in safety practices and information to all our individual works, General Electric should improve its excellent safety record.

Last week was National Fishing Week. However, we didn't hear many fish stories around our place. Take, for instance, the punch press section. Bob Walt was always looking for the White Sox scores. Charlie Francies was talking about the new garden tractor he plans to buy. Pete Heckler was just hunting lead boards. . . . Last week Walter Kryder really gave his thumb a whack with a hammer. He was a regular Van Boring. Never said a word(?) . . . A little bird told me that we had an elopement on the floor. Isn't that romantic and it isn't even June. The couple was Florence Lehrman and Jack Shady. Our "we wish you happiness" mat is out for them. . . . Also for Guianna Longardner for whom the wedding bells rang out last weekend. . . . Little blue bootied Kenneth William came to the William Hanke's home and will issue his calling cards from there. The mama Celeste Coppoline was a former co-worker. . . . It's a happy birthday to Louella Koogle, Louise O'Connell and Joe Jensen. . . . We are glad to report that Blanche Mountz is slowly recovering. She is at her son's home at 3207 E. Pontiac St. She would appreciate having her friends and co-workers visit her. . . . One of these times Erma Landes is going to be a roast chicken. She has a habit of falling asleep under the heat lamp, cooking herself to a turn. . . . Jack Dennis is sure that Lorena Buuck is going to be very interested in a new Buick now. After starting out in the old jalopy, it decided to quit breezing along. Leona was towed home by a tractor. . . . Someone reminded me that it was just 238 days until Christmas. I'll pass the information along to Juanita Likens. Last year she had to dash uptown Christmas eve and finish her shopping. . . . The Delbert Thomas's are still in the painting business. Their car is getting a new face of grey and the wheels a nice red. . . . Leona Hollis had a big increase in the family—eight baby pigs. Imagine all those little pork chops running around. . . . We have been wondering what that was Johnny Anderson had under his nose. The truth is out. It is a faint sprinkling of fuzz. He hopes it is a mustache some day. Handle bar type? . . . The girls had a farewell potluck for Emma Snyder last Friday. . . . On our sick list are Albert Knight, Lawrence Huffman and Katie Salmon. . . . What makes Mary O'Shaughnessy like to go to Avilla so much? Maybe, because it's spring. . . . Bernadine McCume has left to work in Bldg. 4-3. Louise Melvin and Margaret Hayden have gone to Taylor St. We will miss you. . . . We pause to pay respect to a former co-worker, Olive Adams. All who knew Olive had a kind word for her. To her family we offer our sincerest sympathy.

Edna Hille prepared a sumptous repast last Sunday evening for company but the birds got most of it. This delicious concoction was composed of escalloped potatoes with mushrooms topped off with pork chops. Taking this from the oven she placed it on the window to cool, going about making other preparations. She returned in a few minutes only to discover that her prize dish had slipped from the window, slid down the porch roof thence to the ground. This broke her heart as the only part that was salvageable were the pork chops. Preston retrieved these, washed them, gave them a recook, thereby saving the day. . . . A week ago we told you about the nice 1933 model car Ray DeBolt purchased for $50.00. We learn that he never drove this car as some unsuspecting person came along and offered him $50.25 for it, so Ray unloaded the burden, then turned around and bought a 1935 Ford. He tells us that it is a nice clean job and that it belonged to some old man that only drove it twice a year. That was once in the spring and likewise in the fall when he went to the courthouse to pay his taxes. How many times have we had to swallow stories like the above? He probably obtained this clunker from some junk dealer. . . . Clarence "Big Chaw" Schooley has a new pair of shoes which by the way are very nice looking. When asked what kind they were he told us they were "Gopher" shoes. Never hearing of this brand we are wondering if the spelling is correct. Perhaps it is "Go-For," for a complete explanation of this you will have to consult Ernie Close or Joe Turley as they seem to have the key to the whole story. . . . Elva McMaken was very much perturbed the other evening upon her arrival at home there was a notice from the post office that a piece of mail was there for her and to call for same. Thinking that it was important she called a taxi and proceeded to the post office where they handed her a patent medicine advertisement upon which the manufacturer had failed to place enough postage. She blew her top as she had paid out a 60 cent taxi fare plus 10 cents bus fare and the postage due on a useless piece of mail. . . . Archie Boren purchased a new car of the used variety. He had great plans for showing it off to the natives around Huntertown on Easter Sunday. As this day was the day of the big snow he nevertheless was determined to go through with his program so he mounted a snow plow on the front end and drove the old tub around showing it off to his friends. . . . R. Wesley "Buck" Adams being very much displeased with the type of handkerchiefs he has to carry to work consulted his wife on the matter. She promptly purchased him some red bandanas and embroidered large yellow butterflies in each corner. We will say that they are real classy looking and pack a terrific wallop but not for the pig iron division.

"When one lives above his income there is no doubt about the outcome."

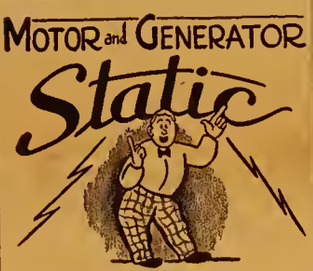
While George Skinnell was making out his weekly contact he had difficulty in finding the exact words he wanted to use. He said he wanted to state it like Shakespeare. Does anyone know how Shakespeare would have written a foreman's contact? . . . Clara Fulmer is a patient at the Methodist hospital. We wish her a speedy recovery and hope that she will soon be back to work. . . . Phil Miller brought some pictures of his little grandson to work last week. He certainly is a cute little babe with his two front teeth. . . . We're glad to welcome Kenny Johnston, Paul Koldewey and Ralph Walda to the first shift. . . . Bettie Foreman's daughter, Betty Lou, went to Washington, D. C., with a group from South Side high school last week. Among the many trips planned for them they were to attend a session of Congress. What an interesting way to learn history! . . . Ah, Spring is here—Noble Dinger made sure that no one else's "fancy" would turn to Theresa Miller. He placed a beautiful diamond ring on the all important finger. . . . Paul Bender's little girl, Bonnie, has the mumps. . . . Only 13 weeks until vacation. Happy thought.

Medical Memos

By Mary Heymann

The second Sunday in May, according to tradition, is observed as "Mother's Day." This day has been set aside to honor all mothers. Rather than have one special day, let us all try to be thoughtful and considerate every day. The following paragraph appeared last year in one of the columns of the WORKS NEWS: "Most of all the other beautiful things in life come by twos and threes, by dozens and hundreds. Plenty of roses, stars, sunsets, rainbows, brothers and sisters, aunts and cousins, but only One Mother in the whole world." . . . Ethel Carriger, R. N., formerly employed at Winter Street, is doing private duty. At present she is on a case at the Methodist Hospital. . . . Mr. and Mrs. Claude Fryback were among a number of Fort Wayne people attending the National Preliminary Contest of Barber Shop Quartets competing at Elkhart on Saturday night. . . . Changes are in the air! Berneta Welbaum is being transferred to days at Winter Street, and Mabel Wilson returns to second shift in Bldg. 21. Tradin' again—eh! girls? . . . The latest fad to hit the Dispensary gang is a little gimmick called a View Master. It all started when Mae Mulvane brought one back from her trip last fall. Since then three or four other members of the clan have purchased one of these gadgets, which involves a piece of equipment resembling a pair of binoculars and assorted reels of beautiful scenery and flowers. Minnie Fryback undoubtedly heads the list though, with around 106 reels. She also has a very nice plan of taking her View Master to ill or aged people who are confined indoors. . . . Olive Walters visited friends and relatives at Ohio City and Decatur over last week-end. . . . Several members of the Medical Section were invited guests of the General Electric, attending the Tuesday night session of the Safety Conference held at Chamber of Commerce. . . . Correction: It was Alta Bishop who baked the birthday cake for Olive Walters, instead of Mabel Wilson as per last week's news. Mabel corrected the error by saying she can't even bake pancakes.

Friends Bid Farewell To Murray



A number of Floyd Murray's friends in General Service gathered to say goodbye and present him with a gift when he left Friday for retirement, May 1. Left to right in the above picture are J. B. Greer, Supt. of General Service; William Altekruse, General Foreman; Harry Underwood, Eugene Poitet, Robert Hatfield, Richard Gallmeier, Ernest Lawyer, Franklin Willison, Mr. Murray, Walter Hein, Howard Boren, Charles Niblick, and Verl Patterson, Mr. Murray's foreman.

Olive Adams' family wants me to thank everyone for their kindness during their bereavement. . . . Glad to see Henry Shirley back, but Louie Sauers is wondering about Hank's pig and calves now since he won't have time to take care of them. . . . We checked up on Ray Snyder's gas mileage and found out that he was telling the truth about getting 24 miles to the gallon. One of the fellows who rides with him has a bicycle and he pulls Rays' car back to Decatur every evening. . . . Three of the fellows are taking their vacation this week. Glen Carney is going to see the Smoky Mountains; Henry Grepke is spending the week with his bees, and anyone complaining of sore arms or legs here is a new remedy. Henry (Red) Grepke has his famous bees sting you in the affected parts and zingo the soreness is gone. His first patient was Ralph Weikart. We haven't heard the charge but Ralph will let us know when Red sends him the bill. . . . Rudy Zelt has donned a dust cap, mop and broom to help his wife with housecleaning out on a farm south of town. And by the way if you find time you could go out and grease Harold Dalman's tractor. . . . Harold Prough is back on the balancing machine after being absent sometime. Good luck to you on the new home you are building at Hamilton Lake. . . . Have you heard we have a radio personality among us in the name of Herb Staak. He is a member of the Multo-cord Trio heard on WFTW at 5:15 p.m. on Saturdays. I heard you and it's quite all right. The boys in the Test and Inspection section have been pretty quiet here lately. What is the matter, boys, spring fever? . . . We don't hear Harry Berry sing "Beautiful Harry" any more. . . . Harmon never mentions his dog. . . . Elmer Koehlinger is as silent as ever. . . . Waldamar Schmidt hardly ever talks politics. . . . P. K. Valasheff quit eating garlic. . . . Lorenz Korte is as noisy as ever, and Alva Foulks talks to himself mostly about fan belts and rods. . . . This change of time really has Mildred Carpenter all mixed up. This morning on the way to work she discovered that she had two right-handed gloves and she thought to herself that she at least had shoes on that were mates. Imagine her surprise when she looked down and saw two different shoes—one with open toes and the other square, closed toe. . . . Congratulations to Ervin Zollinger and his wife who are the proud parents of a new son. At the last report all three were doing OK. . . . More congratulations to Clara Krudop who changed her name to Schneider when she married Fred Schneider last Saturday afternoon at the Emmanuel Lutheran Church. Clara wore a Toast colored dress with pink accessories and a California brown and yellow orchid. They had a family dinner at the Keenan Hotel and a reception for 50 at the Schneider home at 1344 Hugh St. . . . Everett Lindeman likes fishing so much that he takes his Saturday bath in a gravel-pit at a little town just south of Fort Wayne. . . . We've been instructed to call "Butch" Claymiller, "Whitey" from now on. He's an expert at honey-dipping anyway you look at it. . . . Ivan Ortner tells us he prefers to be called "Brownie" instead of Ivan, so please take note. . . . A birthday party was held for Irma Huhn and Louella Hockemeyer at the Colonial Restaurant and each was presented with a gift. Birthday greetings to Edna Rohrbach. . . . A lot of familiar faces are back again such as Patricia Stabler, Betty Kummer, Elsie Patterson, Bernadine McCune, Wilma Linker, Zelda Garrison, Edna Bauer and Cecil Foor. Hope you all stay a long time.

Too much familiarity breeds contempt.

Every office has somebody who is sorry that the boss is so ignorant.

Thought for the week: "That which we acquire with most difficulty we retain the longest; as those who have earned a fortune are commonly more careful of it than those by whom it may have been inherited."

ODE TO PAPPY

Attention, law enforcement men
For here a swindler hides.
He works right here among us
And on the street car rides.
He's small and thin and yet his grin
Would make you think he's happy.
His scant toupee is getting grey
And the boys all call him "Pappy."
He's very quick, and really slick,
He slings it by the yard.
He tries to hide, he moocbes rides
On his "Summit City" Card.

Harry Price, Bldg. 6-1, says that additional research on the Mystery Melody has brought to light the tune, "Put Me Off At Buffalo." Try this on your piano for size. . . . Reminiscing: When two old codgers get together and start discussing happenings of the past it usually provides an interesting hour or so of good listening. The other day Perry Shober, retired, met Ed Foley (just tired) and an enlightening conversation ensued. Among the gems originating from this meeting is the following: Ed, "Remember back in 1923 while you were in commutator production, I wrote you concerning a certain job and ended by saying, 'May I have your commens?'" Perry, "Yep, remember what I wrote back. 'I send you herewith a handful of comments, Shober.'" Those were the days. Yak, yak. . . . Walter Mitsinuis, famous golfer of Bldg. 31-1, has developed a brand new stroke. He calls it his "vertical drive." This new drive was perfected last week during a high wind. When the club came in contact with the ball it took off right straight up, and landed about 20 feet out on the fairway. Congratulations, Walter, we hope you win national recognition. . . . Speaking of golf, we think perhaps our genial manager R. M. Hartigan established an all time record with a trick shot executed while playing the Crooked Lake course a few years ago. Mr. Hartigan had lashed out a screaming drive and taken his stance preparatory to making a second shot. A hush fell over the audience; he swung. The ball leaped straight up and he hit a second time the follow through. For this feat he was given three loud "hurrahs" and a mounted deer head by his fellow players. . . . Elsie Miyata received some nice wedding gifts from friends in Bldg. 31-1. She was married Saturday evening. Her new name now is Elsie Kahienbeck. . . . Mr. Clyde Foley, Ed to the common folks, has been complaining bitterly lately about not being mentioned in the WORKS NEWS. OK, Ed, here goes. "Dear readers, Mr. Foley is a very, very prominent member of the American Greek Society." You're welcome, Ed. . . . "Maggie" Beck, Bldg. 31-2, celebrated a birthday May 2. Her 25th year, she sez. . . . Big John, president of Ed Foley's American Greek Society, visited in Toledo last week-end. The occasion of this visit was the Greek "Good Friday." For John it didn't turn out so good as in the course of the week, he lost his shirt (we mean literally) and it wasn't in a poker game, either.

Only one ad per employee may be inserted. Each ad must be limited to 20 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday, May 9, 1949

LOST AND FOUND

LOST—Green purse with zipper on top, containing Wolf and Dessauer charga-plate, $30 in cash, and personal papers with name Mrs. Louella Moor on them. Lost on Broadway near G-E.

REPAIR WORK ON ELECTRIC TRAINS—1132 Wabash Ave.

26-3 News

By Mabel Odel

Happy birthday to Martha Doehrman and Zelma Kuyoth. Martha was given a potluck dinner by her co-workers. Zelma said this was her 18th birthday, but George Brehn (Doubting Thomas) wants to know how many times. . . . We have heard that running into doors causes most of the black eyes. Edna Waterson sprung a new one on us this week. She had two shiners and a large bruise on her forehead. This is her story: She was taking the lead at the skating rink and someone tripped her, causing quite a pile-up with her on the bottom. It sounds like a whopper, but on the level, Edna, we do believe you. . . . Le Vona (Ma) Porter cuts quite a figure on skates too. Better watch your eyes, Ma. . . . If you find it impossible to get Ruth Freeland off her chair just call for Charlie. . . . Dave Mannix is getting rather chummy with the guy on the motorcycle. We hear that he received a free pass to a traffic court session. . . . Wanda Grimm's will-power to stay on her diet is paying off. She is "waisting" away to a mere shadow. . . . Dorothy McMullen is having trouble getting someone to haul the barnyard waste. Some people get money for it, but she can't give it away. Anyone interested? . . . Following Hap King around the floor has taken the stoop out of Stucky's shoulders. . . . Marge Dearmond found out that she isn't windy enough to put out an alcohol fire. Blow as hard as she might it had to burn itself out. . . . La-Donna Durbin must remember that she is a big girl now. It's not very lady-like to open a car door and fall out. . . . Edna Boland is the lucky gal that walked off with the $100 prize from the WIBC Bowling Association. Nice going, Edna.

Office Offerings

What is this we hear about all the furniture that Gene Mettler has in his house is davenports? . . . Can you imagine how you would feel if you hurried all the way to the parking lot and then discovered that you had left your car keys in the office? Maybe not all of us, but to know how foolish one looks was written all over Don Poland's face when he came back. . . . It looked like Bob Hunt might have led with his chin but he said it all happened because he got home in time for dinner once. Now, I'm asking you, folks, should we accept that? . . . We were told that Ed Bangert and Warren Wyckoff were seen making a mad dash down the aisle at the minstrel show in order to get in front of the camera. Ed made it with a full view of his handsome profile, but Warren just made it by his nose. . . . Need any shoes fixed? See Helen Deloff. We don't know whether she does half soles or not, but we do know she can staple them together.

A brute is a man who leaves his wife home all day long—without a cigaret.

Tricks In Transformer

—FROM DIVISION 91—

By Johnny McMaken

We are starting off a new month with many changes. Nearly everyone is wondering where he will be tomorrow. . . . Paul Conrad and Al Bearman have got their gloves and aprons on again. . . . Bob Quinn is baek on days, as Jacob Fulmer has started back to work again after a sick leave. . . . It looks like Paul Noffze is running a morgue. . . . Milligan got a break on the first day of his transfer. . . . Now that Tom Woodward is not on the shears, Bob Bunyan is trying to buy his rule for half price. . . . It looks like Tom Woodward is about as high as he will go now, he is on the fourth floor. Only one more to go, Tom. . . . Milligan has a genuine antiquc sword for sale, only $799. . . . The women in Bldg. 26 will cause quite a howl when they find out that our famous lover Virgil Howell is back with us. . . . George Horner has taken in more territory so it seems.

Sample Shop News Bldg. 26-2

Bob Keck tells us that his cats climb up in the pens and sleep with the rabbits. We wonder if these rabbits Bob has been selling have short or long tails. In case any of you buy any rabbits from Bob, you better order them with the tails on. Come to think of it, I had a long tail cat come up missing a couple weeks ago. Would you know anything about it, Mr. Keck? . . . We better not mention any names, but we wonder why W. L. W. had to change his trousers before he could come to work the other day. . . . There is no use saving those bugs anymore, fellows, to scare Jean Fry with as she no longer is afraid of them. . . . We all make slips once in a while but Louie Miller made a big one the other day as he wrote some orders up and then dated them 1947. Gee, Miller, where have you been the last couple years? . . . By the way it sounded around here yesterday, it must have been Elmer Hazelett's birthday as we heard Bob Smith (above all the rest) singing Elmer a happy birthday song. . . . We would like to quote the famous words of Carl Fletcher. "I just sat down to read Lines and Angles in the morning paper, you know I always like to read Lines and Angles." . . . Mr. Hartman was coming down the aisle with a broom in his hand and asking people if they wanted a ride on his broom. What were you trying to do, Hartman, pretend you were the old witch, or has the spring weather got you down? . . . What's this that we hear about Bob Glenn? It seems Bob was helping somebody at the lake build a pier, and he was in the boat working and the boat let loose and he fell in the lake. Next time maybe you better make sure you fasten the boat first before starting to work or else don't trust your luck too far. . . . We wonder who the fellow in the tool room was that smelled so pretty the other day. He swore revenge, so we will sit tight and see what happens.

Estabrook To Address State Teachers Group

John E. Estabrook, Assistant to the Works Manager, will speak on "The Need for Understanding" at a luncheon meeting Saturday of the Indiana Council of Teachers Unions at South Side high school.

Plan to get your Voltmen ticket early.

Inquiring Reporter

WHAT WOULD YOU DO IF YOU HAD BUT A MONTH TO LIVE

MARY ANN LAURENT

Decatur

"I would quit my job and tour the United States, then take what's left of my money and give it to my Dad and Mom. I also would be kind to friends. In general, I would just have a good time and a lot of fun."

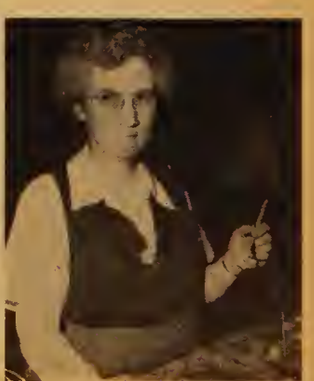
ELMORE R. HURT

Bldg. 4-4

"A pronouncement of inevitable death invariably causes a person to set their worldly and spiritual houses in order, and seek peace with their God."

THELMA STONE

Bldg. 18-1



"I think I would make only one noticeable change and that would be to spend more time with my family and friends."

JOE KITSON

Decatur

"If I only had a month to live I'd hope to get my new 'china clippers' at least two weeks before the time was up, so I could enjoy a good meal."

MARY RAUB

Bldg. 26-5

"That's a very difficult problem to answer. I suppose it would depend greatly on conditions at the time. I should be happy, but probably I would be so grouchy and expect everyone to humor me they would be glad to see the month roll by."

Let's Eat!

CAFETERIA and RESTAURANT MENUS

MAY 9 THROUGH MAY 13

BROADWAY TAYLOR STREET

Serving Hours:

Cafeteria—16-1 11:00 A.M. - 1:00 P.M. 10:48 A.M. - 12:30 P.M.

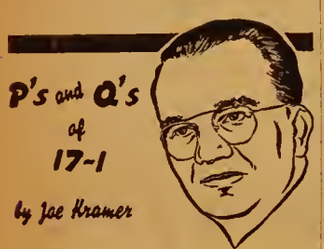
Breakfast served at Broadway daily from 6:20 to 7:50 A.M.

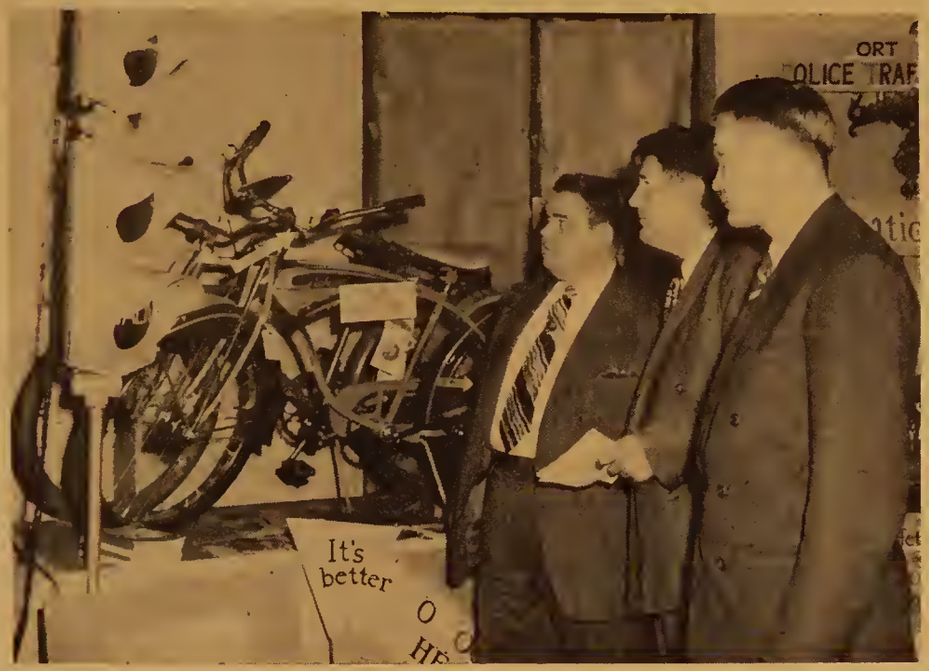
Special dinners and parties arranged upon request.



Menus Subject to Change

OUT OF THE BLUE in 26-2 office

by Delores Patterson



Mike Nasser, Ballast Engineering, has been nominated "Jolly Boy" of the week. Mike, even though an A-Course man, seems to get such a kick out of life and has the most infectious laughter of anyone in the office. Hearing him laugh (this usually occurs when he is reading those jokes in the TE paper) makes all within hearing feel that it's good to be alive! . . . "Joker" of the Week: The shoe repairman always gives a claim check to a customer who has shoes being repaired. Finding this check when it comes time to pick up one's shoes is another story, as Phyllis Fisher can tell you! Since the aforementioned gentleman cooperated so favorably by letting her point to her own shoes like any good bird dog, it would naturally seem like a good idea to pick out your own—which she didn't do. She had to take them back the next day. Not being accustomed to shoes, it's understandable! . . . A Shopping Bag: Kathryn Ernsberger takes off for "operation vittles" every Friday night. After carefully reading all labels to determine what can contains the most ounces for her money, she is no less than flabbergasted at the size of those little onions over there which would sure peel down to nothing. Will someone take her aside and tell her that big onions come from little onions. . . . Ginny Winegart was inquiring about a chain saw at one of the hardware stores. She was quoted a price of $6.65. She rushed home full of excitement, told her husband and then hurried back with the $6.65. She then found it was $665. Woe is me! . . . More Signs of Spring: We are very glad to see some of the girls getting out their summer dresses. Some of the girls now wearing them are Ilene Meyers, Ann Wade, Louise Klinker, Martha Newell, Mickey Huth. . . . The Drafting Division is very happy to welcome Ed Ellenburg. He has just been transferred from Drafting School. He is 21, and he moved to Fort Wayne from Indianapolis last fall.

We want to apologize for not having a column last week but there just was not enough news to warrant a column. We just about didn't get a column this week, but we could not disappoint the two readers that we do have. . . . We have noticed that the fame of Helene Evanoff has spread to other columns. Helene made the column from Bldg. 2-1 and also "Floor Lore from 4-4." . . . Another sign of spring is the annual housecleaning expedition. This year Ray Rodenbeck has been helping his wife with spring housecleaning. Ray holds the ladder to keep it from slipping while his wife cleans wallpaper and washes windows. . . . I mentioned that the column has two readers, one of them is Andy Lee from Bldg. 4-5 who said it was a great improvement in the WORKS NEWS last week when "P's and Q's" was missing. . . . Johnny Miles took his vacation a couple of weeks ago and spent the time designing a new stippling process for kitchen floors. It isn't patented yet, so you have to see John for further details. . . . Things I would like to be able to do: Bowl like Frank Quinn;. eat hot dogs covered with onions like Virgil Hartman; sing like Bob (Gravel voice) Dent. . . . George (Goldie Locks) Mosshammer is opposed to daylight saving time. George says he has a hard time getting used to it. He will have to get up an hour earlier now. Maybe Frank Martin should explain to George that he could go to bed an hour earlier, that way he would be able to get his ten hours sleep at night. . . . John Braden had a noticeable stiff back the other week. His only explanation was that he had to get in spring training and had started wearing his girdle. It just hasn't got limbered up yet and the two-way stretch hasn't started stretching. . . . Members of the office enjoyed a very delicious chocolate cake baked by Joe Kramer's wife. He brought the cake in last Friday. Later it was learned that Joe's wife had told him that there was no getting out of his washing down the kitchen walls the coming Saturday. Did that chocolate cake get you any help or was there no connection between bringing the cake and washing the walls. Anyway, that was a wonderful cake and everyone really enjoyed it. . . . Don't forget your booster ticket for the Voltmen baseball games. We have a championship team, let's go out to the park and give the boys our support. The team really looked good in their first practice session last Sunday.

A woman thinks it takes two to keep a seeret.

G-E Men Attend Industrial Safety Conference At Chamber Of Commerce

The sixth annual Safety Conference and Exhibit was held April 26-27 at the Chamber of Commerce under the sponsorship of the Industrial Safety Committee of the Chamber's Safety Council. Herschel Smith, G-E Safety Engineer for the Fort Wayne Works, is the general chairman of the Safety Council. More than 2,000 persons attended the conference and viewed the exhibits during the two-day session. Shown above (l. to r.), inspecting a new walk-wait signal, are Bill Guelzo, safety leader and member of the Personnel Services division at the Winter St. plant; Loyd Bodenhamer, of the Fort Wayne Works safety section and chairman of the Safety Council's exhibits committee, and Warren Sheets, safety leader and member of the Personnel Services division at the Tiffin plant.

"Mother" a most beautiful word in any language. Mother Dear, we want you to know we truly love you. Not only on this special Mother's Day but every day of our lives. We love you first because you were so good and kind to risk your own life just so that we might have life. Then we love you for nursing, guiding and teaching us from infancy to man and womanhood, yes even until the end of time to be good and God loving human beings and thus become a good, kind and understanding neighbor and eitizen. All the words we can write cannot describe the real meaning of a good Mother. We can only say may God bless you Mothers and make your life be very long and very, very happy.

Insulation News

Perry Como would be surprised to hear Elaine Allen's new version of the "Alphabet" song. "H" is for Harold "F" for Fremion, oh, oh. . . . If you think you have spring fever, you should talk to Franeis Isenbarger. Francis was eommenting on nature and its beauties the other day and this is what he said and we quote "This is really a late spring, the leaves have hardly any trees on them." And that's not all, Francis. Have you noticed that the feathers haven't nearly as many birds on them this year? . . . Last Thursday, Bill Lipp was feeling low and feeling tense, so he thought he'd smoke a cigarette. Red Noyes and Dorothy Lebrecht graciously offered Bill a cigarette and then calmly stood back while Bill turned slowly green. When Red and Dorothy stopped laughing, they admitted they had loaded the cigarette with glue. What happened to poor Bill? He came back feeling his level worst. I guess that will teach you to stick to one brand, Bill.

Monday, George Seibold left the Company on retirement after 28 years of service, most of them being spent in the commutator division. He has not been working for the last several weeks, following a series of oprcations, but is almost completely recovered now and able to spend a great share of time in his rose garden. He was presented with a gift check by his co-workers, and we all wish him the best of health to be able to do some of the things he's been planning when time would permit. . . . A few weeks ago Al Kissinger was busy selling tickets for a church fish supper. He found a couple of prospects in Howard Hoffman in Bldg. 4-1 and Cleon Oyer, formerly of Bldg. 4-1, but now at Taylor Street. After making the deal he said, "See you Friday." So on Friday night the boys and their wives drove up to the chureh early to be sure to get plenty of fish. When they arrived the building was dark, so they thought they really must be early. About that time they decided to look at the date on the tickets and found they really were early, just a week ahead of time. By that time the little women weren't going to be cheated out of a free meal so the boys had to treat them to a steak dinner. The following Friday night found them back at the church with the fish dinner in progress as scheduled. Bet they'll check the date on the next tickets they buy. . . . Justin Heaston bought a little calf from Virg Allmandinger and transported it by trailer to his dad's farm last Friday night. Much to his relief but boy's disappointment the trip was made without any misfortune or embarrassment. Now that the calf has been safely delivered the boys are wondering if it's the start of a big herd. Heaston wants to be a big cattle man, or if he intends practicing to become a eowboy. No comments from Heaston, only time will tell. . . . Ed Glusenkamp had so much fun puncturing inflated balloons at a downtown drug store one morning last week that he decided to carry the fun just a little farther. He took one home with him and that evening, filled it with air, laid it down on the floor, and waited to see just what Mrs. G's cats would do. One of them soon discovered it and after a few careful pats finally hit it with an open claw. The balloon let go with a loud report; the cat leaped straight in the air three times (so Ed says) then ran for cover and wasn't seen again that night. Looks like Ed is still trying to get even with the cats for his recent trip to the doghouse.

Metals Society Group To Sponsor Golf Party

The Fort Wayne Chapter of the American Society for Metals will sponsor a spring social meeting at the Garrett Country Club, Saturday, May 14.

Highlighting the day will be a Screwball Golf Tournament. The rules of play will be as follows: Foursomes will use only one ball and each player will carry one club (either No. 2 wood, No. 5 or 7 iron, or putter), to be assigned at the starting tee. Beginning with the wood, each club must be used in rotation throughout the game, regardless of hits or near misses.

Members of the local society and their guests may play some serious golf prior to the Screwball Tournament. The day's outing will be climaxed with a buffet supper, prize presentations and an evening of entertainment.

Arrangements for the outing and novel golf tournament are being made by D. W. Thompson, chairman, assisted by L. G. Reith, C. V. Bobay and G. A. Warwick, all of General Electric.

Ham Softball Team To Practice May 11-12

The Ham League softball team will practice at Packard Park Wednesday and Thursday, May 11-12, from 6 p.m. until 8 p.m.

Manager Bill Schible announced that there are still plenty of positions open, and urged all players over 35 years old to report for practice.

G-E GOLF

By Hugh Dubdit

The G-E golf leagues will start competition the week of May 16.

Fletcher Cubey, phone 307, is manager of the Monday afternoon group; Art Rowe, 640, Monday evening; Jack Jennings, 2390, Tuesday evening, and Winfred Kirke, 28-232, at Winter St.

The boys of the Small Motor League let their hair down in the Hi-Lo doubles tournament. It seems they do better after the season is over. The winners were Paul Walker and Kissinger with 1104. Second place went to Walt Whonsetler and Margarum; third, Highland and Runyon; fourth Frank Gitter and Adams.

Six hundred counts: Erv Haugk, 224, 220, 199—643; Paul Walker, 205, 269, 187—661; Frank Gitter, 192, 175, 245—612, and Lowell Welker, 200, 191, 209—600.

Two hundred scores: Highland, 201; Runyon, 205; Bill Miller, 207; Madden, 211; Ty Cook, 234; Billue, 208; Kammeyer, 202; Walt Whonsetler, 212; Margarum, 212, and Orv Doherty, 202.

Apparatus League

Arnold White waited until the second last night to shoot his first 200. H. Lauger is practicing to be a left-handed howler. His 256 was put together with seven Brooklyn hits.

Two hundred games: H. Langer, 256; R. Knepple, 226; V. Rump, 231; H. Spath, 201; D. Oesch, 202; R. Alcott, 218; R. Dunton, 210; A. White, 200; R. Hickman, 200, and Paul Perry, 202.

Masonic League

In the singles tournament of the league last week, Max Buckmaster walked off with first place. Other winners were Jones, Crayton, R. Crahill, H. Smith, Moore, Bickhard, Chevelier, Cox and Archer.

Max had a 612 count on games of 202, 211 and 199.

Two hundred scores: Somerville, 209; Dale, 206; Jones, 223; R. Crabill, 232; Art Crayton, 221; Bailey, 204; Archer, 205; H. Smith, 203, and 213; Bill, 207; R. Hickman, 217; Briant, 204; A. Hickman, 221; Shultz, Altegogt, 213, and Cass, 206.

Frank Quinn and Willies Lautzenheiser walked off with first place in this week's Hi-Lo doubles competition with a 1191 total. Other winners were R. Crabill, and Cass; Jones and Kohlenberg; Braden and A. Hickman; and Bledenweg and Moore.

Two hundred scores: Boerger, 211; Lauterberg, 200; Frank Quinn, 266; Harris, 212; Jones, 215; Miller, 202; Cass, 211; B. Sommers, 201, and Moore, 224.

Interdivisions League

Frank Matthews waxed hot to carry the Brouwer Tire and Battery team to the league championship. Frank had games of 232, 233 and 255 for a 720 series. Walt Mertz helped out also with a 600 series on games of 184, 211 and 205.

P.S. It is great to be carried along just for the ride.

Bowling and Stuff

This evening at 6:30 o'clock the tournament of champions will get underway to determine the winners of those pretty blue G-E Club sweaters.

Last year's champs, the Mikes of the Apprentice League are right back in there again this year, so come on down and root your favorite team to victory.

All league secretaries are reminded to send their final league standing to Les Shroyer, Bldg. 31-2.

Voltmen Sign Southpaw

Manager Charles (Red) Braden announced that the Voltmen have signed Ray Janikowski, a top Southpaw, to round out a powerful six man pitching staff.

The Voltmen got on Janikowski's trail at the National Semi-Pro Tournament at Witchita, where he pitched for the New Holstein, Wis., team. He had a hand in the Voltmen's championship then, as he worked the Golden Colo., Coors for 15 innings before finally losing 2-1 while allowing only five hits. That fete probably influenced his being voted the most valuable pitcher in the tournament.

His five years in organized ball include the first part of the 1948 season with The Milwaukee Brewers in the American Association. He left organized ball then and played the rest of the season with the New Holstein semi-pro team.

This season he had spring training with Oakland in the Pacific Coast League, but could not make a suitable deal on a contract so took a voluntary retirement to pitch for the Voltmen. He is 25 years old, 5 feet 10 inches tall, weighs 175 pounds, is married and lives in New Holstein, Wis.

The addition of Janikowski gives the Voltmen three right handers in High Orphan, Johnny Orphal and Charley Shipman; and three left handers in Al Hazel, Scott Cary and Ray Janikowski.

Voltmen To Play Chicago White Sox

Negotiations have been completed for the G-E Voltmen to play the Chicago White Sox in a game at Dwenger Park, Tuesday night, July 12.

Owl Golf League Re-elects Officers

The Owl Golf League had its organizational meeting at the Club last Friday and re-elected last year's officers for the coming season. Six captains were present, and two other teams are expected to be added for an eight-team league.

The opening date has been set for Thursday, May 12. The Thursday date was agreed upon to enable some players to compete in both golf and softball.

As usual the Hot Shots from Bldg. 19-1 will be there enmasse. They are two-time champs.

Anyone not yet assigned to a team is requested to be at Brookwood by 8:45 a.m. Thursday.

Owl Softball Team To Report May 11

All players on the Owl softball team are requested to be at Mcmillen Park Wednesday, May 11, at 9 a.m. to begin league play.

Voltmen Hold First Practice Session

The G-E Voltmen held their first practice last Saturday and Sunday at Dwenger Park. More than 300 fans were on hand to see 24 prospective stars play an intra-squad game Sunday, after the first session of warm-up practice on Saturday.

Among those who were trying out for places on the team were Morris Fisher and Bill Bower. Fisher is a high school student from Cincinnati and Bower graduates from South Side high school in June. Fisher is a pitcher and Bower, a catcher.

John Dudick looked good in the infield practice and was actively slamming homers over the left field fence. Stan Miasek, another newcomer this season, alternated at first base with Olin Smith from last year's squad. Roy Kilby, Columbia City high school coach, showed as a good prospect in his handling second base. Stan Shargey was on the hot corner and Dudick was at shortstop.

Another newcomer, Don Runge, shared outfield duties with Paul Dyke and Bob Doering, a senior at Valparaiso University who was trying out. Dan Votaw of Huntington, was trying out for a hurler's berth.

Mel Kestner, an ex-Voltman, gave assistance in the batting and fielding practice. Doing the catching were Serge Shuster, Bob Lyle, Stan Cox and Bill Bower. Of the four, Shuster is the only one who has been signed. Lyle hails from Milwaukee, Wis., and has been playing organized ball for two years. New Yorker Stan Cox played with the Yankee farm system for two seasons.

Scenes during the two-day practice session are shown above. At the top, from left to right: (1) Paul Dyke slams a homer, while Bill Bower (catcher) and Don Runge watch; (2) Roy Kilby is on the pivot play which Stan Shargey started; (3) Hugh Orphan is pitching, while Roy Kilby is in the background at shortstop, and (4) Charley Shipman, pitching.

The bottom row, from left to right: (5) John Johnson (umpire) and Bill Bower (catcher) watch the ball soaring into the outfield, as Bob Doering runs to second; (6) A player is safe at home after going from second base on a single. Bill Bower is catching; (7) Scott Cary, pitching, and (8) Manager Charles (Red) Braden has his father at his side to give him some good pointers in selecting the Voltmen roster.

The Voltmen will play the Anderson All-Stars at Anderson, Saturday and Sunday in two exhibition tilts. Another will be staged at Dayton, O., Tuesday, May 10, against the Homestead Grays of Washington, D. C. The Grays will then come here for a tilt with the Voltmen Saturday night, May 14.

The official opening of the season will be staged Sunday afternoon, May 15, at 2:30 p.m., when the Voltmen entertain the Michigan City Cubs.

May Day has come and gone without too much excitement throughout the world, just the usual unrest, the continuation of the cold war; but we in America can usually find peaceful things to do. I strolled out among the growing fields—the woods and its wild flowers, the budding trees, how calm and peaceful—how wonderful, this country of ours. . . . Next Sunday we pay tribute to the MOTHERS of America, some of us with a white carnation. Some more fortunate than others. . . . Gurney Lindley was out cruising in that new car last Sunday. Just like a boy with a new toy. . . . Why Ozzie (Me-Too) Nahrwold looked at the bulletin board Monday a.m. before he took off his coat wasn't too much of a mystery. If he was surprised not to see the cartoon he expected, his surprise wasn't long lasting because the echoes of the whistle had scarcely died away when one made its appearance. . . . What some fellows won't do to get their name in the column. Last Friday Gene Werling, who has been keeping me busy writing about his antics, took the busy time in the cafeteria to mess up the floor by pushing his tray off the end of the line. It is rumored that Herb Kenworthy is planning on erecting slow and stop signs for Gene's benefit. . . . Jim Stetler left Monday returning to Bldg. 19-5. Good luck, Jim, I'll miss that balanced chair. . . . We all miss Jim Zuber who left last week and our place shows that Jim is gone too.

Old Fashioned Dance To Be Held Tonight

Joe Taylor, director of the Red Bird recording band, is shown in the foreground (above) instructing various steps in square dancing to the Family Night committee for tonight's Old Fashioned Dance in the G-E Club auditorium. Four of the committee members are demonstrating how to "duck the oyster." Left to right are William Weber, Ed Parker, Bill Allen, Hubert Myers, Erven Huth, Jerry Duryee, George Hoopingarner, Al Tharp, Carl Reynolds and Bill Hunt.

Tickets are free of charge to all employees and their families and may be obtained today at the G-E Club and Bldg. 18-B candystands and at the personnel offices at the Taylor St. and Winter St. plants.

DIVISION 95

By Walter E. Pohler

A new service to employees has been established in our division. This new service has been setup to give advice to all gardeners. Al Miller will head the new activity. Mr. Miller, as most of you know, has had wide experience in gardening. Several days ago a small group of people were discussing the pros and cons of planting a garden. Mr. Miller stated that he always plants onions around each hill of potatoes. The purpose of this method of planting is to insure plenty of moisture during dry periods. The onions will cause the potato eyes to water, insuring plenty of moisture for the potatoes. From this example it can readily be seen that Mr. Miller knows a good many tricks of gardening that are worthwhile. With this experience, Mr. Miller should be well qualified to head this new agency. Anyone desiring such information is directed to submit his request direct to Mr. Miller. . . . Everyone knows that Ned Biddle is inclined to be a little nervous. We understand that last Saturday was no exception. It seems the children's wagon is normally kept in the garage. Last Saturday the wagon could not be found. Ned was sure some —— —— kids had stolen it and he patrolled all the alleys in the vicinity of the Biddle residence searching for it. No luck. Ned is still mad. However, we are informed that the real truth of the story is that Ned was playing with the wagon and some big kids came along and took it away from him. . . . We are sorry not to have had full information last week about Noel (Big Wheel) Smith and the eggs. Noel states that he spent considerable time washing the eggs and feels he should receive some compensation for his labors. He also feels he should be reimbursed for the cost of the carton. . . . One never can tell what Mary Jane Bakle will be up to next. For verification of this contact either Alta Franklin or Charline Cramer. . . . John Kintz and Irene Shroyer have been on the sick list. We wish them a speedy recovery. . . . We understand that Dorothy Campbell buys small bottles of Alka-Seltzer just to get the bottles for use in carrying catsup and similar items in her lunch. Anyone who has a need for Alka-Seltzer can get some by asking Dorothy. . . . Florence Purdy is reported to have the heartiest laugh of anyone on the floor, and she keeps every one around her laughing also. . . . Saturday, April 23, Alvina Koomler moved her clocks up one hour. Guests were invited for 12:00 o'clock dinner on Sunday. At the appointed hour dinner was ready but there were no guests. After considerable wait the guests arrived and Alvina discovered that daylight saving time would not start for a week. . . . The General Electric Company has one organization of which the company as well as all of the employees should be justly proud. We are referring to the Aeolian Choir of the Decatur Plant. We had the pleasure of hearing this choir sing "Built on a Rock" by F. Melier Christensen, as its contribution to the Westminster Choral Festival, at Zion Lutheran Church Sunday evening, May 1. The choir and their conductor David C. Embler, are to be congratulated on their fine presentation of this beautiful choral number. As a suggestion to the family night committee of our Club, we believe it would be very much worth their while to have this choir sing at one of the family night programs.

Have you noticed Leona Zwick getting heavy lately? It's all over now—all those free luncheons that her bowling scores won are through for the year. Oh well, September isn't too far off, Leona, you won't get too hungry. . . . Our winding girls gave a surprise luncheon for Ed Klomp to celebrate his 30th anniversary with G-E. All the folks had a swell time surprising Ed and a wonderful lunch. From all your friends, Ed, we wish you many more years and may they all be happy ones. . . . Charlie Schild paid us a welcome visit Monday. Retirement certainly agrees with him. Come again soon and thanks a million for the pictures. . . . Anyone who has items that are useful for scavenger hunts, check with Don Kruse before parting with such. Last week-end the door bell rang and upon answering Don was confronted with two small girls who were looking for an empty catsup bottle for their scavenger hunt. Don wasn't able to get them any, so they requested a lock of gray hair (should I finish the story, eh, or should I say that Don could have bought a bottle of catsup, poured it out and given them the bottle, but a lock of hair?) Don replied, "A lock of hair, why I don't even have a lock of hair." The girls smiled and went on their way. Don has lots of experiences, but none of them are hair raising! . . . Dick Siedel will probably suggest an escalator for Bldg. 17-4 since he has found that the elevator will not wait for him. He really wore that wide-eyed, open-mouth stare of amazement the other night when he became so deeply interested in seeing that everyone got on the elevator, only to find that the door was closing in his face. . . . The past few weeks Tony Miller has been trying to defend his outboard motor which is temperamental, that is, it runs in a barrel of water at home, but at a lake it refuses. Recently Tony had the opportunity to go out on the lake with a couple of fellows who had a Johnson outboard. "Hard Luck" Tony didn't ride along. A game warden stopped them and made them take the motor off; lake too small, wrong season of year, conservation laws and that sort of thing, you know. . . . Belated birthday greetings to Maxine Baker who celebrated the 26th. We wish you lots of happiness in the years to come, Maxie, from all the gang.

Ye Old Meter Girls Elect New Officers

A party for Ye Old Meter Girls was held April 26 at Dehler-Hughes hall. The following officers were elected for the coming year: Chloe Lee, General Chairman; Bernadine Gocke, Co-chairman; Bertha Mattes, chairman for the fall party, and Agnes Thompson, chairman of the spring party.

Elex Club Board Meetings Are Scheduled For May 18

The Elex Club board meetings will be held Wednesday, May 18, in Bldg. 8-2. Rachel Fisher, vice-president, will preside at the night girls' session at 1:30 p.m. in Room 204. The day girls will have their meeting at 7:30 p.m. in the large conference room, with Charlotte Stanford, president, presiding.

A blotter is what you look for while the ink is drying.

Spring is really here. Dale Irwin has discarded his winter togs and is coming out in his light gray outfit. . . . Milo Heller has started a new fashion for men. He was sporting a blue head scarf to keep his "curls" in place. . . . We understand Ife Holmes had "Mac" paint his car. Mac residing in Garrett told Ife he would bring the car in to him. However, someone stopped too quickly and Mac didn't stop quick enough and Ife's car wound up in a garage, and poor Mac had to hitch-hike back to Garrett. . . . Margaret Lepper was disappointed not to see her name in the headlines in Monday's sport section. She bowled a 358 in the tournament Sunday. . . . Cleon Oyer finally won a bet, after losing every week for months. Now the boys are in a dither as to who their next victim will be. . . . Walt (uncle) Niemeyer sure will be freewheeling to the better places now. He loosened up and bought one of Walter Chrysler's "joy wagons". . . . Russell (Dopy) Scherrer wants to have someone explain the difference between a hot and cold spark plug. . . . It will pay Cleon Oyer to read the fine print on any tickets he buys in the future. A week ago Friday he took two guests to a church fish fry. They waited and waited but no one showed up. It seems the dinner was not until the following week. By the way, it cost Oyer anyway. He took his friends out that evening also. Sometimes it pays to keep our dates straight. . . . Mike O'Grady certainly gave a squad car competition. With sirens blowing and Mike's horn stuck, all bedlam broke loose on Taylor St. . . . Art Bear is flying in the clouds since he got his new car. . . . Bob Kissinger is downhearted. He has a new Ford and the boys insist that the price has really dropped. . . . Maxine Daniels is hoping they never have any visitors too soon after their evening meal. It seems Danny always dries the dishes for her in his BVD's. . . . Mr. Niemeyer was quite thrilled about the bargain he received when he bought his car. But it seems when he went to get it they had sold it to someone else. After pleading with the salesman, he finally got another car. . . . Anyone finding a fish sack floating on Snow Lake, please return it to Jerry Uhl and Al Eichler. . . . Jack Binkley is going to present a bill in Congress to make all electrical companies put their lines under ground. It seems he has trouble running into guy wires. . . . Clarence Weist came into work all dressed up last week. We understand he was a guest at the Van Orman Hotel. . . . Did Emil Bersch get in the wrong line at the clock rack? He seemed rather confused when he checked in. . . . Happy birthdays for the month of May are wished to Bernice Troutner, Etta Everly, Rosmond Schooley, Margaret Lepper, Helen Burns, Nora Roser, and Bill LaVine. . . . Our very best wishes to Sophia Bodigon who will say "I Do" May 14. The girls had a lovely farewell dinner for her at the cafeteria and presented her with a gift.

The reward of one duty done is the power to fulfill another.

The way for a woman to manage a man is to make him think he manages her.

Voltmen Schedule

Sat., May 14—Homestead Grays, 8:15 p.m.

Sun., May 15—Michigan City Cubs, 2:30 p.m.

Tues., May 17—House of David, 8:15 p.m.

Thurs., May 19—Benton Harbor Buds, 8:15 p.m.

All games will be played at Dwenger Park

Erben To Address Squares' Meeting

H. V. Erben, Vice President of the Company and General Manager of the Apparatus Department, will address members of the Squares Club at a meeting Wednesday, May 18, at 7:30 p.m. in the Squares Hall.

The club will also hold its annual election of officers.

Mr. Erben, a Yale graduate, came to General Electric in 1920 as a test engineer. His first job after leaving Test was in the Lighting Engineering Department, where he spent about a year before transferring, in 1923, to the Apparatus Division of what by that time had become the Central Station Department.

In 1928 Mr. Erben was made Assistant to the Manager of the Apparatus Division, Central Station Dept., and he became Division Manager the following year. He did so well on this assignment that, when the old Switchgear Department became a division of the Central Station Department, Mr. Erben seemed the logical man to send to Philadelphia as manager of the new unit. He was given this appointment in 1933.

Mr. Erben was made Assistant Manager of the Central Station Department in 1939 and Manager in 1941. He was elected a Commercial Vice President in 1944 and was made Assistant General Manager of the Apparatus Department in 1945. On the retirement of Roy C. Muir, Jan. 1, 1948, Mr. Erben was elected a Vice President and became General Manager of the Apparatus Department.

Following Mr. Erben's talk, the election of officers will be held and refreshments will be served.

H. V. Erben

Elex Club Sets Deadline For Niagara Reservations

Reservations for the Elex-sponsored trip to Niagara Falls, June 11-12, should be made by Friday, May 27, it was announced today. A five dollar down-payment must be made to hold the reservation.

The fares for the excursion are $31.50 for members; $33.50 for non-members, and $22.35 for children. Expenses for those with railroad passes will be $13.15 for Elex mem-

G-E Voltmen Open Season

MBA To Resume Collection Of Class A Dues

The MBA General Committee has approved the resumption of dues to be collected by the employees' Mutual Benefit Association on Class A coverage.

Effective June 1, payroll deductions will be resumed. Dues collections for eligible members have been suspended since Dec. 1, 1948, at which time the fund reached a maximum coverage of $17.50 per member. The fund will have reached a minimum allowable coverage per member of $12.50 by June 1.

All members off for lack of work, whose continuity of service is protected under the rules of the Company, have been covered on Class A coverage since the effective date of the suspension of dues.

To have retained dependent coverage, it was necessary to have paid in advance monthly while off for lack of work.

Effective June 1, all members off for lack of work may retain both Class A and B coverage only by paying monthly in advance. Such members are not eligible for disability benefits under Class A.

Employees being laid off for lack of work should arrange for monthly advance payments by contacting their respective payroll sections or the MBA office, Bldg. 8-2, in person so that such payments can be forwarded to Darrell Williams, Bldg. 18-1.

Mayor Branning To Toss Out First Ball During Ceremony Sunday At Dwenger Park

The official season's opener for the G-E Voltmen will be staged Sunday afternoon at 2:30 p.m., when the defending national champions meet one of their arch Michigan-Indiana League rivals, the Michigan City Cubs.

Milt Marx, radio announcer for Station WOWO, will act as master of ceremonies during the opening program. Gene Moss, Bldg. 8-2, will sing the Star Spangled Banner and will be accompanied on the trumpet by Don Bendel, whose father, Francis, is employed in Bldg. 20-2. The color guard of American Legion Post 47 will take part in the flag-raising ceremony.

Mayor Henry E. Branning, Jr. will officially open the season by tossing out the first ball, after Manager John (Red) Braden introduces all the players.

Carl Reynolds is chairman of arrangements for the opening ceremony.

Carboloy Control Plan To Be Presented Here

Engineers of the Carboloy Company, Detroit, Mich., and representatives of the Apparatus Department's Methods and Equipment Division will present their Coordinated Carbide Control plan at the Fort Wayne Works Thursday and Friday, May 19-20.

Invitations have been mailed to all those concerned with the plan. The program for the Fractional Horsepower Motor manufacturing group will be presented Thursday morning in the second-floor conference room at Taylor St. The meeting Friday will be held in the large conference room of Bldg. 8-2 for members of the Specialty Transformer and Ballast divisions, Motor and Generator divisions, and the Works Service divisions.

The Coordinated Carbide Control plan is a program for coordinating all phases of carbide tool-design application and maintenance for all

Works Manager.

Foremen, Supervisors Hear Talk By Merrihue

The Fort Wayne Management was host to members of the G-E Foremen's Association and the Supervisors' Club at their semi-annual dinner Wednesday evening in the G-E Club auditorium. "Good Bosses" was the title of a talk presented by W. V. Merrihue, Manager of Employee and Community Relations for the Apparatus Department. Seated at the main table, above, are: (l. to r.) J. M. Crawford, Manager of the Large Motor and Generator divisions; Everett Lindeman, president of the Foremen's Association; Mr. Merrihue; C. H. Matson, Fort Wayne Works Manager; W. C. Wichman, Manager of the Specialty Transformer and Ballast divisions, and Ivan Rinehart, president of the Supervisors' Club.

Here Is One Fashion We Are Glad To See Go

"Peg legs" and "steel wings" used to be the fashion among old time railroad men. Just in case you might not know, the "peg legs" would be just wooden ones with a leather strap or two to fasten on to a stump of a flesh and blood leg, and a "steel wing" would be a sharp steel hook also strapped on to a stump of an arm. We don't see many of these monstrosities around these days. Time was, when there were many. They resulted mostly from careless railroaders sticking their hands and legs in places where they were caught and mashed . . . between car couplings was one place.

And then came the safety movement which gradually swept over the country. "Peg legs" and "steel wings" began to go out of fashion as a mark of distinction for an old railroad man. In our own business too, while we didn't have many "peg legs" and "steel wings" we used to have lots of hands without fingers and lots of feet without toes and a few glass eyes giving their new owners headaches. Now however it's a rarity to see a man lose a finger, much less an eye. In fact a finger is a pretty important part of the human body and the loss of one is a reflection on everyone in the outfit. And when an eye loses its power of sight these days, there's the dickens to pay. In other words we too have learned that safety pays . . . every waking hour.

Foremen, Supervisors Hear Talk By Merrihue

"In your lap is the future of not only our company, but of the whole free enterprise system," was the challenge presented by W. V. Merrihue to members of the Foremen's Association and the Supervisors' Club at their semi-annual dinner Wednesday evening in the G-E Club auditorium.

Mr. Merrihue is Manager of Employee and Community Relations for the Apparatus Department. His topic was "Good Bosses."

In the opening portion of his talk, Mr. Merrihue outlined the following major requisites of a job, as desired by most employees: good pay, good working conditions, job security, good bosses, fair promotion practices, respectful treatment, full information, belief in the job's importance, and job satisfaction.

"A good boss is the key man in the realization of most of these job requisites," Mr. Merrihue pointed out, "for he can satisfy more of them than any other individual or group."

W. V. Merrihue

Lists Characteristics

In listing the characteristics of good leadership, Mr. Merrihue gave the following as the most important:

(1) Adequate technical knowledge
(2) Administrative ability
(3) Social insight or knowledge of people
(4) Ability to make good and prompt decisions
(5) Dynamic and ceaseless ambition
(6) Sense of deep responsibility
(7) Character
(8) Personality

"Always think of what you ought to do for other people and then do it," he advised concerning his discussion of character. Then he described personality as that "package in which a man presents his characteristics to the people whom he serves."

Manners Are Important

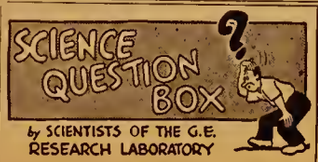
"Today the public must not only have confidence in our products, but also in our leadership and handling of people," Mr. Merrihue stressed. He then called upon the foremen and supervisors to "brush up on our management manners."

Mr. Merrihue then cited the excellent job being accomplished through foremen's conferences, a project instituted at the Erie Works. He added that the plan is also now in operation in a few sections of the Holyoke and Schenectady Works. The Tiffin plant is planning to start the project sometime in the near future.

"These meetings of employees with their foremen give the employees a real feeling of significance in our system of free enterprise," he pointed out.

Reads Two Letters

In conclusion, Mr. Merrihue read two letters to the audience. The first was from President C. E. Wilson to H. V. Erben, Vice President and General Manager of the Apparatus Department. In it, President Wilson stated:



"We must correct information and set up a two-way communication plan for all employees."

The second letter was written by a woman-employee of the Fort Wayne Works and was addressed to L. R. Boulware, Vice President in charge of Employee Relations. The letter was written to commend the Company in its program for better employee relations; it cited the fine spirit of cooperation existing between the employees and the foremen in certain Fort Wayne sections.

Mr. Merrihue was introduced by C. H. Matson, Works Manager.

FAT CHANCE FOR A GARDEN! By COLLIER

Q. How fast does a bowling ball travel?

A. In one series of tests made recently the average speed of the ball was found to be about 30 miles per hour, with 37.5 miles per hour as the highest speed recorded.

Q. Of what use is the study of astronomy?

A. Astronomical observations are necessary for the determination of time and of accurate positions on the surface of the Earth. Modern physics is closely allied with astronomy because in the stars we may observe atoms under conditions of temperature and pressure that we can never hope to duplicate on Earth. Scientists first learned that atomic energy could be released by studying the Sun and stars, where such processes are going on all the time. However, the chief value of astronomy is probably a philosophical one that is no less real even though it is intangible, and that is the concept it has given us of the place of man in the universe of which he is part.

WHAT'S NEW IN PLANTS & LABS

PITTSFIELD — Two large General Electric Power transformers, one rated at 80,000 kva, the other at 45,000 kva, have been installed at substations of the Cincinnati Gas and Electric Company.

The 80,000-kva unit, an autotransformer, at the Hartwell substation is the largest in capacity in the CG&E system. Because of the use of forced-oil cooling, however, it weighs less and is smaller than the 45,000-kva transformer.

Due to its weight of 80 tons, the 45,000-kva unit arrived at the Front Street substation by special freight car, traveling at a maximum speed of 35 miles per hour along a circuitous route from Pittsfield, Mass. As finally installed, this unit weighs 125 tons.

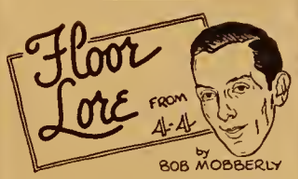
SCHENECTADY—When Major Richard Johnson flew his F-86 to a new world's speed record of 670.981 miles per hour at Muroc Air Force base last fall, his wings rode the tremendous thrustpower of the J-47 engine. Designed and built by General Electric, the J-47 engine represents more than a three-fold increase in thrustpower over the first Air Force jets flown in 1942. Thus, in six years of experimentation and development on jet engines, thrust output has been increased from the original 1400-1500 pounds to the J-47's maximum blast of over 5000 pounds thrust.

Meet the President

These four-day weeks seem to cut down on the news as well as the pay checks. . . . I think all of us who were lucky enough to have tickets for "Oklahoma" enjoyed the play immensely. . . . Now that we are having such nice weather I think everyone could really enjoy these three day week-ends if it wasn't for the short pay checks. At least everyone should get all those little odd jobs finished that we just never seem to find time to do. . . . Saturday Macke and friends played nine holes of golf for the first time this year. I wonder why no report on their scores? . . . Dick Reinking claims playing ball in the sun causes his eyes to be so red and swollen. At least it's a more original excuse than bumping into a door. . . . Ward Staley opened the week-end working in his yard and has a nice sunburn to show for it. . . . Morton and Wagner went fishing last Thursday night. The first time Mort told about the fish they caught there were 43, but it's really amazing how those fish grow each time the story is repeated. . . . Joe Rowan is late to class nowadays, because he stops off to get in a few quick polishes on that new Olds. . . . Reinking "gets around" pretty good on skates, but all Harry Meads had to do was walk into the rink and a cute little blonde skates right over. They are seen leaving the rink together a few minutes later. Dick wonders if he always has that trouble with blondes hanging around or if the new paint job on his convertible is to blame. . . . They're building these Fords so big these days that they have to be parked on an angle in small parking lots, eh, Whitie? . . . Highlight of the G-E War Vets party was a rousing game of "Hearts" with Bergman, Birkenbeul, Woenker, Schmidt, Rasor and Gebert cutting each others throats. Of course, Rasor was the winner—he kept score. Leffers kept the boys cooled off with that light amber fluid. . . . Here is a description of a certain play during a recent softball game, "Swat" went the bat as it connects with the ball. The ball took a long arching flight out to center field. "Clumpty, clump" went the sound of "Cousin Weak Eyes Goeglein" as he galloped across the field to snare the ball. A similar sound was heard as "Butterfingers Birkenbeul" galloped toward the ball. Each man was crying "I got it." Well, the action that followed you can guess; both men "clunked" heads and the ball bounced off Birkenbeul's konk.

It's Windy Here

FHP Motor Division 17 Office



By Joan Aubrey

FLASH—Perry O'Neill is the proud father of twin girls Karen and Sharon. Perry is so happy that he has no doubt told everyone in the Fort Wayne Works by now, but we still wanted to make a public announcement of it. Perry says he is open for suggestions as to how he can build a rumble seat on the baby buggy and an extention to the baby bed. Congratulations, Perry and Mrs. O'Neill. Even if they won't be able to play football, they will make swell cheer leaders. . . . Monday morning several people came in with the first sunburn of the season. Joan Liebig looked like a cooked lobster and Gordon Smith was a bit red behind the ears and the back of the neck from working in the "back 40 acres" of his "farm." . . . Welcome to Florence Knight, who has joined our Production Section, and to Arnold Bowers, the latest member of the Cost Section. . . . We are also happy to have Harold Eggeman and Gail Kreager with us in the Wage Rate Section for the next few weeks. . . . Thelma Stapleton was one of the select few that was able to see "Oklahoma" last week, and she said she really enjoyed it.

Completes 40 Years Of Service

Stephen Morrell, Bldg. 19-2, recently completed 40 years of service with General Electric. On his anniversary he received a 40-year certificate denoting his long service. Attending the presentation were: (l. to r.) Ernest Allmandinger, A. A. Fox, Mr. Morrell, Maurice Archbold, Lee Anderson, Foreman; C. W. Hale, General Foreman; and R. M. Hartigan, Manager of Manufacturing, Large Motor and Generator Divisions.

For the highly superstitious, today is that day to beware. Whether you superstitious folks are aware of it, today is Friday 13! Be careful of those ladders, black cats and broken mirrors. . . . Spring or early summer is definitely here now for certain, as we witnessed Nena Foster wearing her summer frocks lately. . . . We were amused at Harold Mettler's explanation as to how he came to read the instruction and operation manual thoroughly before operating the new machine. After the accident occurred he read the manual over again, and according to his latest word, at no place did the book say NOT to insert fingers in the revolving reel! It's wonderful to possess that much humor even in view of the seriousness of your accident, Harold. . . . That picture, clipped from one of the local newspapers and titled "Elmore Hurt" certainly doesn't do Elmore justice. After all, fellows, he does shave a little more often than that! . . . For Howard Keppler, it was one of those days when the fellows from the exchange plan bench threatened to cut his necktie off. Apparently Kep took them at their word as he was observed shortly thereafter minus the tie!

Rowe Is Appointed Assistant Manager Of Ballast Sales

A. E. Rowe

A. E. Rowe has been named Assistant Manager of the Ballast Sales division, Specialty Transformer and Ballast divisions.

A 1943 graduate of Indiana University, Mr. Rowe received his A.B. in industrial psychology. He also graduated from the Graduate School of Business at Harvard University during his service in the Navy.

After leaving Indiana University, Mr. Rowe served with the Navy's Pacific fleet as a supply officer and as a dispersing officer in the Chicago district. He left the Navy in 1946, and at the time of his discharge was a lieutenant.

Mr. Rowe came to General Electric in 1946 as a sales engineer for the Specialty Transformer and Ballast Sales Divisions. He remained in that position until his recent appointment.

His hobbies include golf, bridge and softball. Mr. Rowe is a member of the Junior Chamber of Commerce, the Elks, and the General Electric Squares. He is married and has three children, two daughters and a son. The Rowes live at 3615 Winter St.

Carboloy Control

(Continued from page 1)

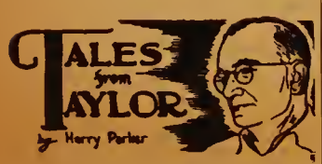
types of tools and cutters, both single and multiple point, through a system of centralized control.

The plan is designed to increase the efficiency of carbides now used in the plant, to broaden the uses of carbides, and to assure the getting of every possible benefit from carbides whenever used. It is based upon principles of operation proven successful in the past by outstanding companies in industry and incorporated by the Carboloy Company into a compact, workable program.

Elex Club

(Continued from page 1)

bers and $15.15 for non-members. These prices include transportation by train, lodging at the General Brock Hotel, meals and tips on diner, baggage handling, bridge tolls, sightseeing tour and transfer to the hotel and train.



The following information should be given when the reservations are made: Name, address, birthplace, age, and marital status. Naturalized citizens should have naturalization papers and everyone must have a birth certificate.

Life is not a bed of roses—or did you know it? . . . We are going through a period of adjustment in many ways and until we find the leveling off line we will all be in a state of unrest. The consequences of the readjustment period are far from pleasant and we must say "goodbye to many of our friends. We hope that you will find happiness in your new work and that in leaving you will carry with you many pleasant memories and the thought that it is very difficult for your supervisors to make the decision that necessitates your leaving. We have lived through these unpleasant conditions before and we can do it again. We hope we can come up smiling this time without another war. Anyway—it is better to live in America than in the Old Country—whatever happens. There is always a silver lining to the dark cloud—if we bother to look for it. . . . Last Wednesday noon, Hazel O'Brien and Harriet Dewart honored Lee J. Miller, who is retiring the first of June, after a nice vacation, and Harry J. Nickles who will change to the second shift, with a luncheon party. It is always nice to be remembered isn't it? . . . Today marks the last day in Bldg. 18-B for Hazel O'Brien as the attendant in charge of the canteen. We will miss her happy smile and hope that she will find as many friends in Bldg. 19-B as she is leaving in Bldg. 18. The canteen hours will be adjusted (just one more adjustment, folks) to 9:15 to 10 a.m. and from 2:45 to 3:25 p.m. Margaret McKering will be in charge during that time. Better start now forming new habits in your snack time. . . . Every year, Sid Johnson goes back to the Derby in order to renew his "Southern Colonel" commission or could it be the mint julep that is traditional? Anyway "Ponder" had them all fooled. . . . Annabell Redding returned to work in Bldg. 18-4 this week after a tonsillectomy. She tells me, "it wasn't half bad." . . . Irene Draper, Bldg. 18-3, and Howard Draper, Bldg. 26-2, worked hard all day at Big Long Lake—total "take" six blue gills. . . . Fonda Cook of Bldg. 18-4 is proudly displaying the beautiful color pictures of her daughter's wedding. . . . We extend our sincere sympathy to Mr. and Mrs. Arnold White in the death of their infant daughter. . . . Our congratulations to Mr. and Mrs. Robert Wylie. Their son Robert will be married May 21 in Barherton, Ohio. . . . Old Mother Nature did herself proud on Sunday, her contribution to the day honoring all Mothers. To those whose Mothers are with them I know the day was a pleasure; to the rest, wearing a white flower, the day was filled with fond memories. . . . Today is the last day in Bldg. 18-1 for Mae Lacey. We will miss you and hope that you have not objected to our teasing too much. . . . Virginia Gerdom Spriggs, formerly of Bldg. 18-1 Payroll presented her husband with a tiny baby and before Mother's Day, too. . . . Snooping around in Bldg. 18-3 we find that some of the people were on the move over the week-end. Joseph Wauro and wife visited in Hillsdale, Mich.; Velma Wine went to Mexico just a little week-end jount (her grandmother lives in Mexico, Ind.). . . Jerry Snowberger was seen at "Oklahoma," Friday night and Dolores Brinker entertained her parents at the Hobby House for Mother's Day.

It's a boy! Congratulations to the proud mamma and papa, Mr. and Mrs. Dick Howell. . . . Congratulations are also in order for Carl Click, because he's engaged. . . . The candles burned brightly last week for Jerry Graybill, the reason for the burning candles being Jerry's birthday. . . . Doris Smith also had a birthday last week, and the gals in the file section had a potluck dinner with a delicious cake. Happy birthday to both Jerry and Doris. . . . Jerry Hadley and her hubby have undertaken quite a job, they are going to build their new home. Seems quite a number of young people are taking the housing situation in their own hands, it's a fine idea but quite a job too. More power to you, Mr. and Mrs. Hadley. . . . There seems to be some real champions at the hook and needle in our midst. Eva Westrick who is equally at home with a crochet hook or a needle and Teresa Arend whose talent with a needle seems endless. These gals seem to have some pioneer blood in their veins. . . . "Here comes the Bri—" no, we can't say that cause it's the bridegroom that—oh well congratulations that's what we want to say to Max Harris our most recent bridegroom. The very best to both you and Mrs. Harris.

Lillian Hall is very busy these days preparing to plant her vegetable garden and tells us that she wants to raise a bumper crop of spuds. She purchased a five pound sack of seed potatoes from Aldine Bell who has delivered them to her. Out of this she expects to plant 40 acres with the expectation of doing a land office business this fall when they are ready for harvest. She also expects a heavy yield from her onions, keeping close watch on these and giving us a daily report on how much they have grown. If any of you desire to lay in your winter supply of spuds and onions get your orders in early and avoid the rush. . . . As a carpenter we are afraid that George Cowan is a washout. He was observed last week-end helping to construct a house. So handy is he at driving nails that he uses both hands on the hammer handle. He tells us that he could do much better if the hammer handle was three feet longer. He is probably thinking of the times he drove railroad spikes when walking track for the Nickel Plate Road. . . . Clarence Stove, our self-styled weather prophet, has taken it on the chin again. Every year about the latter part of February he begins to tell us that an early spring is in the offing and makes great preparations expecting the first warm days to remain. As we all know the weather of April and May is very fickle for example look at Easter Sunday. On that day he sat in the front room watching the heavy snowfall with his chin sagging. It just seems that some people will never learn. . . . Edwin Moodie's young grandson can figure for himself. Having broken some window panes in a neighborhood garage, he was told by his mother that he would have to use his savings to pay for their replacement. Knowing that grandma and grandpa had a jar full of pennies at their home, he decided to try and work his grandparents for some of them thereby keeping his savings intact, but somehow grandma smelled a mouse so it was no soap for grandson. . . . Marion Oman, who is forever putting out a beef about the price of haircuts and is always trying to figure out a way to get his cheaper, heard that a new barber shop was opening on Broadway near Creighton Ave. He was wondering if they might pass out sample haircuts on the opening day. . . . Emanuel Miller has turned a veritable speed demon since acquiring a new Ford. He told us that the other morning on his way to work some wise guy kept crowding him. Putting on a terrific burst of speed he pulled away from him but not for long as said wise guy was on his tail again. Stepping the gas buggy up to 98 m.p.h. he was able to leave him in the shade.

Celebrates 30th Anniversary

Ed Klomp, Bldg. 17-4, recently celebrated his 30th anniversary with General Electric, at which time he received a congratulatory letter on his long service. Attending the presentation were (l. to r.) H. L. Brooks, C. F. Hattendorf, E. G. Stock, Mr. Klomp, D. H. Hanson, W. F. Konow, C. R. Nussel, Carroll Elder, and M. E. Crow.

I am a week late on the following poem. But after all, we shouldn't think of Mother only one day out of the year.

There are fiddle strings and shoe strings
And strings for wrapping meat
There are strings to big free offers
(And to make the list complete)
There are strings you tie on fingers
To help remember things.
But none can ever take the place
Of Mothers' apron strings.

Speaking of mothers and we will include fathers too, the parents of Ann Kensill and Gertie Wheat are celebrating their 63rd wedding anniversary today. Our "we wish you continual happiness and health" mat is out for them. . . . Minnie McCague and Eileen Steinacker were out hunting wild flowers. We hear the "skeeters" tried to take the joy out of finding the posies. . . . Mary Wright spent the last week-end in Columbus, Ohio. . . . Bertha Furge is going to have hausenpfeffer one of these days. The rabbits have taken over her cabbage patch and her husband said he will get them or else. . . . Our newcomers to the early bird shift are Catherine Salmon, Mary Jane Redding, Ura Mae Tinder, Cecil Leslie, Gladys Strong, Gladys Lutz and Beatrice Craig. If I missed anyone, I'm sorry and a "hello" to you also. . . . It's a happy birthday to Harold Bowker, Ann Kensill, Jerry Snyder and Herschel Case. (At least Hershel says he had a birthday May 6. We didn't see any cake or candy.) . . . Last week line 562 had a potluck. Lots of good eats were enjoyed by all including their foreman, Walter Kryder. (Walter really enjoys his carrots.) . . . Paul Nelson received a hand out of rabbit food from Leona Hollis. Leona also baked a birthday cake for Louella Koogle. . . . Ivah Grandstaff bought her huhby an electric razor for his birthday last week. Now he shaves twice a day and gives demonstrations in between times. (No five o'clock shadow there.) . . . Virgie Mayer was really having trouble trying to connect and weld. S'matter, Virginia, the china clippers misbehaving? . . . Harold Bowker was on vacation this week. . . . Bill Martin had to iron out all the aches and pains of the winding machines. . . . Ray Brown is leaving us for Taylor St. We will really miss you. . . . Little boy, ending prayer, "And please, Lord, put the vitamins in pie and cake instead of cod liver oil and spinach."

Beer Elected Vice President Of Vocational Guidance Group

Wallace Beer, Supervisor of Employment, was elected vice president of the Northeastern Indiana Branch of the National Vocational Guidance Association during a dinner meeting of the group Monday at the YMCA.

The Dolson's are the people with talent! Barb and Harry are now building their own dream home. They are up to the roof already. . . . Guess who is back with us? None other than Vera Kilian. Vera has been off several weeks. We sure are glad to see you again, Vera. . . . Phyl Fisher is having quite a time with their new Dodge. She is all confused about the button situation. Will someone please give Phyl a book of instructions explaining the use of each of those little buttons? . . . Last week we had a misprint and we were told about it by Ed Ellenburg. Instead of coming from Indianapolis, Ed came from Minneapolis, Minnesota. Thanks for telling us, Ed! . . . Dick Stoner held a party for all his friends in the Drafting Section last week. Those attending were Ralph Pappert, M. H. Cox, Ralph Valentine, Dora Aughenbaugh, Molly Hile, Wendell Miller, Henry Lantz, Mildred Fettinger, Pete Eberhardt, Dick Cupp, Ed Ellenburg, Skeets Lahrman and Carl Lommatzsch. Dick showed a few of his magic tricks and had refreshments. . . . The Engineering Division is very happy to welcome John Kvinge from Benton and Howard Gerlaugh. . . . Ginny Graff and Ruth Fields received some beautiful flowers from the engineers. You sure have the men trained, haven't you? . . . Carl Paul has been moved from the Designing Section to the Development Section. Big move! Across the aisle. . . . From all reports "Oklahoma" was a huge success. Those attending were Helen Brindle, Barb and Harry Dolson and Delores Patterson. . . . George Finkbeiner can be seen early every morning going through the "Apartments for Rent" section of the paper. George is going to be married May 21 and would appreciate any good leads for an apartment.

Three Retire On Pension

G. A. Seibold

George A. Seibold, Bldg. 4-2, retired May 1, after 29 years service with the General Electric Company.

He began working for G-E in 1920 as a machinist in Bldg. 17-3. He has worked on grooving commutators in Bldgs. 17-1, 17-3, 4-5 and 4-2 since 1923.

F. A. Fordham

Frank A. Fordham, Bldg. 27, retired May 1, after seven years service with the General Electric Company.

He began working for G-E in 1942 as a turret lathe operator in Bldg. 27. He later became a helper, and was working at this job when he left the Company.

L. C. Koop

Louis C. Koop, Bldg. 27, left May 1 for retirement, after 33 years service.

Mr. Koop first came to G-E in 1916 as a machinist. He has worked as a P and J operator, drill press operator, Japan dipper, and helper. At the time of his retirement, he worked on chipping and filing in Bldg. 27.

750 Attend Elex Mother-Daughter Parties

Approximately 750 attended the two Elex Mother and Daughter parties Thursday, May 5. The night girls entertained their mothers with a noon luncheon at the YWCA with 70 in attendance. In the evening, the day girls feted their mothers at the G-E Club gym.

Vernon Carr, magician, and Delores Patterson, vocalist, of Bldg. 26-2, were featured on the night girls' program, followed by the presentation of gifts and prizes for the mothers attending. Dorothy Koomjohn, pianist, and Ogden's saxophone quartet provided the entertainment in the evening.

In the layout above are pictures taken during the day girls' party at the G-E Club gym. The top row pictures show: (l. to r.) Ilene Hardisty, Bldg. 28-2, Mrs. Ollie Knittle, Arlene Dellinger, Bldg. 4-6, Mrs. Geraldine Kunberger, Mrs. Mary Schlotter and Charlotte Stanford. Mrs. Knittle, 83, and Mrs. Schlotter, 80, were the oldest grandmothers at the party. The next scene shows Mrs. Lewis Smith, who came 120 miles to attend the party; her daughter Mable Miller, Taylor St.; C. H. Matson, Works Manager; Mrs. L. A. Evers, who traveled 227 miles for the party; and her daughter Peggy Evers, of the Taylor St. plant. The mothers who had three daughters each are shown in the next picture. They and their daughters are: (l. to r.) Edna Waterson, Bldg. 26-3; Velva Smith, Bldg. 4-5; Mrs. Clarence Waterson; Lois Waterson, Bldg. 4-5; Helma Conrad, Bldg. 19-5; Ludella Conrad, Bldg. 6-2; Mrs. Henry Conrad, and Armilla Conrad, Bldg. 26-2. In the last picture of this row are Alice Robison, Bldg. 17-3, and her mother, Mrs. Martha Rittenhouse. Mrs. Rittenhouse, who is 88 years old, was the oldest mother at the party.

The attendance prize winners are shown in the first picture of the bottom row. They are: (l. to r.) Mary Eker, Mary Leis and Veronica Cook. P. O. Noble is shown presenting the youngest mother her gift. She was Mrs. John R. Heine and her daughter is Marjorie Mayer, Winter St. works. Jean Smith, Elex treasurer, is next shown giving out the gift scarfs to the mothers, while the last picture is a general view of the party.

In the first picture of the night girls' party shown below are: C. H. Matson, Works Manager; Mrs. Clara Bishop, who came 60 miles to attend the night girls' party; and her daughter Alta Bishop of the Medical Section. Mrs. Martha Schroeder is shown with her three daughters who work at G-E. Left to right are: Lora Schroeder, Mrs. M. A. Borchelt, Mrs. Schroeder, and Mrs. Martin Reinking. In the next picture are Mrs. Nellie Smith, who is the oldest mother at 73 years, and Flossie Greek, Bldg. 18, her daughter. Violet Garrison and her mother, Florence Warner, the youngest mother, are shown in the next photograph. A special gift was given to Mrs. Etta Heymann, the only mother who worked here 40 years ago. She is shown in the next picture with her daughter, Mary, Bldg. 8-1. The attendance prize winners are shown in the next two pictures. They are: (l. to r.) Mrs. Edna Quinn, with Mr. Matson in the first picture, and Mrs. Anitha Bradtmiller and Rachel Fisher, in the other.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

Some of the gang are wondering if Elmer Minnick and his foreman use the same bowl for their haircuts. . . . Paul Lichtsinn is slow to take a hint, especially if it's given by Howard Musselman. . . . Kenny Hart must have a very affectionate nature. He doesn't seem to care who he embraces. At least he should judge the time and place a little better. An evening date, perhaps. . . . Carl Wiegman was on the sick list as of May 4. The gang in Bldg 19-3 west end should be more careful about raising windows in May. . . . John Campbell, who was recently known as "Unhappy John," can now be called "Lucky John," having won a nice pot the other day. Be careful Joe Burton doesn't get his fingers on any of it, Johnny. . . . Frank Elder, we hear, during his convalescence has thought up some new gags to try on Frank Enderle. Some of the gags have never been tried on humans before. . . . We're glad to hear Florence Weimer is improving and would welcome visitors. Room 607 at the Methodist Hospital. . . . Elsie Dunfee is also on our sick list. We hope she may have a speedy recovery. . . . The Stator Winders are dieting this week. They are expecting a big feed at the Urbine estate, since Harley's wife is the recent dinner-winner. . . . Congratulations to our new grandfather, Bill Hale. The little fellow's monicker will be John Willard. . . . Since the weather man predicts the temperature will reach 90, Lee Anderson will get his Plymouth in circulation again. . . . Anyone wanting information how to play the game "Twenty Questions" consult the three wizards, VanSkyock, Norm Stoller and Frank Karthroll. The next program will be Dr. I. Q. . . . Frank Karthroll has lost all faith in Tim O'Sullivan's weather predictions, since he lost a bet that it would rain May 4. . . . Now that warm weather is here, Carolton Peters is getting to work on time, no lost time starting the Chevrolet. . . . Story of the week: "Mushroom Hunter Supreme," or "How Crazy Can You Get." It seems that our hero on the impulse of one of his many periodical escapades decided that a few mushrooms would hit the spot some evening for supper. Notwithstanding the dire threats from his fellow workers, such as "you're gonna get your feet wet," or "an old man like you shouldn't be tramping through the woods," or "you'll never find any anyway," our hero embarked on his mission for mushrooms. He wasn't content to go alone, so amid protests from his wife, he coaxed her along, too. Next scene found our hero tramping through the woods with his better half, but nary a mushroom had they found. A few hours more of this was about all he can stand, to say nothing of the little woman. So our hero bad to swallow his pride and return home with blistered feet, minus mushrooms. Back home, talking with his neighbor over the fence about his fruitless search, what should he find at his feet, but three little mushrooms. Oh, the irony of it all. There ain't no justice. For any little particulars that might have been missed in this little tale of woe, see Joe (Mushroom Hunter Supreme) Laisure.

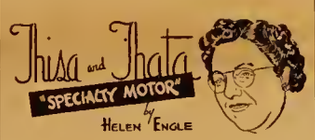
Fern Roe, who was married recently, was surprised last Wednesday at her home near Zanesville by a group of friends. They also presented her with a shower of miscellaneous gifts. The color scheme of the lunch which was served later in the evening was carried out in pink and white and included ice cream and a beautifully decorated cake. The guests were Rachel Millikan, Louise Stookey, Cathleen Burnett, Marjorie Rall, Hazel Dilworth, Laurene Kraus, Ruth Reed and Estella Pettibone. . . . Congratulations to Bill Widdifield who celebrated a birthday last week. . . . The heavy California "dewy" weather being enjoyed at the present by the boys in Tool Maintenance seems to be preferrable to the Florida orange showers of earlier days. . . . It might be the early heat wave that caused it, but for some reason Paul Kennerk has changed from his winter "longies" to something more appropriate for the mild temperature we are now enjoying. . . . For the kindness and consideration Bill Shuler has shown to him, C. Hamlet Curtis felt that Mother's Day would be an appropriate time to show his appreciation. So, at the early hour of 2 a.m. Mother Shuler received a box of flowers from him. To save any need for care they are the kind that will never wilt or need attention, they'll just stand stiffly in a vase and gather dust. Oh happy Mother's Day!

Women's Division Elects New Officers

The newly-elected officers of the Squares Club, Women's Division are shown (l. to r.) above: Mrs. Robert Johnson, treasurer; Mrs. Frank Fleischer, member-at-large; Mrs. Marvin Baker, president; Mrs. Orval Doherty, secretary, and Mrs. Lee R. Beard, vice president

The installation of officers will be held at 8 p.m. Tuesday, May 17. Mrs. A. E. Rowe and Mrs. C. F. Fitchey will be the co-chairmen of this meeting and will be assisted by Mrs. John Margerum, Mrs. Frank Ondrovik, Mrs. V. P. Uran and Mrs. George Stone.

Today is Friday the 13th. So what! All that stuff about black cats, ladders, etc. is just a lot of bunk and gets some people worrying about things that will never happen. Worry never gets anyone anyplace anyway. . . . Who's the shuffleboard king? Why no one else but our good friend Willie Rohe. . . . Say Leo Elward that sun was a swell wedding gift your co-workers gave you last Friday. I understand that this particular type is quite the rave. If in need would you please be kind enough to loan it to us sometime? We'll take good care of it. . . . News is getting awful scant these days, folks. Of course, you all know why, but better days are coming. Have faith. . . . Ezmark Bolt is taking his vacation next week and then is going on pension as of June 1. All his co-workers wish him the best of luck—especially at pulling in the fish at Jimerson Lake. We are looking forward to a fish fry, Ezmark. . . . Last week someone stole Agnes Bensman's bus pass. In order to console her, Hopkins and Steinbarger went out and picked up one for her. (And we do mean "picked up"). Not only was the pass out of date, but it cost three cents to mail it, didn't it, Chester? But we just know Agnes realizes that it was the thought behind the good deed that counted.



Once again we have more birthdays in our midst: Dorothy Heimann of the winding line celebrated her birthday Thursday. Marcile Jones has also had a celebration. She wishes her birthday would come more often. You ought to see her featured radio gift clock timer and everything. Birthday greetings, girls. . . . Just a moment—Yes that is just what it was for Ransome Barkley, our oven tender, according to the radio conversation on the street in Fort Wayne, Mr. Barkley had an interesting interview. What a radio star—you'll be receiving fan mail soon. . . . Hez Cochran was wondering if anyone missed him a week ago when he was off. . . . Fanny Amstutz is expected to be back to work this week after several weeks' illness. . . . Joan Braun has left to take on household duties. . . . For good clothes line posts see Mounsey, Ace-Navy welder, he guarantees satisfaction or your posts back. Mr. Cramer how is your wash drying on the new lines? . . . Buttermilk Skies—Cecelia Noonan has another version for it. Anything for a laugh, Celia. . . . Has anyone a new theme song to suggest for Junior. . . . Spring must be here, lots of gardens prepared, house cleaning, and even lots of paper hanging. That reminds me, see "Red" Stanley for a good ceiling job. Higher rates for papering kitchens. . . . We haven't seen Oscar Teeple's name in for sooooo long. What is the matter "aintcha" doin' anything or haven't they caught you in the act? . . . We are sorry to report that the nest of little bunnies have left us and have decided to start out on their own in this great big country of ours. . . . We are wondering what happened to the nice spring weather. It must be hiding just around the corner. . . . Now let's see, who hasn't been mentioned in this column lately. There's Gordon Sprunger in the Wage Rate section. Gordon likes to bowl we understand. . . . And there's Mary Miller in Production. Mary spent her vacation in Cuba last year. Wonder where she is planning on going this year. . . . And Dick Steele, in Planning. Dick is sporting new glasses we notice. Not bad, Dick. . . . And Harry Staley in Payroll. Harry is a brother to James K. in Planning in case you didn't know it. . . . The GeCode Club day girls had a Mother's Day party Wednesday nigbt at the Lutheran Church. Quintilla Frye was chairman of the party with Mary J. Wolpert, Betty Frauhiger, Irene Holthouse, Ardella Heare, Olive Journey, Merle Snyder, Cecelia Noonan, and Agnes Andrews on the committee. . . . In case you haven't noticed, the tulips are in full bloom and are very lovely to look at. . . . All the girls enjoyed the GeCode Club party given for their mothers and especially liked the gifts their mothers received. And didn't the tables look nice. . . . How about another poem by Christin Andrews:

Sleep

Sleep is such a wondrous thing
It drives away life's cares.
And helps us fresh our mind to bring.
To the problems all life shares.

Dorothy Schnepf, Harriet Haines and Mary Ann Laurent went fishing one evening and what wonderful fish they caught! Mary Ann's one and only got away and the other ones—they were too small to keep. Better luck next time, girls. Dort says they're not giving up, this is just the beginning. . . . Ardella Heare is very proud of the title "aunt" since Arline Heare's baby arrived. Arline formerly worked in the office.

A little stranger came to stay at the home of Henry Grepke in the person of a baby boy. Congratulations. . . . Alice Claymiller returned after nursing a sprained ankle. . . . Champion mushroom hunter is Emily Nierman—she reported a good haul. . . . The Specialty Motor Supervisors' Club held a party at Ross Strodel's cottage at Round Lake, Saturday, May 7. This party was to celebrate Mardo Tobias' 35th anniversary with the Company and from all reports it was really celebrated. Invited guests included Harry Haberkorn, Ed Glenwith, Frank Brindle, Lloyd Jacobs and Everett Lindeman. O. J. Mettler gave a resume of Mr. Tobias' record with the Company and presented the 35-year certificate. Sible, Bain and Strodel spent the day gathering mushrooms, while Jacobs and Korte showed the boys how they used to play ball. The rest spent their time fishing, playing cards and eating. . . . Esther Pape drove to work the other day because she wanted to stop downtown and buy some paint. Paint is unhandy to carry on the bus, you know. So, she went down, bought the paint and as she neared home she realized she left her car in the parking lot at work. . . . Best wishes and much happiness to Patricia Stabler who is wearing a beautiful diamond ring. The lucky guy is a student at Purdue. . . . At a glance Ardola Johnson doesn't look like a Statue of Liberty but that is just what she is. She was tearing the paper off the ceiling and the plaster started to fall so she stood there holding it up as long as she could. At last she had to let go and down it came all over her. What a mess she had to clean up! . . . Thelma Purdue said the fishing at Big Long Lake was plenty good Sunday evening, and Bernie McCune reports the same from Blue Lake. . . . Birthday greetings to Wilma Linker. . . . Edna Rohrbach has been kidding Freida Knoche for a long time about the two kinds of shoes she wore to work one day, but now we have it back on her. Edna came to work the other day with one black and one brown shoe. One sported a big bow and the other was plain. Not only does she wear mixed shoes but last fall she sent her spring coat to the cleaners and when she got it out this spring it really startled her to discover that it was so big. She hadn't realized that she had lost so much weight. On close inspection she found it to be her sister's old coat that she had planned on getting rid of. She said that she would look twice before she sends anything to the cleaners again. . . . Rudy Zelt not only cleaned the house while on his vacation last week but cleaned the barn, too. . . . Bessie Potts' name was inadvertently left out of the list of people that had returned to work. Glad you're back, Bessie, and hope your stay will be a long one.

"Braunie" has left us again and we sure will miss her interesting news items which she always gave to us. I want to thank you "Braunie" for the wonderful cooperation which you gave me in making this column one of interest for the second shift personnel, and you will be greatly missed. . . . Dorothy Hart received a very pleasant surprise the other night when she answered the telephone while at work. At the other end of the line was her son, Dale, who is in Los Angeles, Calif. The call was in honor of Mother's Day and to Dorothy was ever so much better than any gift would have been. Dale is district manager of B. F. Goodrich Co. on the west coast and he lives in N. Redondo Beach, and is the father of twin daughters of which grandma is very proud. . . . Ethel Koontz was all smiles Monday as her bowling team won the Moose championship. Congratulations, Ethel. . . . Happy birthday to Dick Pemberton, and many happy returns of the day. . . . Chet Carey says he found out over the week-end that he is getting just a mite too old to try to keep up with this younger generation. Oh can't take it, eh, Chet? . . . George Miller reports that his luck in fishing was greatly improved over the week-end. It must have been due to the fact that you didn't have Vern or Harold with you, George. . . . Bob Huhn says he sure wishes his luck would improve a little though as he spent three days catching five fish. We at least will say that you sure have a goodly share of patience if not luck, Bob. . . . Norm Wolf and Ray Hills played golf together a week ago. Ray says as a golfer Norm is not so hot, because after Ray finished playing a few extra holes, he went back to the club house, and there was Norm—all in. . . . Evelyn Lietzke had quite an accident the other day, but what has us all in a quandary is where in the world did all of that water come from? . . . Alma Welches says she really enjoyed her Mother's Day as she was at her daughter's, who lives here in town, and really reigned as queen for a day. . . . Bob Federspiel would like to take this opportunity to thank all of his friends for the many kindnesses extended to him and his family during their recent bereavement.

Safety Committeemen Are Given Meritorious Performance Awards

Safety committeemen from Specialty Transformer and Ballast Divisions 93, 94 and 95 are shown in the pictures at the top during the presentation of their Meritorious Safety Performance Certificates by W. H. Connor, Manufacturing Engineer. The picture at the right shows D. B. Poland, Superintendent of Div. 93; W. H. Crouse, Superintendent of Div. 94; and Don Waldrop, safety leader representing F. N. Banks, Superintendent of Div. 95, receiving the certificates from Mr. Connor.

In the center picture, at the left, safety committeemen from the General Tool section are shown with the others who took part in the presentation: (l. to r.) E. W. Auman, Assistant Superintendent; Donald Clark, Kenneth Sefton, C. A. Brenner, Superintendent; Reinhold Lepper, Mirwood Dunlap, Robert Wylie, General Superintendent; Paul Yentes, A. F. Thieme, safety secretary; Walter Hazelett, Robert Sowards, Edwin Kayser, Richard Tobias and Donald Willeke.

At the presentation for the Distribution section, in the picture at the right, are: (l. to r.) J. F. Schlotterer, C. K. Wagoner, Hugo Herst, Robert Whonsetler, C. D. Uncapher, F. F. Wilson, J. E. Mills, Ned Thompson, G. D. White, Dale Bentz, D. J. Bucher, C. F. Oberwitte, F. F. Brown and Richard J. Robertson.

Safety Committeemen from the Motor and Generator divisions are shown at the presentation, in the lower, left picture: (l. to r.) Front row—Kenneth Rinker, Catherine Walters, Anne Fairbanks, C. W. Hale, Douglas Heckman and Glenn Goshorn. Back row—John Dennis, Howard Fansler, Emery Cramer, Ansel Black, Wilber Kurtz, George Golden, Clayton Dafforn, Joe Mougin, Leroy H. Cook, Francis Lee, Raymond Williams, Arthur Swain, Jr., Calvin Marhenke, Vern Pease, Harold Traxler and R. M. Hartigan, Manager of Manufacturing.

In the bottom picture, at the right, Earl Gebert, foreman in the Insulation section, Al Hopkins and Tom Hutsell safety committeemen, are shown receiving their certificates on behalf of the section from Harry Hire, Superintendent of the Wire and Insulation division.

The presentation of Meritorious Safety Performance certificates was made recently to the Motor and Generator divisions, Insulation section, General Tool section, Distribution section, and Specialty Transformer and Ballast Divisions 93, 94 and 95.

R. M. Hartigan, Manager of Manufacturing in the Motor and Generator divisions, presented the award to safety committeemen at a meeting Wednesday, April 6, in Bldg. 31-1.

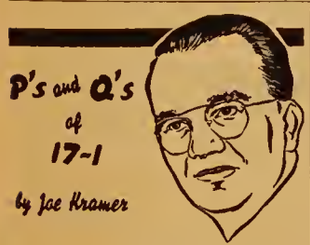
He stated:

"The excellent safety record, for which Mr. Hale, the general foreman, is being recognized, was made possible by employees under his supervision who worked carefully. The certificate belongs to them."

Members of the Insulation section's safety committee met in the Wire Mill conference room Tuesday, April 19. In presenting the certificate to this group, H. E. Hire, Superintendent of the Wire and Insulation sections, pointed out:

"The Insulation section has worked four consecutive years without a lost-time accident and hopes to renew that record."

The safety committee for the General Tool section was awarded its certificate by Robert Wylie, General Superintendent of the Fort Wayne Works, at a meeting Thursday, April 28, in the office of Bldg. 19-5.



Mr. Wylie congratulated the employees in this section "for consistently having a good safety record" and added that "Production divisions look to the Tool section for safe equipment."

G. D. White, Assistant Production Manager of the Contributing and Service divisions, addressed members of the safety committee for the Distribution section at a meeting Thursday, April 28, in Bldg. 6-2. He presented the award to C. D. Uncapher, Superintendent of the section.

In making the presentation, Mr. White recalled that "not too many years ago, an accident was looked upon as just another accident and little, if anything, was done to prevent a similar accident in the future. Now, when an accident has occurred, efforts are being made at once to prevent another."

Safety committeemen from the Specialty Transformer and Ballast Divisions 93, 94 and 95 met in the large conference room of Bldg. 8-2 to hear the presentation remarks of W. H. Connor, Manufacturing Engineer.

"I am very pleased with the fine safety records made by these three divisions in 1948," Mr. Connor stated. "To achieve a good safety record, it is necessary to pay attention to small details."

Spring is in the air and it brings out the youth even in some of our older employees. Ed Brosche is no longer known as a play boy of Group 19x72. Cliff (Tidy) Combes has now taken over the No. 1 spot. Cliff says no matter how hard you try, you can't win. . . . The violets on Tavie Popa's and Addie Masbaum's desks have once more turned their leaves skyward instead of wilting downward due to the careful doctoring and diet they were put on. Henceforth, Addie promises not to dust them off with a typewriter brush. . . . Joe Kramer is going to be mighty careful when he rings for an elevator outside of Bldg. 4. It seems Joe rang for the elevator, but instead of getting the elevator he was greeted with a bucket of water. Boy, was it cold, according to Joe. . . . John Quinn is looking for a giant size apron, that is one that will cover him in the back as well as the front. John can't quite figure out how he gets oil in his hip pockets. . . . While walking around the south end of Bldg. 17-1, we thought we had gotten mixed up with our time because who was working on the automatics but Frank Gitter. Frank has been on third trick so long that the fellows wanted him to wear dark colored glasses so he would feel more at home. . . . Orval Haver turned farmer over the week-end and helped his brother with the chores. Haver was delegated to milk the cows; after a half hour or so and Orval hadn't returned from the barn his brother went looking for him. When he found him, the only thing Orval said was that he didn't mind milking the cows but how do you fill the milk bottles all at once. . . . Mike Kramer is trying to return the cat he received from Cliff (Tidy) Combes last summer. Cliff doesn't mind taking the cat back, but he says he had only given Mike one cat and now Mike wants to give him seven. . . . Another newcomer to the first trick is Mike Fuelling who has been working on the second trick. . . . The way Orval Haver was running down the aisle Monday afternoon, you would have thought there was a fire somewhere. It wasn't a fire because Orval didn't have a water bucket with him. He had a needle and thread in his hand and said he had bent over too far picking the parts up off the floor. . . . Since Frank Martin is an ex-fireman, he had to show George Mosshammer how to water their garden with a hand powered sprinkler. There was only one catch to it—Frank was watering the garden and George was admiring the scenery until a sudden spray of water brought him back to reality. Frank apologized and said he thought the fertilizer they had been using had caused a new kind of plant to grow and he wanted to water it before it got wilted from the heat of the sun. . . . With the song, "Buttons and Bows," making such a hit over the radio, Mary Gerhard came to work the other morning with a pretty little blue bow. . . . Wally McKay came to work last Monday morning with blisters in a different place. It seems Wally was putting in a length of fencing and digging holes with a post hole digger was really a job. It's a wonder he wouldn't let some of the fellows know he had a fence to put in, they would have been glad to have come out and helped him put in the fence. . . . Fame must be catching. Addie Masbaum, who sits next to Helene Evanoff in the office, was visited by the WORKS NEWS photographer and the "Inquiring Reporter" last week.

We all offer our sympathy to Calvin Bear in the death of his mother and August Rodenberg and Karl Kleemier in the death of their sisters. . . . The latest report is that Carl Einsiedel is trying to get a transfer from Broadway to Taylor St. so he can keep in constant touch with the Junction control tower and keep tbe PRR running more smoothly. . . . Summer is officially here when our campers get their tents up. Chick Abbott has raised his big top on Lake James again and Ren Getty has pitched his tepee on Witmer Lake where he recently purchased a lot. . . . Carey Baker is wearing a Purdue sweatshirt to work so his friends won't have to inquire wbat university his son is attending. . . . Speakin' of excuses, we might as well mention the reason Joe Mettler and "Sky King" Glen Hoon came home empty handed from Upper Long Lake last Saturday. Joe claims the fish sack came loose and out fell the fish. Usually it's about the ONE that got away, but now it's how THEY got away. . . . Lloyd Welbaum had a very enjoyable time in Louisville at the Kentucky Derby. He had a notion to bet on the winner, but changed his mind; however, he did get a nice tan out of it. . . . I was driving past Russel Sage's house last week and actually thought I was nearing a railroad station the way he had the smoke bellowing out. Of course, it was pretty chilly at 87 degrees in the shade. . . . "I wasn't fishing" was all Glen Ramsey could say when tbe game warden caught him taking a fish off of the hook. That's what the little boy said when his mother caught him in the cookie jar, Glen. If it hadn't been that Dave Bartle was a personal friend of the game warden, our friend Glen might be still in the cooler. . . . Tbe question is who opened the gate on Woody Hurshe's dog kennel? Woody finally found his dogs over by Spencerville chasing a fox. Some rabbit hounds! . . . Don Alcott's fellow workers know he loves dill pickles. He told them that he's thinking of placing the dill in the pickle seed or plant so that when the pickles are picked they will have a dill flavor. . . . Here is a big bearted fellow, namely John Stetter. He was planning on going fishing; however, his wife put him to housecleaning. Now don't laugh, fellows, you too may be a victim. Anyway, John, we hear that the fish didn't bite good on that day. . . . George Spittler is back after spending all week outside at his new home, working in the yard and garden. George looks nice and brown except on top of his head. One consolation he says is that just the skin and not any hair came off. Nothing like enjoying the great outdoors, eh, George? . . . Scott Click says his bicycle is displayed at W & D's second floor. . . . Looks like Herb Thiele is getting some young ideas lately or haven't you noticed those rugged-cleated collegiate shoes he is now sporting? Some one asked if Herb has a motor that requires that kind of traction. Guess you'll have to ask him about that one, boys. He is hoping for a rainy day to try them out in the mud—the real test for that type of shoes. . . . Russell Sage is not sure that kindness always pays. As he was helping a neighbor put sheet plaster on, it let loose and cracked Russell on the forehead.

Vets Hold Annual Meeting

E. A. Barnes, former General Superintendent and now retired, speaks at the Veterans' meeting. Seated are G-E Police Chief A. R. Vegalues, at the left, and Joe Goodman, former president of the association, at the right.

The G-E World War Veterans' Association held its annual meeting and election last Friday in Kreis Stolzenau hall.

Ken W. Michael was elected president of the group. Other officers elected were Jimmie James, vice president; Walter Whonsetler, secretary; Harold Rahe, treasurer, and Edmund Holocher, sergeant-at-arms.

Plans are now being formulated for a special service in commemoration of Memorial Day.

26-3 News

By Mabel Odel

Alma Giem and Leila Moore had an unexpected guest for lunch the other day. We think they were a little selfish and rude though. They had sandwiches and all they gave Mr. Mouse was the water out of their water pan on the bench, and then sat there and screamed until he couldn't even enjoy that. . . . Gary Pequignot is equal to a small boy standing on a street corner watching traffic. He doesn't miss a thing that goes down the aisle. . . . Our deepest sympathy to Nellie Wendt whose brother was returned to this country for burial. . . . We are glad to have Ruth Shive with us again after a short illness. . . . We wonder what detained Vera Hoover that she couldn't report for work until noon? . . . Would someone take the time to explain to LaDonna Durbin that there is a difference between catfish and dogfish? . . . Mary Cordell is looking for decorations for her recreation room. Any old moose head will do. . . . When Cora Bucher goes to a theater, all the excitement isn't on the screen as Mary found out when Cora hit a man in front of her on his back. . . . We hope George Brehm will be happy in his new office that is now under construction. It's located just west of the west end wash room. . . . Happy birthday to Ruth Bonewitz. She doesn't look like she has celebrated many, but we do wish that she will celebrate many more. . . . Marge Robertson went strolling in the park to enjoy the scenery and the birds. That evening she had a few extra spots on her headscarf. We know what happened, don't we, Marge? . . . Mary Wiedman will do your hand laundry any time of the day. . . . Did you hear Morris Felger's boat was hit by a torpedo? It didn't sink. You can't sink a battle wagon with that kind of a torpedo, but it did cave in the side. He has it repaired again and is now looking for a rubber bumper that will go all the way around it. Girls, if you are yearning for a cruise down the river, see Morris. . . . Spring is really here judging by the beautiful array of print dresses on the floor. Dorothy Linski has a yellow dress that is a perfect match to the daffodil. . . . Mary Williamson carries her uppers in her purse. Better hang on to the purse, Mary, you may miss out on a steak dinner. . . . Mary Cordell went mushroom hunting. Never a dull moment, she fell into a pond and lost her boots.

Office Offerings

Bob Hunt wasn't worrying about the time being set ahead. He lives on a farm and depends on his roosters to awaken him. But he should have informed them that they had to start crowing an hour earlier for awhile. . . . Cliff Bowman is one of those fellows who takes a peek at the clock and turns over for those extra 40 winks. Once when putting the clock back he laid it on the side. The crystal pressed against the hands stopping the clock. He came in quite refreshed as he got something like 140 winks that morning. Just a suggestion, Cliff, how about a new G-E clock. They have a wide variety of beautiful models to choose from. . . . Ray Shible doesn't read the newspaper. He just uses it to hide his face so he can get his noonday siesta. . . . It's really the last straw when a planner's wife informs us that we better get said planner on the ball to eliminate some of the noise in the office. She hears it only through the phone when making a call, but we live with it eight hours a day. We can't tell you who it is, but his first name is Bob. Thanks, Mrs. Altevogt. . . . Maxine Patterson sent out an SOS to the office. It seems she got lost in Bldg. 26-5. . . . We wonder what made Therese Lindenberg stop so suddenly inside the door? We were told it wasn't the ladies' wash room, but she said it was nice and clean. Sure, and it was a shock to her. She thought she was opening the door to the stairway.

Medical Memos

By Mary Heymann

Why does our Mae have such difficulties? As soon as she buys a new rain coat we immediately have dry weather and loads of sunshine! But, after all, it does take both rain and sunshine to make the newly-planted trees grow in the Mulvane orchard. . . . Success: After many discouraging delays, Mrs. Fryback finally has her own well. . . . Ethel Carriger, formerly from Winter Street, will be celebrating another milestone on May 14. Many happy returns, Ethel. . . . Veda Orff, Bldg. 8-1, is wondering why anything as beautiful as a lilac bush in full bloom would have to be accompanied by Rhus Toxicodendron? Or in plain English, POISON IVY. Mighty uncomfortable, eh Veda? . . . May 12, we honored the birthday of Florence Nightingale, "The Lady of the Lamp." Despite the objections of her family and friends she entered a training school for nurses in Germany. After spending several years in hospitals in different cities she returned to London and was placed in charge of a hospital there. It was then she received an important message from the British government. She was asked to be in charge of a group of nurses who were to go to Turkey to care for wounded soldiers. Her planning, foresight and unceasing toil during the Crimean War endeared her to the hearts of the people and she became a heroine. After the war she started a training school in England, her own country. More than any other woman, she is to be given honor for the present system of careful training for nurses. She died in 1910 at the age of 90. At this time it would be well for all nurses to repeat the pledge they make when they receive their caps, and at graduation:

The Florence Nightingale Pledge

I solemnly pledge myself before God and in the presence of this assembly to pass my life in purity and to practice my profession faithfully. I will abstain from whatever is deleterious and mischievous and will not take or knowingly administer any harmful drug. I will do all in my power to elevate the standard of my profession, and will hold in confidence all personal matters committed to my keeping, and all family affairs coming to my knowledge in the practice of my calling. With loyalty will I endeavor to aid the physician in his work and devote myself to the welfare of those committed to my care.

Only one ad per employee may be inserted. Each ad must be limited to 20 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday Noon, May 16, 1949

LOST AND FOUND

LOST—Pair Bi-focal light colored shell rimmed glasses.

FOUND—Man's hat at Squares Open House following minstrel show.

FOR SALE

G-E REFRIGERATOR—Very good condition. H-60411.

ECONOM-ICER—100 lb. ice box, fine condition; two French doors, 30x78. A-76844.

BEUSCHING C MELODY SAXOPHONE—Make offer. E-37755.

LARGE SIZE TRICYCLE—With one wheel trailer, small wagon, auto radio and aerial. A-75502.

VENETIAN BLINDS—One 39x68; one 70x62. H-0531.

FOLDING BABY BUGGY—With pad. $7.50. 815 Huestis Ave.

BLUE SOFA-BED—Two used 6:50x15 tires and tubes. A-98103.

SILVERTONE CONSOLE RADIO—A-1 shape; occasional table and two lamps. H-20402.

120 BASS ACCORDION—Royal typewriter, $15; Hawaiian Guitar, $10. 1334 W. Fourth St.

ORGAN—Scythe; bee hive; feather bed; man's overcoat. A-86352.

MILK GOAT—And two kids, $10. Fred Blum, 2 ml. northeast on State Road 37.

TWIN BABY BUGGY—Whitney, black leather. A-93109.

TWO ROW PLANTER—For Rotor-Tiller. Like new. H-28530.

SUBFLOORING—1200 sq. ft.; 10-12 light window sash, 40x41. H-24152.

BAMBOO PORCH SHADES—A-75442.

REVERE HOME MOVIE OUTFIT—Complete, like new, $150. A-55741.

FOR RENT

GARDEN SPOT—About one-half acre, two miles west. H-74748.

SIX ROOM HOUSE—Modern, two story. 916 Herman St., A-76832.

HOUSE TRAILER—Hamilton Lake. Inquire at Bearmans, three cottages north of Penn Park, Saturday and Sunday or write Velma Johnson, R. R. 7, Fort Wayne 8, Ind.

TWO ROOM UNFURNISHED LOWER APARTMENT—Available in June. Southeast. H-64362.

WANTED

BOSTON TERRIER—Female pup. A-55757.

TRANSPORTATION

WANTS RIDE—About four miles north of 118 on Highway 3. Ralph E. Jacobs, works from 8-5:16 in Bldg. 31-1, ext. 2183.

New Quarter Century Club Members

George G. Guenther
Bldg. 19-3

Bldg. 17-2

Walter M. Kryder
Bldg. 17-3

Wasn't that a short summer? Let's hope there is more to come. . . . Most of our fishermen don't think the summer season is here 'till after June 15 anyway so they would like the cool weather now. . . . Ed Klomp certainly was a proud man when the girls gave him that dinner, he fairly beamed. That cake was almost too beautiful to cut. Oh, and by the way, he had a birthday on Monday and treated the gang. Our "thank you" was followed by "many more happy birthdays." . . . Herb Buck ran into a little trouble last week while in the act of putting the screens in his house. He was in the garage getting the screens and the overhead door came down locking him in the garage. After he made several trips through a small window to the house to get some tools to fix the door, he finally got the screens out but then it was too dark to put them in. He finally put them on the back porch 'till the next night, and quietly went to bed. . . . Don Thomas has challenged Mike Lowe to a boat race to prove the merits of their outboard motor. Thomas has a Johnson that is approximately 20 years old and Mike has an obsolete Martin, which he claims has all the "Speed of the Busco Beast," turtle that it. This should be an interesting race to watch except that it might be a safety hazard. Mike's motor might fly apart any second if he opens her up. . . . Our shining example, Les Stauch, came to work Monday morning with a beautiful sunburn. He didn't have any reasonable excuse for it as he wasn't even fishing. . . . Have you heard Walter Beeth's definition for a chaperone? It's one who is too old to play the game, but still trying to intercept passes.

One day last week as I was winding my way down the hall, a little bit of paper chanced by. Due to the experience which I gathered in my youth as a "long arm girl" on the local "Teeters Burg" Baseball Team, I came through. Here is the poem which was written thereon:

REMORSE

I had a little visitor who came around each night
From chewing gum and bits of food, he'd always take a bite.
With indignation in my heart and blood right in my eye
I'd show that little "so and so" and so fixed for him to die.
A dainty bit of edible I fastened to a trap.
The next A.M., the trap had sprung (he wasn't such a sap)
The food was gone but not a sign of Mickey did I see.
I further vowed that little squirt would never outsmart me!
Such discourtesy, I thought, as I set the trap once more,
And placed it in another spot a few feet off the floor.
When I arrived at work next day I found much to my sorrow,
He had repeated his audacity; grrrr,
I'll get him on the morrow.
"Third times a charm" 'tis said, I knew that I must win.
I did, but I felt oh SO sad to make a widow out of Min.

Any-Mouse.

Ray Hupp seems to have found that spring is here. He is sporting a vivacious red tie these days. It's very becoming, Ray. . . . Either the power of suggestion or "being nervous in the service" seems to produce a never ending era of telephone misdemeanors. Frank Fleischer is the latest victim. He was fortunate in that his 'phone dropped on a soft spot in the floor. . . . Warren Berkhiser thinks that since the Company painted the drafting board covers, a pair of sun glasses should be given to everyone. Ask Warren how and where he obtained his. . . . It was evident that "Bobs" Dobbin and Sharrow soaked up an abundance of vitamin D last week-end. The ruddy complexions are very becoming. . . . Harvey VonGunten found a new friend. He discovered the need of the friendship of a dumb animal—so he purchased a turtle. . . . We had the pleasure of a visit from Hugh Folsom's wife last week. . . . Jack Jennings is "sharpening up" his golf game for the office league. He shot a 45 for nine holes at the Municipal Golf Course last week. . . . The black market is now a thing of the past. You don't have to sneak around in a dark alley, knock three times and say that Joe sent you in order to purchase a car. This has been proven by three people we know who have purchased their autos in broad daylight—John Chipko, his first venture, has a Willys, "Moose" Foltz has a Plymouth, and Charlie Thomas likewise. . . . Joan Walter and Gloria Hormann had double trouble last week. Joan fell into the large waste basket into which the smaller ones are emptied. After a struggle she fell out of the basket on the floor. At this point, Gloria came to her rescue and in so doing tumbled into the waste basket herself. . . . Harry Balz also had a little difficulty the other night. He looked "beaten" the following morning, anyway. For a lurid description of all that befell him, see Harry. . . . We want to say goodbye and wish every good fortune to Frank Meyer in his new venture. He and his family are moving to Oklahoma. . . . Happy birthday to Georgia Garrett, who was a year older May 12, and also to Jack Kirlin, May 6. . . . Gil Baker clarified the statement that everyone had gotten a charge out of the drafting covers by explaining that everyone who rubbed a rag over the covers created static electricity and that everyone who touched the covers received a charge. . . . My neighbor, John Oldencamp, seems to be having lots of trouble lately. It seems that not only has he broken two pipes in the last two weeks, but his landlady has advised him that in Indiana one pulls the shades down at night!

MAY 16 THROUGH MAY 20

BROADWAY TAYLOR STREET

Serving Hours:

Cafeteria—16-1 11:00 A.M. - 1:00 P.M. 10:48 A.M. - 12:30 P.M.
16-2 11:00 A.M. - 12:30 P.M.
16-1 6:45 P.M. - 8:12 P.M. 6:55 P.M. - 7:30 P.M.

Restaurant 16-2 12:00 M. - 1:00 P.M.

MONDAY, MAY 16

Bean Soup	Split Pea Soup
Roast Pork	Smoked Sausage
Salisbury Steak	Italian Spaghetti
Ham Sandwiches	Ham Sandwiches
Mashed Potatoes	Whole Browned Potatoes
Buttered Parsnips	Buttered Peas
Buttered Green Beans	Escalloped Corn

TUESDAY, MAY 17

Vegetable Soup	Bean Soup
Roast Beef	Roast Pork
Pork Chops	Veal Chop Suey
Bacon and Tomato Sandwiches	Chopped Beef Sandwiches
Whole Browned Potatoes	Whipped Potatoes
Baked Beans	Stewed Apples
Buttered Spinach	Buttered Carrots
Corn Bread	Corn Bread

WEDNESDAY, MAY 18

Cream of Chicken Soup	Tomato Barley Soup
Baked Ham	City Chicken
Chicken and Noodles	Ham and Limas
Hamburger Sandwiches	Hot Roast Pork Sandwiches
Mashed Potatoes	Whipped Potatoes
Escalloped Corn	Buttered Cauliflower
Buttered Cabbage	Buttered Green Beans
French Fried Onions	

THURSDAY, MAY 19

Tomato Barley Soup	Vegetable Soup
Swiss Steak	Swiss Steak
Ham and Limas	Chicken and Noodles
Braunschweiger Sandwiches	Barbecue Sandwiches
Mashed Potatoes	Whipped Potatoes
Buttered Peas	Buttered Spinach
Apple Sauce	Creamed Tomatoes

FRIDAY, MAY 20

Cream of Tomato Soup	Chicken Noodle Soup
French Fried Fish	French Fried Fish
Meat Loaf	Baked Ham
Ham or Cheese Sandwiches	Hot Roast Beef Sandwiches
Parsleyed Potatoes	Fried Potatoes
Buttered Wax Beans	Harvard Beets
Spaghetti and Tomatoes	Buttered Hominy

Wide selection of home-made pies and delicious salads served daily.
Breakfast served at Broadway daily from 6:20 to 7:50 A.M.

Special dinners and parties arranged upon request.

WHAT IS YOUR HOBBY?

THEODORE H. WEBER
Taylor St.

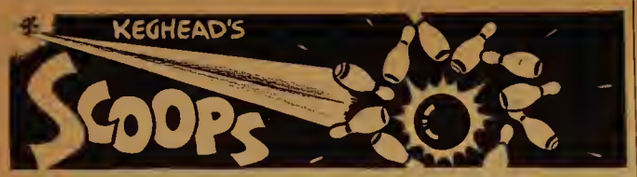
"My hobby is working with an electric bench saw and other tools. I also enjoy doing carpenter work on a small scale. My other hobby is baseball."

ORAL L. HYSER
Bldg. 26-4

"My hobby is both hunting and fishing. Mainly because these are both outdoor sports—a healthy relaxation from indoor employment."

PEARL P. NOBLE
Bldg. 4-5

"My hobby is trying to be nice to people, making new friends, and keeping in touch with my old friends, and being kind to everyone I know."



LA VERA WONDERLY
Taylor St.

"I have several hobbies, but my preference is reading. I feel an obligation to keep abreast of current events to the utmost of my ability. A 'must' on my agenda is the daily paper, which I supplement with **Readers' Digest** and **Life Magazine**. I find these publications full of varied and up-to-date subjects that are of general interest to all."

CLIFTON J. MUGG
Bldg 19-3

"My hobby for the winter months is bowling, which is a clean sport, entertaining and very good exercise. For the summer months I like to be at the lake, fishing and working on my cottage."

The Inspectors of the Winter Street League walked off with first place and those blue sweaters in the Tournament of Champions last Friday evening. They had games of 954, 973 and 957 for a 2,884 total. They were paced by M. Patrick's 526. The Inspectors had a handicap of 168 pins per game.

Second place went to the Apparatus No. 2 team, which had a 2,870 total with a 152 pin handicap per game. Third place was won by KSP Motors of the Specialty-FHP Motor League with a 2,834 total and a 170 pin handicap per game.

Production of the Taylor St. League came in fourth with 2,834 and 179 pins per game. The Mikes of the Apprentice League, last year's champions, came in fifth with 2,828 and 152 pins per game. Brouwer's Tire and Battery of the Interdivision League placed sixth with a 2,801 total and a 75 pin handicap per game.

Seventh placers were the members of the Ionic team of the Masonic League with 2,760 total and 150 pins per game. Dickason's Barbers, of the Office League, finished eighth with 2,753 and 110 handicap. Tools of the Small Motor League were ninth with a 2,584 total and 119 pin handicap. Flanges of the Division 14 Bowling League came in last with 2,568 and 214 pins per game.

Frank Matthews had the only 600 series of the tournament. Frank had games of 201, 213 and 210 for a 624. There were only two other 200 games shot and those were by Herbie Habig, 239, and Don Dimke, 200 on the nose. The members of the winning Inspectors team are V. Lomiller, R. Grant, M. Patrick, J. Meyer, and S. Green.

Women's Division

In the Women's Division, the Tuesday afternoon girls won with a 2801 total on games of 900, 880 and 1021 with a handicap of 221 pins per game. Second place went to the Friday evening girls, who had 2781 with a 245 pin-handicap per game. In last place were the Monday evening girls with a 2,741 total and 240 pins per game.

Virginia Bowman had the only 500 series, a 501 on games of 189, 169 and 143. High games were rolled by J. Getty, 188; Charlotte Stanford, 199; and Virginia Mollet, 187 and 173. Members of the winning team are J. Getty, L. Lernet, Eva Fisher, Charlotte Stanford and Tommie Williams.

Gordon Parmalee has a new way of cutting string — with a screw driver. Later on in the week he received a pair of scissors through the mail. . . . The small lot section fellows held a party at the home of Bud Kissinger last week. It was enjoyed by all. . . . Birthday greetings of the week go to Alice Hahn. . . . Just because Kathryn Gilbert's picture was in the paper, she wanted to monopolize all the WORKS NEWS. . . . Growing tomatoes and raising chickens are just too much for Pete Espich. He set his plants out, but next day the chickens had eaten them. One of them needs a fence, Pete. . . . The second shift had a farewell potluck for Jim Battrick who is going to leave us for three months. He is accompanying his parents to England to see his grandmother who is very ill. The first and second shift presented him with a Sheaffer pen and pencil set, stationery and a beautiful decorated cake. Jim was born in England and came to the United States when he was 10 months old. His father and mother have not seen their native land or their people in 25 years. From all of us, Jim, we wish you and your parents a most wonderful trip and voyage. They are sailing on the Queen Mary. . . . The first summer sunburns are now being displayed by Hank "Pinky" Vance and Carl Plattner who claim them to be the result of building a fence and fishing.

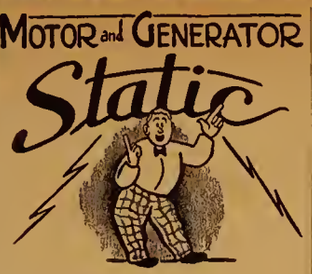
Little Lynn

Lynn Crawford, the little fellow above, is now grown-up and an inspector in Bldg. 4-5. He has been with the General Electric Company 30 years, is married and has three children.

In the Spotlight
AT YOUR G-E CLUB

By Bill Allen

"Ole time" dancing featured the family night finale of the present season last Friday evening at the G-E Club gym. . . . Several hundred people "do si doed" and promenaded to the music of Joe Taylor and his Redbird recording band. . . . Joe, a G-E employee from Bldg. 27 and Ed Parker, Bldg. 26-1, who does all the difficult calls really put on a "show" in spite of the terrific temperatures. . . . Baseball time again. . . . The Voltmen will use the new shower and dressing room facilities at Dwenger Park this year. . . . Many new faces will be noticed in the Voltmen line-up this season, including several with major or class AAA league experience. . . . Don't forget the seasons opening game tomorrow night with the famous Homestead Grays.



Our deepest sympathy to Dea Logan in the death of his mother and to Joe Niedermeyer in the death of his sister. . . . We were sorry to hear about Norbert Hans' accident and sincerely hope he will soon be able to leave the hospital just as good as new. . . . The boys surprised Dick Gallmeier on his birthday last week and it really was a surprise, too, 'specially when they cleaned the ol' boy out. . . . No, Elton Swank isn't walking in his sleep these days, folks. He's on first trick now and we hope he likes it. . . . Just ask Bill Doehrman how it feels to drop off to sleep, only to have some kind soul (meaning Fred Altekruse) start swinging a sledge hammer just about so many inches from his ear. . . . See Keith Wolfe on details for trick photography. He has a roll of movie film that can't be equaled and will show it upon request. (Did you really use the same roll of film twice, Keith?) . . . Do you suppose Art Nickerson was singing "Open The Door, Richard"

Farewell Party

These are the boys that surprised Lee Miller, Bldg. 10-1, with a farewell party at his home last week. Lee was presented a chest of aluminum wrenches, along with many good wishes from all the gang. He retires this month and is now enjoying his vacation.

when he locked himself out of the College St. gatehouse last week? . . . To go on with our story of Bob "Jack Benny" Hatfield and the grill—he is now having the thing done over in bronze. We're inclined to believe it will serve as a gift to the Mrs. for their golden wedding anniversary. . . . Elmer Mesing's bald head looks like a ball of fire this week. Is that from the sun, "Emily," or did your blood pressure hit a new high? . . . "Sad Sack" Kilcoin, they call him, or, don't drive to Schenectady and back in one week-end. . . . Who or what did Charlie Hartman run into? Could it have been an innocent little light bulb? Anyway he was sporting a big patch on his head last Monday. . . . Glad to see Luther Childers back at Taylor St. after being sick a few days. . . . Not only can Walt Rosselot sing but he also writes verses for songs. You should hear his rhyme for coke. . . . Carl Moore says that he and his family caught 206 fish over the week-end. He won't say which lake he caught them at. . . . Arnold Landis asks everyone to pray for nice weather next week when he takes his vacation. He says he is "going to relieve the congested condition of the lakes of Wisconsin." . . . Harold Smith is taking everything standing up. His roto-tiller seemed to give him quite a hard time Sunday when it caught on a tree root and threw him into high heaven. . . . Birthday greetings to Forest Somers, Clark Mayclin, Madalyn Fryer and Lee Miller.

Thought for the Week: "It's give and take in this world, with too many people trying to take."

FIVE HUNDRED MILE RACE: Do you old-timers recall seeing some of these makes of cars going through Fort Wayne about three or four days before the race? Marmon, National, Cole Eight, Apperson Jack Rabbit, Haynes, Winton Six, Flint, Reo, Stoddard Dayton, Pope Toledo, Stearns Knight, Hupmobile, Willys-Knight, Pierce Arrow, Cord, Auburn, Stanley, American Underslung, Brush, E. M. F. (Flanders) Fiat, Mercedes, Oakland, Overland, Blittzen Benz, Franklin, Roosevelt, El Car, White Steamer, Chandler, Essex, Saxon, Durant, Maxwell, Lexington, Wecott, Jeffery Quad, Dobel Detroit Steamer, Revere, Olds, Stutz Bearcat, Rambler, Kissell Car, Moon, Autocar, Dusenberg, Velie, Star, Duryeau, Lycoming, Rickenbacker, Carnation, Crow Elkhart, Chalmers and Imperial. Brother, if you do, you're getting old. . . . VERSATILE: This column has often stated tha Roscoe Markley is a versatile man. We published accounts of his accomplishments in the field of sciences, animal husbandry, agriculture, sports, civic activities and entertainment. The WORKS NEWS dated April 29 carried a further list of his talents in the "Inquiring Reporter" column. Now we learn that Roscoe served a nine year hitch with the National Guard. To prove this fact to all Doubting Thomases we present a picture of Mr. Markley in his military garb including that young cannon strapped on his hip. . . . STARS IN YOUR EYES: To Art Druce our thanks for this story. He and his pal, Frank Rathert, form a sort of a Damon and Pythias act. The other morning Mr. Rathert did not ride the usual bus to work and one lady inquired of Mr. Druce, "Where is Twinkle Eyes this morning." "Twinkle Eyes," replied Art looking dumb, "and who is Twinkle Eyes?" Just then another passenger inquired, "Do you mean Frank Rathert?" "Sure" said the lady, "that's the guy, but we always call him 'Twinkle Eyes'." . . . Your Roving Reporter.

Pistol Packer

Horseshoe Season Opens

All those interested in entering G-E horseshoe competition should contact Art Kraft, A-87853.

Ham League Players Will Be Selected At Practice Tuesday

All ball players over 35 years of age interested in playing ball with the G-E Club in the Ham Softball league are requested to be at diamond No. 4, McMillen park, at 6 p.m. Tuesday, May 17.

Fifteen players will be chosen and there are several positions still open. League play will open Tuesday, May 24, and Wednesday, May 25. G-E will meet its first opponent, International Harvester, Wednesday, May 25.

Congratulations to Mr. and Mrs. Silas Anspaugh. They have a baby girl, who was born Wednesday, May 4. . . . Ora Grossman has been seen using Joe Middendorf's glasses for reading purposes. . . . The gang in 14x4 was quite disturbed last week when Ed Rodenbeck called their attention to a particular "spot" in Div. 13. He seemed to have an optical illusion. The boys are hoping he will snap out of it . . . Mr. Grier has been drawing pictures of his Buick and realizing just where his 1948 income has gone. We understand he is in the market for a new Ford. . . . Old age certainly must be creeping up on Bill Lavine. The temperature was 88 and he was still wearing his wool jacket. . . . Congratulations to Waldo Martin and his team. They won the bowling championship. . . . Gay Huey, Bertha Wittie, Helen Perrey, Ann Johnson and Margaret Lepper are going to Detroit to attend Sophia Bodigon's wedding. . . . Bob Crosley and Dallas Corson were "trapped" while doing their roller skating act. . . . At a recent party Herb Habig finally broke down and bought an "out-of-town" beverage. Now the fellows are wondering if he will follow through at the bowling party? . . . For superb entertainment ask Mike O'Grady to give a rendition of his latest composition. . . . Now that Walt Niemeyer has a big Chrysler we understand he is purchasing his beverages in one-half sizes. By the way, Walt, the boys are very curious as to just what your favorite subject is. . . . Myrtle Barfell presented Bill Lavine with a "hot rod" automobile for his birthday. . . . There is a certain gentleman becoming notorious these days in the group by the name of Noel Young. He has had three reprieves. Good luck, Noel. . . . Harold Somers was quite late one morning and, of course, the old stand-by, the alarm clock didn't ring, was given. Harold, the Employees' Store sells very good clocks. . . . Cleon Oyer has been telling the gang what he uses his new spotlight for. Just remember, Oyer, you were young once yourself. . . . An array of very bright colors was enjoyed last Friday. Mr. Campbell, Carl Reynolds, Gus Weisenburger, Dale Irwin all wore very attractive ties, and last but not least Russell Frey. . . . Fred Vogt would like to purchase a compass that will point to the green on the golf course. . . . Just why does it take two men to move a car parked by a fire plug? . . . Many happy birthdays to Nora Furthmiller.

Voltmen To Stage Opening Games

(Continued from page 1)

The Voltmen's first home game will be played Saturday night before the official opening, when the semipro champs meet the nationally-known Homestead Grays of Washington, D.C. The House of David club will journey here Tuesday night to face the G-E team and then Thursday night the Voltmen will encounter the Benton Harbor Buds.

Season Passes Offered

G-E Club President Charles Wilt announced today that season passes will be given to the men who volunteer to be in charge of the children's section at the games. Those interested are requested to contact Mr. Wilt at the G-E Club office or by phoning him on 742 or A-40854.

All employees with Booster tickets will be admitted to all games for 50 cents. Children 14 and under will be admitted free to all Voltmen games except major league attractions, and all students from 14 through 18 for 30 cents.

Pensioners also will be admitted to all regular Voltmen games free of charge, if they will enter through the right field gate and show their pension cards. Admittance will he granted only if a pension card or certificate is given as identification.

Sunday Is Ladies' Day

The opening game Sunday will mark the first Ladies' Day of the season. All ladies accompanied by men will be asked to pay only the 12 cent tax fee.

The box office will open at 1:15 p.m. Sunday, and at 6:45 p.m. for the night games.

Roy Kilby, Columbia City outfielder, and Catcher Donald (Gabby) Horman signed contracts this week to play with the semipro champs. Kilby is the football and basketball coach at the Columbia City high school and will play in the Voltmen outfield; Horman will act as a reserve catcher and utility infielder.

Charles Bobilya, popular Fort Wayne baseball star, and John Burkhardt, catcher, have been signed by the Voltmen to complete the squad.

Bobilya will relieve left-handed batting Olan Smith at first, whenever the opposition starts a southpaw pitcher. Stan Shargey, who handled the shortstop position last season, has been switched to third base and John Dudick will play shortstop. Bill Hardy will remain at second. Stan Miasek has cinched the left field berth and Don Runge is becoming a fixture in center.

The Voltmen's pitching staff includes three southpaws in Scott Cary, Al Hazel and Ray Janikowski, and three right-handers in Hugh Orphan, John Orphal and Charley Shipman.

Voltmen Honor Roll

The following have pledged their support of the G-E Voltmen by purchasing box seats:

Box No. 7	Fort Wayne National Bank
Box No. 8	Pure Sealed Dairy
Box No. 9	Keefer Stewart Frank Aiken Deluxe Pastry Troy Laundry
Box No. 36	General Electric Co.
Box No. 37	Mr. and Mrs. Charles P. Thompson
Box No. 38	Mayor Henry Branning, Jr.
Box No. 39	Taylor Shop
Box No. 40	Allen Dairy
Box No. 41	Lee Sales
Box No. 42	Earle Moss
Box No. 43	Hatcher Motors

Members of the bearded House of David team are shown above. This Benton Harbor, Mich., squad will play the G-E Voltmen Tuesday night, May 17, at Dwenger Park.

"A Seat in the Stands"

The season for the annual management-union negotiations is now beginning.

Some unions will seek wage increases only. That is what UE may want to discuss at General Electric, as our settlement last year was for two years with one reopening, for wages only.

But many more unions will be seeking pensions and other similar benefits. They seem to recognize that further wage increases are not warranted in view of the need this year for cost and price reductions to attract buyers. Yet they seem to feel that somehow these proposed pension and health plans come free.

Since the agreement with UE removes any consideration of additions to our pension and health plans already long in effect, and since we have an advantageous "seat in the stands" from which to view what others do, let's watch carefully what happens. Let's especially note the rude awakening of any people among other managements, unions, and employees who think these things are free.

A sound pension plan is no small undertaking either in money or courage. Nothing about it comes free. It all has to be paid for in hard cash. For instance, General Electric employees of 20 to 40 years service pay only about $17 toward each $100 they may receive from their General Electric Plan after retirement at 65*. The balance is made up by G.E. except for what interest is earned on this amount. And each pensioner of 10 or more years service is now protected by free hospitalization up to a further $250.

As a result of the improvements in our pension plan three years ago, the cost to the Company of credit for past service of our employees through 1948 was brought up to $275,000,000. We paid about $35 million into the fund for last year. There are 160,000 G.E. men and women now participating in the pension trust, which means almost $1,800 out of G.E. earnings for each one of this 160,000.

The General Electric pension plan was voluntarily put into effect as an additional reward for long and uninterrupted association in G.E. It was never intended to provide completely for retired employees, but only as a supplement to savings and other provisions a prudent employee would have made during a long career with us. Yet let's look at this chart below and note how liberally your G.E. pension adds up with social security to which G.E. has also contributed. If you are married at the time of retirement you would add your wife's social security benefits to your own shown in the fifth column.

YOUR RETIREMENT INCOME TO WHICH ONLY YOU AND G.E. WILL HAVE JOINTLY CONTRIBUTED

Your Average Annual Earnings at G.E.	Your Average Annual Contributions to the G.E. Plan	Your Total Contributions to the G.E. Plan in 40 Years of Service	Your Annual Income on Retirement After 40 Years of Service Under the G.E. Plan	Your Annual Income From Federal Social Security After 40 Years, Under the Present Law	Your Total Annual Income, During Retirement, from Funds You and We Have Supplied	In the Usual 14.4 Years* of Retirement After 65 You Would Draw a Total of...	Of Which You Would Have Paid Into the G.E. Plan and Federal Social Security Only...†
$2,000	$ 40	$1,600	$ 640	$532	$1,172	$16,877	$2,400
2,500	50	2,000	800	602	1,402	20,189	3,000
3,000	60	2,400	960	672	1,632	23,501	3,600
3,500	85	3,400	1,360	672	2,032	29,261	4,600
4,000	110	4,400	1,760	672	2,432	35,021	5,600
4,500	135	5,400	2,160	672	2,832	40,781	6,600
5,000	160	6,400	2,560	672	3,232	46,541	7,600
6,000	210	8,400	3,360	672	4,032	58,061	9,600

* Men have an expectancy of 14.4 years after retirement after 65; but women can expect to live 21 years beyond their retirement age of 60.

† Under current operation of the present law.

General Electric has provided this sound and liberal pension program as an extra benefit out of stockholders' earnings. Meanwhile G.E. has been paying the full going wage rates that were currently right to the extent G.E. and the employees—or G.E. and the employees' unions—could determine what was right.

It will be interesting for all of us to see, from our privileged "seat in the stands," how others come out who are just now tackling this expensive and otherwise demanding idea for the first time.

Motor, Generator Accepts Orders For Short-Delivery

Special Effort Is Being Made To Maintain Present Employment

With the market for the products of the Large Motor and Generator divisions becoming more and more competitive, J. M. Crawford, manager of the divisions, reports that a special effort is being made to encourage orders for short cycle business to maintain present employment.

Heretofore, the divisions did not consider it advisable to accept short-delivery orders because of the possibility of not meeting schedules; thus destroying future potential business.

"Some new business has already been created through the new program which, if delivery dates are met, may promote additional orders," Mr. Crawford said.

He further stated:

"The maintenance of a consistent level of business depends upon several considerations:

(1) The over-all amount of business available.

(2) Offering competitive shipping promises to meet competition.

(3) Actual performance after the order has been secured.

"Performance is a factor in obtaining a fair share of available business. It will also be a deciding factor in keeping or losing of good repeat customers.

"In the final analysis, the customer is the one who determines how many people we employ. Management of this division is extremely desirous and anxious that our over-all performance be a credit to our customer relationships.

"Every employee can make a contribution to this by: reduction of losses; accuracy of doing the job; discussion with Supervision about problems and difficulties, and doing the job 'on schedule'.

"The cooperation and suggestions of all personnel in the division are earnestly encouraged to this end."

Long, Short Cycle

The Large Motor and Generator divisions manufacture all the me-

Veterans Plan Memorial Day Commemoration

The G-E Veterans' Association will hold its Memorial Service at 12:15 p.m. Friday, May 27, in front of Bldg. 19. The service will honor the memories of 109 former Fort Wayne Works employees who died in the two World Wars.

John E. Estabrook, Assistant to the Works Manager, will deliver the main address.

C. H. Matson, Works Manager; E. A. Barnes, former General Superintendent and now retired, and K. W. Michael, president of the association, will also take part in the program.

All employees whose work schedules permit are invited to attend.

Policies of G-E Benefit Plans Are Outlined

To answer the many questions being asked concerning the benefit privileges of employees laid off due to lack of work, W. E. Beer, Supervisor of Employment, has issued the following information:

Continuity of Service

Continuity of service will be protected for one year from the last day worked.

If an employee is not called back to work within one year, his continuity of service will be broken. However, if an employee is called back to work after more than one year's absence, his case may be submitted for restoration of service if the time absent does not exceed the length of his previous service.

Employees with less than one year's service at the time of layoff will not receive credit for any time lost for lack of

(Continued on Page 4)

New Work Week Schedules Announced To Start May 23

Action Taken After Negotiations Of Company, Union Representatives

Effective Monday, May 23, most of the manufacturing divisions of the Fort Wayne Works will be placed on a schedule which will average approximately 36 working-hours per week until July 29, instead of the current 40-hour week.

This will remain in effect unless there is an improvement in business.

Shortening of the work week will be accomplished by eliminating the following Mondays from the working schedule: May 23, June 13, June 27, and July 18.

Decoration Day, May 30, and Independence Day, July 4, will be scheduled as work days. This means that employees entitled to such consideration will receive holiday pay, though no work will be performed.

Agree on Schedule

Action on the shortened working schedule was taken following negotiations between Company representatives and representatives of the bargaining units. In the discussions, it was agreed that in view of current business conditions, shorter hours were desirable in the interest of the entire working force and consistent with agreements existing between the Company and the labor organizations.

The 36-hour week will assist in cushioning the downward trend in production and employment resulting from a drop in orders received for the products of the Fort Wayne Works. This reduction of the number of hours to be worked permits spreading available production among more people.

Commenting on the new schedule, C. H. Matson, Works Manager, stated:

(Continued on page 3)

Elex To Hold Annual Party For Fathers

The Elex Club's annual Father-Daughter party will be held Friday, June 3, at 8 p.m. in the Kreis Stolzenau hall, it was announced today by Charlotte Stanford, president.

A program has been planned featuring Joe Taylor and his band. Dutch lunch will be served after the program. As customary, each father will then receive a gift from the Club.

Tickets for the party can be purchased for $1.50 from contact girls. Reservations must be made by Tuesday, May 31.

Erben Visits Fort Wayne Works

Ray Quandt, Div. 13, is shown at his work, as Lisle D. Hodell, Manager of FHP Manufacturing, conducts Mr. Erben on a tour of the Taylor St. plant.

H. V. Erben, Vice President of the Company and General Manager of the Apparatus Department, visited the Fort Wayne Works this week. He spoke to members of the Squares Club and engineers at the Squares hall Wednesday evening.

Changes In Cafeteria Service Are Announced For May 23

Cafeteria services at the Broadway plant will remain the same Monday, May 23, except for the following changes:

Bldg. 16-2 cafeteria will not be open.

Those who normally use this cafeteria are invited to use the cafeteria in Bldg. 16-1. The restaurant in Bldg. 16-2 will remain open.

No food wagon service will be offered for Bldg. 26.

Regular cafeteria service will be available at the Taylor St. plant.

Memorial Day

On Monday, May 30, the Broadway and Taylor St. plants, in general, will be closed in observance of Memorial Day.

C. H. Matson

Works Manager.

Bonds Put More Opportunity Into Everyone's Future

One of the greatest peacetime promotions ever let loose in the U. S. has been prepared for the government's 1949 savings bond drive, which started this week and ends June 30. In many respects this campaign will be bigger than the war bond drives. It is the first time since the war that the government has ventured to set a quota—$1,040,000,000 in Series E Bonds.

The name of the campaign is "Opportunity Drive." The slogan is "Put More Opportunity IN YOUR Future."

The main reason for the big drive this year is that the U. S. Treasury needs the money. Government expenditures are up and the income from taxes is down. The Treasury's own explanation elaborates:

"The widest possible distribution of our national debt is the responsibility of all of us. Through continued investment in these bonds by individuals we distribute the debt as widely as possible rather than concentrate it in banks, thus securing a better balanced ownership and a less volatile debt. Further, as the debt shifts from banks to persons billions of dollars of interest go into American homes."

To date, about 80,000,000 Americans hold approximately $32,600,000,000 in Series E Bonds. This is greater than at the peak of wartime savings. The Treasury reports that saving through government bond purchases is now the most popular method of saving by American families.

One of the most encouraging facts about the whole government savings bond business since the war, according to Treasury officials, has been the steady decline in the number of persons cashing them in. The first year after the war was worst, with redemptions exceeding E Bond sales by $957,000,000.

The redemption rate in 1948 was lower than in 1947. The net of E Bond sales above redemptions in 1948 was 219 per cent of that of 1947. Cash-ins for the past three years have averaged less than one per cent a month of the total outstanding.

E Bonds sell for 75 cents on the dollar of maturity value. The E Bond matures in 10 years and pays an average of 2.9 per cent compounded semi-annually, if held to maturity. An individual can purchase up to $10,000 worth of them in any one calendar year.

Company Offers Stock Bonus

Under the terms of the G-E Employee Savings and Stock Bonus Plan inaugurated Oct. 1, 1948, the Company is offering the incentive of a bonus to encourage a larger number of employees to save some portion of their pay regularly. The limit of deductions is $10 weekly which would be eligible for payment by the Company each year of a 15 per cent bonus of G-E stock.

Payment of the bonus is contingent upon the participating employee leaving the Series E bonds purchased under the plan on deposit with the Company for five years following the year in which the bonds are purchased.

This means that those employees now buying bonds under the plan will be credited at the end of the year with G-E stock representing 15 per cent of the cost price of bonds actually purchased this year under the plan.

Regardless of the five-year holding period, any employee may withdraw from the plan at any time and recover whatever he has paid into the plan, both bonds and any cash balance. He will get the stock bonus, however, only if he leaves his bonds on deposit for the full holding period.

Under the plan, the Company is contributing up to $4,500,000 a year with the hope that the regular savers will be joined by at least a portion of those employees who, in the past, have not formed the habit of regular saving.

Put more Opportunity in YOUR Future! Subscribe to the Employees' Savings and Stock Bonus Plan today.

PUT MORE OPPORTUNITY IN YOUR FUTURE!

HUGH CRANE discusses The Marshall Plan

NEW YORK—As good an idea as the Marshall Plan is, there are some strange quirks and contradictions in it.

Some of them look as though they might make it go on forever, instead of letting it end in 1953 when it's supposed to end. And all the contradictions don't originate in Europe either.

Is this the End?

To begin with it doesn't exactly look as though we ourselves wanted it to end then—or at least all of us. It means a big market. Already this year a hundred American industries and interests have tried to climb on the Plan, or stay on it. American ship operators want to do the carrying, although the Europeans can do it themselves. American farmers want to send more cotton and grain; American millers want to do some of the grinding, although the Europeans can do it. American machine tool makers and a number of other industries want their products included in larger quantities; it almost begins to look as though the Marshall Plan was partly turning into a boondoggle for the relief of Americans as much as of Europeans.

You get the same impression if you turn to the import side. ECA Chief Paul Hoffman keeps telling the Europeans, "Sell more goods in America. Study the American market and learn how to sell in America." But a lot of American industries are getting ready to battle the import of "cheap European goods" into this country. Yet it has been estimated that if the Europeans are eventually to get over their "dollar shortage" they'll have to either increase their sales to this country by several billion dollars of else capture half our markets in South America and the Far East. Who's going to like that, if it's his market that's being captured?

For 50 years at least we've been exporting more goods than we've been importing. Four years more of Marshall Plan isn't any too long for us to get used to the idea of importing as much as we export.

The Payoff

But the Europeans also have some jokers in their attitude toward balancing accounts with us and paying with goods for the goods they get.

On the surface their difficulty seems to be that their costs and prices are too high. American goods, by and large, are low in price compared to European goods. So it's nice for them to "buy American" but hard for them to sell in America — and getting harder as prices here go sliding.

But there's a fairly simple explanation of this and solution to it. Their currencies are too high; or in other words they pay too little for the dollar. For example the British price of the British pound sterling is four dollars. But it isn't worth four dollars. You can't get four dollars' worth of goods for it, but only about three dollars' worth. And the same goes for the other important currencies of Europe (except the Swiss franc). They can talk all they want to about trying to sell their goods to us, but the one thing they ought to do and won't do is to mark their currencies down; then they wouldn't have to keep trying to sell three dollars' worth of goods for four dollars.

Is There a Joker?

This "dollar shortage" business can have a joker in it. A country may be short of dollars because it has been run over by the juggernaut of war, like a man whose house has burned down, or it may be short of dollars like a man who wants to build a bigger and better house than he can pay for right now.

Anyway the simplest answer to the dollar shortage is for these governments to let their citizens pay more for dollars and charge less for their own currencies. That's how they used to do it. Nobody heard of dollar shortages before the war.

But is it so simple? If the Europeans all dropped their currencies to the point where they could really sell, and sell heavily, in this country—imagine the howl that would go up, from this side of the Atlantic. Do we really want to get paid after all, if it means, as it must, getting paid in goods?

Meet the President

Company Cuts Prices On Household Refrigerators

Father, Son Are Members Of Quarter Century Club

Ed Leitz

Ray Leitz

Ed Leitz, retired, and Ray Leitz, Decatur plant, are one of the few father-son combinations in the Quarter Century Club.

Ed Leitz was in the same division 29 years. He worked on type H transformer assembly when he first came to General Electric in 1917. Between that time and his retirement in 1946, he was foreman of small unit winding assembly, foreman of luminous tube and ignition assembly, and foreman of capacitor assembly for commercial refrigerators, until that section was moved to the East. When he retired, Mr. Leitz was working on assembly in the Transformer divison.

Since going on his "permanent" vacation, he has been taking it easy around his home at 2118 Broadway. Mr. Leitz has three sons: Ray, who has worked for G-E 33 years; Ed, Jr., and Paul, who at one time worked for the Company. To complete the G-E family, Mr. Leitz' father worked in the storeroom, located where Bldg. 4 is now, 33 years before his retirement in 1925.

Ray came to General Electric one year before his father, as a clerk in the pattern shop. He later worked on winding in the Motor and Generator division, and then transferred to FHP cost work. In 1919 he went to transformer cost and since 1937 has been Supervisor of Cost at the Decatur plant.

Mr. Leitz is very active in community activities at Decatur. He is president of the Community Fund; county chairman of the Payroll Bond Deduction Drive; and chairman of a committee appointed by the mayor to study the need for a community building in Decatur. He is married and has three children. The Leitz family lives at 1015 Monroe St., Decatur.

New Work Week

(Continued from page 1)

"We are happy to be able to agree on this measure which will eliminate some layoffs for lack of work resulting from the sloping off of business. It is to be hoped that this situation will only be temporary. Not only does it deprive our employees of essential income, but also it may adversely affect prices and future operations in the long run; as our high cost of overhead, which continues regardless of the number of hours worked, must be spread over fewer units of production."

During the past several weeks, some of the Fort Wayne manufacturing divisions and satellite plants have been operating on the 36-hour schedule with a few observing a 32-hour week.

Personnel in all divisions affected are being advised of the new schedule by their foremen and supervisors and bulletin board notices. Vacation pay at the time of the annual shutdown, July 29 to Aug. 14, will be based on a 40-hour week, regardless of revisions in the work schedule preceding the shutdown.

Schedule Is Outlined

Following is the work schedule as agreed upon up to press time:

Fractional Horsepower Motor Divisions 1 and 16 will follow the schedule, except that they will work on Monday, May 23.

Fractional Horsepower Motor Division 17 will follow the schedule, except for Monday, May 23, when approximately 65 persons will work a half day and the remainder will work a full day.

Fractional Horsepower Motor Divisions 13, 14, 15 and 33 will follow the schedule.

Fractional Horsepower Motor Divisions 19 and 20 will follow the schedule except where necessary to contribute to Division 16.

Fractional Horsepower Motor Division 36 will not follow the schedule, but will work 40 hours.

Transformer Divisions 91, 93, 94 and 95 will follow the schedule.

Motor and Generator will not follow the schedule, but will work 40 hours.

Winter St., ACD will follow the schedule, except they will work on Monday, May 23.

Fairfield Ave. ACD Regional Parts will not follow the schedule, but will work 40 hours.

Wire and Insulation will follow the schedule.

General Service Division will follow the schedule.

Shipping and Receiving will follow the schedule.

Regional Parts Warehouse will follow the schedule.

In certain divisions where a skeleton force is needed on the days off, those working will be scheduled to take time off later in the week.

Power House and Plant Protection employees will continue to observe the regular working schedule.

Tool Room employees will continue to observe the 32-hour work week which has been scheduled for the past several weeks.

New Reductions Estimated To Save Consumers Eight Million Dollars

Price reductions ranging from $9.25 to $19.25 were put into effect today by G-E on its entire line of household refrigerators.

Coupled with changes annouuced earlier this year on three popular low-priced refrigerators, today's reductions will represent a total savings to the nation's consumers of approximately eight million dollars. In announcing the reductions, L. H. Miller, Manager of the G-E Refrigerator division, pointed out that the Company's refrigerator sales in the year to date have run over 30 per cent higher than in the comparable 1948 period.

The new list price schedule follows:

	New Price	Previous Price
NC-6	$189.75	$199
NF-6	194.75	209
NB-8	229.75	245
NC-8	269.75	279
NF-8	319.75	329
NH-8	399.75	410
NC-10	309.75	329
NF-10	349.75	364
NH-10	449.75	460

Emphasizing that "from a manufacturing standpoint, there is absolutely no justification for lowering prices at this time," Mr. Miller said that "we are taking this step in anticipation of the manufacturing economies that we believe must come through lower costs of materials and components."

He said that the reductions are being made at a time when the demand for household refrigerators is at its peak and when home owners need them most for the preservation of food during the hot summer months.

Motor, Generator

(Continued from page 1)

dium size industrial Synchronous and Direct Current equipment produced by the General Electric Company, with the exception of the specialized transportation machines made at the Erie Works. Included are motors, generators, dynamometers, printing press drives, and motor and generator sets.

Orders received on incoming business are divided into two classes: long and short cycle.

Long cycle business is loaded into the factory schedule months ahead of shipping date. Orders for this type of equipment represent a base load and have a wide application. They are used in connection with the operation of steel, rubber, and paper mills. Further application is in the operation of printing presses, large excavating equipment; as well as turbine and engine-driven generators for shipboard application.

Shorter Promises Needed

The short cycle business consists of both motors and generators. The motors are used for such operations as individual drives for pumps, compressors and blowers. The generators are used with diesel engines for portable power package units for such purposes as emergency use in hospitals, small towns, and circuses. A recent development is to furnish power for television booster stations.

Only a portion of the total factory schedule is represented by the long cycle business, and enough short cycle orders must be obtained if a desirable level of production is to be maintained.

The product is highly competitive. During the past year, it has been necessary to make shorter and shorter promises even to meet competition. This naturally has reduced the time cycle for Engineering, Drafting, Planning, Material Listing, Material Procurement, as well as Manufacturing. When necessary, because of short promises, everyone in office functions from designer to raw-material procurer gives this type of order special consideration.

A lecturer says that if you look a bear straight in the eye he'll run. But the gentleman forgot to say which way.

Five Complete Quarter Century Of Service

Philip J. Schott
Bldg. 17-1

Benefit Plans

(Continued from page 1)

work. Employees with more than one year's service will receive credit for time off up to six months but will not receive credit for time off in excess of six months.

When an employee is called back to work, he will receive a registered letter of recall advising him to report to the Employment Office. A period of two weeks will be allowed from the date the letter is received for the employee to report for work or his service will be broken.

Unemployment Compensation

A separation report for unemployment compensation will be given employees laid off for lack of work. This report should be presented to the local office of the Indiana Employment Security Division which has the sole authority for determining eligibility for compensation.

Vacation Allowance

Employees with more than one year's service at the time of layoff will receive pro rata vacation payments depending on the time elapsed since the last vacation period. Employees who have completed one year's service since Jan. 1 will be paid their full vacation allowance at the time of layoff. If the vacation allowance is not included in the last check, it will be mailed to the employee.

Group Life Insurance

Group Life Insurance may be kept in effect by making monthly premium payments in advance to the Payroll Section. (Either personally or by mail.)

Pension Plan

Employees belonging to the Pension Plan will continue to be members although no payments will be made during the layoff.

No contributions to the Pension Fund may be withdrawn as long as the employee retains continuity of service.

Mutual Benefit Association

An employee laid off for lack of work may retain coverage for himself by paying dues monthly in advance to the Payroll Section. Benefits will be limited to hospitalization as he will not be eligible to receive disability benefits.

Protection of dependents may also be continued during the layoff by paying dues monthly in advance to the Payroll Section. The employee must retain his individual coverage in order to continue his dependents coverage during the layoff.

Employees' Store

Employees laid off for lack of work may continue to make purchases through the Employees' Store as long as they retain continuity of service. (Up to one year).

Credit Union

Payments on loans may be made directly to the Credit Union Office.

Payroll deductions on the savings plan will be resumed on the same basis after re-engagement if absence has not exceeded six months. After this time a new authorization for deductions will have to be signed.

Model Racing Enthusiasts Start Club At Taylor St.

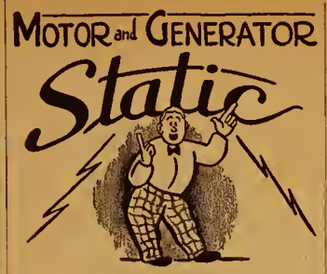
H. J. Murphy and R. C. Dennison, both of Taylor St., are shown starting their racer for a spin around the track.

The "hot rod" craze has hit General Electric with the same enthusiasm that has taken Fort Wayne by storm. About two months ago a number of G-E men and their sons became interested in miniature racers and erected a standard 25 foot track in the Taylor St. plant garage. This informal club meets every Tuesday evening from 7:30 to 10 p.m., and an average of 10 to 12 cars are on the track at one time.

Unlike the model cars publicized by a local newspaper, which are replica roadsters, the cars used by the G-E racing-enthusists are styled like regular racers. After receiving the models, they install engines very similar to model airplane motors. Also like model airplane making, the father-son teams make many of their own parts, such as wheels and axles.

These small cars come in three classes, .099, .150 and .195 cubic inch. Yet the tiniest of the three sizes can obtain a speed of 47 miles per hour on a standard 25 foot diameter track. The larger models are able to run at a top speed of 70 miles per hour. The fuel used in the racers is methanol. An ounce of methanol fuel is enough to keep the car in motion about three minutes.

The cars are attached to a center ball-bearing post by a piano wire leader with a bridle made of the same material. This set-up enables the racers to run unattended.



The enthusiasm for model racing has spread all over the world. There are persons interested in this hobby in seven countries and about 159 cities in the United States.

We are afraid that our famous athlete of yesteryear, Ralph Dunlap, is in a bad way as he has developed that middle age spread. We suggested that he go in for some strenuous exercise such as pole vaulting or shot putting to rid himself of this excess poundage. We would like to see him regain that figure which made him resemble a Greek Adonis. Sometimes we wonder if he and Harold Hart are trying to outdo each other to see which one can spread out the most. . . . Ralph Ecenbarger invested in one of those new-type lawn mowers, the kind that is made up of a series of small cutters. He tells us that it is a slavish job to try and mow a lawn with one of them, so he has crated it in preparation to returning it to the vendor. We might suggest that he use it as a reducing machine. We learn that the diffculty he had with his mower was caused by him letting the grass get so long that the newsboy lost his way between the house and sidewalk. . . . Now that Harold Richmond has successfully negotiated all of the hurdles that confronted him, upon joining the "Mystic Order of Ancient Arabian Hack Drivers," he is entitled to enter the inner sanctum and receive his little blue coat with brass buttons, also his high hat and white gloves. . . . A new sign appeared on the California road. It reads "Newton Poland's Raspberry Rancho." He has set out several acres of the luscious berry-producing plants and is expecting to derive much revenue from the sale of the berries. He has also purchased a high powered tractor and is going to do plowing on the side, so if any of you are in the need of raspberries or plowing, it will pay you to visit Newt's ranch. . . . Herman B. H. Hake is on the lookout for customers to purchase used clothing. He has lost so much weight that he is just a shadow of his former self. He tells us that his clothing hangs on his like a sack. He would like to dispose of his entire wardrobe to enable him to purchase some clothing that will fit. . . . Ray O'Neill came forth with the announcement that his brother, Perry, and wife are the proud parents of twin girls. Ray is very excited over the whole affair and explains his enthusiasm by saying that one does not often become an uncle twice in the same day.

ELEX EXTENDS DEADLINE FOR TRIP RESERVATIONS

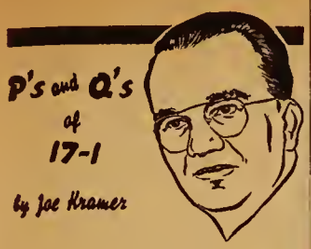
The reservation deadline for the Elex Club's excursion to Niagara Falls, June 11-12, has been extended to Wednesday, June 1. A down-payment of $5 must be made by that time at Irene Meyers' office, Bldg. 8-2, the Personnel office at Taylor St., or to contact girls.

Fred Eisenbiegler and Tiny March are out to set an endurance record in golf. Recently they played 45 holes of golf in one day. Nothing like spending a whole day on the golf course to get a good sun tan. . . . One of our draftsmen, Su Jung, is missing this week due to being laid off. Next week, Dresden Tiffany, will be missing for the same reason. We won't be surprised if the men petitioned to get Tiffany back, since he has a Varga girl calendar. The girl calendar was recently replaced for a day with another calendar with pictures of real he-men physique, muscle and brawn. The girls thought the new calendar a great improvement. . . . Glenn Tobias, one of our engineers, has been transferred to the New York Office. . . . Of all things to ruin the dignity of the M-G Office Mark Smith finished his shaving at his desk the other morning. It is too bad we don't have a large mirror in the office. . . . Dean Schaffer was talking to Dave Clugston when Dave said, "Hey, Ed, hand me the slide rule oil." Ed Cwiklo handed over a little green bottle with liquid in it. Dave proceeded to put a few drops on his slip stick. "Now it works fine," Dave said, "Do you want to try it on your rule, Dean?" Dean got his rule and Dave "oiled" it. Dean says, "it works swell." What wonders Ed's bottle of cough sirup can work. Fellows, have you tried cough sirup to improve your speed on calculations? . . . Congratulations! "Pop" Noll is "pop" again and this time it is a boy.

Some folks think the pinnacle of success in society consists of being in the height of fashion.

Battrick To Report On Life In England

E. J. Battrick



Today E. James Battrick, an assembler of master motors in Bldg. 4-5, boards the Queen Mary in New York City for a cruise to England.

On leave of absence from the Company, Jim is returning to the country in which he was born 27 years ago. He will arrive in Southampton, Wednesday, May 25, and will return to the United States Friday, Aug. 5.

Jim came to this country 25 years ago with his parents from their home in Hertford, of Hertshire. The Battricks lived in Convoy, O., until eight years ago, when they moved to Fort Wayne and Jim started working for General Electric.

During the time he spends in England, Jim expects to visit relatives in numerous farm communities and cities throughout the country.

His experiences and a report on the conditions in England will be carried in the WORKS NEWS in a series of dispatches from the G-E Roving Reporter. Jim expects to give an insight into present-day life in England from his interviews with friends and he will deal somewhat with such topics as their experiences with socialized medicine, the recent local elections, aid from the United States, and post war reconstruction.

There seems to be a small amount of competition for the title of "Baby Sitter" in Bldg. 17-1. The new challenger to George Mosshammer's title is Harry Kessler. Harry has made the promise that he not only will take the job of baby sitting but will take the babies fishing and bait the hooks for them. . . . Wayne Winters is the new addition to Bldg. 17-1 tool room. Jack Lewis took Wayne under his wing and was breaking him in right on how a bench man should do. Of course, Jack was the bench man and Wayne was doing all the dirty work including carrying the portable drill unit while Jack was carrying the drill. . . . It has been requested that Clarence Doctor refrain from practicing hog calling in the south end of Bldg. 17-1. If Doc wants to practice, he should go out on the lower 40. . . . A party was held at the Yacht Club last Friday noon honoring three employees of Div. 19 who are leaving for other jobs. Richard Evans and Howard Reinking are being transferred to other sections of the FHP motor division, and Ted Schroeder is leaving for the sunny shores of Florida. The office and foremen personnel of the division attended the party. An enjoyable time was had by all present, even if Bill Walt had to change his speech because Bob Dent hadn't told him that there were to be ladies present. Mr. Franke gave a short talk thanking the employees for their past services and wishing success in their new endeavors. The only accident occurred when Joe Kramer's lame elbow got in the way and hit a wooden stirrer spilling the contents on Joe's leg and the floor. No, it wasn't water, that's what made Joe mad. Virgil Hartman commented that he really enjoyed very highly seasoned food. I imagine that would include hot peppers. In case you have any hot peppers, I believe Virg would be very recipient in accepting some. . . . The reason for the lull in conversation during the noon hour in Bldg. 17-1 wash room is due to this being Jack Lewis' vacation week. . . . Don't forget to place your orders early for fresh garden vegetables. George Mosshammer and Frank Martin are taking orders for their fresh vegetables. From the looks of the list, they are going to have an abundant supply of vegetables this fall. . . . We forgot to mention that Norm Bender made it known that he would not like to have any hot peppers. His only experience with hot peppers proved disastrous as he was up at the lake and water doesn't quench as well as certain beverages. . . . We thought Helene Evanoff was on a diet, but she said that now with hot peppers in season she has to eat something with them, and the other evening it was two hot peppers and seven slices of bread—1400 calories. . . . Red Braden wasn't stiff last Monday from washing windows like he would have some people believe. We have it from very reliable sources that Red was out chasing that little golf ball Saturday and Sunday. . . . Don't forget your booster ticket for the Voltman games. Red Braden will personally autograph all booster tickets purchased in Bldg. 17-1.

Look Magazine To Feature Fort Wayne

The Fort Wayne Works will be one of the subjects included in a feature story to be published in two months by "Look Magazine."

The magazine has selected Fort Wayne as having the "most happy and contented" people in the nation. The selection was made on the basis of a number of surveys which showed that the city held an enviable position among all of the cities of the country.

Ben Kocivar, a department editor, and Philip Harrington, a photographer, spent nearly two weeks in the city gathering material and shooting pictures of various scenes of the city's life.

Because of the large role played by the General Electric Company, the men from "Look" spent considerable time interviewing G-E employees and photographing Company activities.

In the photograph at the left, Mr. Kocivar interviews C. H. Matson, Works Manager, at the Broadway gate.

A group of women attending the Elex Club's Mother-Daughter party are shown in the lower, left picture posing for a stunt shot for the "Look" photographer.

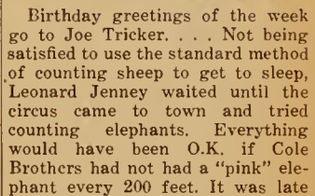
Edward Bradbury, below, was selected as an average G-E employee for a series of pictures. He works in Bldg. 17-4.

Mr. and Mrs. Bradbury have four children, one girl and three boys, and reside on a farm in Lafayette township.

Apprentice BROADCAST

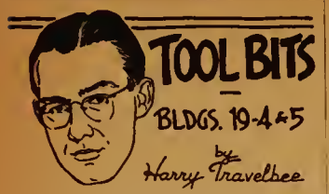
by MILDRED ELLIS

Our congratulations to Mr. and Mrs. Ward Staley who are the proud parents of a baby girl. . . . Fred Borton say's he's going to take their little boy down the river this summer—not to drown him, but to teach him to fish. . . . Fortune smiled on "Schmidty" Sunday. He got to go fishing—caught 24 of 'em too (with a little help). . . . Good music is supposed to be an aid to digestion, but the effects of Rasor's pre-lunch harmonica playing proved—(?) . . . Dick has no sympathy for his fellow workers, who need their beauty sleep. He goes around getting them up at all hours. . . . Paul Wuttke has utilized some of his buying power for he is the proud owner of a new Chevy. . . . For a good fried egg recipe see Carson. Atomic cooking has nothing on him in the way of speed. He gets his skill from getting up late but still making it to work on time. . . . Since Mrs. Barnes left for the P.T.A. Convention in St. Louis, Bob has been seen in the company of two very cute brunettes. (His daughters). . . . The apprentice draftsmen bid farewell to George Gettle. I'm sure his lectures will be remembered for a long time. . . . Leffers is one of the Gates boys. They call him "Rusty", because of the way he swings a ball bat. . . . Woenker reports that the softball team is doing fine. They won two games over the week-end, so their batting average was a way up—till Tuesday night when they lost to the G-E Club 14-6. . . . Kirlin and Hubartt report that the launching of their boat will be delayed till the middle of June. . . . Kenny Zurbuch has set up a safety display in the school. There is a mechanical man showing the correct way to lift, different kinds of safety glasses, safety shoes which are suitable for work or dress wear. It couldn't be that they don't trust us—but there's no two shoes alike. With this display and our new safety posters each week we should be very safety-minded.



ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty



One day last week the phone rang in Elmer Wagner's office. It was Ted Schlup's wife, who asked to talk to Ted. After he hung up he told Wag that he'd have to leave because the queen bee was out, and he had to get her back in the hive or all the rest of the bees would swarm after her. Ted left and didn't return the rest of the day. Whether or not he got the queen back, we don't know, but one was reported as winging its way over Columbus, Ohio, a few days later. Perhaps Ted can tell you the straight of it. . . . We've often wondered what those cigars Howard Musselman smokes are made of. A qualitative analysis, by the job, might reveal that the filler is old Manila rope and crimp cut cabbage leaf in a wrapper of genuine Cuban old wool socks. . . . Mart Heider of Sand Lake, catches more than fish on fish hooks. While visiting in Bldg. 19-3 last week he reported catching a hell diver on a minnow baited hook. This is the season of strange and tall stories, from the fishermen, so we'll believe it.

Did you miss me last week? I missed the deadline; being off on Monday, I forgot to write on Friday. That way I didn't have to confess for another whole week that I am now a full fledged member of the saw breakers club, and you should have seen my audience too. That along with locking bumpers in the parking lot and holding up traffic I've kept the fellows pretty well on me. . . . But if anyone wants a wild ride, Gene Werling and B. O. Smith recommend a ride with Marc Junk for thrills, tilts and paint removing from trucks. That is where the red paint on his fenders came from. . . . Recently Jack Pollock needed a pencil. Before the day was over Jack had quite a collection—16 stubs, one broken eversharp and several pennies to help purchase more pencils. When questioned what he was going to do with such a collection, he replied he would share them with Ozzie "Me Too" Nahrwold, who was also the recipient of a photostat copy of a recent popular cartoon. It was neatly done in a red frame and is now hanging on the office wall. . . . The recent reduction of forces has brought several changes to the tool crib. Art Haberstock is doing the duties in No. 2 crib which were formerly handled by Travers Chandler, and William Herring is doing the main duties at No. 1. . . . Ward Staley, Sr., says he is certainly enjoying the longer evenings which are the result of Daylight Saving Time and an additional hour earlier start in the mornings. . . . Ewald Stinsmuhlen is anxiously awaiting the time he won't need any fire in his furnace so he can have his son's toys removed from it. The boy likes to hear the toys go down the air ducts until they go boom down in the furnace. . . . Ardell Hamerock was off several days due to a throat infection, but is again back on the job. . . . Our sympathy is extended to George Bartle in the recent death of his mother. . . . George Houck of the lathe section has left the group. Good luck, George, we hope to see you back soon. We extend our welcome to William "Whitey" Suelzer.

Birthday greetings of the week go to Joe Tricker. . . . Not being satisfied to use the standard method of counting sheep to get to sleep, Leonard Jenney waited until the circus came to town and tried counting elephants. Everything would have been O.K. if Cole Brothers had not had a "pink" elephant every 200 feet. It was late in the morning when the parade was over and Leonard got to sleep. . . . We wonder if Roy Woods bought that new tractor to keep the streets clean in front of his home. . . . Could the traffic be too congested for Al Rondot in Fort Wayne? We would like an explanation of the new-style, "ruffled" fender he is displaying on his car.

Do you remember when Paul Brinkroeger was manager of the Apprentice basketball team about 20 years ago? He has an old snapshot of this powerhouse. . . . As usual Gus Kruse thought someone opened the window. Instead, his friends and neighbors donated a 12 inch fan so Gus could get a no-draft cross ventilation. . . . Chick Abbott gave his new Plymouth a test run over to Paxton, Ill., last Friday. . . . Eldon Mee and Clyde Spanger are raising strawberry popcorn in their gardens this year. Next, I'll be hearing about them raising banana splits on raspberry bushes. . . . Someone moved the Credit Union without first consulting Art Dicke so it seems. He decided to go to the Credit Union one night last week on business, only to find a beauty parlor operating in its place. . . . Mirwood Dunlap is sure going in for heavy farming. He is now making his lawn mower into an oats, wheat, and corn cutter. . . . Here's a late news flash—the sleuths in Bldgs. 19-4 and 19-5 finally uncovered the mystery that was causing the rattling of windows and dishes the other night. Its center was in the vicinity of Yoder when both wheels fell off of Bill Trumbower's tractor. . . . Have you ever heard of a hidden pipe snooper? In case you haven't, see Leo Schlaudraff, who in the eyes of Bob Truelove and Vic Barcus, is an expert at finding hidden water pipes with a hammer and nails. I wonder if Leo could locate a couple of oil wells for us in his spare time. . . . We saw Jack Roesener attending the circus in Kendallville last Saturday. Of course, Jack will tell you he was taking some kids to the big top, but we understand Jack enjoyed it immensely. . . . Clyde Spangler took his family to the 500 mile race trials at Indianapolis last Saturday. Every time a car would come into sight, Clyde's little girl would plug her ears and close her eyes. . . . Elmer Sauerwein came home last Saturday night and found a big red rooster under a bushel basket. Elmer said it made a nice Sunday dinner and he hopes he can find another rooster in his garage this Saturday night. . . . Cliff Clapesattle came back from Detroit with what he calls his dream casting rod (as most of us know). He says it is the best rod on the market, but how can you be sure, you haven't used it yet? . . . We hear Herb Thiele is getting that car of his all fixed up so that he can make better time to the lake. Better hurry, Herb, cuz the fish are biting. (so we hear). . . . Why is it that when someone has an enlarged waist line, he thinks that everyone else is higger around the middle than he is. John Roemer was arguing with Myron Auer that Myron was at least three inches bigger at the waist than he was, but no sooner had he said that, then Myron took his belt off and handed it to John to try for size. But to John's dismay, the dern thing wouldn't reach around. Don't feel too bad, John, our faces have been red too—just smile, brother, smile. . . . By the way, ask Myron what kind of a compact he gave his girl. Also ask Chet Reynolds how he broke his new folding rule—sumpin about a door, I guess. . . . John Hensler is learning to eat baked bean sandwiches now. If he is lucky, after a few more samples he will like them almost as well as he does sauerkraut sandwiches.

52 Years Ago

Old Photograph Recalls Industrial Progress

Changes in industry over the past fifty years are exemplified in this photograph, which belongs to John Williams, Bldg. 17-2. Taken in 1897, the picture shows employees of the old Smith Mill, a cooperage 19 miles east of Fort Wayne. The highest pay was $1.25 per day; the lowest was 75 cents per day. The men worked a 10-hour day and each furnished his own lantern and oil.

In the top row (l. to r.) are: Elmer Urick, Elmer Hoover, E. Thompson, P. Bany, G. Savio, W. Smith, S. Bany, A. Bany, T. Deachoeis, D. Parker and John E. Williams. Second row: H. Gibson, J. Savio, A. Laurel, F. Lopshire, I. Miller, F. Clark, G. Burke, and H. Protsman. Seated: P. Claypool, W. Speith, C. Spieth, H. Holden, C. Spieth, B. Garringer, E. Bany, A. Spieth and C. Claypool.

We are happy to welcome A. E. Leider back, he is sporting a nice "Florida" suntan acquired in Roanoke. . . . Ruthann Rayan and our little Marion Champion (designated by many as our half-pint messenger) left Bldg. 18-B Friday. We are sorry to have you leave and hope that you may return some day. James Nagle and Kenneth Beck have taken their places on the hall desks in Bldg. 18. . . . Our congratulations to Mr. and Mrs. Philip Singleton. It's a boy! We are sure that Phil will tell you that all of this talk about Friday the 13th is the bunk—because 7 lb. 2 oz. Michael Lewis arrived that day. Incidentally the boy has been named for the two grandfathers. Grandfather John Michael Singleton's birthday is also the 13th. . . . Herbert Kammeyer enjoyed a vacation from his work last week. . . . Karl Brandt is welcomed back to Bldg. 18-4 following a week's siege with the flu. . . . Juanita Spice, Bldg. 18-1, celebrated her birthday Friday with "sugar and spice 'n everything nice." . . . Clarice Craighead, Bldg. 18-4, is taking time off from her duties to take a needed rest. . . . William Spahr, Bldg. 18-1, is to be congratulated. He is now the proud owner of a new home in the Anthony Wayne Village. . . . Friends of Maxine Jones Mandra, who formerly worked in the Payroll Division, Bldg. 18-1, will be pleased to learn that on May 9 she gave birth to an 8 lb. 3 oz. boy.

Vacation Plans

It is just ten weeks until the vacation shutdown. If you are looking forward to a sojourn at the lake—better get your order in now, but definitely! There are so many, many wonderful trips that it would be difficult to make recommendations. If you have not driven west—why not give Colorado a try this year. It is an easy drive to Rocky Mountain National Park, and just a short run to Denver, Colorado Springs and Pike's Peak. I am not running a travel agency but I know you will enjoy the thrill of the Rockies. . . . Bldg. 18-3 in the news: Central High School junior prom had the distinct pleasure of seeing one of the city's finest dancers in the person of R. K. Archibold. Who said "Archie" couldn't dance—you Fred Astaire! Please accept our belated birthday wishes. . . . Doris Rhonemus proved to be a booster for the G-E Voltmen by attending both games in Dwenger Park over the week-end. . . . Who said Bldg. 18-3 did not have a big game hunter? Paul Kissinger, with his trusty double barrel shotgun put away a playful coiled six foot black snake at Lake Everett over the week-end. We award him the week's hero medal. . . . Polly Schinnerer and Janet VanAuken Leeper, both former Payroll girls are pleased to announce to the world that they have a boy and a girl, respectively, the former in Fort Wayne and Janet in Florida.

'Coronet Magazine' To Publish Article About Dr. Langmuir

"Langmuir, Miracle Man of Science" is the title of a leading article which appears in the June issue of "Coronet Magazine."

Doctor Irving Langmuir, Associate Director of the General Electric research lab at Schenectady, is described by Hal Burton, author of the article, as "the most astounding man in modern science."

"Coronet" will appear on the news-stands Wednesday.

Gladys Elliott has been spending the week in New York City where she and her husband went to attend the wedding of her daughter Ruth, to Jack Best, a featured singer in the Fred Waring chorus. Ruth, formerly in the Waring organization, is now a member of the Collegiate Chorale. Another daughter, Joan, was her sister's attendant. She, too, makes her home in New York where she is employed as a junior executive in the script department of NBC. . . . This thing of getting into print is nothing new to Ed Glusenkamp as we discovered in looking over some old WORKS NEWS. Way back in '34 when the paper had only a few small pages there is an article about him. It seems he discovered what he thought was to be his New Year's turkey perched on a lamp post but when he climbed said pole found it to be nothing but an owl. However, he decided to cook the thing anyway and tried unsuccessfully to find a recipe to make it palatable. The owl, sensing this indignity, pined away and died leaving Ed without his holiday dinner. Since then he buys his fowl across the counter like the rest of us. . . . Ed Gebhart was at Centlivre Park watching the outside activity at the Cole Brothers circus and now and then getting a peek at the inside entertainment too. He had his eyes on an aerial act, not watching where his feet were taking him, when he ran smack dab into a stepladder. Didn't hurt the ladder a bit, but left Ed with skinned shins. After this painful experience he remembered his safety training and transferred his attention to the midgets. . . . Among his other useful accomplishments Roy Bracht has added that of "guide." He may take his victim the long way round but eventually they end up just where they started. . . . Fisherman Ray Lepper has a new diversion now that he's caring for the very young racoon he and his boys came across while hunting for mushrooms. It cries regularly for its three hour bottle on which it is thriving. Just how he intends to tie it in with his fishing remains to be seen, possibly it may learn to dig his bait. . . . Martin Brown (Brownie) proved himself the proverbial "friend in need" when he came to the assistance of Earl Johnson whose belt gave way and threatened to let him down. By using some of his collection of odds and ends he mended the broken parts securely making it possible for Earl to go about his work in safety.

It is lonesome at this end of the office since they moved Perry Esterline. He is right in the corner and all he needs now is one of those funny long hats. We're only fooling, Perry, we do miss your cheery voice up here. . . . Pres Slack is having more fun trying to identify all of the different flowers that surround his new country home. He says that he never knew there were so many kinds. . . . Marvelene Butts is back after a tonsillectomy. She is still a bit shaky but looking much better. . . . We were sorry to have Florence Knight leave us. She has gone to Taylor Street to work for Paul Horstmeyer, and I am sure she will be very happy with her new job. . . . Congratulations to Bob and Marilyn Roehm on the birth of a daughter. The young mother was a time clerk in our office.

There just hasn't been too much news in 10-20-30 Frame the last couple weeks, about all you hear lately is "Hey, what's your service date and where are you getting transferred to?" But we guess that's kinda the way it is all over these days, but maybe in the near future things will get back to normal and then we can have bigger and better news for you. . . . That smile that Frank Diss has been wearing is due to the fact that he finally got delivery on that new "Chevie." Frank wants everyone to come out to the parking lot during their lunch hour and he will be glad to give demonstrations and let you drive it, he says he is getting prepared to become a salesman if need be. . . . Congratulations to Bob Hull and the Mrs. on their recent trip down the aisle, and we also want to welcome Bob as our new dispatcher in the rotor group. . . . We want to tell Clyde Cowan that he sure is missed around these parts and want to wish him the very best of luck in his new job at Broadway. . . . Congratulations are also in order for Ruby Stoops who became a very proud grandma May 11. It's a boy and named Gary Lee. . . . We were sorry to see Selma Voigt leave us and hope that she will have a nice vacation in Illinois. . . . Andy Anderson is very happy now that the bowling banquets are all over. He says it's pretty rough on you to have to go to two of them on successive nights.

OUT OF THE BLUE in 26-2 office

by Delores Patterson

We are very sorry to hear that Herb Driftmeyer is ill again. We are hoping he will be back with us soon. . . . George Finkbeiner will no longer be "frec" after this Saturday night. The "I Do" vow will be said in the Trinity English Lutheran Church. The lucky girl is Marilyn Young. Congratulations, George! . . . Wayne Jones has heen complaining lately about his shoulders being sore, and rightly so, too, because he just finished his basement wall in knotty pine! . . . This week happy birthday wishes are being extended to Rodean Dowell and Mickey Huth of the Service Bureau. . . . Transformer Payroll, Bldg. 26-2, welcomes two new girls to its division. They are Armilla Conrad and Marjorie Wall, who were formerly of Bldg. 26-4. . . . Ed Ellenburg and William Pape have bade farewell to the Drafting Division. There is a sure sign of spring in the air now because most of the girls are blooming out in cotton dresses. . . . Gail Doolittle is getting married Saturday to Earl Kirk in the First Methodist Church. Very best wishes, Gail. . . . The Specialty Transformer Engineers are happy to welcome Pat Blackwood from the Schenectady Works. . . . The Specialty Transformer Requisition Engineering Section has bade farewell to Mary Mickey and welcomes Emilie Swain of Bldg. 26-3. . . . **Miracle of the week!** Delores Patterson had her hair snipped.

DIVISION 14's News Beams RACONTEUR

by MARTHA BRENNER

Bill Alt had considerable trouble getting past the guard last week. The package he had was rather large, but after disclosing the contents he was permitted to go on. (He was carrying a bunch of rhubarb.) . . . Anyone wishing to order cherries should see Ray Bobay. We understand Ray is expecting a "bumper" crop this year. (Incidentally Ray's tree is sporting exactly three cherries). . . . Vern Dassler had a bowling party, and we are wondering just why Bob Turschman spent so much time in Vern's garage. . . . Russell Frey was really sunburned last weekend. He claims he caught his limit of fish. . . . Helen Miller may be getting a little old to play baseball. Sunday's game resulted in a sunburned nose, skinned elbow and black and blue knees. . . . Was Mildred Moore taking her daily exercise Thursday or could she have been looking for a lost car on the parking lot? . . . Bill Lavine's friends presented him with a new car and garage for his birthday. Just what model was it, Bill? . . . Margaret Lepper really had a "nightmare." She dreamed that she and Ann Johnson were working third trick. . . . Waldo Martin was seen taking off his shoes and massaging his feet. Those overnight hikes with the Boy Scouts will do it every time. . . . Theron Kitchen was heard boasting about the bowling league in our Division one Friday morning. But after bowling that Friday night for their league sweaters he exclaimed, "Boy! what a bunch of terrible bowlers." . . . What's this we hear about Joe Sallot's wife changing the wiring in their garage? What happened, Joe? . . . Anyone finding two wash tubs please contact Nora Furthmiller. Seems she lost them off the back end of her trailer. . . . Ed Rodenbeck will never start his diet if he doesn't stop eating peanuts. . . . Elmer Buuck is a busy man these days. He is getting his motor boat all tuned up for the races on the St. Joe River. . . . We wish to extend a speedy recovery to Luke Shorter who has heen absent for several weeks. . . . Dallas Corson's son has a "hot rod," but the neighbors claim Dallas is enjoying it much more than his son.

Did you ever see "Sherlock" Mesing pouring over a king size drawing with a magnifying glass? We don't know whether he needs a new pair of spectacles or if he's just following the course of a gnat making its way across his desk. Or could it be Elmer is using that magnifying glass to keep an eye on "Luebke the Lip." By the way. Pop is open for any suggestions on how to get rid of fever blisters quick. . . . Whitie VanAuken was all smiles when he came to work Monday morning. He is the proud grandpa of a baby girl born to his daughter Janet, now living in Florida. Russell Spaw is also a new grandpa, his grandson was born May 15. . . . Howard Smith looks kinda' lonesome since Carl Beck came to Broadway. They had been working in the garage together several years at Taylor St. . . . Harold Smith is also in the vegetable business and wishes to make known that anyone wanting tomato plants should let him know he has lots of them. . . . Did you ever see Andy Frank go through the motions of how to plant a garden? Don't miss the next showing. Ray Quinn can probably give out with several timely tips by now on this garden business, since he goes in for it in a big way. . . . We have failed to mention that Al Dubach of the Power Plant treated us to candy and cigars when a new member was added to his family recently. Congratulations, Al. . . . Nicknames are common with Sam Mastro. You will notice he is answering to the names of Porky, CO-2, and now it is Smokey. . . . The fellows think Rus Maxson might need new bifocals since he lost sight of the pen on the flow meter chart. . . . While on the subject of glasses, Joe "G" Banks came to work the other day without his helpers and had to rush home to get them. . . . Frank Fisher had his ear muffs out and his overcoat dusted off in preparation for the big frost we were to have May 4. You see, he made that prediction Jan. 8. Frank was a hard loser on that one, but he appeared at work in his summer outfit the same as the rest of us. . . . We were glad to have Bill VerBryck, George Delfs and Frank Reader pay us a visit in the Power Plant. . . . Grover Walker is on a week's vacation and is busily engaged in landscaping his yard. . . . We are hoping Scotty will soon be busy on the popular window boxes again this year. . . . Watch that speed for the first thousand miles. Yes it is a new Chevrolet for Ralph Craig and a new Ford for Lee Hess

AIEE Elects New Officers

New officers of the Fort Wayne Section of AIEE are: Seated, (l. to r.) J. F. Eitman, chairman, and R. E. Trovinger, vice-chairman. Standing, (l. to r.) are J. H. Capps, secretary-treasurer, and M. A. Baker, assistant secretary-treasurer.

J. F. Eitman, Bldg. 26-2, was elected chairman of the Fort Wayne section of the American Institute of Electric Engineers, at a meeting Thursday, May 12. Other new officers elected were R. E. Trovinger, Indiana and Michigan Electric Co., vice-chairman; J. H. Capps, Bldg. 4-6, secretary-treasurer, and M. A. Baker, Bldg. 31-2, assistant secretary-treasurer.

SLEUTHING in 4-6

by JOAN POOS

TODAY I AM A MAN—Gil Baker will reach the old age of 21 tomorrow, May 21. Happy birthday, Gil. Also belated congratulations to Walter Hahn whose birthday was last Saturday. . . . TESTING?—Welcome to Gordon Goodrich, who is a new test engineer in the DC division. We are sure that you won't be the same when you leave us. . . . DEEP IN THOUGHT—The sawdust you may have seen flying around or the rattle of gears you may have heard was only Toby Tyler deep in thought about a new design. Hope you master it, Toby. We'd hate to see that painful pensive expression upon your face permanently. . . . [illegible] SPOT OF 4-6—Have you noticed the beautiful flowers which Mildred Heinkel has on her desk each day! . . . SO SAD, TOO BAD—Walter Seegmiller left for Florida on a leave of absence due to illness in the family. . . . Jo Biddle is recovering at home now from a recent illness. We hope to have her back soon. . . . HOW DEE DO DEE—Welcome to Clara Richter in W. H. Weikart's office. Also a belated welcome to June Munson who is taking over the job vacated by Dorothy Broucel in Mr. Weikart's office also. . . . NOTICE—Al Volz wishes to put in an advertisement. It seems that Al is looking for a girl these days. Age 18 years or less; height 5 ft. 4 in.; black hair; dark eyes; weight 175 lbs. Anyone answering these qualifications please see Abbie Hartman. She's his manager. Have you tried any wishing wells lately, Al! . . .

It's Windy Here

FHP Motor Division 17 Office

By Joan Aubrey

Have you planted your garden yet? If not and you need some expert advice, the Planning office is the place to visit. You will get no less than three different opinions as to how it should be planted, so all you need to do is decide which is right. The experts to talk to are Ben Fleek, Gordon Smith, Roy Rippe and Gene Foster. If these fellows harvest the garden they have planted, the rest of us in the office won't need buy any vegetables all summer. But if it's cottage cheese you want to make ask Alma Witte, she knows all about that. . . . Our very best wishes to Pat Dolan who is getting married May 21 at the Forest Park Methodist Church. We wonder if Hal knows what a lucky fellow he is. . . . Perry O'Neill now has his new family home from the hospital and he really has his hands full when the twins want attention at the same time. When he and Gene Foster get together and talk about their families it's hard to decide which can brag the most. . . . Alma gave a very nice wedding shower for Eleanor Lambroff recently. All the girls in the office were there and Eleanor received some very lovely gifts. But the party who had the best time all evening was Alma's dog Rex. He had to greet everyone as they arrived, but his favorite girl was Vera Schweier. For some reason she held a great attraction to him.

DRAFT DODGER—Norm Oetting decided that it was summer and slept in front of an open window. Result: Stiff neck.

The Big WIND

DIVISION 17 TAYLOR STREET

by Dorothy Heinzelmann

Norm Wolf wants it explained that the reason he was so all in due to that golf game he and Ray Hills had recently was because Ray had him chasing after his golf balls all the time. Hm-m-m that isn't the way we heard it. . . . Edna Parker says she too has an increase in her family. It's a little dog named Dixie, but Edna says she has her in the hospital, and we do hope that she gets along fine. . . . Congratulations to Tommy Williams who became a proud aunt over the week-end. Tommy says she sure has a fine little niece. . . . We're glad to have Ellen Saul back with us after her recent illness. . . . Welcome to Lulu Heckman and Nora Dudgeon to our group. . . . Harold Mosshammer really hit the jackpot on his fishing over the week-end for a change. He says he got 38 great big bluegills. How big, Harold? Could be, as you see Harold was moving in on Ed Brockhall's territory up around Appleton Lake.

"Blessed is the man who is too busy to worry in the daytime and too sleepy at night."

We would like to suggest a candidate for membership in the Audubon Society. His name is Phil Miller and this is the reason we think he would be a good member. One night about midnight Phil's wife was unable to sleep because of the loud chirping of a robin. Phil told her the robin would be all right but she wasn't satisfied until Phil went out to see what was troubling the bird. The investigator found that a cat was in the tree quite close to the bird's nest. Phil managed to get a clothes prop and routed the cat out of the tree and the robin went immediately to its nest. After putting the robin to bed Phil returned to his rest. . . . We were so glad to have Marie Richardson (the former Marie Bruick) drop in to visit her former coworkers the other day. The reason for her happy expression is that she and her husband have moved into their brand new house. Best wishes for your happiness in your own home, Marie and Charles. . . . George (Tough Boy) Miller has a new story he is now telling. He is saying how brave he is. It seems as though George had a burglar in his basement and he didn't want to go after him alone so he called the police in on the job. When they arrived George said, "this way," and proceeded to the basement unarmed after the great big burglar which turned out to be a little field mouse. . . . Lee Shanabarger became a father of a baby girl May 9. Her name is Joyce Lee and she weighed nine pounds, one ounce on arrival. Congratulations to the proud parents. . . . We also received an announcement of the birth of Larry Allen, May 7. His parents are Truman and Mary Bell. Mary is the former Mary Jenkins and was a rotor inspector in Group 16x42. Congratulations. . . . Jim Kavanaugh says he would like to have Wednesdays as his day off so he can play bridge at the women's bridge club. . . . Vance Burnau and son Bob went to Indianapolis last Sunday to watch the race trial runs. Charlie Thomson arrived at the same place earlier than Vance. He came early and stayed late.

Rummage sales are Mr. Kohls' weakness. You ought to see the stylish ladies hat he purchased at the last one It was quite becoming to the contour of his face, even th· lovely roses about the brim. Someone else in his section must be an admirer of fine hats as Bill's hat disappeared after one wearing. Don't yank its duplicate oT of any maiden, Bill, it may be hers and only a facsimile of yours. . . . The new gadget Dick Steele has been carrying around is a heat thermometer. Call on Doc Steele for fever check-ups. . . . There will be a new guard on the third shift. We'll not keep you guessing, it's none other than your ole friend Waymon Patrick. Jerry Gage, another Plant 1 operator, will assume the duties of a guard also. . . . On Hez Cochran's wedding anniversary he became a grandpa. His son's family was presented with a baby girl. That also makes Mr. Zeser, our guard, a grandpa. . . . We see a lot of new faces on the day shift. Goldie Roop and Minnie Egley are two newcomers from the night crew. Joe Railing has been transferred to Plant 2 Flange section. . . . Mrs. Tillmon Gehrig has left the Company in exchange for household duties. The group will always remember you, Annabelle. . . . When "Duke" Keller hasn't much to say, you know he's getting serious. Who wouldn't be, his time is drawing near for that marital step he is taking with that girl from Milwaukee. . . . There are evidences of a beautiful flower garden in Betty Frauhiger's back yard. Her husband touched it up with a nice picket fence. Lots of luck to Betty in painting it. . . . Happy birthday to Berniece Miller, who passed out the candy bars on Friday the 13th. According to Ina, that's the only Friday like that in the year. Sure glad to hear that. In case she is wrong, let's have someone's opinion for the next news item. . . . Model husbands are hard to find but when you run across one like Gordon Sprunger you have it. How about the home problem experience you claim can be solved hy no arguments. Will it work fool-proof? . . . Don't forget to make your Memorial Day plans; it's practically at hand. They say the fish are biting good. Rinaker from Berne will be one of the fishermen. . . . Vida Lammert's two nieces from East Liverpool, Ohio, are spending a vacation with her. . . . Jo Ivetich has been seen planting a strawberry pateh. Hope you get a large crop, Jo, because we all like strawberry short cake. . . . Please take note GeCode Club girls. The next party is going to be a combined picnic instead of the "Wedding Bells" party and the July party will be cancelled. The committees for the June and July party will be combined into one committee for the picnic. . . . Francis Eady is the proud owner of a new Hudson! . . . Here's a friendly reminder to those that may not know that parking in a reserved parking place isn't being very kind to your fellow man. "Do unto others as you would have others do unto you," is still the best policy. . . . We understand Esther Meyer and Wanda Bailey are planning on seeing Niagara Falls with the Elex Club in June. . . . With Memorial Day coming up we hear some people are making plans to go places and others are just going to stay home and rest. Earleen Steffen is going to do some fishing at Hamilton Lake. Genvieve August says she doesn't have any plans. . . . Dort Schnepf and Florence Schultz are planning on seeing the Cubs play Cincinnati at Chicago. . . . Social Item: Dave Embler and family recently visited George Roop's country home. Nature Item: The Roop's children reported a possum in a hollow tree in their wooded grove. Child Care Item: Dave Embler accompanied six children to observe the possum in the hollow tree. Boy Scout Item: Dave Embler builds fire in hollow tree using only one match (pipe size) to start same. Safety Item: Dave was concentrating on getting smoke from fire and forgot to follow Rule 4, Section 1 of Child Care which says "never allow boy, age 4 to 12, to approach from rear with club in hand." One did get a club and when the possum rushed from tree, child swung at possum, hit Embler's head instead and rushed to join rest of kids who had scurried after departing possum. They didn't get the possum but later, much later, the kids returned and helped Child Care expert Dave Embler to his host's house for a complete rest.

Now that May is here, can summer be far behind? All our lake enthusiasts are living now from Friday 'till Monday in one grand splash. Aren't they lucky? . . . If you have an old lawn mower that won't "Mow 'em down" anymore, have Ray Greek estimate the repairs needed. From all reports, that's his new business. . . . Did you hear that Roger Crabill bought his wife a new power mower for her birthday? Thoughtful man! . . . Racing is in Sol Andorfer's blood, "Hot Rod" racing, that is. Seems Sol is trying his best to sell the neeessary subscriptions so he ean get a car and join the fun. What these boys won't do next. . . . To all the old faces we miss every day, good luck in your new work and don't forget Bldg. 17-4 and its parties and get togethers nor your friends here, but think of us occasionally. . . . To all the new faces in our group, here's hoping you like Bldg. 17-4 and all its people and may your work here be pleasant. . . . That was some poker party at Bill Hurtt's the other night. All the boys had their fill of cards and eats too. Oh well, it wasn't so bad on Friday, now was it? . . . Our "Welcome Back" mat was out for Floyd Shellenbarger who has returned to the gang after being off sick. . . . Cy Seymour finally talked Henry Roemke into getting a new Ford. Dick Seidel after months of waiting finally settled for a new Lincoln. He has figured out all the contraptions on it except for three buttons. Press any of them and nothing happens. . . . Mike Lowe wants to race Don Thomas on the river when there isn't any wind blowing. Guess Mike knows he will be up higher in the air than Thomas, and the wind resistance might hold back his Martin motor. . . . Our floor has a ball team and from all the groans and moans you heard last week they must have played a game. When a memher of the team was asked what the score was he said, "I don't remember, but I think we won." Must of been one of those pitchers battles 32 to 31. "Flash" Gerardot said he missed the ball every time he swung at it except once. Must have hit a foul ball.

Bill Allen Reports On All 'In the Spotlight at G-E Club'

Bill Allen

Bill Allen, Bldg. 8-2, is the columnist for "In the Spotlight at the G-E Club." He has been a member of the G-E family since 1943. His first job was in the war facilities contracts, accounting section in Bldg. 18-3, and he later transferred to accounts payable.

He then worked for Doyle White in the General Service division on war assets work. Bill has been assistant to the G-E Club treasurer since 1946.

His hobby consists mostly of athletics. Bill is also active in young people's work at his church.

Reminder: Better get your reservation in for the Elex trip. Time is growing short. . . . **Quality Pays:** Kate Weigle has a G-E light hulb that she has used 21 years. She doesn't know how old it really is, because it was in use when she moved into her present home. . . . **Showers:** We have had stork showers, bridal showers and April showers, but did you ever hear of a cough drop shower? Mary Shumm has been buying three or four boxes at a time. To help her out financially, her co-workers each presented her with a box of cough drops with a note telling her why they were donated. Mary, you know we get tax exemption for charity. . . . Floetta Zartman came to work full of vim and vigor. However, that vim and vigor blew out of the window, when she saw a four-legged visitor in her waste paper basket. In fact she wouldn't go to work until Violet Brower removed Mr. Mouse. Speaking of Violet, she has been here 22 years and believe it or not she got lost and had to ask her way around. Need a map? Maybe it had something to do with her trying to put her clock card in the coat rack. . . . **Water In Eyes:** Hedy Harrison really got an eye full of water. She was looking in a miniature camera, when she pressed the button, but instead of another picture showing, water flew in her eyes. . . . **Short Cuts:** Savannah Stokes, Marcille Thomas and Ann Kensill are sporting new short hair cuts. . . . Anyone needing advice on growing or killing flowers, eontact Lucille Allen. She's an expert. . . . It's a happy birthday to Therlene Freiburger and Alberta Foulks. . . . **Fire Siren:** Was it a coincidence that the fire siren blew the other day when Mary Jane Redding had assumed a job of burning insulation off of wires with a torch? . . . We're glad to see Hazel Lockwood, Gertrude Martin, Margaret Maloney, Olga Lindenberg and Sarah Sowards back with us again. . . . It's "hello" to Palph Lindeman, Paul Chavis, William Miller and Clyde Cowan, newcomers on the early bird shift. Clyde Cowan replaces Harold Frazier. Sorry to see you go, Harold. Now we will have to help Clyde find all tbose little stray stators. . . . **Full Hands:** When Mrs. Katt deserted her family of three, Eileen Steinacker took over and with the aid of a hot water bottle and doll nursing bottle. She is caring for the three little kittens. (With or without mittens?) . . . Sorry to have Bea Lantz on our sick list this week. . . . Martha Rice and Edith Beaty were seen at the square dance. Afterwards Edith had a pinochle party. Is that why you were primping your hair, Martha? . . . Francis Eckrote exercises her hobby of writing poetry quite freely. She told Mary Wright that she was the victim of her latest works. This is Francis' description of Mary:

> Marys are different
> I've always heard tell
> And I think you live up
> To that old saying quite well.
> There is no predicting
> Your thought or your whim
> What you undertake
> You work with much vim.
> And when it's accomplished
> Do you stop? Ah, no!
> You think up something else
> And at it you go.
> This picture of Mary
> Painted all in rhyme
> Shows her busy, resourceful
> And having a good time."

So Mary had to make an addition to the above poem:

> Now if any other Marys
> Are accused of the same
> Don't worry about it,
> Just say it's my name.

If we knew how short the future is to be we'd spend less time worrying about the past—and start taking good care of the present.

Only one ad per employee may be inserted. Each ad must be limited to 20 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office. Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE

Monday Noon, May 23, 1949

LOST AND FOUND

LOST—Billfold containing papers with name William Roberts on them.

FOUND—One key in Bldg. 19-2.

FOR SALE

F-14 FARMALL TRACTOR—And Cultivator on rubber. H-46543.

HIGH CHAIR—A-19164.

ONE-WHEEL USED TRAILER—H-74748.

LARGE TOY AUTO — Or tractor. H-48755.

GUN CABINET WITH GLASS DOOR—E-38901 evenings, Saturday and Sunday.

FOR RENT

FIVE-ROOM UNFURNISHED LOWER APARTMENT—Available in June. Southeast. H-64362.

LOVELY SLEEPING ROOM—In modern home, for one gentleman, close in, innerspring, telephone privilege. 3340 Piqua.

COTTAGE—On Bear Lake, three beds, oil heat, screened porch, boat, $25 per week. Columbia City 228 on Etna.

COTTAGE—All modern, two bedrooms, $25 per week, on Snow Lake. Ebbon Brown, Fremont, Ind.

TRANSPORTATION

WANTS RIDERS From Columbia City. Dale Grigsby, Bldg. 26-2, works from 8-5:15. G-E ext. 753 or Columbia City 260J.

WANTS RIDE OR WILL SHARE DRIVING From Monroeville, Warren Jackson, works at Taylor St. in Div. 17 from 8-4:30. Taylor St. extension 426.

WANTS RIDE—From Webster or Barber Lake. Can call Carl Steinbacker, ext. 496. Works from 7-3:30.

To most of us things are getting a little rough, but we in the Wire Division are lucky. We have among us a Good Samaritan in the person of Jake Arnold. To all those in need Jake has graciously offered his carrier pigeons. By accepting this offer it will be possible for you to have your phone removed thus saving the monthly phone bill plus all postage that would be required to send letters and small packages. Gee, Jake, that's sure swell of you and thanks a million. . . . Wimpy Lemper brings those nice fresh eggs in from his farm each week, but the other week Wimpy decided different. He was driving at a high rate of speed when he noticed the traffic light changing to red. He put his foot on the brake very hard, bingo, scrambled eggs. . . . Congratulations to Guy Oberlin, who became grandpa again last Monday to a swell grandson.

Insulation News

Congratulations to Russell Flaugh and Hans Muller, who turned in some winning suggestions. That's the easy way to take home money, fellas! . . . Agnes Ryan isn't a bit afraid to tell her weight. Some people turn green at the mention of pounds, or develop a quick allergy to the presence of scales, but not Agnes. No siree! She's not a bit bashful to tell the world that she weighs over a hundred pounds. Now what stumps the experts around here is, "How much over a hundred, Agnes." . . . Last week's WORKS NEWS carried the pictures of noted celebrities from Bldg. 12-3. Earl Gebert, Lazern Hopkins, and Hans (Tom Hutzell) Muller, were shown receiving the Safety Award from Mr. Hire, Superintendent of Wire and Insulation. All took very good pictures, but the cutest of all was Tom Hutzell. And all this time we have been calling him "Hans." I guess it just proves the old saying that you can know a person all your life and still never really know him. If you don't mind, Hans, we're going to stick to your given name. . . . You might think that's a cyclone you hear every night in Bldg. 12-3 about 4:55, but it's only Josephine Balsamo running the hundred yard dash down those long, long, three flights of steps. The rest of us just stand aside and puff for our second wind, while "Speed" Balsamo keeps on dashing.

Congratulations to Henry Wiegman and his bride, Ruth Ladig, who were married at Concordia Lutheran Church Saturday. Those attending the reception in the evening report a gay time was had by all. Also, congratulations and best wishes to Helen Hinc and Lee Guillame, who were married a week ago. . . . Happy birthday greetings to Betty Bertsche and Betty Kummer. . . . Clara Krudop Schneider entertained some of the girls at her home the other night. She wanted them to see all of her lovely wedding gifts. Gretchen Webb and Lillie Benz were among those present. Gretchen reports that she is very busy taking care of her young son and Lillie is ready to leave for California. . . . Welcome to Pearl Ross, Margaret Erickson, Janice Egolf, Olive Elliott and Stella Mailand who are back with us again. Here's hoping your stay is a long one. . . . Ann Hershberger and Zelda Garrison are on nights again. . . . Joan Braun found out you can't eat soup without a soup-spoon. She is wondering just how the caveman ate his soup. . . . Betty Jo LeMaster has left us to become a full-time housewife We wish you a lot of good luck, Betty. . . . Lorinda Beyerlein isn't speaking to anybody today. Why? She lost her voice. . . . Tom Dickerson went to Holland, Mich., to see the tulip celebration. He said it was beautiful. . . . I received the following note: "In behalf of my wife and family, I wish to extend the most heartfelt thanks for the heart-warming gift presented to us by the co-workers in Bldg. 4-3 following the recent new arrival in our family of a 7 lb., 12 oz. baby boy named Michael Dean, and for your kindness and well wishes following my wife's operation." Henry D. Grepke. . . . Ed Bocdeker has given up the idea of getting that turtle out of Fulk's lake. . . . Herb Braun doesn't speak to the boys when he comes to work in the morning. . . . Les Hubartt is trying to be as important as ever, but he is slipping fast. . . . F. Clark is still out on the heat run. . . . C. Nahrwold is walking around very gloomy. . . . Oh well, cheer up fellows, vacation-time is just around the corner. . . . Anna Ruth Clemmens said that she took a quick trip to Chicago Sunday, but nothing exciting happened. The stores were closed and she couldn't buy that new hat she is looking for. . . . A correction on last week's item about Edna Rohrbach's shoes—They weren't of different colors; they were the same color, but not mates. One is just as bad as the other.

TRANSFORMER TATTLES

By Mary Ann Miller

Bldg. 26-4, west end, says so long to Darreld Hirschfelder. . . . Did anyone notice that Wilda Frauhiger was limping last week? She fell into a ditch. Was quite a jar wasn't it, Wilda? . . . Johnny Bryie just returned from a week's vacation with a nice tan. . . . We wish Emma Lytal a lot of luck in her new home . . . Phil Shultz, winding section, was transferred to the third floor. . . . We hear the Gerald Norwalt family has increased. . . . Congratulations to Mr. and Mrs. Richard Hoopengarner, who were married May 7. . . . Ralph Smith is recuperating nicely from his recent operation. . . . Leo Clejnot and "Dutch" Norwalt went fishing last Saturday. They came back with the usual story: the big one got away. . . . All Otto Brown wants for Christmas is his two front teeth. . . . Where does Faye Russell spend his Sundays since his brother is here? . . . The boys want to know why John St. Clair doesn't take advantage of all the free haircuts he has been offered. . . . Oral Hyser was selling autographed pictures of himself for 25 cents last Friday. There may be some more pictures available at that price. . . . Congratulations to Mr. and Mrs. Lloyd McNamara on the birth of a son. And this is special, because it's the first boy born to a cost section employee. So great was the surprise of it being a boy, that they didn't have a name picked. Lloyd also has three girls.

26-3 News

By Mabel Odel

Our sympathy to James McCray in the death of his mother. . . . If anyone can think of a good suggestion, Frank Schultz will help you put it over by writing it up with fancy words. He will give you this service on a 50/50 basis. He already had helped to make one winner. Gertrude Kummerant received a $25 award last week. That's good team work, congratulations, folks. . . . Almetta Smith tells us that if you drink champagne just before retiring, it causes dreams that are out of this world. . . . Les Parrish is keeping his little Crosley pretty close to home since the hot rod craze hit town. He just can't stand the wishful look in the little boys' eyes as he drives down the street. . . . Since Russell Clarke got his trousers back from the cleaners, he is undecided as to whether he should shorten them a few inches and make knee pants or start a new fad and wear them three-quarter length. . . . If anyone can predict a rosy future for Doris Rinehold, it will help to ease her disappointment. She drove to Butler, Ind., for a reading, but found the man had left town. . . . Hazel Scott nearly missed out on an all important date. She was to meet her husband after work, and understood the meeting place to be at Calhoun and Pontiac. After waiting more than an hour she started to inquire as to whether he may have had to work overtime. She found him, needless to say, in a very unhappy state of mind, waiting at the factory entrance. Any suggestion you may have to help her back in his good graces will be appreciated. . . . It was a big day in the hearts of every child. The circus was in town. How could Mary Reed and Carolyn White resist the temptation to join the rest? . . . For a quick pick-up at the end of the day Lola Brunner says sundaes can't be beat. It's hard on the girlish figure but it does soothe the appetite. . . . There is no danger of Lonnie Rockstroh having coffee nerves. She has decided to make one pot of coffee less per day. . . . Zelma Kuyoth has found a way to get a bunch of mice out of a box of coils. She calls the test section and tells them the coils must be tested before she gets them. . . . Irma Wilkens is a new member of Arthur Murrays. Lorraine VonBerhn has just graduated from the '49 class. Maybe she could save some money by having them show us some of those fancy steps.

Office Offerings

Pat Lahr is leaving us to join the gang in Bldg. 26-4. Good luck, Pat, and pay us a visit now and then. . . . We welcome Leon Bond. Now there should be less waste and no spoilage. . . . Don Waldrop has a new power garden plow with mower attachment. He hasn't gotten it trained yet to stay in his own yard. While trying out the mower it got out of control and started across the neighbor's garden. Pull as bard as he might he couldn't hold it. He finally shorted the motor and it stopped in the middle of the garden. He is still on friendly terms with said neighbors, as the vegetables weren't high enough to get clipped.

All tbe people in New York aren't stupid, just because the population is dense.

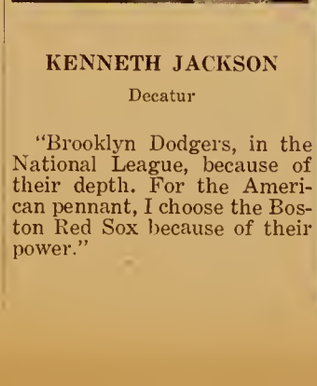
Business has many angles—the buying angle is equal to the try angle.

Inquiring Reporter:

WHAT TEAMS DO YOU THINK WILL WIN THE MAJOR LEAGUE PENNANTS?

BETTY MORAN

Decatur



"I pick the New York Yankees to win the American League pennant, just because they're my favorite team. Since I follow only the Yanks, I'm not able to choose one from the other league."

GEORGE HANNA

Decatur

"I think the Cleveland Indians will take the pennant in the American League, because they have a good pitching staff. As yet I can't tell who will get it in the National League."

KENNETH JACKSON

Decatur

"Brooklyn Dodgers, in the National League, because of their depth. For the American pennant, I choose the Boston Red Sox because of their power."

EDWARD HORMAN

Bldg. 19-2

"Indians and Dodgers. I pick the Cleveland Indians because they have Lou Boudreau, the best manager in the league today. With their hitting and pitching staff, they just can't miss. In the National League it is a tough guess to pick a winner at this stage of the game. I will stick my neck out, however, and say the Brooklyn Dodgers, because Burt Shotton has his boys really hustling this year. They are young, and have plenty of batting strength, plus good pitching. All these equal a pennant."

ADDIE BASBAUM

Bldg. 17-1

"In my opinion, and I do hope, the New York Yankees and St. Louis Cardinals will win the Major League pennants this season."

TOUCHING THE BASES

by Walter Husted

The Auscos downed the Lafayette Red Sox, 3 to 0, at Edgewater Park before 1,750 happy fans in St. Joseph, Sunday. Showing an almost entirely new lineup, the Auscos served notice that they will be hard to live with this season.

Mack Stewart limited the hard-hitting Lafayette sluggers to five hits, while setting 10 Red Sox down on strikes. Two former Voltmen combined to produce the winning run in the third, when Bobby Winters doubled and scored on Manager Carl Kennedy's single. The insurance runs came in the seventh on Bernie Westerkamp's single and a home run by first sacker George Logan.

Russ Clifton pitched for the Red Sox, going seven innings, giving up six hits and the three Ausco runs. "Slim" DeLion pitched the last inning.

Line score:

Lafayette	000 000 000—0	5	3
St. Joseph	001 000 20x—3	7	1

Clifton, DeLion and Hixson; loser. Clifton.
Stewart and Westerkamp.

Studebakers Win

The Studebakers opened their season with a 2 to 1, thrilling 12-inning victory over the Benton Harbor Buds at Lippincott Park, South Bend, Sunday. Lefty Roy Lee, for the Studebakers, and Barney Morris, of the Buds, hooked up in a tight-pitching duel. Lee returned the victor, although he gave up 10 hits to the hard-hitting Buds; while his teammates could garner only five off Morris.

The Buds scored their only run in the fourth inning on singles by Richel, Geras and Kovach. Morris held the Studebakers at bay until the home seventh when Humay opened with a single, went to second on a sacrifice and scored the run that tied the game when Eufemi dropped a handle hit into right field.

In the next four innings, Morris faced only 13 batsmen, one base on balls being the only blot on his twirling. In the twelfth, which was played in a downpour of rain, Andy Anderson drew a walk, was sacrificed to second, and scored the winning run of Aeschliman's single to right.

Line score:

Benton Harbor	000 100 000 000—1	10	1
South Bend	000 000 100 001—2	5	1

Fifteen Named To Ham League Softball Team

The final practice session before the Ham Softball League opening was held Tuesday, May 17. At that time 15 men were picked for the G-E team to compete against six other league teams.

The players chosen for the G-E team are Clarence Watterson, Pres Slack, Joe Ort, Oscar Rodenbeck, Bill Holloway, Ross Snyder, Clyde Musser, Carl Reiter, George Langenberg, Elmer Hazelett, Tony Wichman, Chief Surface, and Fred Bergman. Sam Baumgartner was named coach, and Bill Schible will serve as manager.

The Club opens league play Wednesday, May 25, at 8 p.m. against International Harvester. The game will be played at Packard Park.

OWL GOLF

By Earle D. Stauffer

With a very fine assist from the weather man, the Owl Golf League teed off toward the goal and championship that has been held the last two years by those "Hot Shots" from Bldg. 19.

Even before anyone could get warm to the task at hand, a sub par round, the first time this has happened in this writer's Owl League experience, and a team total of 156 was carded. Jim Sternberger put together three birdies, four pars, and two bogies for a sub par 35 on the first nine at Brookwood. Quite naturally, Jim and the rest of the "Hot Shots" carded the team total of 156 strokes. They picked up a fat plus-36 from Butch Junk, Walt Pook and Company.

The rest of the league play didn't produce any other 40-busters but they all have their sights set to make open season on the "Hot Shots" when they meet.

Team No. 3, composed of Merchant, Uhrick, John and Dick Bierbaum picked up 13 points from Gus Ormsby's boys.

Pappy Garland, Lou Barney, John Starke and Earl Stauffer make up Team No. 1, which took a measure of the Bldg. 17-1 standbys by 12 points. This Bldg. 17-1 team, composed of Ray Stanger, Al Middaugh, Jerry Humbarger, and Garland Myers, is starting its third season.

Quite naturally we, as a G-E league, are proud of our position in the vast interdivision sports program sponsored by our own G-E Club. We hope to promote the good sportsmanship that has been displayed in the past and make this season bigger and better than any that have gone before.

Tricks In Transformer

—FROM DIVISION 91—

By Johnny McMaken

Here it is another nice day in May, and we all can hope that next Monday is as nice for we will all be off enjoying a day at the lake, cleaning house which is not so enjoyable or working around the yard, etc. . . . As I was coming into work recently I noticed Bill Edmunds, to which all in Div. 91 would like to wish the best of luck. I also noticed that it doesn't take Bill very long to drum up new business, as he was carrying a large bag, which probably contained eggs. It was too large a sack to be carrying his lunch in. . . . I believe Rudolf Jackson and Ferdinand Reaser, commonly known as Pete, say they miss the cream in their coffee in the morning now that Joseph Ort isn't with us anymore to bring it in. . . . Russel Golliver seems to be having his ups and downs more than ever. Maybe it could be because he has taken the job as elevator operator. . . . Raymond Zell and Wilbur Shaffer are not letting any dirt get under their feet. They are giving the place a clean sweep down regularly. . . . Wilbur Shaffer is the proud father of a bouncing baby girl which weighed 7 lbs. 2 oz. . . . Russell Aker has gotten "stuck up" since he got that new super duper Dodge. He claims it has everything in it but the kitchen sink. He used to always blow his horn when he saw you in the old Chevy, but no more. He must be afraid of wearing out the horn on this new job. . . . It seems as though Luther McConnehey and John Sowers had an argument some time ago. Luther, being wrong, tried to buy John off by telling him he would bring John a nice large 20 or 30 pound turtle, but as yet John has seen no turtle. . . . Gerald Crum and Gus Kuhn were trying these new cars out over the week-end. Gus went to Michigan and Gerald went to Indianapolis. He got there just a little too late to see the grandstand go down at the speedway, as it happened near where he was sitting. . . . The fellows you see wearing sun glasses are none other than some of the second trick boys, Red Holzwarth, Mike Dauscher, Louis Wegman and John Staley. . . . It looks as though Ralph Milligan is in the market for a new Ford. At least he was seen getting a demonstration on Pontiac St. . . . Fred Thieme started to make his garden, but found the ground too hard. He had to dynamite it. It might be that Fred is getting a little weak. . . . Bob Bunyan said the bluegills that Arlo Amick brought him were very good only he hopes he doesn't have to wait as long for the next bunch. . . . The steering wheel on John Hughes' car must have broken up at Angola over the week-end. He was seen going around in a circle there. He was seen by none other than Charlie Kaiser who got caught in the rain Sunday. That was the first time Charlie's car has gotten wet other than being washed. . . . Robert Mennewisch got his Mondays confused a little. He forgot to come in last Monday. . . . All in Division 91 would like to wish Jim Stauffer a speedy recovery.

Medical Memos

By Mary Heymann

DID YOU NOTICE? The clean, shining walls in the Bldg. 8-1 Dispensary? The brilliant, pink color of Dr. Garton's face recently due to sunburn? The difficulty Mae Mulvane is having in refusing candy, pie, etc? Or is she? How happy our mothers were on their special day? . . . A group of student nurses from the Methodist Hospital, accompanied by Marie Kolter, superintendent, visited the main dispensary Tuesday, May 10. Since industrial nursing is one of the so-called newer fields, senior students especially are interested in this type of nursing. . . . Plans are under way for the Nurse-Management dinner to be held May 18. This is sponsored by the Industrial Nurses Association. . . . If anyone happened to notice Lyle Rupert looking a little different this week, it's because she had a new permanent last Saturday. . . . Anyone wanting expert advice on washing screened porches, consult Imo Jean Schwartz, Bldg. 21. . . . Minnie Fryback, Bldg. 21, is taking her vacation this week to do her housecleaning, she says. We hope she doesn't work too hard. . . . If you hear a terrific rattling and banging going by your home someday, don't be alarmed. It will probably only be Duane Stroud in his new Nash.

We moderns have otalgia,
Yet I remember way back when
We had the same annoying pain—
But we just called it earache then.

OUT OUR WAY

By J. R. WILLIAMS

G-E GOLF

By Hugh Dubdit

FORE and off to a new season. We have been asked to clarify and give an interpretation of some of the rules in effect through our leagues.

This week's rule, concerns teeing up the ball in the rough. Under the "winter rules" we use, the ball may be teed-up in the fairway. The census of opinion is that when the ball leaves the fairway being played it is considered in the rough, even though the ball may be in an adjacent fairway. When the ball is located in the rough, it must not be touched except under penalty of one stroke.

In the Wednesday night group, the Brassies led by G. Schimmele, shooting a 40 and W. Kirke with a 41 got away to a lead scoring 16 points. V. Foulks of the second place Mashies turned in a card of 40.

The Optimists of the Tuesday night group turned in a very good team score of 173 actual, to beat the Forty-niners and scored 13 points to lead the group. "Red" Braden had the best card of 38, while Bod Dent and Virg Guebard came in with 41.

Etiquette Tip of The Week: Try to remember that there may be several foursomes following you that want to finish the round before dark. Let's all try to shoot promptly when the way is clear or allow a speedier group to shoot through.

While most of our gang are counting the days until vacation, Melba Ingram's excitement increases as she counts the days left before her wedding. May 28 at St. John's Lutheran Church, Melba will become the bride of Robert L. Kelly of Auburn. Following the wedding and reception Melba and Bob will leave for a honeymoon trip to Niagara Falls. The wishes of the whole gang are that the happiest days of their past will be the saddest days of their future. Have fun, kids, and hurry back. . . . Everyone in Bldg. 8-1 is still talking about the bowling party last Tuesday night at Kessens Bowling Alley. Such great bowlers as "Heiny" Guenther, "Katie" Hirschman, Florence "Always good for a laugh" Casey, Byron "Set 'em up again" Simmons and Vera "Gutter Ball" Kruge were on hand to make the evening successful. Vera wasn't going to bowl at first when she heard it was going to cost her five cents for each gutter ball she rolled. Rather than have Vera penniless by the end of the evening, the gang decided to drop that idea and keep Vera happy. . . . It didn't take Jim Laisure long to get used to the day shift. He always comes in wide awake and rarin' to go. At least, he comes in. . . . A most welcome visitor last Monday was Tom Dent. Tom is up and about and expects to return to work in a week or two. It will be nice having you back with us, Tom. . . . "The reason a dog has so many friends is that he wags his tail instead of his tongue."

Voltmen Lose Opening Games To Grays, Cubs

The G-E Voltmen dropped their two opening games last week-end, the first exhibition opener here against the Homestead Grays and the other was their Michigan-Indiana League inaugural. They lost to the Homestead Grays Saturday night in a 6-3 duel, and were nosed out by the Michigan City Cubs, 7-6.

The game Saturday was delayed a half-hour by rain, before the official opening finally got underway. Gene Moses, Bldg. 8-2, was

Mayor Henry E. Branning Jr., above, throws out the first ball to open the season.

accompanied on the trumpet by Don Rendel in a stirring rendition of the Star Spangled Banner, before Mayor Henry E. Branning Jr., threw out the first ball to officially open the season.

The Voltmen got off to a 3-1 lead in the first inning on successive home runs by Johnny Dudick and Olan Smith, but the Cubs had passed them by 5-3 at the end of the fourth. The Voltmen succeeded in making it a 5-5 game after a sixth inning rally, but gave the opposition an unearned run in the seventh to break the tie. They yielded another run in the ninth and then fell a run short in their half of the final inning.

Michigan City ..... 112 100 101—7
Voltmen ..... 300 002 001—6

Errors—Smith, Smola, Two-base hits—Burkhardt, Dudick. Home runs—Dudick, Smith. Stolen base—Horman. Double play—Dudick to Hardy to Smith. Left on bases—Michigan City 11, G-E 9. Bases on balls—Orphal 2, Sakas 4, Smola 1, Hazel 1. Strikeouts—Orphal 2, Sakas 6, Smola 2, Hazel 2. Hits—Off Orphal 9 in 3 1-3 innings, Sakas 6 in 5. Passed balls—Burkhardt 2. Winning pitcher—Smola. Losing pitcher—Hazel. Umpires—Sears and Kawalski. Time—2:20.

Voltmen Lose to Grays

The Voltmen lost to the famous Homestead Grays, 6 to 3. Behind the pitching of Scott Cary, the Voltmen built up a 3 to 0 lead in the first five innings and appeared on their way to victory.

Semipro Champions Open 1949 Season

Members of the G-E Voltmen, semi-pro baseball champions, are shown above in their first official picture of the season. Top row: (l. to r.) Hugh Orphan, pitcher; Al Hazel, pitcher; Olan Smith, first base; Charles Braden, manager; Stan Miasek, left field, and Charles Bobilya, second base. Middle row: (l. to r.) Charles Shipman, pitcher; John Burkhardt, catcher; John Orphal, pitcher; Dee Hamilton, coach; Roy Kilby, center field, and Scott Cary, pitcher. Bottom row: (l. to r.) John Dudick, shortstop; Bill Hardy, second base; Don Horman, right field; Jim Slack, batboy; Don Runge, center field, and Stan Shargey, third base.

John Burkhardt slides into second, as two Cubs make an unsuccessful attempt to put him out.

The national champs scored single runs in the second, third and fourth frames. In the second inning, Stan Shargey drove one of Kaiser's slants over the left field fence; while in the next frame Burkhart repeated Shargey's feat with a slightly longer drive. The Voltmen concluded their scoring in the third inning on Miasek's triple and Burkhart's single.

In the home eighth, the Voltmen appeared to have a rally underway on singles by Miasek and Horman which put runners on first and second with one out. Burkhart popped a high fly along the first base line which was missed completely by Leonard; but in a mix up over a very faintly called infield fly, the base runners took off and Miasek was run down to complete a double play.

Stolen bases—Jackson, Shargey. Double plays—Leonard to Bankhead, Shargey-Hardy-Smith. Left on bases—Grays 6, Fort Wayne 9. Bases on balls—Bankhead, Leonard, Runge, Burkhardt. Strikeouts—Kaiser 8, Cary 4, Orphan, Shipman. Hits off—Cary 3 in 5 innings; Orphan 3 in 3 innings; Shopman 2 in 1 inning. Balk—Kaiser. Losing Pitcher—Orphan. Umpires—Hood and Burke.

Stan Miasek and batboy Jim Slack greet Olan Smith as he crosses the plate after hitting a home run over the centerfield fence in Sunday's game against the Michigan City Cubs. The poke gave the Voltmen a 3-1 first inning lead.

Olan Smith saves a wild throw on an attempted wild play in the seventh inning of the game Sunday.

Roll Up 28-3 Victory Over House Of David

By Bill Hunt

The House of David team might well change their name to The House of Goliath after Tuesday night's game. It could be seen as early as the first inning that they were to be beaten, although they started well by laying two bunts down that stumped substitute third baseman Chuck Bobilya. It quit then as their murderers-row went down swinging, pitcher to first and second to first respectively.

The Voltmen fattened their averages gloriously, as everybody got at least one hit. Gabby Horman led the pack with two mighty home runs, two doubles and a single in five official trips at bat. Stan Shargey also got a round tripper to go with two singles to make three for five. Don Runge got two doubles and a single in four to make his average look much more healthy.

Al Hazel waits for a throw that would cut off the winning run in the game against the Michigan City Cubs Sunday afternoon.

Before starting the Homestead Grays-vs.-Voltmen game Saturday night, Umpires George Hood and Eddie Burke meet for a session with Sam Bankhead, manager of the Homestead Grays, and Charles (Red) Braden, Voltmen manager.

What About Job Security?

Let's face the facts about job security.

Let's honestly admit that things have been so flush for the past 10 years that we have all forgotten that jobs could be scarce or insecure. Let's confess that all too many of us have leaned too heavily on the promises of politicians that some new man-made laws were going to protect us from the natural operation of the old law of "supply and demand." Let's realize that almost all of us have forgotten that the boss who sets the wages and makes the jobs is not the union leader, not the government man, not the company officer, but the customer who buys—or refuses to buy—what we make.

And let's face up to the fact that the customer has suddenly slowed down his buying — stopped buying as much, or as freely, or at prices as high as a few months ago. Why?

We think it's this. In the last 10 years there has been a great increase in the supply of money — with nothing near the same increase in consumer goods. That's because we shot away in the "hot" war, or gave away in the "cold" war, a large part of what all of us produced. And what we produced for the government was paid for mostly in new money in the form of I.O.U.'s.

For six years we all got paid more and more out of the increased supply of dollars. We had the money, but we couldn't buy lots of things we wanted, because they weren't being made.

Now, in the last four years since the war, we Americans have been trying to make up for what we couldn't get — or get enough of — in the previous six years. But, at the same time, we have been having to hand over about ¼ of the average income of each of us to military, foreign, or other federal, state, or local government purposes.

We have too eagerly and too carelessly rushed to buy the remaining ¾ of our country's output. For four years we have been using *both* income and savings to bid against each other for what products there were on the market... products we *could* have bought out of income alone, if we hadn't been in such a hurry.

WHAT MUST WE DO?

Now the big rush is over. A lot of people have gotten what they wanted most... for which they, too often, were willing to pay too much. Some people have come to the end of their savings. Others still have old savings or are putting new savings in the bank, but are holding off buying until prices settle down and seem more attractive.

Customers in general feel that shortages are over, prompt deliveries can be gotten again, and it isn't necessary to buy way ahead or pay the first asking price. In fact, most of them feel they can buy later at lower prices. The return of full supply and intense competition has put the buyer back in the driver's seat.

General Electric has always tried to make jobs secure, to have them even more secure than other employers. The past record has been good, and right now General Electric is trying its best to maintain that record—to beat it, if possible.

Clearly, the way to make and protect jobs is to get and hold customers. And to keep them buying in this slow market we must offer better values—more attractive prices on ever more attractive goods, presented by our advertising and our salesmen with ever more enthusiasm and conviction.

As material costs came down and engineering improvements were made, General Electric, early in the year, reduced prices on refrigerators, ranges, freezers, and many other items... introduced new television sets and automatic clothes washers at prices nearly $100 less than previous models... with expected savings to General Electric customers of $50 million in 1949.

Since these first reductions, General Electric has been able to reduce prices on still other items, some of them for the second time.

These timely reductions.... these product improvements... and the still bigger values we hope to offer in the future — together with a more powerful, hard-hitting selling effort — will help to make jobs. They will increase customer buying power, get more General Electric products sold, get production back up and layoffs down, make a sound start towards raising real wages and insuring greater job security.

HOW CAN WE ALL HELP?

The security of General Electric jobs, and how good they are otherwise, is wrapped up in this improvement process — improving the quality and reliability of our products, improving the price we offer, improving the sales effort we make, improving the reputation we enjoy. In the end, there is no security like working for an employer who is the low-cost producer with the best reputation for quality products and honest dealing.

Every employee has a personal stake in making and holding General Electric customers and General Electric jobs. Everyone needs the help of everyone else.

And we all can help by checking ourselves again and again each day and hour... in the plant, the laboratory, the office, in the customer's presence... making sure we are giving our full interest, skill, care and effort to these more attractive, more reliable, bigger-value General Electric products which we must have in order to stimulate renewed and increased buying by our customers.

But we don't just need a product and a price that outwardly look good to the customer. Knowing that steady jobs depend on a steady flow of orders, we all need, even more, to hold on to that world-wide reputation of ours which gives the customer the inner assurance that the product and price are as good as they look—that it's best to buy from General Electric.

We can't promise that all this will result in steady employment, because we can't look into the future and tell how much our customers can and will buy from us. But we do know that all of us—working together—can and should do a lot toward protecting our present jobs, gaining back those lost, and going on to make new jobs and new futures... by doing more of what it takes to make the products that make the sales that make the jobs.

G-E Workers Rush Motor To Aid Flood Stricken City In Texas

A group of assemblers, testers and machinists at the Fort Wayne Works were praised this week after a dramatic race against time to rush a synchronous motor to Fort Worth, Tex., for pumping water to flood-groggy Texans, whose water system had been put out of commission by rampaging floods.

CITY OF FORT WORTH
TEXAS

May 23rd, 1949

Dear Sir:

I wish to express to you and the General Electric organization my eincere thanks for the fine way in which General Electric came to our rescue in the recent flood here in Fort Worth, which was nothing short of a catastrophe to this fine city. I have particular reference to the way in which your Company dropped everything and finished the 900 h.p. motor at your Fort Wayne, Indiana plant. The delivery of this motor to our pump station on such short notice was a life-saver so far as water supply to our city was concerned.

You have the eincere thanks of our Mayor, our City Council, and the citizens of Fort Worth for this fine public service rendered on short notice and without any reference to cost or hours of labor required.

With kindest personal regards, I am

Sincerely yours,

CITY MANAGER.

WOJ:GA

The exciting story of how local G-E workers went to the aid of the flood-stricken Texans started Monday night, May 16, when a 10-inch rain caused flood waters of the Trinity River to smash four gaping holes in the levees and inundate large portions of the city of Fort Worth. It soon flooded the city's Holly Pumping Plant and cut off the water supply for the entire city.

The first floor of the plant was submerged in three feet of water. The six main motors driving the centrifugal water pumps, which were located in a pit 18 feet below the first floor, were submerged under 20 feet of water.

City Is Without Water

With the exception of a few scattered artesian wells, the city was without water of any type. Drinking water was brought in by truck. Hospitals cancelled all but major operations to conserve what little water was available. The chief danger, however, lay in fire and no effort was overlooked to get the pumps back in service.

Power at the pumping station went off at 5:45 a.m. Tuesday. An urgent telephone call to the General Electric Company's Dallas service shop brought a crew of men to the scene. Until the water was pumped from the pit in which the main pump motors were located, nothing could be done to them.

Vice President H. V. Erben Reviews Business Outlook

ADDRESS GIVEN AT MEETING OF SQUARES CLUB, ENGINEERS

"The Apparatus Department, Past, Present and Future" was the topic of an address by H. V. Erben to members of the Squares Club and engineers at a meeting held Wednesday evening, May 18, in the Squares hall.

Mr. Erben is Vice President of the Company and General Manager of the Apparatus Department.

In the opening portions of his talk, Mr. Erben discussed the operation of the Fort Wayne Works.

Mr. Erben then discussed the organization of the Apparatus Department, its volume of business, expansion activities, and the general business outlook.

He pointed out that the department represents approximately one-half the total volume of the Company, and has about one-half of its employees.

"Although we are primarily in the producer-goods field, we have an extensive interest in the components field, a fairly wide range of products for the consumer market, and an increasingly active part in the armament and jet engine fields," he said.

Expansion Activities

In his discussion of expansion

VETERANS HOLD G-E MEMORIAL PROGRAM TODAY

Final arrangements have been completed for the G-E World War Veterans' Memorial Service which will be held at 12:15 p.m. today in front of Bldg. 19.

The main address will be given by John E. Estabrook, Assistant to the Works Manager.

The rifle squad and bugler of American Legion Post 47 and a color guard will take part in the ceremony. The color guard will include Harold Rahe, Melvin Curtis, Roy Ogden, Robert Zimmerly and Preston Hille.

Arthur F. Stute, representing the veterans of World War I, and Paul Trier, for those of World War II, will place wreaths at the two memorials.

C. H. Matson, Works Manager; E. A. Barnes, former General Superintendent and now retired, and K. W. Michael, president of the association, will also take part in the program.

Volunteer Firemen To Hold Annual Stag Picnic June 4

The Volunteer Firemen's Association will hold its annual stag picnic Saturday, June 4, at the Log Cabin.

Speeding Truck Carries G-E Motor To Fort Worth

Loaders slide the G-E motor from Bldg. 6-1 into a truck Wednesday morning for its trip to Indianapolis and then Fort Worth, Texas. The next photo shows the vital cargo arriving at the Holly Pump Station in Fort Worth at 12:40 a.m. Friday. In the left foreground is a city motorcycle officer and parked at the far left is a Texas Highway Patrol escort car. The crane at the right stands ready to lift the motor into the pit at the pump station. The photo at the right shows the motor being lowered from the flat-bed truck onto skids leading through the doorway of the plant. The happiest man to see the new motor arrive was Superintendent of Production Fred Kink (at the left), who rushes up to pat the motor.

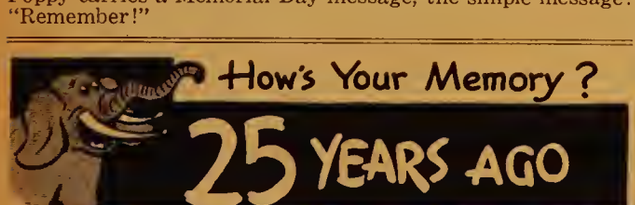
Every Buddy Poppy Carries A Memorial Day Message

Each year on Memorial Day all America is asked to "Wear A Buddy Poppy." The national Buddy Poppy Sale will be held Saturday, May 28. It is conducted annually by the Veterans of Foreign Wars to raise relief work funds for help to disabled and needy ex-service men and their dependents—help beyond what government aid can supply.

Made in government hospitals, the Buddy Poppies, so named by the war-disabled who fashion them each year, are a mute tribute to their "Buddies" who never came back. They recall the little red flowers that sprang up in the fields of Flanders as if to commemorate the lives of those gallant youths who fell there more than a quarter of a century ago in the first great World War struggle to establish an enduring peace. They recall, more freshly, the high toll of World War II in the same selfless cause.



The President of the United States each year at the White House receives the first Buddy Poppy from the child of one of America's dead heroes, a child from the V.F.W. National Home for Widows and Orphans of veterans, to which a portion of the Buddy Poppy Sale proceeds is allocated. Labor and fraternal organizations, business and professional associations, religious leaders and women's clubs have annually expressed their warm accord with the Buddy Poppy plan.

President Harding, the first President to receive a V.F.W. Poppy, characterized it as "the outward and visible sign of an inward and spiritual remembrance." The first national poppy sale of the Veterans of Foreign Wars, the first veteran organization to undertake and successfully conduct the poppy-sale movement on a nation-wide scale, was in 1922, using French poppies made by women and children of the devastated areas. The present plan of "Buddy Poppies" made by disabled ex-service men, developed in 1924, has expanded annually and is recognized by the U. S. Veterans Administration as a valuable adjunct to the Occupational Therapy work in the government hospitals where the Buddy Poppies are made.

Today in the hospitals of the United States thousands on thousands of disabled veterans give tragic evidence of the cost of conflict. Not the least pitiful result of war's exacting toll are the thousands of widows and orphaned children who lost husband and father.

Each Buddy Poppy is a symbol of the hope that war may never again demand the sacrifice of America's manhood. To wear one of these poignant "flowers of remembrance" is to honor their memory and their deeds. There can be no better honor to their sacrifices than to help the disabled and their dependents.

The goal is set this year at 20,000,000 Buddy Poppies. To wear one on Memorial Day is so little to ask. It means so much. Every Buddy Poppy is a reminder of war and its terrific toll of health and young strength. Every Buddy Poppy carries a Memorial Day message, the simple message: "Remember!"

Diplomas were presented to sixty G-E Night School men Tuesday evening, May 22, following a dinner at which they were the guests of the company.

Several musical selections were played during dinner by an orchestra made up of men from the plant. Emerson Vester, of the Apprentice Department, played several delightful piano solos.

E. A. Barnes spoke on the subject "Training, the First Step Toward Promotion."

"Opportunity Knocks More Than Once" was the topic taken by W. J. Hockett to point out that opportunity is always present.

OUT OF THE BLUE in 26-2 office

by Delores Patterson

We extend our sympathy to the family of Herb Driftmeyer. . . . John Cunningham of the Specialty Transformer and Ballast Engineering Division has left for Schenectady. We are all very sorry to hear of his leaving. . . . Bob Thomas of the Service Bureau had a hectic time last Friday. He arose at the 5:30 alarm, and the first thing to do was fix the washing machine. After fixing that he was getting into his car to come to work when he spied a flat tire. That made him a few minutes late for work. Coming to work puffing, he started his daily routine delivering the mail. While on his route, his mail bag broke and he dropped two untyped cylinders. Poor Bob, he was just a week late—You would have thought it was Friday the 13th! . . . The golf season is here for sure and Dick Sellers and Jim Locker bought a box each of golf clubs from Herb Eaton. Let's see some action now, fellows! . . . Goings-on for our three-day holiday! Betty Horner is moving into her new home. Clara Wagner is going to sleep! Vera Reeves is going to be ambitious (for a change). Ruth Ellert is going to the Tulip Festival at Holland, Mich. Lee Stein is going to Goodland, Ind. Mickey Huth is going fishing. Bob Thomas will spend his time at Lake Wawasee. Dorothy Halleck is going to Earl Park, Ind. . . . Helen Brindle, trying to cooperate with the Jaycee's Clean-Up Week Campaign, tried to clean up her neighbor's backyard only to find herself knee-deep in poison ivy! We hope it hasn't bothered you too much, Helen.

ELEX DAY GIRLS PLAN FATHER-DAUGHTER PARTY

The Elex day girls are planning their annual Father-Daughter party for Friday, June 3, at 8 p.m. in the Kreis Stolzenau hall.

Joe Taylor, Bldg. 27, and his band will be featured for the program, followed by a Dutch lunch. During the party, each father will receive a gift from the club.

Tickets for the occasion are $1.50 each, and can be obtained from contact girls. The deadline for the reservations are Tuesday, May 31.

Thisa and Thata "SPECIALTY MOTOR"

by Helen Engle

Our heartfelt sympathy to William Wickliffe and his family in the death of his brother, Arlo Wickliffe. . . . We're glad to see Bob Bice back on the job. He says there is nothing to the peanut story. . . . Hazel Herron got a little extra shut-eye the other morning and came in a bit late. That's OK, Hazel, extra sleep does one good once in a while. . . . Thelma Purdue came out of the store the other day carrying a big sack of groceries when a gust of wind came along and played havoc with her big, big skirt. She vows no more full skirts when going to the grocery. . . . Congratulations and best wishes to Becky and Harry Possel who became the proud parents of a girl last Saturday. Becky used to work in 1x29. . . . Nahrwold, how does it go to be a papa? Congratulations and good luck from the gang in Bldg. 4-3 Test and Inspection. . . . Berry, has that boy of yours started to school yet? Better look out or he will soon be cutting you down to his size one of these days. . . . Elmer Koehlinger, how does that car run? Must be all right as you look great behind the wheel; keep her going, Elmer. . . . Some of the fellows at Henry Wiegman's wedding reception are wondering why George Prince had to leave so early. Do you have to get in before dark, George? . . . As far as we know Gilbert Walker is the first hot-rod fan in Bldg. 4-3. He takes it out to the country to try it out. . . . Henry Shirley and Louie Sauers are feuding about who can grind the valves in a car the fastest and best. . . . We want to welcome Lucile Orr to inspection. Hope you will like it here. . . . And to Peggy Tschannen a welcome from 1x29 and hope you like us.

Meet the President

Erben Reviews Business Outlook

(Continued from page 1)

activities, Mr. Erben stated:

"Unfortunately, the current business situation in a considerable number of our product divisions, including the two businesses here has necessitated the curtailment of operations in some of our branch plants, as well as at parent works. We consider this condition as temporary, however, and we are not changing our policy in regard to continuing decentralization to small plants wherever desirable."

Major stress was placed by Mr. Erben on the need for orders to support the department's present rate of production and meet the 1949 budget.

Mr. Erben then reviewed the general business outlook in the three businesses located at the Fort Wayne Works:

Fractional Horsepower Motor

"As you know, this is a component-type business. As such, your business follows the trend of the user industries. And in this business, almost every single line has gone soft. The pipelines are filled; many users over purchased and are using up motor inventories. However, it is our hope that this condition is temporary. Slowups in some industries like home laundry equipment may later be offset by increases in demand for pump or fan motors. In view of this factor, we are still optimistic and hope that the total volume of business in 1949 will average considerably above its current level, and even more encouraging, our Marketing Research Division in a very recent report has reconfirmed their belief that after the present recession is over fractional horsepower motors will continue on to new heights."

Specialty Transformer, Ballasts

"This business is made up of two distinct lines of product.

"In regard to ballasts, the business outlook is difficult to describe, and that is putting it mildly. Prewar we had high hopes, based upon the Lamp Department's outlook. During the war, this optimistic viewpoint was stimulated by the installation of fluorescent lighting in many defense plants.

"At the present time, the business has increased but has developed to about one-half of what we planned. We are by no means discouraged, but the immediate future is by no means clear. The situation demands that we pull in our belts and dig in for a hard fight.

"In the more stable end, the Specialty Transformer part, you have great diversity in both product and application. Yet, this business is also sensitive to business changes. As a result, the Specialty Transformer line—currently about one-third of the volume of this business—is also facing a future difficult to forecast."

Large Motor, Generator

"The unit at Fort Wayne, with its synchronous motors, motor-generator sets, and direct-current motors, has not dropped off as much as your other two businesses. The level of operations is down slightly under 1948 and the downward trend may continue moderately for a short time. However, this is a relatively stable operation and the fluctuations probably won't be severe.

"Part of the work of this operation has been in helping another division catch up with a backlog. This work should be finished in July. A small decline in the level of the Fort Wayne unit is anticipated at that time as a result."

H. V. Erben, G-E Vice President and General Manager of the Apparatus Department, is shown above meeting with W. C. Wichman, Manager of the Specialty Transformer and Ballast divisions; C. H. Matson, Fort Wayne Works Manager, and M. E. Lord, Manager of the Fractional Horsepower Motor divisions, at a meeting of the Squares Club and engineers last week.

Employee Relations Objectives

"You and Your Job" was the next topic discussed by Mr. Erben:

"I know you are all anxious for even more information about what is actually happening in your own operations. Rumors about depressions and recessions are current at many of our works. As you well know, the necessity for layoffs is an unpleasant reality right here in your own factory and your associated plants.

"I think that the return to normal operations can be helped considerably by a good dose of facts. As a result, I am asking each of our product division managers to brief all of their people—in the shop as well as in the office—on the frank and honest facts of the business as it now stands and as they see it in the future.

"This presentation will include all possible and pertinent information on sales, billings, costs, investment, development, employment, etc. In many cases the short-range picture may be unpleasant, but I am convinced that you need and want this information. When our people have it, I know they will be better equipped to change these short-range setbacks into long-range victories for themselves and their operations."

Improving Jobs

Mr. Erben then reviewed the department's mutual approach to the subject of jobs:

"G-E has been engaged for the past 18 months in a serious effort to improve jobs at General Electric. The Apparatus Department and your works have been sincerely trying to meet the goals of this worthwhile campaign. While we have hardly scratched the surface, I want to assure you that I and your own management wholeheartedly support this campaign and its objectives.

"We have made a small but sure start in the face of what may be conservatively called dismaying facilities. Reconversion. Inflation. Expansion. New competitors, some of them financed by your own tax payments. And, as you know, we have been attacked unfairly and without quarter by people who represent special—and sometimes very special—interests."

Concerning job improvement as it affects each employee, Mr. Erben outlined the following three things that the department has been attempting to do:

"(1) We have been trying to keep in mind pay, working conditions, and the other material parts of your job so that we can develop a realistic program of gradual improvement.

"(2) We in managerial positions have been trying to learn how to be good supervisors. We want to give you full and honest information, clear directions, authority commensurate with responsibility, and self respect. We want our supervisors to be leaders in the best sense of the word—leaders who will give everyone a sense of participation and who will earn the loyal support of their people.

"(3) We have been trying to make available some of the more important facts of economics and good citizenship. We have sincerely tried to be objective in our approach. We have not and could not, for example, tell Dean Carothers what brand of economics to teach. He was on his own and that's the way we want it."

Looking into the future, Mr. Erben discussed pay, benefits, working conditions, and job security.

He stated:

Pay to Be Open Matter

"In the past there's been secrecy and mystery about pay. Effective as of now and in the future, we want to make it possible for you to discuss pay on the frankest basis possible with your responsible superior."

Benefits Are Nothing New

"In this day of emphasis upon the so-called 'fringe benefits,' G-E employees can rightfully feel that they had it long before professional union and government stylists decided to make 'fringe' the fashion of the day."

Stock Bonus Savings Plan

"The advantages of this plan are not difficult to see—some 77,000 G-E employees are convinced that here is a good way to save and a good way to become a stockholder in the Company.

"So, as far as pay and extra benefits are concerned, we are sincerely trying to be fair, and to anticipate and then meet the increasing social responsibilities of our day."

Working Conditions

"We will continue to strive for adequate—not perfect or luxurious—working conditions in the same manner that you as home owners strive over a period of years to make your home an increasingly better place in which to live.

"If your working conditions are a source of real irritation, let your supervisor know. He won't be able to get everything fixed to suit everybody at once—but I assure you we are interested in seeing that all of our supervisors try to do the reasonable things, within a reasonable time limit and with a reasonable cost."

Job Security

"Things have been so free and easy for the past 10 years that many have forgotten that jobs can be insecure. But many jobs are insecure right now—jobs that were born in abnormal times and must of necessity die with the end of boom times.

"There is no royal road to job security but I'm convinced that General Electric provides the best opportunity for alert, aggressive, loyal, resourceful employees to make their own job secure."

Department Has Kept Pace

In conclusion, Mr. Erben stated:

"Your Apparatus Department has more than kept pace with the amazing war — and post-war — growth of an American economy which has its roots in the ever-growing use of electric power.

"Factory-wise, product-wise, personnel-wise, and organizationally we believe we are prepared for almost any challenge the future may present.

"We can't fail, nor can subversive groups make much headway, if we can provide the leadership that will earn the loyalty and the resourceful, eager participation of all of you who are sharing in this great enterprise."

Elex Club's Second Shift Girls To Attend Theater-Luncheon Party

The second shift girls of Elex will hold their June meeting Thursday, June 16. They will meet in the YWCA at 11:30 a.m. for a smorgasbord.

Following the luncheon, they will attend the showing of "Flamingo Road," starring Joan Crawford, at the Emboyd theater.

Tickets for the theater-luncheon are $1 each and can be purchased from contact girls. Reservations must be made by Monday, June 13.

Squares Elect New Officers

The new officers of the G-E Squares Club are shown, above, mapping plans for their term of office after the club's annual meeting and election Wednesday, May 18. They are: (seated) R. P. Cheesman, vice president; M. A. Baker, president; D. G. Seabold, secretary; (standing) J. J. Clarkson, director, and F. T. Carlson, treasurer.

G-E Workers

(Continued from page 1)

City officials then requested G-E representatives to do everything possible to hasten completion of a new 900 horsepower, 720 rpm, synchronous motor already on order.

Start Working at Midnight

After several exchanges of telegrams, R. M. Hartigan, Manager of Manufacturing for the Large Motor and Generator divisions, was reached here by telephone at 10 p.m. Mr. Hartigan got some extra crews together about midnight.

The men located a motor which would do the job, but it was being prepared for another order. Another catch was that it was anywhere from 5 to 10 days from completion. In fact, one end of the motor hadn't even been assembled.

They worked all day and night Tuesday, and completed it Wednesday morning about 9 o'clock.

Job Finished in 10 Hours

The last castings were machined the motor assembled, and the test group completed tests—all in only 10 hours, a job that usually requires several days.

"Everybody did a remarkable job in my opinion," Mr. Hartigan said later. "I can't say enough to praise those fellows. They really pitched in and worked."

The next problem was one of transportation. The motor weighs 10,000 pounds, has 900 horsepower and 2,300 volts. It is about 50 inches high, 50 inches long and eight feet wide.

Truck Speeds Motor to Texas

Too heavy and compact to be flown, the motor was sent by truck. A local trucker rushed it to Indianapolis, where a trucking firm solved some difficulties concerning regulations about driving a truck straight through to Fort Worth by putting a special relief driver on the job.

Victor Brown, the truck driver, said he drove 55 and 60 miles an hour most of the way.

Hearing of the emergency trip, the governor of Oklahoma ordered a special police escort for the motor through that state. An escort also was waiting at the Texas border to speed the final lap of the journey.

The truck made a record run of over 1,000 miles in 33 hours, arriving in Fort Worth at 12:40 a.m. By 7 a.m. installation and wiring was completed. Grimy workmen stepped back and grinned—their work was done.

The motor turned over perfectly. Soon water was flowing from the taps of homes throughout Fort Worth for the first time in three days.

A photographic account of the story is shown at the right:

(1) Fort Worth, Tex., got its water system back in operation in record time only because of the hard work and technical know-how of a bunch of guys and gals at the Fort Wayne Works. A part of the crack crew that worked on the motor includes the following from the first shift: (l. to r.) First row—William Grider, rotor assembler; Bernadine Mailand, AC coil taper; Anna Fairbanks, DC coil taper; William Kaiser, rotor assembler; Al Deininger, machinist; Ollie Fox rotor coil winder; George March, armature winder; Otto Rusch, balancer, and George Zeis, AC assembler. Second row—Guy Miller, exciter assembler; Osmer Eix, oven

(Continued on page 5)

MODERN PAUL REVERE

Speeds G-E Motor Over 1,000 Miles To Fort Worth, Texas, In 33 Hours

Police sirens sounded a tocsin to Fort Worth, Tex., residents of "to faucets, to faucets, the water is coming" as a big truck bearing the city's new water-pump motor rolled into the town at 12:40 a.m. last Friday.

Riding hard in the saddle, as he had been for more than 32 hours and 1,009 miles, was General Electric's modern Paul Revere—Victor Brown.

Brown, an independent truck driver from Indianapolis, had climbed into the cab at 4 p.m. Wednesday, after the G-E motor was loaded into his truck. He had stopped once at noon Thursday for a 15-minute meal. The rest of the time he kept rolling.

"It was the most important cargo I ever hauled," he explained.

When arrangements were made through the Governor of Oklahoma for a police escort to meet the truck at the Oklahoma-Missouri boundary, there was no way of informing the truck driver. Brown stated that shortly after leaving Springfield, Mo., he heard via news broadcast on his truck radio that "a truck bearing an urgently needed motor was being rushed to Fort Worth, where the people had been completely out of water for three days." He realized that meant him, and from that point on he tried to increase his speed insofar as safcty permitted.

Truck Misses Escort

Entering Oklahoma via a shortcut, Brown missed the waiting police escort. Until 8 p.m. Thursday night he was among the missing as far as Oklahoma police, Texas police, Fort Worth officials, representatives of the Yellow Transit Company, or General Eleetric personnel were concerned.

The first Brown knew of his motorcycle escort was when he was stopped by a sheriff about 20 miles north of McAlester, Okla., more than half way across the state. Brown says that he had been exceeding the speed limit and when stopped got ready to pay a fine He really began to get worried, however, when the sheriff told him that he was wanted by the Oklahoma State Police. He asked the sheriff what for and learned then for the first time that a motorcycle escort was awaiting him.

Brown said from then on the going was fine. He pushed the truck along as fast as it would go and on one or two occasions, when he could take his eye off the road long enough to glance at the speedometer, he was hitting 80.

Arrives in Fort Worth

A new patrol picked up the van every 25 miles without slowing the cargo and a wailing, three-motorcycle, police escort swept the speeding truck into Fort Worth at 12:40 a.m.

Brown climbed stiffly out of the cab, and said he felt "fine." He watched the motor lowered into the pit, and then went to a hotel to sleep.

Proclaimed a Hero

The next morning Brown woke up to find he was a hero. The Chamber of Commerce had a dinner planned for him, calls from newspapers and television were waiting.

He was amazed to hear that the motor went in operation at 9 a.m., but added, "that was a real motor I brought in."

And before he left Fort Worth, he told friends he was "going out there and watch that thing operate a while."

G-E Workers

(Continued from page 4)

operator; George Grote, inspector; Ed Lepper, shaft grinder; Art Swain, shaft lathe operator; Ed Auth, balancer; Fred Reinking, sheet metal; Erv Moore, rotor assembler; Ralph Leonard, casting yard; William Behm, assembler; Joe Neal, production; Don Murphy, casting yard; Phil Lydie, spray painter; Lyle Johns, spray painter, Virgil Carmen, tester.

(2) The 10,000-pound motor is made ready for shipping in Bldg. 6-1. C. L. Saurbaugh was responsible for the transportation details so that no time was lost in getting the motor to its destination.

(3) Members of the emergency crew from the second shift included: (l. to r.) First row—James Knupp, assembler; Charles Mowery, slab mill operator; Orville Gamble, stator coils; Harry Rhodes, stator winder; Immanuel Stauffer, rotor coil winder, and Merlin Pattee, chipper and grinder. Second row — Russell Mennewisch, test foreman; Robert Tilbury, assembler, George Buelow, tester; Frank Serovey, tester; Carl Schafianski, machine shop foreman; Harold Misegades, assembly foreman, and Paul Kleinrichert, radial drill operator. Third row—Paul Armstrong, radial drill operator; Gene Fox, assembler; Fred Schafer, assembler, and Ray Junk, vertical boring mill operator.

(4) Men hurriedly unload the motor soon after the truck came rumbling into Fort Worth with its valuable cargo.

(5) Here's the 900-horsepower motor on its way down into the Holly pump station about 2 a.m. Friday.

(6) The men at the bottom of the pit get ready to start their job of moonting and attaching the motor to a 20,000,000-gallon-a-day pump, as the crane cautiously lowers the motor from the doorway above.

(7) Before noon Friday the motor was whirring away on the job of delivering water to a drouth-stricken city.

(8) The installation is completed and soon the giant valve is turned on to send water flowing into mains throughout the city.

(9) R. M. Hartigan, Manager of Manufacturing for the Large Motor and Generator divisions, is shown at his desk reviewing the dramatic story as reported by the Fort Worth press and national news bureaus.

FOREMAN TO RETIRE

L. J. Miller

Leo J. Miller, Foreman in the General Service division, will retire Wednesday, June 1, after 32 years' service with General Electric.

Mr. Miller was employed by the Company in 1916 as a wire man, and later became a pipefitter. In 1928 he was appointed assistant foreman of plumbing. Since 1937 he has been foreman of the same section.

Ft. Wayne Engineers Elect New Officers

New officers were elected by the Fort Wayne Engineers' Club at its monthly meeting Thursday, May 19, at the Chamber of Commerce. They are: J. C. Ferguson, Farnsworth Television and Radio Corp., president; L. R. Beard, Bldg. 4-6, vice president; F. H. Fleisher, Bldg. 4-6, treasurer; S. L. Betz, secretary; and A. W. Howard, Bldg. 18-1, and R. A. Hoot, directors.

Harold Frazier Heads List Of 97 Suggestors

Harold L. Frazier, FHP Division 1, led the list of 97 suggestors this week with a $150 award for his suggestion on heat treating shafts. The total awards amounted to $1,225.

Next on the list was Luella Ternet, FHP Division 13, who received two awards, $105 and $25. Her suggestions pertained to the assembly of switches and to remove the foot setters on nut setters.

Franklin J. Blotkamp, FHP Division 13, was awarded $60 for his idea on toggle switch covers. Thirty-five dollars went to George L Santon, Motor and Generator Division, on his suggestion for testing rotor coils.

Those receiving $25 awards are Rose V. Ramsey, FHP Div. 16; Clive E. Lupton, Tiffin plant; Paul Black, Specialty Transformer Div. 93; and Otto R. Borkenstein, General Service.

Awards ranging in various amounts from $5 to $20 were made to the following employees:

FHP Motor Div. 13: Clarence Hartman, John Wood (two awards), John G. Weber, Elmer J. Pion, Charles A. Sherland, Fletta Erickson, Harold Blumenhorst and Robert L. Repine.

FHP Motor Div. 14: John D. Anspach, Robert M. Bultemeier and J. Ralph Fischbach.

FHP Motor Div. 15: Thomas L. Blackwell, Paul F. Boyer, Paul R. Neal, Alice Hahn, Dessie George, Edward C. Gebhart, Joseph B. Howard, Charles H. Kirkpatrick, Herman C. Macke, and Joan M. Meyer.

FHP Motor Div. 16: George Eshelman, Jeanette Blough, Joseph H. Jensen, Gerald R. Fleck, Walter J. McCormick, Vernon Wyatt, Louis J. Wyss, and Earl Yoquelet.

FHP Motor Div. 19: John R. Miles, Howard G. Farrell, Francis L. Bennet, William L. Fisher, and B. J. Suelzer.

FHP Motor Div. 33: Melvin H. Borcherding, Harold D. Drage, Herman T. Ambrose, Ezra Garringer, Lawrence A. Baker (two awards), Solomon Andorfer, and Roger R. Crabill (two awards).

FHP Motor Div. 10: Alice H. Uffelman.

Tiffin Plant: Richard W. Seislove (two awards), Hugh Hinsman (two awards), Lewis Shutt, Paul Raitz (two awards), and Richard Runion.

DeKalb Plant: Thelma Murphy and William C. Berg.

Specialty Transformer Div. 93: Arthur F. Pequignot (two awards), Marie L. Drowge, Levi C. Carpenter (two awards), Warren G. Antoine, Dale Stucky, Levona Porter, L. W. Schuster, Ruth W. Bullerman, Hazel Scott, and James T. Keller.

Specialty Transformer Div. 94: Nicholas J. Jett, Fay A. Nicholas, Karl Kiel, John R. Darnall (two awards), Novella M. Pape, Catherine Parkins (two awards), Edward Lauer, William E. Braun, Phillip Shulze, Edward J. Murchland, Lester B. Redding, Raymond H. Horstman, Anthony M. Lupe, and Thomas L. Freeman.

Danville Plant: Dolores Ghibaudy, William Rucker, Floyd Smith, and Charles A. Gruber.

Wire and Insulation Div.: Robert E. Baals, Amel D. Beck, Robert L. Pickett, Katherine Johnson, Russell L. Flaugh, Priscilla A. Thrasher, Carl M. Junk, and Hans K. Muller.

Motor and Generator Div.: Ralph Garrett.

General Service Div.: Franklin W. Jacobs, Edmund J. Bauer, and Harvey Weikart.

Black Receives $25 Award

Paul Black, Transformer Div. 93, recently received a $25 Suggestion award. His idea called for an improved method for testing open circuits.

PINOCHLE CLUB HOLDS REUNION

About 25 years ago a group of men working in Bldg. 4-5 organized a pinochle club which met monthly for several years. But as time rolled on and divisional moves were made they became separated and the club disbanded.

Friday, May 20, it was decided to have a reunion. It was held at the home of Eric Hellwig on Courtland Ave. Of the original group of 16, 12 are still employed at G-E and all but one are members of the Quarter Century Club.

They have a combined service record of 363 years. One of the group is deceased; one employed at another local industry and only one's whereabouts is unknown.

The evening was spent reminiscing of old times and playing euchre since there were no pinochle players in the gang.

G-E Workers

(Continued from page 1)

City officials then requested G-E representatives to do everything possible to hasten completion of a new 900 horsepower, 720 rpm, synchronous motor already on order.

Start Working at Midnight

After several exchanges of telegrams, R. M. Hartigan, Manager of Manufacturing for the Large Motor and Generator divisions, was reached here by telephone at 10 p.m. Mr. Hartigan got some extra crews together about midnight.

The men located a motor which would do the job, but it was being prepared for another order. Another catch was that it was anywhere from 5 to 10 days from completion. In fact, one end of the motor hadn't even been assembled.

They worked all day and night Tuesday, and completed it Wednesday morning about 9 o'clock.

Job Finished in 10 Hours

The last castings were machined the motor assembled, and the test group completed tests—all in only 10 hours, a job that usually requires several days.

"Everybody did a remarkable job in my opinion," Mr. Hartigan said later. "I can't say enough to praise those fellows. They really pitched in and worked."

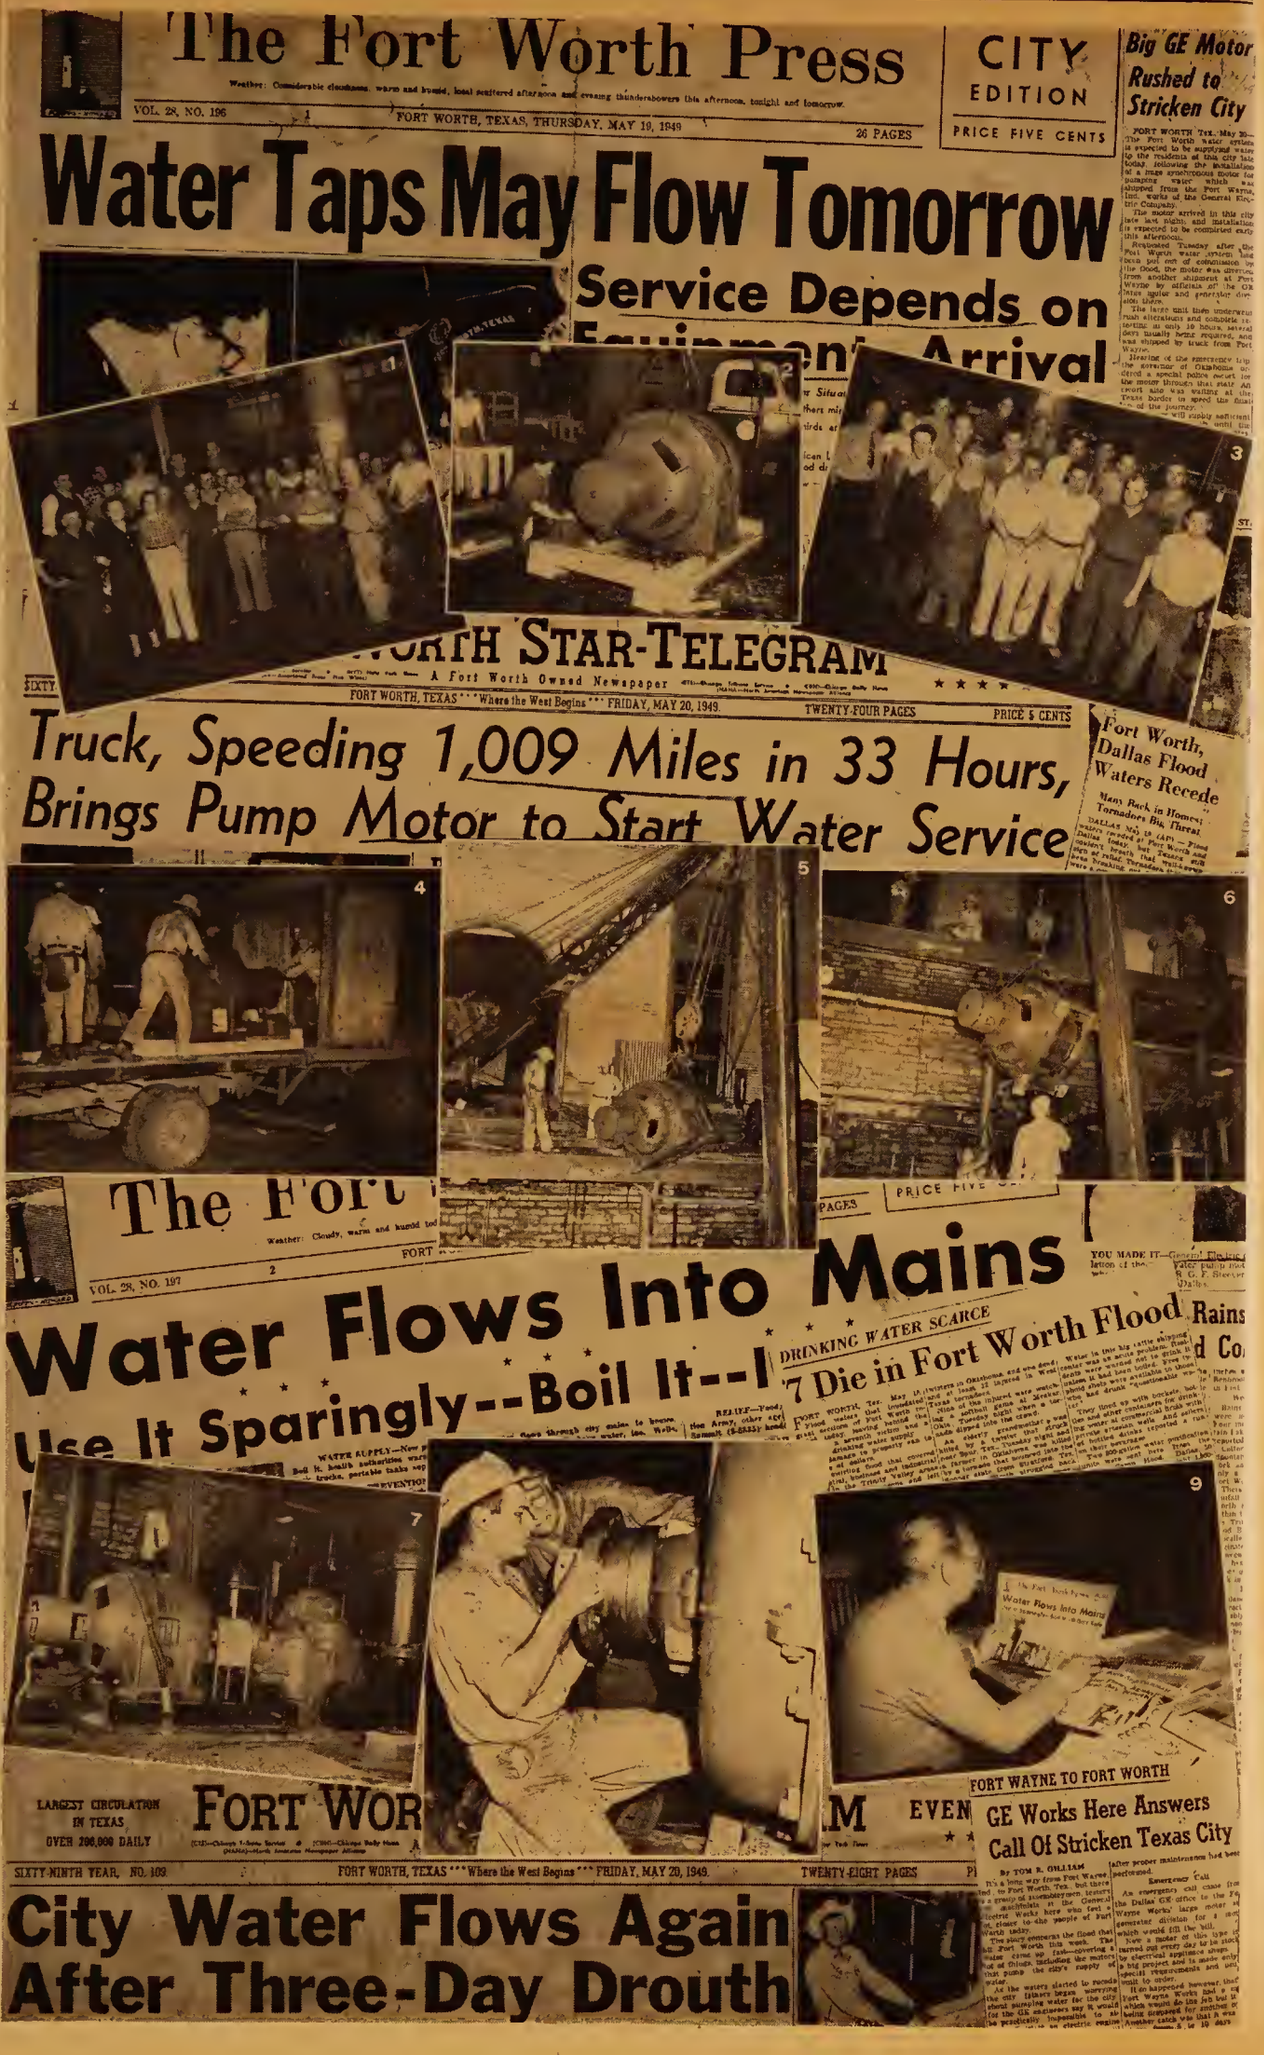
The next problem was one of transportation. The motor weighs 10,000 pounds, has 900 horsepower and 2,300 volts. It is about 50 inches high, 50 inches long and eight feet wide.

Truck Speeds Motor to Texas

Too heavy and compact to be flown, the motor was sent by truck. A local trucker rushed it to Indianapolis, where a trucking firm solved some difficulties concerning regulations about driving a truck straight through to Fort Worth by putting a special relief driver on the job.

Victor Brown, the truck driver, said he drove 55 and 60 miles an hour most of the way.

Hearing of the emergency trip, the governor of Oklahoma ordered a special police escort for the motor through that state. An escort also was waiting at the Texas border to speed the final lap of the journey.



The truck made a record run of over 1,000 miles in 33 hours, arriving in Fort Worth at 12:40 a.m. By 7 a.m. installation and wiring was completed. Grimy workmen stepped back and grinned—their work was done.

The motor turned over perfectly. Soon water was flowing from the taps of homes throughout Fort Worth for the first time in three days.

A photographic account of the story is shown at the right:

(1) Fort Worth, Tex., got its water system back in operation in record time only because of the hard work and technical know-how of a bunch of guys and gals at the Fort Wayne Works. A part of the crack crew that worked on the motor includes the following from the first shift: (l. to r.) First row—William Grider, rotor assembler; Bernadine Mailand, AC coil taper; Anna Fairbanks, DC coil taper; William Kaiser, rotor assembler; Al Deininger, machinist; Ollie Fox, rotor coil winder; George March, armature winder; Otto Rusch, balancer, and George Zeis, AC assembler. Second row—Guy Miller, exciter assembler; Osmer Eix, oven

MODERN PAUL REVERE

Speeds G-E Motor Over 1,000 Miles To Fort Worth, Texas, In 33 Hours

Police sirens sounded a tocsin to Fort Worth, Tex., residents of "to faucets, to faucets, the water is coming" as a big truck bearing the city's new water-pump motor rolled into the town at 12:40 a.m. last Friday.

Riding hard in the saddle, as he had been for more than 32 hours and 1,009 miles, was General Electric's modern Paul Revere—Victor Brown.

Brown, an independent truck driver from Indianapolis, had climbed into the cab at 4 p.m. Wednesday, after the G-E motor was loaded into his truck. He had stopped once at noon Thursday for a 15-minute meal. The rest of the time he kept rolling.

"It was the most important cargo I ever hauled," he explained.

When arrangements were made through the Governor of Oklahoma for a police escort to meet the truck at the Oklahoma-Missouri boundary, there was no way of informing the truck driver. Brown stated that shortly after leaving Springfield, Mo., he heard via news broadcast on his truck radio that "a truck bearing an urgently needed motor was being rushed to Fort Worth, where the people had been completely out of water for three days." He realized that meant him, and from that point on he tried to increase his speed insofar as safety permitted.

Truck Misses Escort

Entering Oklahoma via a short-cut, Brown missed the waiting police escort. Until 8 p.m. Thursday night he was among the missing as far as Oklahoma police, Texas police, Fort Worth officials, representatives of the Yellow Transit Company, or General Electric personnel were concerned.

The first Brown knew of his motorcycle escort was when he was stopped by a sheriff about 20 miles north of McAlester, Okla., more than half way across the state. Brown says that he had been exceeding the speed limit and when stopped got ready to pay a fine He really began to get worried. however, when the sheriff told him that he was wanted by the Oklahoma State Police. He asked the sheriff what for and learned then for the first time that a motorcycle escort was awaiting him.

Brown said from then on the going was fine. He pushed the truck along as fast as it would go and on one or two occasions, when he could take his eye off the road long enough to glance at the speedometer, he was hitting 80.

Arrives in Fort Worth

A new patrol picked up the van every 25 miles without slowing the cargo and a wailing, three-motorcycle, police escort swept the speeding truck into Fort Worth at 12:40 a.m.

Brown climbed stiffly out of the cab, and said he felt "fine." He watched the motor lowered into the pit, and then went to a hotel to sleep.

Proclaimed a Hero

The next morning Brown woke up to find he was a hero. The Chamber of Commerce had a dinner planned for him, calls from newspapers and television were waiting.

He was amazed to hear that the motor went in operation at 9 a.m., but added, "that was a real motor I brought in."

And before he left Fort Worth, he told friends he was "going out there and watch that thing operate a while."

PINOCHLE CLUB HOLDS REUNION

About 25 years ago a group of men working in Bldg. 4-5 organized a pinochle club which met monthly for several years. But as time rolled on and divisional moves were made they became separated and the club disbanded.

Friday, May 20, it was decided to have a reunion. It was held at the home of Eric Hellwig on Courtland Ave. Of the original group of 16, 12 are still employed at G-E and all but one are members of the Quarter Century Club.

They have a combined service record of 363 years. One of the group is deceased; one employed at another local industry and only one's whereabouts is unknown.

The evening was spent reminiscing of old times and playing euchre since there were no pinochle players in the gang.

There has been a new addition to the Hamrick homestead. Iola reports the pussy cat had five kittens. That's a lotta mouse catchers around. . . . Toledo had several Decatur visitors over the week-end. Cecilia Noonan, Effie McGill, and her family visited relatives there. . . . Joe Craig has resumed work on the flange line. The Switch Section sure missed your frequent glances. . . . A nice bouquet of flowers was sent to Veda Egley from her section. She is recuperating after a recent operation. . . . The Van Wert air show proved a success according to local reports. Two G-E pilots flew their own planes to the show, "Silent" Smith and his two children flew their Aeronca to the event. The children sure enjoyed the pop and popcorn. Josephine Ivetich and a passenger flew the Piper J-3 to the maneuvers. . . . To Wilbur Suman we extend our deepest sympathy on the loss of his father. . . . Harvey Koos is reported on the sick list. A speedy recovery is extended to you, Harvey. The line misses you. . . . A new gadget should be suggested to Effie McGill when swatting hees. By now the bump from the stinger should be relieved. Effie sure got a stinger after Cecelia demonstrated the swatting method. . . . Earl Mounsey and family and Joe Railing and wife were Van Wert visitors Sunday. . . . A new hand in Plant 2 is seen knocking paint off of stators. He's Leo Hoffman from Plant 1. . . . Talking about treats, Eddie tops the list, we see he's been passing chewing gum to a few girls. Florenee, how did you get along with your chawing stick? . . . Frank Gillig is off for a couple weeks as his wife is sick. We all hope she gets well soon. . . . To hear Ezra talk about spring housecleaning you'd think he didn't consider the idea much too good. . . . The girls will sure miss Marcia Martin. She was one of our ardent GeCode Club members, participated in G-E bowling team and activities. . . . Ray Johnston spent the week-end in Wheaton, Ill. . . . Chet Kleinknight saw Cincinnati play Brooklyn in a double header at Cincinnati last Sunday. . . . Who has more trouble in digging a well than Mr. Lankenau? . . . That's quite some bet George Buckley has with Mr. Welch regarding Mr. Welch's lawn. . . . Congratulations, Ray Moser on your $5 safety award in driving. . . . We understand Roger Schuster is going to Chicago over Memorial Day week-end to attend a wedding and may also take in a baseball game. . . . The noon it rained so hard just when the office went to lunch wasn't so nice for Ray Leitz, Jim Staley, and Lohnas McIntosh. It seems they left their car windows open—result—wet seats. . . . After all these years Abe Richert found out that DeSoto's also must have gasoline in order to run. Abe found that out recently, when he ran out of gas on the way to work and had to walk several miles to and from a gas station. S'all right Abe we have all had that experience at sometime or other.

Patent Counsel Visits Here

G. P. Tarleton, Patent Counsel for the Apparatus Department, visited the Specialty Transformer division this week to investigate a number of patents.

Three Graduate From Apprentice School

R. C. Sebold

Richard C. Sebold is a recent graduate of the Apprentice School's machinist-toolmaker course. A graduate of South Side high school, he was a member of the National Honor Society and the four-year honor roll.

Entering the Apprentice School April 30, 1942, he left in January to enlist in the Army Air Corps. He was assigned to the Quartermaster Mechanics School at Camp Lee, Va., and served three years in that division of the air corps. Mr. Sebold had 32 months overseas duty in Australia and the Philippines. He was in the Battle of Leyte and received the Bronze Star.

After his discharge in December, 1945, he completed one year of engineering at the Purdue University Extension. He re-entered the Apprentice School Oct. 17, 1946.

Mr. Sebold is married and lives at 1113 Park Ave.

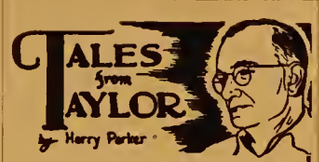
D. W. Meyers

Delbert W. Meyers recently graduated from the machinist-toolmaker course of the Apprentice School. He was a four-year honor roll student at Central high school.

He entered the Apprentice School Aug. 20, 1942, as a machinist-toolmaker apprentice and left in January the following year to enter the Army. He was in the military service for 38 months.

Mr. Meyers was assigned to the signal corps' training school at Fort Monmouth, N. J., and later at Brooklyn (N.Y.) College. He saw overseas service in the South Pacific and received the American Defense, AP Service, Good Conduct and Victory medals.

He re-entered the Apprentice School following his discharge in 1946. Mr. Meyers is now taking a course in engineering at the Purdue Extension. He resides at 1311 Wall St.



L. N. Brunner

Louis N. Brunner recently graduated from the Apprentice School. He is a 1942 graduate of Concordia high school, where he received the Walther League medal for leadership, scholarship and character.

He entered the Apprentice School in July, 1942, and left in March, 1943, to enlist in the Army. Shortly after his enlistment, he entered the University of Michigan and later went to infantry officers' candidate school at Fort Benning, Ga.

Mr. Brunner saw overseas duty as a liason officer and later battalion adjutant in Japan. He received the Asiatic Pacific Theater Ribbon and Army Commendation.

He was a first lieutenant when he was released from active duty in 1946, at which time he re-entered the Apprentice School. Mr. Brunner is married and lives at 4409 S. Park drive.

One of our pensioners whom we have not had the pleasure of seeing for more than two years is our very own Field Marshal Conrad Hohnholz. Some of the boys run into him occasionally and he always asks about all of us here at the plant. We all would be glad if he would pay us a visit, but why the old pup does not show up here is more than we can explain. Here is hoping that he reads this and accepts it as an invitation to come and see us. . . . Our boat enthusiasts have begun to show activity. Last Sunday Art Brandenberger launched his new craft at Big Long Lake, but there was something radically wrong with it. She listed to the starboard too much, so Art had to remove it from the water and make preparations for returning it to the maker. Our other one, Ward Grim, has obtained a new water skimmer for use on Lake Papakeechie, but as yet has not announced when launching ceremonies will take place. . . . When Basil Bowley reported for work Monday morning there on his desk was a nice big mess of freshly caught crappies from Bear Lake. We are all wondering who the donor might he because we would appreciate a niee mess of them for ourselves and would like to have him bring us some. . . . Peggy Ruch times herself in the morning by radio programs. First of all she is awakened by a certain broadcast, and then when another certain one comes on she knows it is time to leave for work. The other morning she was awakened at the usual hour, but her cat which had slept all night on top of the radio stepped down and in doing so happened to step on one of the push buttons changing the station. Peg listened intently for her usual home-leaving program, but it did not come on. Glancing at the clock she realized that the hour was getting late with the result that she eame very close to being late for work. . . . Now we know that Archie Boren, our Huntertown flash, is becoming absent-minded. He reported for work last Monday morning, but the place was dark, not a soul was in sight. Realizing that he had made a mistake he put in a eall to Huntertown and had his wife drive in and get him. . . . Two of our former colleagues, Paul Wilcoxson and Charlie Odom, are busy these days working on apartment house construction. Charlie called on us the other evening to show us his new car. He told us that he was so awfully busy these days that he just had to trade his old car for a business coupe.

Robert Kessens Is Elected President Of Stamp Society

Robert W. Kessens, Taylor St., was elected president of the Anthony-Wayne Stamp Society at a meeting Monday night at the YMCA. The annual banquet was held Wednesday at the Colonial Restaurant. Henry Wittber was in charge of the arrangements.

Amanda Doty, we have a complaint that your name never appears in this column. It doesn't look bad in the headlines at that, does it, Amanda? . . . Notice To All Fishermen—Mary Cordell is starting a fishworm farm. To help the cause her co-workers donated a jar of fishworms and also a banana to feed them until she could get them bome. She is sure that by vacation time the business will be in full operation, and your patronage would be appreciated. . . . Don Shepherd has a neat way of getting free ice cream cones for himself and friends. Last week the treat was on Hazel Scott. Never let money lay around, Hazel, or haven't you heard that it is the root of all evil? . . . Dorothy Campton is happy and can whistle while she works. She's back home again in the repair section. . . . We say farewell to Irene Huey. She was presented with a gift for herself and one for the little bundle she is expecting from heaven. The best of luck to you, Irene. . . . Eldon Stanley, Donald McCrea and Ray Loveless were so busy working on individual piece work that they forgot to make out their time. You want to watch it, boys, you better let the time clerks in on the secret of how much you are making. . . . Cliff Devault went fishing, and with his luck running high, he kept a perfect score. When he reached the mark he rowed to the shore. He told his wife the fish were biting swell and that he had caught the limit. When he pulled the sack out of the water he only had two fish left. We know the lake he was on. Now what we would like to know is, was he catching the same two fish over and over? . . . We wonder where George Brehm got that dainty little piece of cloth he uses to clean his glasses. . . . Cora Bucher attended the tulip festival and we were told she took her wooden shoes so she could participate in the dance. . . . Wanda Grimm gave us an exhibition of the jitterbug to prove that it wasn't a dance created just for the skinny people. . . . Lola Brunner is eating rye crisp, and we give her this warning. Never set your box of rye crisp on the same shelf with the dog biscuits. . . . Mary Codell is allergic to penicillin. She took it for a cure and now she is looking for a cure for hives. . . . Frances Leach would like to have some one to teach her how to pick a lock. She had herself locked in the house, believe it or not, and had to wait until her husband came home to open the door.

Office Offerings

Christ Starke, through the influence of Ray Scheibel, finally got up enough nerve to wear a bow tie to work. We agree with Ray, you are truly the bow tie type, Chris, but seriously, do you suppose that's why it poured down rain all day? . . . Corky Cockburn and Dorothy Andrews are leaving our gang. Good luck, girls. . . . Someone donated a pair of overalls to Willard Lenz. He says he can't wear them though. . . . Ray Scheibel earied his raincoat for three days. On the fourth day he left it in his hotel room and then the rains came. He should have more patienee with the weather man even though it does take four days for his predlctions to come true.

Our good friend Bill Rohe and Bill's neighbor Mart Einsiedel have for the past several years been running in competition as to who has the best garden. This year Bill definitely decided that he was going to raise the largest tomatoes or bust. Bill put his tomato plants in very carefully and as a fertilizer used fish scales, heads and what-have-you. All went well until the neighhood cats found out that Bill not only planted tomato plants but also fish. The plants were dug out of the ground and the fish heads were digested by the cats. Our suggestion, Bill, is that you cement the plants in from now on. . . Leo Elward wishes to take this opportunity to thank all of his coworkers for their wedding gift.

Insulation News

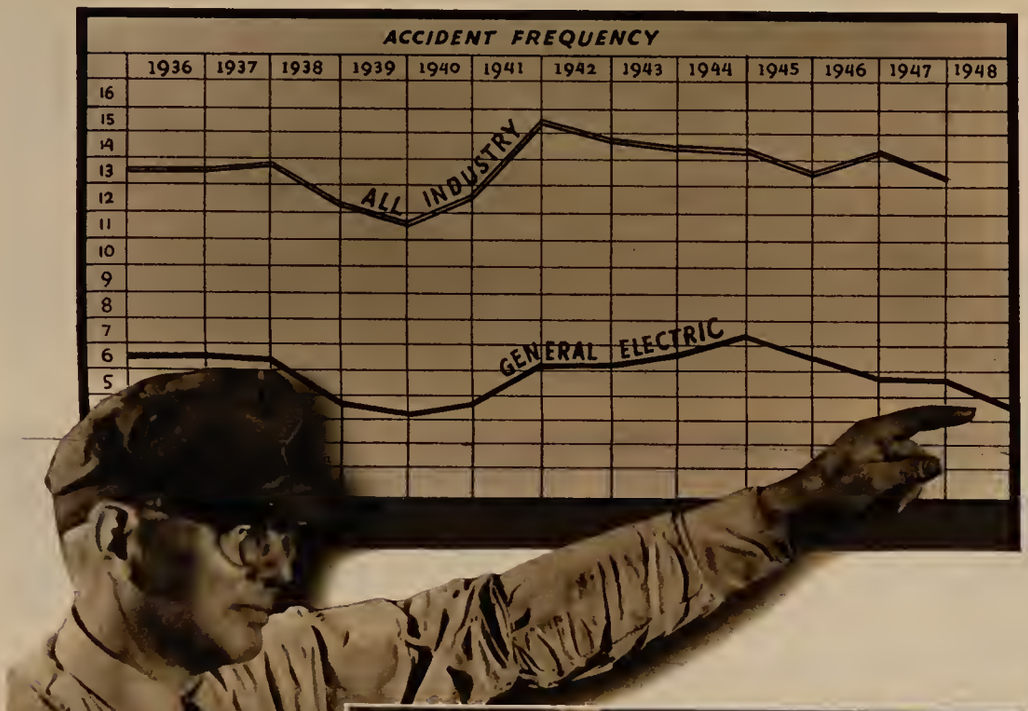
Now that we're moved to Bldg. 12-3, we don't think Joe Kramer will live to enjoy it. He's been working so hard that we all figure he's not long for this world. It seems. that everyone has adopted the motto, "If you want to know, just ask Joe," until he has turned into a one man moving crew. What we want to know is what we need with all those other people when Joe, (better known as Joe, Sr.) is around? . . . Most people like to see how little they can eat and still stay alive, but Bill Glenn is just the opposite. He likes to see how much you can eat and still live. He has many favorite foods, but his favorite drink is warm orange juice.

GENERAL ELECTRIC
NEWS SUPPLEMENT

Candid Camera

VOLUME 14 MAY 27, 1949 No. 5

SWINGING HIGH . . . Grace Byrnes (right), Turbine Accounting, Schenectady, found this 5-tan crane o navel perch at the stockholders' meeting held in the new Turbine building at Schenectady. Abave, Eileen Jenne, President of the G-E Waman's Club serves Charles E. Wilson, President of General Electric, af the luncheon served ta all stockholders. In the background, Mabel Cornwall, Works Loboratory, pours coffee. An estimated 1500 were at the meeting, believed to be the largest crowd ever to attend any G-E stockhalders' meeting.



HOLLYWOOD INFLUENCE . . . The DeKalb, Ill. Plant now has its own Oscar, G-E Joe, to be presented to the department showing the best records in quality production, safety, housekeeping and scrap reduction. Looking approvingly at Joe ore, from left: Harriet Peterson, Mary Twait, Myrle Luoma, Oneita Roberts and Marie Stover.

40 YEARS SERVICE HONORED . . . Mary V. Donahue, of the West Lynn Works, has just completed 40 years with General Electric. When her ca-warkers leorned af this, they surprised her with a gift and beautiful flowers. She was also presented with a pin and certificate honoring her 40 years of service. Miss Donahue joined the Company in 1909 as an inspector on wiring insulation.

THE FLOWERS THAT BLOOM IN THE SPRING, TRA LA . . . Pretty girls and blossoms alike are a welcome springtime sight. Adding plenty of color ta a backdrap of cherry blossams are these lovely lasses from the Switchgear Divisions, Philodelphia. From left ta right: Terry Schlenz, Marie Farley, Stello Brown and Jean Goebel.

Teamwork Is S

A recent review of General Electric's safety record during the past thirteen years brought to light some interesting and gratifying facts. As shown on the chart (upper left corner) G.E. has made steady progress in improving its safety record. Also, G.E. has consistently maintained a much better record than industry as a whole.

This situation has come about as a result of splendid teamwork on the part of employees and management, with safety committees playing an important part. Pointing with pride at the chart is veteran Quarter Century Club member George Gaines, Schenectady Works, who has never lost time as a result of an accident during his 37 years with G.E.

Our Candid Camera photographer decided to do a little research to discover some of the activities which contribute to the maintaining of this safety record. The result is shown on these pages. The activities pictured here do not represent exceptional performances but instead are examples of similar functions which take place in G-E plants across the nation.

As we review the G-E safety activities, it might be appropriate to quote from the booklet SAFETY IS PART OF YOUR JOB, the following: "The best safety program in the world is ineffective unless each individual is constantly alert to avoid accidents."

At Pittsfield, in the high-voltage warking oreas, the employees are given monthly practice in emergency rescue work. A typical rescue squad is shown during a session. From left to right are Lloyd Sherman, Larry Peterson, Percy Goodrich, and Don Shepherd, as they brush up on the use of an inhalotor. Their "victim" is Ray Hitchcock. Such precautionary meosures pay dividends whenever an emergency orises.

←The use of proper safety equipment is alwoys stressed. Here, at the Pittsfield Apporotus Works employees' store, experienced shoe fitter Pat Mohon serves Harry Hubbord, craneman, o regular safety shoe user.

At Syracuse, Safety Engineer Don Willioms inspects safety device for riveter before its use by operatar Nellie Skuce. The device wos designed and made at Electronics Pork.

Many novel stunts are used to dramatize the G-E safety program. Here we see Bob Burchell, left, Section Safety man ot Syracuse, demonstroting the new Electronic safety man to Ted Jamro. When a wired mat is stepped on the Electronic man gives out with a safety message.

An important phase of the G-E safety progrom is the continuing check-up for health hazards which involves testing samples af a wide variety of meriols. Gordon Ginther, Pittsfield Chemical Department, analyzes a sample of oir from the plating roam.

Secret of Good Safety Record at General Electric

Another Bridgeport safety practice is the periodic checking on employee health in the mercury switch section. Laura Goff, technician, is shown taking a blood sample from the ear of employee Irma Cook.

In the new Construction Materials Department at Bridgeport the foremen are taking a vital interest in promoting safety among their employees. At periodic intervals yearly the foreman, with the aid of charts and other props, reviews general safety principles with his section. In this picture Peter Chopsky explains the five-point safety program to, from left, front row: C. Tyler, T. Jessel, S. Gross, F. Raino; second row, G. Toth, L. Ryan, F. Mensch, and F. Parsons. Standing is Otto Haury, a long-time safety booster.

←G-E safety engineers work in close co-operation at all times with the manufacturers of various types of safety equipment, to make sure that the latest and best items are available to employees. At left, Rita Downing, home laundry section, wears "feather specs."

The importance of constant attention to good safety practices is outlined in the booklet SAFETY IS PART OF YOUR JOB. Here, Louis Maselli, foreman in the Apparatus Training Section, discusses the subject with Robert Ziegler, who is starting his training at Schenectady.

Safety committees at Fort Wayne, composed of division employees, make regular tours of inspection. Shown above is the committee from FHP Motor Div. 14 inspecting the punch press section. Left to right are C. Heemsoth, W. Skevington, J. Anspaugh, R. Vaughn, M. Vonder Haar, R. Bultemeier, G. Angel, and A. Weisenburger. At the machine in the foreground is J. Devaux. Division 14 has just established a record of 2,536,280 accident-free hours in 2½ years.

The shop safety committee program at Fort Wayne Works plays an important part in maintaining the excellent safety record. FHP Motor Div. 33 enters its seventh accident-free year as the committee meets for discussion. From left: C. Imbody, Jr., C. Elder, chairman, C. Koepke, E. Laymon, C. Dimke, O. Surface, H. Deister, G. Miller, and H. Drage, secretary.

Candid Camera

MR. PITTSFIELD . . . In addition to this new title won at first annual Monarch Physique Club competition, Fred G. Huddy, left, of Pittsfield Works, has previously won titles of Mr. Springfield and Mr. New England. Second place winner was A. D. Mellillo, center, of North Adams, Mass. At right is L. L. Phelps, also of Pittsfield Works.

TOP-TAKER . . . Thomas J. Foster of Electronics Pork, Syracuse, is congratulated by C. A. Priest, left, Manager of the Transmitter Division and George Endrich, head of Transmitter Test, for his $1000 suggestion, the highest award ever made at Syracuse.

G.O. MERMAIDS . . . Taking time out (above) for one more ducking under the shower after their participation in a swimming ballet are Rosemarie Budka (left), and Regina Penichter, both of the General Office. The ballet, sponsored by the Y.W.C.A. of Schenectody, featured many General Office girls. The program included formation swimming, costumed numbers, comic acts, waltzes, and high diving.

ON THE LIGHT SIDE . . . Singing waiters highlighted the entertainment at annual "Night in Virginia City" party held at the Honford Works in Richland, Woshington. Known as the Richland Meistersinger quartet, they are, from left: K. E. Webster, Ben Wilson, C. J. Sheeran, and O. C. Schroeder. A letter from the Mikado is discussed (right) by, in usual order, Pish Tush (William Braymen), Ko-Ka (Robert Rowell), and Paah-Bah (Richard Riegel), at Hanford Works where Richland Light Opera Company produced Gilbert and Sullivan's "Mikodo."

Any day now we expect to see Mr. Seymour have a chauffeur pick him up at the Fairfield lot after work. One need not be surprised if "the man" unrolls the green carpet, then gets out the whisk broom and brushes Cy off. In case of doubtful meaning of this run on words, Mr. Seymour bought a Lincoln this last week. . . . An organization has been formed by Gerry Holdgreve and a few others who are charter members; it is T.S.F.T.P.O.S.C.O. Not a barber shop harmony group, but a protection against Seidel and Seymour, men of Lincoln distinction. The alphabetical alliteration simply means The Society for the Protection of Small Car Owners in Bldg. 17-4. The last meeting minutes read something like this: It is unanimously voted that refueling tanks and tow ropes will be carried between gasoline depots to assist in any way possible the men who have by virtue of their own expenditure of wealth, taken unto their possession a large car, namely a Lincoln. . . . We wonder if Carl Swaim has leaped over any more picket fences? . . . Herb Ufheil is in the market for new brakes, we hear. He had some little difficulty with a garage wall recently and has decided to invest in brakes. . . . Our sympathy is extended to Clarence Wickliffe in the death of his father. . . . Clara Gehring surprised the gang with the announcement of her marriage. Congratulations and best wishes from the gang. Also our thanks for the treat. Oh yes, that reminds us, who said women can't keep secrets—Clara did! . . . When Les Stuach and Don Kruse are seen together this famous query arises, "Which one has the Toni?" Ray Solga would like to know if you have to have a hair cut before you get a Toni, in case you don't know he wants one! . . . The second scheduled hall game was rained out. So our team didn't lose any ground. Norb Lose came prepared to give his all. He was so disappointed in not getting to play that he stayed in Fort Wayne a while longer hoping the field would dry up. . . . Mel Azar, who has just left the gang, has been employed by Mike Lowe to bring charges against certain individuals in Bldg. 17-4 for making libelous and insinuating statements about his brand spankin' new (1949) Martin 40 outboard motor. Mike will post $1 against any taker (or faker) who thinks his Johnson 2½ will out-perform Mike's Martin. Come on you guys, put up or else. . . . Congratulations from the gang to Mr. and Mrs. Carl Hattendorf who recently celebrated their 25th wedding anniversary. . . . Did you ever stop in the middle of a laugh and wonder what life could offer if laughter was taken away, and the joy of provoking mirth and good clean fun would close? Anyway this fellow who sticks a bit of humor in this column from time to time would like to leave something with you. A few years ago when he was overseas, his mother sent him this prose. The source and author are unknown, perhaps you recognize it—"A smile costs nothing, but gives much. It takes but a moment, but the memory of it usually lasts forever. None are so rich that can get along without it, and none are so poor but that can be made rich by it. It enriches those who receive, without making poor those who give. It creates sunshine in the home, fosters good will in business and is the best antidote for trouble. And yet it cannot he begged, borrowed or stolen, for it is of no value, unless it is freely given away. Some people are too busy to give you a smile, give them one of yours. For the Good Lord knows no one needs a smile so badly as he or she who has no smiles left to give."

Greetings to Vier Johnston and Bill Ort who celebrated their birthdays last week. . . . Ben Bennett tries to discourage the gals from going fishing for catfish. He says the girls are so tired out they're hard to get along with on the next day. . . . Max Baron, to hear him tell it, is the world's fastest when it comes to mixing and pouring cement. There are those who somehow doubt his word and it looks like he might have to prove it. . . . After working together for several years Dee Confer looked at Harry Anderson one morning recently and discovered that Harry was wearing glasses. Dee questioned him only to find that he's heen wearing them for 20 years, so now Harry thinks Dee is the one that really should be wearing glasses. . . . If the column seems a bit short it may be because one of the reporters has been intimidated. Paul Kennerk, whom the boys call Nosey-newsy, says they've got him too scared to talk.

Driftmeyer Dies

L. H. Driftmeyer

Lawrence H. Driftmeyer, 50, died at 7:10 p.m. Sunday, May 22, at the St. Joseph's Hospital following an illness of 10 days. He lived at 244 E. Woodland Ave.

A methods and equipment specialist in the Transformer Div., Mr. Driftmeyer has worked for the Company since 1916. From 1924 until 1934 he was a foreman in that division.

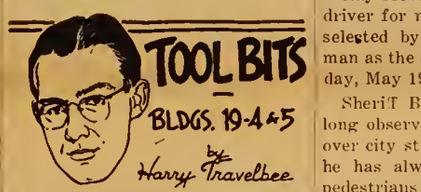
Mr. Driftmeyer received the Coffin Award in 1935 for outstanding work in tool design.

A veteran of World War I, he was a member of the Grace Evangelical and Reformed Church, the Quarter Century Club, Summit City Lodge No. 170, F. & A. M., Scottish Rite and Trinity Chapter of the Order of the Eastern Star.

Surviving him are his wife, Margaret; one daughter, Mrs. Don Reeves, of Plattsville, Wis., and one grandchild.

Funeral services were held Wednesday at 1:30 p.m., the Rev. John W. Heistand officiating. Burial was in Lindenwood Cemetery.

Sheriff Presents Safety Award To G-E Truck Driver In Decatur



Sheriff Herman Bowman presents Decatur's Safe Driver Award to Ray Moser.

In a campaign by the Deeatur Chamber of Commerce, the city accentuated safety on the street during the week of Monday, May 16. Each day someone selected a safe, eourteous driver and two pedestrians who showed respect for the traffie laws. Local merchants awarded cash and merchandise prizes to the winners.

Ray Moser, a Decatur G-E truck driver for more than 15 years, was selested by Sheriff Herman Bowman as the driver of the day Thursday, May 19.

Sheriff Bowman stated, "I have long observed Ray Moser's driving over city streets and highways and he has always shown traffic and pedestrians every courtesy. His driving is an excellent example of safety behind the wheel."

In accepting the award, Mr. Moser said, "It's part of all our jobs to work safely. Personally, I try always to remember that I control lots of power. If I'm careful and keep it under control, it helps me. If I get carcless and lose control, it's likely to break my neck."

Congratulations, John Hensler. He became a grandfather May 17, the first one in his family. . . . Don Alcott and family visited the Toledo Zoo and from what we hear, Don had a tough time getting away from the cages. Don claims that the monkeys really fascinated him. Anyway Don says that a good time was had by all. . . . Kenny Sefton is mighty proud of that Kaiser, or at least he doesn't want any roof repairman dropping hammers and nails on it. Kenny looked out of a Bldg. 19-4 window and spied a fellow repairing the roof on the garage where he conceals his pride and joy. . . . Herb Mennewisch and John Hensler swapped instruments at a recent jam session. John played the bass fiddle and Herb played John's banjo. You guessed it, all the neighbors' cats and dogs left town. . . . Woody Hursh spent a wet Sunday at the 500 trials in Indianapolis. He thought they could have held motor boat races much better. . . . Mr. and Mrs. Lloyd Welbaum have announced in the local newspapers the coming marriage of their daughter, Mary Lou, in June. Congratulations, Lloyd. . . . The side line of the week is Kenny Doell's sending questions to all the radio quiz programs. His questions are guaranteed to stump the experts. . . . Welcome back to work, Dave Lewis. You sure are looking good. . . . Jim Pugh is thinking about buying his dog regular dog food as it seems his dog has a desire to chew up everything in the house. The latest item on the menu is the kitchen linoleum, and Jim seems to think that his house isn't big enough for him and the dog. Mayhe a good balanced diet will solve your problem. . . . Myron Auer attended the regional track meet at Kokomo Saturday and still thinks that the Central team is tops. . . . A recent amateur program at the Bethlehem Church brought out some of the hidden musical talent in Paul Brinkroeger. Paul claims he had a little stage fright along with getting a spider out of his shirt. Paul had the kids down in front frozen to their seats. They actually thought he was Borah Mennavich or alias Larry Badler. . . . Gene Dennig reports that the St. Mary's river is almost running through his barn yard. He stands on a raft to milk ole Bess in the morning. . . . Al Stecker is having open house in his new cottage. Paul Weaver says he will handle all the overflow crowd and all the free beer. . . . We saw Swede Moser and family in a canoe on Lake George in that near tornado. He said they did get a little damp, but they weren't scared. . . . That is a nice sketch of Ed Shafenacher we saw in the west end of Bldg. 19-4. Although it does resemble President Truman in almost every respect. The question is does Truman ever blow his top?

"Nations drift into war; they must be guided into peace."

Paul Traub was busily engaged the other day showing some of his men how to tie a necktie. It was a double knot (or somethin') and it looked good. . . . Dale Springer entertained his bowling team with a party at his house. . . . Steve Sallot was back on days for a short time and had to wear lark glasses to protect his eyes from the bright sunlight. . . . Ted Roehm was bragging about the haul of bluegills he made at Big Long Lake. The fellows want to know about the skunk up at Rome City last winter though. . . . We extend our sympathy to Nolan Geyer in the death of his sister and also to Raymond Scherer in the leath of his father. . . . The big question in the tool room these days is who is working and who isn't. The fellows are in and out so fast that you can't keep up with them. . . . We say so long to Harry Haley again. Hope you will be back again soon. . . . Boh Rehrer is always having a lot of good luck fishing when he goes alone, but he never seems to get any when someone is with him. Bob isn't the only one who has that kind of luck. . . . Ed Meyer's son and family are spending the holiday week-end with him from Arlington, Va. . . . John Williams has changed a little since the picture was taken that was in the WORKS NEWS last week. That was taken before John was a Democrat. . . . Ralph Walda is keeping the record business up and going. He bought three albums last week.

To be good, you must do good.
To keep the good, you must pass it along.

Ernie Brown celebrated his 25th year of service with G-E last week and received the congratulations of the group. He also received a very nice photograph. . . . Jack Pollock received an additional supply of pencils from several of the other tool rooms. News of that kind usually travels pretty fast. . . . Last week I forgot to mention that we have a new member in the arbor group, Ray Brown. It was my error, Brownie. . . . Last Friday Bob Maggart came in with a brand new hair cut and was it attractive. If he would have had some hair on top of his head, he'd have looked like the Last Mohican. Even his own family hardly knew him when he went home.

Birthday Greetings

Both Paul Armstrong and Ralph Solt celebrated the same day this week, and my good friend Bill John also celebrated another anniversary this week. . . . These Mondays off have their advantages for some people. Ed Smethers spent one Monday getting a plow hitch put on his new Hudson, now ready for lot plowing. . . . Ward Staley, our Hot Rod enthusiast, had two of his cars in last Wednesday giving several noon hour demonstrations with the aid of Ralph Dennison. Ward has some very nice cars.

A lie will go around the world before the truth gets its boots on.

MISS CYNTHIA: I am sure that you remember Margie Schwartz. We are happy to announce the addition of Cynthia Ann to the Schwartz household, Tuesday, May 17. Cynthia weighed 7 lb. 2 oz. She looks just like Margie too—lucky 'lil gal. . . . A-HA: We wish to welcome Hugh Folsom into the floor-sitters club. It hasn't been determined as yet on what basis the President of this club should be elected. We could measure the depth of the dent in the floor. . . . SEE YAH IN PICTURES: Ed Whipple was seen giving a splendid description of "something" in inches while talking over the 'phone the other day. Ah for the day when we can have a television effect on our telephones. Huh, Ed? . . . I'VE SEEN YOU SOMEWHERE BEFORE: Have you ever noticed the similarity between some of your friends, or possibly yourself to characters in the comic strips or the movies. One good example is Don "Mutt" Spaulding and Glenn "Jeff" Seabold. . . . RELAXATION: Helen Conrad enjoyed a pleasant week of vacation at home. She made a week-end shopping trip to Toledo, Ohio. . . . GRANDMOTHER: Abbie Hartman is a grandma for the second time. Congratulations, Abbie, and may you have many more. . . . WELCOME: To Nadine Junk in the Mimeograph Room. She transferred from Taylor St. . . . SHHHhhh: In spite of the editor's admonition not to ask anyone to see anyone, etc., etc., at times, it seems impossible for one to do anything else beeause it is impossible to obtain the whole story from anyone—or—it isn't printable. Sooo—anyone who didn't hear Jack Kurlin's story of how he had to walk home from work—see Jack. Anyone wanting to know about fish baits—blonde or redhead, see P. Motter. He is well informed. . . . NEW BUGGY: M. C. Oetting of the AC Drafting Section, has a new car. He traded his Pontiae in for a '41 Plymouth. . . . ANOTHER SQUEAK: Nancy Woodhull greeted a new visitor last week as she opened a drawer—Elmer (Mouse—that is.) . . . A Happy Decoration Day To You All—But Let's Not Forget What Memorial Day Should Mean To All Of Us.

Wickliffe Dies

Aldo Jay Wickliffe, 60, died at 12:30 p.m., Thursday, May 19, at his home, 915 Parkview Ave. He had worked in the Transformer Division since 1920, and at the time of his death was a connector and assembler in Bldg. 26-1.

He was a member of the Plymouth Congregational Church and the G-E Quarter Century Club.

Surviving are his wife, Anna B.; six children, Clarence W. Wickliffe and Mrs. Zola M. Johnson, of Fort Wayne; Ralph E., of Waynedale; Mrs. Blanche Isnogle, of Ludwig Road; Earl C., of the U. S. Navy, Memphis, Tenn., and Mrs. Clara A. Royal, of Marion; 11 grandchildren; two sisters, Mrs. Leo Symonds, and Mrs. Lulu King, Yoder; two half-sisters, Mrs. Effie Brandon, and Mrs. Fannie Burns, Ossian; and two brothers, Ernest and William.

Funeral services were held Monday at 3 p.m. in the Klaehn Funeral Home, Dr. Elmer E. Voelkel officiating. Burial was in Prairie Grove Cemetery.

ASSISTANT GENERAL MANAGERS NAMED FOR APPARATUS DEPT.

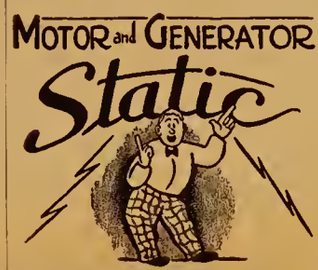
J. W. Belanger

N. M. DuChemin

John W. Belanger, Manager of the General Electric Company's Turbine divisions at Schenectady, and Nicholas M. DuChemin, Manager of the Company's Meter and Instrument divisions at Lynn, Mass., have been appointed Assistant General Managers of the G-E Apparatus Department, according to an announcement by Charles E. Wilson, Company President.

Concurrently, Henry V. Erben, G-E Vice-President and General Manager of the Apparatus Department, announced that Mr. Belanger and Mr. DuChemin will assist in directing operations of the department's product divisions, works service divisions and various works.

Marketing aetivities of the Apparatus Department will continue to function under direction of Chester H. Lang, G-E Vice-President in charge of Apparatus Department sales.



Assigned Divisions

Mr. Belanger was assigned the folowing divisions: Aeronautie and Ordnance Systems divisions, Large Motor and Generator divisions, Turbine divisions, all with headquarters at Schenectady; Schenectady Works Service divisions; Aircraft Gas Turbine divisions, Lynn, Mass.; Locomotive and Car Equipment divisions, Erie, Pa.; Erie Works Service divisions, Erie, Pa.; Switchgear divisions, Philadelphia; Transformer and Allied Products divisions, Pittsfield, Mass.; Elmira Works, Elmira, N. Y.; and Fitchburg Works, Fitchburg, Mass.

Mr. DuChemin was assigned the following divisions: Control divisions, Industrial Heating divisions, and Small and Medium Motors divisions, all at Schenectady; Lighting and Rectifier divisions, Meter and Instrument divisions and River Works Service divisions, all at Lynn; Fractional Horsepower Motor divisions, Specialty Transformer and Ballast divisions, Fort Wayne, Ind.; Fort Wayne Works Service divisions; Welding divisions, Fitchburg, Mass.; Oakland, Calif. Works, and Miscellaneous Products.

Swager Is Elected Vice President Of State Personnel Directors' Assn.

L. C. Swager, Assistant to the Works Manager, Labor Relations, was elected second vice-president of the Indiana Personnel Directors' Association at the organization's annual conference last week in Lafayette.

Thought of the week: "The Constitution does not provide for first and second class citizens."

NO OPINION: According to Bud Fisher, oracle of Bldg. 31-1, Jim Stouder made a startling discovery, one that might well ehange the course of human events. You can always tell when Bud has news, there is a twitch to his nose like a hound dog with a coon up a tree, a certain gleam in his eye, and a smug look on his puss. So when we saw him approaehing our desk displaying all these symptoms, we expected a story and got it. "Did you hear about Jim Stouder," he inquired when about three feet from the desk. "No," we replied, "What now?" "Well, sir," sez Mr. Fisher, "it seems Jim is planting moth balls in his yard to keep the moles away—last year they over-ran his place, and now there are none—they have all gone to the neighbors—that will make them awful mad, bet they sue him for damages—see that this gets in the WORKS NEWS."All this was in one breath and before we could interrupt or ask a question. If Mr. Stouder has made such a discovery, he is indeed a benefactor to humanity and entitled to a niche in the Hall of Fame, but we all know Bud and will await further developments before forming an opinion. . . . COULD BE: Jim Mitchell, proprietor of "Mitchell's Emporium" at Blue Lake announces that he is resuming his Sunday evening free movies. Sez Jim, "Tell the folks to bring their dimes, quarters and dollars and come up to our show, which is absolutely free." From the tone of his remarks, we are led to believe that the show may be free, but it will cost you to get away. Could he be getting mercenary?

Medical Memos

By Mary Heymann

The tribe of Wilsons seem to be celebrating birthdays. Dr. Leslie Wilson added another year May 22. Then the next on the list is Mabel Wilson (no relation to the doctor) who blew out the candles on her cake May 25. Now her aunt Mae Wilson Mulvane, R.N., was afraid she might be left out of the picture so she does her celebrating May 27! Happy birthday to all! . . . Dr. and Mrs. H. W. Garton journeyed to Milwaukee last week-end to attend the ordaining of their son-in-law, Louis E. Ulrich, Jr., in the Lutheran ministry following his graduation from Northwestern Lutheran Seminary in Minneapolis. . . . We are all waiting to see the pictures of the tulips at Holland, Mich., as taken by Dr. Harvey L. Murdock who, with Mrs. Murdock and friends, attended the Tulip Festival Saturday. . . . Olive Walters will attend the graduation of her nephew, Diek Walters, at the high school commencement Exercises at Ohio City this evening. . . . Industrial nurses of the northeast district held a Nurse-Management dinner meeting recently at the Chamber of Commerce. A very interesting and educational talk on "Industrial Nursing and You," was given by Jack Staehle, Public Relations Director of the Alden Company, Chicago. Each plant in the northeast district was represented by the plant nurses and management. The General Electrie nurses were happy to have as their guests I. H. Freeman, Personnel Supervisor, and Dr. H. W. Garton, Medical Director. . . . Definition: Rain—something that, when you take an umbrella, it doesn't.

I believe that it was Lafayette who once said " I read, I study, I examine, I listen, I reflect, and out of this I try to form an idea into which I put as much common sense as I can." That is splendid adviee for today. Personally I think our County Commissioners should study the above statement. I find it a little hard to apply to this column, but I will keep trying. . . . We extend to Mr. and Mrs. Chester Lichtenberg our sincere sympathy in the death of her mother, Mrs. Elizabeth Stein of New Rochelle, N. Y. . . . Charles Hooley and Mary Alice Girardot of Bldg. 18-3 recently returned following vacation week. . . . A. S. Johnson of Bldg. 18-1 is absent this week on "Military Duty" in Baltimore. . . . Edna Neiber, secretary to R. J. Hoffman, Bldg. 16-3, was the guest of honor last Wednesday when Chester Lichtenberg entertained with a luncheon at the Colonial Restaurant. The affair was to honor her 25 year anniversary with the General Electric Company. Mr. Hoffman acted as host for Mr. Lichtenberg and presented Edna with a lovely corsage and bowl of flowers. The guests included Edna, Hazel McDougall, Irene Meyers, R. J. Hoffman, William Rohe and W. E. Holmes. . . . Miss Lucile Tople and Robert Ducher Wylie, son of Mr. and Mrs. Robert Wylie, were married on Saturday evening at 7 p.m. in the First Methodist Church at Barberton, Ohio, in a very beautifully appointed wedding service. They will make their home in Barberton. May we offer our very best wishes. . . . Welcome to Dorothy Klug, who has transferred from Bldg. 4-5 to Bldg. 18-5. . . . Happy birthday to Gene Grant of Bldg. 18-4. . . . Hazel Obrien, who was recently transferred from Bldg. 18-B to Bldg. 19-B, and Marion Champion who left Bldg. 18-B last Friday, hoth would like to have you all know how very much they appreciate your kindness to them. . . . Betty Garber and Thelma Stone Bldg. 18-1, spent the week-end at Pleasant Lake with Lois Tritch. . . . Hazel Meyers, Bldg. 18-1, returned after two weeks' absence. . . . Elizabeth Carnell, Bldg. 18-1, has finally had her new (?) car released by the government. (Remember one of the representatives of Uncle Sam ran into it and crumpled the pretty fender.) She is going to head it south for Cincinnati for the Memorial holiday. . . . Speaking of Memorial Day—if you haven't planned a trip why not leave Friday night and drive as far as Dayton, Ohio, get up real early and go to Natural Bridge, Va. The pageant given each night is very impressive and well worth the drive. The trip back home over the sky-line drive will add greatly to a pleasant week-end trip.

Only one ad per employee may be inserted. Each ad must be limited to 20 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Tuesday Noon, May 31, 1949

LOST AND FOUND

LOST—Lady's Gotham yellow gold wrist watch with black cord band.

LOST—Black billfold containing $30 in cash, G-E check and other identifications with name Eileen Anderson on.

LOST—Black leather billfold, G-E check, $40 in cash, driver's license, social security card and other cards.

M. B. A. SICK LIST

John Weber, George Reker, Milo Rider, Mary M. Puckett, Wilbert Putt, Henry Luedeke, Virgil France, Caroline Shoff, Vivian Spindler, Ralph Smith, Ruth Shive, Harold Wiegman, Mable Myers, Bernadette Lantz, Clara Krauskopf, John Hayes, Mary Henry, Clarence Hall, Henry Brueggeman, Josephine Biddle, Clara Fulmer, George Weikart, Marguerite Wyant, Leah Guy, Norbert Hans, Betty Gates, Elsie Dunfee, Lawrence Driftmeyer, Louise Holycress, Helen Hartman, Harold Wiegman, Otto Nahrwald and Nina Grawcock.

Released from Hospital

Elsie Dunfee, Raymond Holmes, Frank Cox, Henry Luedeke, Florence Weimer, Josephine Biddle, Oliver Adams, James Bledsoe, Caroline Becker, Ernest Disler, George Weikart, and Harold Wiegman.

Returned to Work

Grace Bedsworth, Richard Gotschall, Rogerio Del Gado, Frank Auer, Raymond Fulghum, Vera Killian, Ora Marie Fulmer, Howard Berry, Marcia Neukom, Cletus Schmenk, Floyd Shellenberger, Sophia Sinn, Melvin Beucler, Franklin Bly, John Brandyberry, Marie Griffin, Delores Baker, Goldia DeLong, Fern Hartman, Jay F. Yopst. Charles Menefee, Mary-Mann, Tom O'Connell, Neva Lutz, Austin Reimund, Irma Miller, Elmer Lederman, Bruce Brown, Fred Baker, Mike Hosler, Madonna Kilgus, Edward Jenkins, Lucille Bates, Walter Coolman, William Jeffries, Victoria Hyre, Claud Matteson, Carl Watterson, Magdalen Perrey, Elizabeth Reed, Edna Ward, Carl L. Smith, Russell Ray, Margaret Stuck, Harvey Adair, Paula Howard, Dorothy McMullen, Gertrude Martin and Elfrieda Wolf.

Was it heat that caused Mr. Skevington to unbutton his vest or was it the new tie? How about it, Bill? . . . Marcielle Bantel thinks the days of chivalry are all over. No one stoppped and helped her fix a flat tire. . . . A cocker followed Fritz Vogt to work the other day. We are wondering if he coaxed him away from home so he will have more room in the dog house? . . . Elmer Buuck was really excited when he saw Arlo Hawk unwrapping a package of ball bearings. He thought he had missed the candy wagon. . . . Anyone having an old handkerchief or a part of a sheet or just any old thing please see Herb Wise. . . . We can look forward for plenty of rain next week. Meredith Trout will be on his vacation. He has been very fortunate the past few years in picking the "rainy weeks." . . . Walt Niemeyer is figuring on refueling his Chrysler by air so he won't have to stop at every other gas station. . . . Myrtle Barfell broke a piece off her meat grinder, and Bill Lavine told her the next time she should remove the shoes off the horse before she started the grinder. . . . From all the reports a grand time was had at Sophia Bodigon's wedding. . . . Harold Somers is building a sail boat. Now the gang is wondering when he will start digging a channel from Pretty Lake to Long Lake. . . . From the looks of Cleon Oyer's desk the Texas cyclone must have struck it. . . . Slim Miller is in the market for one good sling shot. He no sooner plants his garden until the birds have devoured the crops. . . . Ruth Dannecker's brother-in-law was quite disturbed when he found Ruth had put the dill pickles in the orange juice jar. . . . Forrest Grimm really scented up the assembly section last week. What's the latest odor, Forrest? . . . Last week the weather man had Irene Bowman confused. She carried an umbrella and raincoat everyday but the day it rained. . . . Cleon Oyer has been enlightening Jett Monier on the necessity of the ant. It seems without them we would not have any peonies. According to Mr. Oyer the ants eat the wax that covers the buds allowing the buds to open. Jett was happy to learn this as she had insisted upon knocking the little insects off the bush. . . . Cherrio to Louie DeVoe, who is leaving our division. Sincerely, Louie, the gang will really miss you. . . . We wish to welcome Lee Witte and Max Sitton. . . . Bill (farmer boy) Curtis was asking if cows bellow when they have their horns cut off.

Just what would put Juanita Widman of the telephone room in such a dither that she would come in to work on her scheduled day off? Bet she hated herself for that one. How about it, Juanita? . . . Audrey Thomas can give you a good description of what a five-foot blue racer looks like at close range—after it's dead, that is. The snake found a choice spot in Audrey's back yard, but not for long. Mr. Thomas and the neighbor man made short work of it when they killed it with a shotgun. . . . We're happy to hear Norbert Hans is improving and he wishes to thank Chalmer Fisher and Bill Garver for so generously donating their blood. Also Al Bauman, George Coplen, Al Diehl, Howard Connor and Harold Miller for offering their blood in case more transfusions are needed. . . . That was a beautiful orchid Lois Ulrey wore to work last week. Said she received it from her "secret pal" to wear the night she sang at the recital. Pretty nice pal, huh, Lois? . . . No, that isn't just an ordinary stone on Howard Moore's desk. It was found over by Bldg. 12 and is believed to be a real-for-sure tomahawk, left there by the Indians, according to Howard. (Wow, can you top that one?) . . . That "mellow tone" Bill Schible used all last week was the result of a cold he contacted while playing cards with the boys. Curly Muehlenbruch was so warm and poor Bill just had to freeze it out with the window open. Was it really Curly that was so full of pep at 2 a.m. when the rest of the boys were ready to call it a day? . . . When Standardizing needed a skeleton crew to work on Monday, Al English thought he was supposed to work. Now we don't really think that has anything to do with your skeleton-like appearance, Al, honestly. . . . Did you know Erv Huth is the coach on the CYO softball team. Of course, that little fact has no bearing on the following story. The other evening during the game (a CYO softball match), Erv's son Gail hit a nice one, rounded first and was half way to second and his cap fell off. He proceeded to second, hit the base and then dashed off to get his cap and the boys tagged him out. Now there's a few people around here seem to think that was the coach's fault when a kid pulls a boner like that. The rest of us just ain't talkin'. . . . Happy birthday to Mary Saxton and Ralph Latham.

MAY 31 THROUGH JUNE 3

BROADWAY TAYLOR STREET

Serving Hours:

Cafeteria—16-1	11:00 A.M. - 1:00 P.M.	10:48 A.M. - 12:30 P.M.
16-2	11:00 A.M. - 12:30 P.M.	
16-1	6:45 P.M. - 8:12 P.M.	6:55 P.M. - 7:30 P.M.
Restaurant—16-2	12:00 M. - 1:00 P.M.	

TUESDAY, MAY 31

Buttered Spinach	Buttered Broccoli

Wide selection of home-made pies and delicious salads served daily.
Breakfast served at Broadway daily from 6:20 to 7:50 A.M.
Special dinners and parties arranged upon request.
Menus Subject to Change

Inquiring Reporter:

WHAT, IN YOUR LIFE, HAS GIVEN YOU THE GREATEST HAPPINESS?

HELEN LANTZ

Bldg. 4-1

"I think the thing that gave me my greatest happiness was getting my first job after high school graduation, because it made me feel that I was really grown-up and independent."

DALLAS BROXON

Taylor St.

"My great happiness is with my family, home and friends."

VIRGINIA SIMON

Bldg. 19-5

"Happiness in my estimation is not achieved through material things. It can be found in friendship, good books, music, health, and just the joy of living."

ED G. MEYER

Bldg. 17-2

"That is a difficult question to answer. Many things have given me happiness and it is hard to single out one specific event. My home, family, and job have given me great satisfaction and happiness."

BERTHA IDA SWARTZ

Taylor St.

"Working at the Taylor St. cafeteria—having a swell guy to work for and friendly people to serve—has given me the greatest happiness."

The Big WIND

DIVISION 17
TAYLOR STREET
by Dorothy Heinzelmann

The sound room gang had a pot-luck Thursday. Those enjoying the chicken, chocolate cake and all the rest of the delicious dinner were Hazel Hardwick, Lucy Woodard and Eva Creigh, who are going to put in full time as housewives; Bill Roberts, who left for Bldg. 17-4; Esther Schladen, Vi Minnich, Ruth Leverton, Olka Johnson, Iris Allen, Pauline Ober, Duckie Drake, Charles Penn, Dave Chambers, and Dora Smith, who is leaving the Company. Esther had forgotten they had to bring baked beans, so 1:30 a.m. found her taking them out of the oven, but they sure tasted good. Never had we seen anyone consume so much potato salad as Dave but then he is still a growing boy. We certainly hate to lose all those nice people and we wish them all a lot of good luck. . . . Hazel and Marion Hardwick are now the proud owners of a beautiful blue Oldsmobile. . . . Vic Minnick has a new electric coffee pot to replace. She plugged in her mother's brand new one and forgot to put the water in, and the spout promptly melted off. Vi says it just isn't the thing to do; it's going to cost her plenty. . . . Esther Schladen has reverted to her childhood habits again as she took off her shoes and stockings, crawled out of her car and waded for help. Yes, her car was stuck in the water on her way to church, but plucky Esther got the car out, put her shoes and stockings on and went on her way to church—that's our Esther. . . . We welcome Clifford Balyeat to our group and hope you like us. . . . Ellen Saul really has the system in making dates. She takes her mother along for protection. We don't blame you, Ellen. . . . Bob Huhn has the "hot rod" fever too, so now he has something to keep him busy in his spare time. . . . Bob Federspiel got to Wabash over the week-end, but was getting worried for fear he might have to trade his car for a boat to get back. . . . Ed Bierely is all smiles again now that his boys are back in school after a siege of the mumps. We heard Ed stayed away from them while they were home. . . . Ernie Raypole had a party Saturday night and as a result he had guests for breakfast Sunday morning. Did they like your cooking, Ernie? . . . Ruby Allen went to her daughter's at Ashley over the week-end. . . . Nellie Williams is back on days after a short time on nights. Are you glad you are back, Nellie.

G-E BOWLING STARS CAPTURE CHAMPIONSHIP TITLES

Eddie Kraft, Taylor St., won the singles and all-events of the G-E Employees Bowling Tournament which ended Saturday evening, April 23. He won on scores of 756 for the singles and 1,937 for the all-events. He is shown in the upper left picture.

Eddie also walked away with the All-Events title at the Men's State Bowling tournament, which ended at Indianapolis Sunday, May 22. His winning score was 2,010.

Pictured in the upper right picture are the doubles champs, Don Dimke and Marc Junk of the Apprentice School. Their winning score was a total of 1,390 pins.

Leaders of the team event were Joe Haas, Dale Springer, Eldon Roby, Dick Madden and George Soule, shown at the right. Their score was 3315.

Apprentice BROADCAST

by MILDRED ELLIS

For the latest and strangest things in plants see Bergman or Schmidt. Their gardens are late this year and I'm sure strange things will be growing. . . . After the result of Merton Allen's test on Rasor's safety glasses it has been suggested he should be made a member of the safety committee or become an optometrist. . . . The business agent for Art Gum and his Rubber Band is a pretty snappy individual. His name is Warren Brown. . . . Oh, for the life of a softball player! They don't have housecleaning to do. There's probably many a good softball player hurried to his elbows in suds. . . . Reinking finds that swimming (or sinking) in the Purdue pool is much more interesting since they have a female life guard. . . . Homer Carson is covering lots of Hoosier territory since he has transportation available. Soon he will know more about Indiana than the natives. People call us natives, but I've always pictured natives as wild people. Well—! . . . Johnny Appleseed had nothing on "Good Deed Zollinger" who has scattered grass seed in his neighbor's yard and alley. At least that's where his grass is growing since the recent downpours. . . . It's a pleasure to work around Miller. He looks so comfortable in his stocking feet that his nearby neighbors remove their shoes, too. . . . The fellows tell me that Joe Rowan has become quite snobbish since he has been transferred. He always wears a tie and doesn't even speak to his fellow-apprentices, but Joe claims he's just trying to get Fremion and Frede on the ball. He thinks the guys wouldn't look bad if they were fully dressed. (Ties, that is.) . . . Tours were the thing in regard to classes last week. Class C visited the wire mill and both classes C and D took in the wonders of the metallurgical lab. Our thanks to George Gettel and Gene Warwick for providing enlightenment to our scholars. . . . Jack, Carl and Lew Davis are working against time on their sailboats. Jack even takes people on tours to see their boat. He claims he must get transportation to Carl's house someway. . . . The I raftsmen are planning a fishing trip this week-end at Fremion's cottage. So far the boys have batted zero in the fish catching department. Birkenbeul spent Thursday night looking for crawlers and claims he will get his share of the fish this week-end. Next week we will report on the fish—either those that swim in the water or those in the Apprentice School.

It's wise not to cash a check for a person who lacks balance.

When you want to stop sailing on the sea of trouble try tossing out your anger.

G-E Club Scores 3 To 1 Victory Over City Light

G-E Club scored a 3-1 victory over City Light Tuesday, May 24, in a Main Auto Major Softball League game at Municipal Beach.

The club combined three hits and a walk in the second inning to gain their runs. The loser's only run came in the fifth on a walk and two hits.

Line Score:

City Light	000 010	1	2 1
G-E Club	030 00x	3	4 0

TOUCHING THE BASES

by Walter Husted

In the only game played in the league during the last week, the loaded Auscos dropped Michigan City from the undefeated list, winning 8 to 4 at Edgewater Park.

Jack Holland held Michigan City to five hits while his teammates pounded Soderlind, Smola and Carey for nine hits which they grouped with five errors to score eight runs.

Bob Winters paced the winner's attack with two singles and a double to drive in five runs.

Box score:

Auscos (8)	Ab	H	O	A	Mich. City (4)	Ab	H	O	A

LAST WEEK'S RESULTS

St. Joseph, 8; Michigan City, 4.

Monday is Memorial Day and that means a long week-end for all of us. If you are going fishing to the races, to see a favorite ball team playing or just visiting, take safety along with you. . . . Our sincerest sympathy is extended to the Frank Moritz family in the death of their wife and mother. Carrie Moritz was a former co-worker. Her pleasing smile will be missed. . . . Last week Almeda Fairchild put away her tools and bid us goodbye. She left the Company for retirement. She was given a shower by the 564 line and a gift from the rest of her co-workers. We hope you enjoy your leisure time doing all the things you haven't had time to do. . . . Some time ago I told you of the way Harry Chism would get the Busco beast. The other day Harry presented pictures from a newspaper story that the big bull of Kokomo was just a "bum steer." Harry proves that he never spread the bull, but convinced us that over 4700 pounds of bull was a living reality in the vicinity of Kokomo until the winter of 1919. (That's a long time ago.) The story stated that Ben (that's the bull) was always "horsing" around on the ice and one day it fell and busted his sacroiliac. In due time old Ben was butchered. Believe it or not the meat filled a hay rack 14 x 7 and the residents of Kokomo are still gnawing on the bones and licking their chops. The hide was taken to a taxidermist who spread old Ben to his original size and shape and has him on exhibition. In the past years souvenir hunters, moths and bull slingers have done a great deal of damage to the original, but to make a long story short, when Harry Chism spreads it he can prove it. He's got the pictures. (We still say that's a lotta bull.) . . . Is there an entomologist in the house? Harold Bowker wants to know the difference between a termite and a flying ant. . . . We are glad to see Iley Souder and Josephine Motter back with us again. . . . It's howdy to Albert Fry, Chester Hill, Vivian Tricker, Victor Nahrwold, Fred Krotke and Myrtle Swager, who are newcomers to the early bird shift. . . . Sorry to hear that Ruth Hines is on our sick list. . . . Charlie Francies is going in the fresh frozen tomato business. Jack Frost came along and nipped his tomato plants—all 1,100 of them. . . . Margaret Monnot spent last week-end in Detroit. Virgie Mayer made a trip to the "Windy City." . . . It's getting to be a habit on the 534 line for "china clippers" to misbehave. Francis Eckrote is the latest victim. . . . Hershel Case hasn't figured out just when his birthday really should be. He is going to ask his mother, then he will know. . . . **Peculiar Happenings on Our Floor:** Ann Kensill, 22 years of service, received a gold medal made of paper last week. Violet Brower bought pie at the cafeteria and left it on her tray. She had to go back to the cafeteria and get it.

My dentist is a sad one—he always looks down in the mouth.

OWL GOLF

By Earle D. Stauffer

The second week of the Owl Golf League is history, but it passed with the threat that this gang of golfers will not be pushed around by anyone.

Those vaunted "Hot Shots" from Bldg. 19 ran into a snag when they collided with Team No. 1, composed of Garland, Barncy, Starke and Stauffer. They emerged a bare one-point victor. Warren Wickliffe paced his team with an even par 36, while Lou Barney "killed snakes" for his "best-ever" league effort of 37 to pace the losers.

In a corking-good match, Ray Stanger and his Team No. 2 (we hereafter will refer to them as the "Jolly Boys") locked horns with the Bierbaums, Uhrick, and Merchant who comprise No. 3. When the divots had cleared away the contest was all even. Ray was low for the "Jolly Boys" with a 44 and Uhrick paced No. 3 with a 43.

Pook, Junk, Suelzer and Hamilton Team No. 5 picked up the most points of the day when they beat Gus Ormsby's boys, minus Gus, by the margin of five points. Bernie English who replaced Gus for the day had low ball honors for both teams with a 44.

This handicap golf is no respecter of teams or players. It extends a helping hand to the high average player to make it possible for him to play in a league with the likes of Sternberger, Grider and Company. More times than not, the high forty or low fifty player is more to be feared than the consistent par shooter.

P's and Q's of 17-1

by Joe Kramer

Anyone requiring the services of a steeple-jack are asked to contact Cliff (steeple-jack) Coombes. Cliff will gladly arrange a demonstration showing the proper way a steeple-jack would descend from the top of the ladder in case of a fire. . . . Frank (Nature Boy) Martin and George (Green Thumb) Mosshammer are accepting orders for fresh vegetables with the exception of onions. It is rumored they only set out two onion plants. . . . The operator of the wash hooth on the first trick in the south end of Bldg. 17-1 is Joe Collins. Joe has been transferred to Bldg. 17-1 from the paint oven in Bldg. 4-1. Hope he likes to work in Bldg. 17-1 as well as he did in Bldg. 4-1. . . . Addie Masbaum is spelled with an M instead of a B like in last week's WORKS NEWS. Addie, please accept the apologies of the editor. . . . We are wondering if Curly Sprague is going to use the sling shot he made to shoot the mice that the cat won't catch or if he is going to use it to shoot the cat. . . . If you are interested in the changes of the moon we suggest you secure a copy of Paul Geiger's almanac. Paul's almanac has an entirely new system of determining the changes of the moon. It should prove very advantageous to scieutists in years to come. . . . What with the new trend in hair styles, Addie Masbaum is going to be kept busy keeping the bangs on Helene Evanoff and Mary Gerhard trimmed straight. Addie says she is going to practice with a safety razor and maybe in a couple of weeks she will be able to give shaves. . . . Charlie Niblick is having his house painted. Due to the changeable weather and a possibiilty of rain, Charlie had the painters use a water paint so in case of rain they wouldn't have to stop painting. . . . Jack (Hot Rod) Lewis took his vacation last week in an effort to secure subscriptions to a certain newspaper so that he might get his hot rod. . . . With Bill Hodge now in the tool room, Bill and Charlie Braden can certainly get together to get that man off of third base. Red and Bill really have quite a session at noon hour playing over the previous day's Voltmen's game. . . . While speaking of the Voltmen, we want to remind you to be sure and get your booster ticket and attend some of the swell games the Voltmen put on. That was really a slugfest they had when they played the House of David. Everybody got a hit, but Charlie Braden and the bat boy. . . . We hated to say good-by to Curtis Martin when he went on pension the end of April. We enjoyed working with Curt because of his cheerfulness and helpfulness in getting work done that had to be done. Good luck, Curt. . . . No, good people, that wasn't a new face on the grinder in 72 Group last week. Glen Hudson got slowed down enough to be able to run the grinder for a while. . . . Taking advantage of being off work last Monday, some of the girls in Bldg. 17-1 office went to the lake to enjoy a swim and a picnic. Addie Masbaum, Tavie Popa, Helene Evanoff, and Mary Gerhard report that the water was just right. As far as sunburn is concerned, the next time they are going to take an umbrella along. . . . Meriam Valentine said that Friday, May 20, was the first time she can remember of coming to work after a sudden drop of temperature and finding heat in the office. . . . After weeks of hard work painting and papering and cleaning, Charlie Lauer moved into his new house last week. When are we going to have a house warming party, Charlie? . . . We wish to extend our sympathies to Robert Taylor and Norman Bender on the deaths of their father and sister, respectively.

Voltmen Down Red Sox For First M-I Victory

By Bill Hunt

Scott Cary pitched and hit the Voltmen to a hard fought victory as he struck out five and drove in two runs.

Cary's was the only hit in the big fourth, when Smith and Miasek walked, Bobilya popped up to first, then Hardy and Runge walked to force in Smith. Cary then drove a clean single to the left of second base to score Miasek and Hardy.

The Voltmen defense weakened after Joe Cannizo doubled and Hank Stramm singled on a bunt which third baseman Bobilya fielded and threw to third base; which was not covered, so Cannizo scored. Cary got Hixson on strikes, but Hardy bobbled one that allowed Clifton to reach first and Stramm to go to third. John Galvin drove one that Bobilya could not hold that scored Stramm and sent Clifton to third, then the Voltmen nemesis Joe Desiderato hit to center to score Clifton and Galvin. Bestudick popped to Smith to end the inning.

The Voltmen recovered in their half of the fifth to tie it up. Stan Shargey led off with a walk, went to second on Horman's infield out, to third on a pass ball, and home on Olin Smith's clean single over second. The score remained tied until the eighth, although each team had a hit per inning 'till that time. Burkhard was hit, sacrificed to second beautifully by Hardy, then scored by Stan Shargey's line drive single to left. Art Herring then relieved for Lafayette to retire the side on one pitched ball.

The one-two punch of the Red Sox started in on Cary when Cannizo and Stramm singled sharply to right. Manager Braden then called a halt and let Lefty Hazel finish five inning bull pen work out against Lafayette. Lefty successfully finished off the next three Red Sox to save the game for the Voltmen and Scott Cary.

Voltmen Honor Roll

The following have pledged their support of the G-E Voltmen by purchasing box seats:

Box No. 6—C. L. Schust —Indiana Const. Co.
Box No. 7—Fort Wayne National Bank
Box No. 8—Pure Sealed Dairy
Box No. 9—Keefer Stewart —Frank Aiken —Deluxe Pastry —Troy Laundry
Box No. 32—Seyfert Foods Co.
Box No. 35—Main Auto Supply Co.
Box No. 36—General Electric Co.
Box No. 37—Brouwer's Tire & Bat.
Box No. 38—Mayor Henry Branning, Jr.
Box No. 39—Taylor Shop
Box No. 40—Allen Dairy
Box No. 41—Lee Sales
Box No. 42—Earle Moss —McConnell —Fort Wayne Wire Die —Seven-up Bottling Co.
Box No. 43—Hatcher Motors

What is a Speed-Up?

And what is just an honest day's work?

The "speed-up" and the "stretch-out" are favorite old battle cries in resisting improved output per worker.

In the pick and shovel days—and in the early days of crude factory operation—there was all too frequently some justification for increased output per worker to be described in such terms. Then, "speed-up" too often meant more production at the expense of the worker. Now, constantly improving machinery enables the employee to get far greater production from a normal day's effort—well within all considerations of health and strength.

Now in today's buyer's market we Americans can make the greatest progress we have made in a long time. Everyone is again seeking new designs and equipment and methods so that mechanical power and brain power can get more and better goods turned out at more attractive prices—with still just an honest day's physical effort.

We in business—employees and management—are striving to make this progress because we have to. The customer is the boss again, and he is making us get rid of the wasteful, indulgent habits of boom times. The buyer is back in the driver's seat, and serving notice on us that he will not buy unless we really take an interest in our work . . . begin to exercise our skill and ingenuity . . . cut out waste of material and motion and time . . . make sure we begin doing again exactly what he—our "customer-boss"—wants done.

Even if it were still possible for some employer here in America to set inhuman standards and drive his employees to back-breaking toil, it could last for a *very* little while because the employees would rebel. Or, if they did not, mistakes would occur, quality and reliability would suffer, rejections would actually cut down the amount of good production accomplished, and costs would rise.

No enlightened employer would fail to realize that asking good employees to work beyond their reasonably comfortable capacity would not only be contrary to the basic principle of putting the human considerations first, but also would be so shortsighted as to endanger the very life of the company along with the security of the jobs.

In good times and bad General Electric tries honestly to pay what is right for a fair day's work. And we believe an honest day's work is made up of the *full* interest, care and skill of the General Electric employee in addition to what is regarded as a reasonable output of effort according to modern standards. It is not expected that General Electric employees will go home feeling fresher than when they came to work, although we sometimes wonder if our employees don't leave work Friday night a little *less* tired than when they come to work on Monday morning—after one of our American weekends.

We know of no way any of us can do an honest day's work without going home at least a *little* tired; but that seems still well within what would be a fair price for the good pay, extra benefits, and other satisfactions we try to include in every General Electric job.

If there are any cases of employees being subjected to the back-breaking work or other severe conditions deserving the name of "speed-up" or "stretch-out," it would be most amazing to all concerned. And it would be a real favor to the manager of any such employee to be told by the employee why he so regarded his job.

It angers some people, of course, to see the employee and the employer buckling down to work together more creatively . . . more earnestly . . . more productively . . . in the common interest of attracting more customers. It angers people who are against progress . . . who don't want the American system to work.

What some people are trying to tar-and-feather as the "speed-up" and "stretch-out" is simply that steady progress in lengthening men's arms . . . that substitution of mechanical effort for human effort . . . which makes it possible for each of us to get *more* done—for ourselves and each other—in the same time with the same or even less effort.

The company whose management and employees start working together the most quickly, efficiently and eagerly—in today's tough market—is the company that will increase the quality of its products the fastest . . . offer the most attractive prices and best values . . . make the most sales . . . and so have the fewest layoffs . . . furnish the most and the steadiest jobs during the troubled period . . . and provide the greatest job security in the future. If making better products at lower prices to sell more customers and create more jobs can be called a speed-up, then we have all got to recognize that there is now—instead of the old bad kind of speed-up—a new kind of good speed-up.

Crowd Attends Premiere Of G-E Film

Decaturites See First Public Showing of Movie Featuring Aeolian Choir

A large throng of Decatur citizens attended the premiere showing last night of the Hollywood-produced film, "By Their Works," at the Decatur high school auditorium. The technicolor film features General Electric's Aeolian Choir and employees of the Decatur plant.

> "By Their Works" will be shown in Fort Wayne at the G-E Club auditorium Tuesday, June 7, at 7:30 p.m. Wednesday, June 8, at 1:30 p.m. and 7:30 p.m. All three showings will be open to the public.

"By Their Works" was produced by the Raphael G. Wolff Studios of Hollywood, Calif. Filming of the 45-minute movie was done last year. The show includes scenes taken at numerous G-E plants throughout the country.

The 70-person, G-E Aeolian Choir, under the direction of David Embler, gave a short concert in connection with the program last night. Reproduction of the songs and filming of the choir's participation in the full-length feature were made from the stage of the Catholic high school auditorium there.

As well as showing the entire choir, the cameramen selected several members and showed them at their work in the Decatur plant in a special sequence of the movie.

(Continued on page 3)

The Aeolian Choir at Decatur, above, is composed of G-E employees, their sons, daughters and friends.

Supervisors Plan Annual Stag Picnic

The annual stag picnic of the Supervisors' Club will be held Saturday, June 11, from 1 to 9 p.m. at Voigts Retreat, east of the city.

A full day of fun and fellowship is being planned by A. S. Johnson and G. R. Lindemuth, co-chairmen. Their committee consists of R. W. Kent, R. N. White, E. M. Hanauer, W. H. Spahr, E. J. O'Neill, K. J. Redding, A. C. Hensick, J. V. Johnson, C. E. Slater and H. S. Shields.

All those without transportation should see their contact men.

Voltmen Game To Raise Funds For Boys' Camp

G-E Club officials have completed arrangements with the Goodfellows Camp, Inc., for the sponsorship of the Voltmen vs. Michigan City Cubs game, Thursday, June 9, at Dwenger park.

The Goodfellows Camp, Inc., is an organization started for the purpose of providing summer camp facilities for underprivileged boys of Fort Wayne. The worth-while project is being undertaken by many Fort Wayne citizens.

Many organizations have already underwritten their expression of satisfaction with this project. The Fort Wayne City Fire Department, represented by Cy Uebelhoer; the Fort Wayne City Police Department, represented by Mr. Lester Eisenhut; Milt Marx, Sports Broadcaster; Walter Frederick, local attorney, and Ernie Hanauer, G-E Fire Chief, are among the many persons interested in the Goodfellows Camp, Inc.

The scheduled Michigan City game has been replaced on the G-E team's home schedule by a game to be played June 17 with the St. Joe Michigan nine. This game, originally scheduled at St. Joe, has been moved to Fort Wayne to make it possible for the Voltmen to donate the game with Michigan City to the Goodfellows Camp, Inc., fund.

Regular admission tickets will not be sold for this game and G-E Booster tickets will not be honored. The price of admission has been set by the officials of the Goodfellows Camp, Inc., at one dollar per person, tax included.

Ervin Huth, Bldg. 20-2, is chairman of the ticket distribution program for the G-E Club. Tickets may be secured from all G-E Firemen and at the G-E Club.

G-E Cafeterias, Restaurant, Stores To Close Three Mondays

The Taylor St. and Broadway cafeterias and restaurant and Employees' stores will be closed June 13, June 27, and July 18, it was announced today. This action is being taken to conform with the elimination of these days from the working schedule of most of the manufacturing divisions in shortening the work week from 40 to 36 working-hours per week.

Elex Club Announces New Change In Train Route Of Niagara Trip

A view from the sky of the park at Niagara Falls is shown above.

A change in the route of the Elex trip to Niagara Falls, June 11-12, was announced today.

The trip will be taken via the Nickel Plate Railroad to Buffalo and then by bus to the Falls. Those taking the excursion are requested to meet at the Nickel Plate depot, Calhoun and Clinton near Superior St., at 2:45 a.m. (DST).

Arriving in Buffalo, N.Y., at 12:45 p.m., the group will continue on their tour by bus to Niagara Falls, N.Y. The girls will arrive at Niagara Falls, Ont., a half hour later.

There has been no change in the

(Continued on page 3)

Apparatus Dept. Sets Up Pre-War Pricing Policies

H. V. Erben, Vice-President and General Manager of the Apparatus Department, has announced that effective June 1 the Department will return substantially to its pre-war price policies.

"It is expected," he declared, "that this return to pre-war price policies will provide a stimulus to prospective purchasers."

Mr. Erben pointed out that certain exceptions are necessary in the case of long delivery items. Transformers rated 15,000 kva and above, turbine-generator sets rated 15,000 kw and above, and Alco-G-E-diesel-electric locomotives, he said, will continue to be sold on the basis of "price in effect at the time of shipment, with a 10 per cent ceiling." Large hydraulic turbine-driven generators, synchronous condensers, and frequency-changer sets will be sold on the basis of price in effect at the time of shipment, with a 20 per cent ceiling, he said.

"Consistent with its pre-war policy on the sale of light equipment with a short manufacturing cycle which frequently is purchased by future delivery orders," he declared, "the Company will protect the purchaser on shipments made within 90 days after a price increase." This equipment includes distribution transformers, network transformers, lightning arresters, cutouts, and power factor correction capacitors; watthour meters, instrument transformers, industrial controls, and induction motors rated from one to 200 horsepower.

All other Apparatus Department lines of equipment, he said, will be sold "on the basis of the quoted price being maximum with provision for downward adjustment in the event of general price reductions in the particular product line."

These lines include power transformers below 15,000 kva, all items of switchgear, integral d-c motors, synchronous motors, and induction motors above 200 horsepower; industrial heating, street lighting, and welding equipment; industrial haulage locomotives and car equipments, turbine-generators below 15,000 kw, and mechanical-drive turbines.

Employees Cautioned To Safeguard Checks

Employees should not endorse their pay checks until the time when they are presented for payment. Several times in the past, endorsed checks have been lost by employees and have been found and cashed by someone else. In such cases, the Company cannot be held responsible for reimbursement to the employee, and it is always difficult and, in practically every case, impossible to hold anyone else. Therefore, employees should take this precaution to safeguard their checks or take the risk of losing the entire amount. However, if a check is lost, whether endorsed or not, notify your foreman or supervisor immediately and an attempt will be made to stop payment on it.

Girl Scouts Open Campaign To Rid Fort Wayne Of Ragweed

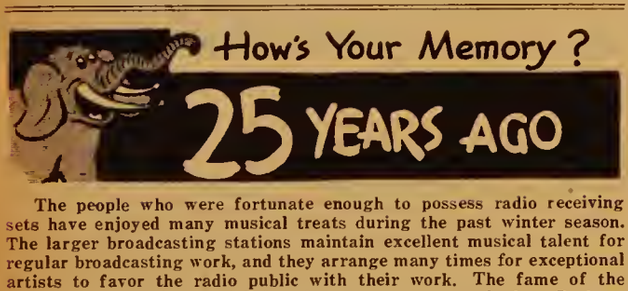
The Girl Scouts of Fort Wayne are to be congratulated for the fine job they did recently as a part of an educational campaign to rid the city of ragweeds which cause so much distress every summer to victims of hay fever.

The official eradication period will be July 15 to August 5, but the Girl Scouts helped enlist supporters to the campaign early by carrying ragweed plants in a door-to-door canvass to introduce the weed to householders.

All residents of the city and Allen County are asked to destroy every ragweed plant on their property. It is better to destroy the cause of hay fever than to treat the patient once he has contracted it. An active anti-ragweed campaign in New York City—which strangely enough is ragweed infested—reduced the pollen count 60 per cent.

For the best results, weeds should be destroyed before the seeds mature. The ragweed plant can be pulled, cut, or sprayed. In doing that, everyone will help hay fever sufferers and protect himself or his children who may some day be afflicted with the ailment.

Letter From Veteran Praises Old FHP Motor With Nine Lives



Not long ago we got one of those pat-on-the-back letters that leaves even old-school engineers hang-jawed with amazement:

"Gentlemen: I am writing you concerning a motor that I have in my possession of which I am very proud, and I thought your company would also be proud to know of, due to the conditions that this motor has undergone. The story is as follows:

"I am a Veteran of World War II. When I was discharged from the Army I bought the place in which I now live. At one time there was an old carpenter living here, but one year before the war he died and the place stood empty until we bought it. And about one year before he died his carpenter shop burned down but was never cleaned away. Since we came here, we worked spare time cleaning away the mess.

"Just recently we completed the cleaning away of the mess. Among the cinders I found this motor attached to a plank and when I took it out I found the motor filled with mud, grass, cinders—I dug the mud, etc., out and took the motor to work with me, (I work in a machine shop) and showed it to one of our electricians and he laughed at me for thinking that it would still work. However, he placed it in one of the ovens and left it there all day and night to dry, and the next day he fully expected it to blow out a fuse, but to his great surprise when he plugged it in it runs just like new. Now to my knowledge it had lain out in the weather for over six years. I think from all markings that it is an old motor, which adds to my surprise."

Our historical records indicate that this motor was manufactured in 1919. Just another example of the quality of our work, for which we all can be proud.

The people who were fortunate enough to possess radio receiving sets have enjoyed many musical treats during the past winter season. The larger broadcasting stations maintain excellent musical talent for regular broadcasting work, and they arrange many times for exceptional artists to favor the radio public with their work. The fame of the musical organizations which broadcast naturally travels far. Perhaps we scarcely realize it but we believe we have, here in our own Fort Wayne Works, a musical organization whose fame would be widespread were it in position to broadcast its musical programs. You will know at once that we refer to our G-E Band.

The people of our Works and of our city during the coming summer may again enjoy the privilege of hearing the weekly noon concerts of our band in McCulloch park. To the radio fans, let us say, here is the privilege of hearing real music without the trouble static and other interference which too often spoils the otherwise exceptionally good radio programs. Director Verweire now has fifty well trained men in his organization.

Hard to Explain to the Rest of the Crew

HUGH CRANE *discusses* Price of Potatoes

NEW YORK—Uncle Sam is spending over $200,000,000 this crop-year on the lowly spud. Last month he was spending about $1,000,000 a day just buying potatoes.

What for? To get more potatoes grown? To get more potatoes available for the American consumer's dinner table? To get the price of potatoes down?

No. To take potatoes off the market and to hold the price of potatoes up.

Why Potato Prices Stay Up

That's why potato prices don't go down. In fact since the turn of the year, while other food prices have been going down slowly, the price of potatoes is up, at least here in New York. Uncle Sam is holding it up.

This has been expensive to Uncle Sam. In fact since V-J Day he has spent over a third of a billion dollars in buying potatoes at $1.40 a bushel and up, carting them away, and selling them to alcohol producers, livestock feeders and others at an average cost of around 10 cents a bushel. The buyers have to sign a promise that they won't let anybody but livestock eat the potatoes. Sometimes Uncle Sam has just dumped the potatoes on the ground and poured kerosene on them. Sometimes he has even paid the farmer to just not dig the potatoes out of the ground in the first place.

Cost Keeps Climbing

The cost of this to Uncle Sam keeps going up. It cost him $90,000,000 on the 1946 crop, $40,000,000 for 1947, but over $200,000,000 for last year's crop. There doesn't seem to be any end to the potatoes that farmers will grow at a guaranteed price of $1.42 per bushel; and if they all got to market, down would go the price.

It isn't that farmers increase their acreage so much as that they put more fertilizer, better seeds and more care into their potato fields.

So this year the government has had to buy something 'round

(Continued on page 8)

SCIENCE QUESTION BOX

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY

Q: What caused the ice ages?

A: A number of explanations have been proposed. According to one theory, an important factor was a change in the amount of moisture in the atmosphere. When large, it absorbed much of the heat radiation from the Earth, and re-radiated it back to the ground. This would keep the temperature of the Earth high, with relatively little variation with latitude. With low water content in the air, the Earth would radiate away its heat more rapidly, particularly where there are long winter nights. Then the arctic and sub-arctic regions would suffer a very pronounced cooling, and the ice around the poles might advance well towards the equator. Another important factor may have been dust thrown into the atmosphere during periods of great volcanic activity. Such dust may remain suspended above the clouds for years, and would reduce the heat radiation coming in much more than that from the Earth out into space. Thus it would produce a considerable cooling effect.

Q: I missed the recent eclipse of the Moon. When will we have another chance?

A: The next total eclipse of the Moon, visible generally throughout North America, will occur on Oct. 6, 1949, with the Moon totally eclipsed from 9:20 to 10:33 p.m., EST. If you miss that, you will have still another chance on the evening of Sept. 26, 1950.

Meet the President

Hugh Crane

(Continued from page 2)

125,000,000 bushels, or about a fourth of the entire crop, to haul of to dime-a-bushel non-human use, to hold the supply down and the price up.

This is more than the total production of Maine and Idaho our two big potato states. It as much as puts their production out of the picture. And in fact it actually is beginning to crowd them out of the picture. These two states, together with New Jersey and Long Island, have been the country's low-cost, high-quality producers. But at present prices garden-farmers near the big cities are turning out bigger and higger crops and capturing the nearby markets. And now that the Department of Agriculture is getting tired of buying so many potatoes for throw-away use and is talking about acreage quotas on potatoes, it is the farmers in the old-line potato growing areas who seem scheduled to get the biggest cuts.

The government has decided to cut its support price goal on next year's potatoes by a third, to maybe discourage the Niagara of potatoes that keeps coming to market. But the outlook is gloomy. Even at 95 cents a bushel farmers seem likely to keep the spuds rolling: and even acreage quotas they can get 'round by putting more fertilizer and elbow-grease on each acre.

List of Subsidies Growing

Uncle Sam is also supporting the price of eggs now in the same way. It has already bought over 30,000,000 pounds of dried eggs this year on top of 20,000,000 it bought last year and couldn't or didn't sell. Also butter. The price of butter can't go down because the government is holding it up at 59 cents wholesale. Next candidate is pork; the Secretary of Agriculture warns that his department may next have to hold up pork prices, as the law now stands, and the cost this year might be a small matter of $75,000,000.

The consumer pays twice—once in taxes to finance these support programs, and once at the grocery store counter.

Doesn't seem quite right, somehow.

Elex Club

(Continued from page 1)

itinerary during the week-end at the Falls. The group will leave at 4:45 p.m. Sunday for the return trip. The train will arrive in Fort Wayne at 3:25 a.m. Monday, June 13.

All those sharing rooms should notify Irene Meyers' office, Bldg. 8-2, so that hotel reservations can be made for both persons.

Crowd Attends

(Continued from page 1)

President Charles E. Wilson is featured during the opening and closing portions of the film, which is a pictorial story of production lines in G-E plants.

The wire mill at the Taylor St. plant is included in the scenes showing the production of various G-E products.

G-E World War Veterans Hold Memorial Service

Paul Trier, Bldg. 20-2, is shown above placing a wreath in commemoration of fallen comrades as a part of the G-E Memorial Service last Friday.

"A better understanding among all people" was the plea made last Friday noon by John E. Estabrook, Assistant to the Works Manager, in the main address of a Memorial Service sponsored by the G-E World War Veterans' Association.

The ceremony was held in front of Bldg. 19.

K. W. Michael, president of the association, opened the program and introduced Bill Walt to give the invocation.

Mr. Estabrook stated that "the graves of American patriots and the monuments which symbolize those graves should become shrines from which should constantly flow to the living an even greater desire to individually and collectively strive for the elimination of those human errors in thought and action which are the prelude to war."

He described the instigator of all wars as arrogance, greed, and lust for power.

"In brief he is all those things which cause people to lose their sense of value and withdraw themselves from the continuing battle for the preservation of the good things which it was intended that we as a free people enjoy and which can only be perpetuated through the maintenance of our unity as a people and our cooperation in this common cause," he added.

Arthur F. Stute, Bldg. 27, placed a wreath at the World War I monument, and Paul Trier, Bldg. 20-2, placed a wreath at the memorial for World War II. The rifle squad and a bugler of American Legion Post 47 and a color guard participated in this, the concluding portion of the program.

Ramblings in Bldg. 31-2: Everyone is either coming or going. This week Fred Eisenbiegler is going—going to be married in Canada to Thyra Rankin. After a week's vacation, he will return not to Fort Wayne but to Schenectady where he has been transferred. . . . Pat Johnson is going to leave us to go back to teaching. Pat will go to Ball State this summer to prepare to teach the first graders at Decatur. Good luck, Pat. . . . Carol Pond is going to take up the old fashioned art of homemaking. We hope she and her husband get the home they have been wanting. . . . The M-G girls honored Carol and Pat with a dinner party this week. The girls presented them with parting gifts. . . . Paul K. Shive and Robert E. Hirschmann came to our Drafting Section from General Tool in Bldg. 19-5. Hope they like us. . . . Congratulations to Mr. and Mrs. Bill Readon, who are very happy over the arrival of a baby girl named Ann Louise. . . . Earl Elwonger must like his Wheaties, as we hear that he listens to Jack Armstrong. . . . Boo, Hoo! We just discovered the WORKS NEWS being used as a rug. Don Kent was standing in his stocking feet as he worked at his drafting board. At his feet lay a copy of the NEWS spread all over the floor. A bad example for all those who like to cast off their shoes in the summertime.

President Wilson Forecasts Possible Rise In Business

CALLS ON UNION LEADERS TO FACE 'ECONOMIC FACTS'

The present industrial decline in production may continue until the second quarter of 1950 but business may again reach the high level of 1948 by the end of 1951, Charles E. Wilson, G-E President, said this week.

Speaking before the 17th annual convention of the Edison Electric Institute at Atlantic City, Mr. Wilson said that it was not expected that the present decrease in industrial production would exceed 15 per cent, as compared to last year, before production again turned up. He cited the lack of "great speculative excesses in inventories and the stock market," increased government spending, and the piecemeal readjustment of production and prices as factors which would prevent any drastic decline.

In stating that the production of consumer goods in the electrical industry is expected to drop "by at least 20 per cent" as compared to last year, Mr. Wilson asserted that "we are now to a substantial degree the victim of our policies of our earned and logical price reductions. We have created a 'wait for more' attitude in our market and the only remedy I know for that is hard selling of good products at a fair price."

Many Factors Involved

Although he said the falling-off in volume buying had made some General Electric products unprofitable at present prices, Mr. Wilson said the condition would not be serious if it is not aggravated by other factors such as increases in wage levels.

"With the threat of higher taxes and increased government spending, the customers who compose our market will not support further price increases. Therefore, the only possible result of increased labor costs at such a time would be to put some real iron in the public's decision not to buy what we have for sale and that will mean curtailed production and unemployment.

"A little statesmanship on the part of union leadership at this time would help a great deal and benefit everybody. After all, they have done more than well by their 'special interests' in the years since the end of the war. They can't go on forever diluting the value of money. I would hate to think that union leadership did not have the moral courage to face its membership with the economic facts of life. If they are ever going to start being economic statesmen, why not now?"

Ignore Benefits

Mr. Wilson said that those who attack "big business" ignore the social and economic benefits which have resulted from the growth of American industry.

"It is technological advance which has made our larger economic units both possible and more effective. The high American standard of living is provided by enormous turbine plants, steel mills, oil refineries, railroad freight facilities, wheat and cattle ranches, packing houses, chemical installations, and so on—and most people today are generally familiar with the size and cost of these units, as well as with the enormous cost of new developments involving basic research, pilot plants, and full-scale production. If they do not know the exact figures, they at least know that the cost is great, and that it is still increasing," he said.

"It took only a few thousand dollars to tool up for the first automobiles, but when Ford changed from the Model T to the Model A in the 'twenties, the cost of the change-over was a hundred million dollars. There was a time when oil wells could be drilled for from $20,000 to $50,000, but today deep-drilling costs about $250,000 per well, and a recent pioneer well drilled to explore the continental shelf of the Gulf of Mexico cost two million dollars. The initial costs of some kinds of capital ventures are so great today that it is a question in the minds of many as to whether even the biggest businesses are big enough to do the job. It makes an interesting contrast between the charge that business is growing too big and the charge that it is not big enough to handle modern economic developments."

Mr. Wilson predicted that the utility industry's eight to nine billion dollar expansion program over the next five years would increase total power sales from 240 billion kilowatt hours in 1948 to 363 billion in 1955 and would result in a 66 per cent increase in generating capacity over the present. He urged the utility executives to point toward doubling or trebling capacity; to institute a vigorous public relations program; and to sell electric power aggressively.

VETERANS PLAN ANNUAL PICNIC

The G-E World War Veterans' Association will hold its annual picnic Saturday, June 11, at the Log Cabin, off the Bass road.

The picnic will continue from 1 to 8 p.m. Tickets are available from contact men for 75 cents. Attendance prizes will be awarded, so every member should write his name on the ticket.

Elex Night Girls Arrange Smorgasbord-Theater Party

A theater party will be the highlight of the Elex night girls' meeting, June 16. Members will meet at the YWCA at 11:30 a.m. for a smorgasbord before going to the Emboyd theater for the movie, "Flamingo Road," starring Joan Crawford.

Tickets for the meeting are $1 each and are available from contact girls before Monday, June 13.

Company Prepares For Continuing Expansion Of Electric Power Use

The trend of constantly expanding consumption of electric power will continue for years to come, according to G-E President Charles E. Wilson.

In a report accompanying the first-quarter dividend of 50 cents per share to the Company's 250,000 stockholders, Mr. Wilson cited estimates of the Edison Electric Institute that electric utilities will install 6,700,000 kilowatts of generating capacity during 1949, and that the total of new generating capacity installed during the three-year period 1949-1951 will equal the nation's total power supply of only 25 years ago.

Based On Needs Up To 1960

Describing General Electric expansion in manufacturing facilities for generation and distribution equipment, he said that the Company's preparations today are based on an assessment of the electric power needs as far ahead as 1960. The new $30,000,000 turbine plant in Schenectady and expanded facilities for making transformers and distribution equipment in Pittsfield, Mass., and Philadelphia, Pa., are designed to help fulfill those needs, he stated.

"No single ingredient is more important in the nation's economy than the ability to produce electric power. No single factor contributes more to a continuing improvement in the standard of living," Mr. Wilson declared.

American utilities achieved a record production of 282 million kilowatt-hours of electric power during 1948, Mr. Wilson stated, in spite of handicaps carried over from the war and reconversion period.

Double Capacity Installed

Four and a quarter-million kilowatts of generating capacity were installed by utilities during 1948, he said, which is double the capacity installed in any previous year.

He recalled that "so much power was produced for the war job that in 1945 it was believed in some quarters that when business returned to 'normal' after the war, America's capacity to produce electricity would be seriously over-expanded."

He pointed out that the steady climb in electric power consumption showed "how far from the mark were these planners who believed utilities were over-expanding."

New Factory To Boost Rate

Mr. Wilson said that more than three-fourths of the electric power needs of America are supplied by steam-turbine-generators, which G-E will produce at a rate higher than ever before in the Company's new turbine factory virtually completed.

He pointed out that using the present facilities of the Company, General Electric in 1948 had set an all-time record in producing 65 large turbine-generators with a total of 2,720,000 kilowatts of generating capacity—enough to light and supply the power needs of a city the size of New York.

Honored By Friends At Retirement

When Almeda Fairchild left for retirement, her friends in Bldg. 17-3 joined to bid her goodby. Mrs. Fairchild is shown in the foreground of the above picture. Gathered around her are: (l. to r.) Ellen Dittlinger, Virginia Longardner, Gloria Zion, Isabelle Blackburn, Margaret Halley, Audrey Young, Wilma Burkholder, Nettie Huhn, Hilda Jensen, Luella Stabler, Anna Lehman, Verna Kohart, Jess Hahn, foreman; Lucy Alexander, and Erma Landis.

Thisa and Thata "SPECIALTY MOTOR"

by Helen Engle

We wish Henrietta Deck a speedy recovery from the fall she had, coming to work the other day. . . . Frank and Marie Devauz went to Niagara Falls for the week-end. Was it a second honeymoon, Marie? . . . Carol Easte paid us a visit last week. It's good to see you again, come again soon. . . . Helen (Hine) Guiellaume is having her troubles already. She had the nicest washing hung out when one of the posts broke, getting her nice wash all dirty. Better luck this week, Helen. . . . Happy days are here for Mae Fowler. She is getting a new G-E refrigerator this week. . . . See Herman Buuck and Al Rebber for the know-how of building chimneys. By the way, is your chimney straight, Mardo? . . . Happy birthday to Esther Madden and many more to follow. Oh, yes, and thanks for the lovely cake. . . . We extend birthday greetings to Donna Lindley, Helen Engle, Janice Egolf, Frieda Knoche and Edith Schriener. . . . Mary Nute and her Jim said the fishing was powerful good in Wisconsin over the week-end. . . . Grace Ober attended the Indianapolis races and ate plenty of fried chicken. . . . Robert Pence from the Assembly section sat on a can of black paint the other day, and take it from him he can prove that it leaves rings too! . . . Ruth Tutwiler and Mardo Tobias picked the wrong weeks for their vacations. Ruth planned on doing her housecleaning and Mardo had just gobs of outside work to do. . . . The employees of Division 1 extend their sympathy to Vera Fetro and her sister in the death of their mother. . . . The employees of Division 1 extend their sympathy to Arthur Witzigreuter in the death of his father. . . . Wilma Linker was called home to Michigan due to the serious illness of her mother. . . . The Welcome Mat is out to Ivan Parrish, Virginia Stephen and Betty Burnett in 1x29. Hope you're with us a long time. . . . Butch Claymiller, our electrician, is a big boulder lifter. He and Alice are building a house at Rome City and were looking for rocks to put in their foundation when Alice discovered a big one at the bottom of the hill and called to him to come and get it. He came with the wheelbarrow. After a struggle he got it loaded but he was worn out, so Alice said she would push it up the hill, imagine! She grabbed the handles and tipped it over spilling the boulder so Butch had another struggle. This time said he, "I'll push it up the hill" so he did but when he got up the first hill he too tipped it over.

Here and There in Building 17-4

by Maxine Baker

Since purchasing a new Lincoln, Cy Seymour has been given more advice and asked more questions! Only today he was asked if that was entirely a new car or if it was his old Ford with new fenders. Norb Lose wondered how it was pivoted in the middle or what kind of joints it had so that you could turn corners with it. Guess Cy has had a little trouble parking it in the parking lot, so Walter Lorenz told him the correct way to park a car in a parking lot. He must have read in Time magazine an article on how to park cars. Cy thanks everyone for their kind advice and timely questions. . . . Tony Miller has his thumb all taped up. He claims he hurt it playing ball. That's what he says. I heard from a very good source that he has been trying to start the Neptune again. . . . The gang presented Clara Gehring Kleint with a rooster as a wedding gift. All our best wishes go with it, Clara. . . . We heard Lyle Harshbarger planted his watermelons, muskmelons and pickles together. When he harvests his crop, we will report the results. . . . We hope Frank Olney enjoys his association with the gang and wish him lots of luck in his new assignment. Although Frank Moody has departed for Bldg. 4-6 we hope to see him often. . . . An anonymous friend sent the following verse to Clara Gehring Kleint and we though you might all enjoy it:

Eventually we must succumb
To destiny for which created
Perhaps it leaves us cold and numb
More often, joyful and elated.
Elated, when two hearts are tied
In common bonds thru smiles and tears.
But why did Clara have to hide
Her secret from us all these years?

Apprentice Broadcast

by Mildred Ellis

After a grand four-day vacation, we have observed an abundance of "sun-kissed" faces. Most of the fellows accomplished this in their own gardens and back yards—a few went fishing or golfing. . . . For advice on trout fishing see Merle Aughinbaugh. I was easily convinced that he was an expert fisherman, but I hear that he didn't have the same luck in convincing the fish. . . . That pile of debris appearing in the spot where the Wabash roundhouse was, is a result of faulty brakes on Rohy's Crosley. . . . Most apprentices, after receiving a few hours instruction on the gear machines, are able to cut teeth in a gear, but no one has ever turned out such fancy teeth as Merton Allen—and in such a short time. Methinks we will have to hire a dentist to help Mert out. . . . The big fishing party was a great success for the six draftsmen: Birkenheul, Bergman, Lahrman, Leffers, Rowan and Fremion, who went fishing and actually caught some fish. Residents of Pretty Lake have respect for their fishing ability now. Birkenbeul had to take all the fish home to prove to the Mrs. that he really went fishing. Whitie fished sans his polka-dot shorts—it seems the fellows had to use them netting some minnows. John Leffers was the only one of the gang that didn't catch a fish. But John claims he really doesn't care, for then he won't have to bother with cleaning them. . . . Carl Lommatzsch really has his troubles with his Pontiac. It seems that everybody and his brother is out to spoil the looks of Carl's car. Now when he parks in the lot he takes down the license number of the cars on either side of him. . . . Dick Nix has found out that Mics have a strange way of disappearing when Mort is around. . . . Last Wednesday's Special was baked Philadendrum. . . . The apprentice softball team came through their first league game in fine shape, winning 11-5. Kenny Zurbuck did a swell job on the mound allowing only eight hits. Birkenbeul's batting average is getting to look sick 0. 0. 0. You'd think a great big guy like him could hit the ball once in awhile.

Beucler To Represent G-E In Truck Roadeo June 12

Ed David, foreman in Bldg. 6-1, extends wishes of good luck to Melvin Beucler, G-E entrant in the Chamber of Commerce Truck Roadeo.

General Electric's truck drivers have elected Melvin Beucler to represent them in the Fort Wayne Truck Roadeo, Sunday, June 12, at Baer Field. The event is being sponsored by the Fleet Safcty Committee of the Chamber of Commerce Safety Council.

Mr. Beucler has driven 30 years without a chargeable traffic accident.

The actual driving problems which will be presented in the roadeo course are:

Winding backward and forward between markers to determine driver's ability to steer vehicle in close limits; offset alley; driving straight line between two rows of markers to determine driver's ability to steer a straight path; parallel parking in a given space; backing down alley to dock from adjacent 40 foot roadway; and diminishing clearance and stop line problem, to determine driver's ability to steer vehicle through a space that becomes progressively narrower and to judge clearance, also to stop at given line.

Winners in the various classifications will receive trophies and merchandise awards. Runners-up will receive merchandise awards.

For Family Washing there's no place like home

NATIONAL HOME LAUNDERING WEEK ★ JUNE 6-13

Frances Leach, Bldg. 26-3, is shown above operating a G-E flat plate ironer, which is on sale in the Employees' store for $160.60. The deluxe automatic washer behind her sells for $298.43, empolyees' price.

The General Electric Company, one of the leading suppliers of motors for home laundry equipment, will take an active part in National Home Laundering Week, June 6 to 13.

The commemoration will be staged throughout the United States and Canada by the American Washer and Ironer Manufacturers' Association, of which General Electric is a member. This will be a revival of a promotion event which resulted, during prewar days, in greatly increased sales and maintenance of employment at a time when there had been a seasonal downturn in preceding years.

During the week, appliance retailers will concentrate on home laundry equipment with advertising, promotions, and publicity. More than $10,000 in prizes will be given for the retail display windows best emphasizing the association's slogan, "For Family Washing, There's No Place Like Home."

Motors for G-E automatic washing machines are made in Bldg. 4-5 and Division 17 at Taylor St. makes motors for ironers and pump motors for the automatic washers. The DeKalb plant is the Company's major producer of motors for home laundry equipment. The plant produces motors for washing machines, dryers and ironers.

In the Employees' Stores, G-E flat plate ironers are on sale for prices ranging from $160.60 to $184.72. G-E rotary ironers are available to employees for $40.16 to $160.76.

General Electric's wringer washers range in price from $88.40 to $144.67, while the automatic washers cost from $246.18 to $298.44.

The employees' price for a G-E dryer is $200.96.

New interest in the home life for the Rathert's is now spent in the chicken park. We understand at least Willy has her Bantam chickens eating out of her hand. . . . Louie Botteron is still having difficulty in obtaining a hot rod. . . . Dale Irwin is very interested in selling his two cars for the purchase of one that will run. . . . Arlo Hawk was elated with the coin purse he had purchased for his wife, until he found out he could have bought one for just half the price. . . . Poor Elmer Buuck has been in trouble since the last downpour. The river is so high he has been testing his motor boat in a barrel of water. . . . We hear Harold Amstutz's favorite pastime on Sundays seems to be wrecking the side of his car. . . . Cleon Oyer's attention was distracted while driving home one evening when a couple of his fellow workers yelled at him. Just remember, Cleon, "The Life You Save May Be Your Own." . . . We have all heard of mothers saving their little girls' curly locks but Bob Kissinger gave Katherine Irwin a keepsake belonging to Oyer, and he can't afford to lose too many of his locks. . . . Fritz Vogt should be enlightened as to the operation of a cooler. It seems a few of the boys were playing golf and after the game Fritz treated them. However, he had only put a tray of ice cubes in it and filled it up with water. . . . Bill and Mac are so tired of the same old scenery that a new face put a glint in their eyes. . . . ATTENTION ALL MOTORISTS—Lottie McFarland is driving to Bloomington, Ill., this week-end, and it has been about 12 years since she last drove a car. . . . Orville Robinson has been having quite a time hauling the black dirt back in his yard since the last downpour of rain. . . . Tom Harber spent quite a thrilling week-end over Memorial Day. He and his friends cemented the log house. . . . Uncle Walt Niemeyer is quite upset over the ball games the Daisies have lost. Chin up, Walt, the season has only started. . . . We welcome to our division Esther Lotter, Alma Wilkinson, Thelma Culler and Emma Hindrick.

Named Temporary Chairman Of Mental Health Chapter

Herschel L. Smith has been named temporary chairman of the Fort Wayne Chapter of the Indiana Mental Hygiene Society. Mr. Smith is the safety engineer for the Fort Wayne Works.

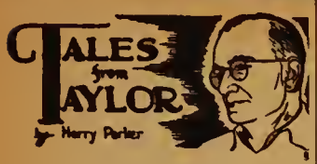
All the groups participated in a potluck dinner honoring Mary Hoffman on Tuesday, her last day at work. She is retiring after 22 years of service. At the same time she received a G-E iron and a pin. We all wish her the best of luck and health to enjoy her leisure. . . . We welcomed Park Schemehorn back to work after an illness of seven weeks. . . . Congratulations to Virginia Gebhart who celebrated her birthday May 26. . . . Paul Monroe has been suffering from a sore arm. It looked very much like a boil, but after being questioned he said that the mule bit him. Could be! . . . Oh the shame of it! Orville Stanton, known as Cannon Ball since he acquired the new Oldsmobile, was slowed down considerably when he found himself bogged in the mud at the Speedway. It took no less than a tractor to get him out of the mire and moving again. He still is willing though, to challenge all comers to race him "fair and square." . . . Roy Bracht plans to paint his house and has been after information on the easiest way to paint under the eaves. The last advice received was to lie down on the roof, reach over and paint from there. The advantage in using this method removes the danger of falling off the ladder.

It's nice to be the head of the house—but tough to have the headaches that go with it.

Police Lieutenant Is Here 30 Years

Lt. Edwin Koch, Plant Protection, celebrated his 30th anniversary with General Electric last Friday, when he received a letter congratulating him on his long service. Attending the presentation of the letter were: (l. to r.) E. M. Hanauer, Fire Chief; J. B. Greer, Supt. of General Service; Lt. Roy Weick; Lt. Koch, and A. R. Vegalues, Police Chief.

WHAT'S NEW IN PLANTS & LABS



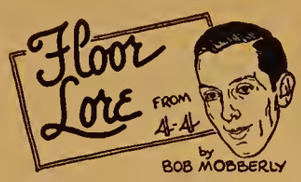
SYRACUSE—A single tone arm, with interchangeable pickup heads for playing both standard and long-playing records, is a feature of a new lowboy FM-AM radio-phonograph console now on the production lines at General Electric's new Electronics Park plant here.

SYRACUSE—Radio communication between mobile units over 70 miles apart began recently when the Fruit Belt Electric Cooperative installed a new General Electric carrier-operated relay system at Cassopolis, Mich.

Key unit in the FM system is a G-E 50-watt SC-201 transmitter-receiver located on a hill in a low noise level area. Transmissions on 158.25 mc from the central office or the Cooperative's trucks are picked up and fed directly into the relay transmitter. The signal is rebroadcast at 153.71 mc with the same percentage of modulation as the received signal.

SCHENECTADY—Contrary to popular conception, raindrops assume a variety of shapes—from pancakes to telephone receivers—G-E weather scientists have learned in controlled tests here. Rather than maintaining tear-shape, raindrops may change appearance as often as 50 times a second. Using a specially developed instrument, with which air is forced upward against a drop of water, stroboscopic pictures recorded action of the water drops. Calibrated eye-droppers were used in the experiments which are part of the general investigations into weather phenomena conducted under Project Cirrus, the cloud-study program of the Army and Navy in consultation with the G-E Research Laboratory. Periodic deformations of drops are described as being actually "oscillations." In each oscillation the drop assumes a new shape and then returns to the original shape. Oscillations are the result of a combination of the surrounding air pressures and the surface tension of the drop.

HARTFORD—The first G-E postwar mercury turbine-generator, using mercury vapor instead of steam to drive a turbine, has gone into service for the Hartford Electric Light Company at its South Meadow Station. Capable of producing 15,000 kilowatts of electricity, the new installation includes a mercury boiler in which mercury is heated into vapor, just as water is heated into steam. The vapor not only drives the turbine that turns the electric generator but also supplies extra heat to be used for the production of steam for other turbine-generators.



Now that Herb Saurer, our expert crow slayer, is working days we are afraid that the crow population will greatly increase as he was used to laying a lot of them low during daylight hours. He tells us that this change in arrangements will not affect his operations in the least as he has procured a powerful searchlight with which to hunt them out in their roosts. In this manner, he believes that he will be able to eliminate more of these black demons than ever. . . . Take note of this all of you readers and get your reservations in early as Art Brandenberger and Ward Grim have purchased new cabin cruisers for use on their respective lakes. Since these boats are of a goodly size permission to operate them on these lakes was refused. Not to be outdone they are planning on running excursions this summer from Madison, Ind., to New Orleans via the Ohio and Mississippi rivers. . . . Frank Blotkamp purchased a new table model radio and tells the boys that his purchase was made with money obtained from a suggestion award. But some of the boys are inclined to think that it was obtained by holding out on mamma. . . . For a long time we have heard nothing about Johnny Driver's famous 1934 Buick, but evidently it has begun to show off again. He brought the carburetor in this week and said that he was going to soak it good in vinegar to remove all of the scale that has accumulated down through the years, then give it a general good cleaning in hopes that the old boy will percolate again. We suggest that he soak the whole car in vinegar or throw a hand grenade into it. . . . Richard Wilkins, who was stationed in India during the last war, became a great lover of tea, especially India tea, as it has such an exquisite flavor and aroma. Drinking it is like sipping the nectar of the Gods. He explains that the leaves from the lower branches of the plants are the best as they seem to be more flavorful than the top ones. . . . The other afternoon on our way home from work we happened to observe Lawrence Ankenbuck standing in the middle of the vacant lots on the east bank of the St. Marys river. Occasionally he would wander around a bit then gaze intently skyward. We do not know whether he was star gazing or was just plain lost.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

Nature study is a very interesting subject, especially studying bees. We learned only recently of a curious habit Ted Schlup's bees have. It seems that if Ted works around them Saturday or Sunday they'll sting him, so Ted has to take time off from work during the week, to do his bee chores. Maybe they're organized bees. . . . It is reported that Ida May has found that rare thing, true love. After eight months of married bliss, Ida's head is still in the clouds. . . . Warm weather is here to stay officially, Elmer Warner has removed his long underwear. Cal Case is still a bit dubious, though. His probably won't come off 'till the thermometer hits 90. . . . We wonder if Paul Lichtsein's better half will ever hear of his winning a big pot last week. . . . Frank Elder is back to work from his recent illness. . . . Ed. Lepper is always forgetting trump in the daily noontime euchre game—very confusing to all, but possibly beneficial to Ed at times. . . . Wilber Ayers, from the appearance of his last haircut, must have borrowed Elmer Minnick's bowl. . . . Hay! Hay! you G-E farmers, Elmer Minnick says "for $10 a month pension, I'd stay home on the farm." There you are, fellows, there's cheap help. . . . Hugo Kleint, Bldg. 19-3, and Clara Gehring were wedlocked recently. Best of luck and the cigars were excellent. . . . Approximately two weeks ago Fred Bucholz and the Mrs. were driving along on Fort Wayne's east side, when an accident happened. Mrs. Bucholz was injured some, but we're glad to say that it was not bad. Here is the version of the incident as it was told to us: Freddie was clipping along at a fair pace and took his hands off the steering wheel saying, "Look, Mamma, no hands!" About that time a telephone pole jumped in the path of the car, and after it was all over Mrs. Freddie said, "Look, Papa, no teeth!" . . . Amos Schladenhoffen had better stop casting reflections on the high moral standard of Ted Schlup's queen bee, or he may be very, very, sorry. What if the queen bee did elope with a horsefly and fly off to Columbus, Ohio. We don't think that's any of Amos's affair. . . . We extend our sympathy to Luella Boyce in the death of her sister.

Getting used to the revised schedules around the plant, in order to meet the "deadline," is comparable to changing from central standard to daylight savings time. It requires keeping a calendar before you in order to know just what day it is! . . . We would like to tip our hat to Charlie Griffith, who during the past several weeks has been taking Bill Putt's place as foreman. It's a lot of responsibility, Charlie, but we all feel you have been doing a grand job. . . . In regards to Bill Putt, we are happy to learn that Bill is expected back soon. Everyone sincerely hopes you are feeling 100 percent better, Bill. . . . Belated congratulations to Mr. and Mrs. Jim Carey on the birth of a new daughter. Both parents are really pleased as they both wanted a girl. . . . The stork was indeed on a busy schedule as we learn that a former member of Repair and Return, Dick Lothamer, is the proud father of a baby girl! . . . We understand that a Smith named Ray, constructed a golf bag cart to assist him at his favorite summer-pastime. In the case of Ed (Chum) Bowser, however, Ed is going to build a cart to carry an adding machine around to keep his score! Perhaps you could persuade your chum to give you a few lessons, Ed. . . . From first hand information we learn that Howard Keppler made a necessary trip to the Taylor Street plant recently in the company of Carl Reeves. Carl proceeded down an aisle to discover that Kep was not behind him. Turning around Carl noticed Kep looking at something in his hand. On closer observation, Carl saw that Kep had a compass and was getting oriented with the place. A huge plant isn't it, Kep? . . . We extend a speedy recovery to Clarence Didier and his wife, who are now at Mayo Brothers Clinic. How about dropping them a card, folks? . . . The office has acquired a new look with the addition of all of those fresh cut flowers on Nena Foster's and Voyce Brumbaugh's desks. They certainly add a pleasant touch, girls!

YOU'LL JUMP FOR JOY...

G-E Club Holds Old Fashioned Dance

Several hundred G-E employees set back the clock recently at the G-E Club's "Old Fashioned Dance" when they swung their partners to the tunes of bygone days. Favorite dances were old timers such as "Adam and Eve," "Cheat and Swing," "Old Arkansas," "Bird in the Cage," "Butterfly Whirl," and "Swing to the Wall."

Calls of "Do si partners, Do si corners, but don't get a fall," echoed to the favorite tunes of past generations, still popular today. It was all fun and plenty of exercise for everyone, as the above pictures show. Joe Taylor, Bldg. 27, and his Red Bird recording band provided the music.

Our we-wish-you-happiness mat is out for Alice Kreiselmeyer and Franklin Loftus who will say "I do" tomorrow afternoon. . . . Floetta Zartman and Doris Ryan enjoyed a Dutch treat. They went to the tulip festival at Holland, Mich. . . . If you see a flashing new Nash coming down the street, chances are that it is Edith Beaty. She had a long wait, but finally it arrived. . . . That wasn't an Indian war dance that Walter Kryder was doing. He just was hopping mad because a wire got in the way of his trouser leg. Violet (Good Deed Dotty) Brower came to the rescue with her little sewing kit. . . . Clara Fulmer, a former co-worker, has gone home from the hospital. Her address is 320 Cornelia St., Hicksville, Ohio. Let's send Clara a card. . . . We are glad to hear that Lucille Miller is better. Hope you are back soon. . . . Ethel Perry paid us a visit last Thursday. Glad to hear you are better too! . . . Bill Martin must have a new sideline. He was seen going around the other day carrying the sign, "maid." Whoever heard of maid service for a winding machine? . . . At the same time Mildred Huntine was displaying "do not disturb." (Must be a genius). . . . Belated birthday greetings to Charlie Francies, also happy birthday to Chester Hill. . . . Hello to Ovid Holmes, Jr., and Florence Schlosser, newcomers to the early bird shift. . . . We can expect Esther Reiter to have a housewarming party (we hope) since she is in her new home. . . . Do you want your hair brushed, but good? Ella Arn will give you a free demonstration with that new brush they have on the 534 line. . . . Does Walter need glasses or is Nina shrinking? While looking right at her, he asked if she was in that day. . . . Lowella Koogle rushed home last Friday because she thought her husband had mashed two of his fingers. When she got there, all he had done was mashed two of his fenders. She bought him a box of candy because she was sorry for him, and since he wasn't hurt, she ate the candy herself. . . . Jo Ann Kemery bought a watch dog to keep the tramps (not wolves) away from her door. . . . Ann Kensill just loves (?) mice. She screamed with delight when one ran across her shoe the other day. . . . Mary Shumm has acquired a little kitten. She is undecided whether to call it Harry or Harriett. . . . Keys, keys, who has the keys? That is what Ruth Lemmert was asking the other day. . . . Bob Walt has come up with a new idea. He is going to get an electric motor and have wires strung across the lake, so that when he goes fishing he won't have a dead battery. Better take some oars along. . . . What is this we hear about Jerry hanging on a Christmas tree? . . . Ethel Keller spent last week-end at Turkey Run. . . . Ann Kensill went to the races at Indianapolis. . . . Mabel Schaaf went to Pierceton. . . . Velma Seibt visited at Wabash.

Testers Receive Resuscitation Training

R. K. Drake and W. R. Hunt are shown receiving artificial resuscitation from J. H. Keith and M. W. Heller. Watching the demonstration are: (l. to r.) M. L. Poling, A. G. Kurtz, Harry Hedglin, W. G. Hofer, R. H. Cole and Ed Cade, instructor.

The picture, above, shows a class in first-aid receiving a refresher course on artificial resuscitation. All new electrical testers are required to take this training upon employment and each month for six months. They then take a refresher course every three months. The instruction is given by Ed Cade, Bldg. 20-2.

The prone method, shown above, is used throughout the Company for first-aid treatment. Mechanical resuscitators are in limited use in some plants, but they may be used only by trained personnel.

Melba Ingram is Melba Ingram no longer—now she is Mrs. Robert Kelly. Melba and Bob were married last Saturday afternoon at St. John's Lutheran Church. After a short wedding trip to Niagara Falls, Melba is now back to work. She would like to take this opportunity to thank the entire gang for the lovely set of dishes and coffee maker which she received from them. We're glad she liked them and now we're waiting for an invitation to Sunday dinner. Seriously, Melba, we do wish you and Bob all the happiness in the world. . . . We are glad to welcome Tom Dent back into the fold. We hope your health continues to improve with each passing day. . . . Some people have all the luck—Harold Miller is on vacation this week. When asked what he was going to do, Harold replied, "Work around the house like all married men on a vacation." . . . Birthday greetings this week to Doug Blessing and Earl Munson. . . . Vera Kruge has been insisting that I retract a statement I made a couple of weeks ago in the WORKS NEWS. She informed me very politely that she does not roll gutter balls as I stated. After watching Vera bowl the other night I'm inclined to believe her. Sorry, Vera. . . . Today we say goodbye (temporarily, I hope) and the best of luck to Cecil Strong, Blaine Webster and Jim Laisure. When you have time, fellows, drop around and see us anytime. . . . Casey, when you want a new coat, why don't you just go downtown and buy one instead of trying to wear one home from the office. The stores downtown have a much larger selection than our office force from which to choose if you want to buy one, but if you only want one, try the restaurants. We would hate to see Faye Jordan walking home these chilly afternoons without her coat. . . . "All problems become smaller if you don't dodge them, but confront them. Touch a thistle timidly and it pricks you; grasp it boldly and its spine crumbles."

Our friend Eleanor Lambroff was married in Gary, May 29, and we were told she was a very lovely bride. Alma Witte and Thelma Stapelton went to the wedding, but they almost didn't make it. They got on the wrong road and were within 22 miles of Chicago before they discovered they had missed Gary. They turned around to head back toward Gary, but this time they turned the wrong way so after three tries they finally arrived in Gary. Alma, what are you going to do when you try driving to California this summer? Dorothy Vetter and her husband also went to the wedding and they all had a wonderful time. . . . Several other lucky people in the office made trips over the week-end. Ralph Dennison and family went to the 500-mile race at Indianapolis. Ann Smith and family went to Huntsville, Ala., to see her newly married sister and Norma Bastian went to Charleston, Ill., to visit her grandparents. . . . Pat (Dolan) Morey is back to work today after a ten-day honeymoon in the Smoky mountains. . . . Poor Perry O'Neill didn't get to go anywhere, but he is sure going to make up for it when his twin daughters get a little older. He said they must have known he had some time off because they really outdid themselves to keep him awake. . . . We were very sorry to see Joan Liebig, Vera Schweir and Evelyn Harges leave our office family last week.

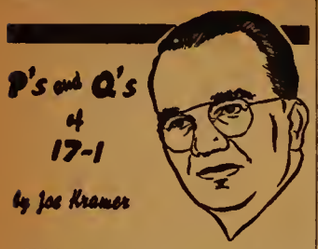
Tricks In Transformer

—FROM DIVISION 91—

By Johnny McMaken

There are many fellows who brag about the fish they catch or the rabbits they shoot, but when Everett Jones and Dean Smith go mushroom hunting they really bring back the proof. . . . Herman Gebert brought in his baby picture and was showing some of the fellows what a beautiful baby he was. . . . Some people say anything can happen, and now I believe they are right for Charles Mathias bought a '48 Chevrolet to go courting in. Beware all you gals. . . . There seems to be a bit of jealousy in our office lately. Lowella claims Mary is receiving all the candy, roses, and cake. We would like to know who this secret admirer is. . . . If by any chance anyone sees Mary on her hands and knees, do not be alarmed. She is just running her trap line. It seems as though another character has moved in. . . . Fred Thieme is all smiles again now that he has found his rhythm, which has been lost for the past week. As you well know, Fred has greater efficiency when he has that rhythmatic motion. . . . Ralph Milligan seems to be still in the market for a good Ford. He is always getting a demonstration, especially on week-ends. I wonder who he sells cars for. . . . That fellow behind those green glasses Thursday was none other than Gerald Crum. It seems as though Gerald did some polishing on that new red Chevrolet and got some red paint in his eyes. . . . Eddie Daucher requested we provide him with a new fishing rod from our next collection. What do you say, boys, ready for another collection for sports. . . . It seems as though some people just naturally have troubles in whatever they do. One of these persons is Luther McConnehey who claims he cut his thumb drying the dishes for his wife. Really, I don't believe it was the cut he wanted to tell about. He just wanted the boys to know he helped his wife with the dishes. . . . Lorenzo Smith is another one who always seems to be having his troubles. He went fishing and burned up his car. I just wonder does anyone have to be traveling that fast just to go fishing? Lorenzo said it was a pretty expensive fishing trip.

Michigan Mushrooms

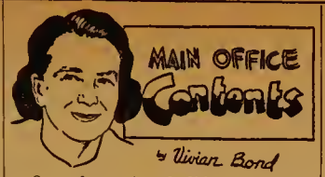


When Everett Jones and Dean Smith, Bldg. 26-1 (l. to r.) went mushroom hunting, they meant business. Here is proof that their story about 4,000 mushrooms was true. Those delicious steak-toppers were gathered northeast of Lake City, Mich., three weeks ago.

FATHER-DAUGHTER PARTY IS SCHEDULED TONIGHT

The Elex day girls' Father and Daughter party will be held tonight in the Kreis Stolzenau hall at 8 p.m. Susan Jones, Winter St. Works, is in charge of arrangements.

Joe Taylor, Bldg. 27, and his band will be featured on the program. A Dutch lunch will be served after the entertainment, and each father will receive a gift.



With the arrival of sunny weather and spring housecleaning. Wally McKay decided to wash down the front of the house (we wonder who decided). Wally wasn't satisfied with just washing the house and the front sidewalk, but it has been reported that he was seen washing the street in front of his house. . . . We have read in numerous newspaper ads that shade improves the flavor of coffee beans. Frank Martin and George Mosshammer being demon agriculturists have decided to let the weeds grow in the bean patch. They claim that if shade improves coffee, just think what it will do to green beans. . . . We are happy to report that there were no casualties suffered in Monday's excursion to the lake, although Helene Evanoff wanted to get her shoulders tanned and forgot those illusive little strings were untied. . . . Bill Grimm is looking for a shotwell baker tapper. Anyone in 72 group knowing of the location of this machine, please give Bill complete directions. . . . Ivan Ford is in the goat business again. With an increase in Ivan's goat family, he is looking forward to being able to provide more homogenized goat milk. Ivan guarantees that the milk has been homogenized by nature. . . . A welcome visitor to Bldg. 17-1 last Friday was Ralph (Cowboy) Beerman. At least he was welcomed by Mike Kramer. . . . It is good news today. Ed Arthur has just announced the big sale of pants at half price. Ed says, "With each suit you buy, you get an extra half-pair of pants." . . . We are glad to welcome Leo Nyboer back to work after his recent illness. We can report that Leo only lost 26 pounds, and he is gaining them back very rapidly. . . . Among the bachelors of the week, we find Harold (Red) Braden. Red's wife went to visit her folks in Ohio for a week. Red says, "The cooking he's been getting since she is gone is worse than when he was in the Army." . . . We have listened to some of the fish stories that float around during this time of the year, but decided to believe the ones told by Merlin Wagner. Wag brought us some of the nicest bluegills we have had the pleasure of eating. Thanks a lot, Wag. . . . We thought our eyes were deceiving us last week. While talking to Bill Walt, we looked up and thought we saw Bill coming in the door, but it was none other than our former associate Arnold (Fat Boy) Berning. We were glad to see you, Berning; why don't you drop in to see us more often. . . . Since Bob Taylor has moved to the desk formerly occupied by Charlie Lauer, Frank Hickman doesn't know which of the two desks he is supposed to use. Frank can be seen sliding his chair from one desk to the other. He has already used up a can of oil and two sets of casters. . . . Argend Denney was sure glad for the three-day holiday. He spent his time cultivating his garden. Denney says the main things he is raising this year are peas and potatoes. See Denney for any further information. . . . Since publication of last week's WORKS NEWS George and Frank, the vegetable kings of Bldg. 17-1, have informed me that due to the rush on onions, they have now set out two rows 85 ft. long. . . . Virgil Hartman reports a very enjoyable three-day holiday. We wonder if he visited old friends in Tiffin or Pennsylvania.

4-1 Floorage

By Marie Lantz

Here we are—a new face in a new place—and we have been asked to cover the floor! At best, we'll barely beat out bits of dirt for our beginning. . . . To Henry Schwartz here's belated good luck greetings. Henry retired May 7. In remembrance the fellows of Bldg. 4-1 presented him with a gift of $25. . . . Did the choo-choo miss you? A trip through the much talked about Train of Tomorrow proved it to be a treasure of transit. And that reminds us—at one time Bill Oberlin was passenger agent for the Pike's Peak R. R. in Colorado Springs, Colo. Yet Bill's better half has traveled by train once in her life—that at the tender age of five. . . . There are four girls on Bldg. 4-1's factory floor and two of us bear the same surname. Oddly enough, we were not acquainted previously. Helen hails from Hicksville; your scribe is a Wayne-ite. . . . We extend a fond farewell to David Bartle, our machinist who transferred over to Taylor this week. . . . They say there's a present meat shortage—none-the-less one can usually find Bear and Trout at Bldg. 4-1's south end.

Our three day holiday over, we hope safely for everyone, we are trying to settle down to the usual routines. The word "safely" stands out very vividly in my mind when it is not possible to drive down Fairfield Ave. at 5:30 without seeing one or more accidents. It is surely time for all drivers to take an inventory of their driving habits. You know someone is always wrong!

Shades of Jack Benny

The only resemblance to Jack Benny in this story is his ability to play his favorite violin solo, "The Flight of the Bumble Bee." The bee in this story did not stay in flight! F. L. Peternell of Bldg. 18-2 was preparing his new cottage at Lake Gage for the final big move. A bee took "Custer's Last Stand" and after much maneuvering Pete was able to carefully eject the bee. Being a lover of all small animals and insects Pete, of course, could not kill the bee. Gently escorting him to the door to set him free, the ungrateful bee turned on his benefactor, the battle raged on with the benefactor losing! The moral to this story is: If a bee wants to be in your beautiful new cottage be sure to let the bee be. . . . Mr. and Mrs. Ralph Clark and nephew Frank spent last week-end at Greenfield Village near Detroit. . . . Mr. and Mrs. T. T. King have returned to their home in Arcadia Court after spending the winter months in Nebraska with their daughter and son. Mrs. King is slowly recuperating from her back injury received in a fall.

All G-E Wedding

Mr. and Mrs. Ezra Garringer (Wilma formerly was second shift supervisor of the works and Ezra works in Bldg. 17-4), announce the approaching marriage of their daughter Joan, Taylor St., to Joseph Hile, Bldg. 4-6, to be solemnized June 4 at the Trinity Methodist Church. . . . A. S. Johnson has returned from Camp Lee, Va., where we are sure he enjoyed a military leave. . . . The General Electric friends of Mr. and Mrs. Clarence Didier will be surprised to know that they are both in Rochester, Minn., where Zoa underwent surgery May 17 and Clarence is receiving treatments. . . . Last week, Doris Rhonemus and husband, Bldg. 18-3, enjoyed a week-end in Michigan City and Chicago. . . . Did you know that Marshall, Mich., is just 90 miles north on route 27? Why not take a Sunday off and enjoy the lovely scenery as well as a very special meal at Schueler's Hotel? It is a big time restaurant in a small community—this is not a paid advertisement—just plain facts. . . . Betty Jean Rose, Bldg. 18-1, underwent minor surgery at the St. Joseph hospital Tuesday of last week and is convalescing satisfactorily. . . . To Chester Lichtenberg, may we extend our congratulations (sorry to be one week late) upon your completion of 42 years with General Electric Co.

Howard Miller—Please Note

To leave a car running for about three and a half hours, while parked in the yard is mighty hard on the gasoline supply to say nothing of your battery. (It is a little trying on one's usual good disposition, too, isn't it, Mr. Miller?) It is nice to have unknown friends who bring the sad tidings, isn't it? Could have gone on for the full eight hours! . . . Al Tharp, Bldg. 18-4, is to be complimented on his sale of poppies on Poppy Day. . . . Paul Lenz of Bldg. 18-4 is very proud of his new Chevy. When he makes up his mind he wants quick service. Bingo! and he has a new car. . . . Nel Joy, General Accounting in Bldg. 18-3, left G-E Friday to join her husband in Muncie. She was presented a farewell gift from her friends.

Dr. and Mrs. H. W. Garton are entertaining their 14 months old granddaughter, Barbara Jean Ulrich, from Minneapolis, Minn. Such active little youngsters can cause plenty of stir and excitement—and how the grandparents do love it! . . . Now that Mabel Wilson received a cookbook for her birthday, we expect to be reporting on her cakes. And we don't mean pancakes either! . . . The long holiday week-end was welcomed by all. Some planned trips, others visited relatives and some had guests in their own homes. Several went to the various lakes to get ready for a full summer season. But with all of the activity, there still was an abundance of time to pause in memory of the ones who have laid down their lives. . . . Alta Bishop spent the week-end holiday at Niagara Falls, N.Y. . . . Dr. Harvey L. Murdock was in Indianapolis Wednesday, attending the Annual Trudeau Society Meeting. . . . Thinking backwards: The thoughts of badges and their different types and significances came to mind. I distinctly remember the badge that was given to me when I was a news-gatherer for our weekly Convoy paper. It was inscribed "Reporter No. 3 (there only was one!), Convoy Signal-News," and was made of a heavy metal. Also a harnessmaker fashioned a star out of leather to serve as a badge. The paper no longer exists but these old badges are treasured souvenirs. . . . Mr. and Mrs. J. L. Mulvane and son Forrest, visited Mr. Mulvane's father at Robinson, Ill., last week-end. . . . Bertha Schrader spent last week-end at Napoleon, Ohio, where she attended the high school commencement exercises of her nephew, Robert Gilson. . . . Alta Bishop has a new nephew, Dale Rittenhouse. He was born last Saturday in the Defiance County Hospital. . . . I believe that one reason why there are so many people who are restless, dissatisfied and disappointed, is that they have no bright and glowing object before them, no star to which they can hitch their wagon. (George Matthew Adams).

Again we have news on the Holland Tulip Festival. It must be a beautiful event as we get yearly reports on it. Esther Harmon and a few of her friends motored to Holland last week-end. . . . Relatives in Ohio had Dorothy Heimann as their week-end guest. Her relation happens to be her sister who lives in the Buckeye State. . . . To Effie McGill's surprise she purchased a new dark green Plymouth. She intended to fix her old trade-in but the cost set Effie's decision on the new four-wheeled buggy. No speed demon record, Effie, or we'll have to lay down the law. . . . Ada Owens has been absent from work several days this week. A little rest and she'll be on her job good as new. . . . For a change we will give you a new magic trick you can perform for your friends as a very interesting dinner table experiment. In as much as Christopher Columbus has been given credit for doing the balanced egg trick, we will give you the lowdown on the technique. Method: Shake the egg so that the yolk will settle. Then set the egg carefully on the table, and as the bottom of the egg is heavier than the top, it will be possible to balance the egg on end. Let's hear from some of you magicians on how you get along with the hen fruit. Watch your next week's news for your second trick. Short week, short news. Please won't someone help us by telling us some news items. . . . About 40 of the boys had a buffet supper under a tree as a farewell party for engineer Lew Gossman. As a parting peace offer, everybody gathered around while Lew's seven poker playing pals let him win two pots in a row. (Ed. note—Easy Come—Easy Go. Final reports show that seven men won at poker that night, Gossman was out of town and could not be interviewed). Bob Huffman, Lew's successor, was here getting the lay of the land and Hap Carter came along for the ride. While waiting he took lessons in wild poker from John Welch and Hary King, Dick Steele assisted, and Frank Braun gave up. Lew received a set of woods as a gift and a subtle suggestion that his golf game could stand improving. Lew in turn presented Bob Huffman several folders of unfinished business. Luck to you, Lew, and welcome back, Bob.

JUNE 6 THROUGH JUNE 10

BROADWAY TAYLOR STREET

Serving Hours:

Cafeteria—16-1 11:00 A.M. - 1:00 P.M. 10:48 A.M. - 12:30 P.M.
16-2 11:00 A.M. - 12:30 P.M.
16-1 6:45 P.M. - 8:12 P.M. 6:55 P.M. - 7:30 P.M.
Restaurant—16-2 12:00 M. - 1:00 P.M.

MONDAY, JUNE 6

Tomato Barley Soup	Split Pea Soup
Roast Pork	Breaded Pork Loin
Beef and Noodles	Ham and Limas
Hamburger Sandwiches	Barbecue Sandwiches
Mashed Potatoes	Whipped Potatoes
Stewed Apples	Apple Sauce
Buttered Peas	Buttered Whole Kernel Corn

TUESDAY, JUNE 7

Bean Soup	Tomato Noodle Soup
Baked Ham	Roast Beef and Dressing
Beef Stew	Wieners
Barbecue Sandwiches	Ham Salad Sandwiches
Escalloped Potatoes	Whole Browned Potatoes
Buttered Green Beans	Buttered Green Beans
Harvard Beets	Sauerkraut

WEDNESDAY, JUNE 8

Chicken Noodle Soup	Bean Soup
Wieners and Hot Potato Salad	Baked Ham
Chicken Pie	Chicken and Noodles
Bacon and Tomato Sandwiches	Hot Roast Pork Sandwiches
Mashed Potatoes	Whipped Potatoes
Wax Beans	Buttered Broccoli
French Fried Egg Plant	Buttered Squash
Glazed Peaches	Sweet Potatoes
	Corn Bread

THURSDAY, JUNE 9

Corn Chowder	Vegetable Soup
Swiss Steak	Swiss Steak
Ham and Limas	Beef Stew
Ham Salad Sandwiches	Hot Dogs
Mashed Potatoes	Whipped Potatoes
Corn O'Brien	Buttered Cauliflower
Buttered Broccoli	Buttered Peas

FRIDAY, JUNE 10

Cream of Tomato Soup	Beef Barley Soup
French Fried Fish	French Fried Fish
Roast Beef	Smoked Sausage
Chopped Beef Sandwiches	Hot Roast Beef Sandwiches
Mashed Potatoes	Fried Potatoes
Buttered Spinach	Buttered Limas
Glazed Carrots	Creamed Tomatoes

Wide selection of home-made pies and delicious salads served daily.
Breakfast served at Broadway daily from 6:20 to 7:50 A.M.

Special dinners and parties arranged upon request.

Menus subject to change.

Not to be outdone we now have Joe Banks of the Power House, coming out with a new Packard. It so happens that there is a luminous dial on this new car of which Joe was not familiar. When he arrived home late from work and turned off all the gadgets, he still saw a light on the panel. He adjusted every button trying to find the light, until in desperation he gave up. Don't you think you should have gotten some "up to the minute" instructions on that snazzy car, Joe? . . . The gang at Taylor St. are wondering where Carl Friend got that bathing suit he was showing around last week? . . . Some fellows have their initials printed on their lunch boxes but not Charlie Hartman, he has a teddy bear. 'Fess up, Charlie, did you put it on there? . . . That streak of smoke going out of the Taylor St. parking lot is George Wralstad's car. He says it isn't burning up, he just had the motor overhauled and it runs like a top. . . . We are glad to see Dewey Heaston and Roy Taylor back to work after long illnesses. . . . The poker game boys had a housewarming at Cliff Thiebolt's new home last week. . . . Folks, watch for these "way back when" items that will appear in this column now and then and don't hesitate to send in your favorite story on some of the old timers around here. For instance, there are a few boys in our midst who remember this one. It was about 20 years ago when Johnny Lare took a level home and was having so much difficulty using it, called Don Brayer and stated his woes. Don decided to lend a hand and went to his rescue, only to find Johnny confused and perplexed, peering through the wrong end of the level. . . . Birthday greetings to Tez Trump, George Wralstad and Harry Nickels.

Inquiring Reporter:

DO YOU THINK THAT PEOPLE EXPECT TOO MUCH OF THE GOVERNMENT TODAY?

CARL VIZITHUM
Bldg. 4-6

"Yes. We are not cooperative enough by voicing our opinions with postcards and other means to the legislative bodies on various important matters. We are the government and should take part in it. The increasing cost of running the government is due to expecting too much. The more we expect the more it will cost."

CARL K. WAGONER
Bldg. 6-1

"Financially, yes; too many expect aid instead of trying to work. Service from our Congressmen, no; too many are playing politics. There are too many Democrats and Republicans in Washington and not enough Americans."

RUTH SHOUP
Taylor St.

"The men and women running the government are chosen by the people, and we expect them to live up to the promises that put them into office. I do not believe people expect too much of the government today."

ARLO C. HAWK
Taylor St.

"I think most people do expect too much of the government today, because they do not realize the many problems that there are to contend with due to the condition of the world."

MARY M. WIEDMAN
Bldg. 26-3

"I believe that most of the people expect a lot from the government today. The people in countries abroad expect aid in the form of food, clothing and arms from the U.S. The people here in our own country take many of our privileges for granted and expect many more without the cost of taxation."

Nearly Half Of All G-E Employees Are Participating In Savings Plans

Approximately 79,770 employees of the General Electric Company, about 46 per cent of the total employment, were participating in the Company's savings plans as of March 31, according to John D. Lockton, G-E Treasurer.

Subscriptions for the purchase of U. S. Savings Bonds under the new G-E Employees' Savings and Stock Bonus plan and the U. S. Savings Bond Plan, established in 1941, total some $28,226,000 in annual payroll deductions representing 4.8 per cent of the Company's total annual payroll, Mr. Lockton said.

This total does not include some 3,700 employees of General Electric affiliated companies subscribing to the savings plans at an annual rate of payroll deductions amounting to $1,154,000 or 3.4 per cent of the total annual payroll of the participating companies, according to Mr. Lockton.

G-E Plans Aid Campaign

Discussing the U. S. Treasury Department's forthcoming bond sales campaign, the G-E Treasurer said that "the very high participation in the Company's employees savings plans should be of material assistance to the campaign in the many localities where the Company operates." The U. S. Treasury Department drive is being held May 16 through June 30.

Describing the G-E Employee Savings and Stock Bonus Plan, now in operation seven months, Mr. Lockton said the plan provides that employees, who by payroll deductions subscribe for the purchase of U. S. Savings Bonds, Series E, are eligible for payment by the Company of a 15 per cent bonus in G-E stocks on the cost price of bonds which they purchase.

Payment of this bonus is contingent upon the participating employee leaving the bonds on deposit with the Company for five years following the end of the year in which the bonds are purchased. The first five-year "holding period" during which the bonds remain on deposit commenced Jan. 1, 1949.

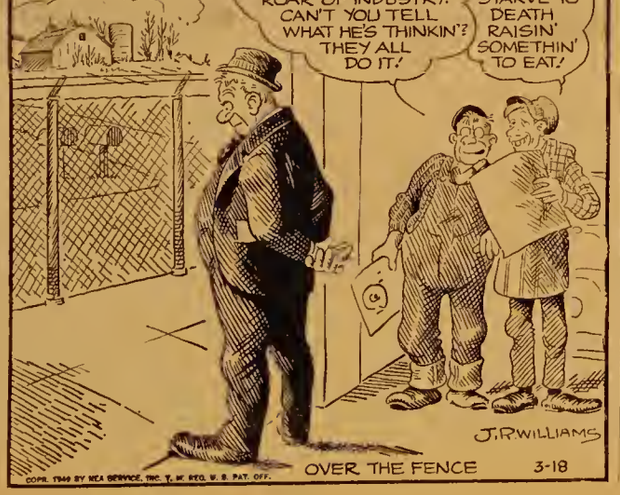
May Withdraw Any Time

Regardless of the "holding period," any employee may withdraw from the plan at any time and recover whatever he has paid in, both in bonds and any cash balance in his payroll deduction, and any accumulated income to his credit representing dividends on the G-E stock. He will get the stock bonus, however, only if he leaves his bonds on deposit for the full five year "holding period," Mr. Lockton said.

For those employees not wishing to participate in the Savings and Stock Bonus Plan, the Company's U. S. Savings Bond Plan, permitting the purchase of U. S. Savings Bonds by means of payroll deductions or by cash, has been continued.

Mr. Lockton estimated that approximately 13,000 employees are buying bonds at an approximate rate of $4,716,000 under this older plan. Bonds purchased by employees under this plan are delivered to the employees as soon as they can be issued.

An oyster can't be human—it keeps its mouth shut part of the time.



SLEUTHING in 4-6

by JOAN POOS

THE BELLS TOLL: Joan Garringer and Joe Hiles became man and wife Sunday. Congratulations and the best of luck to you both. . . . SPOTS BEFORE YOUR EYES?: Last Thursday there was a very bright spot in the DC Section near one of the windows. Further investigation disclosed that it was a new yellow and brown tee shirt owned by Gil Baker. . . . "GLAD TO SEE YAH": Welcome back to Bob Kirby after a 10-day illness. Hope you are all right now Bob. . . . ANOTHER SUCKER (EXCUSE ME): The members at large wish to welcome Denton Manecke into the floor sitters club. Another person has proved that the floor is stronger than he is. . . . DOG TALK: Betty Rose is limping these days. It seems that she was taking her dog indoors after a walk. He decided at the last moment to stay outside and have a good unhealthy fight with a younger dog about three times his size. Betty fell and bruised her legs, especially one knee—and the dog—he's limping too. . . . "CHEW" HER OUT: . . . By all indications, Phyllis Hines was attempting to put over a few thoughts to Gwen Steinbarger one day in the hall. Phyllis lost her gum in the process and after a thorough search finally found it stuck to another purse. . . . GOLF "GUFF": The struggle for greater distance of golf drives goes on. We've heard about silicon rubber centers in golf balls. Now Jack Jennings talks about flywheel action balls in which weight is distributed away from the center of the ball resulting in greater spin and greater distance if the spin is overspun as obtained in a hook. What next, maybe some kind of jet gun for launching them in the air from the tees. . . . HAPPY: Birthday to Betty Garber, Payroll Section, and H. P. Love, DC Section. Their parents were overjoyed on a May 25 in the past. . . . EXTRA: Walter Brake was seen delivering stationery the other day. You make a very cheerful and cute messenger, Walt. . . . We were happy to see both Zoller boys pay us a visit last week. . . . OUT OF TOWNERS: Bob Sharrow had a happy vacation in Wisconsin. . . . Bill Pringle took his family for a drive through Illinois, Iowa and Wisconsin over the holiday.

OUT OUR WAY

By J. R. WILLIAMS

Safety Engineer Visits Here

H. L. Stevenson, foreman, and W. H. Evans, Schenectady Works Safety Engineer, watch Lloyd McClure operate a punch press.

W. H. Evans, Schenectady Works Safety Engineer, toured the Fort Wayne Works last week as a part of the inter-works inspection program which was inaugurated recently by the Apparatus Department's safety committee.

Each safety engineer has been assigned to visit a different works. Herschel L. Smith, safety engineer for the Fort Wayne Works, will tour the Erie Works.

These inter-works visitations have been adopted to enable safety engineers to inspect methods and exchange ideas for the improvement of safety and health measures.

In the photograph, above, Mr. Stevenson and Mr. Evans are shown discussing the two-hand control on a punch press.

FRACTIONAL ACTION BLDG. 4-5

by LEOLA CARRIER

We all wish the best of luck to Charlie Trey who retired May 31. Charlie started to work in 1915 in the meter division which was located where the cafeteria is today. He then transferred to Bldg. 26, then came to Bldg. 17-2. He worked there a short while and then came to Bldg. 4-5 during the first World War and has been with us until his retirement. His friends and coworkers surprised him with a lovely gift a fly rod and all the equipment to make a fisherman happy. They also gave him a pipe engraved with the date of his retirement, and in the card was money. Charlie stated that they couldn't have gotten him a gift that he appreciated so greatly. We do know Charlie is an outdoor man and we know he would enjoy the gifts. . . . We congratulate Jess Haffner, who was married last week-end. The newlyweds spent the week-end in Chicago and saw the Cubs and Cincinnati Reds ball game. . . . According to the chatter of the co-workers, everyone enjoyed the holiday. The most comments were: wasn't the weather grand! Wilbur Shaw, president of the Indianapolis Speedway thought the same thing, for he stated, "God must be a racing fan too, for He had wonderful weather for us." . . . How many of you saw the Memorial Day parade? To some it brought back sad memories, but to others it gave quite a thrill to see our young men march, who fought on battle fields to make democracy live. . . . One of our co-workers saw Charlie Kaiser who is now retired. Charlie sent his regards to his friends. He also stated, "Let's have more news in the Bldg. 4-5 column," so come all of you help make the news. . . . Greetings to Dick Young who celebrated his birthday, and also to Ed Rodenbeck, who celebrated his wedding anniversary last week. . . . We wonder if anybody can compete with Chris Stauffer in chewing gum and sleeping at the same time. . . . It will be hard to keep in touch with Louis Hickernell since he has that new car, Chevrolet, that is.

2-2 TALES

by BELLE BUCHAN

Dorothy Askren is thinking of buying a station wagon or perhaps even a small truck. Her car has become entirely too small, now that she is hauling a small army around. . . . You just haven't lived until you have watched one of our noon hour card sessions. How those guys can whoop it up with Howard Schultz and Bruce Rohn doing most of the whooping and with Harold Boles putting in his little peep now and then. . . . We extend a welcome to two new girls in the office, they are Olga Welch and Lucille Werling. . . If you see everyone in the office wearing sun glasses, it isn't because of the sun. It is just the new yellow shirt that Perry Esterline is wearing these days. . . . And speaking of shirts, Jack Welch is doing all right for himself too; says he isn't color blind, but we are not so sure. . . . The Birthday Club held its regular meeting at the "30" Club in Columbia City recently with Dorothy Askren as the girl with the birthday and Laurel Weaver as hostess. Those present were Dorothy Mills, Eileen Hennen, Olga Welch, Katie Scherer, Florence Knight, Jean Pappert, Dorothy Askren, Norma Krall, Laurel Weaver, Lucile Werling, Anna Lapidot, Marvelene Butts, Belle Buchan and her daughter, Violet Elliott, as a guest.

International Harvester Wins Over G-E Hams, 11-7

The G-E Hams lost their initial ball game of the season to the International Harvester, 11-7. The score was tied 5-5 going into the last inning, when the truck men cut loose with a barrage of six runs to put the game on ice.

It was this same team that last year eliminated the Hams in the league play-off by a 2-1 score. The team plays games each week at Packard Park.

The schedule of the remaining games is as follows:

June 1—G-E vs. Foresters.
June 7—G-E vs. Turners.
June 8—G-E vs. Eagles.
June 14—G-E vs. Turners.
June 21—G-E vs. Zollners.
June 28—G-E vs. Zollners.
July 6—G-E vs. Magnavox.

A league play-off will be staged at the end of the regular season.

G-E Voltmen Lose Game To Globetrotters, 6-9

By BILL HUNT

The G-E Voltmen dropped an exhibition tilt marred by errors to the Harlem Globetrotters last Sunday night at Dwenger Park, 9-6. The Trotters scattered five Voltmen hits while racking up 13 themselves.

Despite the fact that the Voltmen made the easy ones look hard to the extent of six errors, they were still threatening to score as late as the eighth inning.

Stan Shargey, Don Runge and the new southpaw piteher, Jerry Brandon almost made up for their teammates' ineffectiveness by their stellar performances.

Shargey was the batsman. He hit a triple, a home run and walked in three official times which netted him four runs batted in. Runge starred in the field. He cut off runs by two great catches and saved a bad play, as he threw out a man at third after three Voltmen had watched a pop-up fall between them. He also looked very good on the bases for he scored twice after walking. The first run resulted from stealing home which he did so well that the pitcher's throw to the catcher was considered wasted.

Jerry Brandon pitched with excellent poise considering the five errors made behind him during his five-inning stay in the box. His six strikeouts show hope for future effectiveness on the Voltmen pitching staff.

It was not John Orphal's night. He relieved Brandon in the sixth to have four Globetrotters send ringing hits to right field before Charlie Shipman came in to quell the uprising with two strikeouts. He followed with four more in his last three innings to match Brandon's. He allowed only three hits and one run during his stay.

Hugh Orphan replaced Shargey in the batting order, when he had to retire. He was hurt when he was taken out of a double play then was aggravated when he hit his home run. Runge played short, with Miasek moving over to center and Orphan played left field.

Ed Hamman, clown extraordinary, entertained the crowd before and during the game. Umpire Kowalski probably had the worst trouble with him, as he was offered a rubber handled broom to clean the plate, also he had signs hung on him.

LAB NOSES OUT SQUARES, 1-0

Main Office Wins Over Fractional

Interdivision softball got underway last week with some startling results. Paul Beltz, pitching for the Lab, threw a two-hitter against the Squares. The final tally was 1-0, in favor of the Lab.

Carl Reiter, Main Office pitcher, showed that he can win in this league just as easily as in the Ham League. His team won over Fractional, 19-6.

The Apprentice men started slow, but at the end of the game had a comfortable margin over Winter St., winning 11-5. The Firemen drew a bye.

Majors Down Fruehauf, 3-2

The Majors softball team won their second straight game in league play from Fruehauf, 3-2.

Baals led off in the fourth with a double to left eenter and scored on Morkoetter's hit that went for three bases. That ended the scoring until the last of the seventh when Somers, batting for Garman, grounded to second. Then Lawson crossed them up with a bunt in front of the plate without a play being made on him.

Following that play, Bucher drove a hit against the left centerfield fence for three bases to tie the score. Ewing popped to the pitcher for the second out. Waltke, the pitcher, then drove a hit to right scoring Bucher with the winning run.

The Majors lost their first game Tuesday night, May 31, to the Legion Post 330. The score was 5-1. Stanski led the hitting with two hits in three times up.

Voltmen Rebuild Team

OWL GOLF

By Earl D. Stauffer

The torrid pace that the Owl Golf league set the first two weeks of league play cooled off abruptly in their last outing. Until the rains came the fairways were lightning fast, but this was another day. Instead of rolling, the little white pill usually got stuck in the heavy turf.

The only forty-buster of the day was Johnny Starke of Team No. 1, who toured the front nine in a snazzy 38. He really put on a show of putter magic, as he needed only 10 puts for the nine holes. Johnny and the rest of his mates downed Bernie English (who is captain, not Gus Ormsby) Pequignot, Fosnaugh, and Ormsby by 20 points.

Those Hot Shots, who are on this this scribe's neck for calling Bldg. 19 their place of labor, say that I should include the annex to 19, Bldg. 27. No wonder they are so tough, they picked a team out of a dozen acres of floor space or more. They took the Jolly Boys into camp to the tune of nine points. Jim Sternberger was low for both teams with 43.

Team No. 3 and Team No. 5 had quite a tussel with Team No. 1; Shanahan, Bierbaum, Uhrick, and Merchant picked up a one point vietory from Goller, Hamilton, Pook, and Suelzer.

This week we shall not divulge the names of those two 66 shooters, but as the season goes on we intend to give them some publicity.

Team No. 1 leads the Odd side of the league with a plus 31. No. 3 has a plus 16. No. 5 has a minus 32.

Team No. 6, the Hot Shots, lead the Evens with plus 46. No. 2 has a minus 21, and No. 4 has a minus 38.

G-E GOLF

By Hugh Dubdit

After a week layoff caused by high water, the leagues are again in full swing. The Mashies of the Winter St. group seem to be serving notice on the rest of the teams that they are the ones to beat. Led by V. Foulks shooting a 40, the Mashies totaled 179 to beat the Brassies by 22 points.

In a belated report from the Monday evening group, we find that after the first night of play, the Turf-Toppers lead with a point total of four. Oman and Sunier turned in the best scores of the evening with 38 and 39 respectively.

P. Lecoque of the Tuesday night Optimists fired a 38 to help in a four-point win over the Nineteenth Holers. The Optimists lead the group with 17 points with the Nineteenth Holers in second place and a total of three points.

It is said that G. Baker of the Tuesday office group can throw a club farther than he can hit the ball.

Braden Announces Team Replacements

As most loyal Voltmen fans know there are few familiar faces left from the 1948 national championship team. Only Olin Smith, first baseman, and Hugh Orphan, pitcher, remain on the active roster with Manager Braden and Coach Hamilton left to do the rebuilding.

The new team this year was set until about a week ago when Lefty Hazel reported that his job in Indianapolis would not allow him to make the trip to Fort Wayne when he was needed. He will be with Lafayette from now on.

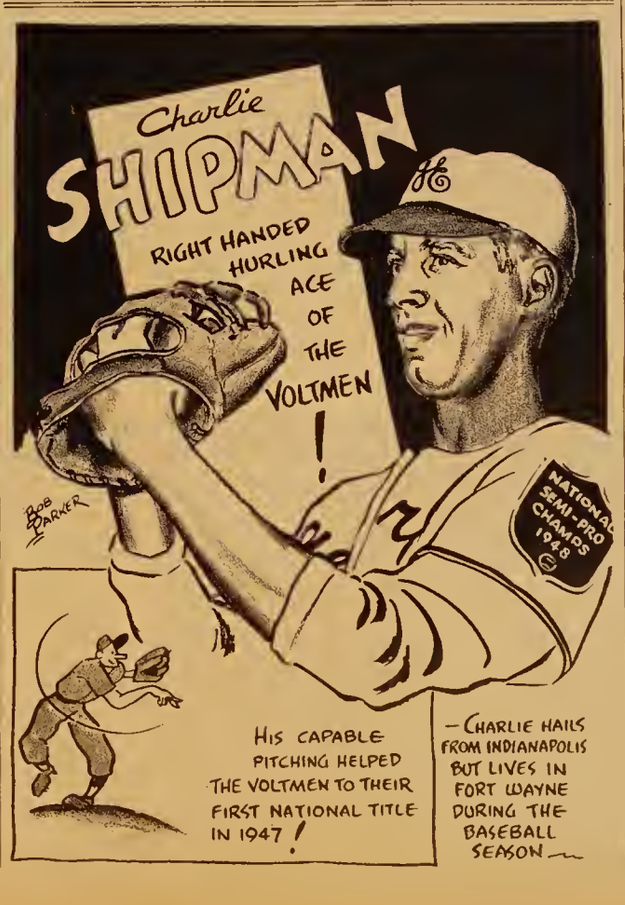
Bill Hardy decided that he was not helping the Voltmen anymore, so is hanging up his spikes. Roy Kilby was used in the infield some, but did not fill Manager Braden's bill. He was released, as was catcher John Burkhart. Catcher Sutphin and seeond baseman Donica were tried out and found wanting, so were also released. Jerry Brandon, the 20-year-old southpaw, needed more experience and was released.

Hire West Michigan Stars

Francis Green, 5 ft. 11 in., 170 pound, speed merchant from Western Michigan College, Kalamazoo and St. Joe of the M-I league last year, will be playing outfield for the Voltmen this season. He hit .298 for St. Joe last year. During the game at Benton Harbor Monday, he hit two doubles plus stealing second base on a left handed pitcher. He bats and throws right and covers the outfield like a blanket.

Walt Southworth, fiery shortstop for Kalamazoo and Lafayette, last year hit the double with the bases loaded that defeated the Voltmen in the M-I league playoffs. He is 5 ft. 9 in. and weighs 175 pounds, bats and throws right handed, and is a senior at Western Michigan College as is Fran Green.

Bolster Reserve Strength



Ralph Harwood, Jr., an infielder, bats and throws right, is 5 ft. 9 in., weighs 165 lbs. He had a contract with Pittsburg, Kan., of the Cub Chain, but injured his leg so was released. His leg is still a bit weak, but he should be of increasing help as it strengthens. He hit a double and single at both the Lafayette and Benton Harbor games last week-end.

Jerry Hisner, brother to fireballer Parnell Hisner who pitched for the Voltmen a couple of years back, eatches and hits a long ball. He is 5 ft. 11 in. and weighs 210 lbs. He bats and throws right. Benton Harbor has been his home team for the past two seasons.

The probable lineup is as follows:

Smith, First base; Harwood, Second base; Southworth, Shortstop; Dudick, Third Base; Miasek, Outfield; Runge, Outfield; Green, Outfield; Horman, Hisner, Catchers; Cary, left; Shipman, right; Orphan, right; Pitchers.

Manager Braden also has some more pitchers and at least another infielder in mind.

Too many light heads are behind headlights.

Is Mama in a "Speed-Up" too?

A LOT OF PEOPLE are getting hot and bothered about labor-saving machinery—about equipment and methods that take the work *out* of work. Some of them get so mixed up about increased production that they fall for the old tried and proven "three-alarm" rallying cry of "speed-up." Maybe "speed-up" *is* the name for such benefits—if so, it is indeed strange.

For the last 25 years General Electric and lots of other good manufacturers have been making labor-saving devices for the home. Right now 35 million homes are wired for electricity, 24 million have washing machines, 25 million have refrigerators, and 37 million have radios. Practically all of them have electric clocks, toasters, electric irons, and everything but an electric baby sitter. Maybe the women folks don't like this, but money talks and their dollars have said they *do*.

But the fear that is too frequently built up about labor-saving machinery is that it kills jobs.

Down at the factory we may be a little confused about this. But Mama certainly isn't. So let's go out home and ask her if she has lost *her* job.

We expect the answer will be kind of positive that she has just as big a job as ever—is doing just as much—but she is doing more interesting and productive things. She has shifted the physical labor over on to the appliance, and is using her mind instead of using her muscles. She is getting to be a "manager of machines." And the time saved by the machines enables her to give more attention to the education of the children, give more time to learning about more attractive food and better bargains. Also she has time for those rewarding trips to the beauty parlor that keep her looking surely like the bride she was five, ten, or forty years ago.

It's evident she just could not be doing these added useful things if she still had to hand-pump the water, wash the clothes over a scrub board, and heat the heavy old "sad iron" on the stove. Or if she had to go out and split the kindling for the range and put the milk down cellar in a half-way cool place. If Mama tried to run the new kind of home by old hand methods, there would have to be five or six of her. The new way of getting so much house-work done—and getting it done with only one wife—*may* be a "speed-up." But if it is, Mama is certainly for it—and more of it—and we guess papa is for it too.

Incidentally, it's a little interesting to see what this "speed-up" in American homes—this using of machinery by mama to get more results from her efforts—has done at General Electric. General Electric's business has always been simply that of making labor-saving devices. Since entering the home appliance field, General Electric has gradually created thousands of new jobs to make these labor-saving devices for the home. Today, 25% of our business is directly in labor-saving equipment for the home. And a lot of the rest of General Electric's output of turbines and generators and transmission equipment is used to get electricity to the home—in order to make the labor-saving devices save the labor there.

It's a peculiar thing about labor-saving devices: The more of them we make, the *more* jobs *and the better jobs* we have on the whole—whether these labor-saving devices are made for the factory, the farm, the store, or the home. And in the bargain, labor-saving machinery makes our whole lives better—both at work and after work.

And even in periods of declining sales and jobs, improvements in labor-saving machines and methods make more and better jobs than would otherwise be possible—make layoffs less than they would otherwise be—bring the return of full employment sooner. Because these improvements provide the better products at the more attractive prices that enable the hard-hitting advertising and the enthusiastic salesmen to bring in more of the sales that make the jobs.

Corson Receives $300 Suggestion Award

87 Employees Receive Cash For New Ideas

Alton B. Corson, Wire and Insulation Div., received the largest suggestion award, $300, this week. He led a list of 87 employees who earned a total of $1,175 in awards.

The next highest award went to Raymond B. Schuckel, Bldg. 4-4, who received $85 for his idea on packing Repair and Return dishwasher motors. Durand R. Graybill, Bldg. 6-2, was awarded $45 for his suggestion pertaining to Linedex files.

Twenty-five dollar awards went to the following: Cecil E. Tarney, FHP Motor Div. 14; Arthur E. Hubler, FHP Motor Div. 17; and Grover F. Rhodes, Transformer Div. 91.

Those receiving awards ranging in various amounts from $5 to $20 are listed below:

FHP Motor Div. 1: L. A. Hubbartt, Esther Pape, Eleanor Kohrman, Arthur McNamara, Walter P. Starke and Jay H. Michael.

(Continued on Page 3)

Alton Corson (at the right, above) explains the suggestion which brought him $300 to R. J. Cordiner, Executive Vice President and a director of the General Electric Company. Mr. Cordiner visited the Fort Wayne Works last week to review the operations of the Works Service and product divisions located here. During his tour, Mr. Cordiner praised the work of the suggestion system and noted some of the improvements thot had resulted through the active participation of Fort Wayne's employees.

ARBITRATOR MAKES AWARD IN DISPUTE AT TIFFIN PLANT

Ruling States:- Company Did Not Violate Agreement

Following several months of discussion at the local and national levels of negotiations which failed to settle a dispute concerning rates on a new cord lacing and tying operation at the General Electric Plant in Tiffin, O., the case was referred to arbitration. Arbitration proceedings were conducted April 20, 21 and 22. Following the filing of briefs, the arbitrator's report and award were released last week.

According to his official report, the arbitrator ruled that in keeping with the contention of Company officials, the cord lacing and tying operation was a new job and the setting of temporary rates was not in violation of the National Agreement with the UE-CIO. Quoting from the award, "We (arbitrator) find that the Company has not violated the National Agreement by setting temporary prices of the tiers (employees of the Company's Tiffin, O., plant) when it instituted the cord method of lacing because the job in question is a new job and thus is subject to temporary rates as expressed in VIII/5 of the Agreement."

Standards May or May Not be Correct

In regard to the disputed standards, the arbitrator observed in his report that "the standards set by the Company (temporary and permanent) may or may not be

Change In Plans For Cafeterias Monday, June 13

In order to render service to those working Monday, June 13, the cafeteria at Taylor St. and the cafeteria in Bldg. 16-1, Broadway, will be open as usual.

Food wagons will serve the second shift at Broadway.

The cafeteria in Bldg. 16-2 and the restaurant in Bldg. 16-2 will be closed as announced. The Employees' stores will also be closed.

Medical service on June 13 for both first and second shifts will be provided at the main dispensary at Broadway.

The dispensaries at Winter St., Taylor St., and Bldg. 8-1 at Broadway will not be open.

Company Provides Emergency Service In Assisting To Save Child's Life

"I am very grateful for everything G-E did to help me during this crisis," Mrs. LeCoque tello Marian Davies, of the WORKS NEWS.

Industry is not made up entirely of bricks and steel, but it also has a "heart" as Iva LeCoque, at Taylor St., discovered recently when tragedy nearly struck her family. If it had not been for the fast thinking of her foreman in making transportation arrangements, Mrs. LeCoque's granddaughter might not be alive today.

Mrs. LeCoque was at work when she was notified that Monica Louise, her granddaughter, had swallowed some of her mother's pills. She told her foreman, Clarence Gardt, that she was going to run home for her car to hurry to the hospital. He asked her to wait until he could make other arrange-

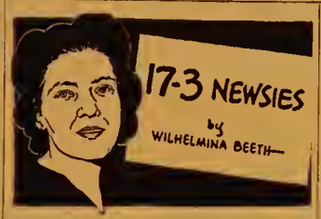
Ford Motor Company Experiences A Strike That No One Won

The strike of 106,000 workers in the Ford Motor Company, in progress for 24 days, has now finally been terminated.

Was the company the victor? It was certainly not victorious in a material sense, for the shut-down has cost it an estimated output of 80,000 cars and trucks, valued at more than $160,000,000. Some of this production will no doubt be made up in future. In cases where would-be purchasers have switched to other makes of cars, however, the loss could be compounded under the industry's own proverb that "a sale today means possible resale tomorrow." Nor is there of course, any way by which the company can recover the $20,000,000 that it has spent over the past three weeks on the maintenance of its 51 plants, white-collar payrolls and other non-productive expenditures.

Was labor, then, the winner in this 24-day endurance test? The answer here is an even more unequivocal no. It is estimated that each of the 106,000 Ford production workers will have lost an average of better than $200 in pay by the time the country-wide Ford system is again back fully in operation. That means a total financial loss of $2,000,000. Moreover, by the terms under which the workers have agreed to return to their jobs, the union appears to have lost on nearly every major point.

But even that is not the full extent of the cost to the union. This walkout could prove a body blow to the latter's strategy with respect to the vastly more important matter of its "fourth-round" demands. Its contract with Ford expires July 15. Walter Reuther, president of the United Automobile Workers, had hoped to signalize that occasion by achieving one of his major ambitions, an old-age pension plan. His time-table called for an opening drive against Ford, to be followed by similar campaigns, later and separately, with General Motors and Chrysler. Ford was regarded as the logical starting point because that company, as the union saw it, had more or less committed itself to the pension principle at the time of the "second round," in 1947. At that time it offered 8 cents an hour for a pension fund, but the proposal was rejected by the workers in favor of a straight pay increase.



That was the situation when the recent issue of an alleged "speed-up" in the Ford plant arose. There seems to be good reason to believe that most of the agitation over this question, and the demand for a walk-out, came from a minority left-wing group in the union. Mr. Reuther, according to reports, did his utmost to avert the strike until forced to go along against his better judgment in the interest of union harmony. And now, in consequence, he and his followers find themselves facing the important "fourth-round" battle with their strongest weapon—the strike weapon—blunted by four wageless weeks on the picket line. It stands to reason that it isn't going to be easy to work up enthusiasm for another strike in the weeks immediately ahead among these 100,000 workers who were persuaded to walk out so recently over an issue which involved only 3,000 of their members directly and which was the product of the demands of a minority, many of whom were motivated by considerations of union politics.

At the present time the nation is in the descending phase of the post-war business boom. We are backing away from the inflation which until recently was the chief threat to economic stability. There is reason to hope, as Dr. Nourse, the President's chief economic adviser notes, that this retreat can be carried out in an orderly fashion. But orderly disinflation is a delicate operation at best. From our experience in 1946 and 1947 we know what chaos widespread labor disturbances can create when inflation is in the air. It should not be necessary to point out that such disturbances could be counted upon to accelerate the pace and add to the disorder of disinflation just as seriously. This places a heavy responsibility on both labor and management to keep the peace in the months ahead. Certainly it should be obvious that this is no time for a repetition of such unnecessary and pointless instances of disemployment and crippled production as we have just witnessed in the case of the Ford strike.

—NEW YORK TIMES

LIKE A SPRING TONIC

Better start oiling up the fan; it looks like warm weather ahead. . . . Alice Tolliver must have gone to the show and seen the Tom and Jerry cartoon, "Polka Dot Puss." Monday she went home with the measles. . . . Some days you can't save a nickel, while other days you can't save five cents. Ask Jess Hahn. He walked out of the restaurant and forgot to pay for his pie. The next day, the proprietor was waiting for him. . . . Josephine Motter is a new grandma. That accounts for the big smile, but did it have anything to do with her going overboard? Or was she just taking the "fishing and bathing" sign seriously and doing both at once? . . . Margaret Monnot had her first week of vacation this week. Only it really wasn't a vacation. Lassie, her dog, presented her with nine puppies. Lassie didn't make the grade and Margaret took over the job of feeding the orphans. Imagine having to feed that many puppies. . . . Helen Biddle has been having dog troubles too. Her dog, Bing, has rheumatism. . . . Did you notice Joe Meehan walking down the aisle wearing one black and one brown shoe? . . . Speaking of shoes reminds us of feet—muddy feet. Floetta Zartman really had them last week. Doris Ryan and Floetta had the gas buggy all shined up to go to Ohio. They got on the wrong road and became stuck in the mud. Floetta removed her shoes and stockings to help push. . . . We are glad to see Louise Melvin back from Taylor St. and Esther Fox after being ill. . . . Newcomers to the early bird shift are Peggy Cook and Robert Mosshammer. . . . Sorry to hear Florence Kowal is on our sick list. . . . Last week Bill Mills put away his tools and bid Div. 16 goodbye. We hope you enjoy your retirement. Have the best of health, so that you can catch up on that fishing and all the other things that have been put off in years past. . . . We always wondered why baby chicks would squeek when they ate, now we know. Harold Bowker says it is because they haven't enough cod liver oil in their gizzards. . . . A hobby is something you like to do, but it doesn't make you a living. Ann Robinson's hobby is flowers. Her place looks like a flower garden, and it's very pretty. . . . Francis Eckrote doesn't like strawberries—much, that is. After eating a quart, she thought that would do until the next meal. . . . Hedy Harrison was chief cook and bottle washer over Memorial Day. Her mother was in Indianapolis. How about a plate of burned beans? . . . Lowella Koogle made a trip to Bloomington, Ind., to see about her future home. . . . FOR WOMEN ONLY: I don't think the men should read this. They might get ideas. The Delbert Thomas's have a new hammock. Delbert rests in the shade all day, while Marcille works. (Hope my husband doesn't see this). . . . Leona Hollis had to take time out Wednesday to help Garrett celebrate its Diamond Jubilee of the B. & O. railroad. . . . Saw where our floor was well represented in the pictures taken at the last square dance. How those people love to "swing on the corner."

Paul Ginder probably got too much sun because of the fish story he tells. He went fishing and got the limit of bluegills in an hour. A likely story but seeing is believing. . . . Congratulations to Ginger Zeig, who became a proud mother last Saturday. She named her new son Frank Barger. . . . Any June bride need a corsage see the Rohrbauh sisters as they are tops in making them especially of rhubarb, garlic, radishes and other vegetables. They made one for Freda Knoche for her birthday. . . . Eleanor Whitehouse, Helen Engle and Bernadine McCune took a trip to Indianapolis to see the Olsen and Johnson show. Who should walk off with a gift but Eleanor. She got a big washtub and a portable G-E radio. . . . Birthday greetings to Vera Healy, Maude Erhardt and John Ormiston and belated greetings to Marion Miller. . . . Welcome back to Polly Selking, who has been on a sick leave, and welcome to Grace Bedsworth in 1x29 and to William Widdifield to Commutator section. . . . Fred Couture is spending his vacation next week at Big Lake to catch some "little" fish! . . . There are a lot of sunburns floating around up here today, but they all say the fishing wasn't any good. . . . What have you got to say about the first two weeks in August, Waldemar Schmidt? Going on a long trip? We suggest that you keep an eye on that back end of your car. . . . Carl Harmon, why so many new pipes? Don't any of them fit? Take a tip from me and don't smoke so fast. . . . If anybody wants a nice chicken to eat, see Herb Brown. You sure have to know your chickens and they are plenty nice. . . . Congratulations to Alva Foulks who walked off with the prize for being the youngest father at the Elex Father and Daughter party for the third time. . . . It is too bad that Les Hubbartt is such a poor baby sitter that his wife can't go to a party one night a month. I should think that by this time you would know how to handle girls. . . . A surprise dinner was held at the cafeteria yesterday in honor of Martha Scherzinger, who observed her 40th anniversary with the G-E. She received a beautiful corsage and a gift from her co-workers. It was good to see Ella Hartnett, Cora Graham and Bea Helms at the dinner. They are former co-workers who have retired. . . . The foremen were all at a dinner in her honor Tuesday noon at the cafeteria. Better watch all these dinners, Martha, they are hard on the figure! No fooling we of Div. 1 give you our heartiest congratulations.

CORRECTION: My apologies to Mr. and Mrs. Joseph Hiles. It seems that I married them off a week too early. I'm sorry. . . . "IT WAS A LONG CHEW THROUGH," said the new car bug to the moths, "but I finally made it." Denton Manecke finally succumbed to the fever so prevalent during the last few years. Result: a new shining Pontiac. . . . MISSION ACCOMPLISHED: The FHP Engineering outing at Clear Lake was a huge success. It has developed into a tradition for Bob Loveland to fall into the water by some means or in some fashion. This year it looked as if this was not going to come to pass, so some of the fellows took the situation in their hands and threw him in. Carl McKay and Ray Hupp brought their shortwave sending and receiving stations and contacted various people in Fort Wayne through local amateur operators. . . . STORK TIDINGS: A wee bundle of happiness arrived in the James Capps' home last week. Her name is Barbara Leigh. Congratulations, Mary Jo and Jim! . . . PENITENT SOUL? For everyone's information, Gil Baker was not proposing to Teddy Neds on bended knee in the hall last week. He was begging her for a 50 cent piece which he had fumbled and she had recovered. . . . ATTEN-SHUN! An unknown source of information revealed that Bob Winchester, test engineer, in the Developmental Section, who is an Ensign in the Naval Reserve attended the commissioning of the Armory last week-end. It seems that numerous social gatherings before and after PLUS a date with the Commander's niece proved to be quite enjoyable, huh, Bob? . . . CAN HE, WILL HE? RAY HUPP DISCOVERED A MOUSE IN HIS DESK LAST WEEK and after the mouse scurried away he cut off the end of a funnel and placed it near the spot through which he thinks the mouse entered his desk. He doesn't think that the mouse can overcome the obstacle.

Company Provides

(Continued from page 1)

ments. He then called Ceal Romary of the Personnel division.

Miss Romary met Mrs. LeCoque at the gate and rushed her home. Then she waited to make certain Mrs. LeCoque was on her way.

Upon arrival at the hospital, Mrs. LeCoque learned that the medicine was absorbed in the child's system. The next step was to keep her from lapsing into a coma. To do this, Mrs. LeCoque, her son, daughter, and daughter-in-law tossed Monica back and forth. They also "pounded" her and gave her black coffee injections. They managed to keep her awake for 25 minutes at a time, when she was permitted to sleep for 15 minutes.

The LeCoques continued this back-breaking "treatment" for six and one-half hours before the crisis passed.

Monica, who is over a year old, is now home and nearing recovery.

Mrs. LeCoque feels it was only through the quick action of Mr. Gardt and Miss Romary that she was enabled to help save her granddaughter's life.

Schuckel Earns $85 For Suggestion

Raymond Schuckel, Bldg. 4-4, recently received $85 for suggesting that instead of shipping motors individually from here, they be put on pallets and forwarded to Decatur to be included in carload shipments. The picture was taken at the time of presentation of the award check. Left to right are Arnold Bienz, Charles Griffith, Foreman; W. H. Franke, FHP Motor Divisions 19 and 20 Supt.; Mr. Schuckel, Dallas Smith and Clarence Roth. Included in the picture are four men (Schuckel, Bienz, Smith and Roth) who were selected to form the nucleus of the Repair and Return section 10 years ago.

Arbitrator Makes

(Continued from page 1)

correct, but regardless of whether they are or are not, they cannot stand as now set."

In his award he stated, "We find that the permanent standard of 119-125 is not valid. To correct this situation, the parties are to proceed as follows: The Compuny will make a series of four to eight hour studies on one or more tiers who have become experienced on the cord lace method. The tiers selected will cooperate with the Company through its time study man who in turn should, if at all practicable, have had experience in making similar studies on the tape method of lacing. The final computation must reflect the proper allowances. The new permanent standard must be set within one month after receipt of this award."

In his discussion of the Company's charge made during the dispute that a "slow-down" existed, the arbitrator stated that there was evidenee of suеh a "slow-down." In connection with the union charge of "speed-up" he observed, "The Company's refusal to set a permanent standard on a study made on an operator who has not yet mastered the cycle is sound practice and has nothing whatsoever to do with the alleged attempt to increase the amount of work required under the heading of 'normal output.' For one, the operator who is unaccustomed to the new cycle is not an average operator, does not work with average skill regardless of her effort; for another, as indicated earlier in this discussion, orthodox time study practice based on such elements as speed rating, effort rating, etc., is unable to translate green skill into normal skill. Since, therefore, we do not accept the 119-125 standard set in any event, the problem of speed up as argued by the union does not concern us in this arbitration."

The dispute in question resulted in a two and a half week strike during February and March involving approximately 800 workers at the Tiffin plant.

25 To Compete In Truck Roadeo At Baer Field

Twenty-five contestants have been entered by local firms in the first annual Truck Roadeo, which will be held Sunday afternoon at Baer Field.

Melvin Beucler will represent the General Electric Company's truck fleet. Mr. Beucler has driven 30 years without a chargeable traffic accident.

The public is invited to attend and seating arrangements have been made.

132 To Leave On Elex Trip To Niagara Falls Tomorrow

A group of 132 Elex members and their friends will leave at 2:45 a.m. tomorow for a trip to Niagara Falls. They will go via the Nickel Plate Railroad to Buffalo and then by bus for the remainder of the trip.

Charles G. Moore, manager of the G-E District Office at Niagara Falls, will be at the hotel to greet them when they arrive. A conducted tour of the Falls and a ride on the "Maid of the Mist" boat have been arranged for Sunday afternoon. The group will leave at 4:45 p.m. Sunday for the return trip. They will arrive in Fort Wayne early Monday morning.

All are requested to bring sunglasses and raincoats.

87 Employees

(Continued from page 1)

FHP Motor Div. 13: Anna E. Griebel, Clarence M. Myers, John Wood, Lindsay E. Eastes, Kenneth O. Ross, Edna Hardisty, Florence E. Clum, Christian DeLagrange, George K. Robb and Albert H. Timme.

FHP Motor Div. 14: Herbert F. Seslar.

FHP Motor Div. 15: Harold Anspach, Helen Tescula, Van B. Nelson and Francis F. Fann.

FHP Motor Div. 16: Dorothy Johnson, Archie Evans, Herbert Langer, Charles Grim and Betty Yarger.

FHP Motor Div. 17: Charles G. Price, Howard D. Householder, Troy Long, Charles Arnett, Clarence F. Myers, Herb Fuhrman, Fred E. House, Kenneth Brown, Doris Moon, Richard Pemberton, Melvin W. Bertsch, Ruby Stucky and June E. Hines.

FHP Motor Div. 19: Henry J. Wichern, George Felts, John R. Miles, Theodore F. Brockmeyer and Francis L. Bennett (two awards).

FHP Motor Div. 10: Herbert F. L. Koch, Katherine Richter and Paul W. Lange.

Decatur Plant: Jerome J. Coffe, Linda Bultemeier, Madge Jones and Lyle Voorhees.

Tiffin Plant: Donald F. Boehler, Addie F. Wenner, Ross Stover and Hugh W. Hinsman.

Specialty Transformer Div. 91: Henry E. Lantz, John D. McMaken, Robert A. Bunyan (two awards), Doyle D. Miller and Mildred A. Strickler.

Specialty Transformer Div. 93: Edna F. DeLeury, Robert W. Knoll, James T. Keller, James G. Witzigreuter, Robert L. Richardson, Alfred E. Coxon and Paul E. Black.

Specialty Transformer Div. 94 and 95: Russell W. James, Bertha Bruber, Morris M. Mastin, Phillip Shulze, Noel A. Smith, Ernest A. Kern, Helen L. Eger, Murray J. Sherman and Betty Jean Sapp (two awards).

Danville Plant: Marvin G. Weller and Wilson D. Halls.

Wire and Insulation Div.: Carl M. Junk and Richard D. Hensler.

Miscellaneous: Anna R. Clements.

Partizan Chapter Announces Outing

The Partizan Chapter of Elex will hold an outing Tuesday, June 21, at Clara Cooper's cottage on Lake James. The event is open to members and their children.

A potluck luncheon will be served and those attending are requested to bring their table service.

Members going on the outing are to meet at the corner of State Blvd. and Spy Run Ave. at 9 a.m. Rides will be provided for those without transportation.

Veterans' Picnic

(Continued from page 1)

Jimmie James, Bldg. 17-4, refreshments and entertainment.

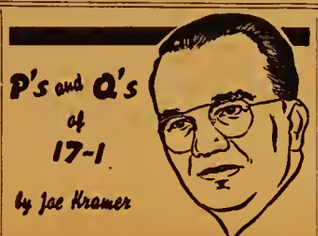
Tickets are available for 75 cents from the following contact men:

Erwin Zollinger, Bldg. 17-4; Val Miller, Bldg. 18-4; Guy Miller, Bldg. 19-1; Bill Kaiser, Bldg. 19-1; Leo Christle, Bldg. 19-3; Joe Hartman, Bldg. 19-4; John Ebert, Bldg. 19-5; Carl Rehling, Bldg. 20-2; William Slater, Bldg. 26-3; Al Adams, Bldg. 27; O. J. Lacerte, Bldg. 28-2; Charles Thompson, Bldg. 31-2; R. J. Bangert, Taylor St.; Harold Rahe, Winter St.; Bill Walt, Bldg. 2-1; Andrew Nichter, Bldg. 4-2; John Pumphrey, Bldg. 4-3; Andrew Lee, Bldg. 4-5; Glenn Seabold, Bldg. 4-6; Carl Click, Bldg. 6-2; Ken Michael, Bldg. 8-2; Ed Holocher, Bldg. 10-2; Richard Gebert, Bldg. 12-2, and Ed Martin, Bldg. 17-1.

Meet the President

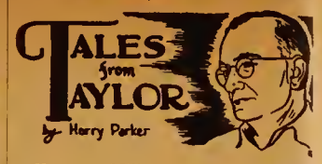
Suggests Idea For Linedex Files

Durand Graybill, Bldg. 6-2, recently received $45 for a suggestion pertaining to Linedex files. His idea was to set up a Linedex file to list freight rates of towns to which the Fort Wayne Works makes frequent shipments. He is shown in the picture pointing out some features of his suggestion to C. L. Saurbaugh (right).



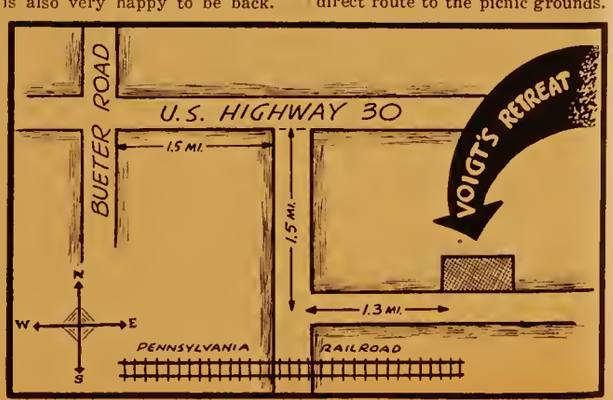
Last week we were paid a visit by William Law, now retired. . . . I have been asked if I ever noticed Frank Phillip's buggy shaft binoculars. Must confess I have but never thought of them in just that descriptive fashion. . . . If any machine men need any bench advice just see Marc Junk or Gene Werling. . . . Jess Batchelder came up with a new set of instructions for repairing tail pipes for cars and ruining tires. To install a new tail pipe, cut in two parts, so division comes under spare tire well, then put clamp (loosely) at division. After loosening half of tail pipe let heat put blister on spare tire, then put another tire in spare well, continue until all tires have blisters. This kind of repair will net tire man $80 in a short time. . . . Ward Staley, Sr., likes to hurry those ahead of him past the change dispenser in the cafeteria so he can pick out the missed change. . . . Last week the local sports writers were paying tribute to a deserving sportsman in our own group, William Buuck, who made a hole-in-one while playing golf. Bill has been active in bowling many years and always fell short of a 300 score, coming within 19 pins on one occasion, so it is with pleasure that we learn of Bill's honor on the golf course. . . . I suppose you have all heard stories of the short-handled broom. Now comes Gene Werling and Bob Repine with a two-handled broom, which they used successfully to clean up the welding booth. . . . John Driver was crossing the street with thoughts far off when he was suddenly awakened by a blasting car horn. He was giving some thorough lip service when he looked up to see Ray Bowers sitting behind the wheel of his car with a big grin for John. . . . Russ Deveny is back with us after being in Bldg. 4-2 for several weeks where he picked up a new title, "Hot Rod." So far I haven't been able to get all the details but will let you know more later. . . . Bob Maggart has gone to shipping; Merritt Myers has gone to the laboratory; Ardell Hambrock to the big Matson surface grinder back in the high hay; Bob Hendrickson is on second shift and Marc Junk is returning to the Apprentice School. We will miss all of you, but wish you good luck, and to David Bartle of the machinist group and Justin Heaston on the surface grinder our welcome mat is out. . . . Monday was Bill Buuck's 65th birthday. Since he had gone on his vacation we were unable to personally wish that happy birthday, but from the gang I'll say it here, Bill. . . . Henry Guenther is spending several days in the tool crib checking tools. Glad to have you with us.

Two Honored At Retirement



Several friends of Olga Hart and Ella Staver are shown wishing them luck on their retirement recently. In the picture are: (l. to r.) Laura Krauskopf, Ed Sonday, General Foreman; Olga Hart, Joan Meyer, Ella Staver, Millicent McHenry, Wava Aughenbaugh and Paul Hapner, foreman.

A new enterprise has been started in the south end of Bldg. 17-1. The new endeavor to be known as Garden Enterprise, Inc. Frank Martin has been elected engineer of the group because he is the only one who can do a weekend's work without sitting in the shade of the apple tree. George Mosshammer and Charlie Niblick, the other two members of the organization, seem to spend the biggest share of the time under the apple tree partaking of liquid refreshments instead of weeding the garden. George says, "Don't forget what shade does to the coffee bean." . . . Jim Daley and Orval Haver were off work last Friday and Frank Gitter had to carry the complete load of the fire department while his brother firemen were enjoying themselves. . . . Cliff Coombes and Curly Sprague were substituting for Harry Kessler and Art Brockmeyer on the countersinking machine last Friday. . . . Ruby McBride was a recent winner on the "Keep the Music" program. She won a dozen pair of those sheer nylon hose. Congratulations, Ruby. . . . Ray Epperson, sandy-haired dispatcher in the south end of Bldg. 17-1, has some rye hay for sale. When he first planted it, he intended to let it grow until it went to seed, but due to the high powered fertilizer, he used, the hay grew so fast the neighborhood children would get lost. In case you are interested, see Ray for prices and arrangements. . . . Red Braden is glad to see Jack Lewis back from his vacation. Jack is going to help Red with some of his work so that Braden can spend more time getting the Voltmen in shape. . . . We were sorry to see Mike Fuelling leave us last week, but Bldg. 27's gain is our loss. Good luck on your new job, Mike. . . . John Quinn is looking for a portable sorting bench. He would like to have one that he could take from machine to machine. . . . Congratulations to Argend Denney for the recent increase at his farm home—weight was 80 pounds, as yet, Denney hasn't decided, he is still looking for a name. Send in your suggestions for a name to Denney. As yet, Denney doesn't know whether it is a boy or girl—watch this column for further developments. . . . The hot rod craze has hit the office. Of course, Charlie Lauer said the car was for his boy Chuckie hut he wouldn't want to have to get two more subscriptions because that is really a job. At last reports, Charlie is a full fledged hot rod operator.



Charles Sheets has been selected to represent Elmhurst High School at Hoosier Boys State. This educational program of government and its functions will be held June 11 to 18 at Indianapolis, Ind. Charles is being sponsored by the Waynedale American Legion. He is the son of Vaughn Sheets, foreman in the Wire Division. . . . Why is it that every time Bill Rohe catches a few fish he has his picture taken with them? Is it because he wants to show off the fish or just plain Bill or must he have proof before his co-workers will believe his fish stories? . . . Your Division Editor had a very nice vacation, but is also very happy to be back.

Kenny Miller, our Arkansas traveler, accepted an invitation to accompany his brother on a mad dash to Texas over the Decoration Day holiday. Since it was a long trip to take in three days, they had to travel pretty fast. They tore into Kansas at a high rate of speed, and in crossing the plains they raised so much dust that the natives thought a dust storm was on its way and made preparations to combat same. They finally reached Ft. Smith, Ark., but time was running out, so they did an about face and headed north without ever seeing Texas. They plan to do it or bust next year. . . . The regatta held at Big Long Lake Decoration Day was a huge success in which Art Brandeherger seemed to be the star performer. The way he swished that boat around, at the same time emitting loud whoops and hollers, was something scandalous. At times his speed was so terrific that the swell caused by the boat revealed the lake bottom to the spectators. . . . For a long time Herb Saurer was opposed to the raising of any farm animals on his place, hut he has done a turnabout and is going in for the raising of swine. At the present time he has a goodly numher of young pigs on his place and is delighted with the results of this venture. His plans call for the establishing of the largest and most complete hoggery in northern Indiana. . . . When coming into work recently we observed the new posters on display at the gatehouse advertising United States Savings Bonds. On this poster is a picture of a covered wagon, and someone in the crowd exclaimed, "Oh, look at the covered wagon." Mable Miller then began looking out over the parking lot expecting to see one of these vehicles come driving in. Perhaps she thought some of our modern '49'ers had reverted to this mode of transportation. . . . Over the past week-end Ted Reed went on a fishing trip at a nearhy lake and came home with a goodly catch, but minus his glasses. It seems that an extra large fish took his hait, and in the fight and excitement that ensued his glasses flew off and sank gently to the lake bottom. He tells us that the next time he goes fishing, he is going to wear a net over his head as a precautionary measure.

Supervisors' Club To Hold Picnic At Voigt's Retreat

The Supervisors' Club will hold its annual picnic tomorrow, June 11, from 1 to 9 p.m. at Voigt's Retreat. Below is a map showing a direct route to the picnic grounds.

G-E Technicolor Film Has Premiere Showing

The new G-E technicolor film, "By Their Works," had its first public showing in Decatur Thursday night, June 2, and was shown in Fort Wayne at the G-E Club auditorium Tuesday evening and Wednesday afternoon and evening. General Electric's Aeolian Choir and employees of the Decatur plant are featured in the movie, which was produced by the Raphael G. Wolff Studios of Hollywood, Calif.

The photograph at the top, above, shows a scene at the dinner given Thursday evening for present and former members of the choir at the Decatur plant. J. F. Welch, Assistant Plant Manager, is shown at the center, left, welcoming the audience, which is shown at the right. In the picture at the bottom, the choir is shown during a concert given as a part of the premiere program.

Everyone has eaten creamed tomatoes, but to grow them that way is something new. It seems as though Alma Witte heard that watering tomato plants with milk was good so she is trying it on her one plant. Gordon Smith is always on the lookout for something new so he is trying a little milk, too, besides he says he always did like creamed tomatoes. . . . What has happened to Hugh Neely's golf game? Everytime he plays a game he gets more disgusted. He has been given advice by all the experts in the office, but it just dosn't seem to do him any good. . . . Happy birthday to Eddie Andrews June 16. Hope you have a nice day. . . . Kenny Sheehan says the fish are really biting good now on his lake. All we can do is take his word for it; we have never seen any evidence of them. . . . We were sorry to see Ben Fleek leave the office last week. Dorothy Vetter has also left the Division to become a full time housewife and Cora Graves has gone to Div. 14. We wish the best of luck to all of them. . . . Charlie Gable made a trip to the Bridgeport Works last week. He said that after seeing their plant he decided Fort Wayne was a pretty good place to work after all.

We welcome to our division Doris Kennedy, Augusta Gallmeyer, Lois Springer, Bertha Holmes, Pat Fritcha, Albert Clark, Merritt Meyers, Neva Chamness, Frances Funderburg. . . . We've often heard of puppy love, but it must be a case of kitty love that prompts Irene Bowman to slip Lottie McFarland a package of catnip for Lottie's tommy-cat Spud. . . . Danny Daniels has lost a lot of weight since he left Div. 14, and the gang is wondering if he shouldn't purchase a pair of suspenders. . . . After 30 years of service with the G-E, the Company has finally caught up with Walter Niemeyer. He received a "blank" check last week. . . . Theron (I-get-'em-big-enough-to-keep) Kitchen claims the biggest bluegills come from Atwood Lake. How about a mess of five inch specials, Kich? . . . Si Alspaugh says he finally found a feeding schedule whereby he can sleep again at night. What's the matter, Si, did she get her days and nights mixed? . . . Robert Till insisted he had fan belt trouble on his Ford which accounted for his tardiness. Some of the fellows thought from appearances he had repaired the tractor before coming to work. . . . Ask Maurice Vonder Haar why he always takes someone with him when he goes fishing. This week it happens to be his small daughter Doris. Does someone have to catch them for you, Vondy, or do you need a witness for some of your tall stories? . . . We understand Madge Thompson ate pressed ham sandwiches at the races last week. It seems her husband accidentally sat on them. . . . Bob Kissinger, Fritz Vogt, and Virgil Snyder asked Ed Sarrazine to play golf with them. Ed, not being an experienced golfer, was told he didn't have to play for so much a hole. However, when the game was over Ed had taken not only Fritz but Bob as well. . . . Johnny Wilson bought a new lawn hose to wash his brand new Chevy, but when he got home there wasn't any threads on the hose. Now he is looking for a plumber. . . . Since Fritz Vogt is only working four days a week he is looking for new golfing companions so he won't have to drive his car. . . Why is Cleon Oyer singing "California Here I Come", surely he isn't driving that "slow" Buick to California. . . . Clarence Seslar was on his vacation last week and the fellows are wondering if his Hudson made the trip. Clarence Schroeder offered him his Oldsmobile but Seslar insisted upon taking his own car. . . . When yours truly, asked Harold Amstutz if he had anything for the WORKS NEWS he replied, "I just wish it was 3:18." Harold is such a happy boy. . . . Louise Roberts and Madge Thompson had such a wonderful time at the races that Louise has her tickets ordered for next year. . . . Happy birthdays for June are wished to Ann Johnson, La Vern Wonderly, Catherine Auker, Iva Etter, Marie Wicklman, Gay Huey, Flossie Troutner, Elva Hake, Helen Miller and Henry Stegman.

Daughters Dine and Dance with Dads

Nearly 50 fathers were entertained by their daughters at the Elex day girls' party Friday evening, June 3, in Kreis Stolzenau hall. Joe Taylor and his band provided music for dancing. The program also included a Dutch dinner and the presentation of gifts to all the fathers, as well as several special awards.

The youngest father award is presented by Charlotte Stanford to Alva Foulks, Bldg. 4-3. At the right is his daughter, Mary Louise Foulks, Bldg. 31-1.

Irene Meyers poses with her father, William Meyers.

Hilda Hoeltje, Bldg. 18-5, stands beside her father, Henry C. Hoeltje, as he receives a gift from Irene Meyers, adviser to the club. Mr. Hoeltje, 82, was the oldest father at the party.

The fathers line up to receive their gifts from the club.

An award for coming the greatest distance is presented by Charlotte Stanford, Elex president, to August Kessler, who is shown with his daughter, Avenell Stanton, Bldg. 26-2. Mr. Kessler traveled 70 miles to attend the party.

Everyone was well fed, according to the picture above.

Irene Meyers presents an award to the oldest grandfather at the party, Russell Linn. Gloria Harris, his daughter, is with him. Mr. Linn is 73 years old.

The band must be playing "Poppa Won't You Dance With Me" or "Dancing Cheek to Cheek" for this couple.

263 NEWS

BY MABEL ODEL

NOTICE TO EVERYONE: We need a snappy title for our column, so we are running a contest and the winner of the title selected shall receive $5. Don Poland, Bob Hunt and Bret Young are elected to pick the winner. All entries must be on Bob Hunt's desk or given to Mabel Odel by June 18. You may turn in more than one entry, but only one entry to a slip of paper with your name, please. Come on, folks, let's go. . . . Lorraine Von Behren has been appointed as your news reporter. Please give her you news items daily, so that we may have a news column weekly. . . . Congratulations to Mr. and Mrs. Gary Miller, who have welcomed a little newcomer, but all is not well with the father. Although he is looking at the world through rose-colored glasses, they call it pink-eye and he was barred from the rest of the little family. . . . Belated birthday wishes are in store for Wendall Harshman. Sorry we are late, Wendall, but you fooled us. You don't look a year older. . . . Evidently Dorothy Paxson and Virginia Wilson didn't pay their rent. They were evicted Friday, but both are settled in new locations and everything is in smooth order again. . . . Since the price of milk has gone up, Dale Stuckey has decided it would be cheaper to buy a herd of cattle. Have you stopped to think how many quarts of milk it will take to pay for those cows, Dale, and remember you just can't pull a cap to get it. . . . Levi Carpenter has undergone an operation and is in the St. Joseph hospital. His telephone number is 465. If you can't pay a visit, a cheery hello would do him a world of good. We all wish you a speedy recovery, Levi. . . . Cora Karnes, Maxine Hathaway, Edna Mapes, Hazel Scott and Almetta Smith have been transferred to second shift. Almetta, through no fault of her own, is now known as "Smitty Old Boy." . . . We also say farewell to Ray Loveless. He has been transferred to Bldg. 26-5. Good luck, folks. . . . Martha Hamilton is one person who appreciates this humid weather. She locked herself out of the house and had to wait until her husband came home from work. The sad part is that he works at night and she had to get her rest on the front porch. . . . Ernie Clark is the guy with all of the answers, or most of them. But when they sent him to Danville to solve their problems, it really worked a hardship on Robert Wiehe. He was left behind to take care of Ernie's problems while he was gone. . . . Charles Wrisk would like to borrow a hair net to keep the wind from blowing his hair in his eyes. . . . Levona Porter went fishing and all day there was only one fish on the pole, and that was, we are told, on the wrong end. . . . Veronica Cook spent her holiday vacation getting her cottage in order for the summer. . . . Carolyn White had a lovely time in Chicago. . . . Wade Bowman would catch bigger fish if he had longer arms to tell about them. When he and Mr. Habig from Bldg. 26-1 get together the old question arises: Can you become a liar by listening to two fishermen? My, my what they do tell. . . . Lois Shaw is happy again. Reason—She is on second shift. . . . They ought to pass a law that would not permit an old maid to work on second shift. (This was overheard.)

Office Offerings

Jim Voirol talked himself out of a week's supply of groceries. He was called on the dinner-winner program but didn't want anyone to know what he had for dinner, so he said hello. We know now that he has had wieners and coffee. . . . Bret Young and his wife have two ideas about their vacation. He wants to go to Colorado and she Glacier National Park. Something like that can just wear a guy out before it's time to go. . . . The treat was on Al Coxson this week. Thanks for the drumsticks, Al.

HERE and THERE in BUILDING 17-4

by Maxine Baker

Summer is really here from the looks of some of these tans. Even Charlie Schild stopped in to say hello, with a swell new tan. . . . Homer Murphy has now applied for the job of driving Cy's "Parlor on Wheels" and even agreed to drive his Chevy to and from the job. . . . Are we embarrassed? We wanted to tell you that Clara was presented with a roaster as a wedding gift but in print it came out rooster. We are very sorry about this and can only hope Clara can find a rooster for her roaster. . . . Mike Lowe, our genial conservationist, has his troubles also in doing his best to help the worthy cause of conservation. Mike attended a convention along with two other delegates in Anderson Saturday and Sunday. Since the convention did not adjourn until after midnight, Mike graciously offered to help drive back to Fort Wayne. The car happened to be a new Ford which was rather a new experience for Mike as he was not accustomed to driving these new models. After driving about ten miles at 60 miles per, Mike thought the car was making too much noise. The owner was asleep in the back seat, so Mike woke him up to inform him that his Ford was ready to fall apart. Can you imagine Mike's embarrassment when he found out he had not shifted in high yet and had been driving in second gear all the time! . . . We extend our sincere sympathy to Harold Knepp in the death of his father. . . . Bill Turner only wanted to be helpful when he tore a month off the calendar only to discover someone else had already done that. Now he is trying to stick June back on the calendar. Guess he was trying to hurry vacation. . . . Say, folks, did you know we had a baseball team? You didn't—well, here is a list of the players: Art (Strechie) Schmidt, Ralph (Chin-Stop) Thomas, Melvin (Short Throw) Miller, Don (Slugger) Gerardot, Norb (Glass-eyes) Lose, Roger (Sure-Foot) Crabill, Frank (Tender-feet) Magers, Frank (Old Goat) Surface, Ned (Lippy) Neuman, John (Fire-ball) Westerhausen, Pitch Markey, Hit-Away Wickliffe (the above three fellows are from Bldg. 17-3), Larry (Base Coach) Aughinbaugh, Ray (Grumpy) Solga. These brave (?) and gallant (?) boys struggle for the glory of Bldg. 17-4 every Wednesday night at McMillen Park. So far our backing has been lacking—let's help our team trim the opposition by going to the games. See you there at 6:15. . . . Our South End gang gave a pot-luck for Ewald Monday, in honor of his retirement. The gang ate heartily and had a wonderful lunch hour. They also gifted Ewald with a smoking stand. Lots of luck and many years of health and contentment from the gang.

It's okay for a doctor to add 10 years to your life if the bill for it doesn't take away 20.

STABS

SPECIALTY TRANSFORMER and BALLAST SALES

By Harry Dolson

It never ceases to amaze me how people spend their so-called leisure moments in an unleisurely manner. For example, let's take some of the men in the commercial division. When it comes to truck gardening on a rather large scale, Frank Ondrovik and his wife, Jane, are seasoned hands for they cultivate more than an acre of all kinds of vegetables. They are now branching out to include strawberries as a regular item and doing it mighty successfully! Combine this with mowing an acre of lawn, raising some chickens, tending flowers, and rearing two children and there is little time remaining to be concerned about how to spend one's leisure time. . . . Bop Tripplett and family moved into a new apartment and have set about to re-decorate it to their satisfaction. Bob's chief avocation is photography, and he has the equipment to convince one that he knows what he is doing. He has had considerable experience in theatrical work and you may hear him frequently at 8:30 p.m. on station WOWO in a program entitled "Written for Radio." . . . Joe Coughlin is one of those fellows from the big city (New York) who has finally succumbed to the nostalgia of the farm. He has established himself as a gentleman farmer on a modest scale on the outskirts of Roanoke. If you spot Joe flying low in his new Ford along Route 24 about 7 p.m. Tuesday night you will know that he has just finished teaching a class in public speaking and is rushing home to dinner. He also instructs a class in salesmanship. . . . Anytime you want pointers on how to build a summer camp just drop in to see Bob Eaddie, the newest member of our sales group. Bob has a problem which may confront many of us when television finally comes to Fort Wayne. At his home in Indianapolis, he has a television set (the only one in the neighborhood) and his problem is to determine a way by which he can enjoy some of the better performances without locking the door to the neighbors. . . . Wendell Hughes might be called a jack-of-all-trades and well he might be for he manages two apartment buildings and is called upon to perform all sorts of miracles. He and his wife are redecorating their apartment and if you ever need instructions on how to stitch slipcovers—by all means, see Wendell! . . . West of the Fort Wayne Country Club you will see a new gray colored two-story house with attached garage which Morey Robertson, his wife and father erected. It's a beauty! In bis spare time, prior to working on the house, Morey repaired radios. When he has completed the interior finish work, television should be in Fort Wayne and Morey will presumably switch from radio to television repair work. . . . George Hoopingarner's after hours time is well spent with his new child. Recently, however, be turned interior decorator, par excellence, and plastered, papered, and painted the apartment to the complete satisfaction of his wife, child, and landlady. George is keenly interested in golfing as evidenced by the acquisition of a new set of irons. . . . When anyone around here thinks of civic affairs they immediately think of Andy O'Dwyer, for he spends much of his time in this manner. He is very active in the Junior Chamber of Commerce, the Civic Theater and similar organizations. . . . Art Rowe has been one of our golfers and bridge players in the semi-professional class. To maintain this proficiency takes plenty of time. Add to this the time spent in purchasing a new house and trying to sell another, coupled with being a good father to a couple of kids, trying to avoid a severe sunburn, and looking after an "ask-the-man-who-owns-one" automobile and you have one busy man. Of course, you have seen his photograph frequently in the newspapers as an active member of the Jaycees. . . . George Culp devotes much of his spare time to music, particularly singing. You'll hear him every morning at 6:45 on station WGL if you are an early riser. No, George doesn't rush down to the station each morning to perform—he does a "Bing Crosby" and has his voice transcribed. . . . George Parent is a sports enthusiast and enjoys card playing. As a sideline he delves into cabinet making and is now at work trying to design a house to his satisfaction. . . . Ray Rogers is one of those newly-married men, nuff said! . . . Reece Gwillim rather recently acquired a brand new Dodge, and from the experiences he has had "taming" it, I judge that he must spend considerable time dreaming up alibis for the police. . . . The manager of the Squares softball team is Paul Ward. In order to make the deadline, I did not have time to interview him properly.

Given Gift At Retirement

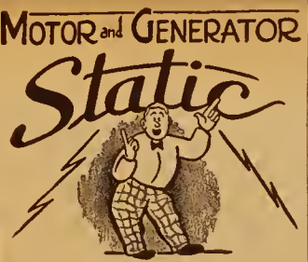
When Chancy Newhard, Bldg. 26-4, left for retirement, a group of his friends presented him with a gift. Shown at the presentation, (l. to r.) are: First row—Oral Hyser, Ralph Braden, Rolland Mennewisch, John St. Clair, Raymond Horstman, Benjamin Keller, Mr. Newhard, Thomas Hildehrand, Gerald Norwalt, Myron Racine, Alfred Topp, Arthur Gallogly and George Harmeyer. Back row—Ralph Bultmeyer, Doyle Johnson, W. H. Crouse, Transformer Div. 94 Supt.; Arthur Vachon, Norval Banter, Ned Greulach, Thomas Freeman, Leland Gambrell, Zeno Fox, Archie Rian, Fred Bender, Charles Jennings, Henry Muller, Leo Vachon and Orville Smith.

ROSS IS ELECTED TO SIGMA PI SIGMA

In recognition of high scholastic standing in physics, Keith E. Ross, Bldg. 4-6, has been elected a member of Sigma Pi Sigma, national physics honor society.

Trey To Retire

C. E. Trey



Charles E. Trey, Bldg. 4-5, retired Wednesday, June 1, after 40 years of service with the Company.

He was first employed in 1909 as a laboratory inspector, and later became an assembler. He has worked on assembly since 1911, except for a short period in 1917 when he did winding work.

M. B. A. SICK LIST

Irene Schafer, Eugene Simonton, Lizetta Worthman, Arnold Schieferstein, Robert Johnson, Henrietta Deck, Mary DeVries, William Jamison, Raymond Lahrman and Ted Waggoner.

MOTOR and GENERATOR Static

Thought for the Week: "See America First"

DOCTOR: S. Stanley Marquardt, known as friend, brother, captain, and several other names, has added a new cognomen to his prodigious precedents. He now becomes known as "Doc." He is a past master of animal care, common folks say veterinarian. Doctor Marquardt is now giving evening classes at the Center on such exciting subjects as, "How to take a cow's pulse," "What to do until the (horse) doctor comes," "The cow bride," and various other subjects. Anyone interested in one or more of these thrilling subjects, contact Doctor Marquardt, Bldg. 31-1. . . . ODDS AND ENDS: Do you remember when Broadway was paved with cedar blocks? . . . Bob Kite, Bldg. 19-1, is making great progress with his class in bronco busting. . . . Helen Staley, Bldg. 19-1, is conducting a class in how to make bubbles with bubble gum. . . . MORE ODDS AND ENDS: Mary Ellen Nies, Bldg. 19-1 test office, celebrated her birthday June 6. Congratulations, Mary Ellen. . . . Ed Hormann, Bldg. 31-1, has started a photographic gallery—further news later. . . . Your reporter and family, including both granddaughters, had the pleasure of visiting the Toledo (Ohio) Zoo Sunday, June 5. This is an interesting place to visit, just a vacation hint. . . . Your Roving Reporter.

Carry-over from last week, I am sorry, I seem to have written Saturday when I meant Sunday for the Garringer-Hilc wedding. Anyway, Sunday was a perfect day for a beautiful wedding. . . . Did you know that in Bldg. 18-1 we have a wild animal cage? At least Arnold Hensick was a little wild awaiting the arrival of some kind soul to let him out of the locked vault. Sid Johnson came to the rescue—sorry I can not repeat the conversation, it was good. . . . Betty Jean Rose returned to work in Bldg. 18-1 Monday following an absence of two weeks due to illness.

18-5 in the News

Believe it or not! They wish to thank Ed Hagadorn for showering them with beautiful roses—really brightened up the blue-print room. . . . Anyone wanting Mary Ann Van Ryn to work doubly hard should mention the name of John and she seems to come to life. He happens to be the "man of the hour." . . . Pat Beebe and Pat Waterman have acquired a beautiful tan much to the envy of all. . . . Bldg. 18-5 was recently well represented in Chicago, i.e., Ginny Bradtmiller, Eloise Kartholl and Opal Cook. . . . Dudley Snyder and his better half recently visited Niagara Falls and Buffalo. Too bad, though, Dudley did not get to go over the Falls in a barrel.

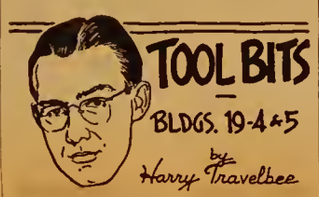
18-4 Activities

Welcome to C. Tuerschman who recently transferred from Bldg. 6. . . . This floor has taken on a rosy glow from all the peeled noses and sunburns. . . . If anyone wonders where the bass voice comes from, it's Karl Brandt, who has to let loose once in a while. . . . Congratulations to Al Tharp on his 28th wedding anniversary. . . . Happy birthday to Florence Badger. We enjoyed the ice cream and cake. . . . We are sorry that Clarice Craighead has left us. We will miss her cheery presence, but wish her luck in her homemaking duties. . . . Ralph Bailey will leave Bldg. 18-1 today to resume his work at Ohio State. We have enjoyed having you with us, and hope that someday you will return to G-E. . . . By the way, have you ever visited all of Indiana's state parks? If not you have missed a very pleasant time. Why not drive down to Madison, Ind., and spend some time at Clifty Falls? The grounds are beautiful, and it is a pleasure to sit on the porch of the hotel and watch the old river boat wind down the river. The view over on the Kentucky side of the river is nice, too. Even if you can't go, it is nice to dream about it. . . . Lee Strasser, Bldg. 18-1, was absent last week recovering from an automobile accident. . . . It seems that in addition to getting himself locked in the vault, Arnold Hensick, Bldg. 18-1, recently made himself famous when he made a brilliantly executed home run for the Works Service baseball team. . . . We are sorry to learn that Gladys Forst's mother has a broken hip and is in the Wabash County Hospital. . . . Mary Cooper, Bldg. 18-2, and Edna Neiber, Bldg. 16-3, have been enjoying a vacation in our national capital. They did not indicate that they planned to visit Harry, but are spending some time with Mary's brother.

The boys and gals of Distribution did considerable galloping about the country over the holiday week-end. . . . "Dutch" Wilson made the most brilliant show when he appeared Tuesday just radiating heat from his sunburn. The amazing part is that he didn't get the bright coloring from fishing. . . . Betty Millhouse took in some of that really lovely scenery in southern Indiana. . . . Your Ed tramped up and down through Mammoth Cave, while Eileen Fitch visited that famous city on the shores of Lake Michigan, Chicago. . . . This is slightly belated, but none the less we'd like to announce the arrival of a new nephew for Dorothy Fletter. . . . Another newcomer is little Stephen Fulton whose proud mama was one of our former colleagues Floy Fulton. Congratulations to Momma and Pappa Fulton. . . . There is a gentleman in our midst whom all have decided must have been born under a lucky star, or possibly he carries a horseshoe in his pocket. Regardless of where this magic power originates it is certain that Ed David's power of conversation (that's talking people out of things) afforded him a tidy sum. Philanthropist Lloyd Platt can whole heartily confirm this fact. . . . Today we say farewell to smiling Kay Kirwin. The gang wishes for you and your hubby the very best of everything, Kay. The doors are always open for a visit. . . . We also said farewell to Sherm Welch last week. We hope the luggage comes in real handy, Sherm. Come in and see all the gang anytime.

June, the month of roses and brides, has arrived. Alta Bishop recently announced her engagement and approaching marriage to Lou Mayle. The wedding is to take place July 30. . . . Minnie Fryback has as house guests, her brother-in-law and wife, Mr. and Mrs. Max Fryback of Eldorado, Kan., who have been vacationing here. . . . Lyle Rupert will be celebrating another birthday June 15. Here are wishes for many more such occasions. . . . The medical section will be represented when Elex has their trip to Niagara Falls. Kathleen Walsh (formerly of Taylor St.), Berneta Welbaum and Mary Heymann are planning to go. Watch the local papers for any spectacular stunts, such as tight rope walking, barrel acrobatics, etc. . . . Veda Orff has been spending some time with her niece, Anne Ehinger, who underwent a tonsillectomy at Kendallville Hospital Saturday. . . . Showers are in the air—bridal showers, that is! Imo Jean Schwartz, Bldg. 21 Dispensary, and Florence Hoevel, Employment Office, were hostesses at a shower given last Saturday evening for Ruth Duell, former employee of the G-E Company. We also hear that they are to be her attendants at the wedding tomorrow! Wonder which which one is going to catch the bride's bouquet?

Red Corpuscles



Time was when portly Doctor Lance
Could spot anemia at a glance;
But his most fertile source of tips
Is blocked since woman paints her lips.

So be a finger tip must probe in
To estimate her hemoglobin,
And finds oft times ruddy paint
Makes a woman look like what she ain't.

Retires Under Pension Plan

When Henry Schwartz, Bldg. 4-1, retired, a number of his friends gathered to say "goodbye" to him. In the picture are: (l. to r.) J. W. LaVine, Adam Flager, Jesse Moore, Mr. Schwartz, Raymond Holmes, Raymond Dotzer and Raymond Cluts.

We understand that the Jones Street parking lot is to be relocated on Swinney Ave. for the convenience of Bill Trumbower. This is an effort to correct the difficulty he has finding his car after work. . . . We have information that Carl Ahlersmeyer used to sing in many foreign languages in many well-known places. His operatic ability was supposed to have been unsurpassed. We suggest that John Hensler and Dewayne Schele give him a tryout for their barbershop quartet. . . . Paul Weaver thinks the time box is a mail box for he's been mailing all his letters there lately. . . . Jim Pugh had just left the insurance company where he was getting an adjustment on a bent fender, when, you guessed it, he ran into another car and dented up another fender. . . . Congratulations to Jerry Widner on his wedding May 29. We wish Mr. and Mrs. Widner all the happiness that can come their way. . . . Johnny Marks, our Willys-Overland expert, left recently for the Taylor Street plant. . . . Joe Mettler is beginning to think that television is becoming very realistic since that piece of lead pipe dropped off his television antenna and hit him on the head. . . . Cal Bear thinks since he has his Pontiac torn down and so many Pontiac owners are asking questions he could charge 10 cents admission to see the inside of a Pontiac. . . . Louis Paluszak says he can't figure why his wife changed her wash day from Monday to Friday. Could be the fact that you're home on Friday, Louis. . . . Don't say "hello" when you answer your phone is the advice of Bill Wedler. He should know because when he answered his phone be said beans or steak or something he had for supper that evening and won a nice basket of groceries on the radio program "Dinner Winner." . . . Don Alcott is looking for a ten or 15 gallon pickle barrel. If any of you fellows have one for sale please contact Don as the pickle season will soon be here. . . . Gus Rodenburg, with his face blushing like a red rose, says you can call him "old butter fingers" since he dropped the door keys to the Tool Division down the elevator shaft. . . . John Roebel says the surest way to get your dirty aprons home for laundry is to wear them home, so he was telling us on the elevator, apron and all. . . . Ralph Steward was visiting the tornado area around Terre Haute recently. He claims he missed the storm by 20 minutes. . . . Elmer Sauerwein was recently voted the champion back seat driver of Bldg. 19-4. Most fellows say it's better to have him in the back seat than driving in the front seat. . . . Al Stecker evidently hasn't heard that old saying that a bird in the hand is worth two in the bush. He accidentally turned his billfold upside down and his money rolled to the four corners of the cafeteria. All we needed was a camera to get a picture of Al crawling under the tables.

Dee Confer has been proudly displaying some of the giant strawberries he's producing on his vines. Not to be outdone Paul Monroe says he's growing bigger ones than that—his are now as big as tomatoes and still green. Time will tell, he'll have to bring some in to prove his story. . . . Laurene Kraus was visited over the week-end by her daughter and daughter-in-law from Iowa. They brought along little Lynn, who is only five and one-half months old, to see grandma for the first time. Needless to say, Laurene thinks she is just tops. . . . Talk about taking candy from a kid, how about taking the kid's bicycle! That's what Herschel O'Dier did one morning when he found himself a little late and pedaled his way to work on son Lynn's bicycle. Oh yes, he made it on time. . . . They say Ralph Reinking has been combing the junk yards to find a lock for his Chevrolet. He seems to be tired of using pliers in lieu of a key. . . . Believe it or not, Bill Shuler was seen in a downtown drugstore on Saturday, in the company of two charming women drinking, of all things, a plain coke. . . . Marie Thornhill put on her prettiest smile when the roving photographer snapped her picture on Calhoun street last Saturday. All we can do now is wait and see what develops. . . . Justin Heaston has been transferred from tool maintenance to Taylor Street. Although we hate to see him leave here, we hope he will be happy in his new work. . . . Willie Mertens and his brother-in-law go to Waynedale for their recreation Wednesday nights. . . . Betty Williams and Erna Mann spent Saturday in Chicago where they attended the races at Washington Park.

The old straw hat is back on the peg
Still doing its work, though on its last leg
Its brim is bent, its band grown thin
But still proclaiming to the office that Vern Castle is in.

Fishing always makes a good topic for conversation and at this time of year we have plenty of conversation, especially since Harold Boles, Fred Fenner and Jack Bendure came back from the East. They make that trip at least once a year, and we'll bet that the trout spend the rest of that year teaching their children how to avoid those three fishermen. . . . They say that June is the month of brides and roses. We have no brides this year, but plenty of roses on the various desks. Hope no one in here has rose fever. . . . Hugh Reynolds is having to get up a half hour earlier now because of detours on the highway. One of these days the highway will be fixed, and Hugh will forget and get up too early. Will he be mad!

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No od will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday Noon, June 13, 1949

WANTS RIDE—LaVern Ferguson, from Waynedale to Taylor St. Plant. Works for Bowley, Taylor St., Div. 13, from 6:48-3:13. H-24198.

CORRECTION

LAST WEEK'S ISSUE — Incorrectly stated that Lt. Edwin Koch celebrated his 30th anniversary at G-E. This should have been 35 years.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

Some of the gang in Bldg. 19-3 came back to work from the Memorial Day week-end with fancy sunburns. Art Keller, Charlie McCormick and Wilber Ayres, were a few. . . . George Wolfe is back from a vacation. He spent most of it working on his cottage. . . . Rudy Rastenburg is taking a week's vacation, and he certainly picked a swell week. . . . Jim McClain, one of Sheriff Zeis' newly formed body of light cavalry, participated in a couple of parades in Fort Wayne and Waynedale over the week-end. . . . N. G. (Pete) Prince was seen in the Employees' Store last week. He looks in better health than ever. . . . Frank Enderle (remember?) spent the Memorial Day week-end in Pierceton as house guest of a certain young lady. Things must be coming to a head in this romance. Perhaps we can congratulate Frankie soon. . . . Notice to the public: Bill Irmscher is the proud owner of a new Chevrolet. Up to now it has not been used to drive in, but only for a decoration in Bill's front yard. . . . So Pete Prince was seen at the Employees' Store! Bldg. 19-2 did not behold his resplendent countenance at all. What goes, Pete, have you outgrown the old place? Don't we rate anymore?

COUNT OFF — Taylor Street DIVISION 17

10-20-30 by Dorothy Hangelmann

The boys in test and inspection were entertained by their foreman, Charles Penn, at his home recently. They played ping pong and Doyle Sheets showed Charlie how to throw darts. Then Charlie was given some pointers on how to play cards. After the game Charlie served refreshments. It was a lunch fit for a king; all kinds of sandwiches and fresh doughnuts. Ed Fiedler ate his weight in doughnuts and here at work he says he never eats much. The boys kept Mrs. Penn busy making coffee for an hour. You'd think they never ate before but it was very delicious. Charlie, we all thank you for the swell party. . . . George Ryan drove his Buick to the party and while the boys were standing outside they saw a big Buick coming down the street with a big hat behind the wheel. When it parked the door opened and out came our little friend, George, the hat was bigger than he was. We laughed, so he took the hat off, threw it in the car and wouldn't wear it again all day. Sorry, George, but it does go nice with the car and why don't you get a pillow while driving so the pedestrians can see that it isn't a driverless car. . . . Ducky Drake put Charlie on the pan. He asked him if he knew what the governor of North Carolina said to the governor of South Carolina. Of course, Charlie said, no, and Ducky said it's a long time between drinks. Was Charlie's face red but he took care of the situation right away as he is the perfect host. . . . Walter Golchin's son lost his billfold at the 500-mile races and this week it was returned to him with a letter from the finder. She explained why there wasn't any money in it. The story goes that her two friends found it. It contained 12 dollars and a two-dollar bill. Two of the women wanted to take the money out of the billfold and throw it away, but the writer said that wasn't right, they should split it and then send the billfold to the owner. They split the money and the writer returned the billfold; in it was the two-dollar bill. That just goes to show that one out of three is honest. The only thing we can't understand is why they didn't keep the two-dollar bill unless they thought it was bad luck. . . . We hear Ralph Dennison doesn't appreciate art. He was seen taking some pin-up pictures down. . . . Andy Anderson and Ed Brockall are beginning to look like two Indians. They have been doing quite a bit of fishing and are getting tan. . . . Bill Pappert was transferred to Div. 14 last week, but you're still close enough to drop in and see us, Bill. Good luck on the new job. . . . Mary Shreve started to Chicago last Friday to spend the week-end with her husband. She was rushing around home getting ready when she noticed she had to hurry to catch the train. She rushed to the station and to the ticket window to get her ticket when she discovered she had no purse. She didn't even have a nickel to call home for it. After awhile she got up nerve enough to ask the ticket agent if she could use the phone. She called home and asked her nephew to bring it right down. She met him at the door, they bought the ticket only to see the train pull out. Mary said, "They can't do this to me," and took off after the train, caught up with it and jumped on. We never learned how far she had to run, but we heard she just had caught her breath when the train reached Chicago. . . . Louise Sinn had the scare of her life last week. After being in bed awhile she heard a noise and looked up to see a man standing before the dresser. She tried to scream but no sound, but after quieting she said, "Hey, what do you want," but no answer. After another question she turned on the light and the fellow said, "turn that light off," and she discovered it was her nephew walking in his sleep. . . . Andy Anderson, Bill Pappert, Hugh Neely, Frank Beatty and Moe are going on a fishing trip to Lake Erie this Friday evening and Saturday on Frank's brother-in-law's fishing boat. Frank has made all the arrangements and the fellows are waiting patiently for Friday. Blow-by-blow account upon their return. . . . Welcome to Janice Sollberger and James Feiereisen, hope you both like the crew.

SHORTS and SNORTS from GENERAL SERVICE

by Katie Steinman

When Fred Altekruse went to New London, Conn., Bill Doehrman was afraid he wouldn't make it in his Ford and graciously offered Fred his Chrysler to make the trip. (Knowing very well Fred wouldn't be able to walk if he did get there after a trip like that in his Ford.) However, Fred declined the offer and took a plane to New London for his son's graduation. . . . Bob Such in Standardizing will be glad to give you the details on this little ditty about himself and "Tin Can Annie," the barber shop and the pumpkin pie. Sorry we can't get the whole story on this. We do know it happened in Chicago and Bob gets pretty red when quizzed about it. . . . The boys waited just so long last Saturday at the firemen's picnic for Jay Greer and when he didn't show up, started their demonstration. Little did they know he was running all over the country, ending up at the Beverly Gardens, trying to convince people that a firemen's picnic was to be in progress there at that very moment. Jeepers, was he surprised to learn from Mrs. Hanauer that the picnic was being held at the Log Cabin. That just "shows to go ya'" folks, how confused a person can really get (P.S. Ernie says he couldn't understand it—and after those explicit directions, too.) . . . When Ray Quinn goes out to the country to water his garden, he starts out with a huge can of water deposited in the rear of his super duper deluxe Pontiac, but by the time he gets out there the water has all splashed out leaving about two inches of water in the bottom of the can. Honestly now, Ray, isn't there an easier way to get that garden watered, besides making a beast of burden of yourself and that broken-down jalopy of yours? . . . We are sorry to have Bernie Kain and Bob Hughes leave us and wish them luck on their new assignments. . . . We're sure "Boodles" Bendel will enjoy his vacation next week, visiting his mother in Pittsburgh, Pa. . . . Harold Canfield has been seriously ill, and is at the St. Joseph hospital. We sincerely hope he is better by this time. . . . Birthday greetings to Jim Leeper and Bob Kelker. . . . Whitie Van-Auken told Cliff Nail about a swell place to eat lunch and Cliff, partial to good food, decided to try it. What Cliff forgot was that Whitie's wife had been gone for several weeks and that anything would taste good to Whitie, or in other words. If you want a good place to eat, find it yourself. How about that, Cliff? . . .

Apprentice BROADCAST

by MILDRED ELLIS

The best news that any apprentice heard last week were those wonderful words: It is the last week of classes. . . . Since the hot weather, all the boys have had that drowsy look, but who could sleep with a guy like Leffers around annoying everyone. . . . Most of the gang have to depend on either the alarm clock or their wife to awaken them, not everyone rates the special attention of their supervisor. If you want to know, ask Joe (for details). . . . There are many excuses for missing work due to illness, and Wayne Bergman really came up with a good one. He was sick from breathing alcohol fumes while refinishing a boat. Most of us believed the part about the alcohol fumes, but not the part about the boat. . . . If you don't enjoy the hot sunshine, why not try for a moon-burn. The effects seem to agree with Meads. . . . How to help combat inflation: Wait until 30 minutes have elapsed; then ring in to work. That's the way Homer Carson does it. . . . The Zurbuch family moved into their newly acquired home over the week-end. Kenny says that most of their things are still in the boxes, but he knows what's in each box. He should—as many times as he's had to dig through every one of them. . . . If the draftsmen don't get to play a game of ball soon, they will be burned out before the season starts. . . . Have you noticed that southern drawl acquired by Konow and Reinking. That's the effects of just one week-end in Louisville. Wonder what we would hear after a week spent in the deep south? . . . The draftsmen are all getting back into shape after their big week-end at the lake. . . . They say work and grow thin, so the fellows are wondering if Fremion is working every week-end. Whitie claims he hasn't gained a pound — just looks bigger. It must be the effects of that lake air. . . . Our apprentice ball club has added another win to their credit, after defeating the Grace Lutheran Church team last week. . . . Jack Kirlin had all the boys in class admiring his new hot rod which he claims he got for his son, Mike. We just wonder if Mike will ever get to play with the hot rod. . . . For our fish story this week: Wagner and Aughinbaugh claim they caught 38 fish Thursday night. . . . Schmidt has a remedy for steam cured siding. First, let perspiration drip on the board, then nail it up on the sunny side of the house. . . . Brownie will start building his house as soon as he can find a suitable harness for his wife. He intends to have her dig the basement. She's nearly rested up from plowing that back forty.

FRACTIONAL FICTION — BLDG. 4-5

by LEOLA CARRIER

Greetings go to Evelyn Johnson and Joe Howard who had birthdays recently. . . . Congratulations to Walter Rehling who is a proud grandpa of a grandson named Bruce Allen. . . . We all wish the best of luck to Ella Staver and Olga Hart who retired May 31. . . . We are glad to see Forest Bunner back with us. He has been on the sick list for some time. . . . We're also glad to see Nera Scott, who is back with us. . . . We see some new faces around the aireraft section. They are Boyce Lambert and Ralph Rosenberry.

Inquiring Reporter:

WHO DO YOU THINK IS THE MOST OUTSTANDING PERSON IN THE UNITED STATES TODAY?

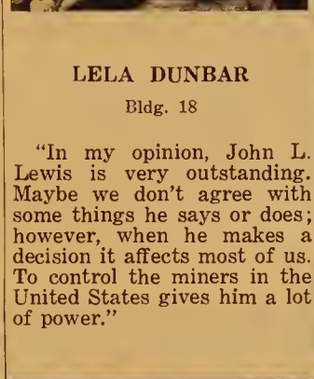
FLORENCE E. CLUM

Taylor St.

"I feel Dean Acheson is the most outstanding man today because the future of the United States largely depends upon his ability to secure a workable self-sustaining future for European countries, especially Germany."

QUENTIN FREIBURGER

Bldg. 26-5



"General Lucius Clay, for his outstanding job of occupation in Western Germany, is my choice for the outstanding person in the United States. I think he has instilled in the people the democratic way of life."

RAY ANKENBRUCK

Taylor St.

"I would pick Herbert Hoover for the outstanding person in the United States because of his government reorganization and welfare work."

LELA DUNBAR

Bldg. 18

"In my opinion, John L. Lewis is very outstanding. Maybe we don't agree with some things he says or does; however, when he makes a decision it affects most of us. To control the miners in the United States gives him a lot of power."

ARTHUR W. THOMPSON

Bldg. 22

"Herbert Hoover is my choice because he is outstanding in his thinking and accomplishments for the welfare of this country and others. He is developing a plan whereby the government may save millions of dollars yearly, if adopted."

Voltmen Score 7-5 Victory Over Auscos

Chicago American Giants Hand G-E A 12-6 Setback

By Bill Hunt

Charley Shipman showed a strong throwing arm last Saturday night as he pitched and hit the Voltmen to a hard fought victory over the St. Joseph Auscos, 7-5, at Dwenger Park. Dark Horse Chuck Bobilya also showed some power as he tripled to right, to send Shipman and Green home with the tieing and winning runs.

The Voltmen started early as Horman reached first on an error, was sacrificed to second by Green, stole third and then scored on Shargey's long fly to right. In the second, St. Joe scored when Jones went all the way to third on Runge's error then scored when Shargey bobbled Kennedy's grounder. Olin Smith reached first on second baseman Shilling's error. He went to third on Miasek's single, then scored when Runge went to second on Schultz' boot. Shipman followed Harwood's walk with a double to left to score Runge and Miasek.

The Auscos scored two in the third on three singles and an error. They then went ahead in the fifth, as they scored twice more on a single, two errors, and a long fly ball. The Voltmen were held by Flanagan until the eighth, when they scored three with the help of Bobilya.

Giants Beat Voltmen, 12-6

Most of the Voltmen were somewhat less than sensational as they lost a messy ball game on errors and the inability to retire cleanup man Summers for the visitors. He hit in seven of the 12 runs, which in itself would have beaten the Voltmen without their crowd-pleasing bobbles.

Gabby Horman had a big night with a home run, double and a single with Green having a triple and double. Hank Doehrman did a creditable job as he relieved in the sixth and allowed only one run.

Zollner Pistons Win Over G-E Owls

The G-E Owls of the City Owl softhall league lost to Zollner Pistons at McMillen park Wednesday, June 1. The final score was 6-3.

G-E GOLF

By Hugh Dubdit

Paced by John Skevington, who turned in the best score reported this season, a 34, the Brassies of the Wednesday night group picked up 15 points to move into second place. The Mashies lead the group with a point total of plus 35. Glenn Schimmele shot a good 38 count and W. S. Kirke came in with 41.

The Apprentice team of the Monday night group moved into first place with plus 16 to lead the Lost Balls by only two points. Walter Sunier shot a 39, Don Dimke and Ralph Wickliffe came in with a 40, and Mert Edgar turned in a 41 for the low rounds. The evening's play was featured by Bob Rowe's eagle three on the 462 yard 18th hole.

Tuesday night the Nineteenth Holers went into first place with 17 points. The Optimists are in second with three points behind. Best scores of the evening were shot by Red Braden, 37; Paul LeCoque, 40; and B. Kayser and Dick Tobias with 41. Don Stoneman shot a nice 47, ten strokes under average.

This is not a paid advertisement, but anyone who has a putter for sale, please contact Paul LeCoque and C. A. Anderberg.

OWL GOLF

By Earl D. Stauffer

The weather came back to normal and so did the scores in the Owl Golf League. Those Hotshots blasted their way back into the headlines after a week of quiet. Jimmy Sternberger with a 37 and Warren Wickliffe with a 38 got back into the 40-blasting class. The Hotshots picked up nine points at the expense of Bernie English's boys.

John Shanahan, the Bierbaums and Merchant put a kink in the plus column of Team No. 1 to the tune of two points. Merchant with a 48 was low for the winners, while Lou (and he was killing snakes this time) Barney paced the losers with a 44.

Goller took over in place of Suelzer on Walt Pook's team and carded a 41 (14 strokes under his average), thus helping Team No. 5 to thump Team No. 2, the Jolly Boys, by 18 points. Ray Stanger was low for the J. B.'s with 47.

Winter St. Drops Game To Firemen

Winter St. lost its second game of the Interdivision Softball season, dropping a 6-1 decision to the Firemen. The winners are managed by Ivan Parrish.

The Squares fattened their batting averages at the expense of Main Office. Rogers and Emling led the 18-hit attack, getting four each. The final score was Squares, 14; Main Office, 0.

Works Lab took the league lead by winning from Fractional, 9-4.

Supervisors, Foremen Attend G-E Ball Game

A dinner party for the supervisors and foremen of the Production Service divisions, under the supervision of A. E. Leider, was held Thursday evening, June 2, at Cutters Catering in the Purdue Center Bldg. After a steak dinner, they attended the ball game between the Voltmen and Chicago American Giants.

The committee in charge of arrangements consisted of Frank J. Goetz, chairman; H. C. Grueb, H. S. Shields, and Gilhert Bond.

The game was of special interest because of a pool set up by the group. The highlight of the game was the rooting by Ed David for the Chicago team in the sixth inning.

Ed bought Lloyd Platt's ticket when Lloyd gave up any chance of winning the pot. Lloyd, in desperation and cursing his bad luck, offered his ticket for sale for two dollars. Ed told him he would be good to him and take it off his hands for one dollar, the price he had paid for it. Glad to have his money back, Lloyd nearly collapsed when Ed won the $10 pot with his ticket.

TOUCHING THE BASES

by Walter Histed

Last week's play in the league saw a general tightening up of the standings with the high flying, gold-plated Auscos cut down to size twice over the week-end as they lost to Fort Wayne, 7 to 5, and at home to Michigan City, 11 to 10.

Big feature of the week was the abrupt come-back of the Lafayette Red Sox who, after dropping five straight, three of them by one run —came back to win their next four games. The other feature of the league play has been the erratic play in the field of the Fort Wayne VOLTMEN, whose antics in the field have been enough to turn any pitcher's hair gray.

Red Sox, 8; Cubs 5

The Lafayette Red Sox avenged an earlier defeat by trimming the Michigan City Cubs, 8 to 5, at Columbia Park. The Red Sox sluggers gave Slim DeLion a seven-run working margin in the first three innings and the slender right-hander coasted to an easy victory. Felix Mackiewicz paced the Lafayette attack with a single, triple and home run.

Line score:

Michigan City ..... 000 002 003—5 8 1
Lafayette ..... 304 000 10x—8 10 2
Smola, Alamo and Hofferth. DeLion and Hixson. Loser Smola.

Buds, 3; Cubs, 1

The Buds rallied for three runs in the ninth to nip the Cubs at Ames field in Michigan City. Jim Kilbane had held the Buds to four hits in eight innings. He was working on a slender 1 to 0 lead when the Buds rallied with five hits, including a pinch double by Ververka good for three runs and the ball game. Barney Morris, giant Negro star of the Buds, held Michigan City to a single, unearned tally.

Line score:

Benton Harbor ..... 000 000 003—3 9 3
Michigan City ..... 000 001 000—1 7 1
Morris, Ververka and Kovach, Young. Kilbane and Hofferth. Winner Morris.

Cubs, 6; Studebakers, 4

The Cubs got back on the winning trail by defeating the Studebakers at Lippincott park, 6 to 4. Steve Smola held the losers to one earned run while pitching the distance for the Cubs. Billy Fuchs rapped out three hits for the Cubs, while Bohanna got three for South Bend. Lefty Roy Lee pitched all the way for the losers.

Line score:

Michigan City ..... 200 100 030—6 9 3
South Bend ..... 010 001 020—4 12 3
Smola and Hofferth. Lee and Morgan.

Cubs, 11; Auscos, 10

The Cubs and the Auscos went through two and a half hours of toil at Edgewater park before the Cubs came out on top, 11 to 10, in a wild and wooly game. Carl Kennedy and Tommy Thomas, with four blows each, paced the sluggers in this free-hitting affair.

Line score:

Michigan City ..... 000 431 210—11 12 1
St. Joseph ..... 320 010 220—10 16 2
Albosto, Alamo, Cary, Meyers and Hofferth. Winner Alamo. Holland, Alexander, Flanigan and Westerkamp. Loser: Holland.

Red Sox, 12-6; Buds, 1-3

The resurgent Red Sox trounced the Benton Harbor Buds in games played over the week-end. At Benton Harbor Saturday, the Red Sox sluggers, paced by Cannizo's four hits, hit the offerings of the Bud's ace Lefty Frank Ververka to all fields for a total of 19 hits. Lefty Al Hazel won his second game for the Red Sox.

In the Sunday game at Lafayette, Art Herring outpitched Kimmett and Rossi to win 6 to 3. Felix Mackiewicz had four hits for Lafayette and Kovach drove out three safeties for the losing Buds.

Line scores:

Lafayette ..... 210 100 251—12 19 1
Benton Harbor ..... 000 000 001— 1 4 6
Hozel and Hixson. Ververka and Kovach.
Benton Harbor ..... 001 200 000—3 8 1
Lafayette ..... 001 010 10x—6 8 2
Kimmett, Rossi and Kovach. Herring and Hixson. Loser: Kimmett.

G-E Majors Lose To Zollners, Beat Harvester

The Majors lost their second game to the Zollner Reserve Club Thursday night, June 4, by a score of 4-2. The losers' runs came in the first of the fourth as Stanski led off with a double and Baals was safe on an error that went for three bases and scored Stanski. Baals scored on Yarman's fly to left.

The winners' runs all came in the last of the fourth on three hits and an error. All of the hits were high bounders to the infield that were beat out.

The Majors won their game from Harvester Tuesday, June 7, by a score of 7-2. Yarman led the hitting with a home run and a single in three times at the bat.

Esterline hit a home run in his only time up, while Fieldheiser, the pitcher, had two singles in both times at bat. Doubles were also hit by Stanski and Baals.

Line Scores:

G-E ..... 000 200 0—2 3 1
Zollner ..... 000 400 x—4 5 2
Walike, Baals; Lundquist, Ramage.
G-E ..... 220 102—7 7 1
Harvester ..... 010 001—2 4 0
Fieldheiser, Raals; Rebber, Leffers, Bobay.

G-E Hams Down Foresters, 7-3

In scoring all their runs in two innings, the G-E Club Hams defeated the Foresters, 7-3, at Packard park Wednesday evening, June 1. The G-E team started the fireworks with a four run rally in the second inning and then bounced back again in the sixth with a three run barrage.

The team played error-less ball behind the pitching of Lefty Musser, who allowed eight hits but kept them well scattered. A large crowd was kept well amused with the proceedings of the game.

12 Bowling Teams Emerge As League Champions

The pictures on this page show the championship teams for the past season in the various bowling leagues of the G-E Club.

Trophies went to the highest scorers, who are shown at the right: (l. to r.) Les Shroyer, for a high three-game total of 694; Helen Wagner, three-game total of 594; Tommie Williams, for the high single game, 247; Stanley Giese, high single game, 290, and Walt Mertz, for the highest average of the season, 189.

LADIES' MONDAY LEAGUE: Emma Vaughn, Addie Masbaum, Barbara Vaughn, Virginia Buesching and Pauline Hartman.

LADIES' TUESDAY LEAGUE: Luella Ternet, Eva Fisher, June Getty, Tommie Williams and Charlotte Stanford.

LADIES' FRIDAY LEAGUE: Bessie Potts, Virginia Mollet, Marjorie Rall, Virginia Bowman and Ruth Henline.

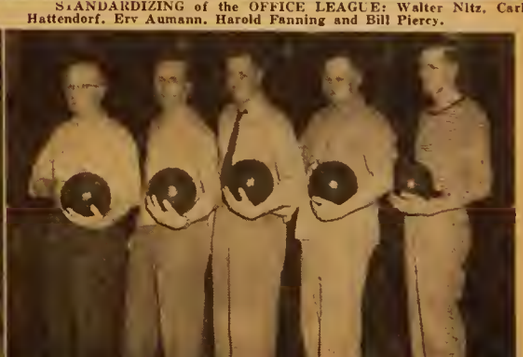
BROUWERS' of the INTERDIVISION LEAGUE: Walt Mertz, Leo Elward, George Luedeman, Frank Matthews and Les Shroyer.

KSP of the SPECIALTY FHP MOTOR LEAGUE: Clarence Nahrwald, Bill Pappert, Kenneth Bainbridge, Rudy Zelt and Hugh Neely.

PRODUCTION of the TAYLOR ST. LEAGUE: Bill Dunmire, Paul Frey, Moe Satterwaite, Ray Hills and Frank Beatty.

TOOL'S of the SMALL MOTOR LEAGUE: Paul Boedecker, Ray Matthews, Leo Reffelt, Wilbur Hinton and Henry Vance.

No. 2 of the APPARATUS LEAGUE: Donald Alcott, Wayne Boester, Clifford Dunten, Edward Bienz and George Horner.



STANDARDIZING of the OFFICE LEAGUE: Walter Nitz, Carl Hattendorf, Erv Aumann, Harold Fanning and Bill Piercy.

FLANGES of the FHP DIV. 14 LEAGUE: Waldo Martin, Herb Habig, John DeWald, Bruce Rohn and Theron Kitchen.

IONICS of the MASONIC LEAGUE: Howard Hickman, Harry Braden, Walt Altevogt, Robert Chevelier and Ben J. Smith.

INSPECTORS of the WINTER ST. LEAGUE: John Meyers, Stanley Green, Merrill Patrick, Virgil Lomiller and Roger Grant.

INVENTORIES Get in the Way of JOBS

Despite our best efforts to make sales, customers' orders for General Electric products have fallen off steadily for the last 60 days. As a result, we have had some substantial layoffs. We may have to make some more, but we are trying our best to have these as few as possible.

The number so far laid off has been different in different plants, depending on how the demands of customers differed for each particular product. Some operations are temporarily on short-time. Some few are continuing on overtime. But in the Company, as a whole, employment is still about 93% of our all-time high reached last December.

In the last few weeks, thoughtful employees have asked if we could not go on running our plants at the previous rate, and put the surplus products in stock in the hope of better business soon.

The fact is that much of the present lay-off problem at General Electric and elsewhere is actually the result of these stocks of materials being already too large. Too many producers of raw materials have too much on hand. There is too much material in process of manufacture. There is too much of finished goods in factories. And wholesalers and retailers have too much in stock and on the floor.

For the past 3 years, everybody has been buying faster than normal—has been eagerly replacing things worn out during the period of wartime shortages. And to meet this extra demand, manufacturers had to produce even faster than goods were sold to the final user. They had to do this because materials for proper operation in the recent flush times were scarce and uncertain. So everybody was not only trying to get out an unusual volume of sales but was also at the same time trying to build up to the high inventory required for steady operation at such a high rate.

And just about the time each raw material producer got his inventory up to suit his high production requirements . . . and just about the time the manufacturer did so too . . . and just when the distributors and dealers had gotten their stocks up to meet their high rates of sales — just *then* the customers all seemed suddenly not to be in such a rush any more. This meant that suddenly there was a far greater supply of goods than necessary all along the pipe-line between raw material sources and finished goods users.

For instance, at General Electric we still have on hand an inventory costing over $500,000,000. To some this might seem due to poor planning on our part. Since we're only human, perhaps we could have done a little better. But actually our big problem has resulted from the sudden and unexpected nature of the drop-off in the case of each product. And the extent of the drop-off varied so widely by individual products that what was once a normal inventory for the period has now become a one-month, or a six month — or even up to a twelve month — supply of individual materials. How dangerous and expensive it is to hold such huge stocks is shown by the fact that in the last few weeks the value of the copper we have on hand has dropped some $7,000,000 below what we paid for it. In addition there are large stocks of finished products in the hands of our dealers and others.

So, while we are trying to bring these inventories down, we are at the same time doing all within our power not only to sell enough to keep employment from falling further but to start increasing the number of jobs again at the earliest possible moment.

We are introducing new and better models of popular products, intensifying sales and advertising efforts, reducing prices. For example, refrigerators have been reduced up to 18%, with the greatest reductions in the most popular models; freezers and ranges up to more than 8%; water heaters more than 15%; radio receivers up to 32%; phonograph-combinations up to 35%; television picture tubes up to 16%. It will take some time for the full effect of what we are doing to be felt in the response of customers.

But we have got more to do than just liquidate these high-cost inventories through price reductions and extraordinary selling effort; we have got, meanwhile, to be learning how to begin producing again at the lower costs that will make soundly possible the better values required to make the sales for a long time to come. So General Electric will continue trying harder than ever to become able to supply the better values that will attract the sales that make the jobs.

In and out of General Electric, things may get some worse before they get better. But eventually we will all—working together—win the battle of inventory reduction, of product improvement, of price attraction, of sales appeal. Meanwhile, we will give you the facts as fast as we know them for sure, since we believe your informed, calm, and intelligent understanding of the situation is needed by all.

B & T

Aim at perfection in everything, though in most things it is unattainable; however, they who aim at it, and persevere, will come much nearer to it, than those whose laziness and despondency make them give it up as unattainable.

—*Chesterfield*

WAGE NEGOTIATIONS BEGIN WITH UE

Forelady Honored On 40th Anniversary

Martha Scherzinger, the only forelady in the Fort Wayne Works, was honored on her 40th anniversary with the General Electric Company recently at a luncheon in Bldg. 16-2. Attending the dinner were: (l. to r.) K. W. Michael, Ross Strodel, Ed Robin, William Wickliffe, Ted Bain, Otto Roehm, Fred Castor, Miss Scherzinger, Robert Blee, Florian Korte, Mardo Tobias, O. J. Mettler, Superintendent of FHP Div. 1, and George Prince. Miss Scherzinger works in Bldg. 4-3.

G-E Rejects Union Demand For Fourth Round Increase

Company Points To Bold Program To Attract Buyers Of G-E Products

Representatives of the General Electric Company and UE-CIO met in New York Tuesday at the request of the union to discuss demands of the UE for a "package" increase of $500 per worker. In rejecting the union proposal which included combinations of higher wages, pension improvements, shorter hours, health programs and other benefits, George H. Pfeif, Manager of Union Relations, said the Company has "been able to find no reason why any increase in wages and cost at this time would be warranted."

"Any general wage increase across the country or across an industry would simply be a general increase in costs and prices, certainly the exactly wrong direction to take when trying to get costs down to attract able but reluctant buyers," Mr. Pfeif said.

On the second day, the union made clear to the Company one point which had not been understood before which was that the UE was not asking for an alternate of a shorter work week with the same take-home pay, but was asking for a shorter work week with more take-home pay. One of the UE bargaining committee mentioned a 30-hour week as desirable,

G-E Pension Credits Case Decided In Favor Of Company

On June 8 the five justices of the Appellate Division, New York Supreme Court unanimously upheld the Company position in the pension credits arbitration case.

This case arose out of a dispute between the UE and the Company with respect to pension credits available to union officers. Under the contract the Company pays union representatives for time spent on union activities within specified limits; and with respect to such payments, the Company grants the representatives pension credits.

In the 1948 negotiations the UE asked that pension credits also be given to such officers for time spent on union activities in excess of the time for which such employees are compensated by the Company. The Company refused to do so, pointing out that all employees receive pension credits on exactly the same basis; that is, based on total compensation paid to them by the Company. Subsequent to the 1948 settlement of collective bargaining issues, the union sought to raise the question again and asserted that it was a proper subject for arbitration, alleging that the refusal to extend additional pension credits discriminated against union representatives in violation of the contract.

The Company petitioned the court to rule against arbitration of this question, taking the position that it should not be compelled to arbitrate merely because the union charged "discrimination" where it clearly appeared that there could not possibly be any discrimination. Further, it was pointed out that the contract expressly prohibits the union from raising economic issues, such as extra pension credits, until April 1, 1950.

The Company charged that the

Boulware To Discuss Management Manners Tonight Over WANE

Quincy Howe will interview L. R. Boulware, G-E Vice President in charge of Employee, Community and Union Relations, on management manners under the title, "The Boss's Boss" over Station WANE, of the CBS radio network, tonight from 5:15 to 5:30 p. m.

WINTER ST. PLANT TO CLOSE DOWN FOR ONE MONTH

Manufacturing operations of the Winter St. plant will be shut down from July 29 through August 28.

The shutdown period, which will affect more than 700 employees, will include the annual two-week vacation period. A skeleton force will be maintained during the shutdown period for certain necessary operations, along with the shipping section so that all customer requirements can be serviced promptly.

The additional two-week shut-

Independence Day

On Monday, July 4, the Broadway and Taylor Street plants, in general, will be closed in observance of Independence Day.

C. R. Matson

Works Manager

Irene Meyers Is Named 'Citizen Of The Week'

Irene Meyers is shown, above, being interviewed by Glen Smith.

Irene Meyers, Supervisor of Women's Activities, has been named "Citizen of the Week" by Mayor Henry E. Branning, Jr., and the City of Fort Wayne.

Tribute will be paid Miss Meyers during a transcribed radio program at 6:30 p.m., Thursday, June 23, on Station WGL.

Miss Meyers was selected for the honor by a panel of three judges, including Rabbi Frederic A. Doppelt, the Reverend Father Gilbert Wirtz, and Pastor Erwin Kurth.

An interview with Miss Meyers was transcribed this week in her

What Kind Of Services Can One Get From The Community Chest?

NONE AT ALL

Shocked? Yes, you would be since you've been shelling out for it every October. But that's because Mr. and Mrs. Citizen sometimes don't understand that the Allen County Community Chest and Social Planning Council doesn't give service to individuals, ITS RED FEATHER AGENCIES DO!

The Chest itself is a money-gathering organization. It doesn't do any charitable or social work, but it makes those services possible by distributing the money it collects to the proper agencies on a fair budgetary basis, so that they can serve the community.

But that doesn't mean that the Chest-Council isn't serving people in the Fort Wayne area. Besides its money-getting job at campaign time it does several other things.

Its "money-planning" activities assure all contributors that there will be no waste of dollars collected.

Its "social-planning" job assures you that overlapping in the programs of the agencies receiving its support will be avoided, and that thinking and planning for the well-being of everyone in the community will be encouraged. It also provides a central organization where all the health and social service agencies of the county, whether they are supported by taxes, by gifts to the Chest, or by other private gifts, can work toegther to meet as well as possible all the health and welfare needs of the people of Allen County. This is a year round job. Planning goes on continuously.

Somebody has to check the need for the money each agency requests before it can be given to them. Somebody has to organize the thousands of volunteers who raise the money. Somebody has to collect, budget and distribute the money. Somebody has to keep track of the payment of pledges and make an accounting to the public. Somebody has to act as a central clearing house where all the agencies service health and welfare needs can coordinate and work, and share their experiences to help each other do a better job. Last, but not least, somebody has to interpret the Red Feather services so they can be well used and supported by the public.

The Community Chest and Social Planning Council is all of those somebodies rolled into one. It is the HEART of our community. The services its agencies provide are fed through the arteries that lead from it. It is a strong heart and a willing heart because its life blood is supplied by the thousands of people who call this community Home. It's your heart, because it supplies your Red Feather services—for you.

FIVE POLIO PRECAUTIONS ARE LISTED FOR PARENTS

Warning that the 1949 polio season is "just around the corner," the National Foundation for Infantile Paralysis today issued a list of precautionary measures to be observed hy those in charge of children during the epidemic danger period which usually runs from May through October, reaching its peak during the hot, mid-summer months. The five easy-to-follow health rules for children are:

1. Avoid crowds and places where close contact with other persons is likely.

2. Avoid over-fatigue caused by too active play or exercise, or irregular hours.

3. Avoid swimming in polluted water. Use only heaches or public pools declared safe by local health authorities.

4. Avoid sudden chilling. Remove wet shoes and clothing at once and keep extra blankets and heavier clothing handy for sudden weather changes.

5. Observe the golden rule of personal cleanliness. Keep food tightly covered and safe from flies or other insects. Garbage should be tightly covered and, if other disposal facilities are lacking, it should be buried or burned.

The National Foundation also listed the following symptoms of infantile paralysis: headache, nausea or upset stomach, muscle soreness or stiffness, and unexplained fever. Should polio strike in your family, call a doctor immediately. Early diagnosis and prompt treatment by qualified medical personnel often prevent serious crippling, the National Foundation pointed out.

The organization emphasized that fear and anxiety should be held to a minimum. A calm, confident attitude is conducive to health and recovery. Parents, it said, should remember that of all those stricken, 50 per cent or more recover completely, while another 25 per cent are left with only slight after effects.

If polio is actually diagnosed, contact the chapter of the National Foundation for Infantile Paralysis serving your community. The chapter will pay that part of the cost of care and treatment which patient or family cannot meet.

CUT OUT AND KEEP FOR REFERENCE

HUGH CRANE *discusses* "Plowing Back" Earnings

NEW YORK—I notice a curious contradiction in the platform or official party line of some of the unions nowadays.

On the one hand they want more comprehensive pensions, retirement systems, welfare funds and the like.

On the other hand they favor a revival of the undivided profits tax, or the firmer application of the so-called "Section 102" of the federal revenue laws. Section 102 in effect requires corporations to pay out 70 per cent of their earnings or show the Bureau of Internal Revenue good reason why they don't.

Where Is The Conflict?

Now these two may not seem to have much relation—or much contradiction. But here's how they seem to me to conflict.

People want pensions, old age retirement funds and so on—whether from the employer, the government, or both—as part of their general desire for security.

This natural desire for security is one which both Congress and the managements of private industry have been trying to do more and more for in the last few years.

What Is "Undivided Profit?"

Now an "undivided profit" is that portion of a company's earnings which is not divided among the shareholders but is kept in the business.

(The word "dividends" means a dividing up or division of shares in the earnings among the shareholders or stockholders.)

And the "undivided profits tax" of 1936, now repealed, and Section 102 of the revenue laws, aimed at penalizing or discouraging this hold-back of earnings in the business. They would encourage the paying out of larger dividends.

Why do companies leave a part of the earnings in the business instead of dividing up all the earnings among the owners?

Essentially for the same reason that a player leaves some of his winnings in the game. To stay in the game. To stay in business.

It is a fact not very well known outside the business world, that companies or individuals that do not keep putting back earnings into the business do not stay in business very long. They fall behind in the competitive race. Accident or obsolescence trips them up, their products get out of date or competitors who do keep plowing back earnings, cut costs and then prices and take their markets away.

It sometimes seems to me that the major purpose of most company executives is not so much to make bigger and bigger profits, or to pay bigger and bigger dividends, but to make sure that the company will stay in business, indefinitely.

How Money Is Used

These undivided profits, plowed back to make sure the company stays in business, may go only in very small part into cash-in-the-bank. Only enough is held that way to give reasonable protection against hard times. There are other ways it is used to make sure that the company will stay in business. One is the development of new products (so tbat the company won't have all its product eggs in one basket) or the improvement of present products. Another is research, to find new products. Another is in buying new equipment to lower costs so that the company can afford to lower prices when or before its competitors lower them.

Now do you get the connection? The company's reinvestment of earnings in the business is the company's old-age security plan.

Where Is the Safest Job?

If you were looking for a job again, would you rather go to work for a company whose shareholders divided up all the profits as fast as they showed up, or for a company whose policies made it seem likely that the company would be doing business, and paying wages and pensions, as long as you expected to be living on this earth?

SCIENCE QUESTION BOX

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY

Q. What is pasteurization?

A. It is a process, most familiar from its use by dairies, by which milk is heated for a short time to a temperature a little below the boiling point. This kills undesirable bacteria and yeasts, which would cause it to spoil quickly. The process was developed by Louis Pasteur, originally for the brewers and wine growers of France.

OUT OUR WAY

By J. R. WILLIAMS

Here we are once more. Memorial Day is over. Lots of us attended the races, some enjoyed the sunshine at the lakes, and the other lot stayed at home. . . . Anyway, folks, how was the balanced egg trick? Be careful of those eggs—the price has gone up since last week. Here is a new one—a paper snake. It is formed from the outer wrapping of drinking straws (thin paper which comes in envelope form and keeps the straws clean). This covering is broken at one end, and then it is slid down the straws, telescoping as it goes along, until it froms a short pleated tube about two inehes long. When the short tube is laid upon a plate, it begins to act in a snake-like fashion, twisting and turning, raising its head, and becoming very wiggly. To make the "snake" act you first pour a few drops of water on the plate. When the paper tube is set upon a water-drop it begins to absorb water and immediately comes to life. That's all there is to it and now for some news. . . . We overheard of the traffic salvation system Doris Resh uses. She even outsmarted the sheriff in cutting square corners. Emma Goldner wasn't quite so lucky in her traffic jam. If it wasn't for the fire we believe you'd have made it, Emma. . . . The inside walls of Plant 2 are right pretty. It is some sort of a pea green, quite a change. The brush is being wielded by Mills; he looks like an old hand at it. Nice job, Bob. . . . Ralph Stanley and family visited in Peru over the week end. Did you visit the Bunker Hill navy base, Ralph? . . . The folks of Berniece Miller, who live close to Chicago, enjoyed her company. . . . Talking about Tocsin, you ought to see Amos Byrd's potato-onion crop. They sure are a sight to see. Amos retired a few weeks ago. Hez Cochran visited Amos over the week end, or was it the strawberries that you were interested in, Hez? . . . On the KH Line we have Ethel Myers resuming her soldering job after a several months absence. . . .Alton Railing's funeral was held Thursday. Joe and Gordon Railing are brothers to the G. I. veteran who died in action. We extend our sympathy to you and your family. . . . Girls, let's give Dwight Little a little more credit for those thoughtful sayings. Some of them tickle us pink. . . . Talking about horsepower you got a built-in-equine-power in Jerry Ross. Is it the rolled oats you have been eating that develops this extraordinary energy or the iron from your garden lettuce? . . . The "Convoy Mayor" visited the plant last week. He is none other than Art Denig. He is using his skill on painting houses. Art, watch those high altitudes. . . . The girls from the office had a picnic and swimming party at Pine Lake. It was rather "cooold" but the girls enjoyed their swim. And when it came to building a fire it seems the girls had a little trouble and had to ask for some help. The following reported a wonderful time: Alice McBride, Dort Schnepf, Mary Ann Laurent, Eloise Noll, Harriett Haines, Barbara Roop, Earleen Steffen, Dort Schumm, and Florence Schultz. . . . We see Charles Langston is driving a different car, too. He is now the owner of a Pontiac and from all reports is very much pleased with it. . . . A new way to paint your car is with a powder puff. If you don't believe it ask Henry Krueckeberg and he can give you all the information you want to know.

Mary Hoffman To Retire

A potluck dinner was held recently for Mary Hoffman, Bldg. 4-2, to honor her before she retires. She is shown receiving a gift from her foreman, True Sheets. Looking on are: (l. to r.) Lillian Sharpton, Estell Pettibone, Alice Klingel, Florence Offerle, Hilda Walda, Gladys Elliott, Virginia Gebhart, Irma Miller, Fern Roe and Mary Stewart.

Irene Meyers

(Continued from Page 1)

office in Bldg. 8-2 by Glen Smith.

In accepting an engraved certificate in appreciation of the untiring service she has rendered to the community and to her fellow men, Miss Meyers stated:

"This is a very happy moment for me—one that I shall cherish through the years. I can't tell you how proud and grateful I am; so I shall simply say, 'Thank you'; and, I would like to share this honor with all the wonderful girls at the General Electric Company, and the General Electric Company."

Miss Meyers was first employed by the Company in 1919 as a filing and time clerk in Bldg. 19-4. The next year, at her own request, she was transferred to work in the shop and for seven years operated small drill and punch presses. In 1928 she became a Company welfare worker. Then she served as a clerk in Bldgs. 19-4 and 4-6 from 1932 to 1934, when she started her career as a personnel worker for women. Miss Meyers was named Supervisor of Women's Activities on Dec. 2, 1946.

Paul Kennerk, expecting to go into the business, bought two rabbits, then awaited the results but none developed. Looks like he may have to send them back to school to learn arithmetic. . . . Edna Mowery didn't have to wait until Christmas to ask Santa for her new front tooth. . . . Oliver Bowman, who should know better, was trying to palm off some baby dogfish as tropical fish. Next time, Oliver, pick on someone who doesn't live at a lake. . . . If the rose Fred Bailey was displaying is a sample of his gardening, he must have a beautiful yard. . . . Tag wire is a good strong substitute for thread, especially when it comes to mending torn trousers. Arnie Johnson can attest to that.

Ladonna Durbin was complaining that she didn't get her money's worth at the carnival, but we hear she attended every night. What was the attraction, Ladonna, or were you just looking for a chance to get even? . . . Happy birthday to Audrey Oberley and thanks for the candy. It was delicious. . . . As far as Earl Bartling is concerned, when it once gets warm enough to put your coat in moth balls, it stays there regardless of the change in weather. He came in one morning last week looking like a blue baby. To most of us it looked like he was fighting a losing battle in making himself believe that summer was here to stay. . . . Practice paid off for Morris Felger. He entered two of the races in the recent regatta on the St. Joe River and came in seeond place in one and third in the other. Congratulations, Morris. . . . Betty Rider has her troubles. She blushes so easily that her co-workers who know this have her walking around in a rosy glow most of the time. . . . Wedding bells rang out for Bertha Thimlar, a former winder. Lots of luck, Bertha. . . . We wonder why Lola Brunner stops at the drug store after work for a drumstick, then peeks out to see if anyone is coming before she walks out eating it. Could it be that she doesn't want someone to know she is breaking her diet? . . . The confusion that was heard in the west-end last week was caused by the warm reception that was given to Ruth Freeland with a board as a birthday gift. If we counted the strokes, we would have known how old she was. . . . Every noon you can see Art Pequignot go out the door with his lunch and a chair. He's trying to acquire a suntan. If he comes up missing someday, you'll probably find him on the roof. We hear he is quite determined. . . . If you want a good recipe on how to make coffee, see Dan Reuille. We hear it is just about letter perfect. . . . Ernie Clark had his face sunburned so badly that it would glow in the dark. The look in his eyes read, "Don't pat me on the cheek." . . . Lavona Porter was really strutting her stuff, not only with a new dress but with shoes to match. . . . Wanted: An alarm clock with an attachment that will roll you out of bed when it rings. It has gotten to the point where Lonnie Rochstroh needs help in getting up in the mornings and this, it seems, is the only solution. . . . We wonder what Wanda Grim is referring to when she tells us that she talks to the refrigerator.

Office Offerings

I'm sure you all remember the accident that George Finkbeiner had on his wedding day. That was two weeks ago and he tells us that to date he has lost 16 pounds, just a mere shadow. . . . Sometime ago Edith Schmidt related a trip to us that she took and we are still wondering which one is wrong—her or the map. She tells us that she took Route 30 to Chicago and stopped in East Chicago for breakfast. As nearly as we can figure it out she has her suburbs mixed, and we are sure they serve breakfast in Chicago Heights, too.

Taylor St. Store Is Redecorated

The Taylor St. employees' store has been redecorated to provide a better display for merchandise. The change will now make it possible for the store to be closed off from the rest of the gate house when not in operation and will provide more storage space. Don Stroebel, clerk, is shown behind the new display counter serving Maxine Luker.

Winter St. Plant

(Continued from page 1)

down period is necessary because of the large inventories in excess of customer demands resulting from a general reduction of orders received during the current readjustment period.

Other plants in the Air Conditioning Department which will be affected include the Bloomfield, N. J., plant, whieh will be shut down from Aug. 5 through Sept. 5; and the Bowling Green, Ky., plant, which will be closed from today through July 4 and from Aug. 5 through Sept. 5.

G-E Pension

(Continued from Page 1)

union was attempting to secure under the guise of arbitration what it did not get through collective bargaining, and that this was in clear violation of the GE-UE national agreement.

A lower court decision was rendered in which the judge held that the matter was arbitrable but that the union had not properly phrased the issues. The Company appealed this decision and the Company's position was unanimously sustained by the Appellate Division.

Employees' Stores Close For Inventory

The Employees' stores at the Broadway and Taylor St. plants will be closed Wednesday, June 29; Thursday, June 30, and Friday, July 1, for inventory. Both stores will be open for business, as usual, Tuesday, July 5.

Two Teachers Are Presented G-E Fellowships

Fred R. Gideon, Waynedale, and Francis M. Horne, R.R. 6, have been awarded General Electric science fellowships.

The fellowships are to be used for a special course to be offered June 27 to Aug. 5 at Case Institute of Technology, Cleveland.

Mr. Gideon teaches science at Hoagland high school and Mr. Horn is a science teacher at Lake Township high school.

Only 50 of the fellowships have been awarded, each carrying with it all expenses of the six-week course, including tuition, board, lodging, travel expense and book costs.

G-E Magazine Is Distributed To Teenagers

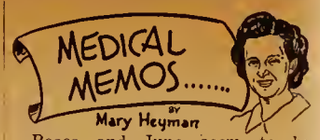
The May-June issue of **Adventures Ahead,** General Electric's bi-monthly magazine for teenagers, is being mailed this week to subscribers.

"It's America For Me," is the title of one of the lead stories in the latest edition of the magazine. The story relates the experiences of an American youth whose parents moved to Yugoslavia when he was three years old. He returned to the United States in the midst of the war and finally joined General Electric's apprentice training course at the Bridgeport, Conn., plant.

Adventures Ahead is distributed free to children of employees in most departments of the General Electric Company, several affiliated companies, and to more than 12,000 high school science teachers for classroom use. Each issue contains exciting stories of new things in the world of science, tells how to perform laboratory experiments at home, and in pictures and stories keeps teenagers posted on the interesting and startling advances in living today.

All those desiring to subscribe to the magazine, should fill in the subscription blank below. The sponsor, the subscriber's parent or near relative, should then give it to a supervisor, who will forward the blanks to Irene Sprunger, Bldg. 8-2.

Friends Present Gifts To Charles Trey



Charles Trey, Bldg. 4-5, left the Company recently for retirement. On his last day, his co-workers gave him several gifts. In the picture are: (l. to r.) Wilbur Tibbitts, Jesse Haffner, Ed Sonday, General Foreman; C. J. LeGras, foreman; Mr. Trey, Walter Rehling, Lynn Crawford and Ernest Kromm.

Dear Ann:

Sorry to hear that you are in the hospital. I'll bet the doctor left you in stitches. Thought I'd write and tell you the happenings on the floor. . . . Lucille Miller and Sarah Meagher have returned after being ill. Ruth Emerson has returned to our floor to work. . . . Saturday night a couple of the girls promised the Bill Martins a fish fry. They went fishing all right, but didn't show up at the Martins until 10:30. Bill says they must have caught all little ones and were waiting for them to grow. . . . Nellie Bellamy celebrated her birthday Thursday. I don't know how she does it, but she looks younger every day. . . . Some people have all the luck. Clara Dixon has gone to Nebraska for 10 days. . . . Marie Dunfee went to the commencement at Franklin last week-end. Her daughter, Ruthie, and also Ruthie's husband graduated. That is unusual, isn't it? . . . By the way, Pop Castle won't wear a rose in the lapel of his coat, especially if Erma Landis is around. She took it and was pulling out the petals. Bet she thought it was a daisy. . . . Irene Blank and her husband took first in the casting doubles. Remember Jack Tourney who used to work on the press? He took first in the singles. . . . They tell me that Alberta Foulks really likes papers. . . . You should have seen the shower bath that Harold Kiel received when Erve Lange showed him his new ring. It squirts, but good. . . . Louise O'Connell picked up a lunch sack, thinking it was her lunch. When she opened it, it was just a bunch of old scraps. Her lunch was still out by the coat rack, which proved to be a lifesaver for Louise. . . . Mary O'Shaughnessy really has the answers when Charlie Rice asks her about someone. . . . Sorry to tell you that our sincerest sympathy was with Laura Antrup when her father died. . . . Well, Ann, take it easy now, so that you'll be back soon.

Roses and June seem to be synonomous terms. The different varieties of roses are in full bloom now. By the way, have you been out to Lakeside Park lately? It really is a beautiful spectacle. . . . Even brides-to-be have birthdays! Alta Bishop will be celebrating her birthday June 22. Speaking of weddings, you might ask Imo Jean Schwartz who caught the bride's bouquet at the wedding she attended as maid of honor Saturday. I hear she claims it was a frame-up. . . . At this time, I would like to thank the ones who have kindly contributed items to our column, also Minnie Fryback who graciously types the material (and adds interesting bits of news also). . . . Has Berneta Welbaum been reluctant about telling about her talents and abilities? It has been told that she had been asked to compete in the "Powder Puff Derby" at the recent boat races. Maybe we have a lady "Gar Wood" in our midst and fail to recognize her. . . . Father's Day will be marked on calendars June 19. This will be a good opportunity to pay tribute to the Dads who have been so liberal and unselfish. Whether you honor your Dad or his memory, make a special effort on HIS day. . . .

Here's to Dad on Father's Day—
He really is a honey!
We hope and pray he likes those gifts,
For they're going to cost him money!

Fred Barve Dies

Fred H. Barve, 63, died at his home, 2325 Miner St., Tuesday, at 6:30 p. m.

He had been an employee of General Electric since 1916. When he left for illness last March, Mr. Barve was working in Bldg. 27. He was a member of the Quarter Century Club.

The Rt. Rev. Msgr. D. L. Monahan officiated at the funeral services held yesterday at the Klaehn Funeral Home. Burial was in Lindenwood Cemetery.

Completes 30 Years Of Service

Henry Guenther, Bldg. 8-1, recently completed 30 years of service with the Company. He was presented a letter congratulating him on his anniversary. Shown in the picture are: (l. to r.) Melba Kelly, Florence Casey, Catherine Hirschman, Kenneth Redding, Marie Kettering, Dorothy McCoy, Doyal White, Ward Staley, Faye Jordan, Vera Kruge, Mr. Guenther, E. J. O'Neill, A. E. Leider, Karl Soest, George Welker, Frank Treece, Frank Martin, Lloyd Platt and Herb Jesse.

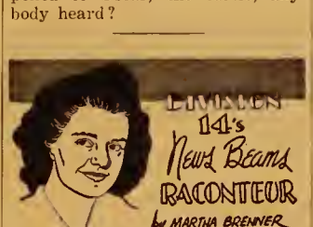
Log Cabin Is Scene Of Vets' Picnic



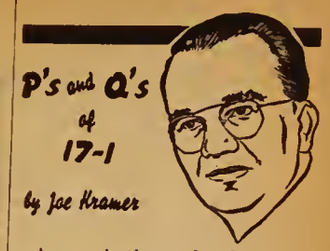
The annual picnic of the G-E World War Veterans' Association was attended by approximately 100 members Saturday, June 11, at the Log Cabin off the Bass Road. The pictures above show some of the activities, although the rain prevented the group from enjoying many outdoor sports.

The two pictures at the top reveal the most typical scenes of the day—the first pictures one of the many card games, while the other shows a popular place at the picnic, the lunch counter. The ancient car from American Legion Post 47 again made its appearance, as shown in the picture at the left.

"You don't need reference in order to borrow trouble."

A large group gathered around Bill Mills June 9 to bid him farewell as he left the Company on pension. Bill has 22 years of continuous service and spent the entire time in Div. 16. He was presented an electric drill press and a billfold and with them wishes for good health and happiness through the coming years. So long, Bill, and come back and visit us sometime. . . . You often hear of one getting "stung" on an automobile, but Bob Rehrer was stung inside of his the other day. He preferred standing to sitting for a couple of days. . . . If you see a chubby rascal with a hungry look in his eyes looking longingly at anyone who is eating, that's Fred Fenner. He is now on a diet of shredded wheat, bread, wieners and potato salad (without potatoes). . . . Poor Jim Kavanaugh and his car, he had to tear it down again. . . . Mrs. Clarence Weimer sent some beautiful white roses to work with her husband. They were certainly appreciated and made the place cheery. . . . Joe Haas is a very good reporter, but ye writer misses the deadline every so often. Please keep up the good work, Joe. . . . Paul Bender had the flu last week. He's almost as good as new now. . . . Paul Koldewey brought in pictures of his family and very nice looking family it is. His son is eight months old and is a husky fellow. . . . Mary Beaman had the pleasure of being chauffeur for a couple over Memorial Day. She was permitted to select any point she wanted as long as they could make it in three days. Mary chose Washington, D. C., taking two routes. That's a good job if you can get it. . . . Say, what's happened to Oscar, the turtle, anybody heard?

Every Friday, when the eight o'clock whistle blows, Cleon Oyer grabs his helmet and plays fireman. However, last Friday someone filled the helmet with water and Oyer really got a bath. We understand he has "retired" as fireman. . . . Elmer Buuck recently had a hole in the heel of his sock and was quite embarassed, so the boys painted his heel black. . . . It seems Robert Warnement has cautioned his wife several times about being careful when they go fishing not to lose his rod and reel. However, last week it seems Bob had propped his pole on the bank of the lake and when he returned it was gone. . . . Johnny Wilson was a very unhappy guy last week when someone ran into his new Chevy. . . . Charlie Hoffert was promised a chicken dinner at the O'Gradys sometime ago, and now he learns Mike has sold all his chickens. . . . Wilbur Huhn has been an excited father the past week. We know his daughter has reasons to be, but papa, we believe, is the most excited of the two. . . . Mildred Orr's daughter had a baby girl June 9, and Mildred is a very happy grandmother. . . . We will have to retrack a statement we made earlier about Ed Rodenbeck. We have been told that after two years of buying paint he has finally started to paint his house. . . . There is a very good reason for the morale being so high in 14x4. Walt Neimeyer and Cleon Oyer have really brought several beautiful bouquets of flowers to the girls in that section. . . . What was the nice compliment that was paid to Less Richter? . . . Will somebody give Herman Lepper a road map? Seems he got to Times Corner, turned around and somehow found himself back in Huntington. . . . Mac is really mixed up. He rented a cottage for the week before his vacation. . . . Lucky Alice Rodgers hit the jackpot at the Grand Theater in Bluffton. . . . We would like to welcome Lydia Doehrman to our division.



4-1 Floorage

By Marie Lantz

Unlike the weather last week, we're not exactly cool and collected—as witness what few facts we've found for Floorage. . . . It seems Ted Schelper doesn't believe in Lady Luck. He accused Howard Koehl of having his number "fixed" because Howard won the checkpool on two alternate pay days. Tch-Tch, Ted. . . . George Hahn is another one who missed the train. George never had a train ride—but at one time he traveled to California and back—by bus. . . . Spaak and Bill Tennyson are tops in teasing; they tried to have Paul Madden a little mad on—them, of course. . . . It is apparent we have few dry pipes here—most of our air guns also give forth a misty spray. . . . One can usually follow Bill Oberlin's mind these days. Back from week-ends at Pogakon we find him "Cruising down the river on (other) afternoons." . . . We extend sympathy to Ruth Nordyke who was absent last Friday to attend her aunt's funeral near Indianapolis.

A fan asks why movie stars have such long holidays. The pity is that some don't have one lasting 365 days each year.

Some people will believe anything if it is whispered to them.

Anyone in the market for a good set of golf clubs should contact Robert Dent. Bob is ready to throw in the towel. There is a story circulating around Bldg. 17-1 that it required 11 strokes for Bob to complete the 16th hole last Tuesday night. In case you are interested, Bob has a map in detail showing the flight of the ball. . . . Andy Degler brought a Canadian thistle into work one day last week for George Mosshammer. George had it on display in the tool crib for quite sometime thinking it was a new type oriental poppy. . . . Cliff (Fireman) Coombes jumped into a new role last week. In the future please refer to Cliff as "Hero Coombes." It seems Cliff was on a ladder when he heard a shout for help. Doing his famous steeple jack descent, Cliff rescued a boy who had got his feet tangled in the spokes of his bicycle. Cliff is taking his place among the other unsung heroes of Bldg. 17-1. The hero medal has been turned over to Cliff by Ralph Beerman. . . . Belated congratulations to Fernando Crick on the occasion of his birthday and wedding anniversary June 7. Fernando wore a big smile all day. . . . "Cupcake" Ed Martin has gone into the dogfish business. He was seen carrying a bucket of dogfish home. Ed said he couldn't have a dog, so he was going to have a pond full of dogfish. We wonder if Ed has to buy dog licenses for the dogfish. . . . Belated birthday congratulations to Everett Kelley, jig bore operator in the tool room. . . . The trip to Colorado is on again. Addie Masbaum, Helene Evenoff, and a former co-worker Jo Hansen have gotten together and completed their plans for the trip. They promise to send some pictures back of sights they see. . . . We are sorry we are a week late but we still want to extend our congratulations to Mary Gerhard on her anniversary (her first) last Sunday. . . . With the fishing season in full swing, Cliff Coombes promised to deliver a dozen nice bluegills to my house Tuesday. I sure hope he keeps that promise. Ray Rodenbeck was a witness to the statement. . . . A sight seeing trip to Indianapolis was made last Monday by Helene Evanoff, Addie Masbaum, and Mary Gerhard. . . . Tavie Popa attended Vickie Bickis' wedding in East Chicago last Sunday. Our congratulations to Mr. and Mrs. Baciu. . . . The last reports Argend Denney has not told us whether the new arrival at his house was a boy or girl. Still undecided, Denney? . . . We told you we had champions in Bldg. 17-1 office. Addie Masbaum was a member of the team winning the bowling championship of the Ladies' Monday League. . . . Hildegarde Brandenburg was seen running down the aisle Friday afternoon. Hildegarde says that with being off Monday, she had to run to get a drink and run back to get her work out. . . . New styles for women are constantly coming out. Danelda Dotterer recently set a new trend for the wearing of silk or nylon bobby socks. When your hose get full of holes and runs, just cut them off at the ankles and you have the best pair of bobby socks on the market. . . . Agnes (Just call me lucky) Cordes parlayed her luck with a little help from Mary Gerhard in a pool and won $10.

Wage Negotiations

(Continued from page 1)

but at the close of negotiations for this week the union's demand as to the exact length of the shorter work week was still indefinite.

In response to UE's urging that the Company take positive action in the present somewhat slack sales and employment situation, the Company claimed that it had been and was taking a bold aggressive and constructive course toward offering the public what it wants and what is necessary to get the public most quickly back to buying the G-E products that make the jobs. General Electric is taking aggressive action in introducing new and better models of products and working ceaselessly to create still more attractive products for the future. The Company is intensifying its sales and advertising efforts. The Company is reducing prices in most cases far faster than any reduction in costs can be accomplished. The Company is not only doing all within its power, thus to move its old high cost inventory at these lower prices, but it is trying meanwhile to be learning how to produce in the future at the still lower costs that will make soundly possible the better values required to make high volume sales for a long time to come.

The Company maintained the Union's proposal to try to increase purchasing power by a general wage increase with no more production resulting from increased interest, care, skill or effort from those getting general wage increases, was exactly the wrong type of approach to the present somewhat depressed sales and employment situation. The Company insisted the only solution is in getting costs and prices down to where those who already have the money, but are reluctant to spend it, can be attracted back into the market.

The Company feels keenly that there must be no failure in relief being available for all unemployed in need, but pointed out that this was a matter for public administration. The total cost of such public relief is already being borne largely by employers under most state laws. Ample buying power to start reversing the present trend is possessed by that 93 to 95 per cent of the public who are now employed, who still have some old savings, and who in the main are now putting away new savings at a surprising rate. These people will start buying and increasing employment when they have used up or worn out their present supply of things, or when they can meanwhile be attracted into the market to purchase new and better products at new and sufficiently more attractive prices.

The Company feels strongly that there should be no raising of costs, no diluting of the value of money through general wage increases, or through any of the other pump-priming types of expedients which attempt to raise buying power by increasing the supply of money with no corresponding increase in the supply of goods.

Word was received as this issue went to press that negotiations were adjourned at the end of the second day until Wednesday, June 22.

Celebrates 30th Anniversary

Neal McNamara, Bldg. 4-4, recently celebrated his 30th anniversary with General Electric and at that time received a congratulatory letter for his long service. Attending the presentation were George Selby, Charles Griffith, foreman; Clarence Hewes, Mr. McNamara, W. H. Franke, Supt, of FHP Div. 19 and 20; Leon Rademaker, and Jack Payton.

Tricks In Transformer

—FROM DIVISION 91—

By Johnny McMaken

June the future month. Many of you may ask why I call June, "the future month." It is the time of the year when many people start looking toward the future, maybe for just a vacation or maybe for a lifetime. We have many young people who are graduating from high school and college planning their profession or vacation. We also have many couples who get married in the month of June, planning their whole life. And many people are planning but a week or two vacations. It is also a month when many people are on vacations and there are many cars on the streets and highways, and small children are home for their summer vacation. Drive carefully while traveling and let our children grow up to enjoy another future month. . . . Mary Kieler finally got a mouse in her trap. Good trapping, Mary. . . . BIG FIGHT TOMORROW: Paul Noffze will take on Gus Kuhn in the main fight of the evening which will consist of 15 rounds. Fred Mennewisch will challenge Glen Robinett in the semi-finals which will last 10 rounds and Gerald Schafer will take on Lawrence Hosack in the opener which will consist of five rounds. The referee will be none other than Virgil Howell. Let's all hope he does a better job of refereeing than he does of taking care of his wallet. It so happened that Virgil lost his wallet twice in one week and was found by Lorenzo Smith. . . . We are all glad to see that Jim Stauffer is up and around again. . . . Paul Conrad is the only fellow in the world who can drive a Ford 180,000 miles and not use any oil except his oil changes. He must change oil every 100 miles. . . . We are all wondering if Robert Mennewisch just forgot to come in Monday or if his children put his shoes in the wife's wash water again.

Sample Shop News, 26-2

We would like to congratulate Ralph Van Osdale in winning the boat races recently. He won the race with a 22 h.p. Johnson motor. . . . Bldg. 26-2 had a welcome visit from "Duke" Dafforn, who has been off work with a broken arm. We're glad to hear that the arm is healing all right and hope to see him back at work pretty soon. . . . Browning is in a big stew over the fact that she was out to the carnival and didn't get any cotton candy. She said that she was going back to get some before they leave (wonder if she got it?) . . . Dean Smith is going around telling people that he is going to have mushrooms for Christmas. Now, Dean, if you want to you can pass those mushrooms out for our Christmas presents.

Kurt Martin found a swell place to eat steaks in Chicago. The only catch was the $3.50 price tag. Henry Frey was also in Chicago. He claims he never saw any $3.50 steaks. . . . Why does Bob Branning always have saw dust scattered around his machine? . . . Swede Moser and his son Carl caught their limit in bluegills from a canoe on Little Hawk Lake last Saturday. Glen Ramsey and his boy were up to Little Barbee Lake and all they could snag was some little old seven and eight inch bluegills not even worth keeping. . . . Jim Ehresman claims the cement mixer fell on his toes. But reliable sources tell us that since the twins, Jean and Jim, have been walking it's mighty dangerous around the Ehresman house. . . Bob Truelove has learned his lesson about hauling clothes in a trailer. He had the family clothes loaded on the trailer headed for his new home when they hit a bumpy spot in the road. If it hadn't been for the cars following Bob, he would have lost the shirt that was meant for his back tomorrow. . . . Congratulations, Don Alcott, George Horner, Cliff Dunten, Eddie Bienz, and Wayne Boester, for winning the championship of your bowling league. . . . At Carl Kleemeyer's recent retirement celebration, Lowell Welker found out what it is to have stage or mike fright. . . . John Roebel says that even the waiters in the local eating house must think he should go on a diet. He ordered a hamburger and all he got was two slices of bread and a slice of onion. Save your pop bottles and old beer cans for umpire-in-chief Eddie Kammeyer. He was calling them for the Voltmen-Chicago Giants game. He claims he couldn't call the low ones right because everyone had the cuffs of their players' pants pulled down to their ankles. . . . Glen Ramsey is helping Woody Hursh pick his strawberries this week. Glen says the pickin' is pretty good. He was finding quart boxes already filled all over the patch. . . . Cliff Clapesattle, the fellow who claims he never touches cake, was caught in the act by one of his fellow-workers. However, Alibi Ike said he was obligated to indulge because it was his wife's birthday cake. . . . Gus Wiedleman and his wife both believe in sharing and sharing alike, but Gus carries it to extremes. The other evening when they were eating in a restaurant, the waitress, among other things, brought a side dish of potato salad, but only his wife got a fork with which to eat it. Gus immediately complained to the waitress. If looks would kill, Gus would be under the sod instead of at work these days. . . . Seems that John Ebert isn't satisfied with the shape of the wrenches that came with his machine and was trying to put a nice curve in one of the larger ones. Somehow, it just wouldn't bend and John came out of the deal minus a couple apron pockets and a six-inch scale to say nothing of the terrific racket he caused. John says he is going to try a different way of bending wrenches from now on. Good idea, John. . . . Dick White and Myron Auer had a very pleasant fishing trip at Jimmerson Lake Friday. In fact, we heard that they even caught some fish. Myron claims that he is the best fisherman, but had a hard time proving it, as Dick caught thirty-six of the thirty-eight they caught. Auer says he isn't too fond of fish, but just ask him if he is going to a fish supper Monday night?

"Judging others is a dangerous thing; not so much because you may make a mistake about them, but because you may be telling the truth about yourself." . . . Monday, June 6, our loyal co-worker, Henry Guenther, better known as "Heiny," celebrated his 30th anniversary with General Electric, having spent the entire 30 years in Tool Supply. A. E. Leider, Doyal White, along with the General Stores gang were on hand to offer their congratulations and best wishes. We're all proud of you, Heiny, and hope you're still with us 30 years from now. . . . The other night at the Production Service Supervisors' banquet Lloyd Platt found out what can happen when one becomes an "Eager Beaver." I bet the next time there's a baseball pool, Lloyd won't be so anxious to sell his ticket half way through the game. He sold his ticket to Ed David, at the sixth inning, for a dollar; and at the end of the game the winning ticket was the one Lloyd sold to Ed. Result: Ed went home $10 richer than when he came and Lloyd went home with one of those "why-did-I-ever-sell-that-ticket" look on his face. Better luck, Lloyd, next time. . . . We're all glad to hear that Blaine Webster has returned home from the hospital and is recuperating at his home in Huntington. Good luck, Blaine, and hurry back. . . . Birthday greetings to Vern Amons and Herb Jesse. By the way, Herb, have you learned to play pinochle yet? . . . When is a horse not a horse? It seems that our division editor was out at the farm not long ago and had her picture taken riding on a horse. She was so proud of the horse and herself that she brought the picture to the office to show her friends, who immediately told her it was not a horse but a pony. Now, Marie can't decide if it was a horse, a pony, or it might even be a donkey. She is not sure.

With fishing season already begun, the stories will be rolling in any day now. We'll try to keep you posted. . . . Rumor has it that Alice Pflueger is getting absent-minded. She was well on her way home by bus before she rememberd she had left her car in the parking lot. Some fun! . . . Now that nearly all the girls have "cropped" their hair, they aren't worried about warm weather. That's what they think! . . . Sol Andorfer and Mike Lowe are having a contest to see who could bring in the most beautiful roses. It's a shame the rose season is so short. . . . We discovered that this motor contest has Mike Lowe in a dither, in fact, he even draws diagrams about it in his job folders. Next thing we know, he will be talking about it in his sleep. . . . Herb Buck looked real sharp in his new apron, all that was missing was a little lace on the bottom and he would have had a formal apron. . . . We extend our sympathy to Charlie Crankshaw whose father died last week. . . . The welcome mat is out for all our new people, we hope you like us and to our folks who are leaving, don't forget the gang. . . . Did you remember to go to the baseball game? Better try to get there next week.

NEGOTIATIONS Begin with UE

Some weeks ago, UE announced that it would demand of General Electric, Westinghouse, RCA and others a 4th round increase—amounting to $500 per employee per year. This proposed increase could be distributed among actual wages, fringe economic benefits, or a shorter work week with the same weekly take-home pay as now. Whether or not the employees got any more pay, the cost to the employer of the proposed UE package would be the same —an additional 25¢ per hour per employee.

We do not see how the UE could expect to get this $500 increase, and we rather suspect that this big amount is asked now in the hope that—as in former years—the union would be able to make a willing compromise later and thereby look extremely "reasonable" in its bargaining.

ODDS ARE AGAINST AN INCREASE

Actually such "reasonable" compromises have simply converted so-called collective bargaining into a "one-way street" toward a sure thing. Ever since UE published this $500 demand, many people have urged General Electric to demand a wage cut exactly equal to the increase demanded by the union. Then, they point out, if the bargaining winds up with no increase, as we confidently expect, the Company would appear to have given in to the extent of 25¢ per hour over its original position.

But we don't think such shadow-boxing is becoming to us. We have said what we mean right from the beginning—that we have been able to find no reason why any general increase at this time would be warranted or desirable in the interests of employees or the public.

EFFECT OF HIGH PRICES AND INVENTORIES

There are other reasons why UE knows the odds are very much against getting the increase demanded, or in fact getting any increase at all. One is that employers not only cannot include in their prices the whole of any wage-cost increase but they cannot pass on any part of it. In fact, employers are now making one price cut after another.

A second reason is that the leading employers—whom the unions have heretofore approached first as the pattern-setters—have, in general, this year such large inventories in the hands of dealers and customers that the whole union strategy of striking one of these employers while letting his competitors continue operating and taking away his business just will not work.

Incidentally, in view of the claim that employees need and must have extra take-home pay, it was particularly confusing to note in the union proposal the suggestion for a shorter work week with the present take-home pay as a substitute for a pay increase. While this would, of course, boost pay *rates*, it would actually put no more in the employee's pocket.

THREE CONFLICTING ARGUMENTS

Yet, despite all these facts, when the UE made its formal 4th round package demand on General Electric this week, it presented three conflicting arguments for the increase, while specifying that it must be paid out of profits. Let's look these "sales" points over.

1 . . . the Cost of Living

Appeals made to General Electric—or to industry in general—for a 4th round of wage increases on the basis of need to catch up with the increase in the cost of living are misleading in the extreme and futile.

The decline in the cost of living index from 175 to 169 at present is substantial and impressive. Careful observers—in and out of government, business and unions—estimate a further gradual decline of some 12 to 15 points. Such a healthy reduction in prices from last November's high would benefit industrial workers by better than 10%—or 15¢ an hour—in real wages.

Further, General Electric's hourly rated employees are continuing to enjoy wage rates some 90% above the last pre-war year of 1940, and thus a good 20 points above the increase in the cost of living for the whole of the war and post-war period. We can see nothing in the "cost-of-living argument" to justify a 4th round increase and we are sure most union members and the public can't either.

2 . . . Pump-Priming

The second claim is that more "buying power" in the form of general wage increases or other benefits would bolster up sagging sales and employment for the whole country. We explained to the UE that the trouble isn't any general lack of money to buy with, as people have got plenty of buying power already.

About 93% of the country's peak work force is still employed at good wages. Those at work not only have old savings but for the past few months have been making new savings at a surprising rate. They aren't buying in total as much as before because many of them have satisfied their most urgent needs and are making their old things "do"

(OVER)

while waiting for better values to tempt their purchase of the millions of additional things they need or want.

Any general wage increase across the country or across an industry would simply be a general increase in costs and prices—certainly the wrong direction to take when trying to attract able but reluctant buyers.

If prices should try to rise in the current situation—sales will continue to go down and layoffs will mount. If general wage raises should be attempted while at the same time holding prices down, all but a very few of the most efficient companies would go broke and unemployment then would really mount.

The pump-priming theory applied to *wages* is just like the pump-priming idea now being advocated all over again that our present *unemployment* can be cured by pump-priming in the form of deficit financing, government spending, giving things away abroad beyond actual necessity, and using other of the old familiar economic pain-killers. But the memory is still fresh in our minds of several years' effort to cure unemployment of 10 to 12 million with government spending. Right now the government is already operating at a deficit and spending four times what it did in the pre-war period. Yet this vast spending is apparently having no effect on the currently much lower unemployment figures of 4 or 5 million.

We told the UE negotiators their claim that a 4th round would be pump-priming really contradicts their suggestion that the increase demanded of us could take the form of a shorter work week with the same take-home pay as now. Individual worker take-home pay would not be increased. Only costs, and hence prices, would be raised. There would be an inevitable cutting down of sales and jobs.

3 . . . "Ability-to-Pay"

The third UE claim was about our "ability-to-pay"—to pay out of profits or what a UE negotiator described as a "sock under the pillow." Obviously, the UE is thinking of our earnings last year and in the first quarter of this year—before the drop-off in sales had affected us. But, in good times or bad, General Electric always will try to make a sound profit—have *something* left after paying all expenses—even from the very low market prices available on the smaller production of bad years.

We think such an accomplishment will be *good*—good for the job security of our employees and their neighbors, good for our customers and the whole country. It will be good for our stockholders whose savings we want to protect and make productive so the return on their investment will be attractive enough to make them or others want to continue to risk their savings with us.

The theory of "ability-to-pay" has been advanced before. It has even been tried. It has never worked—it cannot work—because it is based on ideas that are unsound. It wouldn't be fair to employees, even if it could work.

HAS NEVER WORKED . . . AND CANNOT WORK

UE knows that there is no uniformity of profits among companies on which to base any demand for a uniform wage increase. Many are even now operating at a loss.

UE officials know they could not seriously propose that union members in the same community doing similar work should get *different* pay because of any irregularity—between companies—of profits and losses.

What actually occurs is this: Every effort is made to get a prominent and successful employer to "break-over" because of his own particular "ability-to-pay"; then the settlement is announced as a *national* pattern to be met by *all* employers regardless of their "ability-to-pay."

Remembering that the UE demands there be no price increases along with these proposed wage increases, what happens to employees of a company so inefficient, or so unlucky as to not show much of a profit, or even any profit? What happens to these employees if others, doing similar work, get more pay? We think, and we guess *they* would believe, that all employees of similar skill on similar work under similar conditions in the same community *should get* similar pay, regardless of the difference in profits between companies.

The idea that wages in any company should be geared to company profits so as to go up—and down—as profits rise and fall, will not appeal to thinking employees. We should not forget that we have a *profit and loss* system; half of our business enterprises fail; there is always a wide variation in the amount of profit made by various companies in an industry or a neighborhood; and even in the good years not all companies make profits. It will be most interesting to see—in the second quarter reports of earnings—just what *can* happen even to previously good profit-makers when a real buyer's market sets in.

General Electric's position is that profits—and losses—cannot be sound or fair bases for wages, even if wages could be set by them. And wages can't be set by them as has been learned by experience.

Included here has been some mention of "fringe" economic benefits. In the actual negotiations, of course, we reminded UE of its agreement last year that only wages—and not other matters—would be open for negotiation this year.

Negotiations with UE continue as we go to press. General Electric will keep trying to have an open mind—especially toward any new disclosures or developments. We are eager for any mutually satisfactory conclusions compatible with today's facts of life and tomorrow's promise of more and better jobs through lower costs, greater productivity and higher sales.

GENERAL ELECTRIC COMPANY

VICE PRESIDENT—EMPLOYEE RELATIONS

At the party for Martha Scherzinger who was observing her 40th year with the Company she was presented with a cameo pin. After the dinner a group took in the carnival and a good time was had by all. . . . Mr. Mettler told the gang at the party that he has an extra-curricula activity. He is doing the family washing and is quite adept at it. . . . Not all the faces were red due to blushes, Esther Madden spent the week-end at the lake which is the reason her face is red. . . . Grace Ober spent the week-end in Toledo and Detroit. When in Toledo she put a little on the "bang-tails" and came home on the short end. . . . Louie Clark is spending his week's vacation in Michigan fishing. . . . Michigan is where Frank Burr went on his vacation. Yes, he is fishing, too. . . . Lillie Benz said that everything in California was just grand, and the flowers were beautiful. She is feeling a little better, but she doesn't like the damp nights. Glad to hear from you, Lillie, drop us another card sometime. . . . Winifred Ostheimer is welcomed to 1x29. Hope you stay a long time. . . . Ivan Parrish is being transferred to the Regional Warehouse. Sorry to see you go, but hope you like it. . . . We hear that Ray Snyder has a new name, he answers to the name of "Rohert Williams" now. We are anxious to see his picture, but are wondering if he broke the camera when they took the picture. . . . Congratulations to Bill Wickliffe, who observed his 30th anniversary with the Company. That was a pretty tie he wore when he had his picture taken! . . . Birthday greetings to Lee Raver, Elbert Niswonger and Mary Nute. . . . Lee Raver is very happy. Her daughter is home from Florida for the summer. . . . A group of girls who have been getting together every so often had a picnic at Foster Park the other night. "Slipperyfinger" Frieda Knoche really caused a riot when she knocked the coffee cream on Irma Huhn and Luella Hockemeyer. They were celebrating Frieda Knoche, Edna Rohrbach and Edith Schriener's birthdays. A gay time was had. . . . Here are a few things we would like to see: Ray Snyder when he is not talking about his Oldsmobile; Ray O'Brien when he is bashful; Louie Sauers grinding the valves on that Chevy. "Hank" Shirley in the cabbage patch; Al Rebber carrying the "hod" and Rudy Zelt riding that horse.

Mills Receives Retirement Present

William Mills, Bldg. 17-2, is shown opening a going-away present from his friends and co-workers. The drill press was given him on the occasion of his retirement. Looking on are: (l. to r.) Paul Koldewey, Dave Slater, Archie Evans, Lee Shanabarger, Verne Castle, Gene Rosswurm, Ansel Feighner, Pres Slack, Noble Dinger, Bill Straub, Melvin Kiessling, Jack Dobson, Belle Buchan, Dick Lare and Jeanette Blough.

Our deepest sympathy to Ed Lipp in the death of his wife and to Joe Mattes in the death of his brother. . . . We're just a little late extending congratulations to the Carl Banks who have a brand new baby boy, born on Decoration Day. . . . Ray Quinn certainly has every right to be proud of his son Bill of Chicago. Bill was recently initiated into Phi Eta Sigma national scholastic honor society at Northwestern university. This fraternity is open to men who have maintained approximately an "A" average. What we are a little dubious about is the fact that Ray says the boy takes after his pappy. . . . If you get a whiff of Chanel No. 5 perfume, to the tune of "Shuffle Off To Buffalo," you will probably find Butch Vegalues within close range. Since he made that trip to Niagara Falls with the Elex girls he's a changed man. Hope you did enjoy the song fest that was being held at Buffalo, though, Butch. . . . Jay Greer didn't look too beat up this week after serving as judge last Sunday at the truck roadeo. We understand he was pretty well fortified, including a tin hat, just in case somebody got a little reckless with brickbats, etc. . . . The fellows in the shop at Taylor St. say they know for a fact that Charlie Hartman had a little trouble when he first got his power lawn mower. The first time he used it, his wife saw him going down the yard hanging on for dear life with his feet completely off the ground. Must be a powerful mower, Charlie. . . . Skin McGary says he has the most valuable dog in the states. If he is going squirrel hunting he picks up his rifle and the dog hunts squirrels; if he picks up his muzzle loading shot gun the dog hunts rabbits; if he goes fishing, he shows the dog a pole and the dog digs his bait and when he is an official at a ball game the dog is his bodyguard. . . . Does everyone at Taylor St. know "I'll see one more" Fritz? . . . "Lobster" Kilcoin they call him after one day at the lake. . . . We think it's pretty nice of Mart Macke to take time out every week to send his daughter Marjorie a copy of the WORKS NEWS. Marjorie, a former employee here, and her husband are now living in Ohio.

G-E Cartoonist Commended For Bond Drive Services

Veteran G-E cartoonist, Jim Barstow, has received a U. S. Treasury Department's "thank you" for his recent contribution of cartoon talent to the Opportunity Bond Drive.

Jim, a member of the National Cartoonists Society, created three original cartoons with a Savings Bonds slant which are being used in promotion of the current drive.

Clyde Grant told us this one on his wife. It seems that the vine on the front porch was getting rather heavy and in need of thinning. She got out the pruning shears and proceeded to operate on said vine. Some of it was entwined around the spouting and in removing this she also snipped off the telephone wires. . . . Willard Hull likes to help his wife do the dishes. Last Sunday morning he was helping with the breakfast dishes before going to church, when suddenly the dish towel was missing. Being unable to find same, he got a fresh one to finish the job with. After a while they went to church. While sitting there Bill became warm and went into his pocket for his hanky, but pulled out the missing towel instead. . . . Fred Keil, a Div. 14 worker who propels this columnist west on Taylor St. every morning in his "Hot Rod Flyer," came to grief the other evening, that is his car did. It seems that he was out putting the flyer through its paces when the drive shaft came loose and wrapped itself around the rear axle. It required a major operation to extricate it and replace it with a new one. . . . We notice by the daily press and heard over the radio that Frank Blotkamp was the winner of the careful driving award given by a local beverage manufacturer. We can readily understand this and thought that eventually he would make the grade as the crate he drives is in such a deplorable condition that he would not dare drive fast or get the least bit reckless. If he did the old boy might decide to disintegrate and spill Frank all over the highway. . . . Now that a lot of the boys have obtained high speed outboard motors for their boats, Quentin Romy thought he would get into the swim. So he purchased from Ralph Dunlap an old worn out two horse job which he took to the lake and proceeded to putt-putt-putt all day long at a speed of about five miles per hour. Much to the delight of those owning high powered jobs, they passed Quentin so fast that it looked as if he were standing still, and the way they circled him put him in a highly nervous state of mind. . . . Newton Poland has just returned to work after a week's vacation. He is bronzed like a veteran of the range due to the fact that he worked diligently putting his raspberry plantation for the berry harvest which would take place the early part of next month.

Supervisors Hold Annual Picnic

The annual stag picnic of the Supervisors' Club was held Saturday, June 11, at Voigt's Retreat. A full day of fun and fellowship was enjoyed, although intermittent rain handicapped the horseshoe, volleyball and softball games. A few scenes taken during several card games are shown in the montage above.

Included are: C. D. Uncapher, F. J. Goetz, E. F. Waldschmidt, C. E. Slater, R. W. Kent, G. R Lindemuth, P. G. Dannecker, C. R. Olson, R. C. Meyer, Walter Konow, E. M. Hanauer, R. L. Mann, B. L. Shuler, Harold Kroeger, W. E. Holmes, Bob Dent, E. W. Witte and R L. Kierspe.

Apprentice BROADCAST

by MILDRED ELLIS

Now that school is out, all the apprentices are busy scurrying about trying to get enrolled in some of those deep Summer classes. You have just read a VERY UNTRUE statement. . . . Our absent-minded professor (Gebert) has mislaid his list of war vets. . . . Society Note: For information on the use of a "Powder Room" see Joe Rowan. . . . It has been reported that Gus did an excellent job of putting his boat in dry dock at the boat regatta. Of course, we all understand that it was all that "little kid's" fault. . . . It cost Professor Gebert four cigars to advertise that anyone making over 95 on the final trig test could "light one up" on him. Dick says next time anyone who gets all the problems right will have six points taken off for neatness, and everyone who gets below 80 has to buy him a cigar. . . . Fremion and Frede play a new game in FHP drafting. It's called "Joe Rowan," and you play it by folding your arms and resting your head on them. . . . Dick Wagner is the proud owner of a new two-tone car. (It wasn't two-toned when he bought it last week). . . . Several ball fans were out to watch the apprentice team beat the Main Office team 12-0. FLASH! ! ! "Whiftsen" Birkenbeul got a hit and made it clear around to first base without coaching help. . . . Some of the draftsmen had another outing at Fremion's cottage and on the way back Birkenbeul was elected for the job of holding the fish poles on the car. As they passed a group of young kids, one of them threw a cream puff right in Bob's face. They stopped the car to clean up the mess and Bob told them (censored). . . . On the last day of class, Rasor's classmates presented him with a gift in their appreciation of his musical ability, 10 Easy Lessons on how to Play the Harmonica. The only hitch was that Art had to find someone versed in "Der Deutsch" in order to take his lessons. . . . The doctor called it infection, but Macke thinks it's an allergy—he's allergic to housecleaning. . . . It's guys like Smith and Konow who caused the price of haircuts to be increased. For what you wanted, wouldn't a shave have been cheaper? . . . John Leffers demonstrates his new cracking process in metallurgy class by cracking together two metallurgy books. Half of the class jumps, Rowan the highest of all. Brownie concentrates so intensely on his work that when someone snaps him on the head with a paper clip, he barely stirs. . . . We extend our deepest sympathy to Mr. and Mrs. Richard Frede in the death of their infant daughter.

SLEUTHING in 4-6

by JOAN POOS

Misunderstanding: Bertha McCague, of Payroll, blushed "like mad" after she agreed when someone told her that she looked cute. Bertha thought that "cute" was "cool"—or so she says.

The Month of June Brings: Wedding bells and birthdays. Bill Dripps, Developmental, will be walking down the primrose path July 1. Congratulations, Bill. We hope that you will live happily ever after. . . . Happy birthday to Dick Killian, June 18, and to "Forrie" Carlson, June 13. Forrie received a beautiful yellow and black "YoYo" from a secret pal. He seemed thrilled and said that he was going to practice until he could perfect the art.

"Seafood—Mama": R. F. (Roby) Robinson, Service Engineering, attended a seafood dinner not too long ago. It seems that the effects upon his digestive tract were not good. He finally came to work the following noon. Hope you've recovered, Roby.

Ah—To Be Great: We have a celebrity in our midst, "the brain" of the AC Section—R. G. Dobbin, who went to school with Shirley Temple's husband, John Agar.

Belated: Best wishes to Jay Strong, DC Section, upon the arrival of a son, Alan Reed. You've never seen a prouder papa.

Transfers: Fond farewells to Mike Davich, who left for DeKalb, and to R. V. Huffman, who left for Decatur. Welcome back to L. Z. Gossman, who is back in the AC Section, and to W. C. Hopkins, who has transferred from Taylor St. . . . Judy Clark appeared in the latest —one day last week—polka dot shoes.

Joke? Why does a moron put his feet in the oven? To pop his corn. . . .Hazel Rowe attended her son's graduation from Indiana University last week-end. Congratulations, Hazel.

Elex: Donna Bauermeister, Gertrude Koldewey, Marge Murphy, Thelma Barbeau, Marilyn Franke, Mildred Blievernicht, Betty Garber and Lois Tritch were among the 140 girls who made the excursion to Niagara Falls last week-end. They all arrived safe and sound but a wee bit sleepy.

Meal Ticket: Harold Poyser shot a 39 on nine holes of the Auburn golf course, over the weekend. We understand that he collected a free meal for the feat.

He Who Laughs First: Adolph Strasser was making fun of Ed Whipple one day for making such funny gestures while having a 'phone conversation. But it seems that Adolph caused a larger group to marvel at him, for a similar act, last week. The audiencc wondered whether he was giving directions or practicing fly casting. How about it, Adolph?

AD-LETS

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE

Monday Noon, June 20, 1949

LOST AND FOUND

LOST—White glove with bows on it.

LOST—Lady's Bulova gold wrist watch with gold stretch band.

LOST—An earring with a large rhinestone set in the center and eight sets around it.

FOUND—Two pairs of glasses in Bldg. 27. One pair was left on the drinking fountain, and one in the wash room.

FOUND—Pair lady's amber shell-rimmed glasses. Found in front of the Credit Union office.

FOR SALE

FIVE-ROOM MODERN HOUSE and garage, with or without furniture, located southeast. H-76443.

KEROSENE STOVE and two-burner hot plate. H-66332.

DINING ROOM SUITE—Eight pieces, 12x16 blue Axminster rug, electric fireplace, log and irons. A-99232.

HORTON TABLE MODEL IRONER—Excellent condition. A-1022.

STUDIO COUCH—Good condition, suitable for lake cottage. Reasonable. A-87133.

DROPLEAF KITCHEN TABLE and four chairs, white enamel. H-82344.

50-POUND ICE BOX—Like new, $15. 130 ft. ¾-in. hay rope. Fred D. Blum, 2 miles northeast on State Road 37.

ICER 75-LB. BOX—Good condition, white finish, $12. H-67076.

1½ HP. UNIVERSAL GARDEN TRACTOR and cultivating attachments. A-88512.

12-BASS HOHNER PIANO-ACCORDION and case; Kay guitar and case. H-68811.

PUPPIES, PART BOXER—Eight weeks old, good watch dogs, nice pets. H-0735. 323 Burns Blvd.

SANDY FLEMISH GIANT RABBITS—Four pedigreed bucks, $8.50 and $5 each. H-24723, 1340 Park Ave.

WANTED

4-5 ROOM HOUSE OR APARTMENT—Unfurnished, best of references. H-68013.

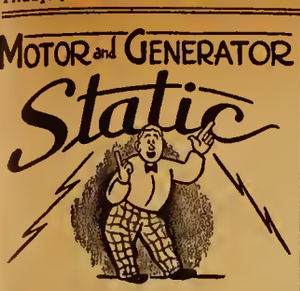
USED SINK—With fixtures. E-1345.

TWO OLD BOX CAR OR BUS BODIES —H-37925.

FOR RENT

COTTAGE—Accommodates seven, located at Lake James. H-28226 or H-4184.

MODERN COTTAGE—Located at Sylvan Lake; bottle gas refrigerator, innersprings, sleeps seven. Available June 25-July 9, July 30-August 27. E-5988.



TRANSPORTATION

WANTS RIDERS OR RIDE—Ralph E. Jacobs, from Bluffton. Works from 8-5:15, Bldg. 31-1. Extension 2183.

WANTS RIDE—Lydia Doehrman, from New Haven, to Taylor St. Works for Holloway, Div. 14, from 3:18-11:48.

Michael To Handle Pension Activities For Several Weeks

While George Waldschmidt is recuperating from a recent operation, K. W. Michael, Assistant to the Supervisor of Personnel, will handle all pension and insurance activities for the next several weeks.

Thought of the Week: "Visit Your Indiana State Parks."

Perplexed: Don (Poison Pen) Shultz is a very perplexed man. He doesn't know whether he has been flattered or insulted. The Inquiring Reporter cornered him the other day and propounded her current weekly question. When Don had brilliantly replied, she asked, "You are Jim Mitchell, aren't you?" Poor Don is wandering around the office in a daze. . . . Art Voelker's new address is as follows: 4th Replacement Co., 4th Infantry Div., Fort Ord, Calif.

Captain Of The Ship

If any one is interested in boat driving lessons, see Art Druce. . . . When the boating season opened at Lake Gage and all the captains, mates and seafaring men got their boats out, installed their motors, and made ready for action, Art Druce was among them. Mrs. Druce, knowing Art as she does, suggested he better go to the boat livery and hire the work done. But, not Art—he completed the preparations and made ready to take off. Again, Mrs. Druce cautioned that, if nothing else, he had better have their neighbor cottager, Mr. Dougherty, check things before the voyage. This only angered Art more. After all, didn't he know as much of seafaring and mechanics as Dougherty?

The mere fact that Mrs. Druce and Mrs. Dougherty had to put the pier in and launch the boat didn't mean that Art had no knowledge of this sort of thing. When he got the boat under way, he found that he had the steering apparatus hooked up backwards but this didn't discourage Druce for, after all, wasn't he a left-handed Irishman (an Englishman, that is). He could and usually did do things backwards anyway.

When he got ready to re-enter port, Druce became slightly confused and thought it was the gas and not the steering apparatus which was hooked up backwards. He opened the gas wide and, instead of pulling alongside, he headed squarely head-on into the retaining wall. Needless to say, Art flew out of the boat and into the water. As usual, Mrs. Druce was there to look after him and, along with Mrs. Dougherty, they managed to hold Art's head out of the water until he got his bearings.

Art doesn't give up so easily. He jumped back into the boat and started guiding it as the motor was still running. The big trouble was that the pin was sheared and the boat wouldn't go.

Art said it "ain't bad enough" that Mrs. Druce and Mrs. Dougherty had to pull him out of the lake but they went down and got his old arch enemy to come and put in a new shear pin, hook up the steering apparatus and put everything ship-shape. Art says any Irishman would have been bad enough but of all the guys they could have gotten, they had to get that guy Dougherty to fix things up.

When the repairs were made and Mrs. Druce told Art to thank Mr. Dougherty, all Art would say was: "I didn't ask him to fix it. He just butted in and I ain't thanking him."

Creatures Of Habit

We take pride in the accomplishments of our synthetic cowboy, "Creep Along" Jack Hively, an equestrian of note who has been tossed off some of the finest nags in this country. Mr. Hively has two horses of his own, trained to run to the stable and enter their stalls upon hearing his whistle. Creep Along, like many of us, is a creature of habit. His unvarying routine is go to the stable, open door, enter, close door, place oats in feed troughs, open door and whistle. The horses grazing in a near-by field, hearing the whistle come on the gallop. One evening last week Jack went through his act a little later than usual and the horses being hungry came and stood outside the door after he entered the stable. The arranging completed, Creep Along opened the door, whistled and the horses came in but quick. So quick in fact that Jack could not get out of the way. They hit him once, spun him around, hit him again, and knocked him head first into the oats or what have you. When Mr. Hively cleared his eyes and looked around, both horses were in their stalls contentedly munching oats. The language Jack used was so outstanding we figured there would have to be another war before such terms could be developed. But the horses, also being creatures of habit, didn't seem to mind, just went on eating.

Ramblings 31-2

Ruth Maher transferred from the Drafting Section to Engineering. She is taking Carol Pond's place. We have two new draftsmen: Bernard S. Kain is replacing Ruth and Robert D. Hughes is replacing Bob Hirschmann, who returned to the General Tool Div. Bernard and Robert were transferred from 20-2. . . . Since Olsen and Johnson are just waiting to give Mark Smith a contract, Mark doesn't worry about getting laid off. Friends of the Johnsons, the Olsens and the Smiths recently got Mr. and Mrs. Smith some special seats at the Olsen and Johnson show in Indianapolis. During one of the dancing numbers, the chorus girls danced up the aisles to pick men from the audience for dancing partners. What do you know! One picked Mark Smith. She put a baby bonnet on him, made up his face, and rolled up his pants legs. Then they danced back down the aisle on to the stage. After a one, two, three, kick with all the chorus girls and their partners, they asked Smithy to do the Russian Bear Dance. Smithy was given support under his arms as he proceeded in a squat position to kick out first one leg and then the other. Mark was outdoing the Don Cossacks when all of a sudden his support gave way. KER-PLOP, Mark was flat on the floor. Later Olsen said, "Say, you were pretty good." Mark says, "I thought so." . . . Juanita Vanderford, who used to work in the drafting section, paid us a visit recently. Juanita has been living in Burbank, Calif., since she quit here. . . . Your Roving Reporter.

Crankshaw Dies

James B. Crankshaw, 80, former Manager of the Fort Wayne sales office, died at 5:20 a. m. Thursday, June 9, at his home, 3128 Fairfield avenue.

A Fort Wayne resident for 41 years, he retired from General Electric in 1932 after 24 years service. He was a graduate of Cornell University and a member of the Trinity Episcopal Church.

Services were held at 3 p. m. Friday at the Klaehn Funeral Home, the Rev. George B. Wood officiating. Scottish Rite services were held following the regular services. A requiem mass was celebrated by Fr. Wood at the church at 8:30 a. m. Friday. Burial was in Lindenwood Cemetery.

Hi, Dad, congratulations to you on Father's Day. You're really a swell guy, especially when we are really in need. You always come through. We suppose you will be getting some of those ties and socks as usual. Do you suppose that they are sort of reminders? For instance, the tie to remind you how tied down you are and the socks to remind you to keep on your toes and bring home the bacon, only to have it taken away from you when you get there. (Of course, we are just kidding.) All is given with the very best intentions and good wishes from you and yours. Anyway you asked for it and she said, yes. After all it was your idea and you're just the kind of a guy that will stick to a bargain. Have a happy Fathers' Day, Dad. . . . Fritz Ramseier has the car of the age. It's a Pontiac, and it absolutely refuses to run with the tank full of gas. Fritz has tried it a number of times and each time he had to syphon the gas back out. Now he carries two 5-gallon cans around just in case it deeides to run without gas. Pontiac dealers, please note. . . . Herb Thompson has a brand new green Ford. You're no Irishman, Herb; we know from some of the deals you make. . . . Congratulations, Alton Corson, on your splendid suggestion award.

You are on a 36-hour schedule! What to do with the four hours that is the question. I am told that gardening is both wonderful exercise as well as profitable. Golf is good exercise, but not so profitable. Cleaning house will pay off in satisfaction, but how wonderful it is to just relax, sleep, read your favorite book. That pays off too for you are better prepared for the next 36 hours. (Of course, we are hoping it will keep the other fellow working). . . . We are told that "Life Begins at 40" now we know they mean 40 hours, we always thought it was 40 years. . . . News like the work week seems to be shortened. The item of the week is our congratulations to Mr. and Mrs. G. Doyal White on their 25th wedding anniversary. We understand they took a trip to southern Indiana. Also, to Larry Simonis, formerly of the Data Bureau, who has announced the birth of a baby girl, Chery Ann, June 3. . . . Carnival time is fun time. Jeanette Burkhardt, Bldg. 18-4, had to take her small daughter Charnette, but it is a question as to which enjoyed it the most. . . . Vacation suggestion: It may be a little warm, but who cares! Why not visit New Orleans? It would be impossible to name all of the interesting spots in the Old French Quarters. One in particular is the old, old Coffee Bar (you may supply the French, I cannot). It is a small spot down in the wholesale district that is open 24 hours a day. They serve coffee and the most delicious doughnuts you have ever tasted. It is interesting to watch the crowds, as they represent the crossroads of America. Besides, the coffee is wonderful!

Inquiring Reporter:

WHAT IS THE MOST UNFORGETTABLE MOMENT OF YOUR LIFE?

RUBY STOOPS

Taylor St.

"The most unforgetful moments in my life are those spent with my family and during trips I have taken with them through the West."

EDWIN E. HILSMIER

Bldg. 6-B

"One of the most unforgetful moments of my life was the sight of the Golden Gate bridge as we flew home from Guam. It meant home, my family, and my old job. My last mission was over—I was happy."

EVELYN E. DAUGHERTY

Bldg. 4-2

"The most unforgetful moments I've had are meeting cheerful people with a kind and thoughtful disposition, generous appreciation of others, and a modest opinion of self. For its been written that we need chronically to keep the corners of the mouth turned up, not down."

CLARENCE SCHROEDER

Taylor St.

"I'll never forget the day we made final plans and let the contract for our new suburban home."

LEROY COOK

Bldg. 27

"My unforgetful moment occurred in South Dakota at Red Lake, where I saw a farmer catching catfish by the bag full."

VOLTMEN WIN FROM BUDS, 5-4

Charley Shipman was the winning pitcher Sunday night, when the Voltmen nosed out the Benton Harbor Buds, 5-4, at Benton Harbor, Mich.

Shipman was hit hard in the first inning when the Buds piled up three runs, but he settled down and held the home team to a single run the rest of the way. Meanwhile, the Voltmen got to two Bud pitchers for a pair in the fifth and seventh to knot the count.

The winning run came in the ninth on a single by John Dudick and a double by Olin Smith.

Box score:

VOLTMEN	AB	H	O	BENTON HARBOR	AB	H	O
Stramm,ss	3	1	0	Podhunter,2b	5	1	2

Benton Harbor ..... 300 010 000—4

OWL GOLF

By Earl D. Stauffer

For all-around fun and good golf, this Owl Golf league is hard to beat. We play when those wide open spaces aren't crowded with the masses and are never in danger of time running out on us.

At the end of the fifth week of league play, we find those two perennial "Hot Shots" Warren Wickliffe and Jimmy Sternberger with 40-breaking averages. Warren has an average of 38.4 and Jim carries a 39.4 average. Johnny Stark is in third place with a 41.7.

The results of last week are as follows: Team No. 5 tripped Team No. 1 for five points, thanks to a fine round by "Butch" Junk.

The Jolly Boys dumped Team No. 4 to the tune of eight points. Warren Wickliffe led the Hot Shots to a seven point victory over Team No. 3.

The standings:

Odd		Even	
Team No. 1	+24	Team No. 6	+62
Team No. 3	+9	Team No. 2	—31
Team No. 5	—9	Team No. 4	—55

Safety Engineer Named To Indiana Advisory Council

Herschel L. Smith, Safety Engineer for the Fort Wayne Works, has been appointed a member of the Indiana General Advisory Council for Safety by Gov. Henry F. Schricker. The council has as its purpose to study and promulgate codes and rules for safety and health in all places of employment.

Ham Team Breaks Even In Two Games Last Week

The G-E Club ham softball team broke even in two games played last week. They lost to Turners in an unofficial game by score of 5-3. This game was lost through errors and the inability to get hits when needed.

The Club defeated the Eagles Wednesday, June 8, on a score of 16-4. The Eagles were without their star pitcher and the Club was able to hit their sub-pitcher's throws all over the lot.

For an evening of entertainment, see the Hams play softball at Packard park.

G-E GOLF

By Hugh Dubdit

The Drivers, led by a 37 score by Don Lynch, downed the Mashies by three points last Wednesday. The Mashies still lead the group with a total of 32 points, with Brassies in second at 17 points. Dick Szink carded a 38 and E. Becker came in with 39 for the low scores of the evening.

The Tuesday night group suspended operations this week, because of rain.

On Monday night—to show the spirit of our golfers—play started in the rain. When the foursomes came home, Walter Sunier, Herb Koch and Louis Davis had cards of 41 and A. E. Rowe a 42. The Lost Balls now are in first place with 18 points, just two better than the Apprentice team. The Dark Horses are third, with eight.

It helps when you stop and think that there are a lot more troubles you haven't than troubles you have.

Industrial Owls Score Wins Over Rod-Wire, Police

The G-E Industrial Owls enhanced their record with two wins in the past week. Last Wednesday the victim was Indiana Rod and Wire. The score was 7-2 in favor of G-E.

In a make-up game, the Owls thumped their old Nemesis, the Police softball team. This score was a convincing 14-3. Blauvelt and Blattner formed the batteries for G-E.

These two wins make an even break for the season, two wins and two losses.

Tickets Go On Sale Monday For Voltmen-White Sox Game

Tickets for the Voltmen's exhibition game Tuesday, July 12, against the Chicago White Sox, of the American League, will be placed on sale Monday morning, June 20. Orders will be taken at the G-E Club or over the phone by C. W. Wilt, Ext. 742, or W. W. Allen, Ext. 419.

Firemen Witness Fire-Fighting Demonstration

Members of the Volunteer Firemen's Association held their annual picnic Saturday, June 4, at the Log Cabin. Highlighting the day's program were demonstrations of various fire-fighting methods. The above pictures show scenes taken during the day.

(1) Ed Mueller, Assistant City Fire Chief; Cy Uebelhoer, City Fire Chief, and Robert Gaskill, Supt. of the City Signal Dept., take time out for a chat. (2) Another group includes Jerry Duryee, J. H. Bradtmiller, Harry Zimmerman and Fred Duryee, former head of Plant Protection and now retired. (3) The boys who "dished out the food" are shown behind the lunch counter. They are Ray Soughan, Earl Stauffer, Walter Lydy and Ora Martin.

The next three pictures show the demonstration of incorrect ways of extinguishing magnesium fires. The correct method of using G-1 powder was later demonstrated. (4) This picture shows the effect of water on magnesium fires. (5) Robert Gebhart is shown using carbon-tetrachloride on the fire. (6) Walter Siedel demonstrates the use of CO_2 on the fire.

(7) This photo shows an explosion of a pound of Benzyol-Proxide. (8) L. J. Wiechers, of the Ansul Chemical Co., and Robert Gebhart demonstrate the use of a 20-pound extinguisher in putting out a propane gas fire. (9) Walter Siedel is shown extinguishing a gasoline-flow fire with dry chemicals. (10) Robert Gebhart puts out a naphtha pan fire with dry chemicals.

TOUCHING THE BASES

by Walter Histed

The Red Sox stretched their winning streak to seven and the Auscos their losses to four in a game at Columbian park in Lafayette last Sunday. The score was 5 to 4.

The Auscos out hit the Red Sox, 13 to 10, but sensational fielding in the pinches allowed Lefty Hazel and his relief, Art Herring, to survive the storm. Nowak paced the Ausco hitters in a losing cause with three hits, while Ritter had a perfect night at the plate for the winners with two singles, a double, and a triple in four tries.

Line score:

St. Joseph	001 000 300	4	13	2
Lafayette	011 110 10x	5	10	2

Katz, Stewart and Westerkamp; loser—Katz
Hazel, Herring and Hixson; winner—Hazel.

Studebakers, 6; Cubs, 4

The Studebakers rallied for three runs in the seventh to tie the score and two more in the eighth inning to down the Cubs at Michigan City last Sunday. Feature of the seventh inning rally was a tremendous home run from the bat of George Bohanna with two mates on the bases.

Line score:

South Bend	000 100 320	6	11	0
Michigan City	003 100 000	4	11	4

Lee and Morgan
Kilbane, Smola and Hofferth; loser—Smola.

Buds, 5; Auscos, 2

In a thrill packed 10-inning struggle, the Benton Harbor Buds downed the St. Joseph Auscos at Edgewater park, 5 to 2. The game was a thrilling pitching duel between Lefty Frank Ververka for the Buds and Mack Stewart for the Auscos, with Ververka returned the winner. The Buds tallied single runs in the first two innings to gain a 2 to 0 lead which prevailed until the home ninth. Having been held to four hits in eight innings, the Auscos came to life in the ninth. Winters singled, Shilling popped out and Jones singled to set the stage for Carl Fiore, who blasted out a long triple to tie the score and put the winning run on third. Ververka walked Nowak and Westerkamp loading the bases, after which Stewart popped out and Schultz grounded out to end the threat. In the tenth the Buds quickly settled matters on Todhunter's triple with one out and Kovach's single. Geras singled and Leach drove out a safety good for two insurance runs. This game marked Stewart's first defeat in five starts.

Line score:

Benton Harbor	110 000 000 3	5	13	0
St. Joseph	000 000 002 0	2	8	3

Ververka and Young
Stewart and Westerkamp.

Red Sox, 8; Studebakers, 6

The Red Sox rallied in the seventh for three runs, to run their league winning streak to five, as they defeated the Studebakers at Lafayette, 8 to 6. Slim DeLion, while hit for ten safeties, was the victim of fielding misplays by his mates which were responsible for five of the six Studebaker runs. Hixson, for the Red Sox, and DeMark, for the losers, each had three hits.

Line score:

South Bend	050 001 000	6	10	3
Lafayette	310 000 31x	8	12	4

Lee and Morgan
DeLion and Hixson.

Buds, 4; Cubs, 3

Pitching his second game in three days, Lefty Ververka pitched the Buds to victory over Michigan City, 4 to 3, at House of David park. Eddie Jabb's home run, with a man on, in the eighth inning provided the margin of victory.

Line score:

Michigan City	000 100 002	3	9	0
Benton Harbor	002 000 02x	4	10	2

Wallace and Hofferth
Ververka and Young.

Red Sox, 10; Studebakers, 5

The Red Sox chalked up their sixth consecutive vietory in beating the Studebakers, 10 to 5, at Lippincott field.

Anderson, Studebaker hurler, walked the bases full in the first inning. The Red Sox drove through this opening for three runs and from then on held command of the game. In all, the Red Sox blasted out 17 hits, with Ritter collecting four and Desiderato, Cannizo and Bestudik racking up three each.

Line score:

Lafayette	312 003 100	10	17	0
South Bend	000 021 020	5	6	3

Clifton, Herring and Hixson—winner Clifton
Anderson and Morgan.

Rambling Notes

The slumping Auscos had their first shakeup of the season last week when Tom Brown, utility infielder, was given his release. Perhaps more shaking up will follow when Waldo gets home from Arizona and finds his charges out of first place. Waldo demands a winner, is willing to pay for it and brooks no alibis as to why his team doesn't win. Incidentally, Brown is the same player Manager Carl Kennedy was trying to peddle to the Voltmen to fulfill his obligation to turn over a player (to be chosen by the Voltmen) in return for Winter's contract.

* * *

Tho Auscos have so many players who once played with Dayton or Oklahoma City that their cross-town rivals, the Benton Harbor Buds, have dubbed them the Indians.

* * *

Jerry Kuhn, in his column "Just Browsin' Around," still thinks the Auscos have the best team in the league and can't understand why they don't win every game. He referred to the Buds as strictly a bush-league outfit, which ought to add fuel to the already red hot, twin-city rivalry.

* * *

Gordon Graham suggests that the name of the Michigan-Indiana league ought to be changed to the "500 League" before long, in view of the closeness of all the teams to an even won and lost mark.

* * *

The Red Sox continued to set a fast pace. They ran their string of consecutive wins to seven last Sunday, as they defeated the Auscos. The win also enabled the Red Sox to take over first place in the league, a half game ahead of the Auscos and Voltmen.

G-E Majors Blast Waynedale Legion To 15-2 Victory

The G-E Major softball team won a game Friday night, June 10, from Waynedale Legion by a score of 15-2 in nine innings.

Stanski led off with a double. Bucher struck out, followed by a homc run by Yarman, scoring Stanski. Morkoetter followed with a home run in the left center field. Thc plays ended the scoring until the fifth, when Bucher was safe on an error and Yarman hit his second home run for two more runs.

The big sixth inning found 11 men batting. Lawson was safe on an error, and Anderson hit a double. Then came a home run to right center. Waltke was next up and hit a double. Then Stanski walked. Bucher and Yarman were safe on errors with the bases loaded. Morkoetter hit his second home run, followed by eight men up, each scoring.

In the seventh, two more runs were scored on three singles and an infield out. The losers scored a run in the first on three singles. They ended their scoring until the eighth inning, when Meyers hit a slow ball down the left field line for three bases. He scored on a bad throw that got past the catcher.

Line score:

G-E	300 028 002	15	14	1
Waynedale	100 000 010	2	5	6

Hower, Waltke, Fieldheiser and Sowers, Baals; Scherer, Baker and Clausen.

The Voltmen, who have given their followers so many headaches as they have stumbled around in the field, are showing signs of getting under way with a more steady brand of ball. With Shipman and Cary pitching good ball and Orphan showing signs of rounding into form, the Volts are beginning to roll. The addition of Stramm at short has placed a greater degree of steadiness in the infield than was present in earlier games.

VOLTMEN Home Schedule

Friday, June 17—
St. Joseph Auseos

Wednesday, June 22—
Homestead Grays

Thursday, June 23—
Philadelphia Stars

All games are scheduled for 8 p.m. in Dwenger park.

Voltmen Halt Cubs, 7-2; Hand Buds 13-8 Setback

By BILL HUNT

The G-E Voltmen whipped the Michigan City Cubs, 7-2, Thursday night and then came back Saturday night to trim the Benton Harbor Buds, 13-8, in Michigan-Indiana League games played last week at Dwenger park.

John Braden's boys arc really beginning to look like a ball team. The sloppy fielding, which has plagued the rebuilding effort, has been licked we believe. In Thursday's game there were four errors, but only one was eostly in allowing a run. In Saturday's game, one error came on a bad throw after Stramm had fallen when fielding a ground ball near second; the other was near the end of the game and was totally unimportant.

The spirit of the team has changed; they are confident of their own ability and trust the ability of the man next to them. They have a eombination that is working good and needs possibly only another outfielder, somebody to relieve Harwood if the leg fails, and possibly a little more pitching to make a team that will look as good or better than last year's champs.

Charlie Shipman pitched a masterpiece Thursday. He allowed only four singles and a double, while fanning four and walking none. The new shortstop, Henry Stramm, made good his first home appearance. He beat out two bunts and drove another single to center; he scored twice and played good ball in the field.

John Dudick hit a long homer over the center field fence in the fourth to score Stramm, plus a single in the five run first inning. He is playing a beautiful game at third; Thursday he cut in front of Stramm to throw a Cub out on a slow roller and Saturday went behind third to get his man on what looked like a sure hit.

Stan Miasek got two doubles and drove in two runs besides doing well in the field. Gabby Hormann played center field in the absence of Green. He saved a line drive single and doubled a man off first in the seventh. He got a single and double in four at the plate. Jerry Hisner did an excellent job relief-catching for Hormann.

Snow Buds Under, 13-8

Scott Cary looked like he was ready for an early shower as the first batter tripled, the second singled, the third walked, the fourth doubled and the fifth singled; but they finally got the side out. He held them to two hits until the sixth, when they got two hits and two runs. Then in the ninth, when they scored twice on one hit. Five Buds swung twice at his offerings and walked back to the dugout to sit.

The Voltmen got to three Benton Harbor pitchers for 18 hits of which Stramm got a single; Green, three singles and a double; Hormann, a single and double; Dudiek, two singles and a double; Smith, three singles; Bobilya, a double and single; Miasek, a single; Harwood, two singles, and Cary, a double.

A strange play occurred in the seventh inning which demonstrates how the Voltmen are hustling and playing heads-up ball. Bobilya caught Hank Richel's line drive and threw to Smith to double Jim Phipps off first, but the ball got by Smith. Gabby Hormann was backing him up, like a good catcher should, and flipped it back the necessary three feet or so to get the man.

Works Lab Beats Firemen, 19-14, To Retain Lead

The Works Lab held the lead in the Interdivision Softball league as Paul Beltz pitched his third winning game, beating the Firemen 19-14. The Firemen used three pitchers, but were unable to hold the Lab's heavy hitters.

The Apprentice men shut out Main Office, 12-0, on some good pitching by Leffers and Zurbuch. The Apprentices made everyone of their hits count by getting 12 runs out of 12 hits.

Everything in the book happened to Fractional as the Squares ran over them 23-1.

Let's Understand This Atomic Energy! . . . by Harry A. Winne

The basic physical facts underlying the release of atomic energy are really no more difficult to understand than the basic facts involved in ordinary combustion.

It is essential that people in general realize that atomic energy is as readily understandable as combustion, or as electricity. I am inclined to think that if the wonders and dangers of fire had burst upon our adult consciousness as suddenly, we should have been just as startled and confused as we are by atomic energy.

Our scientists tell us, and have proved, that mass can be converted into energy. Actually, when we burn coal, by causing it to combine with the oxygen of the air, we convert an infinitesimal part of the mass of the coal and air into energy. I say infinitesimal because is we consider the total weight of carbon and oxygen used in the burning process, we actually convert only about one eleven-billionth of the mass into energy.

Chain Reaction

We do not know how to convert total mass to energy, but we have, within the past few years, learned how—under very special conditions—to convert to energy one one-thousandth of the mass of a unique substance, a special type of uranium through the process known as chain-reacting atomic, or nuclear fission.

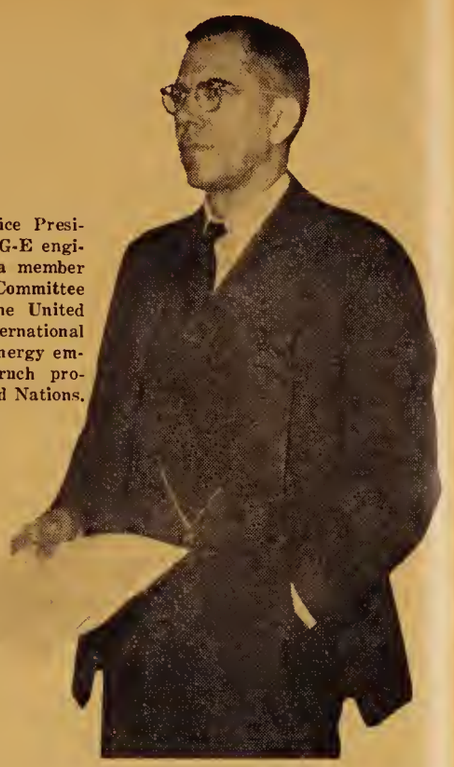
It is because this process occurs only under special conditions, that man did not discover how to utilize atomic energy long ago.

There is only one natural element, uranium, which will sustain a fission chain reaction; that is, only one natural element is a "nuclear fuel." More than that, only one special type of that element, a type called uranium 235 which constitutes only 1/140th part of all natural uranium, is usable in this way. Furthermore, the chain reaction will take place with this element only with a considerable amount of uranium arranged on a peculiar assembly, which is termed an atomic pile, or a nucelar reactor.

Though this sounds complicated and strange, a description of a coal-burning furnace, in which certain special materials burn under proper conditions, with a continuous supply of oxygen when heated to the requisite conditions, would sound equally complex to one not already familiar with the process. Then too, the burning coal gives off dangerous radiations, in the form of heat, and so the fire must be surrounded by a shield of brick and iron; just as the reactor must be shielded for protection from its radiations.

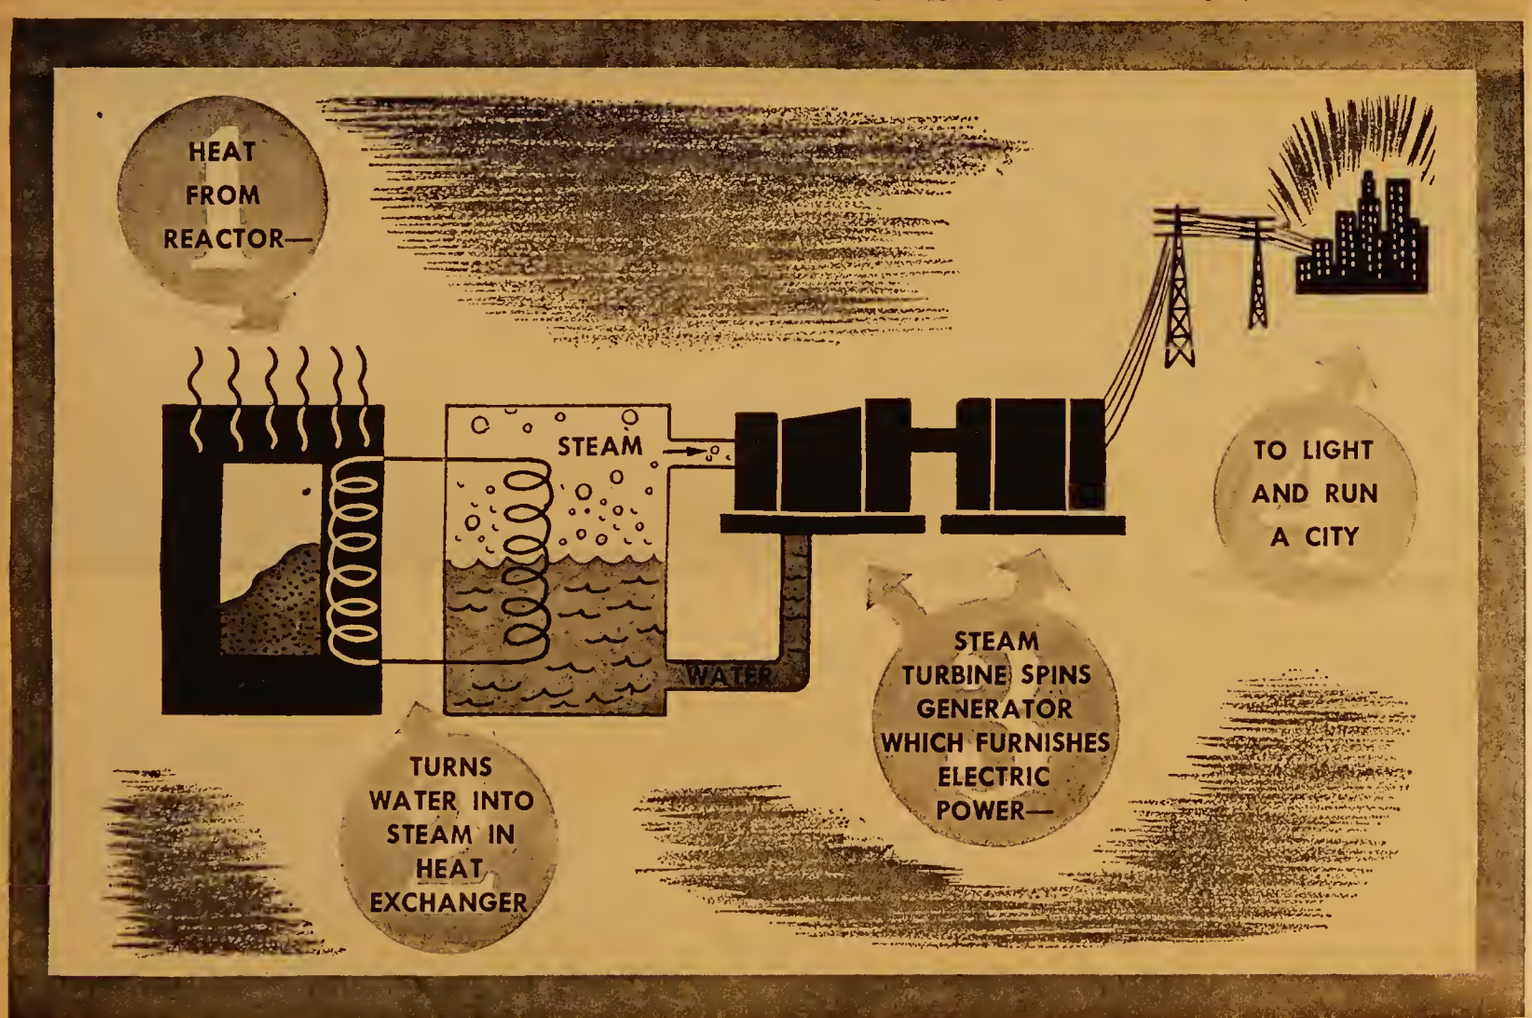
Though the one rare type of uranium is the only material found in nature which will support a fission chain reaction, it is possible in the chain reactor to convert the more common kind of uranium to the artficial element plutonium. In addition it is also possible to convert the still more abundant element thorium to an artificial element, uranium 233, which is fissionable. These artificial elements can be made to release atomic energy in essentially the same way as uranium 235.

This production of new fuel elements is truly amazing, but remember that for years ordinary illuminating gas has been made by feeding steam through a bed of white hot coal. It is true that this is not a conversion of atoms, but of molecules, but it too is strange and startling to one who has never before heard of it.



Uses For Atom Power

Atomic energy is not likely to cause any revolutionary reduction in power cost in areas where electric power is now readily available at reasonable cost.



On the average, the cost of fuel accounts for only 20 per cent or 25 per cent of the total price paid by the consumer for fuel-generated power today, so even if we got nuclear fuel free we could expect only 20 or 25 per cent reduction in power costs. On the other hand, because nuclear fuel is such an extremely concentrated source of energy, there is the very definite possibility that atomic energy may bring economical electric power to areas where the transportation costs of conventional fuel are extremely high.

However, I do not visualize small atomic power plants springing up in every isolated area. To be efficient and economical, I think an atomic power plant will necessarily be of large capacity, perhaps at least a hundred thousand kilowatts, and it may require a supporting chemical plant to reprocess partly used fuel.

I think it quite probable that the first specific-purpose atomic power plant may be for shipboard use. There is little doubt in my mind that in the course of time we can build such plants for shipboard service. An atomic-powered ship could conceivably run for months without refueling, as far as the power plant is concerned. This possibility is especially intriguing to our Navy people, and the thought of an atomic-powered submarine, a real underwater ship which could make transocean cruises without need to surface, really gets them excited.

Mr. Winne, Vice President in charge of G-E engineering policy, is a member of the Lilienthal Committee that formulated the United States plan for international control of atomic energy embodied in the Baruch proposals to the United Nations.

Business Conditions Are Outlined In Employee-Management Series

MANAGERS MEET WITH ALL EMPLOYEES IN INFORMATIVE CONFERENCES THIS WEEK

With the aim of keeping local General Electric Company employees fully informed on business conditions as they affect the Company's operations here in Fort Wayne and branch plants, a series of employee-management meetings reaching every employee were held during the past week.

The meetings were conducted by C. H. Matson, Manager of the Fort Wayne Works; M. E. Lord, Manager of the Fractional Horsepower Motor divisions; W. C. Wichman, Manager of the Specialty Transformer and Ballast divisions, and J. M. Crawford, Manager of the Motor Generator divisions.

Commenting on the program, Mr. Matson said, "We feel that it is extremely important to tell all employees just what the situation is nationally and locally to allay any unnecessary uneasiness they may feel about the future of their jobs. Fear for the future and the resulting lack of confidence in the stability of our own business and the rightness of our industrial system

Employees' Stores Close For Inventory

The Employees' stores at the Broadway and Taylor St. plants will be closed Wednesday, June 29; Thursday, June 30, and Friday, July 1, for inventory. Both stores will be open for business, as usual, Tuesday, July 5.

G-E Displays Motors, Transformers At Oil-Heat Exposition In Boston

The Fractional Horsepower Motor divisions and Specialty Transformer and Ballast divisions combined personnel and equipment to present the interesting and effective display shown above at the 1949 National Oil-Heat Exposition in Boston, Mass.

With "Standardization" the theme, the Specialty Transformer and Ballast divisions and Fractional Horsepower Motor divisions joined interests in presenting a unified sales effort at the 26th annual Oil-Heat Conference and Exposition in Mechanics hall, Boston, from May 16 to May 20.

Sponsored by the Oil-Heat Institute of America, the show was open to the general public and approximately 25,000 public admissions were reported. Official trade registration exceeded 4,500.

Products exhibited by the Apparatus Department were fractional horsepower motors, ignition transformers and control transformers.

Attractive Display Made

Attention was achieved by a turntable display on which chrome-

Independence Day

On Monday, July 4, the Broadway and Taylor Street plants, in general, will be closed in observance of Independence Day.

C. H. Matson

Works Manager

The General Electric Company and the United Electrical Workers—CIO resumed negotiations Wednesday. There were no significant developments up to press time last night, but a report of further developments will appear in the next issue of the WORKS NEWS.

Q-C Club President Announces Chairmen For Annual Meeting

Chairmen of arrangements for the annual meeting of the Quarter Century Club were announced today by F. L. Schafenacker, president.

The meeting will be held Saturday, Sept. 10, at Limberlost Camp, Oliver Lake.

The following were appointed to handle arrangements for the outing:

George Waldschmidt, transportation; James V. Johnson, entertainment; Edward Kock, traffic and parking; Harry Zimmerman, refreshments and playing cards; Irene Meyers, women's activities; Lloyd Platt, program; F. L. Schafenacker and A. C. Hartman, prizes; Joe Grosjean, food; Carl Reynolds, athletics; Harry Rohrbach, public address system, and Walter Sunier, publicity.

Melvin Beucler Places First In Truck Roadeo

G-E Driver Wins Safety Trophy In Event To Test Driving Skill

Melvin Beucler, G-E truck driver, took top place in the trailer and semi-trailer class of the Fort Wayne Truck Roadeo Wednesday evening at Baer field.

A trophy was presented to him by the Fleet Safety Committee of the Chamber of Commerce Safety Council, sponsors of the event.

Mr. Beucler has driven 30 years without a chargeable traffic accident.

He competed against seven other drivers in driving his truck through

ELEX MEMBERS PLAN PICNIC FOR CHILDREN

Children under 12 years old will be entertained by the Elex Club at a picnic Wednesday, July 13, in West Swinney park.

Each member should bring a child to the dinner, which will be served from 5 to 6 p.m. Tickets for the outing will be one dollar per member and will include the expense of the young guests. More than one child may be invited per member.

Reservations must be made with contact girls on or before Thursday, July 7.

Plan Announced For G-E Services Monday, June 27

In order to render service to those working Monday, June 27, the cafeteria at Taylor St. and the cafeteria in Bldg. 16-1, Broadway, will be open as usual, it was announced today.

Food wagons will serve the second shift at Broadway.

The cafeteria and the restaurant in Bldg. 16-2 and the Employees' stores will be closed.

Medical service for both first and second shifts will be provided at the main dispensary at Broadway.

The dispensaries at Taylor St. and Winter St. will be open for the first shift only. The dispensary in Bldg. 8-1 at Broadway will not be open on this day.

38 Education Fund Awards Are Presented By Company

Helen J. Gorrell and Virgil I. Hagy, both of Fort Wayne, have been named as recipients of education loans by the General Electric Company, according to an announcement by William W. Trench, Secretary of the Company and chairman of the G-E Education Committee.

Helen is the daughter of Mr. and Mrs. Granville C. Gorrell, 2548 Reed St. Mr. Gorrell works in Bldg. 19-5.

Virgil is the son of Mr. and Mrs. Alva A. Hagy, 346 Dalgren Ave. Mr. Hagy has been employed at the Winter St. plant.

Thirty-eight scholarships and loans totaling $10,400 have been granted by the Company to its employees and children of its employees for undergraduate study in the 1949-50 school year.

Twenty-two of the winners are from the Schenectady area, two are from the Lynn, Mass., area, two are from Erie, Pa., and two are from Danville, Ill. Others are from Pittsfield, Mass., Bridgeport, Conn., Chicago, Detroit, and Philadelphia.

Recipients of the scholarships and loans were selected on a competitive basis from applications submitted to the G-E Educational Committee. Some 180 applications

Work Makes Wealth . . . . . Profits Make Jobs

When a group of men use their brains, hands and modern machines to build a bridge, a bicycle or a screwdriver, they have created wealth. Wealth is not dollars. Wealth is only a useful, seeable, practical thing that does something for ourselves or a neighbor.

Now when there is a slight gain between what it costs to make an article and what it is sold for, everybody knows it's a profit. Is that bad? The thing is, a profit is always good.

Here's why. A profit must either be spent, reinvested or paid out in taxes. It cannot disappear. If it is spent for other goods, that means more work for somebody else—helps them earn more so they can buy more of what we make. If it is reinvested in the business it is used to finance new machinery or new plants—and that in turn creates more jobs . . . and helps reduce prices that make our earnings worth more in terms of what we can buy. Profits spent this way always come back with a profit to the workers who help earn them.

Our Communist enemies tell us to work less, to produce less, to let the government take everything including the profits. We know why they tell us that. They have been predicting to all the world that the capitalist system will fail. They want to make it fail by undermining the confidence of all of us who benefit by it.

And we can see why a Profit is the greatest protection we American workers have.

—Lamp Department

We All Have Something To Learn From Animals

You know that beavers always have one of their number on guard at every tree-cutting job that the colony undertakes, to warn the "choppers" when the tree is about to fall; that a woodchuck always has one or more extra exits from his home in the ground, just in case an enemy should creep in at the front door and try to pen him in; that alert "scouts" fly out from the V-shaped ranks of ducks on tour, to investigate a possible source of danger; that a wren will not build its nest in a bird house with an entrance large enough for other birds; that a horse will not cross a bridge that seems unsafe, and that one reason why it is difficult to get within shooting range of crows is that sharp-eyed crow sentinels warn of anyone's approach.

All of which shows that even animals, birds and waterfowl instinctively recognize the value of safety. Yet they say that 17 persons are disabled by some kind of injury every minute of the day and night, week in and week out.

Life Demands That We All Be Experts In Something

Men become expert at the things they do most often. That's only another way of saying, practice makes perfect. When we don't stop to think, we're apt to wonder at the skill of the top bowler in the shop league, the swift fingers of the assembler, the studied brilliance of the accomplished pianist. But on second thought we don't wonder. We know that the skill of every master grows from his constant practice.

Sir Francis Bacon, great English writer who lived along about the time Shakespeare was writing his plays, once tried to write a book containing all the facts in the world. He quit, because he found out that one man couldn't possibly know everything and so he wrote a book on, "How to Collect Facts." Men may be expert in one or two things: they may get skill in a few things but they never become expert in a great many things.

On the job and off, no one gets very far who doesn't work, study and practice. Life itself demands constant living, constant study and constant practice to make it the success it can be.

FROM ONE WHO KNOWS

HUGH CRANE discusses The Coal Mining Industry

NEW YORK—Soon we'll be in July, which was named after Julius Caesar, if memory serves me right, but which it seems might come to be called John Lewis month. For this is getting to be the month in which the country sits on the sidelines and watches the annual classic between the coal miners and the coal operators.

Every time this annual battle come up again I'm reminded of a machine I saw some years ago in a number of coal mines in Western Pennsylvania.

Before I describe this machine I'd like to point out that in the last 10 years or so, coal mining wages have been advanced from about $25 a week to about $75 a week.

This is about tops in wage gains in the last decade, except perhaps for farm hands, who, curiously enough, aren't organized at all.

Faces Serious Competition

But the odd thing is that the coal miners' wage gains are in an industry which is in a severe competitive jam. Other fuels, beginning with petroleum heating oil and now with natural gas, are putting a sharp bite on the market for coal. And wages are 65 per cent of the cost of producing coal.

How can the industry afford it?

This machine I'm reminded of is a coal loading machine. It is about the weirdest machine I ever saw. It is low, narrow, and about 15 feet long, with 20 different buttons and levers at the side where the operator rides it.

The machine caterpillars up to the working face of the coal, after the coal has been blasted down. And then, with two wild-swinging arms in front of it like the claws of a hysterical lobster, it gathers up the coal and heaves it over its back onto a conveyor which drops it into a waiting mine-car.

70% Mined By Machine

In 1939, say the coal mine operators proudly, only about 20 per cent of all soft coal mined in this country was loaded by machine; but now the percentage is 70.

But now comes a new machine called the Coal Miner, or Coal-Mole, which the operators are installing as fast as they can get them, which dwarfs this coal loader, outmodes a whole series of coal-mining operations, and bids fair to nearly revolutionize coal mine operation.

The best coal-mining today means this. First comes a cutting machine and slices under the coal seam. Then the drillers drill holes. Then the "shot-man" fills the holes with explosives, calls out, runs around a corner and explodes them. Then the lobster-like loader.

But the new Coal Miner will wipe out all these operations—and all these jobs. Low and narrow, but 25 feet long, it moves up to the face of the coal, and bearing in its head a band of revolving teeth tipped with cemented tungsten carbide, it rips two tons of coal a minute off the face and tosses it back into waiting cars. A little job that costs around $50,000 per machine.

It will destroy the jobs of the crew of cutters, of the drill-men, the shotman, and the loaders.

But it will also greatly lower the cost of producing coal.

Lower Costs Help Make Jobs

The lower cost will enable the mine operators to stay in business and keep hiring miners.

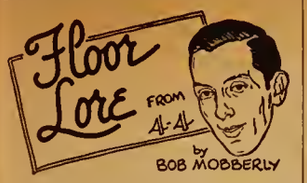
If it wasn't for the fact that the operators have been spending every nickel they could spare for a decade on such new, labor-saving machines, John Lewis with his exorbitant wage-demands would have priced bituminous coal right out of the market. People would have stopped buying coal for reasons of price and hundreds of thousands of miners would have been out of a job.

The pay-off?

Lewis and the UMW have, as a matter of policy, encouraged and never discouraged the adoption of new labor-saving coal-mining machinery.

SCIENCE QUESTION BOX

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY



Q: What is the correct scientific answer to the old problem as to what would happen when an irresistible force meets an immovable body?

A: There really is no correct answer, because the question involves a contradiction. If there were an irresistible force, then by definition nothing could stop it and an immovable body could not exist at the same time. Conversely, if there were such a thing as a truly immovable body, there could not be an irresistible force.

OUT OUR WAY

By J. R. WILLIAMS

News around the Repair and Return section is about as scarce as was the sunshine last week! . . . The very latest "Hot-Rod" enthusiast is none other than our Dorothea Swank. The girls presented Dot with a Hot Rod racer as a birthday gift last week. A belated happy birthday, Dorothea. . . . Leon Rodemaker nearly lost his trousers last week! Rod was on his way to work when he noticed his trousers sagging dangerously. Upon closer observation he found: three pipes, two cans of tobacco, a cigarette case and lighter and his wallet. What, no wooden Indian, Leon? . . . We bid farewell to Marie Hummel this week who joins the ranks of the G-E pensioners. We all join in wishing you many happy hours of relaxation that you so richly deserve. . . . Apparently Lloyd Runyon hasn't a keen sense of observation after we learned of a group of motors he rejected because of defects in the capacitor covers. At least they could send a memo to the testers, couldn't they, Lloyd, when new designs come out? . . . Nena Foster is an avid fisherman, or should we have said fisherwoman? Nevertheless, Nena was describing her method of catching night crawlers to use as bait. She merely dons a pair of gloves and proceeds to pick them up! Nena, do you wear gloves when you bait the hook? . . . What price service? After witnessing the numerous photographs with facial alterations of two of our newest members of the Quarter Century Club, Myron Evans and Arnold Bienz, that mysteriously appeared over the section, we wonder if joining the club is worth it all.

Retires After 43 Years

Elenore Plock, Bldg. 12-3, left Thursday, June 16, for retirement after 43 years of service in the Wire and Insulation division. She is shown in the foreground with Earl Gebert, her foreman, and H. E. Hire, Wire and Insulation Div. Supt. Gathered around Miss Plock are her friends and co-workers. Left to right are: (front row) Lester Faus, Lawrence Gardt, James Norris, Ralph Grider, Lora Black, Joe Balsamo, Estella Morrolf, Agnes Bensman, Dave Happel, Dorothy Baumgartner, Dorothy Lebrecht and Agnes Ryan; (Back row) Joe Kramer, Bob Martin, Chester Steinbarger, Ray Sink, George Wirges, William Wright, Jim Ward, Marie Behle, Francis Isenbarger, Ray Fisher, Adolph Schultz, Lazern Hopkins, Cleon Noyes, William Hattendorf, Russell LeBeau and Fred Zehendner.

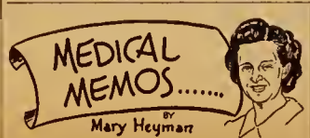
Education Fund

(Continued from page 1)

for financial aid were received, 123 from boys and 57 from girls.

Three Scholarships Granted

The awards include three scholarships of $300 each and 16 loans of $250 each under the Employees Education Foundation, five scholarships of $400 each under the Charles P. Steinmetz Memorial Scholarship, and 14 loans under the Gerard Swope Loan Fund.



The Employees Education Foundation and the various special scholarships and loans are part of the $1,000,000 G-E Education Fund.

Winners of the three scholarships under the G-E Employee Education Foundation are James E. Martin, Schenectady; Donald M. Fien, Erie, and Joan C. Quinn, Lynn.

16 Receive Loans

Along with Miss Gorrell and Mr. Hagy, other recipients of Employee Education Foundation loans are: Clement L. Boyjian, Francis L. Conway, George J. Shartrand, Jean M. Smith, Willis S. Rice, all of the Schenectady area; Carol Fulk and William T. Henderson, both of Danville; Ralph E. Brock, Niles, O.; Gordon G. DerManuel, Erie; Frances M. Kelley, Pittsfield; James A. McGill, Detroit, George H. Parker, Lynn; Robert E. Varnum, Ft. Edward, N.Y.; and Dale G. Williams, Chicago.

Gerard Swope Loans were made to: William C. Broeffle, Robert A. Clendinning, Joseph E. Czaban, William M. Ernest, James A. Gray, Robert W. Hickin, Robert W. Kelly, Robert W. Kline, John H. Matern, Carl S. Monz, Michael J. Ryan, Richard J. Sullivan, Lloyd Francis Meanor, all of the Schenectady area; and Stephen T. Engquist, West Lynn.

It would be a difficult task to search for new words to describe the beauty and grandeur of Niagara Falls. The members and friends of Elex who enjoyed the trip recently, all thought it was a wonderful week-end. The weather was perfect and the trip well-planned. What glamorous creatures we were wearing boots, raincoats and hoods, on the trip through the tunnels under the Horseshoe Falls! Our yellow outfits were colorful while we carefully inched our way on the slippery catwalks at The Cave of the Winds. "The Surrey With the Fringe on Top" became a reality and provided some transportation for a novel sightseeing tour. All those who visited the Burning Springs have a new method of washing dishes. It was quite a sight watching the glasses being sterilized with flaming water! There were some weary and bedraggled-looking individuals leaving the train at 3:25 a.m., but everyone reported a grand time. . . . Most of the people honored Fathers June 19, but Mae Mulvane. She was a trifle confused and proceeded to give Lawrence his package a week ahead of time. I'll bet he will have a grand time blinking "Gee and Haw" with the new lights. . . . Imo Jean Schwartz attended a surprise birthday party for her Grandpa Schwartz Monday night. It was his 77th birthday. . . . Bertha Schrader visited at the home of her daughter, Dorothy Parker Sunday. . . . The bass law has arrived officially in Indiana now, and Michigan fishermen are anxiously waiting for June 25. Mary Ward wrote this little poem about the Mighty Angler:

The Fisherman

Behold the fisherman; his creel,
His eight-ounce rod, his three-spool reel.
His nine pound line, his gallon flask,
His quite immeasurable task!
His eight foot boat, the four mile lake,
His dollar thirst, the penny stake,
His two-mile row, his 10 ton wish,
His 12 yard cast—and his two inch fish!

G-E Drivers Rank Fourth In Contest

With a record of .827 accidents for 100,000 miles driven, the Fort Wayne G-E fleet of truck drivers are in fourth place in its section of the 1948-49 Fleet Safety Contest.

Sponsored by the Chamber of Commerce, the contest will end next month.

The General Electric fleet is topped only by the Bellmont Trucking Company and Peter Eckrich & Sons, Inc., who have reported no accidents, and the Coder Trucking Service with .179 accidents.

Trailing the G-E drivers, nine other firms have reported accident rates ranging from 1.060 to 6.015.

Celebrates 40th Anniversary

Harl Bradley, Bldg. 4-6, recently celebrated his 40th anniversary with the Company, at which time he was presented a 40-year certificate. In the picture, Mr. Bradley is being congratulated on his long G-E service. Left to right are: J. J. Clarkson, Asst. Mgr. of Engineering, FHP Motor Div.; Mr. Bradley; J. H. Behm, Asst. Div. Engineer of the AC Motor Div.; and Harold Carter, Div. Engineer.

Business Conditions

(Continued from Page 1)

could cause a serious 'chain reaction' not justified by current business conditions."

In the various meetings conducted by the Works Manager and the Managers of the Fort Wayne product lines, general business trends, company-wide, were discussed and related to the local production and employment situation. It was explained to all persons attending the meetings that Fort Wayne G-E product lines have been forced to cut back further than average levels of production and employment for the Company during the current re-adjustment period. It was stated that this is largely due to the meeting of the abnormally high demand created by the war and immediate post-war periods for Fort Wayne motors and transformers and, in some instances, the existence of heavy inventories in the hands of other manufacturers using these products which must be converted into sales before additional new business can be anticipated. It was suggested, concerning the general business situation, that the present industrial decline in production may continue until the second quarter of 1950, but business may again reach the high level of 1948 by the end of 1951. This prediction was based on continued confidence in the industry and in the economic system on which the maintenance of high production and employment levels may well depend.

In all of the meetings conducted during the past week, all persons were urged to cooperate personally in the various cost reduction programs and other activities aimed at keeping production costs at the lowest possible level and encouraging additional sales.

Getts To Retire July 1

Charles Getts is shown receiving a send-off by John Lare, Assistant Superintendent of the General Service division. Mr. Getts, who formerly worked in Bldg. 10-1, left last week for a three-weeks vacation before retiring July 1.

Our "We wish you happiness" mat is out for Marge Kennel who will say "I do" tomorrow. . . . We should have a housewarming coming up. Jeanette Brianfalk and her husband moved in their new home last week. . . . While waiting for one of the fairer sex of our floor to hunt for a misplaced telephone bill, one of the fellows thought of something to invent. It is going to be a small gadget with a dial system. Whatever you are looking for, just twist the dial and the lost item will be tracked down for you. No fuss, no worry, nice, isn't it girls? . . . If you can't get Hershel Case to look your way when you need him, give a wolf whistle. He looks every time. . . . Did you hear a loud rumbling like the punch press section going at full speed? It was just Harold Kiel trying to think. He still doesn't know who has to pay the bet. . . . Our sympathy was with Harold Hohman when we heard he nearly passed out in a meeting. We could very well understand when we heard he was sitting next to Harry Chism smoking one of those two-for-five-cents cigars, the kind that smell like lightning hitting the glue factory. . . . Was Velma Seibt mad. She went to the phone and said, "eggs." It wasn't the Dinner-Winner program at all. . . . Mary Jane Redding tried to stop a winding steel with her forehead. We still don't know if she asked for a dispensary pass or a new tool order. . . . From all reports the girls had a fine time at Niagara Falls. Ann Robinson took her husband along for a belated honeymoon. . . . Hedy Harrison is recovering from a big blister she received from all the hiking. . . . Esther Fox is grandma again. She has a right to be all smiles. . . . We noticed Lorena Buuck with a new short hair cut—bangs and everything. . . . Reports have it that George Soule walks around with mice in his pockets. New pastime? . . . Marge Ireland must be getting absentminded. She took the wrong bus and had to have Verda Deal tell her the one to take so that she would get home. . . . We hope Ella Arn enjoyed her vacation last week. . . . Grace Jones is on our sick list this week. . . . The 562 line was a bunch of grunts and groans last week. Leona Hollis' corns told her we'd have rain. (We seemed to have plenty, too). Lowella Koogle had a toothache and didn't open her mouth all day. And Ann Kensill is still on the sick list. . . . We welcome Ruth Schmidt and Eulalia Zuber back to our floor, also Velma Smith a newcomer. . . . We're sorry to lose Vivian Tucker. She has gone back to Taylor St. . . . Several of the girls went to Waterloo to see Helen Weigle Schiffli. She said to tell everyone, "hello." . . . Let's go see Hallie Hosler. I'll bet that new 10-foot refrigerator is filled to the top. . . . Our sincerest sympathy to Larry Huffman and his wife in the death of their son.

It's possible for a man to live 200 years on vegetables alone, says a doctor. And it would seem like a thousand.

G-E Displays

(Continued from page 1)

plated ignition transformers, mounted on black velvet, revolved. A three-dimensional panel dramatizing custom-built qualities of G-E control transformers added sales impact.

Representative units of G-E oil burner motors and furnace fan and blower motors were shown in the display. Unit bearing motors were also given a prominent position. Motors shown ranged from a low of 1/500 hp for the unit bearing design through ¾ hp for the belt drive, fan motors.

G-E motors and transformers were in numerous evidence on oil-burner equipment throughout the hall.

Exhibits Boost Sales

The exhibit enabled heating and air conditioning manufacturers, distributors, and dealers to get "on the spot" inspection of General Electric motors applicable to their needs. The general public also had an opportunity to inspect and ask questions about the motors they receive when buying automatic heating and ventilating equipment.

This trade show is also one of our best means of boosting sales of ignition transformers, since it puts us in direct contact with many of the oil-heating equipment manufacturers who are hunting components to be incorporated in the fall models.

M. W. Edgar and R. A. Thompson, both of Taylor St., represented the Fractional Horsepower Motor divisions at the exhibit; J. P. Coughlin and Frank Ondrovik, both of Bldg. 26-2, represented the Specialty Transformer and Ballast divisions.

Our congratulations to George Seibold who recently received first prize for his rose garden. George, at the time of his retirement, said he intended to devote much of his time to raising roses, so that award proves it has been well spent. . . . We are happy to welcome Helen Hine Guillaume back to white armature test. . . . Ray Lepper reports a catch of 10 bass and one pike as the season opens. Can you top this? . . . The boys suggest having Paul Kennerk's grinder mounted on a turntable. They say this would eliminate the wear and tear on his neck and still keep him in position where little can escape his observation. . . . Whenever you see a couple of men engaged in serious conversation you can depend on its being either fishing or gardening. Seeing Harry Anderson and Floyd (worry-me-sick) Saylor so engaged, bystanders weren't surprised to overhear their gardening problems. Harry's trouble is his youngsters' pet rabbit which he has been unable to catch. The pet keeps the cabbage plants trimmed to the ground. Saylor's complaint is the super-abundance of potato bugs. Ed Glusenkamp had no solution for Anderson's problem, but he did suggest paris green for the bugs, although he says it's hard on goats in case there are any on the loose. At least that is what brought the one his family owned to an early grave when Ed was just a kid of a boy. . . . Al Kissinger was fortunate enough over the week-end to catch those two bass somebody planted in Adams Lake. . . . Congratulations to Mr. and Mrs. Thyral (Bud) Neu who became parents of a baby daughter, Barbara, last week. Mrs. Neu, formerly Genevieve Figel, was employed in white armature test and Bud, until his recent transfer, worked at the annealing oven.

A good provider is a person who produces the bacon and also brings home Savings Bonds.

Melvin Beucler

(Continued from page 1)

a difficult obstacle course.

An interview with Mr. Beucler and pictures will appear in next week's paper.

Fish Contest Is Announced For Children

The third annual Allen County Kid Fishing Contest, sponsored by the county conservation clubs, opened Thursday, June 16 and will continue until Labor Day. All children under 16 years old are eligible to enter the contest.

Prizes for the biggest fish caught and landed in Indiana by the contestant will be made in the following classes: Large and small mouth bass, bluegill, and sunfish, perch, northern pike, crappie and rock bass, catfish, carp and suckers, the largest fish entered, and turtle (by weight).

The fish may be registered at any of the following places: K and D Sports Shop and Wildwood Hardware and Sporting Goods in Fort Wayne; Umber Hardware, Waynedale, Huntertown Auto Sales, Huntertown; Gumpf Hardware, Inc., Woodburn; Dean Lawrence Restaurant, Monroeville; Roth Firestone Service, Grabill; Leo Hardware Store, Leo; Michael Garage, Cedarville; Don and Jack Service, Harlan and Schnelker Hardware, New Haven.

Mike Lowe, Bldg. 17-4, and Al Olson, Taylor St., are on the contest committee.

PURDUE OFFERS SUMMER SESSION

A six-weeks summer session beginning July 11 and ending Aug. 20 will be offered in the Purdue Technical Institute Dr. R. M. Bateman, center maanger, announced today.

This program includes courses leading to Associate Technical Aide diplomas in Building Construction Technology, Electrical Technology, Drafting and Mechanical Technology, and Industrial Technology.

Courses available are technical report writing, technical drawing, machine drawing, advanced machine drawing, and fundamentals of practical speaking.

The summer program is scheduled for evenings in order to allow students to obtain practical work experience while attending school.

Registration for the summer session will be held July 7 and 8 at the Purdue Center, Jefferson at Barr.

Veterans who wish to attend should make application for the Veterans Administration certificate of eligibility and entitlement at the nearest Veterans Administration office prior to registration dates in order to avoid needless confusion.

Final Meeting of Production Training Course Is Held Here

The final meeting of the Production Supervisors and Assistants course was held last week in Bldg. 16-2. These meetings which have been held each month at Schenectady, Pittsfield, River Works and Fort Wayne were open to production managers, supervisors, purchasing agents and their assistants.

The course consisted of planned discussions on proved production routines and procedures. Lectures on shop operations, supervision, personnel work, methods, material control and purchasing were given.

Those taking the course were: (l. to r., in the picture) D. A. Bartle, Fort Wayne; G. A. Mirate, Schenectady; G. T. McCarthy, Elmira; W. J. Barber, River Works; G. C. Holden, Pittsfield; P. G. Singleton, guest speaker from Fort Wayne; R. A. Woehr, Fort Wayne; A. L. Miorin, Schenectady; P. W. Sweeney, River Works; D. E. Broderick, Schenectady; William F. Newmaker, Pittsfield; Harry Grossman, River Works, and Al Swift, Fort Wayne.

Congratulations to Russell Frey. Last week was Russ's vacation and he was planning on painting his lake cottage. . . . Cleon Oyer, much to everyone's dismay, refused to make his "fire run" last Friday. . . . Mrs. Vogts has had additional duties this past week, as a housewife. She now has to clean and polish the car every night as Fritz has been driving it to work. . . . Finally Louie Botteron has his "hot rod" (a brand new 1935 Pontiac). He has overcome the high price of gasoline by adding one gallon of water. This way he has enough steam to last all day. Walt Neimeyer has offered Louie $1.50 for a tire. . . . Ora Grossman has been all smiles this week. He does have a new Pontiac. . . . Walt Neimeyer has been getting 10 miles to a gallon of gasoline, instead of nine, since he has learned to drive in high. . . . Walter Holloway (our big game hunter) did an unbelievable job when he killed a mouse last week. . . . Jim Batters is removing the paint on his house with a hose. We are now wondering if he'll paint it with a broom? . . . Anyone having any puppies that howl see Louie Hinen. . . . Summer is officially here. Luke Shorter is wearing his ice cream pants. . . . Esther Elizabeth Pauline Waldo Watson has clocks and more clocks but still comes to work late. . . . Grace Wall had an awful time getting off the bus until she heard the familiar, "step down, please." . . . Bea Hans learned you can't look elsewhere and pour coffee at the same time. She started to drink hers from an ash tray. . . . Waldo Martin likes weak coffee. How about it, Waldo? Does it keep you awake at work? . . . Alice Rogers always keeps her word. Last week when she flew to see her new nephew she told the doctor she would give her eye tooth to hold him. To her surprise the wish was granted. The doctor asked her for the eye tooth, and promptly she handed them to him (store teeth). . . . The Daisies will have a good excuse now if they lose a game. Their loyal rooter, Helen Miller, is now working second trick. . . . Stella Strong went to Bloomington to attend the graduation of her son. . . . Just a tip to our single girls. If you want the inside track with Kenny Rupp, talk midget races with him. . . . Louise Roberts was advised by Mac that her arbor would turn over if she'd turn the switch on. . . . We want to welcome Bob Hartman to our division. . . . The last report is Mike O'Grady has the situation well under control. He is now getting the normal amount of milk from Bossy.

Some of the boys would like to remonstrate against Ray Heck using company towels to wipe off his Model T Ford. Every lunch period he takes out a half dozen or so with which to wipe off the car, then brings them back into the plant. The big complaint is that some of the fellows pick up these towels to wipe off their hands and get scratched with the cotter keys and other parts that come off during the wiping process. . . . We were very pleasantly surprised one day last week when a visit was paid us by our Field Marshal Conrad Hohnholz. After an absence of more than two years, all of us were glad to see him. He is looking good and tells us that he is in fine fettle. We sincerely hope that he will not wait another decade before coming to see us again. If he does not put in an appearance within a reasonable time we will have to resort to calling him some more pet names in order to bring him to the fore. . . . Alfred "Red Snapper" Renz has just completed a course of instructions in the National School of Clowning. Being a natural in this respect he expects to join one of our major circuses within the next few weeks. Also a contract is being negotiated which calls for his appearance with indoor circuses this coming winter. . . . Clarence Stove and his son have purchased a plot of ground at Big Turkey Lake in that section known as the "Big Bog" or "Mosquito Run." They plan to have an airplane spray this swampy land with DDT to destroy the mosquito larve, then fill it in. When it settles sufficiently, they plan on erecting a year-round ranch type home of goodly proportions. Clarence said that eventually this will be the show place of northern Indiana and not only that, it will insure him of permanent winter fishing grounds. . . . Charles Sherland is truly the "strawberry king." He has a patch on his place with plants producing berries of extraordinary size. Some of them measure more than six inches in circumference. They are the most beautiful ones we have ever seen. Charley bought four of these plants several years ago, paying $2 each for them. They have multiplied until now he has a patch of goodly size. . . . We are happy to announce that Richard Braun is now the proud father of a seven pound baby boy, born this past week. Thomas Duwane is his name. From all reports mother and son are doing fine, and we take this opportunity to extend to them our heartiest congratulations. Herman Braun, Dick's dad, is also celebrating the event as it is his first time being a grandpa.

Foreman Honored At Retirement

Leo J. Miller, foreman in Bldg. 10-1, is pictured opening a gift given him by his friends in General Service. Mr. Miller retired June 1. Looking on are: Tunis Leaming, Walter Sorg, Louis Witte, William Walt, Harold Steinbacher, Howard Moore, Sam Henry, Robert Hatfield and George Dunifon.

Hi, Dad, you certainly are the forgotten man. Sorry we did not elaborate a little more in our column last week regarding Father's Day. If you were among those who read the WORKS NEWS thoroughly you no doubt noticed that only one other division editor had anything to say about Father's Day. We were of the opinion that everyone and his brother would have something to say. Especially the married ladies even if their husbands were not fathers they still had fathers of their own, and the single ladies who will some day expect that grand old dad of theirs to march down the center aisle with them to give them away to the mate of their choice. But don't worry, dad, God willing we will not forget you next year, and remember a man is still President of this great USA. Don't let them take that away from you too. . . . Have you all noticed those scratches on Roy May's face? Roy would not tell us, but we got it from good authority that he was stooping low and got kicked in the face by a coon hound. . . . We have many automatic appliances these days such as G-E washers, etc., but have you seen the latest? We mean Wimpy Lemper's automatic and folding comb, P.S. Also removes dandruff while combing the hair. . . . Our deepest sympathy to Truman Buckles, whose father died last week.

Insulation News

For the latest in modern design, see Hans Muller. It seems that now it is considered "the" thing to build the basement after the house is completed. That's not only modern, Hans, but it is also the hard way. . . . This week we say farewell to Elenore Plock, who retired after 43 years service. The gang had a potluck lunch in her honor and presented her with a gift. We wish you all good luck, Elenore, and assure you that we'll be thinking of you often. . . . If you want to know just how delicious Estella Morrolf's cakes can be—see Bill Glenn. . . . Bill Hattendorf is thinking seriously of writing a book. The title of it is to be, "Life in an Elevator." After last Tuesday, Bill considers himself an expert on the subject.

COUNT OFF

Taylor Street DIVISION 17

10-20-30

by Dorothy Hengsteler

The boys who went on a fishing trip to Lake Erie last week-end had a very good time. No one got seasick except the skipper of the boat—the fellows must have been "old salts." They are ready to go back for more but they said $20 for one pickerel is pretty expensive. . . . When George Ryan bought his new Buick he gave his son his old Ford to drive back to the marine base in North Carolina. His son got the car there okay and after he and his buddies had repaired it into tip top shape, someone took a liking to it and stole it. George is all smiles now as they found the stolen Ford and nothing was missing except the battery. . . . Glen Miller returned from his vacation this week. We haven't had a chance to ask what he did, but from the nice tan he has he must have been fishing a couple of days. . . . Dick Graham must have wanted a thrill two weeks ago. The story goes Dick turned his car end over end and when asked what happened he said a nut went loose behind the steering wheel. Dick was the nut. Dick Graham's neighbor is not to be outdone as two days later he went out and rolled his car over sideways. Dick, we hear they pay good money in these "Thrill Driver" shows, why not try for it? . . . Elvin Moser retired last Friday. We'll miss you, Elvin, so drop around from time to time and let us know how it feels to sleep late in the morning. . . . Welcome to the new girls in Ralph Keller's section. . . . Our deepest sympathy to Peggy Bandt on the recent death of her mother. . . . Our twins, Herb Richter and Ed Bandt, celebrated their birthday Friday and very pleasantly surprised us all by treating us to ice cream. Many more happy birthdays, boys. . . . We are glad to have Herman Watters back with us after being ill last week. . . . Marguerite Stahl must have her new percolator; the odor of "air fresh" has died down. . . . The group are anxiously awaiting those raspberries Charlie Engle promised us. . . . Ed Donaghy takes first prize for the biggest strawberries. Charlie gets second because one of the judges was absent at the time.

MAIN OFFICE Contents

by Vivian Bond

"If we rave about beautiful June
It rains when the paper comes out.
If we speak of the changeable weather
The sun will keep shining, no doubt.
If we sing of the wonderful Red Sox
They'll pick up on this week for a slump.
Here's a pox and a curse to the deadline
We never know which way to jump.
Oh, the woes of a rhymer are many,
Who must write a week in advance.
For no matter what subject he uses
He is taking a horrible chance.
Since its summer and the season of the roses
The chips may lie right where they fall.
While we just take a little siesta,
And write about nothing at all!"
(Thanks to E. H. Martin, River Works)

Niagara Falls again withstood an invasion by Elex. Thelma Stone, Bldg. 18-1, Flossie Greek, Bldg. 18-2, and Donna Walters, Bldg. 18-B, were among those watching the "Maid of the Mist" etc. Thelma and Flossie returned without any difficulties but not so with Donna. The story is she and Marge Murphy of Bldg. 4-6 were assigned a room together. Everything went well until they were ready to come home—their luggage was missing from the hotel. They say the bellhop took the luggage by mistake, now I am wondering if the girls just decided to leave their luggage and find the men already for a traditional honeymoon. The luggage was returned to them promptly. . . . **An Experience:** Dick Frey, Works Service Accounting Div., is a little calm after the storm of his experience. Enjoying nothing better than a named brand cigarette he proceeded to indulge. He lighted one in the usual manner and was rewarded with the usual results of a practical joker—he thought it was the cigarette that was loaded. He lighted the second one, this time walking down the aisle in his section, you can well imagine his surprise when the bang repeated. It was then he discovered that the matches were loaded. Was his face red! . . . **Have You Noticed?** We must have a Hollywood star in our midst. At least it would appear so. Ruth Fritz of Bldg. 18-1 has a new pair of sun glasses, but she wears them in the shade. We thought she might be hiding, but it develops she has an eye infection and for that we are sorry. . . . You will not need to wait until vacation for a trip to Spring Mill State Park. It is located near Mitchell, Ind., and offers all the lures of nature. The surroundings are beautiful, the hotel exceptionally nice, and, of course, the meals perfect. The old village they have reproduced is interesting from the old postoffice, apothecary and millinery stores to the grist mill that grinds out bushels of corn meal every day. The loft of the mill is a fortune to those interested in antiques, but they are not for sale! You may hike, swim, or ride to your heart's content or you may just sit and enjoy the trees. Better get your reservations in early though, lots of other people have the same idea. . . . Our congratulations to Opal Burns, Bldg. 18-1, on her birthday June 17 and to Mr. and Mrs. William Spahr on their sixth wedding anniversary. . . . We were sorry to have Agnes Fischbaugh leave Bldg. 18-1 Accounting last week. . . . **Reunion:** Saturday, June 17, was a happy day for Juanita Spice, Bldg. 18-1, because her sister-in-law, Mrs. Harry Foster, arrived from Sittingborne, England. This is her first visit in 37 years and the reunion was a happy one. . . . **Bldg. 18-4:** It is said "no news, good news," so everything must be good around this place for there seems to be very little, if any news. . . . Anyhow, if you are interested in curiosities, make a visit to the Data Bureau and see floors that react with the weather. Just now there is a hump in the center. No optical illusion, either. . . . We did not hear much about the supervisors' picnic. Understand, though, that they had six-man ball teams, which is quite rare. The lightning struck the pinball machine—putting it out of commission so there was nothing left but the card tables for amusement, thanks to an uncooperative weather man. . . . Al Tharp has some sharp camera studies of his pet dog playing with a mole. They justify merit.

When a girl's face is her fortune it usually leads into a nice figure.

John Hengsteler Retires

John Hengsteler, Bldg. 19-4, left the Company recently for retirement. On his last day, Mr. Hengsteler's friends on second shift gave him several presents. In the foreground of the picture are: Maurice Sordelet, Foreman; Mr. Hengsteler and John Fleischer. Gathered around Mr. Hengsteler in the background are: (l. to r.) Robert Palmer, Paul Gemmell, Robert Green, C. L. Schnepp, Ronald Zimmerman, Kenneth Fosnaugh, Ned Tarney, Frank Armstrong, Dorwin Stanley, Argus Ormsby, William Speith, Harrison VanDiver, Dan Knepper, Robert Pequignot, Foreman; Bob Kahlenbeck, James Harris, Howard Demsey, Herbert Meyer, Arnold Kiefer, Franklin Lebrecht, Henry Kruse, Louis Pieper, Harold Richardson, Charles Munson, Robert Reardon and Ralph Reed.

HERE and THERE in BUILDING 17-4

by Maxine Baker

"Famous Upset" — or — "The Hammock That Wasn't There." Our story concerns one Harold Moore who was enjoying lake life to the full. It seems he snagged a hammock and was all stretched out to appreciate the cool breeze and the sun on the water, when one of the other guests asked Harold for the hammock. Now Harold wasn't giving up this life of ease and remarked that he couldn't be budged, maybe not, but imagine his surprise when he discovered himself skimming over the grass without benefit of the hammock. Moral of the story: Be sure you can back up your statements or you too may be upset in life. . . . Already the first week of the fishing season has come and gone with the usual tales. Normally it takes one week after the fishing trip to get the whole truth and nothing but the truth. Here are the results as given to us and you can let your conscience guide you as to the truth of these statements. "Nature Boy" Solga got seven bass during three trips to Storey Lake. They ranged from 11 to 17 inches. He evidently is getting a discount on boat rent as he always goes to Storey Lake. "Neptune" Miller, "Pikey" Ebersole and "The big one got away" Smith went on an overnight fishing trip to Snow Lake. Results: one pike and nine bass. None of them were monsters. Miller and Ebersole didn't coach Smith very well in the fine art of landing a pike so Smitty lost the big one by trying to wind him up in a knot before landing him! . . . Gerry "Daredevil" Holdgreve proved to be the gentleman and took his family fishing. Results were five bass. All of them shared in the catching but we were told Gerry made Edna row the boat most of the time while he and his son did the casting. . . . The hard one to believe is that Don Thomas and Don Kruse never even went fishing. They really must be henpecked or something! . . . For a Father's Day present, Mr. Hanson's daughters let him take them to the lake! . . . The happy beam on Howard Brooks' face Monday morning is the result of a new Chevy in the family.

Shoaff Completes 35 Years

Ralph F. Shosff, Bldg. 4-6, has completed 35 years with General Electric. At the time of his anniversary, he received a 35-year certificate. Present when he received the certificate were: (l. to r.) James H. Oman, Asst. to FHP Motors Production Manager; Mr. Shoaff and A. J. Rose, Production Manager.

GENERAL ELECTRIC
NEWS SUPPLEMENT

Candid Camera

VOLUME 14 JUNE 24, 1949 No. 6

DUAL ROLE . . . Mrs. Sadie Scullary has been named 1949 Mother by the Chemical Department NEWS, as best representing the qualities of motherhood while contributing to industry. Mother of four children, she has been with G.E. for 16 years, does all her own house work in addition to baking, canning, raising vegetables and chickens. She is an ardent movie fan to boot. Above, she's at her job in the Pittsfield finishing section and, below, baby-sitting with four of her five grandchildren.

GAME GALS . . . With warm weather in full swing, the girls at Hanford Works prepare for keen competition ahead in softball, summer's top spectator sport at Richland, Washington. It's better luck next time for Nancy Mandell, above, as "ump" Barbara Gammon calls a strike. Catcher is Iva Tucker.

OPEN WIDE . . . Frank Ashley, of General Office, eyes his recent catch, a 5¼-pound, 25½-inch brown trout, which is the leading entry in its class in the Fishing Contest, sponsored by the General Office Recreation Council.

FIRST BIRTHDAY PARTY . . . The Electronettes, woman's club at Electronics Park, Syracuse, entertained President Wilson recently when he appeared as guest speaker at their first birthday dinner. Hester Smith, Ruthann Stubbs, Barbara Widmann, Marie Tyler and Mary Church admire gold fountain pen which the Electronettes presented to Mr. Wilson in honor of his 50th year of service with General Electric.

G-E Salesmen G

At G.E's Nela Pork a sales representative gives a lighting technique demonstration to store lamp dealers as a part of the educotional promotion. One of the most modern of lighting institutes, Nela Park provides instruction on lighting arrangements for eye oppeal to inside store displays, window trims, back wall displays, etc.

Sales Engineer F. S. Bunce, right, gives two-way radio demonstration to New Rochelle, N. Y. Police Chief Walter L. Kirchoff, left, and City Manoger R. D. Klebes.

Typical G-E salesman travels hundreds of miles Monday through Friday, labors nights on book work and orders in hotel room as shown here by W. A. Raines, Sales Engineer.

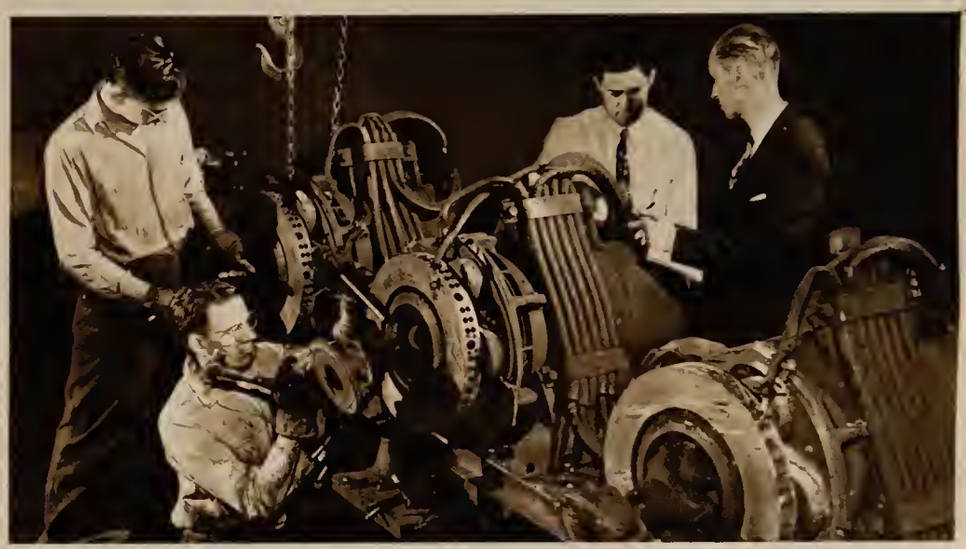
Many sales procedures demand the advice and counsel by technical men. Here a wiring detail is explained by Clarence Van Etten, left, G-E Supply Corporation wiring representative, to Leon Silberstein, President, and Richard Silbert, both of Jameson Construction Co., and Frank Hughes, construction superintendent on job.

Wherever the far-flung General Electric sales organization is operating today, our salesmen are going after the business as they never have before. For today, the first time since 1941, we find ourselves in a buyers' market and the buyer is back in the "driver's seat." The country is fast getting over the shortages of one kind and another which have for several years kept people clamoring for all the products our factories could turn out. Today we are finding it necessary to go to work to please customers, and to offer them every possible incentive to buy the things we make.

This year, General Electric is spending more money and putting forth more effort on advertising and selling than in any previous period. Our sales force, our distributors, and our dealers are out, as never before, to make the sales that make the jobs, to create that necessary business which will keep our factories and employees busy. To further help them in promoting this effort, the Company has reduced prices on product after product. Some G-E products have been reduced a second time since the first of this year. Others are almost back to the 1940 price level.

All of us can help in this effort, by turning out products of better quality, of greater reliability, and products which are more attractive to the customer. We can improve efficiency and eliminate waste so that costs and prices can be reduced even more.

Here on these pages are shown a few of the G-E men who are out after the customers' orders —the sales that make the jobs.



To promote G-E and dealer good-will, salesmen take a Saturday to trim dealer's window, as was done here by J. Abrahams, District Appliance Traffic Specialist.

o Out After the Business Which Makes the Jobs

L. H. Kirschbach, air conditioning sales representative, demanstrates the HDH miniature model air conditianing unit to J. R. Gistedt, Schwerin Air Conditianing Carp. engineer.

Service Engineers contact railroads, subways and air lines for motor repair wark, give estimates, send jobs in. At G.E.'s Lang Island City repair shop preparing complete overhaul on subway drive motors are from left: machinists G. Carba and J. Ryan, shop foreman Wm. Heim and Service Engineer W. T. Nickerson.

Sales depend on market research as shown here with ladies' plastic heels by C. M. Miller, left, market research analyst for the Chemical Dept. and shoe manufacturer's designer.

G-E Credit Carp. finances from factory to whalesaler ta dealer. Solving dealer's problem fram left: D. M. Whiting, G-E Credit Corp., Ed Hoffman of Hoffman Electric Co., Jack Lubash, wholesaler, and Clayton Dunning, G-E District Sales Representative.

Advertising sparks sales. Here G. A. Bradford, right, and H. W. Leland, Advertising and Sales Pramatian Divisians, discuss campaign for new line of G-E matars.

Fram plant praduction thraugh distributar, wholesaler and dealer, ultimate goal af all sales is placing af merchandise in the consumer's home. Waiting with expectancy af new ownership are Mr. and Mrs. J. H. Underwaod, 1449 Balltawn Rd., Schenectady, with sans, Eric, left, and Mark, painting, as Allen's G-E Appliance stare truck delivers refrigerator.

Candid Camera

LOOKING AT INDUSTRY . . . Richard Keyser, above, Assistant to the Manager, Danville, Ill. Plant, explains plant planning schedule to a group of teachers visiting the General Electric plant recently during Danville's Business-Industry Education Day, sponsored by local Chamber of Commerce.

CHOCOLATE SONGBIRDS . . . With rendition of "Rufus Rastus Johnson Brown," Herb Eatan, left, and George Hoopingarner, Fort Wayne Works, added spark ta G-E Squares Club minstrel show which played to a capacity audience.

HITS HALF-CENTURY MARK . . . At dinner welcaming more than 150 employees into Schenectady's Quarter Century Club, honored guest was Simon V. P. Stevens, left, wha has just completed 50 years of service with G.E. Walter C. Heckman, manager of G.E.'s Aeronautic and Ordnance Systems Divisions, presents him with a 50-yeor Club button and service certificate.

SHARPSHOOTERS . . . Milton Hawe, left, captain of the Rifle Club at Pittsfield Works, is the first winner of the Alden P. Healey Memarial Trophy for highest individual score in Eastern New Yark Rifle League. Jahn A. Groves, also of the Pittsfield Warks, halds plaque which local team wan far highest team scare in this year's competitian.

HOW TO BEAT THE HEAT . . . Although not designed for this purpase, a G-E hame freezer is ideal far cooling off an a hat day. At Erie Works, where G-E refrigerators and home freezers are made, Elaine Dunlovey, Susan Blackwood and Natalie Krainski danned sweaters to avaid "ovei-chilling."

Given Gifts At Retirement

Carl Kleemier, Bldg. 19-4, is pictured looking at the outboard motor he received from his friends at the time of his recent retirement. He also received a gasoline tank for the motor and a box of cigars.

Grouped around Mr. Kleemier are: (l. to r.) E. J. Schafenacher, foreman; Bill Hoel, Milo Rauner, Don Martz, Eugene Dennie, Arthur Dicke, William Jefferies, John Roebel, John Hensler, Nolan Lowden, William Wedler, Scott Click, Ed Bashop, Martin Walsh, Louis Palueszak, Lloyd Welbaum, Rufus Niblick, and Gerald Widner.

SLEUTHING in 4-6

by JOAN POOS

Odds and Ends: L. N. Nelson has been ill three days with a cold. Hope you're feeling better now. . . . H. C. Bradley has been here 40 years. Ah—that I could live so long. . . . Do you think it will ever rain? During the siege of rain I heard a radio announcer say that we needn't give the weather report, as it was just a mimeographed copy of the preceding day. . . . Last week Dick Richards was on vacation (third week, lucky guy). Dick planned on painting his house, but didn't receive any cooperation from the weather man. It seems that the week wasn't a total loss, as Dick is now driving a Buick to work. . . . Sympathy: We all extend our sympathy to Betty Puff, Developmental Section whose mother died recently. . . . Something New: Did you notice those "huddles" in various portions of the D.C. Section last week? They weren't getting ready for the kick off, only discussing how different people tie their shoestrings. About six sub-normal methods employed by human beings were discovered. The honors went to none other than Richard Heard for having the most "Out-of-the-way-method." Dick goes by way of New Haven. Other methods given honorable mention were illustrated by Wade Tyler, Ray Jones, and Ed Whipple. . . . Visitor: We all had a pleasant surprise last week when Byron Case paid us a short visit. . . . As you may have noticed this column has been quite a bit shorter lately. If you have any news I would appreciate it if you would send or bring it in to me. . . . Surprise: Juanita Schrecongost surprised the girls from payroll as she met the Elex train in Buffalo. She is a former employee of the payroll section who now resides in Buffalo. . . . Big bang: That wasn't a fire cracker you heard the other morning; it was Millie Blievernicht trying to light a cigarette. . . . Question of the Week: For what reason does Dora Holycross, payroll, want to know what time the horses get up?

TOP FLOOR TOPICS BLDG. 26-5

by WALT POHLER

As usual each Friday we hear comments from all sides, such as, do we have a column this week? And one individual remarked that he was of the opinion that they didn't want us to have any news. I wonder how many of our co-workers read Cliff Ward's column in the "News-Sentinel" several days ago in which he explained how his mind refused to come up with anything constructive occasionally and that the same thing happens to all people who write professionally. Now your editor made a statement one time that he was sure he was in the same league with Winchell and Pearson. Therefore, like all great writers his mind plays tricks on him and refuses to work. So the only way to insure a news column each week is for each individual on the floor to make an effort to contribute some news item at least every two weeks. Someone will say, "well I turned in an item and it wasn't printed." That is true in one or two instances, and the reason it wasn't printed was because it was the only item received and one item doesn't make a column. . . . We wish to take this opportunity to welcome the many new people to Bldg. 26-5 and to advise them that we will be anxious to print any item of interest they may have. Just ask any of the older people who the floor editor is and give him the item. . . . A short time ago Orval Langhor installed some peach colored tile in his bathroom. It was then decided that the remainder of the room should be painted, so, Orval mixed the paint at night and completed the job. The result is a pink bathroom. It has been suggested Orval that this room would make a fine nursery. . . . With the advent of good weather our fishermen are out in full force. However, it seems that the most they catch is a good sunburn. Not to cast any reflections on the fishing ability of any individuals, we would like to mention that Loretta Bloom came in several days ago with a sunburn which resembled a fried egg. We didn't hear how many fish were caught. . . . Some of the boys are enjoying a little game of golf after work. The first time out Mertz and Pohler collected a few pennies from Winters and Pierce. We are expecting this movement to grow as several of the other fellows have expressed a desire to play also. . . . Recently an airplane which the Navy Department is proclaiming as the largest transport plane in existence visited our city. All the Navy boys on our floor were sure throwing their chests out. However, we Air Corps fellows will have the last laugh. The Navy plane carries 182 passengers. A recent issue of the Army Navy Journal contained an article stating that the transport version of of the B-36 Bomber had just been released to the Air Corps for acceptance and that the capacity of this plane is 400 fully equipped soldiers. . . . Now remember, folks, give us the news items and our column will continue.

A Florida thief robbed a man, then gave him a ducking in a river. As if his spirits hadn't been dampened enough.

2-2 TALES

by BELLE BUCHAN

Audrey Hickernell has joined the new car club of the office and is putting the miles on the speedometer getting ready for vacation and those far away places. . . . Lucile Werling says that it was the hot weather that caused the new up-sweep hairdo. Whatever it was we hope it continues. . . . I sure am in sack cloth and ashes this week, last week I said we had no June brides. How wrong I was, and I am apologizing to Joan Seery or rather Mrs. Guy Bailey. Joan went right out and got herself a husband. The young couple are living in Hicksville where Guy is employed. . . . Pres Slack and Vance Burnau are both on vacation this week but as neither one of them are fishermen, our finny friends have nothing to worry about. . . . No that isn't a new glamour gal across the aisle; it is Laurel Weaver with her new glasses. . . . And if you don't bear from me for a while it will be because I am on vacation, good old vacation.

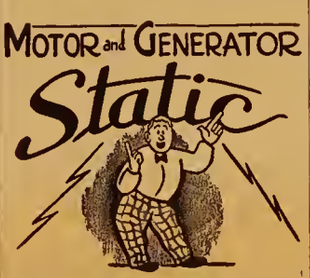
Apprentice BROADCAST

by MILDRED ELLIS

Some of our apprentices really get around since we have three day week-ends. Mr. and Mrs. Robert Zollinger spent last week-end in Washington, D.C. . . . Butcher is busy fashioning a rudder for himself. He explained that witb all this rain he wanted some means of control when his size 12 gunboats float him. . . . We have a "new look" in the bench section. Rasor must have been Central's star track man, with the speed he used in beating all the fellows to the nicest bench. . . . Incidentally our draftsmen caugbt some nice fish last week-end. Bait? Cream puffs, of course. . . . Our apprentice ball team was defeated 2-0 by St. Andrews in a practice game Sunday, but it wasn't because "roughneck" Berkheiser didn't try. He knocked the wind out of a guy trying to make first base. . . . Quoted: Bob Barnes is not talking this week (?) . . . Miller put a new top on his convertible, now he doesn't need his wife to hold the umbrella while he drives. Boots are still needed though. . . . We welcome Ecenbarger and Pugh back. . . . Frede has found a quick way of getting a job. In the middle of the afternoon a loudly broadcasted "I've got my job finished for today"—no sooner said—than a supervisor appears at your elbow with a rush job. . . . Smitty's melons are growing fast. This column will keep all melon snatchers posted on their development. . . . 'Tis the middle of June and still no report on the completion of Jack and Carl's boat. But if all this rain keeps up they should be able to float it right out of Carl's basement. . . . Since report cards have been passed out McNulty has been seen looking over the stock of brooms.

Receives Congratulatory Letter

William Wickliffe, Foreman in Bldg. 4-3, recently completed 30 years with the Company, and at that time he received a congratulatory letter. Attending the presentation are: (l. to r.) Otto Roehm, Elmer Sible, Ted Bain, William Winner, Robert Blee, Arthur Knoll, Fred Castor, Mardo Tobias, Carl Rietdorf, Ross Strodel, Martha Scherzinger, O. J. Mettler, FHP Div. 1 Supt.; Mr. Wickliffe, George Prince, Glenn Thomas, Florlan Korte and Ed Robin.



A farewell party was held in Bldg. 19-4 in honor of Carl "Doc" Kleemier who is retiring. The party started out with a bang with McFeely acting as toastmaster. Everyone was present but Doc so McFeely, who stood on the platform tearing his hair, threatened to ask someone to sing. Doc saved the day by then appearing. McFeely gave some of the highlights of Doc's career with the Company, then called on Ed Schafenacker to saw a few words. His words were few. Lowell Welker forgot his speech and could offer only a few words when he presented Doc with gifts to remember his fellow workers by. Doc invited everyone up to his cottage at Lake Gage. When the pictures were taken Ross Cohagan got so close to the camera that Walter Greiner almost broke his arm pulling Ross out of the way. . . . John Hengsteler of the second shift heat treat section retired also. He was presented with several nice remembrances by his co-workers. Among these was a wallet, a clock and a portable radio. John was appropriately impressed with this show of good will, but he was afraid that each successive package was the cigar-box with the spring in it. However, this item failed to show up, and after a few short speeches the party broke up. . . . Is John Roemer afraid to clean catfish or is he just plain mad at them 'cause they ate his nightcrawlers. He was overheard telling that his crawlers looked good enough to eat. John thinks those fins are plenty sharp so he just gave the catfish (uncleaned, that is) to a friend. . . . One thing about Bldg. 19-5 there is never a dull moment on this floor and if you doubt that statement just ask Ray Mutton. He will tell you that things really started off with a bang last Monday morning. Good thing you are calm, Ray, a nervous man probably would have jumped right over that machine. . . . We are not quite sure whether Jim Pugh was affected by the heat and was trying to use his lathe as a fan or whether he was just playing airplane but he surely gave us a thrill. Don't feel bad, Jim, that happens to most lathe men sooner or later. . . . We hear that Russell Sage would like to go fishing, but he is either afraid that he might get into the habit and couldn't get his work done or his wife has the same thought, because he has been trying to talk John Neukam into catching a mess of bluegills for him. If you can do that, Russell, more power to you. . . . Don Alcott looked as if he needed a few hours more sleep when he came dragging in Monday morning but he had a ready alibi as usual which was that he had a bad cold. It looked a lot like he had been eating too many dill pickles over the week-end and forgot to wear glasses to keep the pickle juice out of his eyes.

Receives Congratulations For Service

Earl Brandon, Bldg. 19-4, recently completed 30 years service with General Electric. He received a letter congratulating him on his long career at G-E. Attending the presentation of the letter are: (l. to r.) C. A. Brenner, General Tool Div. Supt.; Kenneth Sefton; Ed Steward, Foreman; Henry Gerdom; Jack Schemehorn; Mr. Brandon; Russell Dunten and Paul Weaver.

Thought for the Week: Never believe that you are perfect. When a man imagines, even after years of striving, that he has attained perfection, his decline begins.

The new mystery melody sounds like "The Emperor Waltz" by Strauss.

Water

The rain fell hard, the wind blew strong,
As down the aisle she tripped along.
Alas, did ne'er the fair maid think
The price she'd pay for just a drink.
She stooped to quaff the water sweet,
She pushed the pedal with her feet.
The wind increased. An aftermath
Poor Esther Dahlman got a bath.

By Jim Mitchell

HELP: The other day Jim Mitchell came to my desk, "Say I've got a gripe," he remarked. "You've got a gripe," I replied, "how about me? Last week the Inquiring Reporter called me 'Jim Mitchell' and I can't think of anything worse than that." "But don't you remember a few weeks ago through the medium of the NEWS I invited all you folks up to my emporium on Blue Lake to enjoy free movie shows Sunday evenings," Jim queried. "Yep," we answered, "so what?" "Well, you chiselers have not been coming," was his reply, "and I feel I am losing about 200 bucks a week because you don't. I am becoming despondent and morose, losing my sweet personality. Fact is I feel awful low and neglected." We squeezed out a few sympathetic tears. "James, old pal," we said in a voice choking with emotion, "we agree you are low, but we'll see what we can do for you." So, folks, it's up to you. Do you want to help drag Jim up from the depths of despair? Don't you think enjoying a free (it says here) movie on the cool shores of Blue Lake would be pretty nice? If so, come one, come all, Jim will welcome you with open arms, even dares you to come. . . . HERO: Alex Makriz, second vice president of Ed Foley's American Greeks, proved to be man of the hour recently. When a burglar attempted to gain entrance to the gun shop, Alex, hearing the breaking glass seized his trusty rifle and fired into the air, frightened the prowler away. Sez Frank Sites, "We have all kinds of burglar alarms and traps around the place, so please ask the robber not to try another break-in for a few weeks, or Alex will be a nervous wreck. P.S. Big John slept through the whole thing. . . . IT PAYS: It pays to be notorious. The publicity Art Druce gained in last week's news paid big dividends. The family appreciating his nautical trend of mind, presented him a captain's cap, complete with gold braid and trimmings for Father's Day. May your sailing be smooth, Art, and may Mrs. Druce and Mr. and Mrs. Daugherty be present to rescue you every time your ship hits a reef. . . . Your Roving Reporter.

Rounds Out 30 Years Here

Harry Kessler, Bldg. 17-1, recently rounded out 30 years of service at General Electric. At the time of his anniversary, he received a congratulatory letter on his long-time service. Attending the presentation of the letter are: (l. to r.) Marion Sprague; Frank Quinn, Foreman; Ed Kronmiller, Foreman; Mr. Kessler; Norman Bender, General Foreman; Cliff Combs, and Art Brockmeyer.

Only one ad per employee may be inserted. Each ad must be limited to 20 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday Noon, June 27, 1949

LOST AND FOUND

LOST—Package containing dress shoulder pads and foot pads. Lost in Fairfield parking lot.

FOR SALE

NINE DOE RABBITS—Four pedigreed; two pedigreed bucks. H-02314.

SIX-FOOT ELECTRICAL UNIVERSAL COOLER—H-46543.

DROPLEAF KITCHEN TABLE — And four chairs, white enamel. H-82355.

GIRL'S BICYCLE—Good condition, reasonable. 2517 Chestnut St., A-58424.

STUDIO BED — Blanket compartment, good condition, reasonable, suitable for cottage. A-50754.

NINE NEW FULL LENGTH WINDOW SCREENS—Size 55x36, never used, $2 each. H-03174.

QUART FRUIT JARS—Cheap. A-70012 after 4 p.m.

OZITE PADS—Wilton velvet rug, 9x12; table lamp. A-75442.

1940 SPECIAL DELUXE TWO-DOOR CHEVROLET—Black. Churubusco, phone 4391.

DINETTE SET—Tapestry seats, good condition, reasonable. H-90745.

SIMMONS METAL BED—And springs. A-66494.

ROLLAWAY BED—And mattress, excellent condition, sleeps two, $20. H-37924.

GIRL'S BICYCLE—H-76804.

FOR RENT

BY SEASON OR FOR SALE, COTTAGE — On south shore, Shriner Lake. Columbia City 541-L or 498.

WANTED

UMBRELLA TENT—Size 7x7. A-98212.

TO BUY OR RENT, 12x14 TENT—H-58441.

14-FOOT CARTOP BOAT—Not Plywood. A-55145.

Hodell Addresses Tech Convocation

Lisle D. Hodell, Manager of FHP Manufacturing, presented a talk at the first convocation for the summer term of Indiana Technical College Tuesday morning at the Palace Theater. His topic was "Manufacturing Engineering."

Like the old cow's tail, it seems we're always behind in our birthday wishes. This week's belated greetings are for Eileen Fitch whose birthday was June 12. . . . It's been quite some time since we've had out the old welcome mat, but comes now the time to say welcome to Barbara Meyers who is replacing cheerful Beverly Springer at the duplicator. Beverly is going to join the telegraph girls just across the hall, so we'll still be seeing her around. . . . The Elex gals who took Niagara Falls by storm two weeks ago have been displaying some brilliant camera art since most of them have their pictures back from the camera shops. The waterfall girls are Teresa Arend, Hilda Krause and Betty Millhouse. . . . Ah, with the vacation season fast approaching the age old question is beginning to arise at dinner tables and armchairs all over the country side. "Where shall we go this year, to the seashore, the mountains, or shall we just stay home and relax?" To arrive at any solution usually involves many hours of pouring over travel folders, time tables and arguments but finally everyone, sometimes everyone, agrees on just the proper spot. Then comes the waiting period, but finally the time arrives and you're off. Let's all try and make this a perfect vacation for everyone this year and remember to drive carefully and avoid leaving a tattered body or a burned forest due to our carelessness at the wheel or with a match.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

Ted Schlup according to some of his fellow co-workers is a fence builder of great ability and as a hunter he has no peer. Just recently, after building 40 rods of crooked rail fence, Ted stopped to catch his breath. While resting he spied a rabbit at the other end of the fence sitting at the foot of an old beech tree. Ted seized his gun (he always carries a gun while working in the fields to fight off hostile Indians) aimed and fired. The rabbit toppled over and as our hero ran up to the tree he noticed honey flowing from the old beech from the hole the bullet had made in the tree after completely going through the rabbit. Ted reached down to get a handful of grass to stop the flow of honey but seized the rabbit instead. This so startled him that he flung the dead animal into some bushes nearby with such force that he killed four pheasants and seven quail that had been hiding there. The best of it was that he got the honey in the tree and a new swarm to add to his other bees along with a new queen bee which incidentally he found out later, hails from Columbus, O. . . . Will Irmscher attended a big song fest in Chicago a couple of weeks ago. He states that there were at least 3000 singers competing in the contest and about 20,000 people were in the listening audience. Bill says that, despite what Frank Elder may say, he did not sing because he can't carry a tune even in a bucket. . . . Leroy Cook, for certain reasons, did not put out a garden this year. . . . Glenn Goshorn had an unfortunate experience the other Friday. He was to meet another scoutmaster from New Haven at Brouwer's station on Broadway right after work and go to the Boy Scout camparee in Kendallville. He changed into his field marshal's uniform in the afternoon and paraded around looking like a four-star general. Shortly after 3:30 he was seen waiting on Broadway. He waited there an hour until he found that the man he was waiting for couldn't go, so Glenn didn't go either. But he gave the boys in the west end of Bldg. 19-3 a treat. . . . Some people play bridge or poker in the evening for entertainment, others go to the movies, etc., but what would you think of a man who goes in for the lusty athletic sport of chasing cows? That's what Shorty Buchan does to kill the evening hours. A bit strenuous for a man of his years, but a man is only as old as he feels and maybe he feels a lot younger than we think. The truth is that a herd of cows belonging to a neighboring farmer broke a fence and invaded the premises of the Buchan garden disturbing Shorty's tranquil evening and raising the dickens with the vegetables. Mr. Buchan, in his house slippers and armed with only a flashlight, sprang to attack and led a desperate attempt to get rid of the intruding bovines. Finally after Shorty and the cows had done equal damage to the yard and garden, the farmer who owned the cattle got them out at 11:30 p.m. We imagine Buck hadn't had such an active evening in many years.

In reply to the last item in last Friday's column, it was not your division editor who didn't have her mind made up whether she was riding a horse or a pony. She knows it was a horse, and with her agrees Florence Casey and Dorothy McCoy. The persons really in doubt are Herb Jesse (and he lives on a farm, too), Chris Reiz and Frank Treece. Frank even took a poll among his neighbors and as yet we haven't heard the results, which evidently proves again that the so-called "weaker sex" is right. With Dorothy and Casey backing me up, how could I be wrong? . . . We wish speedy recoveries to George Earl, a patient in the St. Joseph hospital and to Jim Laisure, a patient in the Lutheran Hospital. . . . Birthday greetings to Ben Kissel, Al McCullough, Dallas Broxon and William Herring. Say, Vera, what happened to that paddle that you have been reserving just for birthdays? It hasn't been in evidence much these past few weeks. You aren't by any chance, saving it for a super-duper job on Fred Divelbiss who will be celebrating his birthday in the near future? . . . We in Bldg. 8-1 would like to offer our congratulations to Irene Meyers on being chosen "Citizen of the Week". . . . E. J. O'Neill, who served the past two years as Deputy Grand Knight of the K of C lodge, was elected Grand Knight at the annual election recently. . . . We are wondering where Dennis O'Connel got that striped shirt he was wearing last Friday. Just get it out, Whitie, or is that one you wear when refereeing sports? . . . And as Bob Hope said: "Today my heart beat 103,389 times, my blood traveled 168,000,000 miles, I breathed 23,040 times, I inhaled 438 cubic feet of air, I spoke 4,800 words, moved 750 major muscles and I exercised 7,000,000 brain cells. Boy, am I tired."

Carrie Menges has returned from her vacation in Canada where she did a little fishing and a lot of resting. . . . Ivan Parrish got the surprise of his life when he started to drink coffee for lunch—his wife had filled his thermos just half full, he says that she must have been too sleepy. . . . Here is a request—if you have any old umbrellas please see that Florian Korte gets them. It seems that he is collecting them. . . . Hilda Sieler's husband had their car parked the other day when someone crashed it head on and completely wrecked it. . . . Congratulations and best wishes to Wilma Krebs, who is getting married Saturday. Several of the girls are going to the wedding and will give us a full report. . . . Richard Bucher is also getting married to Phyllis Healy, Saturday at Westminster Presbyterian Church. Here's wishing you a lot of happiness, Dick. . . . Louie Clark says that he didn't go fishing last week while on his vacation. When the shop closes down that is the time he is going to Michigan to fish. From the reports he heard he is glad that he didn't go. He might not be with us today but be in jail or have had to pay a big fine like his brother-in-law did. . . . Geneva Worden is on her vacation and has gone to the lake. She will also have a birthday while she is gone, so here's hoping it will be a happy one. . . . Speaking of birthdays, that was a beautiful fishing outfit Mary Nute received for her birthday. It was the latest fashion of a few years ago. . . . Glad to see Henrietta Deck back at work. . . . We welcome Harry Meyer to 1x29. . . . There are so many changes being made in the division that we just can't keep up with them. All we can say is that to those who are leaving we are sorry to see you go but hope you will all be back with us soon. . . . We are wondering why Carl Harmon is so sad. We would like a little smile even if it is a Monday morning. . . . We have a new singer in Test and Inspection. We can hear Frank Brindle going to town, so look out, Pondo, because if you don't you are going to lose out. . . . Ted Bain, why don't you put on a hat when you go fishing and make the sun work harder to get to that spot on your head. . . . Anna Ruth Clements tried her luck at fishing in two different lakes last Sunday and didn't have any luck. I don't think you used the right kind of bait, Anna Ruth, try spitting on the worm next time they say that always brings good luck.

Employees' Store Has Large Supply Of G-E Toasters

The Employees' store has a plentiful supply of toasters despite the fact they are so scarce on the retail market, Ray Fischbach, store manager, stated today. He pointed out that the supply is limited.

There are approximately 70 Class A and 75 Class E toasters on sale in the store. Class A toasters sell for $14.85 and Class E, $13.45. Class E toasters are those that are mechanically perfect but have a slight flaw in the finish. They have the same guarantee as Class A, however.

Inquiring Reporter:

IF YOU HAD YOUR CHOICE, WHAT NEW ITEM WOULD YOU LIKE TO INVENT?

RAY H. SNYDER

Bldg. 4-3

"I would invent something useful for all mankind. I would try to invent a device that would capture and convert the heat rays of the sun in the summer months into a solid material for storage and use for heating in the winter months."

OLIVIA FRANCES PRESTON

Taylor St.

"I can't think of anything new to invent, but I think some things already invented could be improved. One item is to make all material shrink-proof, fast-colors and wrinkle-proof, so that when washed or dry cleaned the garments will not need ironing and will still keep size, shape and color."

ESTELLA M. MORROLF

Bldg. 12-3

"I would like to equip electric ranges with built-in electric toasters."

SALLY BRYAN

Bldg. 26-4

"If I had my choice I would invent a silent air-hammer. There is nothing like an air-hammer to disturb the peace and quiet of the neighborhood."

DONALD K. SHULTZ

Bldg. 31-1

"An invention I would like to make is a mechanical brain to replace the one missing in many automobile drivers."

Little Jimmy Garver,. 11 years old, certainly deserves a big hand and we're mighty proud of him too. Jimmy is Bill Garver's oldest son and we understand he has just undergone an operation on his leg which was necessary due to effects left hy polio. Jimmy has returned from the hospital in a cast and has come through the operation like a real trooper. Our sincere wish today is that the operation proves 100 per cent successful for a fine little fellow. . . . Elton Swank attended graduation exercises at Indiana University last week where his son Harold was graduating this year. . . . Was that Charlie Dunifon waving that red flag out in front of Bldg. 20 the other afternoon to direct the moving of some scrap hoppers? Or were you just trying to get the attention of the ladies that were passing by, Charlie? . . . Elmer Mesing now has a private office—all by himself, but we don't see no sense for gettin' excited about tbat. Probably all this hot weather we're having brought that change on. . . . Henrietta Walburn and Ray Quinn are leaving us today. We will miss you kids, honestly, so let us hear from you both once in a while. . . . Anyone wanting a few hours work see Skin McGary. He says that his rhubarb is getting so big that it is growing out into the road and will have to bc cut down with an ax or saw. . . . Cliff Clauser thinks that Bob Dressel is a super-duper salesman. If you want anything sold, just see Bob.

Talking about the last minute nap, we saw Edna Callow coming in late the other morning. What did you say was the excusc, Edna? . . . It is reported that Alice Lake is recuperating nicely and hopes to be back to work soon. . . . Our glamour girl, Leona Fruechte, is back on her tying job. That vacation sure did you a lot of good, Leona. You're looking mighty fine. . . . Red Morgan claims the new golf course is proving a success. How many putts do you wield, Red? We'll be over someday for a few lessons. . . . We will see Berneice Miller back in three months. She is now on our sick list. Hope you get well soon and feel your tops when you come back on your job, Berneice. . . . Al Schneider, of the tool room, is working in both plants. He's looking much huskier after several wecks off work. . . . Mike Kimble is able to be around some. He's been sick for sometime. . . . To our latest list of sparklers we see Annie Ivetich sporting a beautiful platinum mounted ring. You are a lucky girl, Annie. . . . At last Oscar Teeple did it. He is donating a little for our news. We spotted him heading for the dispensary. He injured his thumb, nothing serious, just a slight concussion of the epidermus. . . . Jokes can backfire but this time Annie Moyer's whistling did likewise. Let this be a lesson to you, Annie. . . . Happy birthday, Cecelia Noonan. How does it feel to be a year older. You're looking younger each year. . . . Warning to Mr. Omlor and Mr. Gillig, slivers are very sharp and may cause painful injuries. Both are going around with the index finger on the left hand bandaged. Both claim to have received said injury at same place and almost same time. . . . Who has more trouble than Dave Embler! It seems he is always falling over something and cutting his leg. And if you are wondering why Dave doesn't wear the corduroy hat to work anymore, the reason is—too small since worn in the rain a couple of times. Owner now, Junior. . . . That's quite some hat Frank Braun has, but we hear when he goes fishing he always forgets it and has to borrow a hat. How about that, Braunie? . . . That was a nice rain we had and by the looks of things George Buckley may lose his bet with Mr. Welch. . . . Take note girls!! The GeCode Club is having a picnic June 29 at Clem's Lake. A good time is planned for all.

Serves Company 35 Years

Herbert Richter, FHP Div. 17 at Taylor St., recently celebrated his 35th anniversary with the Company. At that time a number of his friends gathered to congratulate him. In the picture are: (l. to r.) Clyde Helms, Foreman; Ed Donaghy, Mr. Richter, Harry Todd, Charles Engle, Edward Bandt, Melvin Riley, Hillard Moore, B. B. Gausepohl, General Foreman; and Ralph Hare, Asst. General Foreman.

HANDICAPPED OWL TEAM WALLOPS ECKRICH, 22-10

With only eight men on the field, the G-E Owl softball team won a wild game from Eckrich by the score of 22-10.

Paul Boyer did the chucking for the Owls with Greeno behind the bat. The Owls picked up 11 runs in the first inning and just coasted the rest of the way.

Bob Crosley returned to the second shift and the Owls. He made a couple of dandy catches in left field.

The Owls have won three and lost two games this season.

Boxing Matches Held Every Friday Night

A series of boxing matches are being held by Frank Newport, Bldg. 19-1, every Friday night at the Clinton St. arena. An admission fee has been adopted to cover expenses for the Friday night bouts, in which young boxers of the Fort Wayne area have been invited to take part.

Pick-Ups
FROM 26-3
By Mabel Odel

The winning title was submitted by Lawrence Schuster, and being a big hearted guy he is donating the prize money to charity. I just saw a calling card from the police department, "One head light, no tail light." Congratulations, Lawrence, on the title, I mean. . . . Hollywood may have its "Boy With the Green Hair," but we have our George Brehm with the green ear. The circle was the size of a telephone receiver. . . . Marie Johanns, Mary Wiedman and Helen Wagner went on the Elex party to Niagara Falls. A good time was had by all, but we haven't gotten the lowdown on it all yet. . . . We welcome Homer Huffman and Earl Sweeney. . . . If any stray dog needing a square meal could find its way to Bldg. 26-3, it would be fed by Mary Williamson. . . . Mary Cordell painted her car. She blamed the rains for her having grass of the same color, but we hear she is a wicked wielder with a paint brush. . . . If you see anyone in your backyard with a flashligbt, don't shoot the gal. It's only Martha Hamilton sneaking up on night crawlers. . . . Francis Leach is burning up the highways these days with her new Buick. . . . What a drawing card in this hot weather. LaVonna Porter is still bragging on the fish she caught. Garnet Currie tells LaVonna that they were the size of tbe bait she uses. Could soon find out, LaVonna, by hanging up a bait sign. . . . Dorothy Whan and Vera Hoover are the Campbell twins—it's soup every noon. . . . Lonnie Rockstroh is losing slcep lately. He is making it in to work 20 minutes earlier to avoid the last minute rush. . . . The rains can do the darndest things. That cutc little number under a green umbrella was Les Parrish. . . . Since Ruth Freeland has moved to the country that air has done wonders for her, or could it be she is getting more slecp. . . . Wanted: A cooler system for Nancy McCrea. She is supposed to bake coils, hut she gets to that point first. . . . Congratulations to Bud Miscr. He owns two pairs of shocs, but it did look rather out of place when he wore one of each to work proving it to us. . . . We also congratulate our new grandmother, Martha Doehrman. . . . We wonder if Frank Clibon could repeat word for word what was said the other day when he was making a set-up on a winding machine. . . . A little birdie told us that Johnnie Collins will be married soon. It didn't tell us how soon, and Johnnie won't say. By the dreamy look, we wonder if it will be a June bride? . . . We are sorry that Garnet Currie had her car stolen, and hope that she may soon recover it. . . . We wonder if Joe Wiehe really gets all the easy jobs, or does he just have the knack of making any job look easy? . . . Lola Brunner and Thelma Loveless are both living in new homes and they're giving thanks for this sunny weather. Their stories sound like nothing less than a steam shovel would be able to get you to their front doors. . . . We'll keep this quiet, but Vivian Fleckenstien is fixing her shoes. If a shoe cobbler reads this, we are only fooling. It was an emergency and the tape she used would only last a day. . . . Theoda McCarver says that "Rosie the Riveter" Peggy Reynolds is nearly driving her out of her wits. We wonder if it is the melody or the riveter.

Office Offerings

The poor firemen just don't stand a chance when Chris Starke is near a fire. The story goes like this: A fire alarm was turned in and several units answered the call. Chris heard a woman scream that her house was on fire, and he also answered the alarm. The house was soon surrounded by firemen ready to do their duty, and out came Chris, head high and chest thrown out, to inform them that their services weren't needed that he alone had done the job. . . . Superman Jim Wellman is also a little helper. He was up early one morning and noticed the neighbor boy's little pony standing on the highway. That just wouldn't do, so he went out to get it out of danger. He pulled and tugged, but it wouldn't move. He went to the other end and pushed and shoved. Still it wouldn't move. Now this part we would have to see, but he says he finally picked it up and carried it in. . . . Therese Lindenberg is the only one that gets anything done in her neighborhood on Saturdays, and this is why. She washes windows in her halter and shorts, and all of the neighbors just take time out.

Every Monday morning there are several people that come in to work with a new crop of sunhurn acquired over the week-end. This week the first prize was won by Marg Stodgell. Everytime someone got near her, she made very sure they stayed far, far away from her back. Marge, won't you ever learn! . . . Louie Shattuck looked a little like a cooked lobster Monday. He said the next time he wouldn't let Hugh Neely talk him into that last nine holes of golf. . . . We were all very happy to see Paul Horstmeyer back at his desk last week after being on the sick list for some time. Nice to have you back, Paul, and glad you are feeling better. . . . Have you ever tried to check anything in the bus station for two weeks on one dime? Thelma Stapelton did and it didn't work. She found that when she went to get her umbrella out of hock, the charge was $2.10 and was she surprised. They always say you have to learn the hard way. . . . Happy birthday to Dick Pinkham today. See, Dick, you can't keep a secret from us. . . . I want to apologize to Mr. Neely for not having an item on his recent fishing trip on Lake Erie in the column last week. But, Hughie, I really didn't know what to say, because I didn't know which story to believe. All the boys in the party told a different story and you never gave me the straight of it. Did you really catch anything, or was that lone clam you brought home all you had to show for your trip?

Majors Win 7-4 Victory

The Major softball team beat the Food Machine team, 7-4, in a game played at Memorial park Monday, June 20. This game was originally scheduled for May 19, but was rained out.

G-E did not score until the third when Stanski led off with a walk, while Baals singled. Yarman fouled out to the catcher and Morkoetter hit the circuit for three runs.

In the fifth inning, four more runs were scored on an error, walk, two singles and two doubles. Lawson led the hitting with two doubles, and Fieldheiser with a double and a single.

Food Machine scored all their runs in the first on a single, walk, fielder's choice, error and a double.

Line Score:

	R	H	E
Food Machine ..... 400 000—4	3	2	
G-E ..... 003 04x—7	9	1	

Schild, Brower and Barfell; Waltke, Fieldheiser and Baals.

VOLTMEN
Home Schedule

Tuesday, June 28—
St. Joseph Auscos

All games are scheduled far 8 p.m. in Dwenger park.

TOUCHING THE BASES

by Walter Histed

With Lefty Ververka assuming the hero's role, the Benton Harbor Buds ended the Lafayette winning streak at seven games. The Buds won 5 to 4 at House of David park.

The game, which had been a tight pitcher's duel between DeLion and Morris for six innings with the Red Sox leading 1 to 0 changed complexion in the final three frames. Lafayette picked up a second run in the seventh; but in the home half, Eddie Jabb drove out a long home run with Billy Leach on base to tie the score. In the top of the eighth the Red Sox again drove to a two run lead on Vic Mettler's single, Felix Mackiewicz's double, an infield out, and an outfield fly. In the home eighth, Ververka batted for Morris and drove a home run over the right field fence. With two out, Phipps walked and scored on singles by Norm Snyder and Hank Richel. Herring replaced DeLion on the mound and retired the side with the score tied.

Ververka retired the Red Sox scoreless in the ninth and then in the home ninth with one out he doubled off the screen in right field. Disdaining the strategy of filling the empty base, the Red Sox board of strategy decided to pitch to Todhunter, who had been hitless all evening. Todhunter promptly broke up the game with a clean single to left center field.

Line score:

Lafayette	000 001 120—4	5	2
Benton Harbor	000 000 221—5	8	2

DeLion, Herring and Hixson; loser, Herring.
Morris, Ververka and Young; winner, Ververka.

Auscos Blast Studebakers

The Auscos broke a four game losing streak by whipping the Studebakers at Edgewater Park in St. Joseph, 11 to 3. A seven run, third inning sewed up the ball game and allowed the Auscos to withdraw their ace pitcher, Mack Stewart, at the end of six innings to save him for the Benton Harbor game Saturday night.

Line score:

South Bend	000 100 101— 3	8	2
St. Joseph	107 201 00x—11	11	3

Defeats Benton Harbor

The Cubs, behind the steady pitching of Jim Wallace, stopped the Buds at Ames field in Michigan City last Sunday night, 4 to 2. The Cubs only secured five hits from the offerings of Morris and Ververka, but included in the assortment was a double, triple and home run.

Line score:

Benton Harbor	001 000 010—2	7	0
Michigan City	210 010 00x—4	5	1

Morris, Ververka and Kovach; loser, Morris.
Wallace and Hofferth.

Lose to Auscos by Forfeit

After one of the noisiest and juiciest rhubarbs in the history of the Michigan-Indiana league, the Studebakers stalked off the field at Edgewater park in St. Joseph. The game was forfeited to the Auscos by the umpires.

South Bend was leading at the time of the trouble, 4 to 3, going into the home sixth. Lefty Lee walked Kennedy and Shilling sacrificed. Fiore was safe and Kennedy advanced to third when Scott juggled a grounder, making one out with runners on first and third. With Westerkamp at bat, Kennedy started for the plate on a squeeze play. Lee stepped off the rubber to throw home, but Westerkamp hit the throw and then the fun began. When the argument was at its height, Umpire Lou Nemeth ejected Manager Scott, Pitcher Lee, Catcher Morgan and First Baseman Humay from the game. The Studebakers not having enough replacements, the game was ordered forfeited. Before this point of the argument, Manager Scott had served notice that he was continuing under protest.

Buds Again Clip Auscos

The Benton Harbor Buds, formerly called "Bushers" in St. Joseph, belied the title for the third time this season at House of David park as they defeated the gold-plated Auscos, 6 to 3.

The game had been promised as a stellar-pitching duel between the aces of the respective teams. Lefty Ververka, for the Buds, and Mack Stewart, for the Auscos. While Ververka was not in his usual form, giving up 13 hits, four walks and hitting a batter, he did not have to be in top form after what he and his team mates did to Stewart in the second inning.

The Auscos needed three hits to score a run in the first. Then they wasted two more hits in the second before the Buds stepped up to show their plutocratic rivals how to use hits to good advantage. Joe Mack, a former Ausco, opened the Bud second with a drive over the fence. Richel singled and Bill Leach drove out a long double to score Richel. Eddie Jabb singled to tally Leach; Kovach singled, but Jabb was caught trying for third. Ververka then stepped to the plate and rifled a home run over the right field fence to start Stewart on his way to an early shower.

The Buds scored their final run in the fourth, with Katz pitching for the Auscos. Manager Kennedy dropped Ververka's fly for a two base error, after which Todhunter singled to score the run.

The Auscos scored their final runs in the seventh on Logan's single, a double by Bobby Winters and Ross Jones' single.

The game was enlivened in the eighth when George Logan and Westerkamp were expelled from the game for protesting a decision at first base—some little matter of putting hands on the umpire leading to their being thumbed from the game.

Line score:

St. Joseph	100 000 200—3	13	1
Benton Harbor	050 100 00x—6	11	2

Stewart, Katz and Westerkamp, Shilling; loser, Stewart.
Ververka and Kovach.

Rambling Notes

Jerry Kuhn really started something in his column "Just Browsin' Around" when he referred to the Benton Harbor Buds as a team of "bushers". Bud Shiveley did not waste any time in getting his answer into print. He has now dubbed the Auscos as the aristocracy of the M-I league, the self-styled princes of the circuit, and the blue-bloods. He wonders if the Buds are bushers, just what shrub is small enough to describe the Auscos who have now gone down under the bats of the Buds eight times in 10 tries in the last two seasons.

* * *

The Buds have acquired strength since appearing in Fort Wayne. They signed Joe Mack who played so ably for the Auscos last season. Joe responded by driving out a home run in his first time at the plate against his old mates. The Buds have also plugged the glaring weakness at short stop by signing Emil Nascak, who appeared here last year with the Kenosha Red Sox. This has allowed Bill Leach to return to third base, Kovach to resume his back stopping duties, and Eddie Jabb to go back to right field.

* * *

The rhubarb at St. Joseph on Sunday night just serves to show again that the quality of umpiring in the league this season is way below what it has been other years. Hardly a club in the league is satisfied with the calling of the arbiters. A prime example was shown here last Friday night when the Ausco right fielder dug under a fence and pushed the ball under to rob Stramm of a triple or possible home run. He freely admitted the act after the game, having correctly figured that the umpires were not on their toes enough to detect him in the act.

* * *

A careful look at the Voltmen will disclose that of the team that finished the season last year as national champions today only Olin Smith and Hugh Orphan are still present. Charlie Shipman and Hank Doehrman also played some with the Voltmen last year. Orphan has been a big disappointment to Voltmen followers this year at this writing, having failed to win a single decision and also showing poorly in relief roles.

Chicago White Sox To Meet Voltmen In Exhibition Game

The Voltmen have been assured that the complete squad of the Chicago White Sox, except for one player, will be on hand for the game to be played Tuesday night, July 12, at Dwenger park, C. W. Wilt, G-E Club president, announced today.

The only player not likely to appear here is Cass Michaels, who is leading in the All-Star Poll to play in that game.

Tickets for the exhibition game here are available at the G-E Club. Orders may also be placed by phoning C. W. Wilt, Ext. 742, or W. W. Allen, Ext. 419.

St. Joseph Auscos Down Voltmen, 12-11

Relief Pitcher Hits Two Homers In Thrill-Packed Game Last Week

By Walter Histed

The St. Joseph Auscos nosed out the G-E Voltmen, 12-11, in a high-scoring, see-saw thriller last Friday night at Dwenger park.

Relief Pitcher Flanagan, of the St. Joseph Auscos, broke the Voltmen's hearts. He hit his second home run of the evening to score what turned out to be the winning run, with two men out in the top of the ninth.

The Voltmen went into the ninth with a three run lead and Charley Shipman pitching good ball. Then, after Charley walked Winters and Kennedy, Manager Braden saw fit to take him out and put Hugh Orphan in. Hugh got Jones and Schilling, but pitched too carefully to Nowak and lost him. Then Westerkamp singled to send Kennedy home.

Even then we were not too worried inasmuch as Flanagan had struck out the previous time at bat. Who ever heard of a pitcher hitting again after already hitting a home run? But he did, and the Voltmen trailed 12-10, after retiring Schultz second to first.

Bobilya led off with a single in the ninth, followed by a SO by Miasek and a flyout by Southworth. Then Cary worked Flanagan for a walk to keep it going. Henry Stramm then stuck out his jaw and hit the ball he liked over second to score Bobilya. Carl Kennedy then decided that Flanagan had lost his touch so called his ace, Mac Stewart, in to quell the uprising. Fran Green hit the ball hard, but Stewart snared it and tossed him out to end it all.

Stramm's long two base hit to the right field corner was one of the prize manipulations of the game. Wally Nowak of the Auscos chased the ball to the corner, then started hunting wildly for the ball as Stramm rounded third and started home. The umpire went out and looked, then declared it a ground rule double. Spectators in right field say Nowak went after the ball in such a way that they were not sure whether he was hunting it or hiding it.

It should be noted that the Voltmen played errorless ball. Particularly notable was Olin Smith's great stretch to retire Schilling on his drive to deep short which Henry Stramm fielded sensationally. Our new shortstop's play cannot be praised too highly; he goes after everything and gets more than his share of balls tagged for hits. He has got the rest of the infield playing his kind of ball too.

Box score:

M-I League Officials Reprimand Owner of Michigan City Cubs

The Michigan City Cubs owner, R. D. Austin, was reprimanded for infractions of several rules in the Michigan-Indiana league, when officials of the league met in a special session Saturday at South Bend.

League President Gordon Graham of Lafayette, after listing the charges, warned Mr. Austin that while no immediate action would be taken, a heavy fine would be levied if the infractions continued.

M-I officials were also notified of the uncertain financial status of the South Bend Studebaker team. The Studebakers, in reviewing their case, stated that they may have to disband if financial help wasn't given. The league adopted a motion that if the South Bend team should withdraw from the league, it should give seven days notice. With seven days' notice the $1,000 forfeit fee would be returnable.

G-E GOLF

By Hugh Dubdit

The casualty rate on first place teams in the Monday evening group is rather high. In four nights of play there have been four different teams lead the group. After Monday's play, the Dark Horses took the lead with 18 points. The Lost Balls are second with 16 and Apprentice third with six. The last place team is only 33 points out of first place. Nick Smoley chipped out of sand traps into the cup on two holes to card a 39. Bob Hanna turned in a 40 and Mauri Cox shot 41.

Since Brookwood is laid out to favor right-handed golfers and all the tees have downhill lies for left-handers (according to George Hoopingarner) anyone knowing of a good left-handed golf course, please contact George.

In spite of what looked like bad weather Tuesday night, the game went on and the Nineteenth Holers got a better hold on first place by picking up seven points from the Forty-niners. The leaders now have 24 points. Optimists are second with 12 points and Divot Diggers are third with seven. Red Braden, Bill Kayser and Carl Anderberg came in with 40 and Dick Tobias shot 42.

The Winter St. group lost to Old Man Weather last week.

Cause and Cure

Two Conflicting Theories of Recession and Indicated Course of Action Outlined

By LAWRENCE FERTIG
Writer on Economic Affairs
New York World Telegram

There are two conflicting diagnoses about our present economic ailment. The prescription we take will depend upon which doctors we follow If we follow the wrong doctors, we may wind up in a much worse state than we are today or will be during the next year.

The first diagnosis is well represented by the President's favorite economic adviser, Leon Keyserling. He is one of the foremost followers, in this country, of the British economist, Lord Keynes. Keyserling and the Keynesians think that the present recession is caused by lack of "purchasing power."

They think this recession is basically concerned with the subject of money They want the government to see to it that the total volume of money flowing into the hands of consumers is increased. Their analysis doesn't concern the question of prices being out of line or production being inefficient or values offered to the consumer being bad. Keynesians always think of solving every problem in terms of money. They are natural inflationists.

Pump Out More Money

In recent speeches before the CIO and AFL, Mr. Keyserling advised the unions to be "militant" in pressing for higher wages. Despite the fact that the public refuses to buy more shoes, more textiles, more rubber goods, more electrical appliances now, because their cost is too high, Mr. Keyserling advised the cost of production should be increased by raising wages.

In the second place, he advised "stabilizing prices." In other words, he doesn't want to see the necessary adjustments take place in the economic structure. Even the public is balking at high prices, but Mr Keyserling wants to keep them there.

Also Keyserling suggests that it would be "upside down" economy to cut government spending now. As a matter of fact, he wants to increase government expenditures for many new government benefits to certain groups of our population.

In effect, Mr. Keyserling wants to pump more money into the system despite the fact that personal income, at the rate of 213 billion dollars annually, is not far from the average of 1948, and despite the fact that a recent Federal Reserve Board survey indicates that it is not lack of money in consumers' hands, but unwillingness to pay excessive prices that is affecting business.

Mr. Keyserling also said recently that when business orders fall off, that is no cause "for concern or . . . for reducing employment and production." According to him, business ought to go on producing goods which the public doesn't want in order to keep employment high.

So the Keynesians want to increase the flow of money, increase wages, increase the cost of production, increase government spending, and thus, to get us out of recession. They close their eyes to the fact that such a policy would bring us to the brink of a new inflationary disaster.

A very large and responsible group of economic doctors advise the opposite course of action. Their point is that this recession is mainly one that concerns prices and the cost of production. Due to the recent inflation, when the total supply of money was tripled, economic factors got out of gear.

Cut Budget, Taxes, Costs

During the shortage period no price was too high. Now business must adjust itself Management must throw off its slothful ways and become more efficient. Workers must produce more during the same working hours. Corners must be cut in every way and prices must be brought down or the consumer will not put up his money. The volume of business will increase as the values offered to the public improve.

Government can aid by reducing its budget so as to decrease the load upon taxpayers. The tax system should be revised, doing away with the double taxation of dividends and liberalizing the depreciation schedule. Thus more money will flow into profitable industry and increased production. In other words, we must improve the methods of production, decrease the cost of production and induce investments in increased production.

The above New York World Telegram article has been substituted for the message usually appearing here, because Mr. Fertig has so clearly presented the two conflicting views of the current difficulties.

FORT WAYNE WORKS
NEWS

Volume 32 | FORT WAYNE, INDIANA, FRIDAY, JULY 1, 1949 | No. 26

Voltman Game To Feature Aerial Fireworks Display

A gigantic display of aerial fireworks has been arranged by the G-E Club for Saturday night, July 2, at Dwenger park immediately following the Voltmen vs. Lafayette game, C. W. Wilt, G-E Club president, announced today.

The aerial pyrotechnical exhibition will feature colored aerial sprays, roman type candles, sky rockets and aerial bombs.

G-E Club officials are expecting one of the largest crowds of the season.

The game promises plenty of fireworks, as the Fort Wayne-Lafayette feud is one of the hottest in the M-I League. Al Hazel, former hurling ace for the Voltmen, and Chuck Bobilya, former Red Sox baseman and now playing right field for the Voltmen, will add more fuel to the already flaming rivalry.

Elex Second Shift Schedules Outing

Second shift members of Elex will go to Pokagon State Park Saturday, July 9, for an outing. They are to meet at the Indiana bus station, corner of Jefferson and Harrison streets at 9:30 a.m., and will return to Fort Wayne about 6 p.m.

The girls are requested to bring their own lunch and table service. With the morning free, the afternoon will be spent playing games.

A 25-cent reservation fee must be paid by Wednesday, July 6.

Sales Manager Stresses Need For More Orders

Marketing Conferences Point Out Relationship Of Sales To Employment

"Keeping our factories busy and the maximum number of people possible on our payroll is one of the main objectives of the Department's field sales force," C. H. Lang, Vice-President and Manager of Sales for the Apparatus Department, said recently in a discussion of the Marketing Conferences which were held at New London, Conn., June 6-8 and 9-11.

"At the Marketing Conferences, managers of our 135 sales offices, together with key sales engineers from every part of the country, were told of the need for more and more orders and what we all have to do to get them," Mr. Lang continued. "The reaction of our sales office managers and sales engineers to this need for increased sales activity was gratifying. They

Survey Of Employees Reveals Favorable Reactions To Informative Conferences

NEGOTIATIONS RECESSED

A request by the UE-CIO that negotiations between the Union and G-E be recessed until July 12 was agreed to by the Company.

The employee-management conferences held last week were well received, according to results of an informal survey conducted among employees in all divisions of the Fort Wayne Works.

The general feeling was that these meetings helped considerably in creating better employee-management relations and in bringing about better understanding of the production and employment problems facing industry. Very frequent comment was to the effect that more conferences should be held.

The few unfavorable comments included: "Too much time was devoted to the over-all Company picture and not enough to local information"; "too many figures made it confusing to the listener," and "not enough stress was placed on the individual's job and his future."

The following are comments selected at random from the various divisions:

Questionnaire For Readers To Be Included In July-August Issue Of "Adventures Ahead"

Young subscribers to Adventures Ahead, General Electric's bi-monthly magazine for teen-agers, will have an opportunity to tell what they enjoy most, how helpful they find the magazine, and supply the answers to other questions asked in a questionnaire which is part of the July-August issue. That issue will be distributed through the mail soon to children and friends of employees at the Fort Wayne Works.

Because July Fourth is just around the corner, the forthcoming issue of the magazine is devoted to patriotic and historical features. By means of the camera lens, young readers will be taken on a tour of historic spots in Philadelphia, among them Independence Hall where the Liberty Bell is displayed. They'll also read of a young Scotia, N. Y., Girl Scout, Carol Snyder, 16, who presented a flag to the Freedom Train.

Continuing their "how-to-do-it" features, the editors have prepared three such articles for the July-August issue. One tells how to place and make lamps that give you the best possible light for studying. Comic book-type figures illustrate the article and help point out the methods written about by Mary E. Webber, Nela Park home lighting specialist. The second "how-to-do-it" feature is titled "Pleasure and Profit in Plas-

New Industrial Hygiene Equipment Is Purchased For Medical Section

Duane Stroud and Dr. H. W. Garton are shown examining some of the newly-acquired equipment.

Industrial hygiene equipment amounting to $2,500 has been purchased by the Fort Wayne Works, it was announced today by Dr. H. W. Garton, Works Physician.

Following an Industrial Hygiene survey of the Fort Wayne plant by the Metropolitan Life Insurance Company, Dr. Garton recommended the purchase of this equipment for follow-up work in this field. Over a period of a year and a half, the equipment shown above has been accumulated for use in the medical section.

21 Members Of Advanced Engineering Program Receive Diplomas At Commencement Exercises

Members of the Fort Wayne A-Course in the Advanced Engineering program are shown above. Back row: (l. to r.) James H. Capps, James A. Walley, Robert C. Thor, Mitchell Nasser, Glenn Walters, Arthur F. Ordas, Donald P. Spalding, Jr., and M. Wilson Sims, Supervisor of the course.

In the center row (l. to r.) are: William F. Dripps, Robert R. Berghoff, Paul H. Baker, Benjamin G. Walker, James R. Burton, William H. Hoefer, Curtis D. Cockburn, and Frank D. Olney, Jr., Supervisor.

Seated (l. to r.) are: Henry Lehmann, Howard E. Gerlaugh, Thomas D. Turner, Charles E. Strecker, John L. Oldenkamp, Carl E. Paul, Robert L. Winchester, and Robert H. Johnson, Supervisor.

Commencement exercises for the Fort Wayne A-Class of the Advanced Engineering program were held Tuesday afternoon, June 28, in the private dining room, Bldg. 16-2.

K. B. McEachron, Jr., manager of the Technical Education division, presented diplomas to the 21 members of the class.

The main address was given by C. H. Linder, assistant manager of Manufacturing for the Apparatus Department. Gordon E. Walter, Administrator of the Advanced Engineering program, acted as master of ceremonies.

The A-Course, the first of its kind presented in Fort Wayne, was administered by the Technical

Don Campbell.....Editor

OUR PROUDEST DAY

United States will celebrate its proudest holiday Monday when citizens of every state and every territory commemorate the founding of a great nation. On this day, American citizens no matter where they are will rejoice that our liberty has been maintained through the years.

Actually the independence of our country was inevitable. Any groups of people possessed of the stamina and courage to carve out an existence in the wilderness of Virginia or on the rocky shores of New England would certainly hand down to their descendants a lasting desire for freedom. Following these original settlers many others who sought to exchange oppression for freedom and religious persecution for tolerance came to our country. In our day and generation the descendants of those early settlers have married the freedom-loving pioneers from all nations, leaving our nation the only one of its kind in the entire world.

In this age when some nations are veering toward socialism and others to communism we may well be thankful that we still enjoy freedoms which have been banished in lands where there is no free enterprise or individual liberty. Each of us has the right to work in the job of his liking; each may improve himself through advanced education; each of us retains the right to vote for the man of his choice; each may worship as he sees fit.

There is every reason to celebrate this Independence Day with parades, fireworks and flag-waving, but during the celebration it might be well to give some thought to our independence and the small group of men who wrote the Constitution at great personal risk so that we might enjoy the freedoms so dear to us today.

Let's Take The Buttons Off All Our Coatsleeves

As we read history, we cannot help but be aware of the fact that man keeps old customs which have lost their significance. Buttons on our coatsleeves for example, placed originally on the coats of soldiers to keep them from wiping their noses on the sleeve. We still keep them, serving no useful purpose except to keep wives and tailors busy sewing them on when they come off.

In our Company we have an institution called the Suggestion System which is a sure way of bringing new ideas to the front, of abolishing old customs which have become useless. The tremendous increase in the number of suggestions made throughout the Company for the first quarter of the year makes it certain that our people do think about their jobs and do suggest better ways of doing them.

We should make increasing use of the System and bring our ideas right out in front to be looked at. True some of them won't be used, but a large share of them will find a place. Let us always keep forging ahead. Let's take the buttons off our coatsleeves and find the Better Way.

A Three Month Vacation Spot Without Leaving Fort Wayne

One of the best ways to spend the hot months of the summer is at a cottage at the lake. If you can't spend the entire summer in a vacation place where you can swim every day, the local YMCA has a good suggestion. Their pool is open every day from 9 a.m. to 9:30 p.m. and you are invited. Their all-tile swimming pool has just received a complete overhauling and the new filters, recently installed, guarantee water of crystal clearness.

There is nothing so refreshing as a shower and a dip in the pool at the end of a day's work or on a week-end. You can swim every day and get some of the advantages of a cottage at the lake while right here at home. Friday nights are family nights at the "Y" pool and many families find this is one of the nights that the whole family looks forward to.

For those who can't swim, competent instruction is provided.

HUGH CRANE discusses Big Business

NEW YORK—The other day President Truman pressed a golden telegraph key in his office, started a new generator at Grand Coulee in the state of Washington, and made that dam the largest single power producer in the world.

And it looks as though Congress is going to let TVA have that big steam generator it has been asking for which will make TVA, as an organization, the biggest generator of power in the country.

Interpretation of Bigness

But there's an odd angle to what government people seem to feel about such bigness.

It wasn't so long ago that the President made a speech in which he said, "I would rather see a hundred steel companies than one United States Steel Corporation, and I would rather see a thousand banks than one National City Bank." (And so presumably he would rather see a hundred "Jonesburg Electric Company's" than one General Electric Company).

Yet the President heads a government which includes the biggest bank in the world (the RCF), the biggest insurance system in the world (Social Security), the biggest ship-owner in the world (the Maritime Commission), and the biggest grain dealer in the world (the Commodity Credit Corporation).

Threatens "Big Business"

But while the government keeps forever getting bigger and bigger (and so do our cities, and our state governments, and our unions, and our power plants, and farms, and so on) you hear all the time on the sound-track out of Washington continual throaty warnings about big business ("greedy, grasping corporations," "dangerous concentrations of economic power," and so on).

(As a matter of fact big corporations aren't getting bigger at as fast a rate as the country is getting bigger nor at any where near the rate at which the government is getting bigger).

And Justice Douglas of the Supreme Court recently made a speech in which he said that "enormous spiritual sacrifices" are made by people who have to go to work for big corporations instead of going into business for themselves.

(He didn't say anything about the sacrifices made by people who have to go to work for big government agencies instead of for themselves).

But while big companies are under a constant political barrage of criticism for being so big, you can also begin to hear another kind of criticism of private business which is quietly becoming fashionable. It is that it isn't **big enough** to handle the new post-war tasks.

"Big Enough" During War

Fortunately, it was big enough to handle such war-time tasks as Oak Ridge and Hanford. But now, the argument runs, private industry isn't **big enough** to handle the country's new needs for hydro power, for additional steel plants, for new synthetic gasoline plants, and so on.

Well, if the idea-men in Washington succeed in what they frankly say they want to do—break the bigger companies down into little ones—this last criticism will be true enough. Private industry sure enough then won't be big enough to handle the next tasks in the country's economic development.

What then? Will the country be saved from "dangerous concentrations of economic power"? Will it be rid of "the curse of bigness"?

No.

The country will have smaller businesses—but still bigger government.

The "dangerous concentrations of economic power" will just be switched into the government.

Agencies Hard to Control

And big government agencies are a lot harder to regulate, a lot harder to keep track of, and a lot harder to get out from under, than big private corporations.

SCIENCE QUESTION BOX

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY

Q. Is water a food?

A. According to biochemists, water is a food, even though it does not supply energy as do carbohydrates, fats and proteins. Food is considered as including all materials required for growth and repair of body tissue, and water is certainly one of these.

OUT OUR WAY

By J. R. WILLIAMS

Sales Manager

(Continued from page 1)

assure me they are prepared to sell like they never sold before to try to get the orders that will help keep the Department's factories humming and the Department's jobs steady and more secure."

The conferences were also attended by representatives from the engineering, manufacturing, financial, law, and employee and community relations organizations. These people were shown what they could do to help the sales force in their order-getting efforts. The salesmen, in turn, were told what these people needed from the field so that maximum cooperation and teamwork could be obtained. Major emphasis was placed on the importance of meeting and serving the customers' needs. And throughout the conferences, there were constant reminders that orders and jobs are closely related.

In keynoting the conferences, H. V. Erben, Vice-President and General Manager of the Department said, "This conference is designed to show us that marketing is our mutual problem and increased sales our mutual goal. The customer again reigns supreme as our real boss and we are really going all out to please him."

In summing up his opening address, Mr. Erben concluded by saying: "Overall I am not discouraged regarding the long-range business outlook. We are certainly in a good position facility-wise, product-wise, and personnel-wise to obtain our share of the business available. As I see it, our need today and for the immediate and forseeable future is orders—first, last, and foremost."

Normal Readjustment

In short talks, President C. E. Wilson and Chairman of the Board Philip D. Reed both emphasized that "this period we're going through now is a period of normal readjustment—not a period for fear or lack of courage."

Vice-President C. H. Lang, in charge of Sales for the Department, delivered the "charge" at the close of the Conferences. He said, "There should be no relenting in asking for and getting the order. Out main problem is to keep our facilities busy and thus keep the maximum number of people possible on the payroll. Let's meet known risks with courage and determination." As a final point Mr. Lang emphasized, "The job we've got to do now is meet the customer's requirements. Give him what he wants!"

Throughout the conferences, the individual presentations emphasized the importance of teamwork and cooperation among all phases of the Department's operations. There were many dramatic illustrations of how our factories can help in the marketing problem and help the salesmen get the orders needed to keep people on the payroll.

Stress Cooperation

The message brought out in these conferences will be spread in whole or in part to many additional employees in G-E Product Divisions and District Offices. Teamwork and cooperation leading to more orders will be stressed. The importance of this activity to maintaining steady work and the greatest number of jobs will also be emphasized.

Efforts will be made to report to all employees the results of this intensified sales activity in the field.

Completes 30 Years Of Service

John A. Craig, Bldg. 4-2, recently completed 30 years of service with the Company. At the time of his anniversary, he received a congratulatory letter for his long service. Attending the presentation are: (seated, l. to r.) Harry Sebold, H. G. Siebold, Div. Supt.; Mr. Craig and E. J. Sonday. Standing are: (l. to r.) J. W. La Vine, G. B. Stripe and Roy Bracht.

ELEX MEMBERS ARE REQUESTED TO BRING OWN TABLE SERVICE FOR CHILDREN'S PICNIC JULY 13

Elex members attending the children's picnic at West Swinney park, Wednesday, July 13, are requested to bring their own table service.

Each member may invite one or more children under the age of 12 to the dinner, which will be served from 5 to 6 p.m. at the park pavilion. Tickets are one dollar and include the cost of dinner for the young guests.

Reservation must be made with contact girls on or before Thursday, July 7.

Consolidation Of Foundry Divs. For Apparatus Dept. Announced

The creation of the Foundry divisions of the Apparatus Department, General Electric Company, was announced today by H. V. Erben, Vice President and General Manager of the department. Concurrently, Mr. Erben announced the appointment of E. R. Oeschger, of Schenectady, as Manager of the new divisions.

Foundries formerly connected with product businesses of the Department which will comprise the new Foundry divisions include: Elmira (N. Y.) Iron and Pattern Shop; Erie (Pa.) Malleable, Alloy and Pattern Shop; Everett (Mass.) Steel and Pattern Shop; Lynn River Works (Mass.) Iron, Alloy and Pattern Shops; and Schenectady (N. Y.) Iron, Steel, Alloy and Pattern and Forge Shops.

Mr. Oeschger will be in charge of the operation and management of personnel and facilities as well as development, improvement and production of foundry products.

ORDER OF THE DAY

New Industrial

(Continued from page 1)

Duane Stroud, Medical Technologist for the Fort Wayne Works, is developing the technical aspect of the program, under the direction of Dr. Garton. The medical section is working in close cooperation with the safety section, Works Laboratory, and the hazardous materials committee on this program.

The equipment includes the following:

Davis Micro-Gas Analyzer; Davis Vapo-tester, Model Six; Hand pump with filter paper attachment and bubbler system for use with "Methods for the Detection of Toxic Gases in Industry," as developed by the Department of Scientific and Industrial Research, London, England, (This was designed and built by the Works Laboratory); M.S.A. Micro-projector and accessories for dust counting and particle size determination; Standard Greenberg-Smith Impinger; Rotameters, for calibration of airflow; M.S.A. Carbon Monoxide Indicator, Colorometric type; G-E Mercury Vapor Detector, Selenium, sulfide type; G-E Mercury Vapor Detector, U-V Absorption type; Harrold Fluoride Detector; Smoke tubes, and Alnor velometer with special jets.

In addition to this equipment, a considerable amount of reference material in the form of books, technical magazines, reprints, government and state bulletins dealing with materials and methods has been accumulated by Mr. Stroud and Dr. Garton.

Vacation Information Service Is Available At Works Library

Doug Heckman and Lloyd Brown, both of Bldg. 19-2, are shown receiving assistance from Ceal Romary, librarian, in making plans for their vacation trips.

Vacation information to help employees plan their 1949 vacations is now on file in the Works Library, Bldg. 8-2. Catalogued for quick reference, the new Vacation Information Service includes hundreds of letters, descriptive booklets and pamphlets and maps on vacation spots in the United States, Canada and Mexico.

This information has been supplied by state parks, state promotional organizations and many private enterprises.

The librarian will help employees plan vacations by supplying information on availability and cost of rooms, cottages, meals, equipment, boats and entertainment. The new service also provides many interesting and detailed facts on parks, lakes, rivers, resorts and various cities with pictures and maps.

Employees who want this detailed information are invited to come to the library before or after work, or during the lunch period.

Chairman Philip Reed Heads International Chamber Of Commerce

Philip D. Reed, of New York, has been elected president of the International Chamber of Commerce. He took office recently at the final plenary session of the present Congress.

Mr. Reed is chairman of the Board of Directors for the General Electric Company, and has been a member of the I. C. C. Council.

Questionnaire

(Continued from page 1)

tics" and tells how to make simple articles from plastics at home with few if any tools. The third article is titled "A Start at Woodworking" and is about Bob and Stanley Baker, son and father, who work together with wood at their home in Bridgeport, Connecticut.

Other features, besides pictures, tell how Ann Hamlen, 17, won an essay contest and a summer trip to Switzerland; how Tony Sustaric of Cleveland overcame the obstacle of an amputated leg to continue his sports career; how Luther B. Rogers of Erie, Pa., helps set up railroads in far places; and something about uranium, the raw material for atomic energy.

Vincent J. Schaefer, who conducts the Scientific Adventures department, tells about raindrops in the new issue, while Sue's hungry friends gather at her home for supper before a summer dance.

ERIC BAADE GRADUATES WITH YALE HONORS

Eric C. Baade, son of the late Elmer F. Bade who was a former WORKS NEWS editor and nephew of Carrol Elder of Bldg. 17-4, graduated from Yale University last month with highest honors. A member of Phi Beta Kappa, he will teach classical languages at Brooks Preparatory School at North Andover, Mass. He worked as a messenger and mail clerk for F. J. Goetz in 1945.

Receives Retirement Gift

Janes Hargis, FHP Div. 1, is shown opening a gift from his co-workers on the occasion of his recent retirement. O. J. Mettler, Division Superintendent, is looking on.

He left last week after seven years of service with the Company. Mr. Hargis started with G-E at the Winter St. plant. He transferred to Bldg. 4-3 last year.

Survey

(Continued from page 1)

Works Service Divisions

"I liked the meeting because it was very encouraging in regard to the employment situation. Also, more of these meetings would tend to make for better management-employee relations."

"The meeting was probably of more value to the factory worker than the office worker, but I believe it is an excellent idea. It promotes a better feeling between management and employee to have the 'big boss' take time out to tell him what is going on."

"I feel that the recent informative meetings held by Mr. Matson with all employees of the Works Contributing and Service divisions were well received and should be continued at regular intervals or as pertinent information to all employees becomes available. These meetings could become more informal and beneficial to the employees if they would ask more questions."

"It was very informative and gave a clear idea of how the Company is operating as a whole, not just the Fort Wayne Works. Although the speaker did not go into fine detail, he gave some important facts and figures about the Company."

"A well-informed employee is a satisfied employee. Let's have more of these informative meetings."

"In my opinion, the only way to accomplish anything is through cooperation. I think by pulling together, and with a complete knowledge of what faces all of us, this economic situation will work out in the end."

"They should have started something like this a long time ago."

Fractional Horsepower Motor Division

"The meeting was quite informative on the state of the Company. The questions defeated the purpose of the talk, however, as they were concerned with Company policy instead of the subject of the talk. We should have more meetings."

"A good thing. It creates better understanding between management and labor. It was given in good faith and we should have more."

"It is always excellent to inform the employees exactly what is going on and why, so that false rumors might be cleared up. This creates a better relationship between management and employees."

"I thought it was pretty good. He (Mr. Lord) talked about things that hit every-day life. If everybody would let it sink in, we might get a good start."

"We read it in the papers, but I guess it's different when they tell it to you."

Specialty Transformer, Ballast Divisions

"The meeting was well worth the time and should be held more often."

"Not sufficient time was devoted to the question-answer period."

"The meeting was very good in dispelling malicious rumors and increasing confidence. If we know all the facts, we can evaluate them for mutual benefit. It makes us feel like part of the team."

"The meeting was very informative and gave the average employee an insight as to the main objectives of management."

"We need more questions answered; perhaps a review of questions asked in other sessions would be helpful."

"It was the first time I ever attended a meeting of that kind and I think they should continue. It makes for better employee relationship and gives employees a chance to talk personally to the management."

Large Motor, Generator Divisions

"I was very well pleased with Mr. Crawford's meeting. I think we should have more of such meetings in the future. I thought Mr. Crawford put his message over in such a way that everyone in the audience could understand it."

"The meeting was a most profitable means of promoting favorable employee - management relations. Employees must have the feeling that management is interested in them and wants them to know how national economy situations are affecting General Electric production and job security. The management pointed out that we are in a more favorable position than our competitors. They proved through statistics that employment and production are in a healthy state of affairs, though slightly lower now than during an unprecedented peak during the last quarter of 1948."

Wilson Receives Honorary Degree

Charles E. Wilson, President of General Electric, was awarded an honorary degree of doctor of laws at the 117th commencement exercises at Wesleyan University at Middletown, Conn., June 19.

Mr. Wilson was cited for being a man who "through effort, study and the exercise of mind, imagination and Christian idealism has become an industrial leader and public servant of great practical wisdom."

Battrick Reports From England:

Journeying Across Atlantic On Queen Mary; Government Blamed For High Cost Of Living

Editor's Note: The following account is the first in a series of reports on life in England by E. James Battrick, an assembler of master motors in Bldg. 4-5. On leave of absence from the Company, Jim is visiting relatives and will travel throughout the country until he returns to his job in August. In this dispatch, he tells of his journey aboard the Queen Mary and of talks he has had with different people concerning the present government in England. The topic of his next report will be, "What the People Think About Socialized Medicine."

By E. JAMES BATTRICK

We left New York from pier 90 aboard the Queen Mary on Friday, May 20, at 1:40 p.m. It was raining, but we braved the wet to see the ship released from the pier.

The first day we made 480 miles. This was the slowest day on account of going against a 75 mph head-wind. The boat had a slight sway, but this was nothing to some of the other boats I have ridden on. We stayed below most of the first day.

A distance of 657 miles was made the second day. We had an overcast sky which made it quite cool when up on deck. A deck is allotted to a section of the ship. Our deck was right on top, at the front end called, "Sports Deck." The Queen Mary has about seven decks.

Entertainment Is Provided

We made our best mileage the next day, 671 miles. To spend our leisure time, we could enjoy the following entertainment:

Movies, held twice daily; dancing, every night; bingo, and card games. Up on deck, one could play shuffleboard and deck tennis.

The following day was the warmest and the ship made 660 miles. The deck chairs were lined up on deck, so we just took it easy breathing in the fresh air and getting lots of sunshine.

Our meals consisted of three courses. There are two sittings for each meal. We took second, with breakfast at 9:15 a.m., luncheon at 1:15 p.m., and dinner at 7:30 p.m. In the afternoon 4 o'clock tea was furnished; also, sandwiches at 11 o'clock at night.

Stop at Cherbourg

The next day the ship covered 653 miles, which took us to Cherbourg at 3 p.m. They dropped anchor just inside the breakwater. Passengers for France were taken ashore in small tug-boats. We viewed the damage done by the war and also took some snaps. They pulled anchor at 6 o'clock to make our way to Southampton, 77 miles away.

In five more hours we arrived in England. Members of the crew were eager to leave for their homes. Then the stevedores came aboard and started unloading. Passengers stayed on the ship until 9 the next morning.

The crossing of the Atlantic took exactly 4 days, 17 hours, and 3 minutes. There are 3,198 nautical miles across and the average speed was 28.29 knots. A knot equals about 1¼ miles.

Materials Are Scarce

Upon leaving the Southampton docks, damage caused by the war was very evident. Reconstruction seems very slow. Materials are scarce and very high in price. A farmer, if he wants to fix his shed, is allowed only $4 worth of lumber a month.

The people I have talked to are disappointed with the present government. They are now trying to get a general election this fall. One woman said she would "walk 10 miles to vote against the present government," and she hasn't voted before.

The government seems to be inexperienced in handling affairs and spending the people's money. Most of the people are against nationalization for, since the government has taken over, they have been operating at a loss. Clothes and other goods have a purchase tax on them, which makes prices very high. For example, one of our $3.98 shirts cost $8; a 50-cent tie, about $1.50.

21 Members

(Continued from page 1)

C. H. Linder

Education division and consisted of 34 weekly sessions, starting last October. Each session lasted four hours. The course, for graduate engineers, was directed on highly technical, engineering studies.

Men who took the course were selected on the basis of a competitive examination.

Eleven of the 21 class members will complete the three-year program, taking the final two years in Schenectady.

Melvin Beucler Wins First Place In Truck Roadeo

C. E. McBride, chairman of the event, is shown presenting the trophy to Melvin Beucler, in the picture in the top, left corner. In the background are C. S. Kowalski, a representative from General Electric and member of the Chamber of Commerce fleet safety committee, and Herschel L. Smith, Works Safety Engineer and chairman of the Safety Council. In the next picture, Ed David, foreman, is shown with the trophy, as Mr. Beucler shows him and C. D. Uncapher, Superintendent of Distribution, the safe-driving certificate presented him by General Electric last year. Beucler poses by his truck with the trophy, in the next photo.

The bottom row of pictures shows various scenes of Mr. Beucler maneuvering his truck through some of the hazards set up in the course. In the first picture, at the left, Mr. Beucler is shown while parallel parking in a given space. In the next photograph, Mr. Beucler is passing through the diminishing clearance and stop line problem, to determine his ability to steer the truck through a space that becomes progressively narrower and to judge clearance, also to stop at a given line. He is backing down a simulated alley to dock from an adjacent 40 foot roadway, in the next photo. The rear window of his cab was blacked out, so that the backing had to be done by side mirrors.

Melvin Beucler, G-E truck driver, won first place in competition with nine other trailer and semi-trailer truck drivers in the finals of the first annual Truck Roadeo Wednesday evening, June 22, at Baer field.

"As long as I've been working for General Electric I've figured that when they sent me out to do a job that I'd try and do it," Mr. Beucler explained in an interview. "I figured the job was supposed to be done right and I did it that way."

The actual driving problems which were presented in the roadeo course were:

Winding backward and forward between markers to determine driver's ability to steer vehicle in close limits; offset alley; driving straight line between two rows of markers to determine driver's ability to steer a straight path; parallel parking in a given space; backing down alley to dock from adjacent 40 foot roadway; and diminishing clearance and stop line problem, to determine driver's ability to steer vehicle through a space that becomes progressively narrower and to judge clearance, also to stop at given line.

He was the only driver who did not hit a peg despite the fact that in some parts of the obstacle course he had only an inch on either side of the trailer.

"Heck, you have those every day," he commented cooly when asked about some of the hazards.

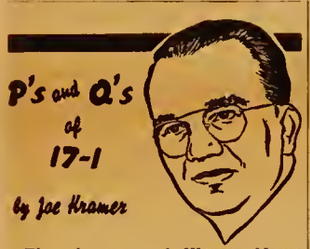
"I didn't think about anybody being there watching me, so I didn't get nervous," he added.

Receives Safety Trophy

A trophy was presented to him by the Fleet Safety Committee of the Chamber of Commerce Safety Council, sponsors of the event.

After the presentation, Mr. Beucler showed the crowd a certificate he received last year from General Electric for having driven 29 years without a chargeable accident. He also gave credit to a deuce-of-clubs card which he had placed on the front of the truck and explained, "There was a lot of luck involved in my winning, thanks to that card."

Mr. Beucler was elected to represent General Electric by the other truck drivers here.



"I did it for the rest of the fellas, as much as for myself," he told friends.

Matson Congratulates Him

A congratulatory letter from C. H. Matson, Works Manager, was presented to Mr. Beucler Friday by C. D. Uncapher, Superintendent of Distribution, and Ed David, Foreman in Bldg. 6-1.

Mr. Beucler started with the Company Aug. 5, 1918, and has been driving a truck since that time. Before the war, he traveled all over the country for General Electric.

As well as his fine record of safety, Mr. Beucler has also been noted in Fort Wayne for his courtesy while driving his truck. Several times he has stopped his truck and held up traffic to help a blind man cross the street. Around the plant, he often stops his truck to move an obstruction that he has avoided but is afraid some other truck might hit.

The shortage of WORKS NEWS copies last Friday was due to the absence of this column. At least that is what Andy Lee, Harold Struver and Dale Peden of Bldg. 4-5 believe. So to conserve material and to disappoint a few people we decided to write a column this week. . . . Addie Mausbaum, so I have heard, is going to have a dye job done. No, not her hair, but her eyebrows. Addie says the eyebrows are so light she can't tell whether she has any or not, and that is the reason for a visit to the beauty parlor. . . . The most reliable sources can sometimes be wrong. That is why in the last column (two weeks ago) we made a statement that Addie Mausbaum, Mary Gerhard, Helene Evanoff and Tavie Popa spent Monday in Indianapolis shopping. Due to some mixup, it was necessary to call off the trip. Anything to make it necessary to print a retraction. . . . We wonder what kind of a mechanic Joe Robinson is supposed to be after seeing the list of items charged to him from the tool crib. Explain yourself, Joe. . . . We reported a set of golf clubs for sale from Bob Dent. Bob wishes to withdraw that offer at this time. Last reports Bob shot an 87. We don't know whether that was for nine holes or 18. But if for nine we will make a full report later and the clubs will probably be for sale again. . . . Ivan Ford certainly surprised and created quite a commotion with his new style hairdo last week. Ivan came back from lunch Tuesday with a short crew cut and from now on is to be known as Curly. . . . Herb Kellermeier must really be working on that lake cottage. He doesn't have much to say except he doesn't have much time for fishing. Now that he has a new G-E refrigerator at home and moved his old G-E to the lake he can save enough fish and have the gang up for a fish fry. . . . Speaking of fish, I distinctly remember a certain milling machine operator offering to deliver a dozen nice bluegills. I would hate to admit Cliff (Steeplejack) Coombs didn't keep a promise, but I haven't seen any bluegills. . . . We have been asked what a person has to do to get his or her name in the WORKS NEWS. One of the fellows said he had a baby boy and we didn't offer congratulations; his sister died and we didn't extend our sympathy; he umpires ball games and we don't call him names. What does he have to do? Well, all he had to do was get a crew cut like Ivan Ford and find his name in print. The other closely cropped head of hair belongs to Vic Leakey.

WEDDING BELLS: Teddy Neds was honored at a luncheon Thursday noon, and given an iron. Teddy will be married tonight at 8 p.m., in the Church of Christ, at Paulding, O., to Scott Wilkens. She will also be leaving the Fort Wayne Works next Friday to live in Schenectady, happily ever after. Best wishes and lots of good luck, Teddy! . . . MULTI WELCOMES AND FAREWELLS: How dee do dee to Ed Pearce, whose home is in New Orleans, new T. E. in the DC Section, and to Richard Jones, a new rotater. You, too, have a lot in common with your temporary boss, Dick, "just one of the Jones boys." Also, welcome to Bernice Fisher, a new member of the Service Engineering File Room. . . Fond farewells to Harold Kestner, who is leaving the DC Section for Bldg. 4-5, and to Don Spaulding, who is leaving for Schenectady. We'll miss you both very much. Good luck! . . . GENUINE CHARITY: We thank the many people in various sections who gave so generously to help make Mrs. Richardson's departure a little more cheerful. . . . VACATION TIME: Harry Balz will spend one week of his vacation at Crooked Lake. He says that he doesn't "go in for" the strenuous forms of fishing such as casting. Instead, he enjoys relaxing in a boat and "still" fishing at dusk. We are expecting some interesting tales after his vacation. . . . TUMMY ACHES: If you notice that Dick Heard is losing weight you can bet he doesn't know how to cook. Dick is suffering the wiles and woes of a single man for a month. His family has departed for a visit to northern Michigan. . . . STORK TIDINGS: Congratulations to Eleanor Nesvig, a former Bldg. 4-6 employee, who gave birth to a son, Bruce Alan, recently. Eleanor now resides in Chicago. . . . Dwight Willits, AC Section, became a proud father of a son, William Frank, 7 lb. 5 oz., June 24, at Lutheran Hospital. Congratulations to you, Dwight! . . . TIDBITS: Carl McKay is sporting a brand new green Kaiser these days. . . . Don't forget to display the best flag in the world Monday. And—have a happy, sane and safe Fourth of July!

G. L. Enyeart Dies

Garrett Lee Enyeart, 52, of 2024 Nelson St., died of a heart attack at 3 p.m. Thursday, June 23, in a North Manchester doctor's office.

A General Electric employee, Mr. Enyeart has been working here since 1943. At the time of his death he was a helper in Bldg. 17-1.

The first glad Fourth (in '76)
The bells rang loud and long and gay
Proclaiming to the whole wide world
Our glorious Independence Day.
All through the intervening years
Our Nation has been blessed that we
Could stand before the world to show
The meaning of true Liberty.
Wonderful word!

The above poem was written by Frances Eckrote. I really think we should pause long enough to reread it. . . . The Bill Martins can now sing, "In My Merry Oldsmobile." But imagine him calling you out of bed to say that a fingerprint was on the car, and he'd like to have it shined? Bill got the answer too—just drive through a frog pond and he'd never know his new car had a fingerprint on it. . . . We thought we heard a peculiar noise last week. Investigating we found that it was Floetta Zartman's arches falling from too much painting. She was offered lots of help, too, with the volunteers all bringing their own paint. (Perfect match not guaranteed.) . . . Luella Stabler and Jerry Snyder gave a surprise shower for Marjorie Kennel who was married last Saturday. Those from Bldg. 17-3 attending were Hedy Harrison, Hilda Jensen, Mildred Schoenlein and Sarah Meagher. . . . Nina Clifton was all smiles last week. She became a brand new grandma, and it's a boy. . . . We are glad to see Pauline Stocks and Larry Huffman back. . . . It's a welcome to the newcomers, Harold Prough, David Bastian, Esther Madden and Max Decker. . . . The early bird shift must get Mary Foster (not the editor's daughter) down. It seems as though Charlie Rice has to call her to come to work. My, my, it really gets early in the morning. . . . It's belated birthday greetings to Delores Wonderly. (I didn't get any candy, that's why I'm behind.) Also happy birthday to Marie Dunfee. . . . Naomi Robinson gets so hungry about 2:30, she doesn't care what she eats. She asked Leona for her chicken bones. . . . Edith Paxson's mother was 87 years old last Friday. Edith was busy preparing a celebration for Sunday. . . . Walter Kryder and Charlie Rice were busy moving the lockers. Walter found some change. Wonder what he did with those two bits? . . . If you missed Pete Heckler last Friday, he was attending the Eagles convention. Did you get the bird, Pete? . . . Lewis Hoffman and Lorena Buuck were having quite a session on who would rethread a machine. From all reports, Lewie won—at least he out-sat Lorena. . . . Erma Landes spent last week-end in Indianapolis. . . . Marie Bowers was really trying something new the other day. She thought sure we could have five pole stators. Did you notice Herschel Case wearing his tee-shirt backwards? Trying to get a suntan, Herschel? . . . Sorry to hear Marge Ireland has left us. Hope you will like your new job. . . . Our sincerest sympathy to Mary (Bohnstedt) Thompson in the death of her husband. Mary was a former co-worker.

Frank Fisher Dies

Frank E. Fisher, 56, of 1223 Wilt St., died Tuesday, June 28, at 2:30 p.m. in Methodist hospital after a four-year illness.

Starting in 1927, Mr. Fisher has been employed in the power house 22 years.

FHP Motor Sales Divisions Hold Annual Outing June 18

The FHP Motor Sales divisions held their annual outing at the Bluffton Conservation park Saturday, June 18. About 70 local employees and members of nearby sales offices played golf during the morning, and cards after lunch.

The pictures show typical scenes throughout the day. (1) Mert Edgar, R. C. Hanna, M. E. Lord, H. O. Mellem, of Detroit, and Jack Grafe, of the Chicago office. (l. to r.) are "caught in the act" of doing their favorite pastime.

(2) The out-of-towners were: (Front row, l. to r.) Walt Leifheit, Rockford; Jack Grafe, Chicago; Tony Lomardo, Chicago; W. M. Speth, Chicago; H. O. Mellem, Detroit, and Bob Cummingham. (Back row, l. to r.) H. D. Warning, St. Louis; S. C. Powers, Chicago; D. O. Brooks, South Bend; Paul Salstrom, Cleveland; Barnie Hartough; D. D. Barlow, Detroit; and Bill Dutton, Grand Rapids.

(3) H. D. Warning, Herm Priwer and R. A. Thompson are shown hard at work over a game of cards. Kibitzers were: R. J. Winner, A. W. Bartling, N. E. Griffin, and G. T. Wright.

(4) Taking it easy under the shade are: Nate Horton, H. A. Folsom, U. L. Hearn, Cary Cramer, Frank Stenberg, Bill Brunner, Hal Robertson and Gene Meyer.

Carl Metker is wearing those loud socks at the wrong time. It is too warm now, he should wear them during cold weather. . . . Speaking of the weather, we have a weather-man in our division, none other than Henry Grepke. He says that when it is humid and sticky his hair is curly and when it is dry his hair is straight. From now on we will watch him closely. . . . Hank Shirley is going to be happy on his new job. He says that he will be working with redheads. If he doesn't ever come back here to work we will know the reason why. . . . Jim Hargis and his wife went fishing on the St. Joe river and his wife had all the luck, she caught a seven and one-half pound bass. Jim is retiring soon and he received a new fishing rod and reel —maybe this will help him catch some big fish, too. Sorry you are leaving us, Jim, but know that you will enjoy your retirement. . . . Did anyone notice that loud shirt Alva Foulks wore the other day? He claimed he wore it when he was "second" for Charles the champion heavyweight. . . . That sure was a super-duper, stylish fishing outfit Mary Nute got for her birthday. We didn't know that we had such wonderful designers in our section, . . . Hazel Martz leaves on her vacation next week for Alabama. . . . Ed Glenwith and family are going east to Washington, D. C., and to New York City on his vacation. . . . Al Rebber and Floyd Truelove are going on their vacations next week, too. . . . Birthday greetings to Pauline Selking. . . . Ed Ort had his ear stolen the other day, but he is happy again, he got it back. . . . Elmer Sihle had his hand all bandaged up. According to the story we heard, he was bitten by Osear the turtle. . . . They tell me that during his spare time Ray Snyder is playing in the Decatur band. . . . The employees of Div. 1 are out looking for 12-cent bread. If anyone locates some let us know. . . . Louie Sauers is the only valve grinder left on the floor, and he is very busy. . . . Louie Barrows is really out stepping these days. He was seen in a little restaurant on Broadway the other day with Florian Korte and Lee Cupp. The boys are wondering who picked up the check. Ralph Gilbert was there, too, but he had something in his eye as he kept blinking it all the time. Did you ever get it out of your eye, Ralph?

Louie Botteron's "Hot Rod" has been his downfall. Everyday this week he has had to go to the dispensary for treatments for his arms and shoulders. Due to rolling the windows up and down. . . . Elmer Buuck received a box of cigars for Father's Day and is smoking them as short as possible, using the butts in his pipe and the ashes on his wife's flowers. . . . Johnny Wilson is planning on going to the Smoky mountains during his vacation, to find out whether he bought an automobile or just a car. . . . Fred Kiel has a new way of shaving. He uses a soldering iron and singes the whiskers off. . . . We know why Rosamond Schooley is so gay lately. She had a sample from the fountain of youth. . . . Of all the strange sights we have seen is Albert Bertsch. He has a piece of lettuce in one hand and a carrot in the other. Then later in the day he will have a shredded wheat biscuit and a banana. Just what kind of a diet is that, Al? . . . Anyone desiring information as to how to paint wallpaper see Ed Rodenbeck. (He painted their living room paper and it all fell off.) . . . Congratulations to Harold Somers on his sixth wedding anniversary. (We wish to extend our sympathy to his wife.) . . . We are just wondering who catches all the fish, Les Richter or Danny Daniels? . . . The group of fellows Mike Brayer rides to work with all have new cars and they are equipped with radios. However, when it is Mike's turn to drive the boys do not have all the comforts of home. Last week one day someone brought a music box along so they could be entertained while riding to work. But the guys still had a little trouble. Mike's car makes so much noise they could hardly hear the music. . . . Mac says the fun is all over, the Mrs. is returning home from a week's vacation down South. . . . Myrtle Barfell bought another dog and rushed to town to purchase a dog collar, which seemed to be a mistake. When she returned home somebody had stolen the dog. . . . Welcome to all the new employees in our division and a very happy birthday to all of those having birthdays in the month of June. . . . Maxine Pierson was all smiles when she came into work last week. She has a very pretty sparkler on her left hand. . . . Hank Epple had planned on such fine fishing weather during his vacation, but due to the cloudbursts all he accomplished was sitting home. . . . Ernie Cutter went to Rome City and was casting off the island and caught his line in a tree. We hear he spent the rest of the day trying to untangle it.

G-E GOLF

By Hugh Dubdit

The Monday evening group lived up to all expectations this week, so the lead changed hands again. The Apps took their match from the Lost Balls by 12 points, while the Dark Horses lost their match by three. As a result, the Apps now lead the group with 18 points; Dark Horses in second with 15; and Lost Balls, third with four. The individual scores were not quite as good as usual, with cards of 42 for Bob Hanna and 43 by Walt Sunier, Jim Oman and Louis Davis.

Last Wednesday in the Winter St. group, the Mashies picked up two points and still lead the group with plus 34 points. However, they lost ground when the Brassies won by seven and have plus 24 points. The Drivers gained 21 points for a total of plus 17. Dick Szink shot a nice 38 to take over top spot in individual standings. The other good scores of the evening were 40 by Don Lyneh and John Skevington, and 41 from Glenn Schimmele and Vern Foulks.

It seems that each week the weatherman dampens the spirits of at least one group. This week the Tuesday group was just about ready to go when the storm let fly with plenty of water.

144 Journey To Niagara Falls With Elex Club

One hundred, forty-four Elex members and their friends went to Niagara Falls the week-end of June 11 and 12. They left Fort Wayne at 2:45 a.m. Saturday on the Nickel Plate Railroad to Buffalo, and finished their trip by bus. Staying on the Canadian side of the Falls, they spent the week-end sightseeing and exploring the area. The girls stayed at the General Brock Hotel, and returned to Fort Wayne early Monday morning. Scenes during the trip are shown above.

Motor and Generator Static

Thought of the week: "Be thankful we still celebrate July 4." . . . The mystery melody is "Say Not Love Is a Dream," by Franz Lehar (we think). . . . ODDS AND ENDS: The following really happened one evening last week: Question: Are the Daisies playing tonight? Answer: WKJG, no; WANE, no; WOWO, yes; WGL, no; WFTW, Did it rain? I've been inside all day. Those cars slide when the track's wet; Hotel Van Orman, (first call) not sure, (second call) no; Bob Inn, sure. We stayed home. . . . After being accosted so many times by the question, "What is that loud noise emanating from Bldg. 31-1?" we feel that a public explanation is justified. We have a race in progress. "During working hours?" "Emphatically." "Do the bosses know?" "We feel they do." "Don't they protest?" "We've heard no comment." "Don't the participants get tired?" "No, they're still going strong." "Who are the participants?" "Monroe Bosius, George Murray, and Dick Hobson." "What kind of a race is it?" "To see which can wear the loudest, gaudiest, flashiest ties." . . . DIFFERENT: From time to time someone has been sending religious tracts to Jim Mitchell. Quite naturally when something like this happens, he pays his respects to Pappy Archbold who often engages in this form of missionary work. We feel that Jim must have read the literature because many of the words he used were printed on its pages, although in slightly different sequence. . . . MUST HAVE BEEN: Speaking of Jim Mitchell, he reports that the "ad" we ran for him in last week's column has paid dividends. Sez he, "There must have been 12 more G-E people up to my free movie for when I counted the money I was 50 cents ahead of my usual take." . . . EGO? Art Druce, navigator of Lake Gage, reports that the captain's cap presented him as a Fathers' Day gift does not fit. Remarks Art, "My head is so swollen since I have been making the news that the cap is entirely too small." . . . GUESS NOT: George Momper is an optimist. The other day he approached Ray Wiese with a proposition. "Ray," he said, "I am going up to Wisconsin on a fishing trip next week and will need a place to store my fish when I return. How about you throwing a big party and emptying your locker so that it will be available for my catch when I return?" Ray, not being an optimist, is doubtful. Sez he, "Last time he went fishing and the only thing he caught was his automobile after it ran into the lake. I don't think his Mercury would look good in my deep freezer." . . . Ed Foley and Art Druce announce that they intend to start a class on the proper installation of monogram caps. Each feels that he has so profited from the other's mistakes that they are fitted to instruct. We suggest you contact Art as Ed is a little close-mouthed about the whole thing.

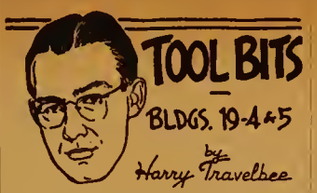
All games are scheduled for 8 p.m. in Dwenger park.

Tricks In Transformer

—FROM DIVISION 91—



By Johnny McMaken

The end of another week and the start of a three-day vacation is here. Over the Fourth is usually considered one of the most hazardous times of the year. Many people will be swimming, boating, driving, enjoying fireworks, etc., so be careful over the week-end in whatever you do in order you won't be one of the unfortunate ones. . . . All 1949 Plymouth drivers see John Sowers for quick starts and trouble-free motoring. John has had his Plymouth four weeks and has driven 300 miles. He has also made a cover for over the top of his car so when he goes to the lake it won't get wet. . . . Harlan Voltz has a dolly which he has had a lock on for about six months. He went to use it the other day but could not find the key and had to saw the lock off. . . . We have Lavern Shultz back with us again after a short leave. . . . Wilbur Shaffer is running a punch press again, but finds it a bit hard as he cut his finger the first day. . . . Ralph Milligan is starting on a 90 day leave of absence. Have a good rest, Ralph, and also a good time. . . . Fred Theime is really on top of the world this week. He is setting dies as Mike Dauscher is on vacation. . . . Anyone feeling ambitious this week can give ouie Weigman a hand in making hay. . . . A certain party, Russ Krider, who was putting on George Schaefer about not getting in his corn, did not get in his hay. . . . Anyone wishing a job on the shears see Bob Bunyan. He will teach you how to run it. . . . Bob Bunyan got a new car and is having a lot of freeze plug experience, costing $3.50 or $17.50. Bob was wondering if Louie Weigman will have any time to chop up some parts on the shear. . . . Bill Fett and Ray Horstman went fishing and said they caught all the fish they could eat and give away after they got home. I always thought my phone number was in the book.

Ramblings in 31-2

While trying for some fish, Arland Werker hooked a turtle. Arland could smell the turtle soup, as he proceeded to cut the head off of Busco Junior. Junior suddenly turned the tables and snapped Arland's finger first. Arland has been wearing a band-aid to mark the place of contact with the turtle. . . . We are pleased to announce the arrival of a baby girl to Jack and Maurine Vetter. . . . Glenn Tobias has completed his training period and is now a full-fledged motor specialist in our New York Office. . . . Sunshine and sorrow follow one another. Fred Eisenbiegler left about a month ago to be married in Canada and then to take a new position in Schenectady. We now hear that Fred's father died unexpectedly two weeks ago. We are sorry to hear this.

CHICAGO WHITE SOX
Tuesday Night, July 12
Dwenger Park
TICKETS NOW ON SALE AT G-E CLUB

John Hensler really appreciates any little gift that he receives, but he wishes that the gift would work okay. A fellow worker gave John a new cigarette holder, but when he tried it out he finds that there is no hole in it. Now he plans to have it overhauled. Might just as well buy another one and start from scratch, John. . . . Bills usually come on the first of the month, but in our division they come just any old time. We welcome two Bills from the Apprentice School, Bill Mowery and Bill Jones. . . . Dick Florent has a foolproof way of proving that he catches fish when he goes to the lake. He takes the preacher along To make the day complete he got his limit in bluegills, too! . . . Myron Auer spent the week-end with his folks at Frankfort and made the pleasant discovery that Frankfort has nice blondes as well as classy redheads. Tell us more, Myron. . . . John Roemer had the fans guessing at the Cincinnati-Philadelphia baseball game at Cincinnati, Saturday. He was rooting for first one team and then the other. . . . Herb Thiele has developed a thorough dislike for motor boats for some unknown reason. We think it has something to do with bass fishing at Adams Lake. Might ask him. . . . Myron Auer should be a salesman because he really likes to talk, but he couldn't quite talk the umpire into changing his decision so Myron left the game (by request, that is.) . . . We hear that John Stetler's wife has been on the sick list and we hope she will be okay in a few days. John was a big help around the house while she was in bed. Nice going, John. . . . Art Thieme, die plant foreman, is hereby nominated for the Super-Optimist Club. We have it on good authority that Art is planning a fishing trip after muskies this week and the only lure he intends to use is a lead filled maple shillalah. On the other hand, since Art is the safety representative for the Tool division, perhaps this weapon is for self-defense against those big ones that always jump into the boat after the fisherman. Be careful, Art, there is a law against carrying concealed weapons in Wisconsin, too. Special note, Monday, June 27: Outward evidence makes us think this thing backfired. How about that, Art?

Fractional Fiction 4-5

By Leola Carrier

Birthday wishes of the week go to Gordon Parmalee. . . . Earl Souers, Bldg. 4-5's all-American tackle, has rejected a contract with the Philadelphia Eagles. He insists that the "flying tackle" he demonstrated last week was merely a coincidence. . . . Anyone wanting to join Fort Wayne's exclusive duck and gun club, see Milt Roller. He took his extra week of vacation last week in order to start construction of his "country estate." The rains came and the wild ducks took over the invitable swamp lands, or his basement. . . . Congratulations to Bud Neu on being a proud father of a son. . . . The co-workers wish to express their sympathy to Thurom Cusenberry (Army inspector) in the death of his father.

4-1 Floorage

By Marie Lantz

According to the booming reports around town all week, some people celebrate holidays many days ahead. Early birds are busy; some anfishipating, are getting worms, while others are getting a bang out of crackers. From the first to the fifth our jaunt into July begins with a bang—for the Fourth. . . . How can Dick Polston explain the presence of that drinking glass? When he arrived at the parking lot the morning after he attended the policemen's picnic, said receptacle was parked on the top of his car's radiator. Whether Lick was perfecting a balance act or radiating a little cheer, no one seems to know. . . . Into our midst we welcome Virgil Bobay from Bldg. 4-5. We lose Bill Oberlin to the second shift and Helen Lantz to Bldg. 17-3. We lose Ray Dotzer for just this week—somewhere on vacation. . . . In regards to the discussion period following Mr. Lord's talk, Ruth Nordyke now has a question—which came after. Since when, she asks, does one raise eggs? Seems probable—if one raised a hen he might raise an egg. He would—if one were there. . . . Work is "blooming up" for Harold Roop, our former co-worker who paid us a visit last week. He is now engaged in greenhouse work, the occupation he practiced before working here. To use double-talk, we'd say Harold couldn't keep mum on keeping mums. . . . It wasn't their male vanity — not exactly; Humphrey and Oberlin were merely showing off their colors. While at Pokagon, Dame Nature painted Bill's legs bright red, spot o' sun. And Maurice was merely spotted, he worked the week-end painting walls, supposedly, but he achieved a polka-dot effect on all four limbs.

Apprentice Broadcast

by MILDRED ELLIS

Fireman Ecenbarger donned his crash helmet and came to our rescue Thursday by putting out a small fire alongside Bldg. 12. The fellows claim it was caused by the mill section working so fast that the sparks flew out the window and started the fire. . . . If you have some mending jobs that you would like to have done for a small fee—see Fred Stoup. He's become quite an expert since he has been living the life of a bachelor. . . . Schmidt was swimming with his little cousin, but he paid no attention to the boy's warnings about boats. So the little boy ran toward shore. At the same time a boat hit Schmidt in the back. Schmidt says he will be equipped with a tail light in the near future. These draftsmen are becoming loaded—with accessories. . . . The recent rains played hob with Finton's garden. It left the pickles badly twisted and warped. . . . Whenever "Chubs" Auer is missing from Bldg. 19-5 they should look for him five stories below, because that's where they're going to find him someday if he doesn't quit hanging so far out the window to see the girls who are passing below. . . . Birkenbeul pulled his old Chevy into a junk yard, parked it, pulled the rip cord (made of bailing wire) and left the heap and bought a Plymouth. Now Bob's rich—all car and no money. . . . Marc Junk is back and seems to have survived his two weeks of military reserve training in great shape. . . . Our latest discoverer is Joe Raupfer who has discovered that steel grows. Well anyway, they claim the part was the correct size when it left the lathe section and it was oversize when it got across the aisle to the gear section. It's a good thing Joe didn't have to travel far or he wouldn't have been able to carry all that added weight. . . . We are very sorry to hear that Mr. and Mrs. Gebert's little boy is ill and in the hospital. We hope Kenton will be well and home very soon . . . The apprentice ball club defeated the Firemen 11-3 for their third consecutive win. Kenny Zurbuch pitched a two-hitter and Art Rasor led the attack against the firemen's pitching with three hits. We are sorry to hear that Dick Wagner will not be able to play ball with the boys for the remainder of this season. We hope Dick will be able to get back into the game next season.

To "darn" your luck is not the best way to mend it.

Only one ad per employee may be inserted. Each ad must be limited to 20 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Tuesday Noon, July 5, 1949

LOST AND FOUND

LOST—One pair safety glasses in light tan case. Name E. J. Glaser inside case. Lost at Taylor St. plant. Award offered.

FOUND—One key on chain. Found in yard by Bldg. 19.

FOR SALE

24-INCH STEEL FURNACE—Complete with pipes and new grate. Inquire at 307 S. Cowen, Garrett, Ind. or call Garrett 337R.

1936 PLYMOUTH COUPE—Heater, good tires, $50. H-01672.

1937 INDIAN MOTORCYCLE—With 1945 sidecar, good condition, reasonable. 340 W. Wayne St. or A-79764.

TIRE, TUBE, WHEEL AND HUB CAP—For 1934 Ford. A-1 condition. A-68255.

LOT—Covington Road. 99.7 x 200. H-60033.

BEAGLE PUPS—Nine weeks old, pedigreed and registered. H-19136.

MAROON SOFA BED—Like new. 1226 Clayton Ave., after 5:30 p.m.

LARGE SIZE BABY BED—In excellent condition. A-86862.

KNOTTY PINE CABIN—At West Otto Lake, wooded, lake front, east side. H-66332.

WOODEN WARDROBE—25 x 36 x 6, $10. H-17505 after 5 p.m.

BINOCULARS—New, coated lens, Navy. 7x50 with case. H-81327 after Monday.

TRAILER—Like new, all steel, two-wheel, 5 x 7, bed 16-inch deep, two 6.00 x 16—6 ply tires, 2000 lb. capacity. 120 W. Fleming Ave.

1937 CADILLAC—To be sold for parts, motor, body, tires, etc. Write Ralph E. Jacobs, R. R. 1, Liberty Center, Ind.

FULL SIZE BABY BUGGY—A-1 condition, $12.50; Teeter Babe, $1. 2722 Thompson Ave.

LOT—50 x 150 ft. in Fairfax addition; lights available, $285. H-70642.

NEW COTTON HOUSECOAT—Orchid, size 20. H-46641.

FOR RENT

TWO COTTAGES—At Rome City. A-67032.

TRANSPORTATION

RIDERS OR RIDE—Ralph E. Jacobs, from Bluffton. Works in Bldg. 31-1 from 8 to 5:15. Extension 2183.

THANK YOU NOTE

I WOULD LIKE TO THANK—All my friends in Bldg. 4-6 for the nice gifts that were given me. Mamie Richardson.

Last week Fort Wayne management took time out from their many duties to review with us, one and all, some of the problems that confront them daily. To some of us who have an outlined job it may be a trifle hard to realize the magnitude of their problems. At times, we may even question decisions made—but it is impossible for us to know all of the facts and it does not take a master mind to know that they can not take time every week to tell us the latest developments. So—let us say thank you to them for giving us the opportunity to hear their problems discussed and to have our questions answered. We now feel more a part of General Electric Company than ever before. . . . This week-end starts the Fourth of July vacation. Each year we celebrate without stopping to think, or appreciate just what the day stands for—it isn't just fireworks, golf and pienics. Let us start now to plan a safe and sane holiday and to give a little thought to the meaning of the day as we place our flags on display. . . . My attention was called to the fact that I have overlooked suggesting to you that Pokagon State Park, the closest one to Fort Wayne, is really a beautiful spot for a pienic or the hotel offers splendid aecommodations. Must have been thinking of a longer drive. YOU try them all—you won't be sorry, I know. . . . I found it a little difficult to adjust my old-fashioned ideas to accept a picket line in front of a House of God under construction, so I am happy to know that the differences have been settled and I will have to look for a new worry. . . . Constructive advice: Did you read Cliff Ward's column in the News Sentinel on Monday night of last week? He had received an applieation from a young man seeking a job. Apparently he had asked Mr. Ward "what he had to offer." Naturally, that was the wrong approaeh. Wrong anytime, but doubly wrong in this day and age when employers have greater problems than to offer a job to an outside applieant (there are employees right on the ground floor to fill the vacancies, unless in some highly special field.) If you expeet to make an applieation via mail—read this article—it offers constructive adviee. . . . Now for Bldg. 18 news. . . . The new voice you hear from the information desk on Friday afternoons is Betty Jean Rose, Bldg. 18-1. From the third floor we learn that Ruth Hunt recently spent her vacation in New Orleans and we hear that Joann Springer is VERY adept in presiding at ice eream socials. . . . We are late in extending our sympathy to Luther Meyer in the death of his mother and in offering congratulations to Mary Kibiloski who recently celebrated her birthday. How about it, Mary? . . . Talked to Herb Kammeyer, Bldg. 18-1, and the only important news he could offer is "BLUE GILLS ARE BITING." . . . Emily Guth, Bldg. 18-3, has a regular, small fruit ranch at her home on Bowser ave. I can vouch for the red raspberries. . . . Donna Walters and her duplicating machinery have been moved from Bldg. 18-B to Bldg. 18-5. . . . There has been lots of excitement over Melvin Beucler, Bldg. 6-1, winning the Truck Roadeo for G-E. Suggestion to Chamber of Commerce committee: Why not call it a "Trudeo." . . . Milt Kline and Mildred Whitmer, Bldg. 18-1, are still busy comparing notes on their lake cottage building. From my point of view it looks like a whale of a lot of work! It was Dickens who said, "Those who reaeh fulfillment smile at the pains and shock of the trodden way," so some day they may laugh out loud and say, "well done!" . . . Joe Wauro, Bldg. 18-3, is on vacation spending two weeks in New York and Washington. . . . Mr. and Mrs. A. S. Johnson and daughter Susan spent last week-end in Kentucky. . . . The envy of Bldg. 18 is Helen Dafforn's suntan. . . . This seems to be one of those days, "What is so rare as a day in June." . . . Happy birthday to Jeanette Burkhardt and Olive Smith, Bldg. 18-4. "Smitty" gave everyone some luseious chocolate cake topped with marshmallow frosting two inches thick and eoated with chocolate. I plainly see we work on the wrong floor. . . . Annabel Redding of Bldg. 18-4 is "housing" a siege of ivy poisoning. . . . Diek Kent, Bldg. 18-5, has joined the 39'ers. It wasn't in the G-E Golf league, but he has witnesses to prove his score. . . . In Bldg. 18-4 the question is: "What was Karl Reid's idea in ehanging the filing system?" He doesn't think he will ever learn the new one. . . . Audine Love, Bldg. 18-4, is moving again, either two or three times this year, the moving company will soon retire. . . . The Koebles (Gloria to those in Bldg. 18-4) have moved into their new home, may we offer congratulations to you and to Betty Mueller on her birthday.

Summer has arrived. Our information by radio, by newspaper, and by calendar is now completed by Virgil Allmandinger's annual haircut. . . . Onee again Ed Glusenkamp eomes up for some interesting publieity. This time he was diligently minding his own business, busily engaged in trimming the hedge. Finding stooping a bit hard on his back, he decided to sit down for most of the job and kept sliding along in this position as he worked. Occasionally he found it necessary to stand to put that special touch required, and whenever he did he noticed that he received a great deal of attention of passersby. Smiles and whistles were returned in kind with Ed thinking what a friendly neighborhood he was fortunate enough to be living in. The job finished he retired to the house to receive the well earned praise from his spouse, but was greeted by her question of what had happened to the seat of his trousers. Ed reached baek expecting to brush them and—no seat, instead the nether part of his anatomy was exposed. It was then, and only then, that he realized the so-ealled friendliness he had been receiving was only the enjoyment the general public was having at his expense. . . . Joe Trentadue, who is new at this gardening business, is boasting about how tall his bean vines have grown. He's beginning to get a little worried though, he still hasn't found any beans on the vine. . . . Margie Rall had a birthday celebration Thursday, except she wasn't one of the participants. Irma Miller baked her a cake and when Margie failed to report for work the rest of the group shared the cake without her.

Maxine Mertz feels that she doesn't stand a chance on getting her name in the paper, beeause there is too much said about her husband, Walt. Now that the bowling season is over, we'll let the little wife have the limelight awhile. . . . The jet boys of Group 329 have ventilation now. We are looking for a considerable pick-up in production as they aren't singing, "Smoke Gets In My Eyes" anymore. . . . Virginia Wilson is having trouble keeping traek of the tenths on Clorene Trout's card. We wonder if she is running out of fingers? . . . It looks like Dorothy Paxson is just as efficient as a homemaker as she is a time clerk. At least she was a busy little bee last week. She eanned 48 quarts of cherries. We will keep that in mind if we get hungry for cherry pie. . . . This joke is getting rather old, but so is the egg that Rita Fleckenstein found in her machine. We wonder if it is a left-over from Easter or is the bunny still on the loose? . . . We have Cornelia Glass floating on a cloud this week. Nice going, kid. . . . Ruth Freeland doesn't appreciate this very much, but she does get a shower while she is at her machine working, and in this hot weather, too. What have you done, Ruth, to rate such serviee? . . . We are glad to hear that Theoda McCarver's mother is improving so mueh since her operation, and hope that she will be up and around again soon. . . . Erma Wilkins was told to look at the birdie and give us a great big smile. If the picture doesn't appear soon we'll know that something went wrong with the camera. . . . If there is anyone interested in the very latest song hits, they should lend their ears to the airs Lonnie Rockstroh dishes out. They are fresh from the composer. . . . Velma Rose is an ardent fisherman. Want to get acquainted? Just give her a big fish story. . . . Playing golf is an excellent sport to keep you in trim, but Dale Stuckey makes it look like a very difficult game. Wouldn't it be easier, Dale, if you would take your golf bag off your baek and lay it on the ground while driving? . . . We wonder what mischief Thelma Loveless and Lola Brunner get into Sundays that they are so tired Mondays? . . . We are anxious to know when Ruth Freeland is going to use that full tank of gas. If it is company you want, Ruth, just hang the weleome sign on your door handle.

Offiee Offerings

We hear that Bob Hunt's chiekens are laying all soft-shelled eggs. If you can't get any oyster shells, Bob, try putting starch in their drinking water. . . . If and when we have another mass meeting, someone should get a stool for Don Poland to stand on. It would save a lot of wear and tear on the mike. When he gets it down to his size, the other fellow would rest his chin on it. . . . We haven't a new fellow in the office by the name of Hobart. That's just Willard Lenz going under an alias. . . . Jim Voirol and his wife have a splendid idea. They go to Swinney park at noon, put a blanket down, eat their lunch and then both take a nap in the cool shade. If they come in about 2 o'clock some afternoon, you'll know they didn't heed good advice about taking their G-E clock along.

Many bring their clothes to church rather than themselves.

Inquiring Reporter:

WHAT DO YOU THINK OF THE EMPLOYEE-MANAGEMENT CONFERENCES?

RUTH M. KIBIGER
Bldg. 6-2

"They (the conferences) are very informative and should benefit both management and the employee."

PAUL F. BOYER
Bldg. 4-2

"I think it's a good idea. Why hasn't it been done before? Too long the laboring man has felt he was just a piece of machinery — not worthy to be taken into the confidence of management. But this type of meeting makes us feel as a part of a team, working together for the benefit of all. We all become better workmen when we are better informed."

ARIETTA DENNEY
Bldg. 26-5

"I think it's a very good idea. It gives employees a chance to become better acquainted with management. I believe there were some very good questions and answers given in the meeting."

LEO P. CHRISTLE
Bldg. 19-3

"It is a step in the right direction, but I think they should be more localized and more personal."

AL KRUSE
Taylor St.

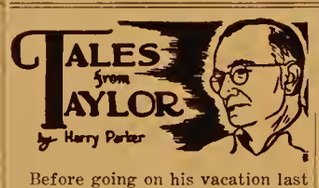
"I liked the recent talk at the employee - management conference because it was informal. It gave us a true picture of some of the problems at our works, as well as of our allied works. I think it was worthwhile."

Last week we had a special day other than a holiday; the 21st was the first day of summer, also PICKLE DAY. Eddie Noonan, one of the up-to-date horticulturists, seeded his pickle seeds. If the June beetles don't devour the plants he'll have lots of dill and sweet pickles. . . . An airport fan from the Decatur G-E was sighted at the Smith Airfield in Fort Wayne Sunday afternoon. Jerry Ross, why don't you talk the little woman into getting a flying machine for the family? . . . Did you notice the smile Helen Britzenhoff has been wearing lately? She received from the postman a rose from her boy friend in Wilmington, Delaware. It must have been a beautiful rose, it still looked nice after being pressed. . . . As you know Leona Fruechte has returned to work after a few months off. Welcome back, Leona. . . . Lima, O., here I come. What a town! Cecelia and her sister Rosie visited relatives there over the week-end. Her uncle runs the "Old Dublin Inn." An Irish joint? Wonder if they sampled some of the wares uncle sells? . . . Next Monday we are going to celebrate the Fourth of July. Hey, G-E farmers, will your corn be knee high? Truman Goldner, how's your 40 acres doing? We hear you had some experience cultivating your kernels. After your 40 and the neighbor's 20 you found the cultivators didn't work. Oh, well, Truman, just so you broke the crust, that's all that's necessary. . . . George Meyers was seen enjoying a picnic supper in Bluffton with his family at the Conservation Park. . . . Oran Schultz and Clem Snell attended an athletic club meeting in Portland this week. We haven't heard what the meeting was like, so folks, they'll keep us guessing. . . . Barbara Roop spent the week-end at Grand Rapids, Mich. . . . Bob Andrews' famous words while playing euchre are "we have never been defeated." . . . Earleen Steffen found out she sunburns. . . . Alice McBride took up walking while her husband's car was in the garage. . . . Our deepest sympathy goes out to Mr. Lankenau on the death of his brother and to Esther Ehrman on the death of her father. . . . Welcome to Decatur Rudy Schweiger, the new test engineer. . . . We are happy to report that Fern Passwater's mother is improving and has been brought home from the hospital. May she continue to improve rapidly. . . . Noble Drum almost got a free shower. The day someone turned on the sprinkler when he was standing close to it. . . . Anyone interested in buying a zireon see Dave Embler. He can give you all the information you want to know. . . . Our sympathy also goes out to Charles Cook on the death of his grandmother. . . . Dort Schnepf says it rather rushes a person to get to Fort Wayne after work to do some shopping, but with Dort at the wheel they make it in record time. . . . In case you are wondering who that person is that is driving a new Kaiser, it's none other than Paul Hancher. We certainly hope you get your appetite back, Paul, and you can start sleeping nights or you won't be able to enjoy your new car.

Some girls make poor bridge players. They just hate to return a diamond.

G-E Voltmen To Play Kansas City Monarchs

The Voltmen will play Kansas City's famous Monarchs in a game at Dwenger park Tuesday night, July 5.



Herb Souell

Sports writers refer to Herb Souell, third baseman, as the best lead-off man in Negro baseball and defensively he is an outstanding hot corner guardian. Souell watches every pitch closely and he hits the ball for distance which makes him doubly valuable to the Monarchs. He bats from the left side. Souell was the outstanding infielder in the 1942 world series against the Homestead Grays.

Willard Brown

Brown is the home run king of the Negro American league. The 200-pound slugger hit four homers in a game against the Chicago American Giants in 1940. He was one of the Monarch players who had a tryout with the St. Louis Browns towards the end of the 1947 season. He has an unusual stance at the plate, batting in a crouched position, but hits homers with ease because he gets all of his weight onto his swings.

Before going on his vacation last week Al Timme told us that he was going to devote the whole week to playing golf. As you all know the week turned out to be one of constant rain, making the various courses a veritable sponge. The ones we visited looked like you might have to use a boat to make your plays. Al was very disgusted and was seriously thinking of flying to some other part of the country where it was dry, because he thought that he must get in a few licks with a golf club. But time was running out so he contented himself by remaining at home and watching the rain. . . . Lindsey Eastes claims to have the largest apiary in Allen County. He tells us that every year for the past several summers he has noticed bees going in and coming out of a small opening near his chimney. He ventures a guess that there must be at least a ton of honey within the walls of his home. We suggest that he make a thorough check and remove the honey before it starts running out on his floors. . . . Ward Grim appeared Monday morning with what he termed an extra special summer hair cut. Actually he looked as though he had slid down too far in the barber's chair while being shaved. He said that the only place you can get a hair cut of this type is at Lake Papakeechie and we really believe him. . . . Sam Allmandinger has purchased a pretentious estate at one of our northern Indiana lakes. He told Quentin Romy that if he expected to be entertained at said place he would have to purchase and present to Sam a new boat, one that is leak proof. Sometime ago, Quentin invited Sam to accompany him on a trip to Indianapolis with the former's car which leaked badly causing Sam to get wet feet, resulting in a bad cold. He, therefore, does not want this same thing to happen in the new boat. . . . Charles Clawson has just returned from a week's vacation during which he expected to do a lot of fishing. Since the weather was very wet and cool, he decided to go duck hunting instead. From all reports he did very well, coming home with two gunny sacks full of fowl. We are wondering if they were of the wild or domestic variety. . . . Pigs seem to be the topic of conversation among some of our co-workers. Each and every one of them have been telling us all about their litters and the excellent qualities of them. At the present time there seems to be great rivalry between Leo Herber and Lindsey Eastes to see which one can come up with the best pig story.

Great minds have purposes, others have wishes.

From the latest reports, Ed Smethers is quite an authority on the latest type washing machines. . . . Since Fred Bishop has started building his cottage at Loon Lake all of his buddies are doing their fishing elsewhere. Come on, fellows, don't let Fred down like that. . . . Gurney Lindley had quite a time getting a die started the other day when be was accidentally given a left-hand die at the tool crib. . . . Claude Gill, formerly of this group, is now driving a Willys with a special bumper. It has the imprint of a telephone pole in the center. How about it, Claude, did it come like that? . . . Doyle Huffman is sporting a new Chevrolet, too. . . . Everyone is wondering what character Howard McMaken will play in that St. Joe Legion presentation coming up soon. . . . Bill Walde celebrated another of life's milestones last week. Bill says they slip by pretty fast. True, Bill, quite true. . . . That fog around my bench last Thursday was caused when I opened a needle valve on an oiler too far and it got away from me. Boy, did I oil things up in a hurry? . . . Gurney Lindley spends a lot of time keeping that new Kaiser polished and boasts of the mileage he gets on the gas. But when you take in how far he walks to get gas it's no wonder he gets good mileage. . . . Cecil Strong was a visitor to the crib this week. . . . Bob Griffin, George Lambroff and Ray Brown are now working on set-up work in the field. . . . John Marks is the new apprentice in the group. . . . Ernie Brown was busy over the week-end with the Moose convention in Fort Wayne last week. . . . Gene Werling can pick 'em up and lay 'em down in a volleyball game if he has a little lightning to spar him on as recently happened when the lightning struck a tree near his game. . . . Russ "Hot Rod" Deveny was given the definition of the word STOP by one of the more courteous cops the other a.m. on his way to work. . . . A dinner was held yesterday in honor of Bill Buuck, who retired. He was surprised, too. There will be more coverage on this in next week's issue.

Firemen Lose To Apprentice, Lab Tops League

Zurbuch allowed only two hits, as the Apprentice School won their third game. They beat the Firemen, 11-3, in the Inter-division Softball League. This was a close game until the seventh inning, when the Apprentices got eight of their 11 runs.

The Works Lab stayed at the top of the league by whipping the Main Office, 12-3 behind steady, five-hit pitching by Harold Egeman.

Winter St. won their first game by downing the Fractional team, 12-2.

Standings:

	Won	Lost
Works Lab.	4	0
Apprentice	3	0
Squares	2	1
Winter St.	1	2
Firemen	1	2
Main Office	1	3
Fractional	0	4

Police Down Owls, 11-1

The G-E Owls met their match in their old rivals, the F.O.P. The Police won by the score of 11-1. This was the first time they were ever able to do the trick.

Stauffer started on the mound for G-E and gave up seven runs until he was relieved by Boyer in the sixth inning. Greeno was behind the bat.

	R.	H.	E.
G-E	1	4	5
F. O. P.	11	14	3

Stauffer, Boyer; Greeno: Marvin; Shafenacher, Butts

The column sounds more and more like a broken record, "The Hot Shots, the Hot Shots, the Hot Shots." How can I help it? Those guys went out last Wednesday and shot a 154 total, or 38.5 strokes per man. The way I figure, that is "plenty classy" golf. This was their best effert in three years of league play. Jim Sternberger and Oz Bunch had 37's; Warren Wickliffe, a 39; and Bob Craig, 41. Their victim of the day was Walt Pook's team No. 5 by thirteen points. team No. 5 by 13 points. Team No. 5 shot six strikes under their average, but it just wasn't enough.

The Jolly Boys pushed No. 1 into second place of the odd side with an eight point thumping. Jim oung was low for both teams with a 43.

Shooting 17 strokes under their average, John Shanahan's team No. 3 swept past team No. 1 on the odd side by trouncing Bernie English and company by 16 points.

The Standings:

ODD		EVEN	
No. 3, Shanahan	+25	No. 6, Craig	+75
No. 1, Stauffer	+16	No. 2, Stanger	—23
No. 5, Pook	—22	No. 4, English	—71

Did you know vacation is only four weeks away? Or have you counted the hours? . . . Seems like we had a very quiet week here. Nothing stupendous, which reminds us to remind you to use the Works News box by the time clock to drop your stories in—anytime. . . . Our deep sympathy to Don Kruse in the death of his father. . . . Our first "17-4 Night" at the baseball game was a big success with many of our neighbors at the game. If you missed it, you should be sorry for it was a wonderful opportunity to meet your co-workers and their families for an evening of fun. Next time don't be so hesitant. See you at the game! . . . Don't forget our Wednesday evening games, either—let's boost our team. . . . Congratulations went to Imogene Hortenstein, who is the proud mother of a 6½ pound baby girl. Red-haired, too. Many of the gang will remember "Imie," who was our timekeeper.

Don't miss the free fireworks display after the Voltmen vs. Lafayette game Saturday night at Dwenger park.

TOUCHING THE BASES

by Walter Hirsted

The Auscos won a tightly played game from Michigan City, 3 to 1. Mack Stewart, ace of the Ausco mound staff, outpitched Chet Brewer of the Cubs to rack up his sixth win of the season. Winters and Hofferth paced the attacks of their teams with two hits each.

Line seore:

Michigan City	001 000 000	1	7	2
St. Joseph	100 110 00x	3	9	2

Brewer and Hofferth
Stewart and Westerkamp

* * *

Red Sox Wallop Buds

The Red Sox overwhelmed the Buds at Lafayette in a game enlivened with a rhubarb of moment between first the Lafayette team and the umpires in general and later between Red Sox pitcher, Herring, and umpire, Hood.

The game was pretty dull as the Red Sox again elaimed Ververka as "cousin" by shelling him out with eight runs in less than four innings.

Line score:

Benton Harbor	000 000 050	5	7	2
Lafayette	302 300 07x	15	16	1

Ververka, Morris, Rossi and Kovach; loser, Ververka
Herring, DeLion and Hixson; winner, Herring

* * *

Auscos Trim Red Sox

The Auscos continued to hold their spell over the Red Sox by whipping the Rosser men at Edgewater park, 9 to 5. Lafayette looked like some of the Voltmen performancês as they eame up with six errors to make the Auscos task easier.

Lafayette	000 104 000	5	12	6
St. Joseph	032 003 01x	9	12	2

Hazel, Clifton, DeLion and Hixson; loser, Hazel
Katz, Albosta and Westerkamp; winner, Albosta

Red Sox Beat Auscos

The red hot Red Sox rallied in the eighth inning for three runs to overcome the Auscos, 5 to 4. The Auscos had seemingly put the game away in their half of the eighth, when they drove Herring to cover with a four run blast; but the Red Sox came back to beat Mack Stewart. Augie Hixson paced the winners with three hits.

Line score:

St. Joseph	000 000 040	4	5	3
Lafayette	010 010 03x	5	8	3

Stewart and Westerkamp
Herring, Hazel and Hixson; winner, Hazel

Rambling Notes

Jim Wallace, who shut out the Voltmen last Friday, has decided that as semipro ball the Michigan-Indiana league is plenty tough. In turn, both the Buds and the Volts, who have sampled his assortment of pitching wares, both declare that Jim is the fastest pitcher in the league.

* * *

The league office has announced rulings on protested games and pronounced fines on several players mixed up in rhubarbs recently. The Auscos protest of a loss to Michigan City, 11 to 10, on the grounds of use of an ineligible player by the Cubs was disallowed on the very ample grounds that the Auscos also used a player who was ineligible. The question that comes to mind here is how the Cubs can be allowed to hold a victory under the circumstances. Why not chalk up a loss to both sides.

The Studebaker protest of the game forfeited at St. Joseph was disallowed on the grounds that after the umpires had tossed four Auto men out of the game, the Studebakers did not have the necessary nine men left to continue.

Individual players were fined as follows: Pitcher Lee of the Studebakers, First Baseman Logan of the Auscos, Catcher Morgan of the Studebakers and Pitcher Herring of the Red Sox, $15 eaeh for ignoring the rule against putting hands on the umpire.' Catcher Westerkamp of the Auscos, $25 for ereating an objectionable scene in front of the Benton Harbor fans. All coneerned were warned that the next offense would result in fines of $50 and suspension. What has happened to umpire Hood who was indefinitely suspended for his altercation with Art Herring was not disclosed.

* * *

Many Voltmen fans are wondering just what does go on around the M-I loop. When Al Hazel left the Voltmen he gave as his reason that he was on 24-hour call at his job in Indianapolis and could not get farther away than Lafayette. On that basis he was given his release. Since then it has been noted that he found no trouble in getting to St. Joseph on a Friday evening, which meant that he had to leave work early. Manager John Rosser of Lafayette claims that when he signed Hazel that Al said that he could make all games—it might be added that Rosser also was informed by the Voltmen management when released here of his statement that he could only travel to Lafayette. Something looks fishy.

* * *

From all reports the league meeting held at Rochester last Monday was as warm and humid as the weather. Windsor was admitted to the league to replace South Bend which will conclude its schedule tomorrow night. Windsor will pick up the South Bend standings and schedule.

It was voted at the meeting to divide up the South Bend players by choice among the other teams in the league with the order of choice going in inversely to the team's standing in the league. This was agreeable to all except Manager Carl Kennedy of the Auscos. Kennedy won't deny that he was tampering with Lefty Lee contrary to league rules and he wants him so badly for the Auscos that he will try any method to get him. If he doesn't turn up in a Voltmen uniform it will look funny, as with first choice and needing pitchers as badly as they do the Volts can sure use him. Waldo Tiscornia has ordered Kennedy to get pitchers at any price but be sure he gets them.

M-I LEAGUE STANDINGS
(Includes games of June 26)

Benton Harbor, 10, VOLTMEN, 1.

Voltmen Blanked By Philadelphia In 5-0 Downfall

By Bill Hunt

The hitting of Catcher Stan Glenn combined with the pitching of Henry Miller gave the Philadelphia Stars a 5-0 win over the Voltmen Thursday night, July 23, at Dwenger park.

Miller hung a horse collar on the Voltmen as his battery mate, Glenn blasted two mighty home runs to drive in all five runs for the visitors. Charlie Shipman was fairly effective, except for the home runs. He allowed one hit or less per inning until the seventh when a single, an error plus the home run, netted three runs. Then a single and another home run made it five.

The Voltmen were totally ineffective against pitcher Miller. They got part of a rally started in the seventh. Chinewicz led off with a single to left with Southworth also singling, then going to second and third on second baseman Clarkson's error; but the next three men went down swinging to end it.

Olin Smith continues to look surprisingly good at first base, as he fields well and handles all throws. He also got two singles at bat. The new outfielder, Chinewicz, looked very good in the field. As usual he also got two nice singles. We are happy to see him start hitting inasmuch as he is the kind of hustling ball player we need.

John Dudick's tag of Watkins in the third inning, when he tried to stretch a double, was probably the play of the game. He had to chase him to put him out after a Ty Cobb super fade-away slide.

Homestead Grays Edge Voltmen, 5-4

By BILL HUNT

The Voltmen lost a 5-4 decision to the famed Homestead Grays, their second defeat at the hands of the Grays this season. The game was played Wednesday night, June 22, at Dwenger park.

Braden's boys almost managed to pull a game—badly lost in the first inning—out of the fire, but they were unable to drive in runs as they left 10 potential runs on base. The Voltmen messed up the first inning royal as Lee Pfund pitched good ball, but had all sorts of trouble fielding and throwing. Only one run was hit in, the rest were kicked in. It might be added that fate was far from kind inasmuch as all the errors turned out to be about as costly as an error can get.

Pfund is shown coming into third on a double by Henry Stramm.

Stramm scores from second on Gabby Horman's single. Hugh Orphan is at the right and John Dudick, at the left, above.

Richardson popped to Dudick, Gary doubled off the left field fenee, then the fun started as Stramm let a ball roll through his legs. Fields drove one to the box. which Pfund knocked down and threw to second too late. Clifford then doubled to left to seore Bankhead. On the next play, Jackson hit a hopper to the mound whieh Pfund fielded easily with Fields 10 feet off third. He threw to Dudiek to trap him, but it was wild so Fields and Clifford seored.

The Grays only managed three singles off Pfund after that. They did seore the winning run after Trice tried to go from first to third on a sacrifice, but Dudiek tagged him beautifully only to have the umpire miss the play. So he was safe. He then scored on Richardson's single.

The Voltmen scored in the first when Hormann and Dudick walked. Then Smith hit a double whieh scored Hormann, but caught Dudick at the plate on a Trice to Kaiser to Clifford relay. Gabby Hormann drove in two in the fifth, after Pfund singled and Stramm doubled. We looked like we were on the way in the ninth, as Stramm lay down a perfeet bunt. Then he went to third on Fran Green's to right. Then the same miserable umpire agreed with the Grays that Stramm did not touch second so he was ealled out. Hormann walked, Dudick singled, then Smitty drove to the center field fence where Fields dropped it; but only Green seored. Bobilya and Chinewicz then fanned to end it all.

It should be mentioned that Olin Smith is doing a bang-up fielding job at first. He went out after a ground ball and hung a perfect toss over the bag for Pfund to take and retire the man. Also he has been stretching well for Stramm's throws from deep short, whieh have been outs only by Smitty's stretches in some cases.

Grays	AB	R	H	Voltmen	AB	R	H
Richard'n,ss	5	0	0	Stramm,ss	4	1	2
Gary,3	5	1	2	Green,lf	5	1	1
Bankhead,2	2	1	0	Hormann,c	2	1	1
Fields,cf	4	1	0	Dudick,3	4	0	1

Grays	400	000	001—5
Voltmen	100	020	001—4

Lead-off batter, Lee Pfund, smacks a single in the fifth inning.

More than a hundred employees from Bldg. 17-4 bought out a section of seats at Dwenger park Wednesday night, June 22, to see the Voltmen play against the Homestead Grays. Clarence Hartman handled the arrangements for the group.

On "Being Ourselves"

For nearly two centuries we Americans have been doing as we please—buying and selling as we like—just freely "being ourselves."

We are still doing so. And that's a more wonderful privilege than we realize—one we want to keep. Few people anywhere else in the world can any longer do—or have—what they want.

But we have been abusing this privilege—neglecting our selfish duty—just not intelligently "being ourselves" in our own best interests as individuals and as a nation. We have not been gaining—and acting on—the additional wisdom and prudence needed to match the growing opportunities and responsibilities of our freedom.

To keep free enough to go on "being ourselves" and living well, we must master economic truth. We must learn that a large part of our wants—and even of our apparent needs

—can be, and sometimes should be, postponed. We must have the moral courage to act accordingly—to put off such buying and save *when values get bad in good times*, to use our income and savings to *buy with confidence when values get good in bad times*.

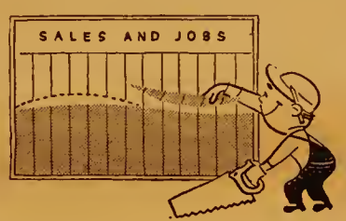
We have just come through an excessive boom in which too many of us were "being ourselves" with stupid and reckless abandon—first diluting our money and then needlessly bidding against each other to cut the value of our money further. We are now in a mild deflation—our first step in imposing on our free selves the correction that we were certain sooner or later to want to—or to have to—make to our previous excesses.

We Americans are mighty lucky to be thus still free enough to have ups and downs. Wherever dictators, socialists, or "planners" rule, there are of course no booms—just one long bust.

But we don't need to force our booms up as high or let our busts go as low as we have been doing. We don't need to be frightened or puzzled about what to do.

If we had just recognized last year and earlier that we were in a big boom—and then had prudently restrained our buying while adding to savings for use when the money would buy more—we would not only have sawed off the costly peak but would have lots more money to spend now.

If even now we will just calmly recognize that we are undergoing a correction of our own excesses—we can make this recession shorter



and shallower, can turn sales and employment back upward sooner. Management and employees can do it by pitching in with more creative thought, interest, skill, care, and effort in our work, while having the confidence to use income—and some of the savings we did make—in taking advantage of the bigger values now being made available.

False prophets are again in full cry against such true and tried and honestly practical principles. Too many are out again with fresh hopes of plundering our system and enslaving us to centralized control. They are trying to get us to adopt as a cure the "something-for-nothing" schemes that would reduce incentive, lessen competition, raise costs, damage savings, discourage buying, deepen unemployment, and prolong this recession.

Just our monkeying with these very same ideas stretched out our last depression by ten long years. We were printing money, raising costs, and controlling each other, when we should have been keeping our money honest and competing with each other under the inspiration of worthwhile incentives to get costs down and values up—to achieve the only kind of "supply-and-demand" situation in which our free citizens will furnish the sales that make the jobs.

Phony ideas made our last war frightfully costly beyond any need; further inflated the recent post-war boom that had already been made inevitable by excessive money printing and by false teachings from high places. These are the false collectivist theories that have made beggars and slaves of people everywhere to just the exact degree they have embraced these theories.

In contrast to any such bankrupt and discredited scheme, sound thinking people are now advocating and practicing a dynamic, realistic, honest program of progress toward more sales and jobs. Enlightened companies are expanding and improving facilities. They are offering more attractive products, lowering prices, selling harder. They are urging that all concerned—employer and employee, company and union—put more thought, interest, skill, care and effort into getting a bigger value to the customer.

Well informed people know that about 95% of the public still has the income and savings for buying in sufficient volume to put the unemployed back to work just as soon as products and prices can be gotten attractive enough. We are all meanwhile for every proper and needed public relief to those relatively few who are unemployed.

As long as we have our freedom, we'll continue to have our ups and downs—because we will be wanting to be free to change, wanting to be able to act one way for a while and then act another way for another while. But we can level out these ups and downs—cut off the peaks and fill in the valleys—if we will only have the sense and character to shun the false and embrace the true. Let's do just that this time!

Let's all get busy making more and better things at more attractive prices for others—so we as buyers can then confidently expect more and better things at more attractive prices from everyone else. That's the way to get back to good times the quickest. That's the way to be able to go on "being ourselves" to our own best interest as individuals and as a country.

GENERAL ELECTRIC COMPANY

VICE PRESIDENT—EMPLOYEE RELATIONS

FORT WAYNE WORKS
NEWS

Volume 32 | FORT WAYNE, INDIANA, FRIDAY, JULY 8, 1949 | No. 27

You cannot bring about prosperity by discouraging thrift. You cannot strengthen the weak by weakening the strong. You cannot help the wage earner by pulling down the wage payer.

—*Abraham Lincoln*

Tobin, Boulware Discuss Outlook For Business On National Network

SECRETARY OF LABOR, G-E VICE PRESIDENT BELIEVE PRESENT RECESSION IS TEMPORARY

Secretary of Labor Maurice J. Tobin characterized our present economic situation as "temporary," and as only a "settling down" period, in a round table discussion over the American Broadcasting Company radio network Tuesday, June 28.

Participating in the discussion were Secretary of Labor Tobin; Vice President L. R. Boulware of General Electric; and Dr. Carl Prutton, Vice President of Mathieson Chemical Corporation.

"The more you check it, the more difficult you find it to find anything wrong basically with the economy," Secretary Tobin continued.

Economy Is Sound

He disclosed that industrial workers were at the moment suffering greater unemployment than the others, but pointed out "there is still a tremendous consuming power in the hands of the American people and they are spending the money."

(Continued on page 4)

Accident Rates Are Reduced

During the first quarter of 1949, the Fort Wayne Works reduced the accident frequency and severity rates set during 1948. The severity of accidents here last year was .076, now it has dropped to .029; the frequency of accidents was 3.20, now it is 1.64.

The accident rates at the Fort Wayne Works were far below the average for the entire Company and for the Apparatus Department during the first quarter this year, according to a report issued recently by the Company.

Herbert Eaton Takes First Place Honors In Speech Contest

Herbert Eaton, K. B. Parks, and U. L. Hearn won first, second, and third place respectively in the speech contest of the Effective Business Presentation Class Tuesday, June 28, at the Chamber of Commerce.

The class is a part of the Sales Training Program of the General Electric Company and is instructed, in Fort Wayne, by J. P. Coughlin, of the Specialty Transformer Sales division.

The six participants in the contest, who were voted by the class as outstanding members, were Herbert Eaton, K. B. Parks, U. L. Hearn, Brooks Brickley, Edward DeCrappel and Larry Hume. The topics, a variety of current interests, were presented orally to portray their ability to effectively set forth ideas to their audience.

B. R. McClure, K. W. Michael and W. H. Sunier were the judges. P. H. Ward was chairman of the program.

Guests included P. M. Staehle, A. W. Bartling, R. C. Hanna, F. J. Kissell, P. S. Stough, H. K. Pritchard and Cyrus Stonehill.

Chicago White Sox To Play G-E Voltmen Here July 12

The Chicago White Sox of the American League will journey to Fort Wayne's Dwenger park Tuesday night, July 12, for an exhibition game against the G-E Voltmen.

The White Sox appearance will be the only opportunity Fort Wayne baseball fans will have to see a major league team in action here this summer.

All seats for the White Sox tilt are reserved and may be obtained for $1.50 at the G-E Club office or at the Dwenger Park box office the night of the game. Starting time will be 8 p.m.

The White Sox will bring along such stars as Luke Appling, one of the greatest infielders of all time; Catcher Joe Tipton; Infielders Gene Markland, Don Kolloway and others; plus Pitchers Al Gettel, Floyd Bevens, Marino Pieretti and many other well-known diamond stars from the Windy City.

The Sox-Voltmen tilt is scheduled the same date as the Major League All-Star Baseball Game in Brooklyn. This game will prevent Cass Michaels from appearing here, Charles A. Comiskey II has informed Charlie Wilt, Voltmen business manager. Gus Zernial and several others on the injured list will also be prevented from playing here.

(Continued on page 11)

Apprentice Alumni Plan Stag Picnic

The G-E Apprentice Alumni stag picnic will be held at 5:30 p.m. Thursday, July 14, at Lunz's barn. Tickets can be obtained from contact men.

Entertainment will include a ball game featuring Bill Holloway's West Side Gas House Gang against Eddie Bienz's East Side Boiler Makers.

Directions for getting to the barn are as follows:

Travel the Bluffton road over a mile past the Broadway bridge to Sand Point road; turn right and go to the first railroad tracks; then turn down the first road to the left.

Elex Children's Picnic Will Be Held Wednesday

The Elex children's picnic will be held Wednesday, July 13, at West Swinney park. Children under the age of 12 years old will be guests of Elex members at the outing.

Members are reminded to bring their own table service for the picnic dinner, which will be served from 5 to 6 p.m.

Logan Named Ass't. To General Manager Of Apparatus Dept.

John W. Logan, of Schenectady, has been appointed Assistant to the General Manager of General Electric's Apparatus Department, it was announced today by Henry V. Erben, Company Vice President and General Manager of the Department.

Mr. Logan will assist the general manager on administrative matters. The appointment is effective immediately, Mr. Erben said.

In charge of security matters and a member of the General Manager's staff since November, 1947, Mr. Logan will also continue to supervise and coordinate security activities on U. S. Government contracts in the Apparatus Department.

108 Employees Receive Suggestion Awards

Franklin Blotkamp, FHP Motor Div. 13, received an $85 award for his suggestion to purchase certain material cut to size, eliminating shearing operations. He is shown with the application of his idea in the above picture. Left to right are: Ed Kimmel, Harold Hart, Mr. Blotkamp and Frank Calkins.

Blotkamp Tops List With $85

Franklin J. Blotkamp, Taylor St., led 108 suggestors with an $85 award for his idea pertaining to end fibre material. The total awards amounted to $1,157.50.

Next on the list was Fred Chronister of the Decatur Plant, who received $55 for his suggestion about oil well covers. Helen Bilskie and Laureen Procise, Bldg. 8-2, divided a $45 award for their suggestion on a telephone switch.

Forty dollars went to Hiram I. Hippler, Tiffin, who suggested cooling water on furnaces. For his idea to re-arrange base assembly, Charles J. Miller of the Decatur plant received $32.50. A $30 award went to Paul R. Castle, FHP Division 15, on his suggestion to increase air gap.

Three men received $25 awards for suggestions. They are Jesse

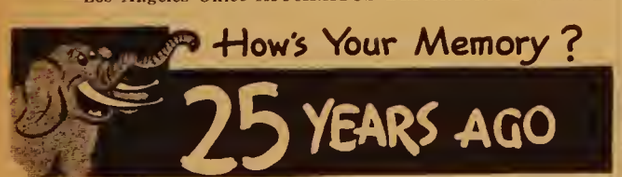
We Are Legislating Ourselves Out Of Our Fifth Freedom

It wasn't so long ago that there was a lot of talk about the famous Four Freedoms. Remember them? They are Freedom from Want; Freedom from Fear; Freedom of Speech; and Freedom of Religion. The writers of these famous phrases had hoped that mankind throughout the world might someday enjoy the blessings of all four. Indeed, our government at that very moment was prosecuting a war toward that end.



But, unfortunately, the originators of the Four Freedoms left out another and perhaps the most important of all. By way of explaining what that fifth freedom is, let's consider a convict, a prisoner in jail. He is also blessed with the Four Freedoms. He is free from want; he eats well, he is clothed, he has a place to sleep and a warm home. He has freedom from fear; he need fear no one, not even his own enemies. He can talk about anything—shout whatever he wishes—so he has freedom of speech. And he can worship in any way he pleases, in fact, is urged to do so—hence, freedom of religion.

But what makes him different from you and me? Since he is surrounded by the Four Freedoms, what more could he ask? It is **Freedom of Enterprise**. Freedom of Enterprise, something we have had since the earliest beginnings of these United States. Freedom of Enterprise—freedom to set out upon a venture, to attempt an undertaking of our own; freedom to do as we wish so long as we do not break the law.

Now we see the beginning of the slow dissolution of the most important of all these Freedoms. We are being legislated out of our birthright, the one distinction which sets us apart from all other peoples. We are trading our most precious American asset for socialism in the form of **compulsory** unemployment insurance, **compulsory** social security, **compulsory** health insurance. And there are others yet to come—**compulsory** legislation which is gradually imprisoning us as securely as the steel and concrete, the bars and stone that surround the convict. True, we too shall have our Four Freedoms, but of what value will they be if we shall have lost our most unique, our most precious possession, our Freedom of Enterprise. We shall then have legislated ourselves into a dictatorship.

You have a chance—yet—to preserve your heritage, your Freedom of Enterprise. If you do **not** act, you may never again have that privilege. The representatives **you** elected last November are your last faint hope in the struggle to preserve your very **own personal** freedom. You elected them to represent **you**. By all means, then, let them know what **you** think and how you feel about the matters which so intimately affect your life. Write today—this very evening—and tell your representative what you want him to do. If you and I fail, we shall have created our own prison out of laziness, neglect and indifference.

—Los Angeles Office APPARATUS DEPARTMENT WEEKLY

Raymond Kierspe, who is well known from the active part he has taken in amateur theatricals, finished the four-year Machinist and Toolmakers' Apprentice Course, April 21. For good work done in both shop and class room he received a three months' credit on his time. The usual $100 bonus to those who satisfactorily complete the course, was also given him. Mr. Kierspe is a native Fort Wayne boy.

Charles Kensill completed the Machinist and Toolmakers' Course May 19, and was awarded the $100 bonus. Mr. Kensill is also a native Fort Wayne boy, and after attending the public grade schools, had two years at the Fort Wayne high school before taking up the apprentice course here.

Herbert Sullivan might almost be called a native G-E boy. Born in Fort Wayne, he attended the public grade schools before starting work here at the G-E as a messenger boy. Appreciating the value of training he attended the G-E night school, and later enrolled in the Machinist and Toolmakers' Apprentice Course.

Paul Weitzman also finished the Machinist and Toolmakers' Apprentice Course on June 2. He received the $100 bonus, also the three months' credit on his time for doing good work in both shop and classroom. Mr. Weitzman is a Fort Wayne boy, attended the public grade schools and the Fort Wayne high school for two years before taking up the apprentice work.

HUGH CRANE *discusses* Employer Problems Of Today

NEW YORK—It struck me the other day, "What would I do if I was an employer in a falling market?"

The problem isn't a very pleasant one to think about. As they say about policemen somewhere in Gilbert & Sullivan, I imagine that in a recession "an employer's life is not a happy one."

Because to begin with, when you get right down to it, an employer is a merchant. He sells goods. He hires people to make the goods. But if he can't sell the goods, how can he hire people, or even keep the people he has?

Not Always A Solution

Of course he can cut prices and try to recover his market. But that doesn't always work. For one thing, price cuts don't always make markets. Maybe buyers aren't in the mood; it sometimes happens that way. And for another thing, how is he going to pay for it? Cut wages? Go broke? There's a limit to how far anybody can keep on selling things for a dollar that cost two dollars to make.

But that isn't the whole story. An employer is more than a merchant. In a way he's also a father. And like a father, he may be in trouble but he still has responsibilities to a lot of people who without his help couldn't or wouldn't like to face the cold, cold world of buy-and-sell, dollars-and-cents, as he is in the habit of doing.

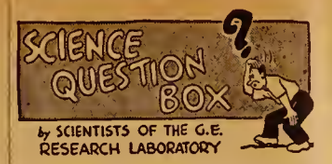
The Big Question

But these responsibilities aren't simple. They run like this perhaps. "How much money is there, and how far will it have to stretch? How much can we spend now, but how much do we need to keep on hand to stay in business, to keep fit in competition, to develop new products?"

No thanks. "Leave me be" with no more responsibilities than my secretary, my maid, and my old dog Caesar.

But there are two things I can't understand, in today's news.

I don't understand why so many employers and corporations keep hollering for a balanced federal budget—which surely means less business and more taxes.



And I don't understand why so many unions, including the unions that deal with the larger corporations, keep plugging for things like bigger corporation taxes and penalties on corporations that plow back their earnings into the business.

On both these points these two groups of people seem to be defeating their own ends. There's an old theory of "economic determinism," that every group and "class" naturally seeks its own interests first. Here they don't seem to.

On the budget side it seems to me that employers would figure this way. "The public has money but isn't buying. We need customers to keep our people in jobs and our machines busy. If the public doesn't want what our people can turn out on the machines, why shouldn't the government use it?" (Mind you I feel this only so long as markets fade and prices fall. During the big boom I was all for less government spending and against almost all the bright Washington spending ideas).

Front For Nationalization

On the other side, it seems to me that when unions plug for bigger taxes on industry they are plugging for weaker employers with smaller resources to carry fewer workers for shorter periods. And when they plug for an "undivided profits tax" they are making it harder for employers to put earnings back into new plant, into reserves, into research, into new products—in short, into future jobs. I can't understand it, unless these unions are running interference for nationalization of industry. And I can't see the point in that, either, from what I've seen and heard about government jobs and government pay-rates.

Q: How can a rocket operate in a perfect vacuum where there is no air for it to push against?

A: A rocket provides its own material to push against, in the form of the gases that it ejects. It is the reaction of "kick", as these gases are shot out, that drives the rocket ahead, so it would work better in a vacuum, like that in interplanetary space, than in the air, where there is some friction.

OUT OUR WAY

By J. R. WILLIAMS

Accident Rates

(Continued from page 1)

The Works' frequency rate, which is the number of lost-time accidents per million man hours, was 1.64 for the first three months of tbis year. The average for the Company was 4.65 and the Apparatus Department reported 5.39.

An accidental injury or occupational disease sustained by an employee while at work which disables him to the extent that he is unable to perform a regularly established job on any subsequent day, or an injury which results in permanent functional loss, is classified as a lost-time accident.

The severity rate, which is the number of days charged per thousand man hours, was .029 for the Fort Wayne Works, in comparison to .360 for the Company and .384 for the Apparatus Department.

Days charged refers to the actual days an employee is unable to work because of an injury, or days charged as a penalty because of a permanent functional loss resulting from injury.

108 Employees

(Continued from page 1)

J. Batchelder, FHP Motor Division 13; Richard Zirger, Tiffin, and Russell W. James, Specialty Transformer Division 94.

The following received various awards in amounts ranging from $5 to $20:

FHP Motor Div. No. 1: Edwin E. Hilsmier (two awards), Frank N. Brindle, Avery Spayde, Lester A. Hubartt and Howard C. Taylor.

FHP Motor Div. No. 13: Charles E. Clawson, John Wood, Edward D. Fischer, Kenneth Johnson, Herbert F. Saurer, Preston H. Hille (two awards), Donald Long, Clare Tedford and William A. Sivits.

FHP Motor Div. No. 14: Clarence W. Rothgeb, William L. Smith, Waldo D. Martin (two awards), Louis Hinen, Charles C. Rupel, Virgil J. Hammons, Forest Grimm, Lamar Alwine and Herber F. Seslar.

FHP Motor Div. No. 15: William A. Brase, Ernest T. Kromm (two awards), Neil W. Anderson, Kenneth L. Guisinger, Voil F. Latourette, Wilbur E. Tibbitts, Joe Parent, Mary E. Steward, Richard L. Anderson and Vernon C. Dafforn.

FHP Motor Div. No. 16: Carl C. Clevenger, Charles T. Irwin, M. R. Cook, William G. Martin, H. C. Lemmel, Robert L. Schuelke, Franklin O. Bly, Gerald J. Birkhold and Ansel D. Feighner.

FHP Motor Div. No. 19: George A. Silk, June K. Martin, William Davidson, Elmore R. Hurt (two awards) and William Knuth.

FHP Motor Div. No. 33: Jack W. Winebrenner, Donald F. Thomas and Kenneth Gillenwater.

Decatur Plant: Robert Osterman, Clarence Morgan, Lloyd Ahr, Waymon Patrick, Frank Bohnke, Jacob Hodle and T. H. Gehrig.

Tiffin Plant: Eugene D. Cooley, Salvatore J. Aiello, Don R. Kirchner, Earl N. Beard, Gilbert E. Theis, Clarence E. Doffman, George Baumgardner and Herman J. Logsdon.

DeKalb Plant: Francis Sibley, Marian McCabe, Fay Snow, Fredricka Siebauer and Loren Wood.

Specialty Transformer Dlv. No. 91: Paul G. Rowan, Robert A. Bunyan and Ruby M. Beard.

Specialty Transformer Div. No. 93: Edward M. Dullaghan, Eugene F. Mettler, Mary M. Wiedman, Frank F. Schultz and Ralph Bradtmiller.

Specialty Transformer Div. No. 94: Russell W. James and Catherine Parkins.

Danville Plant: Roy A. Tarpley (two awards), Everett Anderson and Albert F. Hegedus.

Motor and Generator Divisions: Ralph E. Jacobs, William Hoelle, Arthur B. Miller, Charlotte Bowman, E. L. Auth, G. K. Buchan, Wayne W. Blake, Joseph A. Burton and Waymon L. Morton.

General Tool Division: John A. Inches and Robert M. Truelove.

General Service Division: Roscoe C. Hamilton and Walter E. Cook.

Distribution: Fred D. Blum.

Miscellaneous: Robert G. Warren and Paul E. Wuttke.

Four Retirements Are Announced

William Buuck

William Buuck, FHP Motor Division 13, retired Friday, July 1, after a service record of 32 years with the Company.

Beginning his General Electric career in October, 1916, Mr. Buuck first worked as a millwright in the General Service division. He later became a machinist and transferred to Taylor St. on that job in 1947. Later in 1947, he became a maintenance machinist in the tool room of FHP Div. 13.

Charles Getts

Charles Getts, General Service division, went on retirement Friday, July 1, after working for G-E 26 years.

Mr. Getts was first employed in September, 1922, as a construction helper in the General Service division. In 1933 he was made an elevator operator and two years later became an inspector in that division. At the time of his retirement, Mr. Getts was a crane and elevator repairman.

John Hengsteller

John Hengsteller, General Tool division, recently retired after 32 years of service with the Company.

Starting for G-E in 1917, Mr. Hengsteller worked in Bldg. 27 on such jobs as blacksmith, annealing and punch presses. He later worked in Bldg. 26-1 and at the Winter St. plant. He returned to Broadway in 1936 as a blacksmith in the General Tool division. At the time of his retirement, he worked on heat treating.

E. A. Kinney

Elmer A. Kinney, General Service division, went on retirement Friday, July 1, after 39 years of service with the General Electric Company.

Mr. Kinney began working for G-E in 1910 as a helper. He later transferred to Bldg. 27, and then went to the General Service division as a leading operator.

He was a sheetmetal and steel worker at the time of his retirement.

Suggestion Brings $25

Jesse J. Batchelder, FHP Div. 13, has received a $25 award for suggesting a method of salvaging back plates.

In honor of her retirement on June 30, Ellen Raby was guest for a dinner in Bldg. 16-2. The following attended: Vivian Frauhiger, Hilda Walda, Mabel Booher, Mary Rupp, Irene Pulfer, Luella Guy, Jayne Steinbacher, Toni Lause, Ada Bultemeyer, Jo Alles, Opal Bates, and Therese Prine. She also received a gift from the entire division and a wish for happiness and health to enjoy her leisure. . . . Edna Mowery took a trip through the Great Smoky Mountains over the July Fourth holiday. . . . No news came from black armature group. Paul Kennerk was on vacation and things were pretty quiet. . . . Carl Stadelman is having a vacation this week. Says he intends to spend it in Warsaw—not the town of—but the strect of. . . . Worry-me-sick Saylor is such an expert at the job that Ed Glusenkamp left him a note and five cents to do the worrying for him while he was on vacation. That's just about working for peanuts. Let's hope Ed will feel justified in giving him a bonus for the job. . . . Someone will have to plant fish in Adams Lake again next year. At the opening of the fishing season, Al Kissinger caught the two bass someone planted there and last weekend he got the two bluegills on which the bass were to feed. From now on he will just fish—catching will be something else again. Of course, he can always use the lake for swimming—he says—although we've been told he can't swim.

Partizan Chapter Schedules Outing

The Partizan Chapter of Elex will hold an outing Tuesday, July 19, at the cottage of Mary Jane Buesking at Twin Lake. Members are to meet at Spy Run Ave. and State Blvd. for transportation to the lake.

A potluck lunch will be served. Members are requested to bring a covered dish, sandwiches and their own table service. Children are also invited.

Edna Berdleman is chairman for the day. Myrtle Bennett, Clara Cooper, and Mary Jane Buesking will assist her.

Mittermaier Is Granted Patent For Core Clamp

A. F. Mittermaier

Armin F. Mittermaier, Bldg. 26-2, has been granted a patent for his method of mechanically clamping the core structure of a fluorescent lamp ballast. While the various parts of the unit are held in a jig, the clamps are cast, one on each end, to firmly hold the assembly togetber.

Mr. Mittermaier is a mechanical specialist in the Specialty Transformer and Ballast divisions, and has been with the Company 24 years. This is the sixth patent.

"Life Magazine" Features High-Voltage Laboratory

Science feature of this week's issue of Life magazine is the opening of the new General Electric High-Voltage Engineering Laboratory at Pittsfield, Mass. In three pages, one in full color, Life records demonstrations at the $2,000,000 laboratory which were witnessed by more than 7,000 guests at an open house two weeks ago.

In text accompanying the article, Life says: "The artificial thunderbolts created in the laboratory will enable scientists to develop new means of protecting the electrical systems upon which U. S. homes and industries have become so dependent."

In the color page is shown the spectacular three-phase arc demonstration in which engineers are able to study the behavior of multiple short circuit arcs. Other pictures in the spread include a thunderbolt striking a model city street, a 7,500,000-volt impulse generator, high voltage vaporizing manganese wire, and an outdoor shot of man-made lightning striking a high tension line.

The Life article was one phase of the carefully-planned publicity program which accompanied the opening of the laboratory. Two weeks before the general opening, the Life photographer took his first pictures. Later, representatives of seven of the major newsreel and television syndicates were present to photograph the demonstrations. Several days prior to the open house held at the laboratory, a general press preview was held.

The story was given preferred position in the science section of last week's Newsweek magazine. Popular Science magazine is planning a picture spread which will cover several pages in the September issue. In addition to the magazine layouts, the opening received wide coverage in the daily press, both in pictures and text, and special radio and television broadcasts. Newsreel records of the event have already been shown in many theatres.

Elex Second Shift To Attend Outing At Pokagon Park

Elex members of the second shift will hold an outing at Pokagon State Park Saturday. They will leave the Indiana bus depot, corner of Jefferson and Harrison Sts., at 9:30 a.m. and return to Fort Wayne about 6 p.m.

Games will be played in the afternoon. The girls are requested to bring their own lunch and table service.

Armstrong Dies

Scott T. Armstrong Sr., 58, of 3124 Beaver Ave., died at noon Monday, July 4, after a heart attack.

A resident of Fort Wayne 37 years, Mr. Armstrong first came to General Electric in 1937 as a wire mill employee. He then left the Company, returning in 1940 to work in the wire mill. Since 1947 he was a stock keeper in Bldg. 17-2. Mr. Armstrong was a member of the South Wayne Baptist Church.

Services were held yesterday at the family residence.

Tobin, Boulware

(Continued from page 1)

He continued, "I would say that the whole economy seems to be extremely sound, considering the fact that we have come out of a war-time economy, and that we have been through pretty serious inflation in a great many commodities during the course of the post-war years."

Agrees It Is Moderate

Taking up the discussion, Mr. Boulware agreed that the current business re-adjustment is moderate so far and that there is no real reason for people further to withdraw their purchasing power from the market.

"We can come through it very easily if we will understand that it is a very natural thing and if we will not get afraid, and if we will realize the things we need to do to get out of it, and will do those things," he stated.

The public, he said, should scrutinize the new good values which are now being offered, while at the same time doing everything possible to reduce waste and improve quality on their own jobs to give corresponding good values to the people who buy the goods they make.

Buyer Is Boss

Mr. Boulware emphasized that "the buyer is back in the driver's seat, and he wants to be very sure that we know he is boss, and that we are really doing a good job for him."

Mr. Boulware said this was fine because it is under these conditions that we make progress. He cited instances of manufacturers who have first made price reductions and then pitched in to get their costs down, so that they can offer still more attractive prices and higher quality products. He emphasized that retail sales are still mighty good in comparison with any period but last fall, and that "in general there are a great mass of people who have satisfied their most urgent needs but still have millions of wants . . . and they will buy when they are convinced that we really have gone to work and gotten these values up and prices down and have made these goods attractive, and when they really think we are working for them again."

Our first obligation, he said, is to understand what is going on and not to become so frightened by current developments as to adopt some unsound false cure when the bold dynamic program business is now fostering will bring us soundly through this period.

Need for More Productivity

In Mr. Prutton's remarks, he added, "I would say the key to the entire situation is to get more productivity per worker-hour, and that includes workers all the way up through management; and secondly, to pick up the extra personnel that will be available with the higher production levels on new developments, new expansions, and the making of new products."

He explained how important it is that we improve all our old methods and create new things, thus adding to the output per worker and to the quality and variety of the services we perform for each other. He pointed out that research and scientific development are responsible not only for our high standard of living, but also for the steady increase over the years in the number of jobs which industry has provided.

Boulware: 'Keep Wages High'

In response to a question asked by the moderator, Mr. Boulware replied that "there has been a very, very minor falling-off in wage rates, and I think any action should be very slow in that direction. We should keep wage rates the same and get busy giving a bigger value from management and from labor out of our activities. We have had it pretty easy, both management and labor, for many years when people wanted what we had and didn't question us too much . . . we are surprised how much better we can do when the customer falters a little. . . . Then we get awfully ingenious in putting more interest and skill and care and effort into pleasing him better and giving him a bigger value. I think we ought to do all of that and keep the wage rates the same before we ever think of doing some of the things we have done in the past in our efforts to get values up and prices down. . . . I think we can do wonders for the consumers and at the same time keep wages high."

He again re-emphasized that these ups and downs in business are natural and that the only way to smooth them out is for the public to restrain its buying when values get bad in good times and then by confidently spending both income and some savings when values again get exceptionally good, as they do during periods of lowered business activity.

The discussion was moderated by Dean Philip Young, head of the Graduate School of Business at Columbia University. He is the son of General Electric's former Board Chairman, Owen D. Young.

Firemen's Annual Family Picnic

About 75 families attended the second annual Firemen's Family picnic at Franke park, Saturday, June 25. Throughout the day there were water battles staged, horseshoe pitching, ball games for the children, women's ball throwing contests and races. The firemen also had several ponies and a donkey for the children. Pop, hot dogs, ice cream and cracker jack was provided to fill empty stomachs.

The pictures above depict scenes during the day. The first picture of the top row shows a general scene of the crowd. The water battle, a refreshing moment for the participants, is shown next. In the fourth picture, Cecil Rose is presenting gifts to the winners of the ball throwing contest. They are: (l. to r.) Florence Boyce, Carol Breeden and Mrs. Jerry Webber.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

Did you notice Russ Rinehart's limp last week? Must have injured himself someway. Accidents do happen in some of the queerest ways. . . . Here are a few "was seens" for you: Will Irmscher was seen turning back from the flooded underpass at the Pennsy elevation on Broadway refusing to risk his new Chevrolet in the water. . . . Frankie Enderle was seen through the window of a jewelry store at the diamond ring counter. He claims that he was having a watch repaired. . . . Pat Butler was seen on the first floor of W and D's in an animated and seemingly enjoyable conversation with one of the lady clerks. . . . Jim McClain was seen in the Eagles parade mounted on his gallant steed. . . . Kenny Hart spent some time fishing at Waldron Lake as a guest of George Wolfe. He didn't catch any fish and George got a few carp. . . . Neoma Klaehn will soon give up single bliss and plunge into the sea of matrimony July 16. Oh, happy day! . . . The man with the brass armor, Theodore Schlup thinks he is going to be invited to the wedding of one of the fair sex in the division he works in, so he inquires about the reception and his take in food and liquid refreshments. Thinking his take is not quite enough, he approaches the fair maiden and says "Sorry I do not think I will be able to attend, but I could not turn down the $4 you will pay me not to attend. I am sure you will consider this a fair share and I promise you I will buy a sandwich and spend the rest for amber beverages." . . . Strawberries, night crawlers, and ancient vintage cars are the topics for the week. Johnny Campbell and Elmer Warner, noted strawberry raiser of Bldg. 19-3, almost came to blows over strawberries—not the berries themselves exactly, but the price of them. It seems that Johnny concluded a verbal agreement with Elmer to buy a large amount of berries from him, picking them himself, thus getting them at a reduced price. The next day a large chain grocery advertised them at a cent less per quart than John had agreed to pay. John couldn't see why he should break his back picking Elmer's berries when he could buy them cheaper at the store. He forgot that Elmer had offered him a reduced price in good faith, before the strawberry market crashed. Now Elmer won't sell to John at any price. It's just situations like this that lead to bloody feuds. . . . Oh yes, Howard Musselman invested in a crate of Warner's berries. After he got them home he decided he couldn't use them all so he sold what he couldn't use to the neighbors at five cents a quart more than he paid. We believe that practice falls in the category of huckstering. Now isn't there a law against fruit peddling without a license, or has Musselman got a huckster's license? Here's another one we heard about Howard Musselman. We don't know how true the story is, but we do know Howard. He arose one sunny morning, after a rainy night, and on looking out the window he saw a robin pulling a night crawler out of the ground. "Darn it," said Howard, "There goes another two cents." . . . Frank Elder, courageous soul, bought the earthly remains of a 1938 Packard, and intends, with Kenny Hart and Frank Coulter's help, to revitalize it, and make it run again. Here are some comments from the gang, when they heard of this deal: George Wolfe, "Frank wants to make a hearse of it, and be a friendly undertaker." Jim McClain, "He paid too much, junk is coming down." Russ Neireiter, "Ask the man who owns one, now maybe we'll get an answer." Rudy Rastenburg, "I heard that Frank is going to call it 'Old Ironsides'." Clayton Dafforn, "If it won't run they can pull it to a lake and use it for a cottage."

Out Of The Blue

in 26-2 Office

Have you nimrods wondered why the sad looks on Dick Gidley and Frank Schlotter the past few days? Have them tell you about the turtle they caught last weekend. You've heard of the "Beast of Busco," but have the boys tell you about the "Skinner" of Skinner Lake. Cheer up, boys, better luck next time.

July 4 is an event in the past once more and we trust that your holiday was a pleasant one. Just in case you need it—our recommendation for sunburn is Noxema. . . . Our welcome in Bldg. 18-1 to D. Amstutz. He has been assigned to the Rotating Engineering Course, following his graduation from Purdue University. His first step is in the General Superintendent's Office. . . . Belated birthday greetings to Donna Walter, Bldg. 18-5, and Ed Trabel, Bldg. 18-B. . . . Dorothy Janel, Bldg. 18-1, and her husband Fred entertained over the Fourth their parents and a sister and brother-in-law from Connecticut. . . . Mary Slater of Bldg. 18-4 is enjoying a vacation. . . . Juanita Spice, Bldg. 18-1, has been trekking back and forth to the dispensary. The color is "pink" and the location is "eyes". . . . Marilyn Mattes, Bldg. 18-2, celebrated her birthday recently by serving ice cream and cake. . . . Estelle Monroe, Bldg. 18-1, had a new hairdo last Thursday, did you notice? . . . When we talked to various people about where they spent the Fourth the most prevalent answer was—too hot we stayed home. . . . Marilyn Mattes, Bldg. 18-2, braved the heat and spent the day in Chicago. . . . Doris Lehman went to Wisconsin Dells, Dolores Connin and family went to Wawasee, and Hilda Mueller visited her brother in Petoskey, Mich. . . . We are a little late in offering congratulations to Mr. and Mrs. Carl Olson. Their son Paul was married June 17 to Maxine Glass of Huntington. . . . We wonder how Paul Lenz, Bldg. 18-4, came in possession of all those pennies? Not everyone can break the bank, as the expression goes, but Paul did! . . . Mary Jane Horrell, Bldg. 18-1 Accounting, was transferred this week to the Service Bureau in Bldg. 26-2. . . . National and local politicians please note the wise words of a John Snyder: "It took thrift and savings, together with character and vision to make our nation what it is today. And it will take thrift and savings to enable us to continue to be a great nation." . . . Is it possible to lose ball after ball by shooting them in the creek during golf and then retrieve them the following week? We are wondering if Ray White, Bldg. 18-4, might tell us.

Vacation Resume

Al Tharp, Bldg. 18-4, tells some of his experiences and observations on his recent trip to Spragge, Ontario. He went primarily for fishing but rains were heavier there than here (we wonder) and this spoiled the fishing somewhat. Although we think a couple messes of rock bass are not so bad. This is a typical French community with an easy way of living. Mostly dairy farming, but every household seemed to have the cow, chickens and truck garden. Kerosene lamps and stoves with the big kitchen range in which they burn birch chunks. Carry water from springs and sometimes use one of those wooden yokes for long distances. All I ever saw were in pictures. Also get this—clothes lines were stretched so high it was necessary to use platforms in hanging clothes. The old faithful washboard was much in evidence. How about a trip like this to ease our tension and slow us down a little? Sounds like a good nerve tonic. . . . If you should hear a commotion in the Bldg. 18-4 hall just before 5:15 some evening, it will be the matron chasing the mice out. She takes the broom after them. . . . If Carl Brandt, Bldg. 18-4, has a free evening, his wife finds chores for him to do. i.e.: Carl thought he was going to a steak supper, but his dates were mixed. So his wife tells him to find a cherry tree to pick so that the jars can be filled. . . . Jean Ehinger is spending her two weeks vacation from Bldg. 18-1 Accounting moving into their new home on McKinney Avenue. . . . Evelyn Fischer has returned to Bldg. 18-1 following a leave of absence. We are glad to have her back. . . . Forest Leighty of Bldg. 18-1 spent last week vacationing at home—trying to keep cool. . . . Dorothy Crist, Bldg. 18-1, spent the Fourth at Barbee Lake. There was no report on fishing.

Is Held At Franke Park June 25

In the center pictures are Gene Lordier handing cracker jack to two young guests, and Arnold Engle feeding his daughter, Pam, some ice cream.

The bottom row of pictures show scenes at the ball game, children's races and a line for the eats. Several young racers are shown in candid photos (circles) dashing across the lawn.

Members of the Board were in charge of the outing. They include: M. L. Spade, Troy Long, W. O. Luebke, Earl Ramey, Verl Patterson, Harry Zimmerman, Merle Morkoetter and Ray Soughan. The entertainment committee consists of Harold Mosshammer, Harold Kramer, Leo Reffelt, Walter Lydy, Merle Morkoetter, Jr.; Herbert Dial, John McMaken, Ora Martin, Frank Gitter, George Lambroff and Floyd Snyder.

Fractional Fiction 4-5

By Leola Carrier

That wasn't a test tube Myrtle Wagner was earrying at work one day last week. It was a thermometer. She was trying to find a cool place to work that day. . . . Someone should notify the War Department that Clem Stauffer is a suitable candidate for the "mopping up" branch of the Army. He took last Friday afternoon off to mop the kitchen so that his wife could have a "plastic party" that night.

The easiest thing to get and the hardest thing to get rid of is a bad reputation.

Many Employees Build Their Own Homes

Bob Wire, Bldg. 27, started the foundation of his house on April 10. The house is located at the corner of St. Joe River Dr. and Glazier Ave. Bob estimates that he is saving one-third of the costs by building his home which was constructed from blueprints he saw in a "Better Homes and Gardens" magazine.

"I was hesitant at first because it seemed so big a job, but after you get started you get enthused and show real interest," Bob explains.

A great many Fort Wayne employees can pat themselves on the back for having found the solution to their housing problems—and still stayed within the family budget. Their answer to this riddle was to set to work and build their homes themselves.

All over Allen County, this new breed of Handy Andy pioneers from the General Electric Company has been springing up. Just as our ancestors hacked cabins out of the wilderness, these employees have successfully taken the housing problem into their own hands. And they have the deep satisfaction of knowing that their handiwork, from post-hole to roof rafter, is bringing pleasure and security to their families.

These amateur-built homes are not cabins, lean-tos, or some temporary shift to beat the high construction costs. They are real homes. They have shining kitchens and modern bathrooms, good heating and spacious living quarters.

Nicest of all, thanks to the amazing economies in building-yourself housing, is the planed-down mortgage. In many cases, where the individual owns his own land and can disperse a few hundred dollars as he goes along in occasional lumber and supply purchases, there is no mortgage at all.

Phyllis Grace, Bldg. 6-2, is quite proud of her new home near Swan, Ind. She is shown, above, working on the design for the white Cape Cod frame house. Work was started on the house in March of last year and they moved in last October. The house (at the left) has four rooms and a bath and is located on an acre of ground.

Their architectural preferences may all vary, but these G-E Handy Andys have one thing in common. All of them, though unskilled, built their very substantial homes without any professional help.

According to statistics, the average cost of building a five-room house in Fort Wayne during 1941 was $4,994. Last year in September the average was as high as $11,960, while this year it has dropped to $10,185. The average estimated for 1955 has been set at $7,638 by Dow Service statisticians. These costs were based on an average one-family, five-room, 840 sq. ft. house with basement, expansion attic, and attached garage. The same house can be built by yourself at a total cost of $3,000 to $4,000, according to a survey of local employees who have done it.

As anyone familiar with home building can tell you, the cost of a custom-built home today will divide roughly in this fashion: 40% for materials, 60% for labor.

You can't do anything about the high cost of materials. Hence, the home-hungry G-E employees discovered that if you want a home at anywhere near a reasonable price, you must economize on the labor—and that means doing the work yourself.

They weren't hammer-happy enthusiasts with a background of home-workshop experience. They were just average, tool-awkward people. The amount of time they have spent constructing their houses ranges from four to twenty months. Once the excavation is made the completion of the house depends upon the spare time the builder is able to devote to it. A completed home would take from ten months to about two years to build, but the savings make it worth all the work and the wait.

The men and their willing wives

(Continued on page 7)

Lyle Harshburger's home is located about nine miles from Fort Wayne on the Illinois road. It has four rooms and a bath downstairs and two rooms upstairs. Lyle started work on his home last August. The house is 30x32 and is on 7/10 of an acre. Located in Bldg. 17-4, Lyle received some help from his fellow employees. Bill Walt, foreman, got some men together to help him shingle the roof.

Harry and Barbara Dolson expect to move into their home in Sunnymede Woods sometime in September. They have a 80x200 lot, and are already enjoying the vegetables from a garden they planted this spring in their backyard. The house includes a combination living room and dining room, kitchen, two bedrooms and a bathroom downstairs; and two unfinished bedrooms, upstairs. There is also a garage and workshop at the side of the house.

The Dolsons have put in everything themselves, including the sewer and water lines. They started digging the foundation during their vacation last year.

"We have a lot of windows because the place where we are now living is practically devoid of light," Barbara pointed out.

Harry and Barbara both work in Bldg. 26-2.

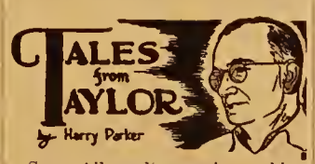
To Solve Their Housing Problems

(Continued from page 6)

have worked holidays, week-ends, and after regular working hours on their homes. Some even installed powerful flood lights to help them work after dark.

Many of the homes appearing on these pages were designed and constructed almost entirely by employees and their families, while others have done at least part of their own construction work. These houses, in various stages of completion, are scattered all over Allen County.

A log cabin nestled in the center of a grove of trees will soon be home for Mr. and Mrs. Petgen. The cabin has four rooms and bath and is located on a half acre of ground. Work was started last December and the Petgens are moving in this month. The cabin is 20x24 and has been built for future additions. Kenneth works in Bldg. 6-2 and Evelyn works in Bldg. 4-3.



Mr. and Mrs. Mardo Tobias are shown relaxing in the living room of their new home. Located on the Getz road, it is a white frame house on a 100x300 lot. The house has four rooms, bath and garage. Mr. Tobias, Bldg. 4-3, drew the plans for his house and was assisted in the building of it by his son, Richard, and son-in-law, Cortland Anderberg, both employed at G-E. Work was started on July 6 last year and they moved in Oct. 30. Mr. Tobias has set out 89 trees around the house, not including shrubs. Most are shade trees, but some are evergreens and fruit trees.

Paul Hadley (left) is being assisted by several friends in installing his pump at the location where he is building his home. He started work on it two months ago and hopes to move in the latter part of September. Located on the DuPont road, the home will be a white frame house with red cedar front and will have four rooms and a bath. Geraldine, his wife, works in Bldg. 6-2.

Don Greenler, Bldg. 4-3, started building his home the latter part of July last year and his family moved in last February. The home is located on a ¾ acre of land off the Getz road and contains four rooms and a bath downstairs and two unfinished rooms upstairs.

Sam Allmandinger, in making preparations for a journey to his lake estate, loaded the trunk with a miscellaneous array of junk and necessities which included his outboard motor, lawn mower and what have you. He drove around in front to pick up his wife, who had some item to pack in said trunk. In trying to open it, the lid would not budge; the load had shifted, wedging the lid. Sam tried every manner of means to gain entrance, even resorting to the use of a jimmy. Finally he drove to a garage and told his story to the mechanic who said that it could be remedied very easily. Seating himself in the car, he drove a few feet, then suddenly stopped, shifting the load back where it was and opened the trunk with the greatest of ease. . . . Now that the cherries are ripe we notice that Ralph Ecenbarger is bringing some to work with him each day. He consumes them during the work period. We wish to call this to the attention of the girls who benefited greatly last year by generous gifts of this most delicious fruit. If his crop is exceptional this year, you girls no doubt will be presented with more cherries. . . . Ralph Dunlap has acquired a new name, and it came in this manner. The other day he was complaining about having to be chief gunner and in charge of all heavy artillery activities here at the shop. This keeps him eternally on the firing line, and not only that, when he is at home he is out most of the time gunning that new car. He desires to be known in the future as "Gunner" Dunlap. . . . Jim Truman, in leaving for his vacation, told us that he was going where he could do some class A fishing—none of this small time stuff for him. He is going to the Canadian shores of Lake Superior to seek out the larger members of the finny tribe. They get so large there that you have to keep a ball bat in the boat to sock them with so as to keep them from jumping back into the lake. He has his fishing gear in ship-shape and is taking along a goodly supply of ball bats. Get the skillets greased, boys, because Jim is going to bring us some fish. . . . And the walls came tumbling down, so thought Basil Bowley and his son who were busily engaged in picking cherries when the ladder broke letting both of them to the ground. Luckily neither one suffered any major injuries outside of a severe shaking up. Basil was quite worried about his mustache as it received quite a scraping on the way down, but we are happy to say that it survived the crash and looks as good as usual. One of his fangs was jarred loose and is pretty sore, but he feels that with careful eating it will rehabilitate itself. . . . Art Brandenberger, being very perturbed over the high cost of heating his home electrically, is now seeking a way out.

According to weather reports and also the plans of many employees, our Fourth of July weekend was quite a vacation. Folks, let's hear some of the big ones that got away and some of your interesting occurences. . . . Just in case we forget, Ethel Schlickman, night shift, had a birthday. Happy birthday and many more, Ethel. . . . Junior Lake took his mother to Auburn for a visit. They had a safe journey both ways. As we hear Junior swore off a bad habit. The last time he had difficulty in getting his car through a narrow place. Your depth of perception must have let you down, Junior. . . . What kind of a lake is Pigeon Lake? Jerry Light and another party of whom we didn't get the name spent a day there. . . . Betty Frauhiger's youngest brother is spending the week at her home. He is quite a helping hand around the house. . . . Several girls from the Flange Section drove to Houghton Lake, Mich., over the week-end. Florence, were the fish nibbling good? . . . We notice Nora has been riding in a pretty nice car bearing a Kansas license plate—with some kind of a wheat state sign. Nora, have you sold them horses yet? . . . A motor trip was enjoyed by Emma Goldner, Cecelia Noonan, Esther Strickler, Helen Britzenhoff. They ended at Indian Lake. Jack Acheson, our former employee, helped in entertaining the girls at the Ritz, his place of business. . . . Mary Meyer was a happy mother this week. Her daughter, who is a member of the Sisters of Saint Agnes Order, was home for the first time in six years. . . . With vacation coming up Eddie Hesher might be sorry he sold his trailer house. Anyway he probably will have a good time on the green backs. . . . The meanest person was at Clem's Lake—the one that threw Tyc Fry's green shoes in the water. . . . Have Doris Resh solve your problem on how to dress in a small booth at Clem's Lake with an anxious crowd waiting in line. . . . Harriett Haines holds the title for "Rough Rider of Rarin' Gulch." Here is an eyewitness report as told to your reporter: "She got one foot in the stirrup, grabbed the saddle horn and with a mighty heave landed on top of the horse and away they went. After once around the field a bystander told me she wasn't hugging the horse's neck cause she liked him, she had lost the reins. I saw Harriett finally grab the reins and the horse went up in front and down in back. I just closed my eyes and sweat. When I opened them I observed Harriett and the horse, dogtrotting down the lane evidently enjoying the ride. Me, I went home before the award was presented." . . . Have you seen that new dark blue Ford? The proud owner is Gordon Sprunger. . . . All the girls who attended the GeCode Club picnic at Clem's Lake reported a very nice time. Harriett Haines was very happy to receive the "grand prize" of two matching Hall pottery vases. Dorothy Schnepf, Mary Ann Laurent, Mary Fennig and Florence Schultz also were lucky and won. But the one that really took the cake (or prizes I should say) was Edna Callow. Such luck some people do have! Lydia Lehrman was very happy to receive the door prize which was a traveling iron. Now all you have to do, Lydia, is travel. . . . The losers had to treat the winners to a hamburger (they thought) but they found out the hamburgers turned out to be steaks instead. We are talking about the euchre club that consists of E. W. Lankenau, Paul Hancher, Ray Leitz, Chet Kleinknight, Dick Steele, George Buckley, and two strays (non G-E workers we mean). . . . Earleen Steffen and her husband spent the Fourth of July at Niagara Falls. . . . Esther Meyer was in the state of Missouri for the holiday. . . . Ray Leitz probably painted his spouting or made a trip to far away places like the Bill Schnepf's in the country. . . . Fern Passwater probably spent a quiet day in Decatur. . . . Eloise Noll is on the sick list and Rowena Holthouse is taking her place. We wish you a speedy recovery, Eloise.

Honored At Retirement

Friends and co-workers of Marie Hummel, Bldg. 4-4, honored her with gifts and flowers at her retirement last week. Charles Griffith, foreman in the Repair and Return section, is shown congratulating her. At the presentation of gifts, above, are: (l. to r.) June Martin, Ethel Fabian, Ionena Foster, Clara Heaston, Florence Behrens, Ruth Lange, Edith Venrich and Mary Herb.

We thought things were awfully quiet last week. Then we discovered that Harold Kiel was on vacation. . . . What wild and wooly tales we will be hearing now. Lewie Hoffman isn't sure whether they will be vegetarians this fall or have meat on the table. After much back bending and moans, Lewie got his garden planted. Then his neighbor got a goat. Confidentially, Lewie, goat sausage is quite a delicacy. . . . Farmer Harold Bowker got through his hay making in nothing flat. He had it done on shares. No work for Harold. Then the sad part comes in. Some neighbors talked him into helping them make hay. In fact, he has been running around so fast that he is worn down to the knees. . . . Juanita Likens likes our air-conditioned floor. She even calls in to see if she can't come to work on days we don't work. . . . Bud Lindemann is about as bad as a one-armed paper hanger with the hives. He has been having a case of poison ivy, plus jiggers. . . . It's a happy birthday to Mary Jane Redding. . . . Do you want a lesson on how to start out having a dinner of beef and noodles and ending up with cabbage and hot dogs? Mildred Schoenlein is the person to see. . . . It really got warm on the 536 line. Joe Motter had a stator that decided to burn. Paul Chavis came to the rescue. Very slight damage resulted. . . . Hedy Harrison spent the week-end in Toledo. . . . Ann Robinson is wearing a daisy in her hair these days, because daisies don't tell. . . . Mary Shumm will be California bound on her vacation. We asked for souvenirs, but she has only promised us Clark Gable. . . . Elvira Diller says she will just spend her vacation at West Sweeney park. . . . Kate Weigle lost her lunch the other day, but she won't tell where. . . . Mary Beaman has gone home from the hospital. She lives on the corner of Lewis and Harmar. Take time to drop around and see her. . . . Ann Kensill is coming along fine, and that makes us all happy, especially the tiers in 652 group. . . . Naomi Robinson is interested in buying an old bag. If anyone knows where she can get one cheap, please contact her. . . . We are going to miss Chester Hill. He has gone back to his former job. He has such a nice blushing smile. Also Herb Bender and his "How's things on the farm." Also Jack Dennis. Now we won't have to answer questions about the new bridge at Poe, or bee stings, or even rat traps. Mildred Melvin has left us for Taylor St. . . . Newcomers on the early bird shift are Paul Strombeck, Donald Comer and LaVon Nesbitt. . . . Ivah Grandstaff was all set to drink her coffee. She could almost taste it, when she discovered she left it at home on the kitchen table. . . . On Coarline Becker's 23rd wedding anniversary, her daughter gave them a surprise picnic. . . . Leona Hollis and Jerry Snyder helped Marcille Thomas have a happy birthday by taking her a big angel food cake. The homemade ice cream helped too. . . , Note to Jerry Snyder: Yes, I do have a hunting license to hunt news, even if I am in the doghouse most of the time.

Put Your Confidence . . .

The quality of a product is always proven by the service it gives the customer.

Caroline Becker, Bldg. 17-3, has two G-E lamps that have been in continuous use since 1921. The larger bulb is used as a porch light, while the smaller one burns in a closet.

She and Mabel King, who worked on these bulbs in 1919 and 1920 at the Edison Lamp Works here, are looking at the veteran bulbs.

Believe it or not—"Birdman" McNulty was seen flying around the school last Thursday with a halo above his head! . . . A good way to make it rain is to wash your car. Carson must have done a bang up job on the Chevy in Logansport. . . . To keep cool some people remove their shirts (Clendenen); some their shoes (Miller), but Brownie just rolls up his trousers to above the knees. . . . Robert "Star" Barnes can be seen dashing around town in his new Hollywood station wagon. For a small fee he will take large groups on a tour of Fort Wayne's highspots. . . . Overheard by an apprentice at an army officers' party, "We will now have a 10 minute break for the colonel to count his money." . . . Featured as main attractions in our "True to Life" picture gallery this week are Owen, Mischo, Konow and Barnes. . . . Bob Finton is reportedly seeking a job as mattress tester. . . . Whenever you see Leffers working like mad, you will know that he has just cut loose with a salvo of paper clips. . . . Talk about eating a heavy lunch—I wonder what Nix is carrying these days that caused him to be left holding the handle (?) . . . Don has a brother who works in a bakery. He said he works hard because he kneads the dough.

Only one ad per employee may be inserted. Each ad must be limited to 20 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE

Monday Noon, July 11, 1949

LOST AND FOUND

LOST—Ronson cigarette lighter with initial "S" on it. Lost in Bldg. 26-4 or on Jones St. parking lot.

FOUND—A nail file which has a name LaCrosse Schnifel, Newark, N. J., on it. Found on Broadway.

FOUND—Light shell rimmed glasses. Found on bench in park.

FOR SALE

TAPPAN GAS RANGE—Right-hand oven, very reasonable; breakfast set; oil drums. 3218 Raymond.

GOOSEBERRIES — By the quart. A-87012.

75 LB. ICE BOX—1947 Whizzer motor bike, cheap. Fred Blum, two mi. northeast, state road 37.

STORKLINE BABY CARRIAGE—Also bathinette, excellent condition. H-67823.

PRACTICALLY NEW SUITCASE—Will hold six pairs of shoes. $15. A-65941.

MAGIC CHEF APARTMENT SIZE GAS STOVE—A-1 condition. A-39004.

GOOD FRONT SIX-GRAVE LOT — Greenlawn cemetery. A-19151.

OUTBOARD MOTOR — Champion, 3.2 hp. H-68811.

TWIN-SIZE SIMMONS BED — And springs. A-66494.

BABY BED—With mattress, middle size, good condition. 730 Archer.

TWO GOOD FIRESTONE TIRES—650-16. H-15744.

HORTON WASHING MACHINE—And twin tubs, both in good condition, reasonable. 606 Commercial St., Roanoke, Ind., or phone 4092.

THREE-PIECE WALNUT BEDROOM OUTFIT—Very sturdy, including large chest of drawers, good condition, reasonable. E-38901 evenings, or Saturday or Sunday.

FOUR TIRES—5.50x16 in fairly good condition, very reasonable. H-26182.

PAIR OF AUTO TOP CARRIERS—Good condition, $5. 459 Stadium Drive.

FOR RENT

FIVE ROOM MODERN UNFURNISHED APARTMENT — Basement and garage, southeast. H-90745.

WANTED

TO RENT, 3-4 BEDROOM FURNISHED HOUSE—E-2943 after 6 p.m.

BAMBOO PORCH SHADES—And Crosley Station wagon. A-97605 or 1316 McClellan St.

REASONABLY PRICED USED MOTORCYCLE—1937 model or later. Will pay cash. H-5593.

TRANSPORTATION

WANTS RIDE Fayne Harter, from one mi. west of Georgetown on road 37. Works in Bldg. 19-2 from 7-3:30. Extension 2251.

MOTOR and GENERATOR Static

Thought for the Week: When you feel the desire to gossip, remember this—Empty wagons make the most noise.

So Long Gang

Although it's just for 90 days,
It's hard to say "good-bye."
I never could forget you.
Not even if I'd try.

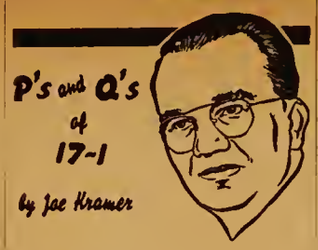
I'll miss the whole "darn" bunch of you,
I'll miss your friendly smiles.
I'll miss the Planning Section
With all their "Arts and Guiles."

I'll miss the clamor and the din
That we hear on shortage lists,
I'll miss the euchre games at noon
And pounding of the fists.

I'll miss the lovely lassies,
You fellows, short and long.
So, to the whole swell bunch of you
I'll simply say, "So long."

Jim Mitchell

WHY? When Pappy Archbold fell into Ridinger Lake, he had hopes that we would never discover the truth. A week ago last Sunday the weather was beautiful, flowers were blooming, birds singing, just the kind of weather that makes the sap run faster in an old tree. So feeling the urge, Pappy got out the new Dodge, loaded the little woman and himself into it and drove to the Carl Lee cottage at Ridinger Lake. Upon arriving, he was informed that his host was out on the lake fishing. Displaying an unusual amount of energy, our hero walked out on the dock to look for Mr. Lee and observe the bathing beauties. Suddenly the dock collapsed depositing Mr. Archbold in the lake. Being at a loss to understand why a strong, well-constructed dock should break down under Pappy's weight we carried on an "Inquiring Reporter" act, less pictures and came up with the following answers: Jim, "When the dock saw what was on it—it folded." Dick, "I don't know, but why did he have to swim out." Butch, "He shook so when he saw the gals in bathing suits, it couldn't take it." Jack, "Just that extra weight which comes with advancing age." Bud, "It was his 'haid' he was so proud of that new car." That's the story, chums, if you have an answer, mail it to Mr. Archbold. . . . BIRTHDAY: The girls of Bldg. 31-1 Service Bureau report that Walter Metzinius, the supervisor, recently celebrated another birthday. He was presented with several beautiful gifts, among which was an enormous "Dagwood" sandwich. They still don't know whether he ate it. . . . CAN'T BE: Flies are funny insects. They will light on anything. Stan Marquart has been observed industriously wielding a fly swatter. As we said before, flies don't care what they light on and it can't be because he is so sweet. . . . KNOWED AS: Art Druce laughed and laughed when the large gob of putty fell off a shelf and hit Frank Rathert in the face. Sez Art, "If Frank has some plaster of paris he would have poured it into the imprint in the putty and had a true to life reproduction of his puss." Mr. Rathert suffered slight burns from a cigarette he was smoking when the putty covered his face. "Putty Face" he was knowed as. . . . PERHAPS: Today Jim Mitchell leaves on a 90 day leave of absence. Jim's health has been suffering of late, largely due we feel, to the antics of Pappy Archbold. Our only surprise is that the breakdown did not occur sooner. We are going to miss those "pomes" Jim's quick wit and occasional violent explosions. We extend our wishes for a speedy recovery and hope Jimmy returns in the best of health. While you are away, Jim, don't forget the gang—or perhaps you should. . . . Your roving reporter.



Ship Ahoy!

Donald Kent has launched his new ship, Scram II, on Tippecanoe Lake. The unique thing about Don's ship is that he made it. Scram I, is the name of Don's canoe which he made when he was 16. Scram II is a Moth type sailboat, 11 feet long and 4 feet, 2 inches wide with an 18 foot mast and 67½ square feet of sail. The boat is constructed with an oak frame, the bottom and sides are of ¼-inch marine plywood, the freeboard is of fir, and the trimming on the cockpit and rub rails is of mahogany. This sailboat is a one-class design and has a capacity of two. Scram II, with its red bottom, green top side, white sides and sail, makes a colorful picture against the blue sky and water.

June is over and John Collins is still a free man. We won't make any more guesses on the wedding date until there is a change in the weather. . . . And talking about a break in the weather, if something doesn't happen soon we will have Art Pequignot in a lather. He has promised to give his pant legs one turn up for each humid day we have and they are nearly to his knees now. . . . When we were looking at pictures that LaVona Porter had of a recent fishing trip, we thought at first that an islander had joined the party. Someone then recognized the person as Dan McCrea gone native. . . . When it's time for Dan Reuille to retire he thinks it's time for the whole town to be at rest and objects very much in being awakened by muffled laughter. It's just the shank of the evening for the folks on second trick; so, Dan, we suggest you take a nap earlier in the evening and then join the party later. . . . If we would read people's minds this column would be much more interesting as we found out when Betty Rider was asked for news items. But what she wouldn't tell us was—what was causing that far away look in her eyes? . . . I have a correction and an apology to offer. Jo Wiehe doesn't mind her name appearing in this column, but she does object in having an "E" added to her name. That one letter does make a world of difference, Jo, and we are sorry. . . . That picture that was passed around of Erma Wilkens in her bathing suit could well be used as the pin up gal of the winding section. . . . We give our sympathy to Margaret Bloom in the death of her father. . . . Gertrude Kummerant has asked for a fan that will "osculate" which, of course, means to kiss. Could it be that she is going sentimental on us? . . . If you want a quick manicure see Virgil Buchanan. The polish and shade are both Ultra New. . . . The love bug has found another victim. It's third finger, left hand

Summer has officially opened with the moving of the early morning bull session from Ed Kronmiller's desk to the benches outside of Bldg. 17-1. Early morning participants are Henry Wichern, Clyde Crabill, Ernie Reiley and Ed Broschet. . . . Henry Kessler recently purchased a new G-E refrigerator. Harry says the freezing unit really gets the bottles cold in a hurry. Cliff Coombes is also a recent purchaser of a G-E refrigerator. Cliff intends to use his to keep the fish heads in. . . . We don't know the whole story, but there is some news of Elizabeth Love turning a certain inspector over her knee and paddling him. . . . George Mosshammer and Charles Neblick have risen above the mere growing of vegetables. George and Charlie are now raising moon flowers. . . . If you dial 321 and the party answering attempts to confuse you, just call him Robert and the trouble will be solved. . . . Ted Brockmeyer really had a busy week—he celebrated his birthday on July 3 and July 7 was his 14th wedding anniversary. . . . Due to lack of news from the office, we will have what Mary Gerhard refers to as a Farmer's column this week. . . . It is about time for the melodious voice of Clarence Doctor to ring forth the familiar tiding "Call—have you got your wheat combined." . . . Elizabeth Love's new theme song has been changed from "Cruising Down the River" to "Paddling Up the Creek." . . . Ted Brockmeyer's theme song, "I Get the Blues When It Rains." . . . Curly Sprague got a hair cut last week. We know it isn't unusual for a fellow to get a hair cut, but Curly's hair cut has caused quite a debate to rage in the south end of Bldg. 17-1 as to whether it should be referred to as a crew cut or a crock cut. . . . Harry Kessler blamed Johnnie Junk for his being late to work last Tuesday morning. Harry said he didn't realize that Johnnie was on vacation and he just sat down and waited for him to come along thinking that Johnnie might have overslept. . . . We are sure glad Ray Hakes is back to work after his recent operation. . . . Vic Leakey reports the new type hairdo is very satisfactory for summer wear.

for Ruth Bonewitz. . . . Doris Rhinhold spent the Fourth in northern Michigan. . . . The lead section is glad to have Anne Allman back with them again. . . . Lonnie Rockstroh is giving every eligible bachelor the twice over now. She is looking for that certain someone to fit the description of the man the lady with the veil promised she would meet.

Office Offerings

The old saying that practice makes perfect will hold true in most cases. But it is hard to believe that George Finkbeiner can reach the state of perfection in five short weeks. . . . Maxine Patterson is all set to beat the heat. She was fortunate enough to get a fan all her own. As far as we know, there is no limit to the speed. The faster she spins the blades with her finger, the more air she will get. . . . Agnes Brunner just can't balance a seat on a chair if it isn't bolted on. She is a game kid though, she tried.

Inquiring Reporter:

WHAT ARE YOU PLANNING FOR YOUR VACATION?

ERMA WILKIN
Bldg. 26-3

"I am planning a trip to Albuquerque, N. M., to visit my brother and see the beautiful Sandia mountains, the Indian pueblos, and other points of interest. I think a change of scenery does anyone good."

CHARLES R. KIESS
Bldg. 19-1

"My wife and I are planning on taking our two boys on a trip through Michigan up to Sault Ste Marie and on into Canada. Then we will come back through part of Wisconsin to Chicago. While in Chicago, we hope to attend the railroad fair. With the time left we will visit my wife's parents in Ohio."

REVIA STAUFFER
Decatur

"I'm planning a trip—probably to Washington, D. C., with some friends here at G-E."

EDWIN DONAGHY
Taylor St.

"Since I enjoy my evergreen nursery enough to combine business with pleasure at that time, I plan to visit Holland, Mich., and nurseries in Dundee, Ill. Also I plan to tour Wisconsin and do a bit of fishing up there."

HERBERT JESSE
Bldg. 8-1

"After taking care of some of the things that have been left undone for too long, Mrs. Jesse and I are going fishing and do just as we wish for the balance of the period."

Dangerous Corner: Lou Nelson's Section could be referred to as the eye, ear, nose, and throat corner. Lou has been off for some time—ear. Nate Horton has been off three days—throat. John Willsley is receiving treatment for a festered eye. We are all hoping that Joe Donahoo's "a-septic" technique will save him from "nose trouble." . . . The other day while everyone was scheming for some excuse to go home to that favorite shady spot, Ralph Obringer had a brainstorm. Ralph thought that if he could just become unconscious the heat wouldn't be noticeable and free transportation would be furnished home. So our ingenious Ralph pulled a window blind from its fastenings, but his little plot went astray. The blind hit him on the head, but he suffered no ill effects. In three "short" sizzling days the blind was in place again. . . . **Double Anniversary:** June 28 was quite a day for June Gaunt, Payroll Section, who celebrated her birthday as well as her wedding anniversary. When June was passing candy on the occasion, Florence Mullaney asked June if she was married on her anniversary. Evidently the heat had affected Florence. . . . **"Sometimes we never live to need the minutes saved by speed":** Millie Blievernicht, Payroll, found out the hard way that it pays to walk not run. The other day Millie was determined to beat the other girls to the cafeteria. Just as she reached the door, she slipped and sat down—abruptly. . . . **P. C.'s:** Dick Heard testifies that pressure cookers are a boon to the bachelor. He says that even though the cooker works fast, it takes two hours to put together a complete meal. Dick will really appreciate his family when they return from Michigan. . . . Eyes that lie—lie—lie—: Joan Walters has eyes that deceive her. While filing prints the other day, she decided to sit on one of the small stools. But, she received a large surprise as the stool was in front of her instead of behind her as she thought it was. . . . Etc. Welcome to Patty Rodgers, file room, who transferred from Winter St. . . . Art Nickerson is on his third week vacation. . . . Harold Sherbondy is on vacation. . . . Ernie Hicks says "A little effort pays off," as he and his family consume the vitamin filled fresh vegetables from their garden. . . . Have you heard that Shorty Poyser is termed the "little giant" among golfers around Kendallville! . . . Phyllis Hines vacationed at Indian Lake over the Fourth. . . . Bob Sharrow vacationed in Wisconsin over the holiday. . . . C. E. Zehender reports that his son is doing fine after a recent tonsilectomy. . . . Henry A. (Ham) Marahrens is enjoying his reversible outboard motor on week-ends at the lake near Coldwater, Mich. . . . Has everyone noticed the flashy ties that R. D. Jones has been wearing? They certainly brighten up the DC Section. . . . Why is it that Walter Gerke smokes Kool cigarettes. Could it be that no one else cares for that brand? Sympathy: We wish to extend our sympathy to Ernie Spaulding whose father died recently . . . (?) of the week: How do you use Du Pont paint? If anyone, "has the clue," please notify Bill Manecke. It seems that the paint dries before he can get it from the can to the wall.

The long Fourth of July weekend is over and we hope that it was a "Safe and Sane" one for all. So much needless pain and sorrow can be caused by accidents, it always pays to be careful. . . . Veda Orff is a patient in the St. Joe Hospital. We sincerely hope she will be feeling much better and able to be back on the job soon. After all, Veda, your business is caring for patients, not being one! . . . If you happen to see a pretty green gas-buggy heading towards Yoder, it probably will be Clark and Elsie Welbaum in their new Dodge. No wonder Berneta is such a proud girl to be a passenger. . . . Thelma Harrison, former second shift nurse at Taylor St., is doing general duty at the Huntington County Hospital. . . . Olive Walters was in the Queen City, Cincinnati, over the Fourth of July. . . . Some of the frequent showers changed picnic plans recently. The ants and flies were conspicuous by their absence. It was a belated birthday picnic for Alta Bishop. Mabel Wilson was unable to attend, so Alta, Maurine Nail and daughter Marilyn and Mary Heymann, had an indoor picnic at the Nail's home. . . . Bertha Schrader visited recently in Napoleon, Ohio. . . . On my way to work today I noticed a group of small boys of assorted ages, each one armed with a bean shooter. Their aim seemed too perfect because when the temperature is in the 90's, I didn't realize I could step so lively! Wonder what ever happened to mine? . . . Something new has been added to the cafeteria! An automatic machine that dispenses three flavors of thirst-quenching liquid, cherry, coke, and root beer. The urge to "live dangerously" made me press all three buttons and the result was—well, it was wet. One flavor seems to be enough now. But we must learn, you know. . . .

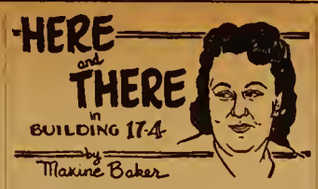
G-E VOLTMEN TO MEET CLEVELAND BUCKEYES

The Voltmen will play the Cleveland Buckeyes of the Negro American League at Dwenger park Saturday at 8:15 p.m.

The well-known "Double-Duty Radcliffe," sensational catcher, will appear with the Buckeyes. Manager Alonze Boone, who doubles as a relief pitcher, will also have the outstanding Archie Ware on first base.

VOLTMEN
Home Schedule

Saturday, July 9—
Cleveland Buckeyes



Tuesday, July 12—
Chicago White Sox

Thursday, July 14—
Lafayette Red Sox

All games are scheduled for 8 p.m. in Dwenger park.

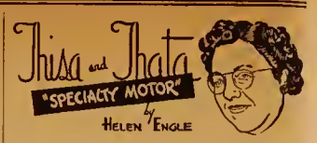
Stroud Writes Article For Hygiene Publication

Duane Stroud has written an article for the U. S. Public Health Department's Industrial Hygiene Newsletter. The article is titled, "A Method of Zeroing the Davis Micro-Gas Analyzer in a Contaminated Atmosphere," and will appear in the August or September issue.

With vacation three weeks away, who can talk of anything else. No matter what your plans, we hope you have a swell time. . . . That is some haircut (?) Bill Decker is displaying. . . . Robert Todd is the proud father of Miss Kay Eileen, who arrived June 30. Congratulations from the gang. . . . Word received from Imogene Hortenstein tells us her daughter has been named Raelene Kay. Lots of good wishes go to these new misses. . . . It seems Jess Ebersole is fond of ice water. Anyway he got a little wet with it last week. Wonder if it really was cold. . . . New car fever is continuing to take its toll. Floyd Shellenbarger has a new Chevy and Louie DeVoe just took his first ride in his new Ford. After the first ride he wanted to trade the new one back on the old Ford, but the dealer wouldn't allow him enough. . . . Sure would like to see Cy Seymour when he hooks his Palace on Wheels to his Bungalow on Wheels and takes off for vacation land. Won't be able to tell whether the Lincoln is pulling the trailer, or the trailer is pushing the Lincoln. . . . Ray Solga took Norb Lose to his favorite fishing spot Saturday. One thing hard to understand is why it took only 45 minutes to drive to the lake and seven hours to drive back. Could it be caused by the fact they stopped at Corunna and thrilled the natives with a fast exhibition of the game of shuffleboard?

A Good Catch

Holding the fish caught at Peach Lake in Northern Michigan last fall are: (l. to r.) Don Kruse, Don Thomas, Ray Solga and Tony Miller. The catch includes large and small mouth bass, walleye, and northern pike.



"Honesty is the one business policy that never need be changed to keep up with the times."

We were all shocked to hear of the sudden death of Ray Widdifield June 28. Ray had worked all of the preceding week and was to go to the hospital for what was to be a minor operation. His condition became serious on Monday and a heart attack proved fatal early Tuesday morning. We all shall miss Ray and the friendly banter we used to exchange. We extend our heartfelt and sincere sympathy to his wife and twin sons, Floyd and Lloyd. . . . George Miller says he has turned over a new leaf. No more arguing with anyone. Is anyone taking bets on that? . . . Ed Bienz still seems to think an awful lot about Chicago. . . . We offer our congratulations to Mr. and Mrs. Franklin Bly on the arrival of a baby girl. . . . Dale Springer would go to a lot more square dances if he could get someone to go along. . . . Noble Dinger spent the Fourth in northern Michigan. . . . Frank Brohman says he will get his spring redecorating finished before next spring, he hopes. . . . John Johnson is glad that his wife is back. He needs some good home cooking to gain back some of the weight that he lost. . . . Bill Nickerson is a newcomer to the tool room. He replaces Joe Griffin. . . . Dave Slater vacationed last week. He certainly selected a warm week, but it should have been nice at the lake. . . . Dick Raber's little three year old daughter broke her arm last week. . . . Greetings to Grace Kaster, formerly of Bldg. 17-3, but now at home near Columbia City who says she never misses reading the WORKS NEWS every week. . . . Harold Hohman has really been having good luck fishing and he says that he can prove it. . . . Sorry to say "so-long" to Kenny Johnston. Hope that you will be back soon, Kenny. . . . Vacation days just ahead—only three more weeks.

The Power House employees extend their sympathy to the family of Frank Fisher who died June 28. His jovial nature will be missed by all who worked with him so many years. . . . We're just a little late mentioning Jim Leeper's transfer to the Erie Works. Good luck, Jim, and we hope you like it there. . . . We have another Daisy fan to add to our list. Seems like "Boodles" Bendel just can't stop talking about said team. There must be some reason for all this enthusiasm, Boodles, how about letting the boys in on it? . . . When the boys decided to buy Elmer Kinney his dinner the other noon, little did they know Bill Schible would be sharing the limelight too. The two of them had a swiss steak dinner in Bldg. 20-1 with a very hungry looking audience standing by. However, when Bob Hatfield got wind of the fact that Bill was getting his dinner free, he immediately jumped into action, grabbed Bill's lunch bucket and proceeded to do justice to the delicacies Mrs. Schible had prepared for her husband. Yep, good old "Jack Benny" Hatfield—always gets a little good out of everything. May you enjoy many pleasant days, Elmer, on your retirement and lots of good health from the whole gang. . . . We hear via the grapevine that some of our friends are having "parking troubles"—for instance when Bill Garver found a little red ticket on his car. Mary Jane Howe, didn't you get an invitation to appear at you know where one day last week? Then there's Andy Frank, just can't seem to find the right spot in the parking lot for his car. Perhaps you better invest in a tarpaulin, Andy then you could park any place. How about that? . . . Would somebody please furnish Abe Martin with a little oil to take the squeak out of his shoes. . . . Clarence Thomas has all the boys in a dither as to whether he ever found all those socks he lost the other night. Please put their minds at ease, Clarence. . . . The fish stories are coming in a little slow this year, but we do have Wilbur Eytcheson tossing 10 inch bass back in the lake because they're too small. Just what is this all about Wilbur, you aren't holding out for a 11 incher, are you? . . . When Mary Saxton washes her desk she receives full cooperation from all the boys. Like when they covered her desk with saw dust to help it dry faster! . . . Wally Reed broke a record when he was absent one day last week. We understand Wally (Levi, that is) has an almost perfect attendance record, which is really sumpin' . . . Luck seems to have run out for George Wralstad and Frank Kilcoin in the lunch-time card games. They seemed to be able to hold their own against most of the fellows, but the luck of one of the office girls from the Wire Mill has them baffled.

Ted "Skin-head" Bain really was having trouble with his new straw hat last week. It seems that each time he put it on he had to put it farther back on his head. He kept complaining about these cheap hats, how badly they shrink! They weren't worth carrying home! And each day it kept getting smaller and smaller and were the people in the office having fun! Finally he noticed the laughter and looked inside the band and wouldn't you know, they had put paper behind the band. . . . Evelyn Petgen and her husband Kenny are just about ready to move into their new home. I bet Abe Lincoln will turn over in his grave when he learns that they are having a pink bathroom in their log cabin. . . . Bertha Click and Hazel Stauffer sure must be putting on the feed-bag when it takes 10 extra minutes to eat their lunch. . . . Alice Claymiller's sewing project backfired on her the other day when curiosity got the best of her. She asked Butch how he liked his clothes sewed as she had sewed them. . . . Thelma Purdue sure must be loaded with dough as heavy as her purse gets. One would think she would try cleaning it out once in awhile. . . . Leonard Floyd is on his vacation next week and so is Edna Rohrbach. She is going to spend some time fishing. We have a suggestion for Edna that while she is on her vacation she should get herself a little date book so she can keep her club dates straight, and maybe she should get her eyes examined so she can know more of what goes on around her. . . . We welcome Carl Smith to 1x29 and Herbert Sullivan, Thomas Pauley, Albert Flory, Andrew Bordner and Erwin Richter to 1x42. . . . One of the fellows in 1x42 would like to know what time Louie Barrow goes to bed at night. He says that these midnight phone calls he gets has something to do with Louie's night life. . . . Frieda Knoche was really happy the other day when her niece, Mildred Werling Thurston, who was a winder in 1x29 at one time, came home from Hawaii. Mildred's husband is in the army and they have been stationed there. Glad you're home, Mildred. . . . We wish Pearl Ross a speedy recovery. . . . We hear there were big fireworks out at Esther Fagan's home. She bought three boxes of sparklers. . . . Clarice Woodruff is lucky to have such a talented brother. . . . Bea Davis and daughter are spending the week-end in Sandusky, O. . . . Gracie Ober went to Wheeling, W. Va. for the holidays. . . . Editor's note, I didn't write the following—Helen Engle has been blushing all week over her fishing trip. Sunburn! Helen, but what about the fish did you get any? And my answer is: "Yes, we got some big perch and they were plenty good eating!" . . . Say, Berry, where did you get that hat? Don't you know that it will scare the fish away. If you want to sell it I'm sure that if you would put a right price on it Ted Bain would buy it.

Chicago White Sox To Play G-E Voltmen

(Continued from page 1)

Top League in Fielding

Official American League averages reveal that the Chicago White Sox are leading the American League in fielding, with a spectacular .982 average. The White Sox infield featuring Floyd Baker, on third; Luke Appling, at short; Cass Michaels, at second, and Charles Cress, at first, have proven to be one of the most dependable and hustling infield in the Major leagues this season.

Some of the older sports fans may remember that during the 1911 season, White Sox Manager Jack Onslow played with the Fort Wayne Pelicans, semipro team in the old Central League.

Onslow took over the range of managing the White Sox last winter and is known as one of the most fiery and hustling managers in organized baseball. Often the subject of sports columnists for his strict discipline and management of his teams, Onslow remains a very eolorful figure. Other members of the White Sox board of strategy are Coaches "Bing" Miller, "Buster" Mills, and Ray Berres.

Appling to Appear Here

"Old Ironsides" Luke Appling, aged shortstop of the Sox, drove in three runs with four hits to lead the Sox in an 8 to 4 victory over the Detroit Tigers July 3. Appling, although past the 40-year-mark, is still a White Sox regular. He has appeared in all but three or four gamea tbis season. Although hitting at a .250 clip, Luke is always a dangerous man on the plate and has wrecked the game for many an opposing pitcher with a timely hit in the late innings of a close game.

The White Sox outfield this season really has the "new look" as brought about by the new manager. Only Dave Philley, a right-handed thrower and switch hitter from Paris, Tex., remains from previous White Sox squads. Philley is batting .293. White Sox newcomers Souchock and Metkovich round out the present starting outfield.

Right-handed Joe Tipton, catcher, was obtained from the Cleveland Indians after the 1948 season. He is the usual starting catcber for the White Sox. Joe is not considered a heavy hitter, but is capable at handling good pitchers as well as rookies. Other catehers with the Sox this season are Donald Wheeler, from Minneapolis of the American Association, and George Yankowski, 25-year-old rookic from Muskegon of the Central League.

The White Sox pitching staff includes Bill Wight, who won 9 and lost 20 for the White Sox in 1948; Randy Gumpert, who played part of last season with the New York Yankeecs; Al Gettel, formerly with the Cleveland Indians; Howard Judson, who won 4 and lost 5 for the White Sox in 1948, and Walt Pierce, 22-year-old who won three and lost nine for the Detroit Tigers last year. Other pitchers this year are Ed Klieman, Clyde Shoun, Bob Kuzava, Marino Pieretti and Matt Surkont.

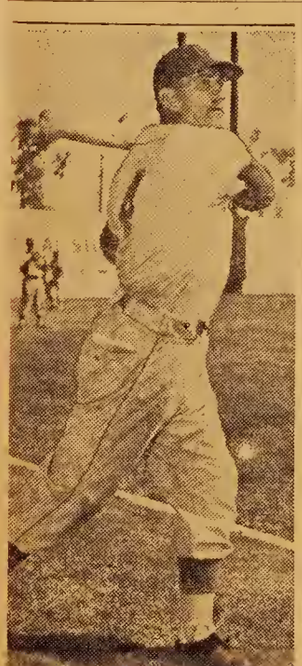
We have sung the praises of the Hot Shots so much that we almost overlook the rest of the swell fellows that make up our Owl Golf League.

Take for example, Bernie English's Team No. 4, composed of Bernie, Pequignot, Fosnaugh, Ormsby, and a new lad named Boester. They broke into the plus column for the first time this year when they took the measure of Walt Pook's Team No. 5. English led his team with a 46, while Pook was low for the losers with a 52.

Team No. 3, which currently led the odd side, tripped the Jolly Boys by four points to add to their lead.

The battle this scribe looked forward to involved those Hot Shots and Stauffer's Cold Shots. As Lloyd Grider so aptly put it on No. 5 fairway, "They want to win this one so bad that they can taste it."

The result was a 16-point victory for the west side boys (including Bldg. 27). Warren Wickliffe displayed his usual good form with par equalling effort of 36. Brother Grider, caddie wagon and all, had a 38. John Stark was low for Team No. 1 with 44.



The Standings:

ODD

No. 3, Shanahan	– 29
No. 1, Stauffer	0
No. 5, Pook	—31

EVEN

No. 6, Craig	+ 91
No. 2, Stanger	+ 27
No. 4, English	—62

G-E GOLF

By Hugh Dubdit

The Putters of the Winter St. group took the top spot to start play in the second half. However, the point standings are very close. The Putters have five, the second place Mashies have three, and third place Drivers have one. Dick Szink continues to lead the individual standings, shooting a 36 last Wednesday. John Skevington and Glenn Schimmele both carded 41.

With the first round of play completed in the Tuesday group, the Optimists have moved into first place with a point total of 26. Divot Diggers are second with 19, Nineteenth Holers third with 12. Paul LeCoque was low man with 37. "Red" Braden shot a 39 and Dick Tobias had 41. Frank Stenberg came up with a 49, eleven strokes under average to pace his team to a 14-point win.

Majors Edge Harvesters

The G-E Major softball team won a close game Thursday, June 30, from Harvester by a score of 2-1.

Baals led the hitting with a double and single in three tries.

The Majors chalked up a loss to Food Machine Tuesday, July 5, by a score of 7-6.

Stanski and Baals led the hitting, Stanski with a double and single and Baals with two singles in four times up. Yarman had a home run to right centerfield with none on.

Ley, of Food Machine, had a homerun over left field fence with one on.

Line Scores:

Harvester	000	010	0—1	3	2
G-E	100	000	1—2	7	2

Voltmen Drop 9-5 Verdict To Kansas City Monarchs

BY GEORGE HEMMETER

The high-flying Kansas City Monarchs downed the Voltmen by a 9 to 5 score Tuesday night at Dwenger park.

They had quite a ball game until the fourth, when the Monarehs broke loose three singles and a triple plus two very costly infield errors, to make the score 5-0. The Voltmen retaliated with three runs in their half of the inning on a double by Charlie Shipman, singles by Smith and Bobilya and a walk by Green; but Kansas City came up with a fast double play to end that rally.

The Monarchs seored in the fifth on a home run by Tabor and in the sixth on two safe bunts, plus a very wild throw to first. Southworth did manage to cut off another run after chasing down the overthrow. They completed their scoring in the eighth with a walk and two singles.

The Voltmen managed to score two more runs in their half of the eighth to make it not too bad a ball game. Shipman got on wben third baseman Souell bobbled one, then scored with Olin Smith on his mighty home run over the right field fence. The Voltmen looked good in spots. Lee Pfund started a beautiful double play to retire the side in the sixth inning. Then there was Chinewicz's great running catch of Souell's drive in the third. Southworth looked good at second and particularly notable was Hugh Orphan's ereditable relief as he retired the four men he faced, two of them on strikes, to end the ball game after Pfund weakened with two out in the eighth. We hope this is a sign that Hugh is finally rounding into shape, because the Voltmen could sure use him.

Monarchs	AB	R	H	Voltmen	AB	R	H

Majors Beat Legion Post

The G-E Majors softball team won from Legion Post 330 by a score of 5-3 Thursday, June 23.

G-E scored two runs in the first inning on a hit batter, walk and Morkoetter hit a two-baser. That ended the scoring until the fourth when Bucher led off with a single. Garman sacrificed him to second. Waltke flied out to left, while Stanski hit to center, seoring Bucher. Balls then hit a home run, scoring Stanski. Bueher led the hitting with a double and a single.

Post 330 scored a run in the first on a single, double and a fly to center. They added two more in the fifth on a single, error, fielder's choice and a double.

Line Score:

Post 330	100	020	0—3	4	0
G-E	200	300	x—5	5	2

Decatur SPORTS

Clarence Morgan, a member of the G-E factory team in the Decatur Golf League, has the distinctive honor of scoring the first hole-in-one at Decatur's new golf course. Clarence's famous shot was made on the tough par 3 165-yard No. 7 hole, and it was witnessed by his immediate foursome and another foursome waiting on the green.

Kenneth Gaunt, a member of the G-E Office team, was recently elected Chairman of the newly organized Decatur City Golf League. The league is composed of 10 teams from various industries and commercial firms in Decatur. Ken is one of our most enthusiastic golfers and is well deserving of the honor bestowed on him. Ken shoots consistently in the low 40s and under.

David Baumann, although on the golf inactive list at present due to his health, was elected Secretary-Treasurer of the new Decatur Golf League.

Other G-E men who are members of the league are Bob Lord, John Baumann, Kenneth Jackson, William Morgan, Bob Andrews, and George Laurent.

JOE TIPTON
Catcher

The message entitled "*I Don't Want to Be Agitated,*" reproduced below, was forwarded on May 12, 1949, by W. A. Mann, Manager of General Electric's Apparatus Office in Milwaukee, with this note:

"*Your message* 'Jobs Depend on Faith' *made a profound impression on E. C. Peterson, Superintendent of our Warehouse. He sat up last night and reduced his thoughts to writing. I have had a copy made and attach it, as I feel sure you will be interested in knowing what reaction some of these articles produce.*"

Neither the title, nor a word, nor a comma, nor a capital letter has been changed. It's just as written by Mr. Peterson, who is shown in the accompanying photograph with Mrs. Peterson, their daughters, and granddaughter.

"I Don't Want to Be Agitated"

"THOSE who unfairly attack General Electric—or seek to damage the good name it tries so hard to *deserve*—may shake the faith of the customer in the Company and its products and, by so doing, rob men of their jobs and futures.

"Those who rise to the Company's defense—who seek to help the Company *deserve* its good reputation—make jobs better and steadier not just at General Electric, but in every community where the Company buys, or makes, or sells products."

(The above are excerpts from the G. E. Commentator of May 6, 1949.)

Two closing paragraphs which can be read in twenty-two seconds. The second time, I gave it forty-seven seconds. The part which reads—"and, by so doing, rob men of their jobs and futures"—fascinated me.

My memories went back to the close of World War I. A returning hero, so they called me, but I had no job. Just a sixty buck "bonus" and not much hope. An odd job here, another there. Was still paying dues as an electrician, but no electricity wandering around waiting to be harnessed.

Was 24 years old when we were married. A war bride, you might say. From London she was.

1921—Assets: A war bride, couple of furnished rooms, temporary job, and lots of uncertainty.

1922—Started with General Electric Company. Was told that job would be steady. A ray of hope. Wife and I celebrated by "eating out."

1949—(or 27 years later) Assets: Still have my job, only it's a better one. Still have my war bride, plus—two married daughters—a granddaughter—five room house—automobile—modest bank account—a few war bonds under the mattress—electric refrigerator—radio—ironer, etc.,—home work shop—Company pension in the offing (which was started about 1912, or long before the agitators 'thunk' it up.)—Free insurance—Additional insurance—Hospitalization insurance—annual vacation—steady pay—a feeling of security. The greatest asset of all.

These are the things which I have received from the Company in exchange for my humble efforts. These are the things which I have received through the continued faith of our customers in our Company's products and in the integrity of its Management and employees.

The Company has faith in me and I have faith in the Company. I am not yet dumb enough to believe that we can receive something for nothing. If we do, it can only be at the expense of someone else. And that someone else may be me.

I have no time or sympathy for "those who unfairly attack General Electric—or seek to damage the good name it tries so hard to deserve—and, by so doing, rob men of their jobs and futures."

I asked for a job and it was given to me. If I am dissatisfied, I am free to leave at any time. I am not working in a slave camp.

I believe that "Those who rise to the Company's defense—who seek to help the Company *deserve* its good reputation—make jobs better and steadier not just at General Electric, but in every community where the Company buys, or makes, or sells products."

By preserving the Company's future, I am merely preserving my own. Just simple arithmetic.

NEWS

Volume 32 | FORT WAYNE, INDIANA, FRIDAY, JULY 15, 1949 | No. 28

You cannot build character and courage by taking away man's initiative and independence. You cannot help men permanently by doing for them what they could and should do for themselves.

—*Abraham Lincoln*

UNION NEGOTIATIONS RECESSED INDEFINITELY

Negotiations between General Electric and United Electrical Workers-CIO continued Wednesday. The Union sought, contrary to what was agreed last year, to get the Company at the current negotiations to consider an increase in pensions and insurance.

The Company reminded the Union of its agreement made last year in consideration of the increase given at that time. The agreement was to the effect that the contract then made extended to April 1, 1950, with one reopening and that one for wages only. The Company pointed out the careful wording of the contract, which clearly drew a definite distinction between wages and other economic benefits and made wages the only subject of negotiations in the one reopening.

Refers To Union Report

The Company pointed out that, in addition to the wording of the contract, the Union had printed the following report to its members in its official newspaper, "The U.E. News" of June 12, 1948:

"The Company makes this offer conditional upon the Union's drop-

Special Ballasts Built In Two Days For Venezuelan President's Plane

The Specialty Transformer sales division received a telegram recently to build and ship within a week 30 special ballasts for aircraft fluorescent lamps.

The units were ordered by the Texas Engineering and Manufacturing Company (TEMCO) at Dallas. The company specializes in modifying, overhauling and outfitting aircraft for special use. These ballasts were ordered for installation in a Douglas C-54 designed for use by the President of Venezuela.

No Time Is Lost

Upon receipt of the telegram, Ray Schiebel and members of Division 93 immediately went into action. While Roy Adams, Engineering section, reviewed the specifications, Bill Slater ordered the material. Dick Kimball coordinated the flow of materials throughout the divisions and Larry Schuster actually followed the units through the manufacturing cycles by means of red-marked tote boxes.

Farold Schuman's group cleared their machines and hurriedly wound the coils and Al Rieman's section assembled the units. The

Free Chest X-Rays Are Offered To Employees At Decatur Plant

The Mobile Tuberculosis Survey Unit will visit the Decatur plant Tuesday, July 26, from 1 to 5 p.m. to x-ray the chests of employees.

As last year, the survey is being offered free of charge through the co-sponsorship of the Adams County Tuberculosis Association and the State Board of Health. It also has the approval and support of the Adams County Medical Association.

The screening test is strictly

Soap Box Derby To Use G-E Timer

Split-second timing for all events Sunday at the News-Sentinel-Chevrolet Soap Box Derby is being made available this year by the Fort Wayne Works.

Henry J. Miller, of General Electric's Philadelphia office, has accepted an invitation to attend the race and bring his elaborate timing device. This apparatus is the same Mr. Miller uses in timing the major auto and motorcycle races at many Eastern tracks. This will mark the third year that Mr. Miller has officiated at the local derby.

A FHP Motor specialist in the Atlantic district, Mr. Miller has made a hobby of timing big and little racing cars, speedboats, motorcycles, foot racers, airplanes, and even bullets.

The timing device, accepted as official at major racing events, was developed by Mr. Miller in co-operation with other G-E scientists and specialists. Consisting of a G-E electric eye, several clocks and a switch similar to the ones used to synchronize machine-gun fire through airplane propellers, the timing device is exceedingly accurate and, through a card system, can time up to 185 racers at one time.

Henry J. Miller is shown, above, operating the elaborate timing device which will be employed here Sunday in the Soap Box Derby.

Information Clinic

The following is a series of questions and answers selected at random from those asked at the recent Informative Conferences. Additional questions concerning problems relating to jobs, business conditions, or any other matters are encouraged. Employees are requested to use the Information Clinic form on page 4.

QUESTION

Can an employee withdraw his Additional Pension accumulations without breaking his service? Also, can an employee withdraw his Pension accumulations under the present pension plan without breaking his service?

ANSWER

The Additional Pension accumulations under the old plan is a very good form of savings, and should be maintained if possible. However, an employee can withdraw these accumulations without breaking his service. An employee cannot withdraw his Pension accumulations under the present pension plan without breaking his service.

QUESTION

By what standards does General Electric base its wage structure in Fort Wayne?

ANSWER

The Company periodically compares wage rates, job for job, with other employers in Fort Wayne. We actually visit these employers and compare like jobs. Our wage structure—job for job—compares favorably with the going rate in Fort Wayne.

How We Use Our Leisure Time Is Basis Of Mental Health

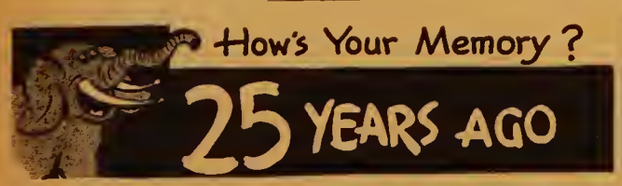
More than 100 years ago, Bulwer-Lytton, famous British author, writer of the immortal classic "The Last Days of Pompeii," wrote these words: "You see men of the most delicate frames engaged in active and professional pursuits who really have no time for illness. Let them become idle. . . . let them take care of themselves, let them think of their health and they die. The dust rots the steel which use preserves."

In this day of considerable leisure time it is well to ponder these words for they hold the key to the solution of a happy life. Few people over-work, according to a leading education authority of today. But plenty do over-eat, over-worry, over-drink and plenty reach out for amusement by listening and watching other people do things. Few among us realize the joy and happiness of conquest. The basis of good mental health is plenty of work and upon this foundation we build better minds and healthier bodies.

Here Is Some Good Advice For Keeping In Condition

This business of keeping fit for the day's work gets lots of publicity. It seems to be surrounded by a lot of mystery. It is continually made to appear difficult. It is not. Rather, it is very simple.

Artie McGovern, noted trainer in New York, who keeps plenty of men in office jobs in the pink of condition says: "The average person eats himself out of condition continually. Leading a sedentary life, he takes aboard about 5000 calories a day and burns up only 2000. That leaves 3000 to clog his system. He would be much better off if he consumed only 1500 calories and burned up that many.



"A careful diet . . . orange juice, toast and coffee in the morning, a salad or sandwich and tea or coffee or milk at noon and a good dinner at night that doesn't contain too much starch or fat . . . plus 10 minutes of proper exercise a day, will keep anybody fit."

When it is so easy to keep in condition, why do we let ourselves get out of hand?

Man In The Glass

When you get what you want in this struggle for pelf
And the world makes you "King for a day",
Just go to a mirror and look at yourself
And see what that guy has to say.
It isn't your Father, your Mother, your wife,
Whose judgment upon you must pass;
But the one whose verdict counts most in your life
Is that man looking back in the glass.
You may be "Jack Horner" and chisel your plum,
And think you're a wonderful guy;
But that man in the glass says you're only a bum
When you can't look him straight in the eye.
You may fool all the people down the pathway of years
And get pats on the back as you pass.
But your final rewards will be heartaches and tears
If you've lied to that man in the glass.

—Les Quillman

The twentieth annual meeting of the Electro Technic Club was held Tuesday, May 13, in the club rooms, Building 16-2, and was attended by about 150 members of the club.

Mr. Miles, the retiring president of the club, presided, and called the meeting to order at 8 p.m., the first business on the program being the election of directors for the coming year. This election was by ballot with the result that the following five men were elected for the coming year: A. C. Hartman, C. H. Baade, Perry Shober, S. C. Newlin, I. H. Freeman.

AIN'T IT THE TRUTH?

SCIENCE QUESTION BOX

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY

Q. Why does a live electric wire lash about when it strikes the ground?

A. There seem to be two causes for this effect. First, the wire is under considerable tension while on the poles, and when this is released it would move considerably whether it carried current or not. But, if it is alive, it will carry considerable current to the ground and it would be surrounded by a strong magnetic field. With the wire tangled, the field of one part would react with that of another section, sometimes producing attraction and sometimes repulsion, so considerable movement might result.

HUGH CRANE discusses Thoughts On Being Reasonable

NEW YORK—This is the last time this column will appear.

So, in saying goodbye after three years, I should like also to look backward and tell you something about what the column was supposed to be, what the "slant" or "angle" was, why it was a pleasure to write it, and why it was sometimes hard to write.

"Being Reasonable"

When I first started writing this column, the specifications I got from G-E really boiled down to two words—"Be reasonable." Of course they also said "Make it readable; make it simple; and make it short." But those directions more or less went without saying; as a writer you try to do that anyway. The challenge was in the "Be reasonable."

This was why the column was originally called "Alternating Currents." Because nearly every subject in economics has two sides, and to be reasonable you have to consider both, and write more or less in the framework of "On the one hand . . . but on the other hand."

Even if you don't write the finished column in exactly that form, you have to have gone through that process in your own mind before you reach for the typewriter. You have to have done a sort of high-school debate first, with its alternation of arguments and rebuttals, even if one side finally wins in your mind.

That is what made it interesting—and also what made it difficult.

Involves Half-Truths

For economics, like the law, involves a great many contradictions, a great many conflicts, and a great many half-truths. Also special-interest arguments, and downright appeals to emotion.

We have a prime example of the contradictions in today's discussion of Marshall-Plan aid to Europe. For on the one hand this aid is supposed to put Europe on its feet, so that it will no longer have to get so much from us, and will be able to sell more goods to us to pay for what it gets. But now it turns out that this is another way of saying that the Marshall Plan, if successful, would leave us with a smaller market in Europe and would enable Europe to take over some of our customers in South America and send a flood of imports from Europe into this country to compete with American manufacturers and labor.

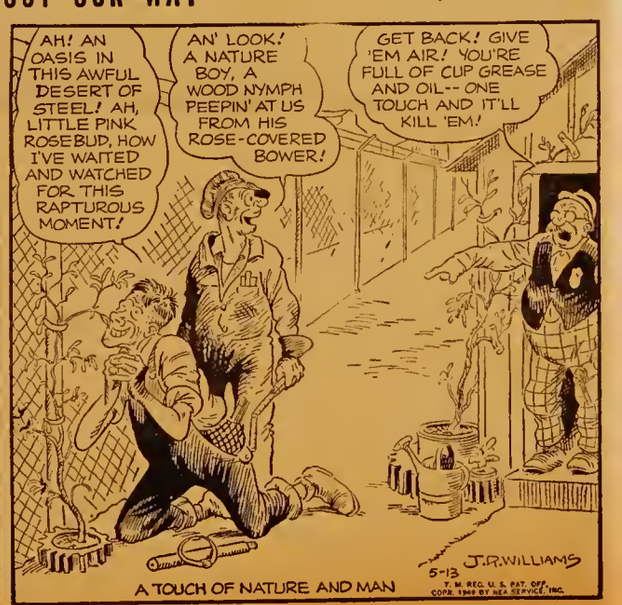
As for conflicts of interest, you have farmers versus city consumers, railroads versus trucks, non-scheduled air transport companies versus the regular air lines, private power companies versus TVA, coal miners versus hydro-power people, Northern versus Southern textile mills, independent grocers versus the chains, and so on and on.

Some Economic Fairy Tales

And as to half-truths and worse, you have a bookful of economic myths, which keep coming back like a cat with nine lives, no matter how often they are answered. Among such are the myths that "Gold satisfies a fundamental human instinct"; "The country is going broke and can't stand any more federal debt"; "Big corporations are monopolies and there is no such thing as a good monopoly"; and "Employers are only interested in profits"; and "Employees are interested only in pay."

Well, somebody has to find some kind of compromise or settlement of these contradictions and conflicts that arise between litigants. That's how economics is something like the law. For lawyers say that "the law is reason." And so is economics. If there is to continue to be any such thing as economics, it must be reasoning out of such things into some kind of "law and order."

That is what Congress is for, and the courts are for, and every cracker-box discussion and round-table conference and union convention and town-meeting debate.



And that's what this column was for—to take economic subjects and "be reasonable" about them.

That's what made it difficult to write—and interesting to write.

So long!

HERMAN, SHARROW INVENT COMBINATION TIE-WEDGE

C. J. Herman

R. F. Sharrow

A patent has been granted to C. J. Herman and R. F. Sharrow on their invention of a novel combination tie-wedge for fractional horsepower motors.

Mr. Herman is a group leader and Mr. Sharrow is a design engineer. Both are in the Fractional Horsepower Motor Development Engineering division. Their invention consists of an insulated metallic wedge member which serves both to hold the motor windings in the stator slots and to hold the winding end turns in place. It is particularly advantageous in motors for certain applications, such as for hermetic refrigerators, where varnish treatments and cord lacings offer certain disadvantages.

This is Mr. Herman's fourth and Mr. Sharrow's first patent. Mr. Herman has been employed by General Electric since 1937, and Mr. Sharrow since 1942.

The Bldg. 18-5 welcome mat is on display for Ella Highlands, Kenny Petgen and Howard Mertz who have moved in from Bldg. 6-2. . . . The reporter from Bldg. 18-4 writes "Oh for the lake and its breezes!" That is the most heard expression around here these warm days. But think of the roasting ears we will have with that good fried chicken. Always something good comes from everything. . . . Dick Kent, Bldg. 18-5, is on vacation this week. To escape the heat he headed north, hope he comes back. . . . The Data Bureau extends a hearty welcome to Al Basset, new test engineer who will work with G. D. White during the vacation. Mr. Basset is from Amarillo, Texas, and a recent graduate of Texas Tech. M.P.C. "Mike" Minter, formerly of the local commercial division, was one of his instructors and we believe Mr. Minter used a little sales talk for G-E. We wish Mr. Basset all of the good luck and surely hope he will like our Hoosier manners. . . . **Wanted**—Someone to tell Pat Beebe, Bldg. 18-5, how to stop a tan from peeling. (The tan was the direct result of a trip to Chicago and the Sand Dunes over the Fourth!) . . . We are very happy to learn that Veda Orff is convalescing at the St. Joseph Hospital and that Mrs. Charles Hitzeman (Mr. Hitzeman retired several years ago from Fractional Cost then of Bldg. 4-6) is much improved at the Lutheran Hospital. . . . A rusty wire, dock at the lake and Ray White of Bldg. 18-4, all met at the same time over the Fourth. The result was painful, but not fatal. . . . Carl Brandt, Bldg. 18-4, is "motor hoat repairman deluxe," since he got stranded in the weeds at Wawasee. Lots of sweat, muscle and refreshments took care of the job, or so he says! . . . Ruth Givens of Bldg. 18-5 hits the news again with a bang up birthday the Fourth of July. . . . George Washington once said: "Associate with men of good quailty for it is better to be alone than in bad company." . . . **Explosion?** What was that loud noise in Bldg. 18-3 on Monday? That trembling of the whole building! An explosion? An earthquake? Nope, that was Phil Arick hitting the floor with a fine "tecth jarring" bounce.

Union Negotiations

(Continued from page 1)

ping all other economic issues, such as holidays, pensions, vacation schedules, health and welfare program and the like, and conditional further upon the Union's acceptance of a two-year contract 'with a single reopening at your (the Union's) pleasure once during the life of that contract and that reopening to involve solely the issue of wages'.

"That would mean that while the Union could reopen the wage question next year, basic conditions of employment, such as vacations, paid holidays and the like, would remain fixed for the next two years."

Benefits Not Negotiable

The Union then sought to persuade the Company to bargain on pensions and other such economic benefits simply through mutual agreement in accordance with a portion of the contract that allowed things not otherwise required by the contract to be brought up for negotiation if both the Company and Union were mutually agreeable. The Company explained that it was not agreeable to bargaining on pensions and these other economic benefits, and that it was not under obligation to do so at this time.

The Union then sought to have a part of any wage increase, that might be secured in the current negotiations, to apply against increases in the Company's present pension, insurance, and other benefit programs. The Company explained again both that benefits other than wages were not a matter of negotiation at this time and that it was the Company's conviction that there should be no fourth round of wage increases this year.

Three Pensioners Speak

Three pensioners were introduced to the meeting and they were given an opportunity to speak in behalf of still further improvement in the Company's present pension plan.

The Union presented to the meeting two employees who had been laid off, one last December and one just recently. The former was a lady with four children and the latter a man with a family also of four children. The Company reminded the Union that an earlier contract gave consideration in cases of layoffs to employees with families but that this had been taken out of the contract at the Union's insistence.

No Fourth Round

Near the close of the afternoon meeting, George H. Pfeif, Manager of Union Relations for the Company, told the Union representatives that prolonged negotiations would be liable to give employees and the public a false impression of the prospects as to any fourth round, and stated:

"We have given careful consideration to your presentations since we opened negotiations a month ago on the demands presented by your committee.

"We in turn have presented the reasons why a fourth round in any form, since it would raise costs and prices and cut jobs, would be contrary to the best interests of employees, customers, owners, and public.

"We feel there has now been ample opportunity for exhaustive discussion of all the relevant considerations.

"We have again most carefully reviewed and considered the various claims made, and our resulting conclusion is that a fourth round in any form would be contrary to the mutual best interests of all concerned.

"The only answer the Company can therefore properly give to the Union negotiators' demands is 'No'.

"We accordingly suggest these negotiations be concluded."

The Union representatives rejected the Company's proposal of concluding the negotiations at once and stated they wanted to go home and report to their members, after which they would get in touch with the Company at some future indefinite date.

DECATUR G-E CLUB NOMINATES SLATE OF OFFICER CANDIDATES

The Decatur G-E Club has nominated its slate of candidates for the election to be held during the week of July 25 to 27. The new officers will be installed August 1.

Following is the list of candidates:

President

Robert Andrews, Bldg. 2
Fred Brokaw, Bldg. 1
Elmer Chase, Bldg. 2

Vice President

Charles Cook, Bldg. 2
Patrick Murphy, Bldg. 1
Niland Ochsenrider, Bldg. 2

Secretary

Mary Ann Laurent, Bldg. 2
Esther Meyer, Bldg. 2
Barbara Roop, Bldg. 2

Directors:

Hubert Cochran, Bldg. 1
Francis Eady, Bldg. 2
William Kohls, Bldg. 2

Ellen Raby Given Gift At Retirement

When Ellen Raby, Bldg. 4-2, left for retirement, she received a gift from her friends in FHP Motor Div. 15. The above picture was taken last week on her last day here. Left to right are: Vivian Frauhiger, Mable Booher, Jane Steinbacher, Opal Bates, Mrs. Raby, Luella Guy, Hilda Walda, Ada Bultemeyer, Johanna Alles, Mary Rupp, and Toni Lause.

Chest X-Rays

(Continued from page 1)

voluntary, but it is hoped that every employee will take advantage of this free offer. The test is also a confidential matter between the individual and his or her family physician.

All employees have been given letters with applications, which will be used to avoid delay in taking the tests at the plant. The applications should be given to foremen.

Arrangements have been made for employees to receive the test during regular working hours.

The survey is being made as a part of the Adams County TB Association's effort to combat this deadly disease. The mobile unit will also be available to all residents of the county during the Decatur Street Fair.

Plan Announced

(Continued from page 1)

way and at the Taylor St. dispensary. The dispensary at Winter St. will be open for the first shift only. The dispensary in Bldg. 8-1 at Broadway will not be open on this day.

Special Ballasts

(Continued from page 1)

completed ballasts were then given final test by Willard Lenz, foreman of test.

On the second day following receipt of the telegraphic order, the special ballasts were on their way via air express to Texas.

Teamwork Builds Sales

In a letter from the G-E salesman, he stated that TEMCO sincerely appreciated the excellent service which the factory provided. Furthermore, they were quoting on 17 similar jobs and if successful, would want additional G-E ballasts.

As this case illustrates, small orders often lead to larger ones through the efforts of all employees to create customer-satisfaction.

Two of the fluorescent lamps are visible, above, in the stateroom of the plane outfitted by TEMCO.

Information Clinic

(Continued from page 1)

General Electric's policy and desire is to pay what is right in the particular community—all things considered—for the skill, care and effort and working conditions involved in comparable jobs under similar circumstances. This has been a practice of long standing in Fort Wayne.

QUESTION

Are competing manufacturers of electrical apparatus experiencing a comparable slump in business?

ANSWER

Through the current slump we have continued to secure the same percentage of available business as prior to the slump. This fact, plus known cutbacks in production and employment in competing industries, suggests that we are all being faced with the same problems.

Friends Bid Farewell To Bultemeier

Ernst Bultemeier, FHP Motor Div. 15 in Bldg. 4-1, recently left the Company for retirement. On his last day at G-E, a number of his friends gathered to say "goodbye" and to give him a going-away gift. Left to right are: Ed Sonday, Frank Lawrence, Ray Pflueger, Fred Schaaf, Mr. Bultemeier, Russell Meeks, Clarence Reiter and Fred Pyle.

Happy Birthday—To Lois Tritch, Payroll Section, and to Ned Hackney, July 7; Adolph Strausser, July 10, and Wes Goss, July 11, of the D.C. Section. . . . Stork Tales—Congratulations to the Robert Knepples, who became the proud parents of—yes, another boy, Dennis, weight 8 lbs. . . . Prophet—If you are desirous of obtaining extremely technical weather data, please feel free to consult Paul W. (for "Whether" he guesses it right (or wrong) Lange. Paul even figures the wind velocity. When he can't give you an answer immediately, he consults his slide rule. So, gals, if you want to know when to carry an umbrella, see Paul. . . . So Sorry—Welcome back to Delores Giltz, who was ill for several days. We are sorry that you had to be confined indoors on such hot sticky days, even the fountains went dry. . . . Bon Voyage—We see Gwen Steinbarger poring over maps these days. Before long she will be departing to visit her former home in Wales. . . . Cool Trip—No Doubt—Mr. and Mrs. Dick Kilian enjoyed a nice ride with Willard Hopkins last Sunday in a Stinson Voyager to Clear Lake and back. 'Tis a wonderful way to travel these hot days. . . . Tidbits—Bob Loveland is enjoying his vacation at present. He said that he was going to fish all day every day. But, when asked where, he wouldn't reply. If he caught any, maybe we can coax the location out of him when he returns. . . . We are betting that Ned Hackney came home with a bouquet of roses or some similar gift for his wife after a fit of absent-mindedness besieged him the other evening. Ned was so intent on getting some papers to Ray Jones at the airport that he forgot about his date with the little woman. . . . The Payroll Section wants to know where Walt Lamboley buys those good looking khaki (censored). (You'll have to ask them). . . . A fond welcome back to Bldg. 4-6 to Mary Lou Vance, who replaced Teddy Neds Wilkins, in the AC Section. . . . Try Wilma Kirby's memory for numbers. She remembers clock and license numbers, etc. She's a whiz! . . . Nate Horton's golf game is causing him a lot of embarrassment. Someone found out about his "foot mashie." . . . Martha Davenport requests Payroll to please put up signs giving directions to their section. She doesn't mind men, but there have been mostly women lately. . . . Ralph Mesing, formerly of Bldg. 4-6, paid us a visit the other day. Ralph is now a painter. . . . The other day Judy Clark was addressing Mr. Whonsettler. Her Pennsylvania accent made it sound as if she called him, "Mr. Winesettler." . . . Gil Baker joined the floor sitters club Thursday noon. Congratulations, Gil.

Remember when you point your finger accusingly at someone else, you've got three fingers pointing at yourself.

M. B. A. SICK LIST

Ralph Meshberger, George Christman, Florence Minnich, Herman Bertsch, Herbert Kenworthy, Ralph Viland, Freida Farley, Geraldine Fredrick, Alice Nichens, William Kelsey, Mary Beaman, Luther Childers, Arnold Sprunger, Joseph Schlotterer, Roscoe Grover, Velva Smith, Warren Jackson, Vera Gennaitte, Serena Slater, Theodore Roehm, George Barker, John Haberkorn, Carl Fuller, Mary Wright, Veda Orff, Clinton Sorenson, Wanda Anderson, Wayne Coak, Fred Nagel and Charles Johnloz.

Returned to Work

Lillian Hall, Andrew Einsidel, Arthur Stute, Benny Szwenik, George Worley, Carl Hankel, Mary Schwartz, Alfred Seifert, Margaret Harrison, Gladys Balliet, Mable Englert, Huegeen Blew, Dock Gordon, Marion Gilgen, Edith Waite, Bernadette Lantz, Robert Johnson, Ethel Perry, Leah Guy, Doris Williams, Lela Line, Lawrence Woodward, and Clarence Stoner.

Usually the word is passed along like this—did you see so and so with his new car. This method gets around quite fast, but not fast enough for Ray Kierspe. He is so proud and pleased with his new Nash that he has taken the situation in hand himself. He tells everyone he sees that he has a new car. . . . Anyway it was about time Guy Oberlin bought a new lawn mower Guy says he really needed it. The old one was too hard to push around. Now he tells us the new one runs so easy that his seven-year-old grandson can push it. We bet that was the idea in the first place. . . . Vaughn Sheets spent a week-end in the capital city. Says he was very glad to get back to good old Waynedale. That the prices for meals were outrageous. He ordered fillet of something for a buck seventy-five thinking he was going to get fish; instead he got steak and very little of that. All we can say, Vaughn, if you would have got fish at that price they would have no doubt been goldfish.

Golly, summer is slipping by so fast, already the locusts are singing for fall. You had better hurry up all that work you had planned for it will soon be too late. Besides it's better to get it done before vacation anyway. You'll get more rest that way. Which reminds us, we were told there is only 80 work hours 'til vacation. Can you wait that long? . . . We have an apprentice in our midst. We mean Bill Schultz. Word has it that he is learning the art of careful spending from Jack Benny. Bill hasn't yet arrived at the point where he buries his money like Benny, but he does keep his small change in a safe place where he can't spend it. That's one way to resist temptation. . . . Charlie Schild and Ewald Wiegand stopped in to say hello to the gang. Glad to see them looking so well. This life of ease certainly agrees with them.

Elmer Kinney Is Honored At Retirement

Elmer Kinney, General Service division in Bldg. 20-1, recently retired, and at that time received a send-off from his friends and co-workers. In the picture are: (l. to r.) Bill Doehrman, John Bell, George Coplen, Harold Canfield, Dick Motter, Bill Schible, Joe Niedermeyer, John Hall, Harry Underwood, Mr. Kinney, Sam Houser, Herman Rosenhahn, Fred Altekruse, John Meints, Nolan Bachellor, Ray Strunk, Lee Miller, Cletus Dick, Charles Poe, and Harry Kruge. In the background: Howard Moore, Clarence Leakey, Ed. Bauer, Walter Sorg and Harold Stirlen.

The reason for the drop in temperature the past week-end can be attributed to the hail storm that was had in Northern Michigan. Ed Arthur brought a report back that the hail was as large as hen fruit and it was necessary to chop holes in the ice to go fishing. . . . Vacation time is near. Ed Brosche has been seen carrying his roll of maps always ready for reference. Ed is laying extensive plans for a prolonged trip to the South. It is rumored that he is going as far south as Poneto. . . . If you have any friends living in Tucson, Ariz., contact Leo Persing and he will gladly carry any messages there for you. Of course, a donation will be accepted. . . . We noticed in the Roanoke News that Bill Grimm attended the J. H. McClure reunion near Roanoke recently. . . . Reservations are now being taken for rides in Harry Kessler's new Ford. Remember, it is first come first served. Marion Sprague is taking down the list of names. . . . It has been suggested that Ed Kronmiller practice his piano lessons. "Well, what's holding you back." . . . Cliff (Free-fish) Coombs is developing a new type of corn. This one, instead of sprouting out of the ground like a normal corn stalk, will pop up. We wonder if he is going to include butter and salt at no extra cost. . . . We wondered what Douglas Bragg meant when he told Mike Kramer that two was company, three is a crowd. . . . John Miles' recent trip to Chicago was a dismal failure as far as Johnny was concerned. Hotel rooms were very high, you even had to pay for a glass of water. For a more detailed information, see Johnny Miles. . . . If you want results, use the WORKS NEWS column for advertising. Ray Epperson informs me that his entire crop of rye wheat has been spoken for with the exception of the late crop which he is using to keep the weeds from around his tomatoes. . . . We don't know whether the heat had anything to do with it or not, but John Junk was seen walking down the aisle with a cup of ice cream in one hand and a straw in the other. . . . There has been a decline in the number of farmers in the south end of Bldg. 17-1. Paul Geiger recently sold his farm which was located near Clarence Doctor (no that was not the reason) and moved back to the city. This should be good news to Mary Gerhard as it will cut down the length of the farmer's column. . . . Due to the recent heavy rain, we were not able to obtain much information on the doings of the M. N. M. truck garden experiment. George Mosshammer couldn't get under his favorite shade tree. Frank Martin decided to stay home and help his wife bake cup cakes because his brother Ed was coming over for a visit. Charlie Neblick had his granddaughter visiting him and was also painting his house so he stayed home. Next week we will try to give a report of the battle between the weeds and beetles against the M. N. M. hoe workers. . . . There was a near catastrophe reported at the Lillie Pion farm. It seems some mice got into the corn crib and Lillie almost knocked it down trying to get them out. . . . Vic Leakey reports that the fish were really biting in Michigan last Saturday during the rain. To keep from getting wet, Vic and his co-fishermen removed their trousers and shirts and placed them under the seat boards of the boat. Vic says he never thought rain could be so cold on such a hot day. . . . Len Hutson was really busy over the week-end. What with doing the family wash, cleaning the house and answering the door, he was really kept busy. Len says this is one job that could really stand some method improvements.

You always hear about women going on diets, but it seems there are two men who are also trying to lose a few pounds. Who? George Myers and Bob Striker. How are you doing, boys? And in case you are wondering how many calories are in something just ask Bob. He can give you all the information you want to know and we do mean all. . . . R. Owens had a birthday the Fourth of July. . . . Kenny Gaunt is quite a golfer we hear. We understand Tom Haubold and Herb Foos enjoy the game too. . . . Wanda Bailey found out one gets wet when caught in the rain. . . . My most embarrassing moment by Genny August. Getting in the restroom and not knowing that a plumber was working in there. . . . At last we're mentioning a new one, Marion Brodbeck, how is your garden growing after this nice weather we are having? If you have any favorable reports on your vegetables, let us have them; we're always anxious to get some news. . . . Howard Gehrig of Plant 2 was admitted to the Veterans' Hospital in Indianapolis for medical care. He is reported doing well. . . . The little town of Wren, Ohio, was nearly washed off the map in our last rain. Lohnas McClure reports everything was wet. . . . The Flange Line welcomes Ray Eicher back. He has quite a tan since we saw him last. . . . One week of vacation is over for Wilbur Suman. He reported doing a lot of household chores during his week off. Nothing like helping the little woman. . . . The new four place Piper Clipper amazed Stanley. You should have seen him sailing up there at 5200 feet. We hear Ralph is a good pilot and we hope some day he'll take us for a lift. The sound affects in the Clipper is Ralph's weakness. . . . When it comes to fitting boots Johnny Morgan tops the list. You should have seen him in the boots—all he would have needed was a paddle and he could have rowed himself out. . . . Dale Harshman is reported to have caught a couple fine bass during the Fourth. How about a fish fry, Dale? . . . Then we hear things about Jerry Light such as golfing, fishing and a sudden rush to Bluffton. Nice going, Jerry.

John Egner Dies

John D. Egner, 66, of Churubusco, died recently at the McCray hospital in Kendallville.

Mr. Egner first worked for G-E in 1927 in the General Service division. He returned in 1944 as an acid dipper in Bldg. 26-B. At the time of his retirement in 1948, he was a sandblaster in Bldg. 26-1. For the past 14 years he has served as the Justice of the Peace at Churubusco. He was a member of the United Brethern church of that town.

Birthday greetings of the week go to Milo Reed. . . . Mr. and Mrs. Eddie Ensch are the proud parents of a baby boy named John Frederick. Congratulations, Eddie. . . . Tom Blackwell went out at noon one day last week and bought a new pair of trousers. This was the same day that he was working close to the new help in Aircraft. His remark was that he wanted to look his best. . . . Those of you who remember Jack Renner would be glad to know that his widow, Nina Renner, is now operating a variety store at 2423 Broadway and would appreciate your patronage. . . . Did anybody notice the black eye around the division last week? Haste makes waste. It is better to miss the bus than fall for it.

Celebrates 30th Anniversary

Merland G. Heller, Bldg. 4-3, recently celebrated his 30th anniversary with the Company. He received a congratulatory letter when a number of friends gathered to congratulate him. In the picture, which was taken at the presentation, are: (l. to r.) Fred Ellis, Ed Farrell, Ed Robin, O. J. Mettler, FHP Div. 1 Supt.; Mr. Heller, and George Prince.

Dan Reuille seems a little bow-legged lately, but he acquired it by doing his good deed for the day. He rushed to an accident, arriving just in time to catch a lady as she fainted. Now, the lady weighing a little less than 300 pounds, his legs just naturally bent and she was eased gently to the ground. . . . Lena Forker, Dorothy Whan and Granet Curie were feeling much cooler in the afternoon. We wonder what they did? . . . We are sending out an S.O.S. for a sharp pair of shears for Ernie Clark. Either he has a dull razor or he isn't standing close enough to the blade. Anyway, as hot as the weather is it's inhuman to let him wear that fur piece on his face. . . . Congratulations to Almetta Smith. She has another grandchild to love and spoil. . . . It doesn't take much to break Art Pequignot into song. He was so grateful for the push cart that LaDonna Durbin let him use that he gave her a few bars of "You Powder My Face With Sunshine." . . . Marge Robertson tells us that she has been going to the rootbeer stand at Main and Broadway. Should we tell her that the stand has moved? . . . The story that the fortune teller told Lonnie Rockstroh intrigued Dorothy Linsky and Ruth Freeland so that they went to see what was held in the future for them. We wonder if they too are supposed to meet the same handsome fellow? . . . The capers that Bob Wiehe and Dan Reuille went through the other day made the Marx brothers look like the gold dust twins. Just think what they could do with a little practice. . . . Paul Black is out to acquire a suntan. Nothing said about the progress made yet. . . . Don McCrea's hair cut looks like someone overtook him with a lawnmower. He will save the price of a hair cut for a long time to come. . . . A warning to all pedestrians. If you see a gray Ford coming, give it the right-of-way. Don't cross the street even if you think you'll have plenty of time. It's Ernie Clark back of the wheel again. . . . Frank Clibon would like to know why they don't make sun back shirts. The only reason that we can see that they don't would be that they wouldn't want to disallusion the girls. You know, many a man in a bathing suit drapes his muscles over a chair. . . . Maxine Mertz and her husband have purchased a trailer to go with their new car. Go easy on the curves, kids, the trailer is supposed to stay behind the car.

Office Offerings

Theresa Lindenberg has beautiful hand painted wallpaper in her new home. It is causing quite a stir with people riding past. If she would only own up to it that the house is hers, the paper her own idea and it is much more beautiful from the inside she may have a lot of company just to satisfy their curiosity. . . . We wonder if it is the hot weather that is getting Jim Wellman down or could it be that the one acre farm he has is too much for him. Something is robbing him of his sense of humor. . . . Phyllis Perry got her suntan all in one day and now she is losing No. 1 layer of skin and must start all over again. Old Sol says, "This is one kind of medicine that you must follow the directions. Take often and in small doses." And that is one guy that doesn't have any favorites.

Many a natural good figure in men goes to pot.

Elex Club Sends Softball Equipment To Farm School For Boys In Wisconsin

Members of Elex club, shown above packing sports equipment to send to the Farm School for Boys in Wisconsin, are: (l. to r.) Betty Puff, Bldg. 4-6; Mary Jane Redding, Bldg. 17-3; Thelma Stone, Bldg. 18-1; Margaret Taylor, Bldg. 4-6; Betty Williams, Bldg. 4-6; Imo Jean Schwartz, Bldg. 21; Eileen Foor, Bldg. 17-3; Betty Garber, Bldg. 4-6; Delores Patterson, Bldg. 6-2, and Alice Dahman, Bldg. 4-5.

The Elex Club recently received an envelope containing 16 letters. Some were scribbled on lined notebook paper, others were on colored stationery; some were written neatly, others had scrawling figures; some were illustrated with crayon drawings, and others were plain—but all were from a group of young men in Wisconsin, who were expressing their thanks to members of Elex.

The letters were sent from the Wisconsin Home and Farm School for Boys, one mile east of Dousman, Wis. The boys had written to thank the Club for sending them a complete set of softball equipment.

Former Employee Is Mr. G-E

Elex took an interest in the group through Warren Locker, a former G-E employee who is now Assistant Superintendent at the school. Mr. Locker formerly worked in the employment division here. Mr. Locker reports that he is known as Mr. General Electric by the boys because he has used the Company in a great many illustrations while teaching the boys their school lessons.

The Wisconsin Home and Farm School supports and educates neglected, destitute, homeless, and orphaned boys. Their object has been to get these boys before they become delinquent and set them aright.

An effort is made to have those responsible for the boys make some payment for their support. However, no boy is turned down because no one can contribute toward his support. The main source of income is contributions from many individuals interested in the work being done for these boys. The other source of income is from an endowment fund, built up by the bequests of friends.

32 Boys Are There

Boys come to the home through arrangements with parents, guardians, or the juvenile court. At present, the home contains 32 boys ranging from 7 to 17 in age. Seven of these attend Oconomowoc high school and the rest attend the grade school on the premises.

The home is under the general supervision of a Board of Trustees who serve without pay. A staff of seven full-time members assist and supervise the training of the boys in performing the many necessary tasks about a home and farm.

At Easter, candy was sent to the home by General Electric's Elex Club, the only organization out of the state that has sent things to the boys.

Boys Send Letters

At that time, Irene Meyers, adviser to Elex, received a package of letters from a group of the boys. Typical of those that were received are the following:

"We spent a very happy and joyous Easter today and hope you also did. We spent a nice day because of people like you. Mr. Locker told us boys about you and your group. We were given the candy egg at the dinner table on Easter day. You should know how the boys appreciated them, as boys do enjoy candy very much. We want to thank you and the group for your kindness in thinking about us at a beautiful time of the year as Easter is. I would very much like to keep in contact with you and write you every so often. A good and kind person like you deserves some nice letters. Of course the little bit I can do for you would not fill the thing you have done for us.

"Maybe you would like to know something about the school. We have a capacity of 32 boys, ranging from 7 years to 17 years in age. Each boy has a job after the breakfast meal. Some work in the dormitory, doing jobs such as sweeping, dusting, and scrubbing. Others work down at the barn, milking cows, doing outside chores, etc. My job is taking care of the laying chickens. The jobs change every three months.

"The boys go to church and Sunday school every Sunday. They may go where they like. Of course it cannot be very far away. Three boys and myself go to the Episcopal church in Dousman.

"We have a school, lake, and barn right on the grounds. Also a Supt. cottage, ass't. supt. house. We go swimming and fishing in the summer time, skating in the winter time. We have two lakes, one which is not by the house. We do more skating at that lake.

"Also, you may be interested in knowing something about me. I am 15 years old, in eighth grade. I will be going into high school next fall. We go to Oconomowoc, which is about eight miles from here, when we go to high school. I am very interested in piano and take lessons in Dousman. I walk to the town every Saturday. I think music is a very good thing when you feel down in the dumps.

"I hope sometime you can come out and visit. I am sure you will be treated very kindly.

"Your friend, Richard."

From another boy came the following letter:

"I was very happy to get your nice gift of an Easter egg from you and your club of girls.

"I have an uncle who used to work at G-E in Milwaukee.

"You will find out that we liked the gift very much because more than me will be writing to you.

"Yours truly, Roger."

Another boy wrote:

"The Easter eggs which the Elex Club sent have been much talked about. They certainly did taste good and the boys were very pleased.

"I am a new boy here. I have only been here a few weeks and this is entirely a new life for me, but I like it.

"We had horrible weather over the Easter week-end but today is wonderful. Everyone was out playing baseball today. I couldn't make it. During the rainy weather we did some tumbling in the gym. I guess I upset my stomach.

"I wish you could visit here some time.

"Your friend. Kenneth."

Most of the younger boys wrote the following:

"Since I am just a little boy and not a very good letter writer, I am drawing a picture to thank your club for the nice Easter egg.

"Your friend. Jerry."

Later the club's officers voted to send the home a complete set of softball equipment. Again thank-you letters were sent, including the following:

"Was I ever surprised when I saw all the ball equipment from your club. That is something we really needed, because we are going to be in a softball league. I surely appreciate all the things you are doing for us.

"Thanks again for the ball equipment.

"Your friend. Gene."

Another wrote:

"I want to thank you for your fine contribution to us Farm School boys. I know they appreciated it very much. We will use the equipment very much and when we do we will think of the Elex Club members.

"Sincerely yours. Robert."

Fred Grunst is walking around in a daze all because of the birth of his first son. The first night he has to walk the floor he will lose that dreamy look. Anyway, congratulations to the proud parents. . . . Norma Krall was in to visit us this week and to say that she had been released by her doctor to come back to work. . . . Marvelene Butts left us this week to become a housewife and she will be missed very much here in the office as we had all come to depend so much on her for so many things. . . . The Birthday Club met at John's Steak House for their monthly meeting with Eileen Hennen as hostess and the girls with the birthdays were Marvelene Butts and Luella Bixler. Those present were Norma Krall, Kate Scherer, Marilyn Roehm, Dorothy Askren, Ann Lapadot, Olga Welch, Florence Knight, Laurel Weaver, Eileen Hennen, Marvelene Butts and Luella Bixler who had as her guest, her niece. . . . Dorothy Mills finally got her driver's license and now the traffic cops are surely going to earn their money. I am only kidding, of course; happy driving, Dorothy.

We wish to extend our sincere sympathy to Paul Boedeker in the death of his mother last week. . . . Our sympathy also goes to Harold Whonsetler in the death of his father-in-law. . . . We can report that Russel Deveny's daughter is much better after a week of serious illness. . . . Harry Combes returned to work after a week's vacation complaining that he was tired from resting. . . . Dewey Erne was coming down Brooklyn Avenue the other morning on his way to work when a policeman waved him to slow down. Dewey politely returned the wave and continued right down the street. . . . Gurney Lindley can't understand how I learn of all his escapades, especially of his running out of gasoline. But don't you think that is real faith in a car when a fellow keeps coasting right past filling stations after his motor stops. He only had to walk back with the realization that it won't run without gas. . . . Jerry Knight almost had a free meal in the cafeteria the other day when he went to the table without having his tray checked. Then he became so excited that he went to the checker without his tray. . . . Jess Batchelder came to work with a large patch on his head and told of the trunk lid of bis car falling on his head. I heard he was playing ball in the house and missed the ball which rolled under the bed and making a dive for it he struck the bed rail. You can use your own judgment as to which story is right. . . . We have a new man in the group, one Joe Miller. At least Ozzie Nahrwold signed a time slip for Joe for a paid holiday. . . . Lyle Claphan's family have been enjoying a little stay at the lake and Lyle has been having his trouble with "ye olde jalope." After installing a new fuel pump the other morning on his way in, it seems to be getting along O.K. He is also in the outboard motor repair business having two successful jobs to his credit. . . . Anyone wishing any hauling done please contact Jack Pollock. Jack guarantees all parts delivered even if he has to make several trips gathering up lost parts. . . . John Repine was inquiring for a small funnel when Ray Bowers came up with one he had out of a cracker jack box. Well, John, how small is small?

Congratulations to Helen Spear and her husband who spent all their spare time last year building a new home on the Milan Center road. Although not entirely completed, they moved in two weeks ago. Helen is now an authority on all stages of construction and wields a mean hoe when it comes to mixing plaster. . . . Birthday wishes to Gladys Elliott, who celebrated July 11, and very belated wishes to Ruth Walda for her June 30 celebration. . . . The shows at the theaters change on Thursday, of that Marie Thornhill is positive now. It came about this way: She and a friend attended the theater twice in one week and to their surprise they found the same picture being shown on their second trip as they had seen on their first. After demanding and reluctantly receiving their purchase price from the manager, they moved on where the entertainment was new. It might have been caused by the extreme heat. That's as good an excuse as any. . . . Ralph Reinking says he likes to fish, but for some reason he never can get away unless someone calls for him. At least that's the impression Paul Kennerk has. Ralph has been begging him to drive past to pick him up when he goes fishing. Paul might be all wrong, maybe he wants someone along to bait the hook! . . . Best wishes for a speedy recovery to Bryan Brown, who is confined to his home.

4-1 Floorage

By Marie Lantz

Portrait of a Pensioner: Among his co-workers he is known as "The Dutchman". Like a Dutchman he is possessed of the sterling qualities of steadfast loyalty and reliability. It is these characteristics that bind him closely to his friends and associates, here in Bldg. 4, with whom he spent his last work day, Thursday, June 30. Ernst Bultemeier devoted nearly 28 years of service to General Electric as a repairman. All of this time was spent in Bldg. 4 which includes Bldgs. 4-2, 4-4, 4-5 and lastly, 4-1. Throughout these years Ernst achieved an almost perfect absentee record; other than attending funerals, he was never absent for illness or personal reasons.

Ernst Bultemeier will not be an idle man, especially this summer. Between fishing and farming with his son-in-law on an 80-acre farm, he'll be active raising gardens, grapes, and, we suspect, a rumpus at times with his grandchildren.

So, as Ernst said, "I rejoice, yet I'll miss my friends," we, too, rejoice with him, that his road onward may be ever blessed with the best for one who so deserves it.

To celebrate Ernst Bultemeier's retirement a stag party was given in his honor at his home on Oakdale Drive, Friday night, July 1. About 35 fellow workers attended.

Independence Day with all of its rich heritage and background is past. Corn kept up with tradition and was knee-high and then some. Then too, we will watch and compare the standings of the leading baseball teams in both leagues at the end of the season. We shall see if the leaders on July 4 will be pennant winners at World Series time. . . . Veda Orff is still a patient at the St. Joe Hospital. It is uncomfortable enough to be stirring around these hot days, not to mention being bedfast. We all send wishes by the score that you will soon be much improved and back in Bldg. 8-1 again, Veda. . . . Imo Jean Schwartz is the proud aunt of a bouncing baby boy. His name is Paul Michael, but other than that we haven't heard about him, Much! . . . Alta Bishop had the misfortune of turning her ankle recently. After all, Alta, a bride-to-be is not supposed to limp down the aisle! Glad to hear it is better, though. . . . The new revolving fans in Bldg. 8-1 dispensary have been lifesavers during the extreme heat. We do appreciate them very much. . . . Recent visitors at the home of Minnie Fryback on the Aboite Center Road were Mr. and Mrs. Frank Marx and son Jon of Sandusky, Ohio, and her sister, Esther Shannon of the Country Club Gardens. . . . Forrest Mulvane, son of Mae Mulvane, Bldg. 21, arrived by plane at Los Angeles last week. He has obtained work there and will remain for the summer. . . . According to the papers, the weekly square dances planned by the park board are very well attended. About time for the dance to start, I can't help but think of the first trick people who will be "diving for the oyster," and going "grand right and left," while the second shift is working. But maybe our day will come! . . . During the summer months when auto traffic is at its peak, always remember that a courteous driver is a careful driver. We all have known people such as the one described in the following. Let's not be like him.

Consider the Motorist

Out of his chariot, he may be the meekest and most peace-loving of men. But once he putteth foot into his gas buggy, he becomes a bear-cat. He trampeth on the accelerator, and leaneth upon the horn. He cusseth his fellow drivers and glareth at the lowly pedestrian. He passeth out threats and offers of punches in the nose with abandon. He fretteth and fumeth at the stop lights which bid him stop. He damneth and helleth when his car proves slower than his rival's. He arriveth home in the mental condition of a starving mountain lion, and announceth to all that he had a pleasant drive.—Anon.

To rejoice in the prosperity of another is to partake of it.

George Guenther Retires

George Guenther, of the Motor-Generator division in Bldg. 19-3, left last week for retirement. Some of his friends at G-E are shown, above, when they presented him a gift. Left to right are: Mr. Guenther, Elmer Wagner, Theodore Schlup, Elmer Warner, and Ed Screeton.

"It is easier to smile than to frown; it takes 64 muscles of the face to frown, only 13 to smile."

Paul Bender and young son, Norman, went to Cincinnati last week-end to see Norman's favorite team play, St. Louis. Paul bought him a tee shirt and hat with Cincinnati Reds on them and Cincinnati itself cannot produce a more ardent fan. The only thing that spoiled the trip was the defeat. The game ended 3-2, St. Louis. . . . Archie Evans' boy underwent a tonsillectomy last Saturday. Both father and son are fine. . . . Mary Beaman is still at home following a recent operation. We hope you will soon be well, Mary. . . . One thing is certain that the first fish-story-teller doesn't have a chance on Monday mornings. Ralph Walda topped Gene Wheeler's story this week. My, we didn't know they were allowed to catch so many fish. . . . Jim Kavanaugh is getting more publicity all of the time. Both daily papers have taken up the subject of Jim's bridge playing and his driving. . . . Paul Traub's daughter, Norma Rose, is spending two weeks at camp at Winona Lake. . . . Charlotte Hyman, daughter of the Kenny Hymans, spent a week at Oakwood Park Camp at Lake Wawasee. . . . A recent letter from Dan Painter, formerly of Bldg. 17-3, tells how he misses the G-E family and would like to be back in Fort Wayne again. Dan lives in Denver, Colo., at the present time. . . . Bob Foster came in to see the gang last week and brought pictures of his baby daughter. Deborah is four months old. . . . Dorothy Kell has joined the second shift. . . . We say au revoir to Mary Beahl and Opal Snyder and hope to see them back soon. . . . Charles Sherland of Taylor St. stopped by the other day to say hello and to tell us that he raised strawberries this year that one ate like an apple.

Braun Celebrates 30th Anniversary

Otto Braun, Specialty Transformer Div. 94, recently celebrated his 30th anniversary with General Electric. His friends in Bldg. 26-4, who gathered to congratulate him, are: (l. to r.) W. H. Crouse, Division Supt.; Alfonso Helwig, Ralph Smith, Benjamin Keller, Joseph Trondly, Mr. Braun, Frank Schlotter, Samuel Daily, Melvin France, Arthur Gallogly and Paul Peterson. These men represent a total of 325 years' service with the Company.

Beulah Bailey Is Honored At Luncheon

Friends of Beulah Bailey, FHP Motor Div. 13, Taylor St., honored her at a luncheon on the occasion of her retirement. In the picture are: (l. to r.) George App, O. J. Meyers, Mrs. Bailey, Elizabeth Bailey, her daughter-in-law, and Zella Wittmer.

Apprentice BROADCAST

by MILDRED ELLIS

We wish to announce the approaching marriage of James E. Hoppel who will become the groom of Maxine Rinehold July 30. We wish you many years of happiness. . . . The newest member of the "Floor Sitters Club" is Carson, and now that he's been made a member he stands most of the time (?) . . . It seems that Gotschall experienced a little inconvience while returning from Ohio last Wednesday night. . . . It's good-bye (for a few weeks) to Fred Stoup, who is taking a leave of absence. . . . Leffers perspires more on Mondays than any other day. John says it's not from overwork—it's the 3.2 working out. . . . Brownie went fishing and got so many mosquito bites on his neck that he looks like a red pickle. . . . That old Ford of Allen's is now a wreck of a wreck. Allen and Stoup were returning from their homes in Danville last Sunday night when Allen made a sudden stop—and the semi behind him didn't. We are glad that Ron and Fred escaped with only a few bruises. . . . Miller says that those Waynsdale guys are tough to beat in softball, but there's no one so tough to beat as the "Yoder Tramps." It's a good thing they don't bave a team this year. . . . Nix claims he saw a flying disc in the mill section last week. . . . Red faces and necks were so common after the fourth that people — like Birkenbeul — with white faces were an oddity. . . . Carson took a long journey to his home town via auto and has a sunburned elbow to prove it. . . . The ball club had a big picnic at Tri-Lakes before their game Sunday. Could it have been all the excess food and drink that caused them to lose both games? We wonder why Junk and Davis couldn't find the picnic? . . . Everyone is wondering if Wolf will split 50-50 with Barnes on his latest "big invention." . . . I won't mention any names but can you imagine a certain foreman who's initials are R. B. instructing his two daughters on the hazards of an electric fan—then sticking his own finger in it for emphasis. . . . Jack and Carl finished their sailboat last week and launched it on Lake Wawasee Sunday. In their excitement they forgot to tighten the bolt in the center board and had a boat full of water before they realized what was wrong. Otherwise all was well and both families enjoyed an afternoon of sailing. 'Twas the first time Hubartt had ever been sailing and he didn't get sea sick.

"DITTIES" from DISTRIBUTION

by Phyllis Grace

It's been quite sometime since romance has entered our happy little group, well at least any real serious romance. Therefore, we're all just tickled pink about that beautiful diamond which announces the future wedding of our little girl Friday Shirley Hughes. . . . The heat has been on around Bldg. 6-2 and the main reasons for all the cheery rays are Dorothy Fletter and Kate Minehart. How some of these people can make like a Sunday roast duck and not falter on their cheery way is beyond your reporter's comprehension. But they do look real nice when they are all done. . . . In case some of you people migbt have missed the date, last week marked another anniversary of the birthdate of Ruth Kibiger. Happy birthday to you, Ruth. . . . There will be no need for anyone to take the fall out of Helen Elbert cause she's already had her fall, thank you. Seems Helen hit Mother Earth very firmly and she has the bruises to prove it too. Maybe you should wear non-skid soles on your shoes, Helen. . . . Some time back we gave credit to a couple of our ambitious gal seamstresses who can whip up anything with a needle and thread. Now the time has come to honor a couple of gentlemen in our midst who can repair most any item with a hammer and screwdriver. They are, of course, "Dutch" Wilson and Herman Ebel. Dutch has added his latest talent, that of shoe cobbler. Just give him a stapler and those shoes will look like new. Herman's greatest talent is with the fans, and drop cords and things. Congratulations to our two handy andy men.

TOOL BITS — BLDGS. 19-4&5

by Harry Travelbee

John Stetler tried his hand at Warner Swazy a few days ago and seemed to be doing OK—BUT—he's back at his old machine again. . . . Al Berger, former steel and stock room man was up to see us June 29. Seemed mighty good to see Al around again and bope he can continue in good bealth. . . . Seems that a few of the boys in Bldg. 19-5 have the habit (a good one at that) of exchanging victuals—cake, pie, and sandwiches. Gives us an idea how the other fellows' wives can cook. But the payoff came last week as a fellow worker (J. H. by initials) came over to see if Chet Reynolds had his breakfast and gave him a sack which was supposed to contain said victuals. Chet, being a bit on the hungry side at that hour ripped open the sack, visualizing a nice piece of pie or cake, but to his surprise, as he looked into the sack, there sat a couple hungry looking mice. We hear that Chet wasn't too hungry after that all happened. . . . We were just wondering if Herb Thiele is trying to establish a new style or if he is just in a big hurry to get started working. He came in last Monday wearing an apron. Careful, Herb, your wife may ask you to wear it home at night too and you know what that would mean. . . . John Roemer came in last Monday morning just beaming all over (if that is possible) just dying to tell everyone about the bluegills that he caught (HE CAUGHT, mind you). Said he had 12 that were ten inches and one that was over nine inches long. Boy, was he proud! then later he told us more—that his wife was along and that she showed him how to get the big ones. One of Johnny's friends claims the rules he was using, had the first four inches broken off, which accounts for the big fish. Still another fisherman in Bldg. 19-5 claims that Roemer doesn't know the difference between a bluegill and a carp. I guess if we want the low down, we will have to go to Johnny's home to see the fish. Right, John? . . . Guess Chet Stoner will be wearing a white apron and a pair of white gloves one of these days or at least he will if he listens to Ray Mutton. Ray claims the one head crane belongs to him and if Stoner wants to use it he will have to get snow white equipment to handle it. We hear Ray has given him a few days to pick up the apron and gloves. Go ahead, Chet, you look real nice in white.

It's Windy Here

by JOAN AUBREY

When Hubert Meyers had a birthday sometime ago, it seems his family gave him a new Air Foam cushion for his desk chair. So now when you want to see Hubert, you have to go to his office because he doesn't leave his nice soft chair anymore than necessary. . . . Perry O'Neill is wondering where he can get a welder's helmet to wear while feeding the twins. The other day while feeding them some prunes, Karen decided she didn't care for them, so Pop ended up with prunes all over the front of his shirt. . . . When are Charlie Gable and Hugh Neely going to learn that they are no longer kids and can't play softball all evening and still be able to get around the next day? One day last week Hughie could hardly make it up off his chair. . . . Next week Roy Rippe is going to have a big time at the Shrine Convention in Chicago. Roy is going to lead his patrol in the parades and we hope they make the best showing of all the groups there. Good luck to you and your boys, Roy. . . . Happy birthday to Peg Turschmann July 20. . . . Have you seen Gene Foster's new hair cut?

17-3 NEWSIES

by WILHELMINA BEETH

From all the peeling noses and red backs, a lot from our floor enjoyed plenty of sun over the Fourth. The time has narrowed down to two weeks and from all the plans floating around, everyone must be looking forward to a nice vacation. . . . Little Robert (Cannon Ball Jones) made his appearance as a blue-bootied tax deduction at the Fred Grunst home on the Fourth of July. The papa is getting along fine. . . . On Harold Kiel's vacation reports are that there was no fishing. (They weren't biting anyway.) He did get his Christmas tree dismantled and the trimmings all put away. That was foolish because in about 150 days he will have to haul it all back out and start over again. . . . Do you need a new excuse for explaining a black eye? Just ask Bill Ort for a demonstration on how to get spiked in the eye with baseball shoes. . . . The Joe Jensens have company from Mandan, N.D. The chief attraction is Joe's great-niece. . . . It must be the heat, not the humidity, but Hershel Case was seen backing up to a stator truck to rub his back (pig style). . . . Mabel Buker was seen going around the corner on two wheels. (The rear two were up in the air via tow truck). . . . Joe Meehan was seen downtown all tied up. . . . Delores Wonderly was seen talking and explaining by sign language. Delores also forgot her check at the cafeteria and when going back to retrieve the same, she muttered, "You'd think I was in love." (This is July, not June). . . . Juanita Likens got on the bus four times before getting on the right one. . . . It's a happy birthday to Bertha Bertsch, Nina Clifton and Jo Ann Kemery. Nina received many pretty cards and hankies. It was also a farewell to her. She has gone to work in the office in Bldg. 6-2. We will all miss you. . . . We are glad to see Ethel Perry back with us. Also to hear that Emma Bennett Snyder is feeling much better. . . . Mary Wright had the misfortune of cutting her finger requiring several stitches to close the wound. . . . Cecil Phillips took a little vacation last week. Nice warm weather to do it. . . . Al Johnson was looking for a man with varigated legs (he meant varicose veins, we think). . . . All the confusion of 566 line was just a little mouse trying to make friends with Bertha Furge. . . . Elizabeth Wert was displaying a picture taken on the recent Elex trip to Niagara Falls. She should really enter it in a photo contest. . . . We wouldn't know why Edith Paxson thinks it is a jinx to carry a thermos bottle to work. She broke her third one last week. By the way, do you have a clock that refuses to run? Edith says if you wash it with DDT, it will really take off. . . . Alice Brockmeyer says it is too hot to do very much, so she proceeds to bake a couple of pies and a cake. (I'll take a nap in the shade).

AD-LETS

Only one ad per employee may be inserted. Each ad must be limited to 20 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE

Monday Noon, July 18, 1949

LOST AND FOUND

LOST—Brown leather billfold containing driver's and fishing licenses with name G. Zoller on them.

LOST—Bottom part of a Parker fountain pen. It has stripes of red, black and grey on it. Lost between Bldg. 18-2, Employees Store, and the parking lot on Broadway, north of Bldg. 18.

FOUND—Three keys on a metal bar. Found by the Lindley Ave. gate house.

FOUND—Gold Swank tie clasp in Bldg. 8-1 Dispensary.

FOR SALE

1941 FORD—Champion outboard, 4.2 HP; auto top carrier with basket and cover. H-4453 Saturday or Sunday.

DAVENPORT—And chair; also day bed. H-24771.

SEVEN-ROOM ALL MODERN HOUSE—One block from Hamilton Lake, boat included. $4,000. Robert Johnson, Hamilton Lake, Ind.

CB OUTBOARD MOTOR—3½ HP, used one season; light oak kitchen set. A-26235 after 5 p.m.

ONE-WHEEL TRAILER — Like new. E-3929.

POWERFUL 1938 PACKARD — Swell condition, snappy heater and radio, fair price. E-2635.

GAS AND ELECTRIC STOVES—A-89119 after 5 p.m.

WHIZZER MOTOR BIKE—1947 model, reasonable. 530 Spring St. A-56464.

FRYERS—H-02314.

DOUBLE BASIN SINK—New, 21x42 in., white porcelain on cast iron, complete except faucet, bargain. 815 Huestis Ave.

WANTED

TRAILER—H-24771.

FOR RENT

TWO NEW COTTAGES—Each sleep four comfortably, fully equipped, lake front, modern water facilities, Lake George, $35 per week. A-66542.

COTTAGE AT LAKE WAWASEE—First week in August and from the 15th on. Telephone, New Haven 3823 or 223 Henry Street.

SMALL HOUSE—Elmrow Drive. A-89119 after 5 p.m.

SLEEPING ROOM—For lady with cooking privileges. H-69693 or 2624 Reed St.

TRANSPORTATION

WANTS RIDE—Evelyn Swartz, from Columbia City. Works at Taylor St. for Mr. Kruckenberg, from 8-5:16 p.m. Extension 223.

WANTS RIDE—Irene Kreger, from three miles south on Road 27, and one half mile west of WKJG towers on Maples Road. Works for Martha Scherzinger in Bldg. 4-3, from 7-3:30. Extension 416.

Motor and Generator Static

Thought For Week: If you don't enjoy what you have, how could you be happier with more?

ODDS AND ENDS: A dairy in Daly City, Calif., displays this slogan on its delivery wagons: You can whip our cream, but you can't beat our milk. . . . A sign on newlyweds' car in Flint, Mich.: At Last. . . . Stan Amstutz, Bldg. 31-1, is the proud father of an eight pound daughter born July 10. Her name is Gloria Alice. Congrats. . . . NO FUN: Kid brothers can represent a lot of trouble to older sisters. The other day Lucy Rogers' kid brother approached his mother with a problem. "Say, Mom," he remarked, "I wish one of my sisters would get married so I would have a brother-in-law." "Why do you want a brother-in-law," his mother inquired. "To tease," came the reply. "But, you have your sisters to tease," explained the mother. "Aw, who wants to tease girls, they are no fun," was his complaint. . . . WHY? Last Friday Dick Hobson waited on the corner for friend wife to come along and pick him up. As he waited, Joe Neal and Paul Bohn came along. "Going someplace, fellows," Dick asked. "Yep, we are going to drive downtown," was the reply. A short time later they came walking back, Joe was carrying a can. "Well, boys, that was a quick trip," remarked Dick and was rewarded with a frozen silence. "I can't understand why they felt that way, I was only trying to be friendly," said Dick, "However, I did hear Joe say 'you go ahead and walk, I'll get some gas and pick you up later'." . . . DON'T KNOW: When the time comes to go, it's nice if you can leave something behind for folks to remember you by. Jim Mitchell is gone (on a 90-day leave, that is) but he left a story with us that we feel Ina Marie Miller will remember. It seems she developed an urge to go fishing, so it was quite natural that she contact the "mayor" of Blue Lake for information about this noble art. The following conversation ensued: Ina, "Jim, how much is a woman's fishing license?" Jim, "Fifty cents." Ina, "Do many women fish at Blue Lake?" Jim, "Sure, lots of them." Ina, "What can I catch there?" Jim, "If conditions are right you catch bluegills; if they are not you catch callouses." Ina, "Gee, I don't know enough about fish to tell the two apart." . . . WE CAN: We met Frank Rathert the other day and was he indignant. Why does my old buddy Art Druce tell stories about me to be printed in the NEWS," he inquired. He continued, "Let me tell you something, that guy ain't so good himself. The other day he brought some pump suction washers over to me. 'Frank,' he sez, 'where can I get some new washers for my pump at the lake?' I looked at them and they seemed OK, so I told him he didn't need any, the valves were probably stuck. Then the argument started. If you want to argue, just disagree with Art. He informed me that I was crazy. The valves were all right, it had to be the washers, and after considerable discussion invited me up to his cottage for the week-end to prove I was wrong. I went, checked the pump and found that Art had bored a hole in the well cover to permit easy priming. The only trouble was that he had the priming plug out when he bored the hole and shavings fell through the opening, jamming the valves. I cleaned it out and it operated perfectly. Can you imagine a guy who does things like that, turning in stories about me?" To which we replied, "We can," and went on our way.

Ramblings in Bldg. 31-2

Anyone having trouble with their well or pump is advised to see Howard Naslund. Howard had to go without water for a few days while he and the landlord endeavored to fix the situation. After many callouses and sore muscles, Howard had to refer the matter to a well digger. Now the Naslunds can resume their Saturday night bath. . . . Congratulations, Curly Manan. Curly recently celebrated his 20th wedding anniversary. He is still mystified as to who sent him the sympathy card for the occasion. . . . Now that the mercury has hit 95, we are all looking forward to our two weeks' vacation. Charlie Brown is especially anxious, as he has been talking about going to Oregon for the last six months. . . . If Margaret Norman spends many more weekends at Winona Lake, she will have to consult a chiropodist (that's a foot doctor). While bathing or wading, Margaret stepped on a clam shell and cut her foot. Going ashore Margaret walked right through a turtle patch. Murtle the turtle took a bite out of one of her toes. Getting dressed, Marg decided to dispense with stockings to keep cool and proceeded to put on her new shoes. Now she was ready to stroll around the town. Marg ended up with blisters on both feet. By the way, has anyone got an old pair of bathing shoes in their attic, we understand Margaret is looking for a pair. . . . Mr. and Mrs. Edward DeCrappeo welcomed their second child July 6. The baby boy, named Bruce Edward, tipped the scales at seven pounds and seven ounces.

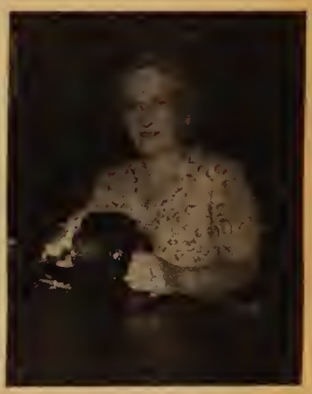
Tales from Taylor

by Harry Parker

Beulah Bailey, who is retiring, was given a farewell dinner in the cafeteria last week. It being quite a pretentious affair, Ella Black and Lorene Foltz brought large bouquets of beautiful flowers while Fletta Erickson and Alma Ladig did a splendid job of decorating the tables. O. J. (Fuzz) Meyers was supposed to deliver an oration, but at the last moment got up and said that words failed him. He passed on the honors to Zella Wittmer who came through in fine shape. Beulah was presented with an orchid and a beautiful wrist watch. In parting we wish to extend to her our very best wishes for the future. . . . The entertainment that preceded the fireworks display at McMillen was very good, especially the performance put on by "The Sentimental Four," barbershop quartet extraordinary. One of its members is our own Kenny Thompson. The boys put on an outstanding performance and we are looking forward to hearing them again in the near future. . . . If any of you desire to acquaint yourselves with the restrictions on fishing at Winona Lake, see Ed Stute. He knows all about them. It seems as though he was casting his bait into the waters in front of a certain cottage and the owner resented his actions. A discussion ensued which enlightened him on the rules governing fishing at this lake. . . . Evan Morris reports that Frank Kimble made his annual trip to Ligonier over the Fourth of July. Frank had old "Black Beauty" shined up and glistening like an undertaker's hearse. In fact, it resembled a hearse as it ambled slowly north on U.S. highway 33 blocking traffic for two and a half miles back. To view that procession one would think that a large funeral was in progress. . . . We are not as young as we used to be, said Mable Miller who was trying to teach her young granddaughter how to skip the rope. She accidentally stepped on the edge of the walk turning her ankle. Now she hobbles along like a broken down horse. Mable said she was going to try and borrow a cane, that is if they have one at the dispensary. . . . George Cowan, we learn, is deathly afraid of water. He said that the only thing it is good for is to drink and put out fires. One can hardly get him into a boat. If he does happen to take a ride in one and should the breeze happen to create a slight ripple on the lake's surface, he becomes frantic and wants to return to shore, pronto.

At least a poor man can spend as much good time as a rich man.

Thisa and Thata



"SPECIALTY MOTOR"

HELEN ENGLE

Smitty, are you all ready for that trip? Do you think the Chevy will be able to make it? All we can say is good luck, Smitty. . . . By the way, Nahrwold, how is the big baby coming along? Why don't you tell us about it or is there a new boss at your house since the baby arrived? . . . They tell us that Les Hubbartt is thinking of getting a car. How about a nice long ride for the gang and then we will give you the OK. Sure thing, we will buy the gas! . . . We wonder why Pondo has stopped singing? Hope you are not sick, Pondo! Why don't you go see a doctor to make sure! . . . We have another suggestion for Smitty when he goes on his trip: Keep your eyes on the road, because if you don't, walking is a lot slower and so much harder. No charge for the advice, Waldemar! . . . Donna Lindley really was feeling the effects of the heat the other day, she took her shoes off and said it made her feel much cooler! . . . Mardo Tobias had a double reason for celebrating last Friday, he passed the half century mark in years and it also was his wedding anniversary, congratulations on both counts, Mardo! . . . We also want to send belated birthday greetings to Fred Schroeder and Francis Rose and best wishes for many more happy ones to Esther Walborn and Ruth Reed. . . . If anyone can suggest a brand of tire for a '42 Chevrolet that will take one to California and back, will you please let Carl Metker know—he can't make up his mind. Why don't you take a look into the Consumers Research Magazine and see what they tell you is the best buy, Carl. If you need the valves ground on your car they tell me that Louie Sauers is a wix-bang at that! . . . Mary Nute wore her new fishing outfit and she gave that as the reason the fish bit so good over the week-end. . . . Ileen Lantz spent last week at Crooked Lake and came back with a nice tan and a tummy full of fish! . . . Jim Hargis came in to see us today and said it was plenty hot down south. Glad to see you, Jim, and come again sometime! . . . Congratulations to Viola "Babe" Donohue who became a proud grandmother recently.

Inquiring Reporter:

WHERE ARE YOU GOING ON YOUR VACATION?

MARGARET McCAFFREY

Bldg. 4-4

"I am planning to take a trip to New York City to see my grandchild. She is 10 months old and I have seen her just once."

WILLIAM F. GEPFERT

Bldg. 24

"I am planning on giving the alarm clock a two-weeks' vacation by spending my time on the farm with my wife and boys, getting up when I want to, listening to the ball games, and maybe putting in a few days of fishing."

ELEANOR SARNECKI

Bldg. 19-2

"I'm going on a fishing expedition in northern Wisconsin."

MARY JANE HOWE

Bldg. 20-2

"I am arranging a trip through the southwest. Some of the points of interest are Monterrey, Mexico, Bryce and Grand Canyons, Zion National Park, Rocky Mountain National Park and the Ozarks."

RAY BLEEKE

Decatur

"A swell fishing trip to a good rainbow and brown trout stream in Michigan will be my vacation. I built two new fly rods during the winter months, and I am anxious to try them out."

Those Jolly Boys (Stanger, Myers, Young, and Waikel) threw the worst scare of the season into the vaunted Hot Shots. When the final score was tabulated the score was even. The J. B.'s shot nine strokes under their team average, while the west side boys bettered their average hy one stroke. Waikel was low for the Jolly Boys with a 45, while old reliable Lloyd Grider shot a 38 to lead the pace-setting Hot Shots.

For the second week in a row, Bernie English and his boys came out on top. This time they shot 26 strokes under their average to sink Stauffer's team No. 1 to the tune of 14 points. Bernie himself paced the winners with a 42. Old man Stauffer led his Cold Shots with a 40.

The final match pitted that rampaging team No. 3, John Shanahan and Co., and Walt Pook's boys. Johnny led the way with a 45. Team No. 3 picked up 11 points to fnrther intrench themselves in first place on the odd side.

Last week we forgot to mention that rabbit hunting was very good out at Brookwood. It happened that one of the league's best citizens threw his first cluh of the year on No. 5 and as a result was almost run over by one of the fur bearing animals.

The Standings:

ODDS	
No. 3 Shanahan	+40
No. 1 Stauffer	—14
No. 5 Pook	—42
EVENS	
No. 6 Craig	+91
No. 2 Stanger	—27
No. 4 English	—48

Congratulations to Glen Miller, who is a new grandpa. . . . Clark Holmes has a big time on Wednesday evenings. That's his bowling night and his night to howl and on Thursday when he comes in to work he is so hoarse he can hardly talk. He won't tell us whether he gets that way from bowling or yelling. . . . Kenny Brown came to work the other morning smelling sweet. The boys started whistling and asking what smelled so good; Brownie replied, "Arid". . . . Bill Buuck retired last Thursday and all his co-workers had lunch with him at noon and presented him with a wrist watch. Bill gave us a farewell speech and said he would drop around from time to time to "shoot the breeze." . . . Dick Graham is now sporting a new Oldsmobile. Take it easy, Dick, and maybe it will last longer than your other car did; tbat is, if the nut behind the wheel doesn't come loose again. . . . Yon can always tell when Wayne Worman has been out the night before and the next day he has nothing to say. . . . Ralph Keller went out to get himself a crew hair cut. His regular barber was on vacation and the new barber sort of took advantage of Ralph. It doesn't look bad, Ralph, when it grows back you'll be known as "curly" Keller. . . . Hank Wiegman is having a rough time lately. It seems he is in the same boat with Fred and Newt—nobody helieves him either. . . . Louise Sinn must have done a lot of plowing over the week-end. She has been limping around and someone said she must have broken her leg. You know what they do with horses when they break a leg, Louise, don't let that happen to you. . . . Glad to see Bob Heinzelmann and Harry Byall back on the assembly again. . . . Dale Ross takes her vacation in another week. She is going to Seattle, Wash., this year. . . . If yon want to start a good argument with Pinky Sordelet, just start running down the Kaiser automobiles—so says Glen Miller. . . . Ed Brockhall took Andy Anderson fly fishing last week-end. Ed said every time Andy caught a bass he thought Andy was going to jump in the lake after it. . . . Congratulations to our new bride, Jessie Cleveland. . . . Norm Hughes says there's nothing to winning the hasehall pool; he should know as he's won the last four weeks. . . . Neva Lutz should get to work on time every morning because when she's late she's grouchy all day—doesn't say a word to anyone. . . . Brownie bought a new Studebaker truck last Monday. It isn't just what he wanted but it was the kind his wife wanted. Who did you say was boss at your house? . . . Charley Englc spent a week's vacation at the Wisconsin Dells and various places of interest. . . . Our sympathy to Harry Todd and family on the sudden death of his father-in-law. . . . Ruby Stoops is humming "Califonia, Here I Come." Vacation can't come too soon for her; grips all packed, etc. . . . "Annie Oakley" Emrick is wondering what to do to improve his luck. It seems he is having trouble sighting the bull's-eye—better try the harn door, Annie. . . . Mr. and Mrs. Guy Plaisted and family are spending a few days with Marguerite Stahl and relatives enroute from Schenectady to San Francisco, where they will make their future home. Mr. Plaisted is associated with the G-E. . . . Congratulations to Mr. and Mrs. Harry Todd on the arrival of a new baby boy. . . . Herb Richter has been looking for someone to take him to the Elex kiddie party. "Anyone in their second childhood can go," says Bntch White.

Congratulated For Long Service

John Kurtz, of the Salvage section at Taylor St., recently completed 30 years of service with the Company. On that occasion, several of his co-workers congratulated him for his long service. In the picture are: (l. to r.) Gene Etter, Martin Macke, Mr. Kurtz, John Lare, William Altekruse, and George Breedlove.

G-E GOLF

By Hugh Duhdit

Last Wednesday in the Wiuter St. group, the Spoons dropped the Niblicks by 17 points to take over first place with a total of 16 points. The Drivers are in second place with 10 points and the Brassies are third with one point. The best individnal scores were turned in by John Skevington, with 37, and Dick Szink, a 38.

For the first time this season the same team has led the Monday night group for two weeks in a row. The Apprentice team picked up 11 points and now lead the group with 29 points. The Lost Balls are second with 12 and the Dark Horses, third with seven. Herb Koch dropped a nice putt on the 18th hole for an eagle and carded a total of 41. Other good rounds for the evening were turned in hy Walt Sumer, 39 and Skeets Lahrman, Jones and Art Rowe with 41.

If you think moving the 15th tee back up tbe hill didn't make things tough, just ask any of the foursome of Weimer, Miller, Wheeler and Madden. It seems that the halls had radar attachments, easily finding the creek or the nearby farm yard. The four boys took a total of 11 shots to get off the tee. I'm told that Wheeler was the champ hy using four halls.

The Optimists of the Tuesday night group picked up four points from the Forty-Niners to increase their lead and now have a total of 80. The Dubs moved into second place with 20 points, while Nineteenth Holers held to third place with 16 points. The hest individual efforts of the evening were shown by "Red" Braden and Bob Hall at 38 and Bob Kayser, Jim Walley and N. Norton at 41.

Sam Henry came to work the other morning all done up in a white package, and one red ear—or was that bandaging, Sam? You better better watch your P's and Q's next time you use that caustic soda on your sink, pal, or both ears will be burned red and everything between 'em. . . . When it comes to tearing down a furnace we know just the guy to see. It's a known fact that Howard Boren can do the job in no time at all, put the thing back together again and have plenty of parts to spare. There is a question in our minds though, as to why the furnace company had to send a man out to his house to finish the job, after Howard had worked so hard to get his furnace back together again. . . . There was a mad scramble around here in Bldg. 20-2 last week—fixing up that center office for boss man—partitions torn down, doors put up and a general going over. You can imagine how surprised the boys were when the din subsided, to find "the brass" nestled in the corner of the big conference room, most unconcerned at giving the boys the slip, after all their efforts too. . . . There will be no more stories printed about "Skin" McGary until he stops threatening. . . . Whitie Van Auken is planning a fishing trip to Spooner, Wis. Suppose he is going to try to outfish Arnold Landis? . . . Art Hyser has a right to be proud, he has a brand new grandson. Congratulations, Art. Also congratulations to the Forest Somers who celebrated their 24th wedding anniversary last Tuesday. . . . Birthday greetings to Bill Garver, Joe Steward and Howard Moore. . . . Andy Frank was seen recently chinning himself on one of the bars at the Municipal Beach. After three or four trys, he had to give up. He says he used to do it 25 times. Must have been a long time ago, Andy. . . . Cliff Nail says that his weeds are doing just fine this year. They never fail us do they, Cliff? . . . Among other things that couldn't stand up under extreme heat of the past few days was Katie Steinman's resistance. She finally said "yes". To wit: a beautiful diamond ring on the tbird finger of the left hand. Congratulations Katie, from all of us. (Thanks, everybody, and for the little write-up too. Katie.)

APPRENTICE, WORKS LAB SHARE TOP PLACE HONORS IN INTERDIVISION LEAGUE

The Apprentices went into a tie with the Works Lab for first place in the Interdivision Softball league by defeating Fractional, 7-5. The Apprentice School got all their runs in the second inning. Fractional looked improved as they out-hit Apprentice, 8 to 6.

In a close, hard-fought game, Squares handed Firemen their third straight defeat, 1-0. A triple play, pulled off by the Squares in the third inning, was the feature of the game.

Winter St. won their second game in a row, defeating the Main Office team, 14-4.

Salisbury	520 107 0	15	13

Stauffer, Phillips, Boyer; Greeno; Gerhart; Rhootsong.

TOUCHING THE BASES

by Walter Histed

Steve Sunday was a stand out performer in the League All Stars' triumph over the Auscos, 9 to 1, at Edgewater park last Saturday.

The game brought together the leading players of the league to face the Auscos, who played the All Stars by virtue of leading the league on July 1. The Auscoa tallied their run in the first inning and the All Stars trailed until the fourth, when they went ahead to stay with three runs. From there on it was no contest, as first the Voltmen's Charlie Shipman and then the Red Sox's Al Hazel limited the Auscos to a total of six hits. Sunday paced the Stara with four hits, while Schultz and Winters had two each for the Auscos.

Line score:

All Stars	000 302 301	9	12 0
St. Joseph	100 000 000	1	6 2

Shipman, Hazel and Hofferth.
Holland, Flanigan, Beckett and Westerkamp.

* * *

Lafayette Wins, 13-1

The Red Sox shelled three Bud twirlers for 14 hits good for 13 runs, as Clifton and Herring pitched seven-hit ball. The Red Sox scored one run in the first, three in the second and then put the game away in the seventh with five big tallies.

Line score:

Lafayette	130 000 531	13	14 2
Benton Harbor	000 000 010	1	7 6

Clifton, Herring and Hixson; winner, Herring.
Morris, Keway, Rossi and Kovach; loser, Morris.

* * *

Auscos Beat Windsor, 3-2

The Auscos had to come from behind with two runs in the ninth to beat Windsor at the border city Sunday, 3 to 2.

Line score:

St. Joseph	000 100 002	3	6 2
Windsor	100 100 000	2	7 3

Katz, Stewart and Westerkamp; winner, Katz.
Blackmore and Milan.

* * *

Auscos Turn Back Cubs, 3-1

The Auscos temporarily stopped the drive of the Michigan City Cubs toward the top of the league by handing them a 3 to 1 setback. Jim Wallace had his three-game winning streak broken when Bob Katz pitched a fine game for the Kennedy men and was backed by sensational support. Carl Kennedy, with a single and a triple, drove in two runs for the winners.

Line score:

St. Joseph	201 000 000	3	8 0
Michigan City	000 000 010	1	10 1

Katz and Westerkamp.
Wallace and Hofferth.

* * *

Buds Wallop Windsor, 17-4

The Buds won their second game in three nights from Windsor, in walloping them at House of David park, 17 to 4. Bill Leach drove out a double and two singles to drive in six runs for the Buds.

Line score:

Windsor	000 200 200	4	5 3
Benton Harbor	064 250 00x	17	11 3

Nordquist, Blackmore, Goyeau and Mike. Milan; loser, Nordquist.
Rossi, Haneyzewski and Kovach; winner, Rossi.

* * *

Buds Trim Cubs, 7-1

The Buds evened their season series with the Cubs at three each by whipping them at Benton Harbor, 7 to 1. Barney Morris, who has lost several tough luck games this season, pitched for the Buds. He took command all the way, as he limited the losers to five hits.

Line score:

Michigan City	000 000 001	1	5 1
Benton Harbor	040 020 01x	7	10 0

Somenzi and Hofferth.
Morris and Kovach.

* * *

Cuba Set Back Red Sox, 7-6

The Cubs prevented the Red Sox from taking over the league lead by turning back the Red Sox, 7 to 6, in 10 innings at Ames field. Al Hazel started for the losers and stayed around until the fourth inning, when he vented his dislike for the way Umpire Hood was calling balls and strikes. The result was that Hood excused him for an early shower. Jim Wallace went the distance for the winners and scored the winning run in the tenth, after opening the inning with a douhle.

Line score:

Lafayette	102 100 020 0	6	12 1
Michigan City	100 401 000 1	7	13 1

Hazel, Herring, DeLion and Hixson; loser, DeLion.
Wallace and Hofferth.

* * *

Buda Beat Auacos, 10-5

For the fourth time in five tries, the Buds defeated the Auscos by winning at House of David park, 10 to 5. Frank Ververka kept clear his three-year record of not losing to the Auscos, by pitching and hitting his team to victory. Ed Albosta started for the Auscos, but was hit hard and driven to cover in the fifth. Mack Stewart came in and was treated a bit roughly by the Bud sluggers. In the fourth inning, with the Auscos leading 4 to 2, Ververka came to the plate with two runners on basc and drove Albosta's first pitch far over the right field fence to put his team ahead to stay.

Line score:

St. Joseph	000 400 001	5	11 1
Benton Harbor	200 313 01x	10	13 0

Albosta, Stewart and Westerkamp; loser, Albosta.
Ververka and Kovach.

Majors Defeat City Light, 9-0

The Major softball team won from City Light Monday, July 11, hy a score of 9-0.

The scoring started in the first when Stanski walked, stole second, and scored on Baals' hit to centerfield that went through him for an error. Baals was out at home trying to score. Yarman walked and scored on Morkoetter'a hit to deep left field. After Bucher struck out, Lawson grounded to short to end the inning.

In the fifth, Stanski led off with a single, stole second, and acored on Morkoetter's single. There was another run scored in the sixth on a single, fielder's choice, a hit, hit batter and a passed ball.

In the seventh, Waltke batted for Morkoetter and waa safe on an error. Feldheiser, batting Bucher, hit to center. Lawson bunted and was safe, while Somers batted for Esterline and hit a home run to left center driving in four runs.

Morkoetter led the hitting with three runs for as many hits. Stanski had three out of four and Anderson had two for three.

Chicago White Sox Edge Voltmen In 3-2 Thriller

BY WALTER HISTED

Two recently-signed bonus pitchers combined to pitch the White Sox to a 3 to 2 victory over the Voltmen at Dwenger park Tuesday night.

Gus Keriazakas and Gar Hamlen limited the locals to two official hits, with Hamlen getting credit for the victory. Lee Pfund pitched for the Volts and gave up seven hits, three in the eighth, scoring two runs to give the Sox the win.

The Voltmen lost a run in the second inning when Manager Braden permitted Chenowicz and Bobilya to bat out of order. Bobilya drove one of Keriazakas' fast pitches over the centerfield fence, but was out when the White Sox protested. In the third inning, the Sox were badly mixed-up in their batting order and Charlie Kress obviously batted out of turn without protest from the Voltmen. He scored on an error, after driving out a double.

Voltmen Take Lead

Trailing 1 to 0, the Voltmen tallied twice in the seventh when Olin Smith reached base on his hard drive through Kress; at first Kress was charged with an error. Bobilya then drove out the first official hit for the Volts, a single to left. John Chenowicz laid down a perfect bunt, advancing the runners. On Morgan's fly to left, Smith scored. When Sox catcher, Wheeler, let the throw go into the Voltmen dugout, Bobilya was waved home by the umpires.

The Sox lost little time regaining the lead in the eighth. With one out Hamlen singled, Hancock doubled, and Adams singled home both runners.

The Voltmen had runners on first and second in the fourth on walks, with one out; but Hancock turned Pfund's hard drive between short and third into a double play to snuff out the rally.

Charlie Kress, with two doubles, paced the White Sox attack. Bobilya, with two singles, was the only G-E player to hit safely.

Voltmen	000 000 200—2

Sidelights of the Game

Luke Appling's daughter, Carol, came down from Camp Limberlost to see her dad; only to find that he had gone home to Georgia for a couple of days. She saw the game from the vantage point of the White Sox dugout.

* * *

Gar Hamlen, who pitched the last four innings for the Sox, is a honus player from Marblehead, Mass. His father is employed at the G-E River Works plant.

* * *

The game will go down as one of the worse mixed-up batting orders. The White Sox messed up their batting order during the first two innings, with the result that some men batted twice in the first official time through the batting order. Charlie Kress doubled to open the third. Since he was sixth in the batting order, he was obviously out of turn. The Voltmen board of strategy was not near as quick on the trigger as Jack Onslow, of the White Sox, who dashed out to the plate in the second just after Bobilya had driven the ball over the centerfield fence, with the result that the home run was just another out; while Kress' double turned out to be the final margin of White Sox victory.

* * *

Frank Morgan made his first appearance here in a Voltman uniform. He gives added strength behind the plate which should turn some of the close games, previously lost, into the victory column.

Indianapolis Clowns To Play Voltmen Here Wednesday Night

Another of the Nation's top Negro nines, the Indianapolis Clowns of the Negro American League, will provide the Voltmen with exhibition action Wednesday night, July 20, at Dwenger park. Starting time will be 8:15 p.m.

Usually billed as the "Imps of the Diamond," the Clowns are often overlooked for their playing ability and speed on the diamond. Headlining the player list is the shortstop, Jesse Williams; together with playing manager and catcher, Buster Haywood; "Speed" Merchant; the hustling outfielder, Verdes Drake, and "Goose" Tatum.

In Jesse Williams, obtained from the Kansas City Monarchs, the Clowns have one of the best shortstops in baseball. Williams starred in the Mexican League for the last several seasons and was reinstated by the NAL to play with the funmakers this season.

Merchant, fastest man on the Clown's roster, can race 100 yards in 9.7 and has run against and heaten Jesse Owens, crack Olympic champ. A versatile star, "Speed" is an outfielder, first baseman and pitcher.

Cat-like Buster Haywood is one of the top defensive receivers in the Negro American League. General Manager Syd Pollock has placed ao much confidence in Haywood's ability that he signed tbe ace catcber to a manager's contract for three years.

Drake is starting his fifth season with the Clowns and every year his defensive work in center field has proven more sensational than the last. His performancca in the outergarden continually robs opposing batters out of extra-base-blows and turns them into putouts.

"Goose" Tatum needs no introduction to local baseball fans. He's the highly-popular star of the Harlem Globetrotters in basketball, and of the Indianapolis Clowns in basehall.

The nationally famed Indianapolis Clowns are shown above as they'll line up against the Voltmen at Dwenger Park Wednesday night in a 8:15 p.m. exhibition tilt. In the back row are: (l. to r.) Sherwood Brewer, Al Gerard, Willie Cathey, Jesse H. Williams, Sambo Hairston, Manuel Godinez, "Peanuts" Davis, Clyde Nelson, Henry Merchant, Ray Maddix, Goose Tatum and Andy Porter. Front row are: (l. to r.) Juggling Joe Taylor, Henry Jeffries, Buster Haywood, playing manager; Harry Butts, Spec Bebop, Ray Nell, Leonard Pigg, Verdes Drake, King Tut and business manager, McKinley "Bunny" Downs.

Let's Learn From Britain

By Fred G. Clark and Richard Stanton Rimanoczy

FOUR YEARS AGO the British working man voted himself relief from the trials and tribulations of capitalism.

Laws were passed guaranteeing prosperity and security to the workers.

The only catch was that prosperity does not come from passing laws: It comes from producing more goods and services.

Unfortunately this truth was not given proper emphasis in the British plan which started out to simply change the distribution of what was being produced by soaking the rich.

For four years this confiscation did have a small effect upon the welfare of the very poor people, but now comes the realization that there is no more to take from the well-to-do, and the people who are supposed to have benefited are still suffering from the same troubles they passed laws against.

The fact that the rich had no more to be taken away was announced by Sir Stafford Cripps last month in his budget message when he said that the "very great and highly desirable redistribution of wealth has already taken place," and added, "There is not much more immediate possibility of the redistribution of the national income by way of taxation in this country. We must rely rather upon the creation of more distributable wealth than upon the redistribution of the income that exists."

In the meantime the so-called "free" social services that the British people voted themselves, require that the government take a whacking slice of their income in order to supply the "free" services.

To say that the British people are disappointed in their experiment is an understatement: They have finally learned that they are paying for a ride on their own horse; that everything the government gives them is first taken away from them.

Sir Stafford Cripps spoke for four hours before Parliament, and it must be admitted that he handed out the bad news with much more courage than the average politician usually shows.

He let them have it straight from the shoulder with remarks like this: "When I hear people speaking of reducing taxation and at the same time see the costs of social services rising rapidly in response very often to the demands of the same people (who want taxes reduced), I sometimes wonder whether they appreciate the old adage, 'We cannot have our cake and eat it.' "

There is evidence, however, that common sense is filtering into the British socialist policy, because at a time when the tax-ridden people are clamoring for a reduction in the amount that the government takes away from them, the biggest item of tax relief was given to that "old devil" capitalism that the labor government originally set out to punish and has just about put out of business.

It is little short of amazing that in order that industry might have more money for the installation of new plants and machinery, the government reduced industry's taxes by 75 million pounds.

At a time when the personal income tax rate is 45% for the poorest, and the surtaxes run from 10% to 52½%, it is an act of great political courage to reduce taxes on corporations, but it does indicate that the Labor Government is learning the facts of economic life and is honest enough to admit it.

However, the plight of the British is a very unhappy one.

In discussing the fact that the cost of government has now reached 40% of the national income, the "London Economist" recently stated in an editorial:

"This is the hideous prospect that faces the British people. Even though every item of government expenditure is approved in detail, it is almost certain that the ordinary man does not value the benefits of government as against all other good things of life in the ratio of two to three. If the matter could ever be put to him in that way, he would certainly find the price of government far too high. Moreover, whether it is approved or not, any such rate of taxation, if continued for long, will be disastrous to the national economy. **Any economy that depends to any extent at all upon individual efforts and initiative must have some system of incentive and rewards.** The Soviets, who depend less on individual efforts than the British system does, have long ago admitted the truth of this. Idealists may dream of a state of affairs in which something other than individual material gain provides sufficient motive power to run the national economy, but these days have not yet appeared."

It should also be mentioned that the lack of success of the British experiment in having the government take care of all the people's problems would have been much more pronounced had it not been for the billions of dollars of aid which America poured into Britain during the last four years.

Although no one would begrudge the exhausted Britains this postwar aid, it is in a way unfortunate that it served to bolster up the Labor Party schemes and make them look far more workable than they really are.

There seems no doubt that in the near future the British people will want to unravel their snarled-up economic affairs and resume the responsibility of taking care of themselves instead of having the government do it for them.

There is grave doubt, however, that they will be able to do so because it is much easier to take a clock apart than it is to put it back together again.

The system that made Britain a great and prosperous nation has been pretty well dismantled, and it would be a Herculean effort to restore it.

America should watch these efforts with a sympathetic and, if possible, helpful attitude, *but by all means America should watch it with a determination not to make the same mistakes.*

If what Britain has done keeps America from doing the same thing, it will be worth all the money we have given her.

This is one of the "Economic Facts of Life" series published by the American Economic Foundation. It is offered as an especially timely discussion in view of the fresh crisis in Britain's economy, now in the world news.

Plans For Vacation Shutdown Are Announced

Arrangements Made For Pay Procedure

The following procedures have been arranged for payroll payments to Fort Wayne Works employees during the vacation period:

Vacation pay for the shutdown will be made automatically by the Payroll divisions for the actual number of days for which the employees are eligible as of Aug. 14, 1949, to a maximum of two weeks. This vacation payment will be included with the hourly cheeks distributed July 27 and salary checks distributed July 29. The Withholding Tax and Pension Plan deductions will be calculated on the same basis as though each week of vacation pay was paid separately.

The advance vacation payments will be based on 40 hours. Any additional vacation pay due relative to the new supplemental vacation allowance will be made after the shutdown.

Employees becoming eligible for an additional day or days up to two weeks after the shutdown will be paid on the following pay days:

Regional Warehouse Rushes Parts To Cleveland Company

Quick action on the part of Regional Warehouse employees recently averted a long and costly shutdown of the Montana Flour Mills Company in Cleveland, O.

The Cleveland company suffered a complete plant shutdown Thursday, June 29, due to failure of the main circuit breaker. The order for the replacement parts was received by the Price and Edit section at 3:45 p.m. The order was then phoned to H. R. Reidenbach, Assistant Supervisor of the Regional Parts Warehouse, who referred it to Jack Heiniger, foreman, for selection and packing.

(Continued on page 3)

Unemployment Compensation Is Available

W. E. Beer, Supervisor of Employment, pointed out today that the program of plant shutdown for vacation involves a group of shorter service employees who will not be eligible for vacation pay for the full period of the shutdown.

The Indiana Employment Security Act specifies that these workers who are temporarily out of work through no fault of their own may apply for unemployment compensation, he stated.

The Company will furnish such employees with a "Report of Unemployment" so they may apply for these benefits.

The Employment Security Division has the sole authority to determine those who are legally entitled to draw unemployment compensation.

Indicating the last date for which wages or vacation allowance is paid, the "Report of Unemployment" will be given to eligible employees Friday, July 29. In cases of partial vacation allowance payment, the payroll section will

(Continued on page 3)

J. B. Greer, Superintendent of the General Service division, will be in charge of all services at the Fort Wayne Works during the vacation shutdown period, July 29 to Aug. 15, it was announced today.

Gate Schedule

In order to accommodate the small force that will be working during the vacation period, the following gate schedule will be in effect:

BROADWAY

Lindley Gate—Open 24 hours per day, seven days per week.

Broadway West Gate—Open 24 hours per day, seven days per week.

Broadway East Gate—Open 6 a.m. to 6 p.m., five days per week.

Fairfield Gate—Open 9 a.m. to 5 p.m. Monday through Friday, inclusive.

All other gates will be closed except in an emergency.

Employees working east of Broadway will use the Lindley Ave. parking lot.

Employees working west of Broadway will use the Jackson St. or Rockhill St. parking lots.

TAYLOR ST.

The west gate will be open 24 hours per day, seven days per week.

The east gate will be closed.

Medical Service

The following medical service will be provided during the vacation shutdown:

Secretary Issues Q-C Invitations For 35th Outing

Invitations were mailed this week to all members of the Quarter Century Club for the organization's 35th annual outing Saturday, Sept. 10, at Camp Limberlost, Oliver Lake.

Each invitation contains a questionnaire to be mailed to A. C. Hartman, secretary, in order to determine the number of dinners to be provided. Any member not receiving an invitation should contact Mr. Hartman in Bldg. 8-2.

F. L. Schafenacker, president, announced today that free transportation will be provided to the camp for those who need it.

Badges and meal tickets will be issued after 8 a.m. on the day of the outing at the Broadway gate. Those driving direct to the lake will obtain their badges and tickets there.

Profits Drop 26% In Second Quarter

G-E SHIPMENTS ARE ONLY 5% UNDER CORRESPONDING PERIOD

Operations of General Electric and its consolidated affiliates for the second quarter of 1949 ending June 30, resulted in earnings totaling $19,849,864, or the equivalent of 5.1 cents per dollar of sales and 68 cents a share of common stock. This represents a 26 per cent drop in earnings from the preceding quarter of this year, and a 32 per cent decrease from the corresponding period of 1948.

The figures for the first six months of 1949 reveal a profit available for dividends amounting to $46,552,842, or a 15 per cent drop from the $54,602,339 earned in the first six months of 1948.

"These decreased earnings reflect the substantially changed conditions with which we were faced during the second quarter of the year," C. E. Wilson, President of General Electric, stated. "They resulted principally from reductions in our selling prices and from the adverse effects on our margins of frequent adjustments made in our production schedules in an attempt to maintain a reasonable balance between output and the erratic, but generally reduced demand for certain products—notably appliances and equipment for industrial application.

"We are well along in a period of readjustment which, because of the variety of items we produce, is affecting our business in varying degrees," Mr. Wilson continued. "We have a substantial backlog of orders for heavy apparatus, but in most consumers' goods items supply has caught up with demand. In the industry as a whole, we expect that by the end of 1949, as compared with last year, the production of consumers' goods will have been cut by at least 20 per cent, and producers' goods by about 10

448 Motors Are Speeded To St. Louis To Help Relieve Heat-Weary Citizens

Clarence Roth, Mike Evans, Bill Grubb and George Ellison are shown working on the motors in the FHP Repair and Return section, Bldg. 4-1.

The scorching heat wave that sent the thermometer soaring to the hundred mark recently over most of the Mississippi Valley found the area around St. Louis a perfect setting to wreak havoc with the comfort of thousands of families.

With telephones ringing more often by the hour, the International Oil Burner Company, manufacturers in St. Louis of large electric fans, was soon swamped with calls to supply large electric fans for use extensively in apartments, public buildings, and other locations where a tremendous amount of air is to be displaced.

Unable to meet the demand, the Company sent 448 motors to the Fort Wayne Works on July 7 with an urgent request that they be reconditioned. They soon had the promise of William Franke, Superintendent of FHP Divs. 19 and 20, that the Repair and Return section

Precautions To Be Taken Preparatory To Shutdown

The following precautions should be taken preparatory to the shutdown for vacation:

1. Shut off all city gas at outlets. Pay particular attention to flashbacks.
2. Shut off or disconnect all solder irons, solder pots, and similar devices.
3. Shut off all acetylene cylinders. Remove regulators or manifold and check to be sure that the cylinder valve is tight.
4. Disconnect and remove from the building all hydrogen gas cylinders.
5. Remove all paper, rubbish, oily rags and other combustible rubbish.
6. Empty all containers of paint, varnish and inflammable materials into drums or safety cans.
7. Drain and clean machines, using water soluble, grinding compounds or coolants.
8. Shut down all machines, conveyors, ovens, and units on test. Remove power on transformers, rectifiers, and similar apparatus used for testing, plating, etc.
9. Do not pull switches and fuses at the column cabinets, as this causes confusion in preparing the plant for operation just before the opening date.
10. Close the windows, particularly where wind or rain may cause damage.

"TB Or Not TB" Will Soon Be The Question At Decatur

Each employee at the Decatur plant should take advantage of the opportunity to have his or her chest X-rayed. This service is being offered free of charge Tuesday, July 26, when arrangements will be made for employees to receive the test during regular working hours.

A great many people hesitate to have a chest X-ray because they are afraid of what it may show.

Anyone can understand this fear and sympathize with it.

But look at the whole thing from the right angle, think of all the facts.

If the X-ray shows that you have tuberculosis in its early stages, it can be cured—with the least loss of time from your work.

On the other hand, if you should happen to have early TB now and not find it out, what will happen? You will go on living in a fool's paradise for a few months, maybe for a year or two. Then the disease may be so far advanced that it will take a long time to cure . . . and it may even be that there can be no cure. About 50,000 people in the United States die of TB every year.

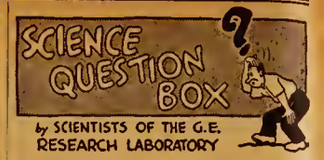
Which is better? To know the truth now and, if it is unwelcome, to cure the trouble in the least possible time, with the least possible hardship on the family . . . or to close your eyes now and multiply the difficulty and hardship many, many times a little later? Think it over.

Veal . . . . Or Capital?

A calf is born. The farmer can enjoy it as roast veal. Or—he can deny himself that enjoyment—raise the calf to a cow, and then sell her milk.

It's a good thing for you and your children that so many farmers denied themselves the veal and saved the calf for cow's milk.

This is exactly what happens in industry. Thousands of people, with a little money each, can spend that money on themselves. Or, they can deny themselves, save the money, and invest it in machinery.



It's a good thing for you and your children that so many people have denied themselves, and saved enough to pay for today's machinery—without which modern high-wage jobs would never be possible.

No one would deny that the farmer has helped everyone and has a right to the earnings from his cow. No one can deny that the saver has benefited workmen and has a right to the earnings on his savings.

That's all there is to capital and dividends.

(Reprinted from an advertisement for Warner & Swasey, makers of machine tools, Cleveland.)

Q: What is the salty looking coating that sometimes appears on brick buildings, and how can it be removed?

A: This is usually calcium carbonate (which is the same as limestone) though it may occasionally be calcium sulfate (gypsum), depending on the chemical nature of the mortar and the bricks. A calcium carbonate deposit may be removed by washing with dilute hydrochloric acid followed by thorough rinsing with fresh water. However, this is not without some risk, because the acid will tend to dissolve the mortar between the bricks and might cause a weakening of the structure or other trouble. We know of no convenient way of removing the deposit if it is calcium sulfate.

Battrick Reports From England:

Northern Cities Undergo Reconstruction; Strikes, Rationing Plague British People

Editor's Note: The following account is the second in a series of reports on life in England by E. James Battrick, an assembler of master motors in Bldg. 4-5. On leave of absence from the Company, Jim is visiting relatives and has been traveling throughout the country.

By E. JAMES BATTRICK

On the way to Scotland we passed through many large industrial cities and saw the construction of many new homes and factories, adding whole sections adjoining large cities; more so than in the eastern and southern parts of England.

Edinburgh, the capital of Scotland, is the prettiest and cleanest city we have visited. It has the mountains on three sides and the river, Forth, is on the north. Alongside the main street for a mile are beautiful flower gardens and monumental buildings. This section is called, "The Royal Mile of Edinburgh." The city has a castle like other old cities of Great Britain.

Leaving Edinburgh we traveled north through the Highlands of Scotland to Inverness, which took us past many lakes and streams. The chief occupation in this section is raising sheep, which graze on the moors.

We returned via Loch Lomond which has wonderful scenery, to our next stop at Glasgow.

Amazed At Ship-Building

We made a trip by steamer up the river, Clyde, past the great shipyards. We saw ships in all stages of construction. One is amazed at the large amount of ship-building being accomplished on the banks of this river.

Talking to a Scotchman in Glasgow, he asked me, "How do you like Scotland."

I replied, "It is a very nice country."

Then he stated, "A lot of Scotch people consider the line dividing Scotland from England just like Americans consider the Mason-Dixon line."

Foresees Close Election

In large cities I find the people are more in sympathy with the present government than those of the rural areas. I think that the reason is due to the large group of laboring people located in the cities.

I believe there will be a close race between the parties in the next election.

Since I have been here, England has had labor trouble with railroad men and dock workers. The railroad men don't like to lodge away from home on long runs and also want a two dollar, weekly raise; for which they have been negotiating for 18 months. The strike at the present time by London dockers is regarded by the government as a plot of the Communists.

Rationing Is Still On

Most articles are still rationed, including food, coal, gasoline, feed for cattle, etc. A week's ration of meat for one person is only sufficient for one meal. The meat sold is usually mutton or lamb. The sausages are mostly cracker meal. Lots of people haven't eaten pork for six months. The government controls the price on food.

The following is the ration for a person for one week: ½ lb. sugar, 2 oz. bacon, 2 oz. tea, ¼ lb. butter, 2 oz. fat, 2 oz. cheese, 2 eggs.

Last May the government took candy off the ration list and at present it is very scarce. There is talk now of putting it back on ration again in August, so as to give everyone an equal share.

Low In Dollar Reserve

There are very few people over here who know the workings of the Marshall Plan. Under the Marshall Plan, England gets raw materials and machinery to manufacture goods to export. These exports help to pay for the imports she badly needs from other countries.

At the present time Britain is very low in dollar reserve and is discussing this with other governments with a view of getting a better trade balance with other nations; which we hope will make it better for all.

How fast does a "speed" bowler send his ball down the alley against the pins? Tests made by G-E scientists at Schenectady indicate the average speed is about 30 miles an hour. One bowler, Johnny Krawiecki, six-foot-three member of the G-E Nightmen's Shop league here, hit 37.5 MPH on an unofficial warm-up toss on the GEAA alleys and averaged 32.3 MPH for five official deliveries. Second spot was an average of 30.4 and third man had 27.6. Tests on a group of "average" bowlers showed speeds ranging from 25.8 to 23.5. The measuring device, developed here, is the time-interval meter. By a system of mirrors, a light beam was made to cross the alley twice. The "electric eye" sent an impulse to the meter when the ball broke the beam for the first time, and another when the ball moved down the alley to break a second beam. The meter measured the time between the impulses.

Pay Procedures

(Continued from page 1)

Hourly—Aug. 31, Sept. 28, Oct. 26, Nov. 30, and Dec. 28.

Salary—two days later in each case.

There will be no time off, since that will have been taken during the shutdown.

Employees with 20 or more years of service, who are scheduled to take three weeks of vacation beginning July 25 or Aug. 1, will be listed on regular vacation advance forms.

Hourly rated checks for wages earned in Weeks No. 29 and 30 will be available for distribution only on Aug. 3 and Aug. 10, respectively, at the Broadway west gate house from 8:30 to 11:30 a.m. and 1:30 to 4:30 p.m. Employees should have positive means of identification, as checks will be distributed to the employee only. Each division or section will obtain uncalled-for checks Monday, Aug. 15, and make distribution rather than causing employees to leave their work stations and come to the payroll divisions for their checks.

Clock cards for Week No. 33 will be put in card racks Friday, July 29, prior to the shutdown and will be available in the usual manner Monday, Aug. 15. These cards will not be used by those few employees who work during the shutdown; cards for their use will be provided for by their section supervisors.

Employees scheduled to work will receive their checks when due in the usual manner.

Salary overtime normally payable on Aug. 5 and Aug. 12 will be included with checks distributed Aug. 19.

Employees who have been off the payroll due to illness, and are re-engaged with continuity of service prior to the shutdown, will not be required to work the equivalent time off but will receive vacation pay as outlined in the first paragraph. Those re-engaged subsequent to shutdown with continuity of service will receive payment the end of the month in which re-engaged.

Any employee who has been laid off and has received a pro-rata portion of his vacation pay and is now returned to work, should check with his foreman as to the amount of vacation allowance due him.

Vacation pay to incentive workers will be based on average earnings during the 12-week period ending with Week No. 23.

Kleinknight Dies

Warren G. Kleinknight, 55, died last Tuesday while he and his wife were vacationing in Petoskey, Mich.

Mr. Kleinknight started with the Company at the Decatur Plant in April, 1923, and spent his entire service in the Inspection and Test section. He was a World War I veteran, a member of Adams Post American Legion, and a G-E Quarter Century Club member.

Besides his wife, who also was a former G-E employee, Mr. Kleinknight is survived by a brother, Chester, cost reduction supervisor at the Decatur Plant, and three sisters, Mrs. Henry Pursley and Mrs. Lester Blocker, both of Bluffton, and Mrs. Ernest Blocker, of Markle.

Buuck Is Honored At Luncheon

William Buuck, FHP Motor Div. 13, recently retired. On his last day at General Electric, 120 friends honored him at a luncheon held in the Taylor St. cafeteria. At the head table are: (l. to r.) Ewald Stinsmuehlen, Charles Winans, Mr. Buuck, Jesse Elder, H. J. Nahrwold, and Fred Boehm. In the foreground are: (l. to r.) Ray Ankenbruck, Joe Henry, Frank Phillips and John Bastian.

Regional Warehouse

(Continued from page 1)

Jim Craw then routed the shipment via air express, and Ed David, foreman in Bldg. 6-1, dispatched truck driver Fred Heaston to the airport with the parts.

Delivery was then made to the customer at the Cleveland airport at 7:50 p.m. The parts were rushed from there to the plant and the company was back in operation at 11 p.m.

Profits Drop

(Continued from page 1)

per cent. This is an estimate based on present downward trends in such major applianee items as refrigerators, ranges, and washers. Radio receiver sales are down, notably because television receiver sales are growing. In the heavy lines, shipments of electric generating and distribution equipment should be greater this year than last, but sales of equipment used primarily in the industrial and transportation fields will be lower."

As will be noted in the statement, "The Good Way," which appears on page 12, every effort is being made to continue keeping our own sales high and to do all the things in addition that will make the extra sales needed to create the jobs to bring hack the employees laid off for lack of customers orders.

Consolidated statements of operations for the second quarter of 1949 and for the six months ending June 30 this year and last year, partly estimated and subject to audit at the year-end, are shown below:

	3 months ended June 30, 1949	6 months ended June 30 1949	1948
Net sales billed	$390,140,988	$801,756,516	$772,761,792
Cost, expenses, and other charges	362,121,354	725,175,207	675,243,552
Income from sales	$ 28,019,634	$ 76,581,309	$ 97,518,240
Income from other sources:			
Interest, dividends and other sundry revenue	$ 3,522,654	$ 6,358,513	$ 4,816,109
Less interest and other financial charges	1,192,424	2,386,980	2,553,502
	$ 2,330,230	$ 3,971,533	$ 2,262,607
Total income before provision for federal taxes on income	$ 30,349,864	$ 80,552,842	$ 99,780,847
Federal taxes on income	$ 10,500,000	$ 34,000,000	$ 45,000,000
	$ 19,849,864	$ 46,552,842	$ 54,780,847
Minority and nonconsolidated interests in net income	—	—	178,508
Net income applicable to General Electric Company common stock	$ 19,849,864	$ 46,552,842	$ 54,602,339
Earning per share on 28,845,927 shares issued	$0.68	$1.61	$1.89

Vacation timo is so close at hand that it gives one a mixture of sensations. The joy going, seeing or visiting in a selected location; a cottage at the lake; an airplane trip; a boat trip or just doing what comes naturally. We are a lucky group of people to have all of those things to choose from, did you ever stop to appreciate it? Did you ever stop to realize just how fortunate we are that we work for a company willing to give us two or more weeks with remuneration to help us enjoy the time? Let us repay them, and ourselves, by being very carcful so that we may return to our jobs refreshed and ready to tackle the problems of the day. Watch the driving, don't take chances, don't overdo the sunbathing, and in this time of polio worries watch your children closely. . . . **Inventor of the Week:** To Frank Peternell of Bldg. 18-2, goes the credit for the invention of a new technique in deep sea diving. This ingenious method, involving the use of a rubber hose and the assistance of Frank, Jr., was given its first test recently when Mr. Peternell removed a stake firmly imbedded in the bottom of Lake Gage near the inventor's new cottage. It is expected that this equipment will replace all other diving equipment now in use, when the inventor has satisfactorily solved the problem of ballast. All suggestions welcomed. . . . **Bldg. 18-5 Picnic:** The Data and Reproduction section will hold a picnic tomorrow at Pokagon State Park. Will look for a detailed report and some pictures. . . . A. W. Howard, Bldg. 18-1, and family are planning to take off for Michigan during the vacation period. . . . Doris Williams is welcomed back to Bldg. 18-5 after a year's absence. . . . Our sympathy is extended to the family of Willa Confer whose funeral was held on Monday of this week. Willa worked in our Blue Print section for a number of years. . . . The many friends of "Jerry" Simpson will be sorry to know that he is a patient at the St. Joseph Hospital. We hope that he will soon be better and can come back to G-E to see us. . . . Our thought of the week is supplied by Pat Olinger, Bldg. 18-5.

When you are criticizing others, and are finding here and there
A fault or two to speak of or a weakness you can tear;
When you are blaming someone or accusing one of pelf—
It's time that you went out to take a walk around yourself.
There's a lot of human failures in the average of us all,
And lots of grave shortcomings in the short ones and the tall;
But when we think of evils men should lay on the shelves,
It's time that we all went out to take a walk around ourselves.
We need so often in this life—this balancing set of scales,
Thus seeing in us how much wins and how much fails;
But before you judge another just lay him on the shelf,
It would be a splendid plan to take a walk around yourself.

Sanford Is Elected Chairman Of General Safety Committee

At a meeting of the General Safety Committee in Pittsfield June 23 and 24, A. G. Sanford, Manager of Personal Services and Safety, of the Chemical Department, was elected Chairman of the Committee, to serve until October, 1950.

Unemployment

(Continued from page 1)

indicate the exact amount of the allowance if less than $23. If the amount is more than $23, it will indicate: "more than $23." Part-time workers should carry that notation on this form.

All forms not passed out to employees on July 29 will be returned to the payroll section in the same manner as unclaimed payroll checks or dropped in the Broadway payroll depository after 5:15 p.m. Friday, July 29. These forms may be picked up by the employees at the Broadway pay-station, which will be open Wednesdays, Aug. 3 and Aug. 10. In case the employee is absent Friday, July 29, the supervisor will indicate the last day worked before returning the form to the payroll section.

The local office of the Employment Security Division is on the first floor of the Purdue Extension Building, 1110 S. Barr St. Office hours are 8:30 a.m. to 4 p.m., Monday through Friday.

A representative of the Fort Wayne office is in Decatur each Tuesday from 2 to 4 p.m. in the City Hall.

No benefits are paid until a waiting period of one week has been established on a valid claim.

Application may be made any time during the week of unemployment. It is not necessary to apply on Monday to be eligible.

The Inevitable: I'll venture to bet that Gwen Steinbarger will enjoy her trip to Wales to visit her parents whom she hasn't seen for three years. She will also have the pleasure of becoming acquainted with her new nieces and nephews. Wouldn't you like to "make like" a li'l mouse and watch her. I would. If I were to make a similar journey at present I'm sure that I'd be able to look in on Gwen as I'd have to travel "mouse class." . . . **A Word to the Wise:** Johnny Reuille has been trying to teach his young daughter the value of money. She has learned already, he hopes, that she can't go into a grocery store and take whatever her heart desires. Good luck, Johnny, the first 25 years are the hardest. . . . **Golf:** Nate Horton has jumped into the league class. His first score was so good that other golfers are wondering if he shouldn't play in the dark ALL THE TIME. . . . **Happy B-Day:** To Ed Whipple, who celebrated his birthday July 21, and to Vivian Baumgartner, Payroll Section. . . . **Morsels:** Maxine Lonergan has left the file room to work for Walter Brake in the DC Section. Ruth English has left Developmental to work in Production. Joe Hiles still doesn't seem to know too much about those little red tickets. So, it cost him another 50 cents. . . . New Scent: Nina Andress has a new kind of perfume. While spraying the house the other night, to exterminate the flies, quite a bit of the fluid collected on one of her tables. Nina didn't realize until later that one of her combs had been on the table and she had used this comb before she came to work one morning. We'll be "sc-enting" you, Nina.

Vacation Plans

(Continued from page 1)

One nurse will be on duty in Bldg. 21, from 8 a.m. to 12 noon and 1 p.m. to 5 p.m., Monday thruugh Friday, both weeks.

All employees working during this period at the Broadway, Taylor St., and Winter St. plants should use this service for injuries and illness.

Injury cases already under treatment, whether working or not, should report to Bldg. 21 for their follow-up care.

Dr. H. L. Murdock will be on duty as relief physician. During regular Dispensary hours, he will be contacted by the nurse as needed.

At last after all her weeks of planning Alma (Butch) Witte is on her way to her dream land, sunny California. She expects to be gone a month and is taking her time driving out and seeing some of the sights along the way. We know you will have a wonderful vacation, Alma, and we all wish we were going along. . . . Anyone wanting some first class house remodeling done—see Charlie Gable. He has really been getting the experience this summer and he is not through yet. He is going to remodel his kitchen during vacation, and he says he will probably be glad to come back to work to rest up. . . . We are happy to see Dora Smith back in the office. Nice to have you with us again. . . . Fred Hagadorn has been adding a cheery note to the office with the beautiful flowers he has been keeping on his desk. But the other day he was very much insulted when someone thought his beautiful gladiolus were paper flowers. They were lovely, Fred, and you keep bringing them in, we love to have them around. . . . Francis Thomas's son, Neil, was one of the entries in the Soap Box Derby last week. He won one of the races and he really got a kick out of building his racer and being in the race. All Pop can say is that he is glad it's over for another year. . . . "Captain" Dick Pinkham has been doing quite a business with his fleet of boats this summer. Anytime you feel like a boat ride or a little fishing see Captain Pinkham and he will fix you up.

448 Motors Are Speeded To St. Louis

Members of the FHP Repair and Return section include: George Breinfalk, Jim Carey, John Walters, Elmore Hurt, Margaret McCaffery, George Ellison, Bertha Burnau, Byron Neumann, Arnold Bienz, Ethel Fabian, Gladys Stahly, Lloyd Runyon, Edith Venrich, Jeanette Conrad, Florence Behrens, Clara Heaston, Earl Johnson, Mike Evans, Clarence Roth, Bill Grubb, Elmer Heemsoth, Howard Mills, Herb Jehl, Frank Fogwell, Windell Haiflich, Jack Payton, Cecil Onion, Ray Schuckel, Leon Rodemaker, George Selby, Eldridge Gillum, Hubert Grage, Louis Pflueger, Bill Morton, Joe Johnson, Lloyd Miller, Theodore Childs, and John Junk.

(Continued from page 1)

was equipped to handle this job on a rush basis. Within a short time, everyone was cooperating and the first definite signs of fulfilling this agreement were in effect.

A rush call was made at 8 a.m. to the Decatur plant for additional flanges. A service car was then sent after them and returned at 11 a.m. Just 24 hours later, the motors were dispatched by Interstate Truck Lines. They left the loading dock at 6 p.m. and arrived in St. Louis the next morning.

Once again the Company had come to the aid of a community, not in a matter of several days, but immediately.

"The customer was indeed amazed at the performance, and I can assure you that this performance greatly strengthened the customer relations with this company," stated H. D. Warning, G-E sales engineer at St. Louis.

Teamwork Gets Job Done

The deep satisfaction that comes from doing a job well, can only be fully appreciated by the people that played an important part in accomplishing that task. No single individual was responsible for this job. It was the full cooperation of everyone that made it possible. It was in essence, a large team, each with a small but very important part to perform, that started and finished a large job in record-breaking time. Everyone in the Repair and Return section can feel more than proud of the part he played in doing this job.

Once again a customer has received service than can only bring a better relationship between manufacturer and consumer. Through producing more goods in less time for more people, General Electric can continue to retain that time-honored name it has earned from people the world over.

Prompt Service Is Offered

The Company also has a unique plan for rendering prompt service to direct customers in the Fort Wayne and urban area. These customers may send their motors into the plant's repair shop and receive service, some times within a period of a half an hour.

In conjunction with the Repair and Return section, an Exchange Plan section is also operated in this division. Under the Exchange Plan system, a G-E fractional horsepower motor can be exchanged for a factory rebuilt motor, backed by the same warranty as a new one. Models that are manufactured in large quantities are placed on the plan and these amount to approximately 850 different model numbers.

These Exchange Plan motors are stocked in 31 warehouses throughout the country to permit prompt exchange to customers in their respective areas.

The Exchange Plan provides for the quick replacement of fractional horsepower motors for those most commonly used on washing machines, refrigerators, stokers, oil burners, fans, and water pumping systems. In most instances, a requisition calling for one or a number of any of the 850 models can be shipped from the Exchange Plan stock on the same day it is received. This again insures our customers the best of service.

Information Clinic

The following is the second in a series of questions and answers selected at random from those asked at the recent Informative Conferences. Additional questions concerning problems relating to jobs, business conditions, or any other matters are encouraged. Employees are requested to use the Information Clinic form below.

QUESTION

What is the Company's attitude toward married women working? Also, toward women who have husbands working?

ANSWER

The Company has no plan for separating married women from the payroll because of their marital status. Nothing in any of the Company's agreements discriminates against married women.

QUESTION

Why doesn't the Company go back to the old vacation system, and let the people take their vacation when they want to?

ANSWER

In the past 10 years the scheduling of vacations has become increasingly more difficult due to the liberalizing of the vacation plan. A greater percentage of employees are now eligible to two and three week vacations than ever before. Not only did the training of additional help, to temporarily replace those on vacation, place an extra burden on the regular work force, but also the substitutes were rarely able to adequately fill the jobs of those vacationing which created many post-vacation problems.

When the plant-wide shutdown was first suggested, it was thought that it might inconvenience a high percentage of our employees. However, after surveying vacation habits, it was discovered that more than 80 per cent of our employees took their vacations in the four weeks which included the two when it was proposed that our plants be shut down. Though there has been some criticism of the present plan, the favorable comments received suggest that it meets with the approval of the majority of employees.

Horse Sense: That which keeps horses from betting on men.

Location.....

Chet Price is now the possessor of a brand new Plymouth and is very enthusiastic about it. He said that it glides along so smoothly that it seems like one is taking a billowy ride through the heavens. We have noticed that his right arm is all sunburned. He says it got that way while driving his new car. What we can't understand is why it happens to be the right arm when it should be the left one. We secretly learned that mama will not let him drive. So Chester has been sitting on the right side with his arm poked out the window. . . . Clarence Stove announces that construction work on his estate at Big Turkey Lake is now in progress. It is of a temporary nature. He is erecting a small building that will take care of his present requirements. It is so small that at mealtime they will have to pull the boat up to the door and eat off the rear seat. A concrete runway is being constructed to the water's edge. This will enable him to put wheels on the shack, roll it out onto the ice this winter, thereby giving him comfortable ice fishing quarters. . . . We have noticed that Johnny Driver has developed quite a limp. He said that he believed old age was creeping up on him. We suggested that he give his leg a good soaking in vinegar, since this procedure did his aging Buick so much good. . . . Paul Brandt has announced the arrival at his home of a seven-pound baby girl, Connie Jean, by name. Mother and daughter are doing fine and Paul is very proud of the new arrival. There seems to be a preponderance of girls being born, so the baby boys had better make a better showing or be lost in the shuffle. It has often been said that this is a man's world, but it looks very much like the girls are going to take over. Perhaps it might be a good thing, as man has made such a mess of things.

Leg-Guard Prevents Injury To Trucker

Charles Strong, truck operator of Bldg. 6-1, escaped injury recently when his truck collided with another truck at the southwest corner of Bldg. 8-1. This was the third case at the Broadway plant in which an accident has occurred without injury to the operator because of the installation of a "leg-guard." The guard was designed by the Fort Wayne Works safety section. Manufacturers are now providing similar guards on the new trucks.

Thelma Purdue and Ruth Tutwiler have such a fondness for Apple Blossom Cologne that they even add some to their hand cream. . . . They tell me that Everett Lindeman (formerly of Bldg. 4-3) has a new Packard. From what we hear, it sure is "snazzy." . . . Congratulations to Mae Fowler. She became a grandmother last week. . . . Paul Ginther has been gathering fishworms all week in preparation for a fishing trip. He also has acquired a roll of film so he can take a picture of his catch. The trouble is that he has had the film so long waiting to take the picture that he had better throw it away and get another. . . . Wonder what Reggie Eggeman intends to do with those beautiful pajamas she bought the other day at W&D. . . . If anyone knows a good pickle recipe without vinegar, please tell Kathryn Hepker. I can't believe that could be good, though. . . . Just overheard Clarice Woodruff telling Merle Keesler that the reason women have such a big appetite is because women do all the work. She is probably right, too! . . . It won't be long before Golda Duff will be taking all comers in Chinese Checkers, if her little nephew keeps her any busier playing it. . . . Dick Bucher hasn't had any stomach trouble since he has been married because their new stove isn't in yet and they have to eat out. . . . Henrietta Deck must be expecting ritzy company from Chicago for the week-end, as she bought herself two new dresses and hubby got a new shirt. . . . After attending a wrestling match the other evening, Merle Kessler is sure enthused. Merle envies those men. What muscles they have, he says. Some people think he's just jealous. . . . Sorry to lose Esther Fagan and Eleanore Whitehouse, both were transferred to Bldg. 26-3, and, Sydonna Fox and Betty Bertsche, who were transferred to Taylor St. . . . Don't ask Lee Raver anything about baseball. The other night at a Voltmen game, the announcer was calling the names of the players followed by their numbers. Lee wanted to know why they called out the sizes of their shoes? She said she thought some of them had awful big feet! . . . Ed Glenwith sure must be an even-tempered person. He doesn't even get angry when playing a game of golf. . . . Louie Barrows says he is not taking a vacation this year. He is staying at home awaiting the stork. His first grandchild should arrive during vacation, and he couldn't be out of town when the big event takes place. . . . Several of the fellows surprised Harry Haberkorn the other night at his home at Pretty Lake. They had a fine time visiting and report that Harry is in fine shape. . . . Mildred Werling Thurston visited us the other day. It sure was nice to see her again. She really enjoyed living in Hawaii and says that she wants to go back there to live some day.

You keep more friends if you're good for nothing—when it comes to a loan.

Given G-E Gifts At Retirement

Fred Erb, General Tool division, wonders what his wife is cooking in the G-E roaster his friends gave him when he retired recently. Another gift, an automatic toaster, is shown at the right. Mr. Erb retired after 36 years' service as a toolmaker. At the time of his retirement, he worked in Bldg. 19-4.

Mr. and Mrs. Ed Steward recently celebrated their 40th wedding anniversary. . . . Glen Ramsey is running his high speed Chris-Craft on Wawasee now. . . . We wonder if Walter Greiner's fishing off a pier has any connection with Glen's speeding? They say Glen goes so fast that the spark plugs even swap holes. . . . Why is it that every time you call Carl Einseidel he is either up in his cherry tree or up in one of the Pennsylvania Railroad's control towers? . . . Woody Hursh came home one day and found his cat run over in the middle of the road. So he buried old Tom and went to Leo for some groceries. When he arrived home, old Tom was sitting on the porch waiting for him. I think that either Tom still had some of his nine lives left or we should send this tale to the Wisconson Liars Club. . . . A kibitzer is usually seen around a card game, but Frank Hoffman was seen on the road to Lake George kibitzing over a truck driver's shoulder who was trying to fix his broken down truck. Frank says "WE got it fixed anyway, regardless of what you say." . . . We have three new father-in-laws—Julian Franke, Lloyd Welbaum, and Charles Abbott. They were all nervous at the weddings of their children. . . . We have been told and right too, that John Roemer has a new use for a boat hook as he uses it in the garage to hang up the girls' bicycles. He tells John Neukam that is the way he tests the hook for strength, 'cause the kind of fish he catches he needs a mighty strong one. Sounds good, John. . . . Ray Mutton needs his glasses changed according to John Stetler as Stetler has to hunt chuck keys for Ray that are laying right in front of him. Better get the specs before going out West, as you might want to see a mountain or two. . . . Gus Wiedelman's wife tells us that as they came out of the boat at Crooked Lake, Gus went in the water. Yes, how did you guess it, he missed the land. . . . Carl Smith wasn't singing the blues last Monday but he sure looked the part. Thanks to soap and water, he is now an American again. . . . We hear (and Walter feels) that a stepladder will be used the next time he climbs in the tool room.

We extend our sincere sympathy to John Hall in the death of his wife. . . . We're glad to hear Herman Bertsch is well on the road to recovery after a serious siege of bursted appendix. Lewis Lee's wife is on the sick list, and Harold Canfield—to these we wish a speedy get well. . . . Forest Somers' nose has certainly taken on a new glow lately, to say nothing of the space it consumes—another victim of poison ivy. . . . Bill Garver's son Jimmy was very happy with the baseball he received, autographed by the White Sox players, and wishes to thank everyone responsible for their thoughtfulness. . . . What's this we hear about Merle Bacbellor having to spend 11 days of bis vacation in the "klink" for parking on the wrong side of Swinney Ave. For an old guy, you ought to know better, Merle. (P.S. We know 'taint so, Merle.) . . . The boys in Bldg. 10 are wondering if Elton Swank's hat has taken on that crumpled look or if his head is getting too big for the hat since he bought that new Chevrolet. . . . We are very sorry to hear that Milford Toney is home suffering with a broken ankle.

Apprentice Alumni Hold Outing At Lunz's Barn

The Apprentice Alumni Association held its annual stag outing at Lunz's barn Thursday evening, July 14. In the upper left and center pictures are a few of the fellows in line for chow. Left to right are: George Horner, Lowell Welker, Chet Ellis, Vic Beers, Henry Wittber, Harry Gebfert, Aaron Schoenefeld, Earl Lenz, Harry Gebfert, Earl Lenz, Walter Stoppenhagen, Walter Greiner, Ed Bienz, Dick Tobias and Don Greenler. The upper, right picture disproves what might bave been a "whopper" of a fish story. Robert Schuelke displays his catch of the evening, while Richard Poehler acts as a witness. The bottom, left picture shows the fans at the ball game. Left to right are Carl Hattendorf, Art Nickerson, H. G. Siebold, Maurice Bennett, R. C. Dennison, Frank Peternell, Henry Gollmer, Norman Bender, Lisle Hodell, Walter Wolf, Dean Lockwood, Harold Koehlinger, Al Rondot, Dale Steward (kneeling), Dick Waggoner and Sam Lahrman. The next photograph shows a scene during the ball game.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dikty

Will Irmscher claims that Ed Dikty is a crook and a sharp dealer having lost a nickel to Ed on a business deal. Dikty states, however, that Willie just isn't wide awake all the time. . . . Howard Musselman and Henry Becker visited Pokagon Park over the Fourth. This isn't new to Howard since he maintains his summer residence there. . . . Leroy Cook painted his house and Art Keller confesses he just loafed. . . . Forrest Reed and Mrs. Reed celebrated a wedding anniversary July 5. Forrest said that he enjoyed himself immensely, but the water in the fountain tasted good the next morning. . . . Frank Enderle plans to go back to Missouri on his vacation and see how some of the mules he graduated from high school with are getting on. . . . Rudy Rastenburg from now on is to be known as the plow jockey mechanic. Rudy can tell you why. . . . John Campbell had a very broad smile on his face on payday last week. Smiling Jack Campbell, he can be known as nowadays. . . . Henry Becker got a new Chevrolet for his birthday last week from his wife, or so he says. . . . Wilbur Ayers found out recently that a bull calf can develop amazing speed, especially if a man is hanging on to its tail. This is only natural since a calf has twice as many legs as a man. . . . Clayton Daffern's feet got accidentally tangled up with an elevator door sometime ago, and he found himself lying at Joe Mougin's feet, flat on his tummy. More embarrassing than painful, we imagine. . . . We hear that Leroy Cook is very fond of chicken; even to the extent of staying home from work to guard his share. . . . A lot of people throw the bull figuratively speaking, but recently a bull threw Charlie Dixon actually. Charlie and a farmer neighbor were leading a bull, but the bull protested. In the ensuing tussle, the animal was subdued but Dixon got a black eye and a bad scratch across the forehead. Charlie should become his manager and put him in the boxing and wrestling game. . . . Glenn Goshorn beat Ted Schlup in the pickle race this year. Glenn's cucumbers are at the pickling stage whereas Ted's are just getting there. . . . Neoma Klaehn, our recent bride, was seen carrying home armloads of paper dinner plates. No dishwashing for her evidently. Probably she will use time saved for more pleasant duties. . . . Does Elmer Minnick think that the little room across the aisle from his machine is haunted? He has threatened maybem on anyone propping open the door. . . . After weeks of pleading, Buck Buchan finally wrangled a cigar from Ray Wiese to celebrate the arrival of a new daughter in the Wiese household. Later, Buck and his wife, sailing blissfully along toward their cottage in their new but unpredictable Ford, were discussing whether or not the Ford would hold together until they got there, while Buck peacefully puffed on the cigar. Suddenly an explosion reminiscent of Hiroshima ripped through the air. Buck, throwing up his hands in terror, had visions of bodies and $2000 worth of auto parts scattered over the highway. His wife, after regaining control of the car, finally calmed Buck enough to show him the blackened stub projecting from his seared face and that the Ford was still intact. Seems that more than one "Pop" was involved in Buck's cigar.

Celebrates 30th Anniversary

A. W. Bartling, Manager of Sales for the FHP Motor divisions, completed 30 years of service with General Electric last week. On his anniversary, he was congratulated by some of his colleagues and received a long-service certificate. Left to right are: R. C. Hanna, Assistant Manager of Sales; Mr. Bartling; M. E. Lord, Manager of the FHP Motor divisions, and B. R. McClure, Staff Assistant.

Does your car knock? Do the wheels wobble? Is the axle bent? Does the muffler muff? If so, see Maurice VonderHaar, the proprietor of Vondy's "You Wreck 'em I Fix 'em Garage." . . . For information on how to be sure and catch eight-inch bluegills see Herman Lepper. . . . John Heine guarantees his fishin' trailer for everything except to catch fish. . . . Maxine Daniels is one smart little woman. She finally discovered how to make Danny drive slower when leaving the parking lot—just bought him a new car. . . . Watch for the grand opening soon of Willy Robey's new hot dog stand on the conveyor. The first day they're on the house. . . . Les (Bill Tilden) Menze will give free tennis lessons at Packard Park in the very near future. All young girls interested see Les for an appointment. The boys must wait their turn in line. . . . We understand Louie Bottern isn't taking any chances with his new car. He first made a trial run to Tri Lakes. The trip proved successful so he may venture out of the state on his vacation. . . . Could Earl Marsh be one of Fort Wayne's hit-and-run drivers? We are happy to report the body found on the fender of his car was his daughter's doll—thank goodness. . . . Has anyone seen Mike O'Grady's "Pole Vaulting Cow"? . . . Where was Guy Tarr the other morning? He was hunting all over for his apron and finally discovered he had it on. . . . Happy birthdays for the month of July go to Lowell Arnold, Edna Marquart, Grace Wall, Lottie McFarland, Fred Gersie, Helen Perry, Beulah Conrad, Helen Aschilman, Harry Jones, Pat Fritcha and Joe Rabach. . . . Margaret Lepper has a twinkle in her eye. She said "yes" and will be married July 30. She and Carl are honeymooning in California. Congratulations to you both. . . . Everyone wishes "Pop" Viland, who has been ill, a very speedy recovery. . . . Gay Huey seems to be having troubles with the neighbor's dog. She says it's hard to place coils with her fingers bandaged. . . . Slim Miller should count to 10 when arising during the night. He couldn't find the door and ran into the wall. . . . We wish to extend our deepest sympathy to Mr. Witham in the death of his mother-in-law and to Mr. Arnold in the death of his father-in-law.

By Avenel Stanton

Our best wishes to Matilda Auman and John Collins who were married at Elkhart July 9. . . . Birthday greetings to Ruth Ellert, Frank Ondrovik, Art Rowe, Cy Stonebill and all the other people having a birthday in July. . . . George Hoopingarner has returned from his vacation, and we held our breath for two days waiting for the fish stories—He says the fishing was terrible. . . . To buy or not to buy is the correct "quote" for Vera Reeves. For more details we suggest you contact her direct. . . . Gals, the new fellow in Mr. Pritchard's office is Lou Goehring. Any one with more details, please see me—especially if he is single. . . . With most of the people on a 36-hour week, we seem to be a little bit more confused than usual—were you ill yesterday, or was it your half day off? . . . Only one more week until the vacation shutdown. If you are going to the lake be sure to take plenty of suntan oil. The Commercial Division seems to have a start on most of the office group. We've been comparing our sunburns for the past two weeks. . . . Wonder of Wonders, Andy O'Dwyer and Avenel Stanton both arrived at the Office before Ann Rastetter.

"When a woodpecker goes out to get a square meal he uses his head."

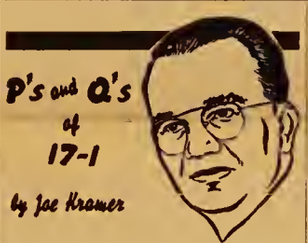
Noble Dinger is growing fond of Michigan. He went to Mackinaw City over last week-end. He spent the Fourth of July in the northern part of the same state. . . . Harold Hohman had quite a time at his sister-in-law's wedding reception. Among other things he found that there are people with a greater "gift of gab" than George Miller. . . . Have you heard about the tree growing in the center of the St. Joe road? Herb Langer can give you complete information on it. His initials are carved on it permanently. . . . Vance Burnau's sons, Bill and Bob, won a contest at Buck Lake Ranch last Saturday night. Bill is known on the radio as "Barefoot Willie," and Bob plays the steel guitar. . . . Gene Wheeler's daughter, Pat, recently wrote a $10 letter to her folks while visiting friends in Chicago. It happened this way. Pat was given what Dad thought was enough spending money for the week. Thursday he received a letter telling about the places she had seen and ended by saying, "I'm exhausted and so is my money." Mother sent her $10 in the next mail. Pat had eight cents when she came home. . . . Jay Rippe is attending a convention in Chicago for a few days this week. . . . "Admiral" Laymon was caught investing some hard earned cash on his old jalopy. This was the first investment since he bought the car. . . . Max Feilitz has just returned from his third weeks' vacation. He looks tired so we take for granted that he has his farming taken care of. . . . If John Johnson's hands look red, it just means that he has come out on the bad end of another hand slapping duel with Springer. . . . Joe Haas saw the plane crash in which two men were killed at Lake James last Sunday.

Dispatchers Hold Stag Picnic

The Dispatchers' Club held its annual stag picnic Saturday, June 25, at the home of Mr. and Mrs. Elmer Pion, northwest of Huntertown. Thirty members attended the outing, which was spent playing softball, horseshoe, croquet, and cards. A ham dinner was served at noon.

The committee planning the affair were: Dan Tetlow, chairman; Garland Roby and Gaylord Evans.

In the above picture are: (back row, l. to r.) Norbert Meyers, Ray Epperson, Howard Keppler, Dale Hartman, Phil Mitchel, Robert Evans, Robert Dent, Evan Morris, Walter Kammeyer, Ray O'Neill, Clarence Hatfield, Russ Carpenter, Frank Quinn, Harold Niswander, Verne Amans, Elmer Pion, Earl Bartling and Tetlow; (front row, l. to r.) Cecil Onion, Garland Roby, Howard Fritz, Herbert Tilbury, Gaylord Evans, Joe Trentadue and Gilbert Burkart.



If you hear a noise like a collision between a wagon load of empty milk cans and a farm cart filled with ducks, it probably is the latest swing record. However, it could be Harold Bowker serenading his cows. We hear they give sour milk. Maybe they don't like the tune, "When You're Gone I'll Soon Forget You" that he sings. Confidentially, we hear that he also sang the song to Harold Kiel. Maybe that was the reason for the forlorn look, or could it have anything to do with him trying to be a cheese hound. . . . Ethel Keller received a call from her son. He is in Scattle, Wash., now after being in Alaska. I'm sure she is looking forward to her vacation because he will be home then. . . . Mildred Huntine is looking forward to her vacation too. She and hubby are going to California. . . . Lewie Hoffman has deeided it is going to be all right for the neighbors to have goats. It keeps his grass cut. . . . If you have a grass catcher you don't need or want, Floetta Zartman is in the market for one. . . . That must have been an atomic conversation between Betty Pressler and Bertha Witham. While talking over the conveyor, the conveyor belt broke with a whooosh. . . . It's a happy birthday to Violet Brower, Laura Starner and Catherine Salmon. . . . We know now that Pauline Girchner really likes the WORKS NEWS. She even looks for it on Thursday. . . . If you see Mary Jane Lockner walking among pink elouds, just take a look at the third finger—left hand. Our best wishes to you. . . . Violet Adams must believe that the long way around is the shortest way to a place. Last week when they had the fire out at St. Vincent's Villa, shc drove to Avilla to scc it. . . . The household of Beulah Huff is in order again since her cat came home. It was really glad to bc back, too. . . . Iley Souders believes a sewing kit is an absolute must to carry in a purse. . . . From the "'scuse it please" department: It was Geraldine Hollis that baked thc birthday cake for Marcille Thomas, not Jerry Snyder. Ivah Grandstaff baked two pies and put them in the freezer instead of the oven. No wonder, they didn't bake. . . . Lowella Koogle feels like a "fluffy goose" these days. She has a new mist green club coupe. . . . Leona Hollis should be able to work better now. She has a new cradle phone replacing the old wall type. She said she wore herself out talking over the other one. . . . Has Rose Heche found out what they use the large stators for that we are placing? . . . Rose Dowling's sister has been here from Missouri for a visit. . . . On our sick list is Ralph Meschberger, Constance Harris and Thomas Hosler. A couple of the fellows were good neighbors for Ralph and donated blood when they couldn't get any from the blood bank. . . . Luella Mason and Roger Williams are newcomers to the early bird shift. . . . Harold Prough and Bud Lindemann have returned to their former jobs. . . . Verda Deal was seen purchasing a beach towel. Sounds like she is getting ready for vacation too. . . . On our "better list" is Ann Kensill and Grace Jones. Also glad to see Hildreth Johnson is better after a very long illness. . . . Our sincerest sympathy to Iva Stephans in the death of her brother.

Adams Retires After 37 Years

John Adams, General Serviee division, retired recently after 37 years with the G-E. Thirty of these years were spent in the box shop in Bldg. 10-1. Mr. Adams is shown shaking hands with Harry Davis, while many of his Bldg. 10-1 friends are looking on. Left to right are: John Lare, Charles Von Behren, Louis Lee, Al Sehuhler, Philip Voholzer, Herman Roesner, Robert Smith, Paul Thomas, William Altekruse, John Zartman, Harry Conner, Clyde MeCague, Mr. Adams, Leroy Dove, Claude Baker, Fred Taylor, William Fuller, Roger Buseh, John Madden, Mr. Davis, Riehard Fiteh, William Heit, Gus Dressler, Speneer McCurdy, Emerson Rittenhouse, Ed Trabel, Al Phinezy and Willard Ayers.

We reported last week that John Miles had gone to Chicago. This report was in error, John did not literally go to Chicago, but spent the time on his porch listening to the experiences of his neighbor in Chicago. . . . What with the time drawing very short, vacation fever is reaching a high pitch. The thing foremost in everybody's mind today is where are you going to spend your vacation. Trips both long and short are being planned with the utmost precision and care. Maps and all sorts of information available regarding sights to see, and things to do are being accumulated at a high rate. Addie Masbaum and Helene Evanoff have secured maps of the entire United States and Canada. They are planning a trip to Colorado Springs. Helene says, "You ean't tell, we might come back through Canada unintentionally." Instead of driving, Tavie Popa is going to leave the engineering of her trip up to the railroad. To date, she hasn't even been shown one map of her planned trip to San Diego, Calif. Another visitor to Colorado Springs is going to be Miriam Valentine. Miriam is leaving on her vacation today and expects to spend the greater part of the time enjoying the picturesque sights to be seen throughout the state of Colorado. Vacation plans of Danelda Dotterer include a stopover in Denver, Colo., and then an extended trip to Seattle, Wash. From what Argend Denney has been telling Red Braden and Joe Kramer, Denney will be spending his time plowing sweet corn which he has promised to deliver to Red and Joe as soon as the ears have come out. He was also heard promising to deliver some nice ripe tomatoes to Charlie (Chuckie) Lauer, but they will probably go the same way the sweet corn does—no corn or tomatoes. . . . If Wally McKay visits Arkansas this summer, Vic Hall wants him to be sure to bring back a sack full of that hallowed ground from Arkansas. Vie says this is the best eure for tired feet. Take your shoes and socks off and leave the dirt run through your toes. . . . E. P. Tickel hasn't made up his mind yet whether he is going to Colorado or Wisconsin. . . . Charlie Lauer is going to spend his time cultivating the garden his wife helped him put out. . . . Norm Bender plans on spending his two weeks at the lake fishing and what time isn't spent fishing, will be put to good use doing nothing. . . . For the complaining that a certain person did because his name wasn't in the WORKS NEWS Vic Leaky didn't even read last week's eolumn to find out that the fishing trip he took had been fully covered and reported on even if he wasn't. . . . Bob Taylor says he wishes they would start the lunch hour 15 minutes earlier, then that fellow that gives those little red tickets out would be too late and Bob could get his car moved. . . . Bill Franke's vacation plans are pretty much of a mystery, but we bet he will be in Chicago a couple of days watching those Cubs play baseball. . . . Virgil Hartman will probably take a trip east and spend some time in a certain city in Pennsylvania, the name of whieh we have not been able to get Virg to divulge. . . . If Jack Cochran takes a trip to the southern part of Indiana to the little town of Washington, we wish he would tell everyone down there "hello" for us because that is our home town too. You people have undoubtedly heard of the Washington Hatchets (Not the one that chopped down the cherry tree, but a basketball team). . . . We don't know what happened to our floor reporter this week, but Mike Kramer didn't give us much news for thè column. The farmers will be prevalent next week. . . . It has been rumored that Frank Martin after vaeation will have the skin you love to touch. Frank's wife bought him a new silk uniform, but he has rceeived explicit orders that he ean't hoe potatoes in the garden with it on. . . . Be sure and take some pictures while you are on your vacation and bring them in after we come back to work to be put in the display case so some of us who are not going on a trip can see some of the sights that you saw.

Whoever said that women weren't good fishermen? Hazel (big bass) Smith and Zercia (I got a bass, too) Sinish will argue that point to the bitter end. Why those gals ean land any bass that swims, however, it does get one excited, especially when you want a little help from hubby and he refuses to help his little woman land her prize. "Oh well, who needs help anyway," says Hazel. . . . If any of you people are ever unfortunate enough to break out with hives, you will have one sympathetie soul on your side, in the person of Eileen Fitch. Eileen can give any of these hive victims a very accurate aceount of those itchy little gremlins. . . . Monday was the big day for Herb Grueb. Thc oeeasion was his birthday and he was right lucky 'eause he had two birthday eakes—one pink and one white one. Here's wishing you many many more, Herb. . . . The luck of the Irish was with Bob Jellison. He is now thinking seriously of competing with the Bank of America. Wonder if he carries a rabbit's foot in his left pocket.

Our friend Auer has a certain major league right where he wants it. During a recent game, Auer supplied the league with his bases, but during the game Auer and the umpire didn't see eye to eye; so Auer picked up his bases and went to the grandstand. The game was played by use of burlap bags and Auer's heckling. . . . The Apprentice School "brass" had 100 per cent participation in the East Side-West Side Alumni game recently. Barnes did some effective relief hurling; Sebold patrolled the center garden while Morton and Gebert gambolled on second and third base respectively. Dean Wolf's contribution was keeping home plate spick and span. . . . It seems to me Wagner tries picking up his girls the hard way—with his fender. . . . Mark McNulty survived his two weeks of military training at Atterbury Air Foree Base and came to work bright and early Monday morning looking fit as a fiddle. . . . I would suggest that if Mrs. Barnes and Mrs. Sebold buy "blinders" for their husbands it wouldn't take them so long to walk home from work. . . . If I could find out if boys have hope chests and put such things in them as electric fans and automatic mixers, I could tell quite a story. . . . If Rasor doesn't quit overworking our police force, taxes will have to be increased. . . . The Monday night Golf League is becoming a walkaway for the Apprentice linksmen Davis, Jones, Lahrman, Brown, Werling and Dimke. At the last reading the "Apps" were leading with 29 points while the runners-up had but 12. . . . Rasor's departure to Bldg. 19-4 leaves the north end euchre game short on talent. Morton was given a tryout one noon but his absence thereafter leads us to believe he couldn't "cut the buck." Qualification for a chair at this game—exceptional ability to cateh Mischo "renigging". . . . A group of our apprentices whieh included Auer, Konow, Wuttke, Gotschall, Reinking and Mowery made a trip to Detroit last Friday to visit the Carboloy Plant. Their tour proved both interesting and educational. While in Detroit they decided to take in a ball game and saw Detroit defeat Boston. After the game the boys drove on up to Windsor, Canada. The boys had the same trouble with Auer in Canada as they do in Indiana—Girls. . . . Junk eats sandwiches in his luneh all week and gets very tired of them. When the Junk and Davis families missed the rest of the group at the picnic last Sunday, they missed out on all the good eats and had just their share of the lunch—sandwiches.

M. B. A. SICK LIST

Elihu Lee, Clyde Enslen, Warren Jackson, John Banks, Bryan Brown, Russel Carpenter, James Mitchell, William Glenn, Harold Canfield, Wayne Coak, Carl Fisher, Goldie Kelly, Eva Webber, Vera Gennaitte, A. Luella Bixler, Wanda Anderson, Catherine Richter, and Donna Backofen, and Gladys Bracht.

Left the Hospital

William Kelsey, Serena Slater, and Herbert Kenworthy.

Returned to Work

Elsie Dunfee, Ralph Wilkinson, Lloyd Smith, Levi Carpenter, Frank Mann, Clarenee Hambrock, Harold Josse, and Mary Wright.

4-1 Floorage

By Marie Lantz

Perhaps these sunny days are responsible for daze. What else could keep Sam Sroufe's mind in the clouds? One recent eve he failed to follow his footsteps. Seen leaving a drugstore on Calhoun and Rudisill, he then climbed into what he thought was his car where he had a noisy reception from the rear seat. To his dismay, he discovered he was in the wrong car, with a woman and two children, while his own was parked three autos down street. . . . Into our midst we welcome newcomers Lois Waterson from Bldg. 4-5 and Robert Winkler and Dorothy Fuhs from Winter St. We extend hello and goodbye to Wilma Redding who spent a week with us before entering Bldg. 26-5 from Bldg. 19-2. There's also farewell for Paul Maddon who moved over to Bldg. 26-1. . . . It was a lucky 13 for Jane Crisamore and Avery Spayde. July 13 was the occasion for the Crisamores to celebrate their twentieth wedding anniversary. This date also meant happy birthday for Avery. . . . It's not fishy—but here we offer our contribution to the current trend of conversation.

The Worm Turned

Anglers usually like to gripe.
Their reasons for complaining
Sometimes seem a little trite,
To warrant much explaining.

It seems that griping Georgie Hahn
Complained that beat was roasting
His angleworms, which, one by one,
Dried up from too much toasting.

Friend Fumhel-Pflueger Ray then told
A way that couldn't be beat!
Just keep worms refrigerated—cold.
But not next to the meat.

Hahn couldn't oppose his wife, Louise.
He couldn't e'en placate her.
She wouldn't keep those worms, please,
In their refrigerator.

This little tale was repeated
When Louise saw Ray's Alice.
Now Ray's a man defeated;
His home is not his palace.

Came angle-hour for George and Ray;
They were the ones to squirm.
Their beloved wives had their say
And threw out every worm.
P.S.—YES—except two two-legged ones, we guess.

Nellie Wendt spent a week's vacation in Wisconsin. When she returned to work she brought a calendar in with her so she could check off the days until her next vacation. But something went wrong. The days wouldn't jibe with the dates. Is it any wonder? Somewhere along the line she had picked up one for 1947. . . . Thanks can be given to Peggy Reynolds and Ruth Freeland for the two bright spots in Bldg. 26-3. It's funny what a bright colored dress can do. . . . Clifford Devault's pipe is getting Thelma Reynolds down, and all of the time the rest of us were blaming the glue pots for that awful odor. . . . Doris Rhinehold is back in the swing again. She is the leader of our new group 332. Congratulations, Doris. . . . Well, the weather has changed and so has Johnnie Collins' life. He is a married man now, gals. Congratulations, Johnnie, and may you have many years of married bliss. . . . Lonnie Rochstroh was the cute little kid at the Elex party, but she couldn't make it to work the next day. We wonder if she is getting too old for that sort of stuff. . . . Lola Brunner has the best canned fruit salad, and it is so easy to carry in that way. . . . Happy birthday to Art Pequignot and Wanda O'Malley. Art received two lollypops, a fly swatter and a card from the winders, plus a wallop for each birthday passed. But, Art, what was the idea of the fly swatter? . . . The summer has summers. Doris is wearing a snazzy upsweep now and we agree that it is very becoming. . . . What a cute trick Lena Forker must be in shorts. While she was working out by the road two boys went by. We wonder if they went home and told their dad, for it wasn't long until he too drove slowly by. . . . It's tie me to my apron strings again for Dan Reuille. Someone cut him loose from his apron and also his good humor for a while.

Office Offerings

Bob Altevogt has found out the difference between the time a sun lamp and a heat lamp should be used. His heat lamp, being loaned out, he used the sun lamp instead. He placed it over his lower extremities and left it on for five minutes. The results—you guessed it—he stood up to do his desk work the rest of the week. May we add that when he went to the restaurant he should have done the same? . . . A hearty welcome to Carrol Cane who has joined our office force. . . . Chris Starke is three cigars behind on paying his debts. We hear that he is waiting for someone to pass the cigars for triplets so he can pay up. . . . Don Poland is in a jam—raspberry, that is. His wife makes the best jam and Don, being rather proud of it, was showing it to friends. Mrs. Poland said that it wasn't quite solid enough, but to Don it was just perfect and to prove it he turned the glass upside down. How did it turn out—it fell out all over a basket of clothes. We were told that his face turned about the same color as the jam.

When you feel you haven't any faults, just add another one to the list.

Hoffman Celebrates 30th Anniversary

Robert Hoffman, of FHP Motor Div. 15 in Bldg. 4-5, celebrated his 30th anniversary with General Electric Friday, July 8, when he received a congratulatory letter and best wishes from his friends. In the picture are: (seated, l. to r.) H. G. Siebold, Supt.; R. C. Neeb, Mr. Hoffman, E. F. Fretz and H. W. Hilsmier. Standing: G. D. Seabold and A. B. Rondot.

To the list of proud G-E fathers we add Norb Hess. His wife presented him with a seven lb. seven and one half oz. boy. Norb claims he looks like him already. Don't let that blonde hair fool you, Norb. . . . Our foreman in Group 7x80 Eddie Hesher is taking his third week vacation now. We hope the fish are biting for you and have a lot of fish stories to tell us when you get back, Eddie. . . . On our sick list we have Rita Herndon who has recently undergone an operation. We all wish her a speedy recovery. . . . Wanted: A good used car for Annie Moyer. She would have given anything to drive to the lakes the other night. You don't have a bad idea, Annie. I, myself, wouldn't mind a pleasure trip. . . . We were right, Miss Tinner is going to Kansas for her vacation. Must be quite a town to make so many trips back to. . . . Fishing is always good in Minnesota, nevertheless Leona Fruechte is planning to spend her vacation there with relatives, she claims. What—no fishing, Leona? . . . Nothing like a vacation at home will be Fanny Amstutz's motto for this year. . . . Of course, Evelyn Plasterer is going on a vacation, but we will not say where as she changes her mind. I mean she makes wrong turns on main highways ending up someplace else. Anyway she has a good time either place. . . . Chicago will be one of the main vacation centers for a lot of us. Ray Schott and wife plan several days there. . . . Buttermilk, please! After shaking the contents from the cage to his working station, Lloyd Ahr was amazed to find cottage cheese. Read the label before shaking well. This method does not apply to all bovine products. . . . We are glad to hear that Barb Gaunt has recovered from her recent operation and is able to be with us again. Also Alice Lake is back with us again. Looking mighty pert. . . . That little bird tells us that our old friend Anne Murtaugh is feeling better and has put on some extra pounds. Hi, Anne! . . . Well, Oscar, here is your name in the NEWS again. Hope you see it this time and don't have to depend upon your friends reading the NEWS and then telling you about it. Oscar, for an inspector, you were not very observing. . . . Wanted to borrow: one pair of garage door stretchers. Contact Hazen "Red" Moore. Please do not offer assistance by lending fender collapsers. Moore has already taken care of that. . . . It won't be long now and we will be on our vacation. Fern Passwater is taking a tour of the New England states. . . . Mary Ann Laurent, Barbara Roop, Harriett Haines, and Dorothy Schnepf intend to spend their vacation at the lake and also go to Chicago to see a ball game. . . . Florence Schultz is going to Canada. . . . John F. Welch intends to do some fishing in Michigan. . . . Oliver Lake will be the spot for E. W. Lankenau and Harry Staley. . . . Our sympathy is extended to Chet Kleinknight on the death of his brother, Warren, who was a former employee of the G-E. . . . By the looks of all the cards the different people received from Florida from Wayman Patrick, he is enjoying a very nice vacation. . . . Joan Liechty is spending a week at Lake James on her vacation. . . . For any lessons in euchre just watch Jim Staley. . . . Dick and Kate Steele are planning on spending their vacation in Northwestern Michigan. . . . Our sincere sympathy to Anselm Hackman upon the death of his brother.

A hard fall should mean a high bounce if one is made of the right material.

Only one ad per employee may be inserted. Each ad must be limited to 20 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday Noon, July 25, 1949

LOST AND FOUND

FOUND—Five keys in brown leather case. Found in tote box being sent to Taylor St. plant.

FOUND—One earring—gold color with gold drops. Found by College St. gate.

FOR SALE

BALDWIN CABINET GRAND PIANO—Excellent condition, for quick sale, $65. E-66541.

TWO PHOTOFLOOD REFLECTORS—Daylight and white bulbs included. H-79386 before 6 p.m.

FOUR-WHEEL TRAILER—Suitable for boat, farm or misc. hauling. Or will trade for outboard motor. H-74322.

ELECTRIC HAWAIIAN GUITAR—Girl's shoe skates, size 7; rollaway bed. H-01561.

LARGE DRESSER—With mirror, $10. H-26487.

RABBITS—Four does, one buck. 2412 Fillmore St.

PASTEL GREEN SPRING COAT—Like new, size 16-18, $10. H-01983.

BOY'S BICYCLE—Balloon tires, 36 in., like new, $30; also 1¼ hp Elgin outboard motor, $40. H-69705 after 4 or 2836 Broadway.

9X12 GREEN AXMINSTER RUG—And pad; table top four-burner gas stove, both in good condition. H-28824.

FOUR TIRES, 5.50x16—In good condition, reasonable. H-26182.

TWO SMALL DIAMOND RINGS—Watch; dress, worn once, size 18½, black and white. H-66715.

NEW MODERN FIVE-ROOM BUNGALOW—820 Poplar St.

CLEAN '35 PONTIAC—Four-door sedan, cheap. A-70423 after 5:30 p.m.

GAS STOVE—With regulator; kitchen sink complete. A-85834.

AUTO TOP LUGGAGE CARRIER—Size 36x40, with four inch vacuum cups and straps, half price. H-65552.

44 IN. THOR AUTO. IRONER—$15. H-69363.

HAMILTON BEACH MALTED MILK MIXER—H-01322.

MISCELLANEOUS

LAWN MOWER GRINDING — Work guaranteed. H-20602, 3118 Fairfield.

FOR RENT

TWO COTTAGES AT ROME CITY—A-67032.

COTTAGE AT DIAMOND LAKE, IND. Lake front, well water, sleeps five comfortably. H-28764.

THREE ROOMS—For refined gentleman, well furnished, clean, innersprings, hot water always, gas heat, use of phone, garage. H-58864.

WANTED

THREE-ROOM UNFURNISHED APARTMENT — Both employed. H-67184 after 4 p.m.

TRANSPORTATION

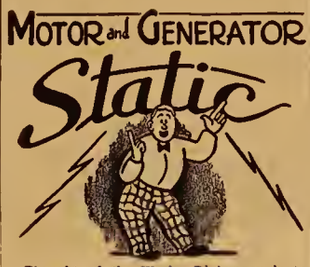
WANTS RIDER—James R. Voirol, from corner of State and Wells St. or vicinity on Sherman St. Works in Bldg. 62-3, 8-5:15. Ext. 728.

Willa Confer Dies

Willa May Confer, 50, of 1323 Summit St., died at 5:35 p.m. Thursday at the Lutheran hospital. She had been ill one year.

Mrs. Confer was employed by General Electric in 1919 as a typist in Bldg. 4-4. At the time of her retirement in 1948, she worked in the Blue Print section, Bldg. 18-5. She was a member of the Quarter Century and Elex clubs.

Services were held Monday at the Klaehn funeral home. The Rev. L. A. Middaugh officiated and burial was in Lindenwood cemetery.



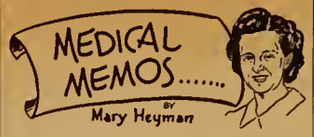
To date Ray Christman lays claim to the biggest fish to be bagged. Says he caught it on a fly rod and spent 45 minutes landing it, but didn't bother to bring it home for entering in the fish contest. The boys say they've heard of fishermen unable to land a fish by not having a landing net, but this is the first time hauling facilities prevented bringing the catch back home. Ray, you're just going to have to bring some evidence along to prove your stories if you want to make them stick. . . . Those muffled rumblings you've been hearing coming out of the west were not thunder, just the dynamite Virg Allmandinger has been using to loosen the dirt to be removed from the basement under his house. At the first blast, Mrs. A. took the children and herself to the woods, expecting the house to be reduced to splinters. To her surprise and relief nothing worse than the rattle of dishes and windowpanes. We can all rest easy now, since the job is finally completed. . . . True Sheets has inaugurated a new guessing game: Trying to guess the color of a man's hair by looking at his shoes. . . . Ralph Reinking says Paul Kennerk has reversed this "going fishing" story. Ralph says not he but Paul is the one who can't get away. Now, boys, let's get this thing settled. . . . Roy Bracht is still receiving helpful (?) suggestions on painting his house. He hopes to have the job completed when he returns from vacation. He doubts if anything but hard work will do the trick.

Tricks In Transformer

—FROM DIVISION 91—

By Johnny McMaken

People have tried nearly everything to beat the heat, but Charlie Kaiser has topped them all when he put on his bathing suit, took an umbrella, went out in the lake and sat down. . . . All the talk about the Big Beast of Busco has died down, but the fellows in Bldg. 26-1 would like to know what ever happened to the turtle pools that were taken up. It seems as though the turtle is still in the pool, but where is the pool? Maybe Bob Bunyan and Al Campton could give us the answers. . . . There has been some talk that Jim Stauffer has gone into show business. There is a rumor that Jim is going to run the Hep Cat show at Decatur next week. Don't wait, see Jim now for those "Annie Oakleys." . . . Mary Alice Kieler is going to the fair just to ride in the Tunnel of Love. . . . There has been a lot of talk about Bill Gepfert taking all the WORKS NEWS home last week. He must have gotten a picture for all of his relatives. . . . It isn't so bad for a fellow who doesn't know a lake, but when a fellow goes to the lake every week and can't catch any fish it is getting pretty bad. How about it, Emmet Bobay? Hope you have better luck in Minnesota on your vacation. . . . Maybe Dan Edgar will show you how to catch them as he got his limit. . . . It seems as though Herman Gebert is playing Cupid by getting dates for bashful Bill Kramer. . . . Gerald Crum has finally gotten his life's desire as he had his picture taken for the WORKS NEWS. . . . Fred Thieme must be out of rhythm again. . . . Paul Noffze has put up a big board to display all mispunchings except his own. We only hope he doesn't run out of room. . . . John Laymon likes the last 15 minutes of the day—that is the clean up. . . . Bob Mennewisch has finally got where he can make it in by seven a.m. Keep up the good work, Bob. . . . Ralph Milligan is learning how to farm as he was out combining oats over the weekend.



Thought of the Week: Diplomacy is to do and say the nastiest thing in the nicest way.

Do You? For a while it seemed that Ed Foley's American Greek Society was passing out of the news, which pleased this writer. It almost gave us neurasthenia trying to figure out just what that unpredictable bunch would do next. Big John went to Toledo and lost his shirt. Alex drove a prowler away with well aimed shots at the sky. Ed Foley gets in and out of trouble—What a bunch. Yes, things seemed to have quieted down until Ed blossomed forth with what he classified as "a perfectly ducky story." All out of breath he arrived at our desk. "Poison Pen," he sez, "I've got a great story for you to write up about my American Greek Society in time to make this week's deadline." "Yeh?" we replied in our most unINTERested tone of voice. "Well, here it is," sez Mr. Foley, "It seems someone parked an old ash truck in front of Tony Deck's five and ten emporium and forgot to return for it. After it had been there 24 hours someone decorated it with a sign reading, 'For Sale, 75 cents.' About that time someone called the police and the boys in blue responded with their usual gusto. The first thing they did was take Tony to task for peddling things on a public street without a license. After considerable argument Tony convinced the law that he did not want to sell it for 75 cents and after getting the boys properly confused offered to sell it to them for 50 cents. I don't know if he collected, but they towed it away. Write that up will you?" We considered a moment then replied, "No, we won't it doesn't make sense, besides who wants to get mixed up with Greek guerrilla activities?" Saying this we assumed our most determined expression and glared at Mr. Foley, who beat a hasty retreat. And by heck we still think it's crazy and refuse to write it. Do you blame us?. . . . ONE SECOND SERMON: Be careful the way you live. You may be the only Bible some people read.

Ramblings 31-2

Mr. and Mrs. Dick Weaver are happy over the arrival of twin boys, a couple of heavy weight champions. The one, Steven Roger, weighed seven pounds and four ounces; the other, Thomas Allan, weighed seven pounds and nine ounces. The Weavers also have a little girl two years old. . . . The M-G Engineering Section gathered at McMillen Park recently for a picnic in honor of Mr. and Mrs. Ira Kellogg and Mr. and Mrs. Guy (Tubby) Plaisted. Mr. Kellogg and Mr. Plaisted are ex-members of our Engineering Section. The Kelloggs now live in Florida and the Plaisteds live in California. . . . We see by the papers that Mrs. P. S. Stough was very skilled in putting on the green in a recent golf tourney.

What a pleasure it is to be marking off the days on our calendar! Our long-awaited two weeks' vacation will soon be here. Be sure to polish your bifocals and watch our column in next week's WORKS NEWS. This will be our Special Vacation Issue. . . . Dr. and Mrs. Harvey Murdock were at Lake Webster last week-end at the Smenner cottage. . . . We are glad to report that Veda Orff is gradually improving. She is still a patient in the St. Joseph Hospital. . . . Alice Wilson, daughter of Mr. and Mrs. Leslie Wilson, celebrated her birthday July 13. Now watch for changes, because she will be voting for the first time! . . . Eloise Noll, Decatur dispensary, has been off duty due to illness. Hoping you will soon be better and will be able to be back on the job again. . . . Ethel Carriger, former Winter Street nurse, has been spending the last few weeks at Lake Webster where she has been in charge of the hospital of the Epworth Forest Camp. . . . Let's nominate Duane Stroud as Bldg. 21's "Citizen of the Week." Congratulations, Duane, on your article to be published soon in the U.S. Public Health Department's Industrial Hygiene Newsletter. . . . George K. Faulkner, a former member of Our Gang, will soon return from Battle Creek, Mich., where he has been in R.O.T.C. Medical Reserve Department. This was a follow-up from his last semester as a medical student at Indiana University. Good luck, George, we're all out for you! . . . Pearl Johnson has been vacationing for the past two weeks at the home of Dr. and Mrs. Garton. . . . Things happen quite mysteriously around Bldg. 21 Dispensary sometimes, as Minnie Fryback can testify. Last Tuesday, for instance, she left her desk a minute on business and when she came back lo and behold, what did she find but a beautiful bouquet and a decorated cake bearing the inscription "Congratulations, Minnie, on 20 years with G-E." The joke was that she had forgotten the memorable day herself and so was doubly surprised to find her co-workers hadn't. . . . Want to hear the good news? Minnie Fryback and Olive Walters visited Sunday afternoon with Anne Murtaugh, who has been a patient at Irene Byron Sanatarium for some time. They reported that she is on the progressing convalescent list, and has gained 20 pounds. First thing we know, she'll be wanting a reducing diet program from the doctor. Anne was our good old Decatur nurse for a long time, and we're glad to hear she is on the mend. . . . Oftentimes during the evening, there are strange, weird noises in various parts of the dispensary that demand investigation. They are always gone when I start searching but it does remind me of "training days" on night duty.

I think of the lady with the lamp,
The lady courageous, sublime,
But do you suppose she ever got scared,
Like we do at night?
Isn't it likely in the deep of the night,
When nothing was making a sound,
That she had a feeling of things creeping up
And was almost afraid to look 'round?
I try so hard to be like her,
Though my "lamp" is an old flashlight,
But I still think that she, just the same as me,
Sometimes got scared in the night.

Why is it that the things we never get worry us more than the things we lose?

A man who both spends and saves money is the happiest man, because he has both enjoyments.

Inquiring Reporter:

WHAT ARE YOU PLANNING FOR VACATION?

HARRY ECENBARGER

Bldg. 12-2

"Most of my vacation will be spent working on my home, but I hope to spend at least several days at the lake."

FLOYD R. ARNOLD

Decatur

"I'm going to do some remodeling on my house during vacation."

VELMA B. MEADS

Bldg. 26-2

"I will be spending the first part of my vacation with friends and relatives in the East. Then back to the lakes of Indiana."

NORA E. FURTHMILLER

Taylor St.

"I am going to spend the first week of my vacation finishing my house-cleaning. The second week, I will relax and enjoy the clean house. If time allows I will visit relatives in Michigan and Ohio."

GEORGE WINANS

Bldg. 22

"Because I have a large family, it would be both expensive and inconvenient for me to travel. Therefore, I will spend my vacation working around the house and probably visit a few nearby lakes; that is, if we don't have a severe polio epidemic this season."

Voltmen-Red Sox Game Is Comedy Of Errors

By G. R. HEMMETER

Despite the fact that the Voltmen built up a lead of 6 to 1 behind the superb pitching of Charlie Shipman, they dropped the game to the Lafayette Red Sox, 11 to 6, Thursday night, July 14, at Dwenger park.

It wasn't the powerful hitting of the Red Sox nor the weakening of Shipman that caused this one-sided score, but a comedy of errors that would give enough laughs for a two-year run on Broadway.

The Voltmen started off like a whirlwind. In their half of the first inning, Stramm and Dudick became base runners by the charity of the Red Sox. Bulbous Bobilya spotted the ball he wanted and sent a mighty drive over the left field fence for three runs.

The Voltmen sparkled again in the third inning on the base paths, scoring two runs on a fielders choice and a clean single by the hustling newcomer, Les Lockett.

Feeling the pinch, Lafayette managed to score a run across on hits by Ritter and pitcher Clifton.

In the sixth inning, Bobilya tagged another of Clifton's deliveries and sent it screaming over the left field fence. This gave the Voltmen what appeared to be a safe five run margin.

Then the third act started.

If the ball had been bigger, the game would have done justice to the best soccer players. In the next two innings, the Red Sox put together five hits and eight Voltmen errors for 10 runs; four errors and three hits for four runs in the seventh, and two hits and four errors for six runs in the eighth.

The one bright spot was the hard working of pitcher Shipman. He was suffering, but still limited the Lafayette brigade to only seven scattered hits.

Box score:

Majors Beat City Light, Food Machine

The Majors Softball team won from City Light Thursday, July 14, by a score of 6-1.

The scoring started in the first inning. Stanski led off with a single, stole second and scored when the catcher threw the ball into center field. Somers singled, stole second and scored on Yarman's single. Morkoetter struck out, while Bucher singled. Lawson then bounced out to the pitcher and Esterline hit to center, scoring Bucher. Anderson walked, Waltke threw out from third to first, ending the inning with four runs, five hits.

There was another run scored in the fifth on a single base on balls, strike out, another walk and two infield outs. One run was scored in the sixth, when Stanski and Somers singled and Yarman followed with a double. Yarman led the hitting with three hits in four times at bat. Stanski and Somers had two hits in four tries.

City Light's lone tally came in the third when Bopp hit to right field for three bases and was safe at home when Ryan hit a slow roller to the pitcher.

Beat Food Machine Team

The next foe for the Majors was Food Machine. The Majors won, 4-2. This game was played Friday, July 15.

The Majors did not get a hit until the fifth, when Esterline led off with a walk and stole second. Anderson struck out, followed by Feldheiser's hit to right, scoring Esterline. Stanski hit to right. Somers then hit to the third baseman, who stepped on the bag to force Feldheiser, and threw to first in time to get the batter.

In the sixth, Yarman bounced to third and was thrown out. Morkoetter hit to left. Masters, batting for Bucher, struck out. Lawson walked, while Esterline hit to left center for three bases. Anderson singled to third scoring Esterline. Feldheiser flied out to left, with three runs on three hits for the inning.

Food Machine scored their two runs in the third on a single and a home run by VanRyn.

Lose to Fruehauf

The Majors then met Fruehauf Monday, July 18, losing by a score of 7-6. Single runs were scored in the first, second, third and sixth, while two runs were scored in the seventh.

Esterline led the hitting with two doubles in three times at bat. Baals had a double and a single in four times up, and Stanski and Morkoetter each had two singles in four tries.

Tie Next Game, 2-2

The Majors and Fruehauf played an eight-inning, 2-2, tie game the next night. Lawson led the hitting for G-E with a double and single in three tries. Yarman hit a home run.

Lile led the hitting for Fruehauf with a double and single.

Line Scores:

City Light .....001 000 0—1 2 2
G-E .....400 011 x—6 11 0
Ryn, Sitko and Biebedwig; Waltke and Somers.

VOLTMEN Home Schedule

Tonight, July 22—
Benton Harbor Buds

Saturday, July 23—
St. Joseph Auscos

Tuesday, July 26—
Benton Harbor Buds

All games are scheduled for 8 p.m. at Dwenger park.

G-E GOLF

By Hugh Dubdit

Even though the Spoons, of the Wednesday group, lost three points to the Mashies, they held on to first place with a total of 13 points. The Putters moved into second spot, with 10, and the Brassies are third, with six. Don Lynch topped the individual scoring with a 39. Vernon Foulks shot a 40 and Dick Szink, Glenn Schimmele, W. S. Kirke and L. Cunningham turned in 41.

In the Tuesday night group, the Optimists held to a slim one-point lead over the Dubs with 28 and 27 points respectively. The Nineteenth Holers are third, with 18 points. The individual honors of the evening went to "Red" Braden, at 39, Dick Tobias, with 40, and Paul LaCoque, Jim Walley and Bob Dent, with 41.

We hear that the putter mortality rate for C. A. Anderberg is rather high. This time the club head and grip end did not part company. Who knows how to straighten a shaft?

The Indians finally brought it back. We mean the sewer in Indian Village, so the Truman Buckles have poured a foundation and are starting to build their new home. . . . Bill Rohe was on vacation last week and we got just what we expected—A story telling us he caught the limit every day. Which is a measley 15 in Michigan for bluegills, huh. . . . Elizabeth Clevenger planted some bulbs expecting to get flowers, now she finds out by the odor they were garlics, but don't be disappointed, Betty, after all you can't eat flowers. . . . Virgil Howell, please tell us, are you the referee or one of the contestants at the wrestling matches on Wednesday nights? . . . Loretta Gerardot is recuperating at her home on Huffman St. after a recent operation.

Larry Reed's Detroit team is no longer called the Tigers. After so many defeats the Tigers hadn't any claws left. They were renamed "The Detroit Pussy Cats" and he even has a picture to prove it. It's just too bad he always blames the wrong people for the picture. . . . Three Great and Famous(?) people had birthdays last week; Don Baker, Noble Wagner and Larry Reed. Now they are trying to tell us that all great people have birthdays in July—well anyway, best wishes from the gang. . . . We don't know for sure whether Don Baker was trying to beat the heat or celebrate his birthday Friday, but that yellow shirt was really LOUD. So loud in fact that all he heard all day was wolf whistles. . . . To all our new people we say, "Hi and glad to have you join the gang." To our old friends, stop in and say hello occasionally and lots of luck." . . . Guess we'll have to give Steve Kelker our orchids for the week for his bright ties. They really help brighten the office. . . . All the noted economists say that business has leveled off now and is starting to swing upward. This trend can be seen on our floor as some large transactions have been closed. Jay Hensler has been buying cigarettes at a penny apiece. Maybe some of these days he will buy a whole pack and the boom will be on. Anyone wishing to sell any cigarettes to Jay can do so with any brand except a Kool. . . . Tony Miller is smiling again. The reason is that he finally got his Neptune Outboard Motor running again. Don't be surprised, though, if you see it advertised for sale! . . . Everyone was greeting Roger Crabill with a "Hi, Roger" last week. It seems these greetings were made mostly on the elevator. What can the reason be? . . . Dick Seidel says it's remarkable how good the gasoline gauge on his new Lincoln works. According to Dick all you have to do is start the motor and watch the gauge closely and you can see it go down. Seymour finds that the same thing holds true for the oil. Now we know why these filling stations are built so close together. . . . The book of the month "How to Catch Fish in Ten Easy Lessons." Author—Ray Solga.

Six Teams Compete In Owl League

The Owl Golf League is going strong this season with six teams making up the league. The league members tee-off each week at Orchard Ridge Country Club. In the first picture are the league's "old timers." They are: (l. to r.) Lloyd Grider, Floyd Garland, Bernie English and Irvin Junk. The center picture shows the leading men in the league. They are: (l. to r.) John Stark, Jim Sternberger, and Warren Wickliffe. The leaders of the Odd Division of the league pause long enough in their play to pose for a picture. Left to right in the photograph are: Dick Bierbaum, Fred Uhrick, John Shanahan and John Bierbaum.

TOUCHING THE BASES

by Walter Histed

In the course of seeing games over a great many years it has been my privilege to see both good and bad baseball. Never, however, have I witnessed such an inept exhibition of fielding as that displayed by the Voltmen last Thursday against Lafayette. It has been said that good pitching and hitting will win for any team, but that theory will now have to be revised. The Voltmen had ample hitting and good pitching by Charlie Shipman, but 12 errors presented Lafayette runs which they accepted with pleasure.

Buds Annihilate Red Sox

The Buds gained sweet revenge for several past humiliations at the hands of the Red Sox, when they walloped the Lafayette sluggers, 17 to 1, last week. For Norm Snyder and his crew, it was justice long delayed. Snyder paced his team with two home runs and two singles to drive in four tallies. Berney Morris, clever Negro hurler of the Buds, held the Red Sox to eight hits. His mates combed Slim DeLion, Al Hazel and Johnson for 18 blows.

Line score:

Benton Harbor	500 020 028	17	18	0
Lafayette	100 000 000	1	8	3

Morris and Kovach.
DeLion, Hazel, Johnson and Hixson; loser, DeLion.

* * *

Auscos Beat Cubs, 4 to 3

Mack Stewart outpitched Jim Wallace, as the Auscos won an 11-inning thriller from Michigan City at Edgewater park. Ray Scott, erstwhile manager of the Studebakers, drove in the winning run with a line single with the bases loaded and two out.

Line score:

Michigan City	010 000 020 00	3	9	4
St. Joseph	003 000 000 01	4	14	0

Wallace and Hofferth.
Stewart and Westerkamp.

* * *

Cubs Edge Buds, 2 to 1

The Benton Harbor Buds had three men thrown out at the plate in the late innings, as Chet Brewer shaded Lefty Ververka in a tight pitching duel.

Line score:

Benton Harbor	001 000 000	1	6	2
Michigan City	000 020 00x	2	7	3

Ververka and Kovach.
Brewer and Hofferth.

* * *

Buds Thump Windsor, 13 to 1

The Buds made Lefty Roy Lee's first start for Windsor a nightmare, as they drove him from the box in the fifth inning with a six-run burst. Added to five runs scored earlier, it made a rout of the game.

Line score:

Windsor	000 100 000	1	7	2
Benton Harbor	203 060 11x	13	19	2

Lee, Cyril, Anderson and Milan; loser, Lee.
Veverka and Young.

* * *

Cubs Beat Red Sox

The Cubs scored in the top of the tenth to defeat the Red Sox and Al Hazel at Lafayette last Sunday night. Stu Hofferth, Cub catcher, was injured and had to leave the game in the second inning.

Line score:

Michigan City	100 004 000 1	6	11	2
Lafayette	100 200 200 0	5	11	1

Wallace and Hofferth, Diehl.
Hazel and Hixson.

* * *

Auscos Trip Buds, 7 to 5

The Auscos combined two big innings to whip the Buds in their twin-city, civil war last Sunday at Edgewater park, 7 to 5. Three runs in the first and four more in the fourth for the Auscos more than offset the big five run fourth for the Buds.

Line score:

Benton Harbor	000 500 000	5	13	2
St. Joseph	300 400 00x	7	11	1

Morris, Ververka and Kovach.
Katz, Stewart and Westerkamp.

Benton Harbor, 17, Lafayette 1
Lafayette, 11, VOLTMEN, 6
Michigan City, 2, Benton Harbor, 1
Benton Harbor, 13, Windsor, 1
Michigan City, 6, Lafayette, 5 (10 innings)
St. Joseph, 7, Benton Harbor, 5

Last Week's Results

Team No. 6	+16
Team No. 5	+ 5
Teams No. 1 and 3	tie
Team No. 4	—16
Team No. 2	— 5

The above results almost tell the story of the Owl Golf League.

The Hot Shots took care of Team No. 4, with Warren Wickliffe leading the way with a 39. Bernie English went over his average with a 49 to pace his team.

Walt Pook and No. 5 bounced back after their defeat of last week and clipped the Jolly Boys by five points.

The match of the day pitted the two teams on top of the odd side, but it was all to no avail as it ended even. Uhrick of Team No. 3 and Stark of Team No. 1 shared low ball honors with 43's.

With vacation and the playoffs coming soon, it behooves us divot-diggers to get out and hustle for a berth in the final playoffs.

G-E Owls Nose Out Indiana Rod, Wire

With a story book finish, the G-E Owls softball team won over the Indiana Rod and Wire nine by the score of 6-5.

It was two outs and men on second and third in the seventh inning and Baker, the Owls shortstop, at bat. After fouling a long one to left, he promptly ended the game with a long wallop between left and center for a home run.

Stauffer, Drayer and Greeno formed the batteries for G-E.

"All good things come to those who wait" and just think one more week and everyone will be starting on a long awaited vacation. Vacationing at Lake Webster will be Lloyd Platt and Fred Divelbiss. Which will they spend most of their time doing—fishing or playing pinochle? I wonder. Marion Sienkiewicz will be heading for Madison, Wis., and with a new car to drive who could ask for more. Catherine Hirschman is planning a trip to the Black Hills of South Dakota, while our friend "Casey" will go to Cincinnati for a few days and then to Saginaw, Mich., for a visit with our former coworker Margaret Furrel Chance. Chris Riez can hardly wait to get started to the Smoky Mountains while Gene Miller, Ben Kissel and Karl Soest will spend most of their time at home. . . . Our congratulations to Mr. and Mrs. Karl Soest who recently celebrated their silver wedding anniversary. From the reports, I guess the celebration was a success. May the next 25 years of your married life be just as happy as the last. . . . The welcome mat is out to Gene Buescher, who joined our gang recently. Gene hails from St. Louis and is employed in the Engineering Division. . . . After 20 years Kenny Redding finally went and did it—bought a new car, that is. Frank Treece recently bought a new Ford and Lloyd Platt bought a Chevrolet and they got Kenny in the notion. He plans to break it in on his vacation trip to Northern Michigan. . . . Our deepest sympathy to John Hall on the recent death of his wife.

"From your chain a link has fallen
In our land her star has set,
But enshrined in memory's tablet
Her true worth you'll never forget."

Voltmen Triumph Over Auscos, 4-3

By WALTER HISTED

The Voltmen, apparently tired of being door mats for the league teams, struck down the league-leading Auscos, 4 to 3, at Dwenger park Tuesday night.

Displaying a much improved defense in support of Charlie Shipman's fine twirling, the Volts won the hotly-contested contest by breaking a three all-tie in the eighth inning.

Frustrated at various times by three fine throws by Carl Kennedy, two of which cut down runners at the plate, the Braden-men still capitalized enough on their chances to win.

The visiting Auscos jumped off to a fast start. Schultz and Logan singled and rode home on Bob Winter's triple to right center. Winters was cut down on Scott's grounder to Hedinger at second.

The Voltmen lost little time in making even the score, as Stramm beat out a bunt to Logan and stopped at second on Gabby Hormann's single to center. Dudick was safe and Stramm scored when Scott failed to come up with a ground ball. Hormann scored after the catch on Bobilya's fly to Kennedy.

The tie score prevailed until the home sixth, which Les Lockett opened with a single to right. Chinewicz also singled to right, Lockett going to third; but Chinewicz was cut down at second on Kennedy's throw to Schultz. With Morgan at bat and two out, Ausco Pitcher Bob Katz committed a balk; permitting Lockett to score from third.

Shipman faced only 12 men from the first to the sixth inning. In the sixth, though, the Auscos had singles by Logan and Winters, with one and two out respectively. The losers lost no time in evening the score again in the seventh. With two out, Westerkamp doubled to center and scored on Katz's single to right. Hormann's fine throw from right field came in time to cut off Westerkamp, but Morgan let the throw get through him with the Ausco catcher scoring on the error.

The Voltmen tallied the winning run in the eighth. With one out, Chinewicz singled to right. Jack Holland batted for Hedinger and scratched a hit to short. Morgan's single to right brought in the winning run. When Katz hit Shipman with a pitched ball, Manager Kennedy brought in Albosta to put out the fire.

John Chinewicz, with three singles, paced the Volt's attack; with Hormann, Lockett and Morgan getting two hits each. Logan had three hits for the losers.

Box score:

Auscos	AB	R	H	Voltmen	AB	R	H
Schultz,2	5	1	1	Stramm,3	4	1	1
Logan,1	5	1	3	Hormann,rf	5	1	2

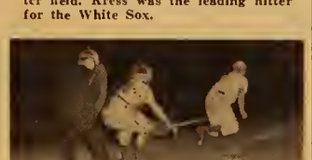
Voltmen Play Chicago White Sox

Jack Onslow, manager of the Chicago White Sox, and "Red" Braden, manager of the G-E Voltmen, are shown (above) watching the warm-up before the exhibition game at Dwenger park Tuesday night, July 12.



In 1911 Onslow caught for Fort Wayne in the Central League at old League park.

The Voltmen gave the White Sox a merry tussle before conceding defeat to the American Leaguers by a narrow 3-2 margin.

A crowd estimated at 3,600 turned out for the exhibition tilt. The White Sox had about the same line-up that has been appearing for them in recent weeks with the exception of Cass Michaels, second baseman who was in the All-Star game, and Luke Appling, veteran shortstop, who was given the extra day of rest for his aging limbs.

Charlie Kress (above) hits one of his two doubles of the evening to left center field. Kress was the leading hitter for the White Sox.

In the seventh inning, the Voltmen took a 2-1 lead on the strength of an error by Charlie Kress, Chuck Bobilya's hit (above) and a fly to left by John Chenewicz, on which the Voltmen picked up an extra run when Catcher Don Wheeler allowed the throw-in to get through him.

THE GOOD WAY

FOR the past three months we have all been troubled, puzzled, uneasy, and sometimes afraid.

In the previous ten years of false prosperity we had forgotten that goods would not always be scarce . . . that people would not always spend freely, or even recklessly . . . that jobs would not always be abundantly available.

But we have all been forcibly reminded about some hard facts of life . . . that we shouldn't go on buying too eagerly and too much when values get bad in boom times, just as we likewise shouldn't buy too little and too hesitantly when values get good again in slack times.

In the present situation, General Electric has been warning against unsound proposals . . . against what *not* to do . . . in an attempt to bring sales and jobs back up. .

But General Electric is not just *against* unsound proposals. General Electric is *for* a bold, dynamic program of sound and attractive progress toward more sales and jobs that we believe everyone should follow.

This is the program of lowering prices while maintaining present high wage rates, of expanding and improving facilities, of creating more attractive products, of selling harder. In short, it is a program of having all concerned putting more thought, interest, skill, care and effort into attracting with a bigger value that 95% of the buying public still having income and savings sufficient to start the unemployed back to work.

This program is not one that works by itself . . . or that goes instantly like a house afire just with a little attention and effort by somebody else. Furthermore, inventories in the factory and home not yet used up or worn out have to be worked down some, since so large a portion of our purchases are postponable.

But, by everyone doing his part . . . putting forth his honest effort at giving a big value, and keeping at it . . . the tide can be turned, and sales and jobs can steadily mount.

General Electric is honestly and vigorously pushing such a program. Let's see what the results are beginning to be:

PRICES have been cut and everything else possible dane ta move goods. As a result, we have been able to attract unit sales that on the average have been surprisingly high under the circumstances. Even our dollar sales far the last three manths were only about 5% below the first three manths af this year and only about 4% below the 2nd quarter of last year.

WAGE RATES were kept at the high level af the 1st quarter—over 9% abave the same quarter af a year ago and around 90% abave 1940 as campared with cost-af-living up less than 70% since 1940.

THE NUMBER OF JOBS is still appreciably below our all time peak and belaw the average af the 1st quarter of this year, to be sure. But it must be remembered that our declers and distributors have been selling more goods than we have been shipping to them. We have been shipping more goods than we have been currently manufacturing. Everybody has been moving the unhealthy inventories unavoidably accumulated at the close of the boam. If retail sales can be maintained as at present, our employment will slowly gain.

PROFITS ARE DOWN 26% from the 1st quarter rate and down 32% from the 2nd quarter last year—reflecting General Electric's efforts to offer big values to make sales and jobs.

GENERAL ELECTRIC is not sparing itself . . . and is trying to da its part . . . in this drive to do everything that experience indicates will aid sound recavery and lasting well being.

40-Hour Week Is Restored

Clarkson Is Named To Succeed Noble

J. J. Clarkson

P. O. Noble

J. J. Clarkson has been appointed Manager of Engineering, Fractional Horsepower Motor divisions. He succeeds P. O. Noble, who is retiring August 1 after 45 years of service.

Mr. Clarkson, a graduate of the University of Alabama with a BS-EE degree, began his General Electric career in 1929 on the Company's test course in Schenectady. He transferred to Fort Wayne and was assigned to the FHP Motor Engineering division.

In 1937 he became Section Engineer and in 1942 was made Assistant Division Engineer of the Supercharger Engineering division. The following year, Mr. Clarkson was promoted to Engineer of that division.

He was then named Superintendent of the Taylor St. Plant. He held this position until the plant discontinued the manufacture of superchargers in 1946, at which time he was made Section Engineer of the FHP Development Engineering section.

The next year Mr. Clarkson became the Assistant Division Engineer of the FHP Motor Engineering division. He was named Assistant Manager of that division in 1948.

Will Not Serve Breakfast First Day After Vacation

Following the vacation shutdown, on Monday, Aug. 15, breakfast will not be served at the Broadway cafeteria. Serving of breakfast will be resumed on Tuesday.

Credit Union To Stay Open During Vacation

The Credit Union office will remain open during the vacation period, Lee Cupp, treasurer, announced today.

Procedure For MBA Deductions Is Announced

The procedure for handling MBA deductions during vacation was announced this week by K. W. Michael, general chairman of the Mutual Benefit Association at Fort Wayne.

The various payroll sections are set up to operate as follows:

Those employees who are eligible for one week or more of vacation will have MBA dues for three weeks deducted from the pay they receive prior to vacation. This will cover them during vacation.

Those not eligible for any vacation will have three weeks MBA dues deducted from the first check they receive after vacation. This will cover them during vacation.

Regarding employees laid off for lack of work, the following policy will be followed:

A member laid off for lack of work whose continuity of service is protected under the rules of the Company may retain coverage for himself and his dependents for one year by paying dues monthly in advance, except that he shall not be entitled to receive disability benefits.

A member laid off for lack of work whose continuity of service is protected under the rules of the Company who does not pay dues for

LAYOFFS AT MINIMUM IF CUSTOMER ORDERS STAY AT PRESENT LEVEL

As a result of negotiations held during the past week between Company representatives and representatives of Local 901, UE-CIO, and Lodge No. 70, International Association of Machinists, it was decided that the Fort Wayne General Electric plants would return to the regular 40-hour schedule following the vacation shutdown.

In the meeting held with Local 901, it was agreed that the 40-hour schedule would be resumed indefinitely in all office and factory activities following the vacation shutdown. It was decided that this could be accomplished with a minimum of layoffs if current production schedules are maintained at their present levels.

In the event additional drastic cuts in production schedules are necessitated by an unpredictable slump in orders received, Company and Union representatives will meet to discuss any desirable changes in the working schedule.

In the meeting with Lodge No. 70, it was agreed that the main Tool Room would return to the 40-hour schedule for the first four

Expect Record Crowd At Q-C Club Outing

The large number of Quarter Century Club members that have signified their intentions of attending the club's annual outing led A. C. Hartman, secretary, to announce this week that the turnout will exceed that of any other year. This will be the fourth year that the outing has been held at Camp Limberlost, Oliver Lake.

Plans were completed this week to present each member with a special souvenir of the outing, which will be held Saturday, Sept. 10.

G-E Club Announces Slate Of Candidates

Candidates for the election of 1949-50 officers of the G-E Club were announced today by Ervin Huth, chairman of the nominating committee.

The following were named:

President
Harold Carter, Bldg. 4-6
Erv Huth, Bldg. 20-2

First Vice President
Gayle Griffith, Winter St.
Carl Reynolds, Taylor St.

Second Vice President
Virginia Mollet, Bldg. 31-2
Sue Siedel, Taylor St.

Secretary
Dick Gallmeyer, Winter St.
Dick Kent, Bldg. 18-5

Directors
Walter Lamboley, Bldg. 4-6
Ray Lindemuth, Bldg. 18-5

The election will be held Monday and Tuesday, Aug. 29-30.

Mrs. Siedel, Mr. Reynolds, Mr. Kent, and Mr. Lindemuth have all been nominated for re-election. The directorship is for a term of three years, while all other offices are for one year terms.

Charlie Wilt, G-E Club Manager, completes his third term this year as president of the club.

Flags Give News Of G-E Voltmen Games

Employees at the Broadway plant will be kept informed as to the latest standings of the Voltmen now that a flag pole has been erected at the Broadway East Gate.

Every day of a game, the blue and gold flag will wave from the pole to remind fans to come out to Dwenger park. The next day the pole will tell the outcome of the game.

We won!

If the Voltmen win, the pole will carry the flag showing a G-E Voltman laughing.

(Continued on page 3)

"Red" Braden, Voltmen manager, and Charlie Wilt, G-E Club president, are shown running the flag up that announces the day of a game.

Take These Along On Your Vacation For A Wonderful, SAFE Time!

Sunning at the seashore, loafing at the lake, touring the highways, or just "hibernating" at home, vacationtime is a period of relaxation and enjoyment, and you can't afford to let carelessness or neglect rob you of even one minute's pleasure.

You may find it a good idea to take along these timely tips:

Meet the Sun Halfway

Take your sunshine in small doses. Even mild sunburn is painfully uncomfortable, but a severe sunburn which covers a large portion of the body is dangerous. Protect yourself from the full intensity of the sun's rays until you develop a coat of tan. Keep always in mind that sunstroke may be caused by long and direct exposure to the sun.

Enjoy Your Swim

If you like to go swimming, you will want to remember that it is dangerous to go in the water immediately after eating. It's always a good idea, too, to have someone along . . . even if you are a good swimmer. If you are learning to swim, seek competent instruction. There's a proper way to dive, too! Examine the place where you plan to dive. If you dive in shallow water, or to a rocky bottom, you may injure your back severely, or break your neck. In other words, look before you leap. If you have sinus or ear infections, better get medical advice before you try any diving.

Cruising Up the River

For fun and good exercise, canoeing and rowboating are unexcelled. Likewise, sailboating or motor boating. Small boats, however, tip easily and can be dangerous if not handled correctly. Never stand up in a small boat. Permit no overcrowding. If your boat should capsize, cling to it until help comes; don't attempt to swim off alone.

Be careful, too, of sunburn and windburn while boating. Exercise the same caution against these burns as you would on land.

On the Highways

Pleasant vacation weather invites motoring, and "Sunday drivers" are on the road every day of the week. Many drivers are unfamiliar with highways, crossroads, and other traffic conditions . . . so you will want to be careful. If you plan a vacation trip by car, map out your route and schedule your stops well in advance, providing for a reasonable amount of driving each day and permitting yourself, or other drivers, enough rest. Before you start, have your car checked by your mechanic, to be sure that lights, brakes, tires, etc., are in tip-top condition.

Be careful of pedestrians. Children are out of school and enjoying their vacations. Drive safely; don't spoil their fun.

Going to "Rough It"?

If you are going to "rough it" this vacationtime, and spend most of your days outdoors camping and hiking, you must remember that you will face additional hazards. Walking through tall grass or underbrush has its dangers, because that's where ticks which spread spotted fever may lurk. To prevent this contamination, be sure that your lower limbs, especially, are well protected by suitable clothing. Carry a snake-bite outfit in poisonous snake country.

If you suffer from hay fever, you will want to avoid localities where you will be exposed to ragweed pollen or other plant pollens to which you are allergic.

Skin poisoning, occurring from direct contact with any part of the poison ivy, poison oak, or poison sumac plant, causes a painful, itching eruption of blisters. The surest way to stay out of trouble is to learn what these plants look like and then to shun them. Your dictionary probably has illustrations of these plants.

Water, even if it looks clear, may be contaminated with germs. Don't drink water unless you know that it has been tested and approved for drinking. When uncertain, you can make it safe by boiling or, if this is impossible, by adding chlorinating tablets.

Take a first-aid kit along with you. Give prompt attention to even the smallest scratch or cut.

Three Little Words

Yes, no matter how you plan to spend your vacation, you will want to remember these three little words . . . take it easy! If you are middle-aged or older, or if you take little or no exercise, enter into vacation activities slowly. Do not engage in sports unsuited to your age and habits.

When the whistle blows to end the last shift today, that should be the time to begin "the pause that refreshes" not frustrates us.

Whether you are going home from work, hurrying up to the lake, or planning a vacation by car this year, **DRIVE SAFELY** should always be kept in mind.

Vacations by car can be lots of fun. Leisurely sightseeing . . . unhurried motoring . . . restful relaxation replace the rush and hustle of a work-a-day life. But every year, many vacations, long anticipated and looked forward to in glee, often end in accidents. A little thoughtlessness, a moment of recklessness . . . then a lifetime of regret.

When you drive, remember that during the month of August, traffic accidents in the United States kill someone every 16 minutes, and that three out of four pedestrians killed by motor vehicles were either violating a traffic law or committing an unsafe act.

Remember, accidents don't go on vacation; they never stop their terrible work, so be extra careful!

Be sure that your car is in good mechanical condition. Brakes should be tested; good tires are important, because long trips at highway speeds mean added strain. Test them daily. You need good headlights when driving strange roads at night. Test all lights, carry spare bulbs, and make sure that your battery is in good condition.

Don't pack your car so as to obscure your vision through the rear view mirror. If necessary, get an exterior rear view mirror, and know what's behind you. Be sure to signal stops and turns.

Don't overload the car, for if you do it is more likely to break down and is more difficult to steer. Besides, it's less comfortable. You'll probably never miss half the articles you thought you'd need, anyway.

Speed and distance do not measure enjoyment. Make your daily goal one that you can reach without speeding. Why rush ahead when there might be something worth seeing on the way? A vacation trip should mean far more than record mileage!

If scenery is worth looking at, it's worth stopping to enjoy. Get out of the car, stretch your legs, and really enjoy the view. Be sure to park where other motorists won't run into your car . . . or you.

Stop when you become tired or drowsy . . . either for a rest or for the night. What difference does it make if you haven't reached your day's objective? Vacation schedules should be flexible. If you come back nervous and exhausted, you haven't had a vacation.

Remember that good manners make touring more pleasant and safer. So, sign a mental non-aggression pact with other drivers, and keep a plentiful supply of courtesy on hand to make up for any lack of it on the other fellow's part.

Editor's Note: Thanks to Mrs. L. W. Wightman, whose husband works in Bldg. 4-6, for posing for the above picture. We want to make it absolutely clear that Mr. Wightman is a safe driver and that the telephone conversation is fictitious.

Dr. Garlon Says:

"Bring 'Em Back Alive"

Recently I walked into the hospital with one of my orthopedic friends. He was carrying a "gadget" and to pass the time of day I inquired what he might be "up to" today. He replied, rather grimly, "fixing broken necks"—and it wasn't said lightly. He then related a recent remark that his wife had made while seeing one of Frank Buck's "Bring 'Em Back Alive" films.

She remarked how awful it was that so many hundreds, or perhaps thousands, of natives were injured and killed each year in attempting to capture these wild animals. The doctor replied, "Yes, but it's no worse than these automobile smash-ups; at least you have a fighting chance with a wild animal."

Haste Brings Disasters

Perhaps that is not a very happy note with which to start a vacation article; but no doubt several thousand General Electric employees and their families will officially start their vacations in an automobile, and the tendency for all of us is to want to reach that vacation spot at the earliest possible moment. Doctors on the receiving line at hospitals have it forcibly impressed on them how often undue haste results in vacation disasters for someone.

We believe that a little deliberate thinking and planning can add much to vacation health and safety. I recently heard a quotation that could well be applied to this subject, as well as many of our everyday activities. It was this: "How we think is how we act, and how we act is what happens."

It may require several readings to get the full impact of such a simple statement. How many of the things that will just "happen" to us while on vacation will be the result of our own, or someone else's wrong thinking? . . . such as too much haste, overloading our capacities, tempting Mother Nature until she bites back. Yes, the person who has his vacation interrupted by a careless accident or a preventable illness has had a tragic vacation. In many instances the "take it easy" attitude will prevent them.

Vacation Pests

The little pests of vacation time will be there awaiting us, too—sunburn, poison ivy, chiggers, minor injuries. So remember to take the first-aid kit and know how to use it. And have you brushed up on your artificial respiration recently?

Vacation hygiene is still in order, too. No need to discontinue health practices carried out at home. To recall a few of these:

- Be sure of the safety of your milk and water supply while travelling. Water can always be boiled if necessary, and canned milk is safe.
- Continue habits of eating and sleeping with some degree of regularity; a good time to catch up on the latter.
- Physical activity in moderation unless you are already well-accustomed to strenuous activities. "Be your age" in this respect.

Remember . . . how we act is what happens;" and Do Bring 'Em Back Alive!

Thoughts At Vacation — Time

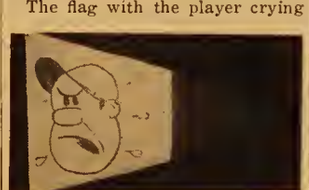
M. B. A. SICK LIST

Carl Fuller, Bryan Brown, Clyde Enslen, Elihu Lee, Wayne Coak, Edward Hauke, William Glenn, James Mitchell, Harold Canfield, Sherman Stilwell, Eva Webber, Wanda Anderson, Evelyn Brunkhart, Catherine Richter, Marie Wickelman, Fred Cooper, Kenneth Beck, Goldie Kelly, Donna Backofen, Mildred McConkey, Warren Jackson, Carl Fisher, John Blanks, A. Luella Bixler, Milford Toney, and Frank Romanowski.

R. E. Viland Dies

Ralph E. Viland, 62, of 1308 McClellan St., died at 7:25 p.m. Wednesday, July 20, at the Methodist hospital.

Mr. Viland was employed at General Electric since 1919. At the time of his death he was an inspector at Taylor St.



Survivors include his wife, Vada; three daughters, Thelma Agnes, Bonnie Mae, and Mrs. Norbert Holloway.

Services were held Saturday at 2 p.m., with burial in the IOOF Cemetery at New Haven.

Voltmen Games

(Continued from page 1)

The flag with the player crying

We Lost!

will be flown when the Voltmen lose.

W. H. Powell Dies

Services were held Saturday morning at St. Joseph's Catholic Church for William H. Powell, 77, 1207 Wall St. Mr. Powell died at 7:20 a.m. at St. Joseph's hospital.

He retired 10 years ago after 21 years of service. When he retired, Mr. Powell was a plant guard. He was a member of St. Joseph's Catholic Church.

Burial was in St. Vincent's Church Cemetery on the Auburn Road.

40-Hour Week

(Continued from page 1)

weeks following the vacation shutdown and that all other tool sections assigned to production divisions would work 40 hours, gearing their operations to the production requirements in their respective divisions.

Another meeting will be scheduled with Lodge No. 70 during the last week of August to discuss the working schedule to be established following Labor Day week.

MBA Deductions

(Continued from page 1)

coverage A or A and B monthly in advance will not retain coverage for himself or his dependents. Upon his return to work with continuity of service he will sutomatically be reinstated in the coverage he had prior to the layoff without payment of initistion fees, back dues or a waiting period. For the dependent of such an employee to be eligible for maternity benefits, the dependent must have been covered by Coverage B for at least 10 months before the need for hospitalization and surgery arises.

Periods during which coverage is not maintained will be deducted in figuring eligibility under either A or B.

Employees laid off for lack of work who desire to maintain their MBA coverage should report to the MBA office in Bldg. 8-2, where a cash card will be msde out. This card msy then be taken to the cashier in Bldg. 18-1, where the payment will be accepted. It is not necessary to obtain a cash card for each payment, only for the first one. It is not necessary for the employee to go to his individnal payroll office.

Anyone wanting any mice exterminated just call on Herb Koch. The story goes like this, Eileen Hennen discovered a wee little mouse in her paper basket and asked Herb to get rid of it, and what happened? The little mouse bit Herb on the finger, thumbed his little nose and ran away. What did Herb do? He turned red of face and crawled behind the calendar on his desk! My hero! . . . Pass the limburger cheese to Vern Castle, he didn't get quite enough the other night. . . . The birthday club met at Machon's for their usual meeting. Ann Lapadot was hostess and Audrey Hickernell and Olga Welch had birthdays. Those present were Laurel Weaver, Dorothy Askren, Florence Knigbt, Dorothy Mills, Luella Bixler, Audrey Hickernell, Ann Lapadot, Olga Welch and Marvelene Butts who had her sister Norma as guest. The next meeting will be a lake party at the lake cottage of Belle Buchan. . . . And now that vacation time is here again, let's all be very careful, have a good vacation and come back healthy and happy. SAFE DRIVING.

Special Offer Made On Portable Welders By Employees' Store

The 130-amp, Shop-Farm-Home, portable welder is now being offered for a limited time to all G-E employees at tbe low price of $41.50, which is about one-third the list price.

Anyone wishing to take advantage of this offer should inquire at the Employees' store.

For many uses around the home, the portable welder is indispensable. It provides a quick and easy means of repairing, modifying or building nceded equipment. Included with the welder are all the necessary accessories.

Seely Invents Two Protective Means For FHP Motors

R. E. Seely

Two patents have been granted to Richard E. Seely on his inventions dealing with means for protecting motors from damage due to excessive temperature. Mr. Seely is a design engineer in the Fractional Horsepower Motor Development Engineering division.

One of the inventions involves protection of a motor by means of a resistor in the neutral circuit of a Y-connected polyphase motor. Heat from this resistor due to excessive current in the motor causes a vapor-type relay to remove power from the motor. Mr. Seely's other invention gives protection to the motor by having the sensitive element of the vapor-type overload relay buried in the end-turn windings of the motor so that excessive temperature of those windings from any cause will result in de-energizing the motor.

Mr. Seely has been employed by General Electric since 1942. These are his first patents.

Gurney Lindley is thinking of having an elcvator installed in his home so his wife won't have to climb those treacherous steps anymore. . . . Lyle Claphan is in the market for any used tires—popular size or oversize to take care of the heavy load that he hauls in the rear seat. . . . Paul Boedeker received a fine fried chicken for lunch recently. Upon getting his appetite all set and going to the drawer for said chicken, he found it had flew the coop. Several fellows had been offering him chicken bones, so Paul went to the cafeteria for his dinncr. It really was good chicken, too. . . . Bill Walde spent one Saturday shopping for seat covers and after selecting what he thought was a good bargain made his purchase, only to find they were advertised the following week at a greatly reduced price. . . . John Driver was passing cigars to Fred Boehm last week, the result of Fred's recently successful campaign. . . . This brings us all to vacation time, so wherever you go, take it easy, drive carefully, start early so you don't have to hurry. A happy safe vacation to you all.

Well that long awaited time is here. The two most important weeks of the year finally arrived. Vacation at last. Wonderful, isn't it? . . . From Mr. Hanson "Thanks to all for your fine cooperation in getting out all those 'hot' samples before the shutdown. To every member of this Division and your families, we wish a happy and safe vacation. Will see you in a couple of weeks and swap yarns about our experiences. Perhaps we should have a prize for the 'best story'." . . . Here's a toast to bigger fires and firemen to match. Buck Lydy is trying to be a bigger fireman—well anyway, we hear he ate 18 barbecues at the firemens' picnic. Some capacity. . . . Things have come to a pretty pass when the euchre crowd will change a whole dollar for one penny. That's what happened to Sid Borton. . . . John Putman may know his onions, but he doesn't know his potatoes. He recently took home a sack of spuds that looked swell on top but the deeper he got in the sack the worse the "Irishers" got. Some people have all the luck—bad that is. . . . Bill Schultz may put his money in a double catch purse, but Sol Andorfer puts his in a gallon jug. Easy to put in but hard to get out, he says. . . . "Professor" Don Thomas' graduating class is still waiting for their diplomas. Don was supposed to teach Jim Smith, Tony Miller and Ray Solga how to catch bass. The diploma was one of Don's special baits called "Eerie." Now the boys have learned their lessons, but so far no diploma. . . . Mike Lowe very suddenly began parking on the lot instead of along the street. Wonder if those little pink tickets could be the reason? . . . Today we say "So long and loads of good luck" to Elnor Laymon who is leaving us to take up housekeeping. From all the gang our best wishes to you and much happiness in your new role of housewife and mother. . . . When Norb Lose was asked what was wrong with his eyes one morning, he gave this answer. He had a cold in one and the other was bloodshot from lack of sleep. We couldn't tell which was which 'till the next day after a good night's sleep only the eye with the cold was obvious. Must be a case of sleeping with one eye open. . . . Les Stauch, as usual, will spend his vacation at his cottage at Jimmerson Lake. He is now in the process of rebuilding and enlarging his cottage so he will spend his time cracking the whip over the carpenters. At least he'll have a good excuse for not catching any fish. . . . Some of the placcs our people can be found during the vacation are: Henry Roemke, Northern Michigan and Clear Lake; Floyd Shellenbarger, Northern Michigan; Gerry Holdgreve, Northern Michigan and Canada; Don Thomas, Minnesota; Ray Solga, North Dakota; Norb Lose, Crooked Lake; Louie DeVoe, Big Long Lake; Don Kruse, Clear Lake; Harold Drage, Northern Michigan. Bill Mills and Walter Beeth still don't know if their wives will let them go anyplace or whether they have to stay at home and work. . . . Jay Hensler approached Bill Decker trying to buy his daily penny cigarettc, but Bill refused since his supply was rather low. However, Bill did suggest that Jay contact Jess Romine. Jay offered Jess a penny for one of his favorite weeds. Jess agreed to sell. When Jay opened his leather wallet to obtain the penny Decker saw two winged creatures resembling small butterflies, fly out. What could they be? And then there is the one about the guy who wore a pair of pants for nine years and the pockets were brand new. . . . HAVE A WONDERFUL VACATION, GANG.

Erb Retires

F. E. Erb

Fred E. Erb, Sr., will retire Monday, Aug. 1. He is now on a three-weeks vacation, before his retirement becomes effective.

Mr. Erb began at General Electric June 12, 1913. During most of his 36 years with the Company he was a toolmaker in the General Tool division. At the time of his retirement, he worked in Bldg. 19-4.

Thomas Gets Patent To Improve Control Power Of Amplidyne

C. A. Thomas

The United States Patent Office has granted a patent to Charles A. Thomas on his invention of an improvement in amplidyne generators.

Mr. Thomas is a group leader in the Fractional Horsepower Motor Development Engineering division. His invention results in a considerable decrease in power requirement for controlling the output of the amplidyne by the use of a non-linear material such as Thyrite in a self-excited field of the generator.

Mr. Thomas has been employed in tbe FHP Engineering divisions since 1935. This is the sixth patent which has been granted to him. him.

Our vacation that we have all been planning and waiting for is here. Tomorrow most of us are planning trips and we hope that everyone will have a wonderful time. Drive safely so that our division will have a perfect roll call Aug. 15. . . . Ed Lauer was telling the gang a joke about some fellow in the division that he had previously worked in receiving a red esr from answering the telephone. But someone in the crowd must have heard the joke before, for all the while Ed was tslking he was unaware that he was sporting a green ear. . . . Our apologies to Don McCrea. We made the statement that he was the one overtaken by a lawn mower. The one we really meant was James McCray. . . . A belated birthday wish to Louise Lingrich and hope she has many more. . . . "This Couldn't Happen Again" is a good theme song for Almetta Smith. She shut the alarm off and decided on a few more winks of sleep. Her conscience must have bothered her, for when she awokc the second time the alarm clock was in bed with her. . . . If you would like to see into the future, see Madam Linsky of the winding section. Dan Reuille did, and if you can rely on her predictions Dan is going to bc a busy little man. She can see three wives in store for him and with this high cost of living too. . . . We miss that pleasant chatter since Lola Brunner went to second trick. Good luck, Lola. . . . Frank Clibon gets a bang out of mocking the girls the way they sing out for more wire. Their only comment is that he doesn't sound like Nelson Eddy, either. . . . Lena Forker's invitation was well meant when she offered to take Dorothy Linsky home the night of the rain. By the time they reached, the car, botb of them would have felt much better walking. . . . Wanda Grim has had a black paint job done on her car. Now it shines right along witb the best of them. . . . At the end of the second trick everyone makes a mad dash for home including Wade Bowman. But on the average of three nights a week he comes back after the lights have all been turned out hunting for his keys. We are correct, aren't we, Wade, it is your keys isn't it?

Office Offerings

We bid farewell to Mr. Bowman. It has been a pleasure working with you, Cliff, and we all wish you lots of luck. . . . Here are a few pleasant trips that the gang is planning for their vacation. Jim Wellman is going to Glacier National Park; Agnes Brunner, Miami, Fla.; Helen Deloff, Miami and then to Cuba; Therese Lindenberg, Michigan to fish; Howard Draper, Crooked Lake to fish; Bret won on his deal. It's Colorado again for the Youngs. Jim Voirol, Lake James just to loaf; Chris Starkc is spending one week at the lake and then they are entertaining relatives from Alaska. His son after spending two months in Alaska is also returning. Carroll Kane still doesn't know what to do witb his time. . . . And last but not least, Al Coxson. He's just going to take short trips. We don't know where but we did give him a few suggestions.

Heed your speed! A speed violation is reported in about one out of every three fatal traffic accidents. The faster you go the longer it takes to stop—and the harder you hit when you don't.

Children were "princes and princesses" for an evening, Wednesday, July 13, at the Elex Club picnic. West Swinney park became a wonderland of rides and food for the 195 small guests. To make the day complete, each child received a balloon and four tickets to the various rides. With an excuse to keep an eye on the children, 165 Elex members also attended the picnic to tryout the whip or merry-go-round.

Twelve Elex members were kept busy serving the 720 hot dogs and mountains of potato salad and baked beans. Free pop was also available to quench everyone's thirst. The young guests had such a good time that they wanted to know if and when the next outing would be. To answer the inquiries—it has been announced that there will be another picnic for the children next year.

Clarkson Named

(Continued from page 1)

Mr. Clarkson is a member of the Fort Wayne Engineers Club, the Chamber of Commerce, G-E Squares Club, and the American Institute of Electrical Engineers. His hobbies include fishing and woodworking. He lives at 910 Illsley drive, is married and has two children.

Graduate of Penn State

After receiving his BS-EE degree from Pennsylvania State University, Mr. Noble came to General Electric in 1904 as a test engineer at the Schenectady Works. In 1906 he was assigned to installation duties in the Direct Current division. He became a Design Engineer in that division in 1918 and later became connected with the development of automatic arc welding equipment.

Mr. Noble came to Fort Wayne in 1925 to be in charge of engineering of what is now the Motor and Generator division. Three years later he was appointed Assistant Engineer of the FHP Motor Engineering division, becoming Engineer in 1934. He has held the position of Manager of Engineering, FHP Motor divisions, from 1947 until the time of his retirement.

He is a member of Phi Delta Theta and Phi Kappa Phi fraternities, the G-E Squares Club, Fort Wayne Engineers Club and the Fort Wayne Country Club. He is also a fellow of the AIEE. Mr. Noble is an enthusiastic fisherman, having traveled to Minnesota for the past 10 years. He also has a complete woodworking shop in his home. Another hobby is golf.

Mr. Noble resides at 932 Kinnaird. His family consists of his wife, three married children, and two grandchildren.

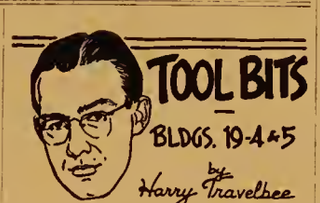
Stop, look and lessen grade crossing accidents. Slow up before the crossing, don't stop dead at it. If the train gives a hoot for your life, so should you.

My mind has been so filled with hospital visits, pretty little nurses, diets, other people in trouble, that it is hard to think that vacation time is here. (An 82-year-old mother with an emergency operation causes all kinds of worries). The crisis over and now there is time to look around for news, and what do I find? Everyone completely absorbed with their work trying to get caught up before today. Some places I saw piles of maps, others color charts for the painting that has been put off; advertisements for play togs, fishing equipment and some even looking wishfully at boat pictures. 'Tis said the joy of anticipation is even greater than the realization—now, that I do not believe! So, where ever and what ever you go or do on your vacation it is our sincere desire that you enjoy it to the utmost—only again let me say "Play Safe."

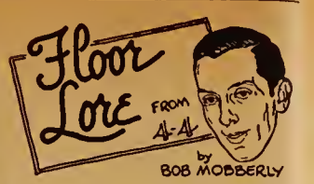
OUR CONGRATULATIONS: Herman Volmerding, Bldg. 18-4, has completed 40 years with General Electric. He started working for the Company in May, 1909, as a clerk in Order and Stores for R. D. Harding. Aside from time out in World War I he has been associated with the Order and Stores, cost and accounting and is now working under G. D. White. His friends in Bldg. 18-4 presented him with a very handsome billfold. . . . It was very pleasant having Grace Merchant of Taylor Street helping with the work in Bldg. 18-4. We all miss seeing her and incidentally she will spend her vacation in Yellowstone Park with her family. . . . We understand that C. H. Matson and his family will spend the vacation time at their cottage, Suttons Bay in Michigan. . . . E. F. Waldschmidt, Bldg. 18-1, and L. C. Swager, Bldg. 18-2, will be at Baldwin, Mich. . . . Robert Wylie, Bldg. 18-1, will go to Gatlenberg, Tenn. . . . Howard Miller, of Bldg. 18-2, will be cruising around, and J. E. Estabrook will go to Syracuse, N. Y. . . . More vacation plans—this time from Payroll, Bldg. 18-1: Elizabeth Carnell states, "I plan to drive to Cincinnati, then on home in West Virginia, taking my mother with me. I'll wear shoes, so I will be sure to remember how they feel." . . . Opal Burns reports that she and her husband are planning a trip through the southwest, plan to see the Ozarks, Grand Canyon and other points of interest. . . . Julia Waldrop will go to Chicago and then on to Adams Lake, Wis. . . . Juanita Spice has this to say, "My husband, daughter, sister-in-law and myself are planning a trip to Washington, D. C. The sister-in-law is Mrs. Harry Foster, who is visiting this country from England. Any message you want delivered to Harry will be relayed I am sure." . . . "I plan to spend one week in Jackson, Mich., and the other is for complete rest," reports Lee Strasser. . . . William Spahr will join the group at Baldwin, Mich. . . . Derrell Williams and wife will visit in Columbus, Ohio. . . . You can see the Payroll division will be on the "wheel." . . . Jean Rose and husband are on their way to Quebec for the vacation time.

GOODBY: Jean Ehring, Bldg. 18-1, will leave this week for a few months time out from G-E. We will miss you Jean, and let us hear from you. . . . BLDG. 18-3: It looks like vacation time will be a second honeymoon for the Howard Drapers. They are on their way to Niagara Falls. . . . The Fords, of Bldg. 18-3, are spending their time fishing and visiting Chicago. . . . Clara Tieshman just returned from a two weeks' vacation at Lake James. . . . R. Archbald is planning to paint his house—at least one coat. . . . OUR VACATION THOUGHT: "Fortunately, happiness is something that depends not on position but on disposition, and life is what you make it."

Schafenacker Completes 40 Years



Fred Schafenacker, Supervisor of FHP Mechanical Facilities, Tools and Supplies at Taylor St.; recently completed 40 years with the Company. At a luncheon honoring his anniversary, Mr. Schafenacker received a 40-year service certificate. Attending the presentation were: (l. to r.) George Auer, Tiffin Plant Mgr.; E. W. Lankenau, Decatur Plant Mgr.; D. H. Hanson, FHP Div. 33 Supt.; H. G. Siebold, FHP Div. 15 Supt.; Fred Campbell, FHP Div. 14 Supt.; E. F. Harmison, DeKalb Plant Mgr.; A. J. Rose, FHP Production Mgr.; L. W. Kuttner, Assistant to Mgr. of FHP Manufacturing; M. E. Lord, Mgr. of FHP Motor Divisions; A. W. Bartling, Mgr. of FHP Sales; Mr. Schafenacker; O. J. Mettler, FHP Div. 1 Supt.; Lisle Hodell, Mgr. of FHP Manufacturing; W. H. Franke, FHP Divisions 19 and 20 Supt.; R. C. Dennison, FHP Div. 17 Supt.; W. K. Williams, Assistant to Mgr. of FHP Manufacturing; H. E. Koehling, FHP Div. 13 Supt.; L. I. Asher, FHP Divisions Accountant, and H.E. Boles, FHP Div. 16 Supt.



It looks as though Div. 17 will be well represented in Northern Michigan during the first two weeks in August. Francis Thomas and family are going to a lake near Cadillac, and Tommy is taking his fishing tackle along just in case he gets around to do some fishing. . . . Fred Hagadorn is taking a trip to Wisconsin and the Upper Peninsula of Michigan and is planning to meet George Denner at Munising, Mich., and they are going to try their luck at some Great Lakes fishing. . . . George Bridges and Paul Horstmeyer are going to Michigan, too, but they are just going for the trip and said they would let the other boys catch the fish. . . . Marge Stodgell and Jean Harmes are going to Pretty Lake for part of their vacation, and then Marge is spending some time at her home in Kokomo. . . . Ed Schotter is going to southern Indiana to visit his mother and "eat a lot of blackberries" and then going on to the Smoky Mountains. . . . Dora and Everett Smith are planning a trip to Oklahoma and Arkansas to visit Dora's family. . . . I'm afraid Bill Caston won't have a very restful vacation because he is planning to paint his house. . . . Peggy Turschmann is going to have a rough job, too, she is going to WATCH her husband build a garage and paint their house. Do take it easy, Peg, and don't over do it. . . . Hugh Neely and Gordon Smith say they are going to just plain LOAF. If Gordon gets tired of sitting he says they might go to Chicago for a ball game or two and a stage show. . . . Hank Gollmer is expecting to move into his new house and have it all ready for the wife when she comes home from her visit to the hospital. . . . Norma Bastian, Ann Smith and Melrose Bryson are staying home (me too) and doing a little house cleaning. Ann's sister is coming to Fort Wayne for a visit from Alabama. . . . Ralph Dennison and family are also going on a fishing trip in upper Michigan. But Kenny Sheehan says he doesn't have to go to Michigan to catch fish, so he is staying home at Crooked Lake. . . . After Charlie Gable gets his kitchen remodeling done he is planning to take the family to the Indiana Sand Dunes for a few days. . . . Gene Foster and son Mike (two months old) are going fishing, but Gene says he doesn't know what else the wife has planned. . . . Have a nice vacation everyone, but do be careful, because we want to be sure and see you all back in two weeks.

Folks, that grand vacation time has finally arrived. So let's relax—think it over and really enjoy and have a nice vacation. . . . If planning a trip no matter where it might be, remember it will still be there even if you are a few hours late. No doubt you all hear it over the air many times a week. The life you save may be your own. So drive carefully and safely so at least you get there in one piece. If planning on fishing and swimming we think you know the rules. So play it safe and be among the living when we see you in two weeks. Folks, remember no matter what you plan to do always be ready to meet Him who created you. This is the most important of all. For eternity as you all know lasts forever. Now please take it easy so that we can see you all in a couple of weeks. . . . Our deepest sympathy to Mr. and Mrs. Alton Corson whose daughter died of polio.

Don Alcott says (and we all agree) that flat tires are very irritating and he has the blisters to prove it. He had a flat tire over the week-end and with no free air handy, so he had to use muscle power to pump it up. Good way to keep in shape. Don claims that there was only one thing wrong—he didn't have any dill pickles to refresh him when he had the tire fixed. . . . We are just wondering if there is any truth in the story that is going around that Myron Auer is going to play ball with the Laisies. That is, if they are still playing when his shoulder is healed. As you know, Myron dislocated his right shoulder in a softball game at Frankfort in an attempt to stop a run from scoring at the plate. See you on the diamond, Myron—but with what team? . . . "Nothing so refreshing as a nice nap," says Chet Stoner—unless it is the nice gentle way that Ray Mutton wakens him. It is a mystery to us how Chet can sleep through the noon bull session. . . . If good and plentiful equipment mean success in fishing, then Pearl Schoaf should come back from Big Star Lake with plenty of fish. He was telling some of the boys about all the tackle and fishing gear he and the Mrs. own and it is amazing. Among the latest is a couple new bait boxes that are tops. We even hear that the worms they carry in these boxes are guaranteed to catch fish. We hear you talking, Pearl, and it sounds mighty good. . . . We have been leaving the ladies out of the news lately, so let's start giving them a line or two. We hear that Chet Reynolds' wife has been reading so many ads advocating the large economy size that she decided to try the idea on a cake. As she finished one cake, she decided to bake another just like it to make two layers. It took all of her strength to carry it to the table and place it into the cake cover—only to find that the cake was about two inches too high for the cover. Economical though—one slice serves four people.

Since the lead article should be the most important one of any column, we are more than proud to begin this week's news with the item that Bill Putt has returned to the section after several months of severe illness. Everyone, and we emphasize EVERYONE, in the section is more than glad to see Bill back again and to know that he had the courage and determination to overcome his serious illness. We all join in hoping that the trip down the road to a healthy and happy life shall be yours from now on, Bill. . . . It was reported, and we do not hesitate to point out that we cannot verify its authenticity, but we understand that Nena Foster placed a new electric fan in her bedroom window the other evening. Came the dawn, Nena awoke to discover that the room had cooled off considerably. In the early light things are not as easy to see and poor Nena backed into the fan. Leaving her gown in tattered shreds that resembled a curtain. Nena, did we confuse gown and curtain? . . . We overheard Ivan Ford singing a currently favorite song to himself the other day, since he has his hair cut in the crew cut style. The song he was singing? "I Don't See You In My Eyes Anymore." . . . Clarence Didier proved a point in question to Margaret Parisot last week. Margaret it seems was having quite a time laughing at Clarence's expense, but just like the adage "He who laughs last, laughs the longest" Clarence did enjoy the last laugh, didn't he Margaret? . . . Proof that hot weather and summer is here is testified by Ray Smith. That Smith named Ray brought in some snake eggs for the Repair and Return group to witness. . . . Leon Radamaker was surprised at Voyce Brumbaugh last week when he noticed her face so red from rouge. Voyce, as everyone knows is very conservative when it comes to makeup, but we wonder what it was that Leon said to Voyce? . . . Since most people who write have a pet peeve about one thing or another, we feel we should voice one of ours. It is the telephone. This invention like so many others in this modern world was intended to make our life and other people's lives a bit easier and a little more pleasant. But like other objects, it is only as good as the people who handle it. The automobile is servant to nearly everyone, yet it can become, within a fraction of a second, an instrument of death when it is in the hands of a maniac! So it is with the telephone, it too can become a merciless instrument when people who use vile language over it and those few people who use it as a tool to create animosity among others. Once again it isn't the phone that is to blame, only the person using it without any regard for the feelings of others. . . . We understand Gladys Stahly has a reserved seat for special occasions! Who is in charge of those reservations, Gladys? . . . Old Mr. Stork gifted Nena Foster with a niece last week. Congratulations, "Aunt Nena." . . . We can't finish this column without a note about Walter Sollberger's latest name. Henceforth, Walt is known as "Money Bag Solly." Check him for further details.

Every year hundreds of motorists crash into the sides of trains. In no instance has the railroad been put out of business.

GENERAL ELECTRIC
NEWS SUPPLEMENT

Candid Camera

VOLUME 14 JULY 29, 1949 No. 7

G-E APPLIANCES STAR . . . "Shooting" starts on a series of Hollywood-mode films to help sell General Electric applionces. Taking part are, from left, Marge Horper, G-E home economist; Rosemory LaPlanche, director Gordon, and George E. Simons, G-E major applionce odvertising manager, Bridgeport.

IN THE LIMELIGHT . . . General Electric Lighting Specialist Marius Talentino, right, was interviewed by Al Nagler, Sports Director of Station WJBK, Detroit, on a recent television broadcast featuring the G-E lighting job at Detroit's Briggs Stadium, which makes it the best lighted baseball park in the world.

OFF TO THE RACES . . . Severol G-E men of the Fort Wayne Works ond their sons recently became model racing enthusiosts, formed their own club and erected a standard 25-foot trock. Here H. J. Murphy, left, and R. C. Dennison start their racer for a spin oround track. Some models hit speed of 70 miles per hour.

ON THE BEAM . . . This comely cyclist is displaying G-E's new automobile-type heodlomp designed for bicycles. The new seoled-beom type headlamp, which produces a beom pottern opproximotely 5 feet wide ond 30 feet long, results in sofer cycling after dork.

THREE LITTLE KIDS . . . Her two playmates provide plenty of entertainment for cute little 3-year-old Diane Dunton. She's the doughter of Ray Dunton of the Fort Edword, N. Y. Plant.

Syracuse Employees Vote to Improve

1. R. C. Goodwin, General Chairman of the MBA at Syracuse, first discusses employees' desires for revision with each Section Chairman. Here he talks to Martha Bracken, Receiver Division, and Earl Rogers, of the Transmitter Division. Several health plans were studied in comparison to MBA benefits.

At Syracuse recently, employees who belong to the Mutual Benefit Association voted to revise the Plan to provide greater benefits in line with increased hospital and sickness costs. The picture story on these pages tells how the improvements were conceived, discussed thoroughly by the MBA Committee members, and explained to all employees, who instructed their representatives to vote for the improvements.

Foresight and co-operation have resulted in the successful operation of many employee benefit plans at General Electric—Savings Plans, Pensions, Group Insurance, Health Insurance, Relief and Loan, Educational Assistance, and others. All have proved of untold value to thousands of G-E workers by giving them an economical means of providing protection against emergencies. Each year, the Company contributes millions of dollars to such benefits.

To keep these plans abreast of the changing needs and desires of members, surveys are made from time to time, and suggested changes considered. After the suggested changes have been explained to employees, they are then offered to members for their approval.

2. Each Section Chairman then discussed the plan with his section directors. Earl Rogers (back to camera) is shown talking to (from left) Emmett Valentine, Charles Miller, Mrs. Wilma DeGarmo, Leslie Craver, and Wallis Cunningham, about the suggestions.

4. Every employee was advised of proposed amended plan both by letter and announcement in the *G-E News*. Here Walter Guenther, Sam Rizzo, and Herbert Rousche study the proposal. Employees then discussed new plan with their Section Chairmen so that vote could be taken at General Committee meeting, which followed a few days later.

3. Based on these discussions, the MBA Executive Committee instructs General Chairman R. C. Goodwin (back to camera) to present proposed amended plan to membership. From l. to r. they are: J. P. Adams, R. F. Williamson (standing), W. J. Nealon and H. N. Blocher. A fifth committee member, Chester Kubic from the Utica Receiver Works, was absent for this picture.

5. General Committee of 16 Sectional Chairmen meet to vote on proposed plan. Here they cast their ballots. MBA Secretary Jeanne Vollmer is seated at left, and R. C. Goodwin, General Chairman, at right. Approval was unanimous.

Their MBA Plan

6. Applications for membership were distributed to each employee at Syracuse and Utica. Here the MBA Chairman at Utica explains new surgical benefits to three employees, Mary Pastorella, Frances M. LoScalo, and Josephine Corelli. MBA Chairman Chester Kubic is the second from the right.

7. Many employees, who had not previously belonged, recognized advantages of revised plan and joined. Here, in final step, signing up at Syracuse, are: Charles W. Myron (handing his application to Jeanne Vollmer, MBA Secretary), and Shirley Ann Ruth, both of whom joined the new plan.

8. In addition to a 40% increase in the disability benefit, the revised plan provides a 60% increase in Hospitalization payments, needed to cover the increased cost of hospital services.

9. Surgical benefits, up to $150, are entirely new in the revised plan; cover employee and dependents.

10. The maternity benefit for wives of members has been increased to $75 in any authorized hospital.

11. Special services, such as the X-ray illustrated here, have been increased from $15 to $25. Other new and increased benefits are part of the revised plan.

Candid Camera

READIED FOR TEST . . . Here a scale model jet engine compressor is being installed prior to testing at the General Electric Company's Lynn, Mass. Works. This model will be laboratory-tested for altitudes up to 70,000 feet and temperatures from 70 degrees below zero to 150 degrees above.

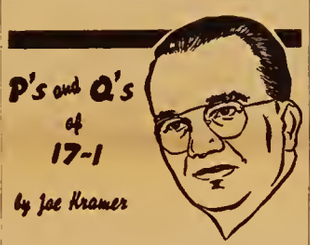
DOWN AMONG THE GOLDFISH . . . At recent Radio Parts Show in Chicago, an entire General Electric record player and two loudspeakers were completely immersed in a goldfish bowl. To prove that the units were really operating, model Beverly Long picks up speaker, directly connected to the phonograph.

CAN YOU TOP THIS? . . . The Fort Wayne Works is laying claim to having the woman employee with the longest service in the General Electric Company. Bessie Chapman, above, boasts a record of 43 years of service with the Company.

RIDING HIGH . . . The Kyrat Polo team, composed of G-E employees of the Switchgear Divisions, Philadelphia, goes into action as polo season opened recently. At left, these G-E girls pause before path ride: Alice Leighton, Stella Zlatkus, Jean Pacitti, Mary Waters and Mary Dunn.

MOTOR and GENERATOR

Static



Thought for the Week: "If you want to be beautiful, sweet, serene and lovable in your old age, better begin now. That result is not attained at the last minute."

ODDS AND ENDS . . . You can't appreciate home until you have left it; money until it's spent; your wife until she's joined a woman's club, nor Old Glory until you see it hanging on a broomstick on the shanty of a consul in a foreign country. . . . Looking around the office at the various sunburns, kinda reminds you that maybe they have given the country back to the redskins. . . . Hope all of you have a nice vacation and return safely. As for your reporter, I intend to make a front porch campaign of it. If anybody wants to run over yours truly, they have to get me on the front porch. . . . PREPARED: We are willing to bet that Bert Spencer's boyhood companions in the old "Skunk Patrol" will be proud of our Bertram when they read this story. The Boy Scout motto is "Be Prepared" and Bert believes in following that teaching to the limit. Last Sunday, Bud Fisher drove to Clear Lake in search of a cool spot and after arriving met Bert. The usual greetings were exchanged and Bert inquired if Bud had been swimming. Bud replied that he didn't have a bathing suit. Sez Mr. Spencer, "You should be like Boy Scouts, always prepared." Saying this Bert began removing his clothing, much to the embarrassment of Mr. Fisher and the ladies who, knowing Bert, didn't know what to expect. "See," said Bert, displaying bathing trunks under his trousers, "I was in about an hour ago." . . . THERE IS: Speaking of Boy Scouts, Art Druce and Lyle Daugherty met a man who evidently remembered his boyhood training. The Rover Boys were returning from the lake, and Lyle probably thinking of the fish he didn't take from the lake, forgot to check the gasoline supply. As a consequence at about 11 p.m. and several miles outside Waterloo the car came to a stop and the boys started their trek in search of gas. After they had walked quite a distance down the highway toward Waterloo, a motorist drove alongside and inquired, "Are you boys having trouble?" When informed that they were, he backed his car around Lyle's and pushed them into Waterloo. That should convince skeptics that à spirit of courtesy still exists among motorists. P. S.: May we suggest that in the future, the Rover Boys check their gas. Next time they may not be so lucky. . . . QUIET: Since Jim Mitchell is on leave of absence and Pappy Archbold is taking his extra week of vacation, things are so quiet you not only can hear a pin drop, you can hear some of the boys drop off to sleep. . . . LIFE'S TRAGEDY: From "Junior" Brosius, raconteur of Bldg. 31-1, we received the following story. Charley Fisher, who lives out Laotto way, came to work the other day in a happy frame of mind. He sat down at his desk, thrust his hand into his pocket and the look of happiness was replaced by one of consternation. "What will happen to me shouldn't happen to a dog," he remarked, "my wife has to use the car today, and I carried the only set of keys to work."

Volmerding Has 40th Anniversary

H. F. Volmerding, Purchasing and Stores section, in Bldg. 18-4, recently celebrated his 40th anniversary with the Company. On this occasion he was presented a certificate denoting his long service at General Electric. Present at the time he received the certificate were: (l. to r.) Fred White, R. L. Flightner, E. T. Dahlin, Paul Lenz, Mr. Volmerding, H. S. Shields, C. H. Starke, G. D. White, Purchasing Agent, and A. E. Leider, Mgr. of Production Service division.

The advanced scouts for vacation information have just returned and we are happy to report road conditions and fishing are very good. . . . Scout Ed Arthur and Henry Wichern investigated the possibility of catching fish the past week. Ed traveled to Wisconsin and returned a card saying the fish he caught weighed up to 5 pounds. Henry returned and has reported that there are still plenty of fish left to be caught. He was noncommittal about his experiences fishing. . . . The scout we sent to investigate road conditions was Paul Geiger and he reports conditions of the roads in the South are very good. Also that the Smoky Mountains are still in the same location. . . . We are sorry we won't have a report from George Mosshammer on conditions in Chicago as he is spending this week there. George is going to see all the high spots, including the Railroad Fair and other places of interest. He will spend a good part of the time at Roselawn and also he is going to visit Gary. . . . Ed Brosche is traveling to Florida to check on a lake located just outside of Orlando to see if a hurricane has blown the lake dry lately. . . . Ted Brockmeyer and his wife Alice of Bldg. 17-3 are motoring South to Mammoth Cave and other parts of interest in Kentucky and Tennessee. . . . Andy Degler is going to spend his vacation picking fruit. Andy says the heavy crop this year is due to his scientific pruning of trees this spring. . . . Cliff (Tidy) Coombs is going to spend his vacation in Fort Wayne. Cliff had consulted the almanac and discovered fishing for those two weeks was not going to be very good, so he rented his cottage out for the vacation period. We imagine Cliff left that new G-E refrigerator full of frozen fish for the renters. . . . Curly Sprague is going to spend his time teaching his boy to use a sling shot which Curly has perfected in the past six months. . . . Bill Franke said he doesn't have any definite plans, but will probably take a motor trip east into Pennsylvania. We wonder if the Dodgers will be playing in Brooklyn that week. . . . Bill Grimm is motoring Southwest to visit his father-in-law. . . . If Gerry Humbarger can regain his strength or horrow a hoist to take on his vacation, he is going to do some fishing. Gerry reports the kind of fish he catches require a lot of strength to pull them in. . . . Anyone wishing some company at the lake should contact Clarence Doctor. As yet, he hasn't received an invitation and would appreciate spending his vacation with someone at the lake. . . . We know that a straight line is the shortest distance between two points, also that as a crow flies the mileage is considerably reduced. Now, Ed Arthur reports that it is only 80 miles to Knoxville as the Hudson rides. . . . We are glad to welcome Bob Kessens to Bldg. 17-1 organization. Leo Nyboer would like for Bob to quit smoking those gas-filled cigars or turn off the fan in back of him so that it doesn't blow the air over to Leo. . . . Frank Gitter and Loyal Decker are going to spend considerable time sampling the beef they put in the deep freezer the past week. . . . Whether Ernie Riley is going to California this summer or not is a question. It was reported in early spring that outside pressure just about had Ernie convinced he should make the trip to California. There is no late information available at the present time. . . . Eddie Kronmiller is going to the lake the first week and intends to spend two or three days of the second week in Chicago. . . . May everyone have a pleasant, safe and enjoyable vacation. Will see you again in two weeks—have a good time.

Vacation time is here again and everyone is hoping to enjoy it, each in his own way. Some will stay home to do the things that have been accumulating, others will just rest. Those who own cottages as well as those fortunate enough to be able to rent accommodations at the nearby lakes will spend their time relaxing there. In this group we find Herb Franke, who will be at his regular spot in Rome City; True Sheets at Pretty Lake, and Ray Lepper, fishing of course, in Gilead Lake. . . . Hilda Walda expects to catch the limit at Evans Lake in Michigan, and Ed Glusenkamp goes on up into Wisconsin to try his luck. . . . Gladys Elliott will visit relatives in Wisconsin, and Mary Stewart plans to fly to North Carolina to be with her sister. . . . Al Sonnenberg is driving through Wisconsin to see the Dells, up to Duluth, Minn., and back via upper peninsula of Michigan. Roy Blessing plans a similar trip though longer which will extend into Canada. . . . Erna Mann is accompanying a conducted tour through Colorado. Virginia Gebhart and her husband are driving to Colorado; and Irma Miller and her party expect to see Yellowstone Park, Salt Lake City as well as stops in and around Denver. Bessie Potts and her husband will drive to Long Beach, Calif., to spend their vacation with a daughter. Your reporter will visit her brothers, one in Colorado and another in California. . . . Helen Hardy will accompany her family to Philadelphia where they will visit relatives, and Betty Williams and her sister are taking a trip to Niagara Falls. . . . To Herschel O'Dier, who is recuperating from an operation, we wish a speedy recovery.

George Myers is spending his vacation in Michigan. . . . Wanda Bailey has been on the sick list. . . . William Heim was a recent visitor at the office. . . . The new test engineer is L. Max Lane. . . . As of July 21 Lohnas McIntosh is the proud father of a baby girl. Congratulations, Mac. . . . Christine Andrews doesn't drive very much, but the day she drove back to work, it turned out wrong for her or we should say the other driver turned out wrong—result, two cars colliding. . . . Our sympathy is extended to Jim and Harry Staley on the death of their brother-in-law. . . . Paul Hancher is going to spend his vacation in Michigan. . . . William Kohls was a proud grandfather this week. Bill says he now has in his family a daughter, son-in-law, and a granddaughter born on July 20. . . . Everyone probably knows by now that Frank Braun has purchased a red Oldsmobile. The other day "Braunie" told Mina Lampy to look over his new car when she went home as it was parked beside her Nash. So after work Mina rushed out to see the Olds but there wasn't any red Olds at the side of the Nash or any in sight. Next day Mina asked "Braunie" about not finding his Olds beside her Nash the night before. "Braunie" said he has become so accustomed to walking that he forgot he had walked and left his car at home. In fact, Mina is almost sure it will be sometime before "Braunie" gets used to driving instead of walking. Now the only thing that is in question is just how many miles do you get to the gallon, "Braunie"? . . . Oh yes, Ralph Roop, Tool Room, is finally proud to say he now has a granddaughter. . . . Our sincere sympathy to Rolla Jackson upon the death of his wife. . . . We wonder how Rita Wellman can get her work out on Thursdays. She claims it's so-o-o-o easy. . . . The Chevies have it this week. Zula Holloway and hubby are purchasers of a new black Chevy. It sure is going to be nice driving on their vacation trips. . . . Why was it you went to Celina last week, Reva? Was that trip necessary? Anyway hope you had an enjoyable evening. . . . Leonard Meyer is a regular attendant at the Geels Music Ranch. Is that what keeps you so supple, Leonard? . . . Till her Walt comes Leona Tinner is counting the hours. . . . What do you make of a situation like this when a fellow employee goes frog hunting and comes back with three legs. Could it have been a freak or do you think there was a stripe in the back? Jay Moser, is that the way the frogs are out your way? . . . Ercie McConnell and family will be vacationing at Spider Lake, Minn. . . . The John Owens family are also at Spider Lake, Wis. . . . The "Berne Irishman" Sweeney is back on end play throttle operation. How about some of those Irish whistling ditties again. . . . Pat Girod claims she won't have to get ready to go anywhere for the next two weeks. She's probably enjoying vacation at the little homestead. . . . Emma Goldner, are you going to ride the ski lift again this vacation? We hear you are going East again with your family.

When you take a chance in traffic, someone else might have to take the consequences.

Thought maybe you all would like to know how your fellow coworkers are going to spend their vacations so we did some asking and here is what we found out: Gilbert Walker is going to California and we do hope he doesn't stop off in Michigan and forget to go on. . . . California also beckons Melba Flanders, Gloria Mechling, Carl Metker, and Ardola Johnson. . . . Louella Hockemeyer is going to Nebraska, Colorado and Texas. . . . Martha Scherzinger will vacation at the Dunes in Indiana on Lake Michigan. Also going to Michigan are the Louie Clarks, Margaret Hilgeman and her husband, Emery Tucker and Eva. They all think the fishing is better up there. But Reggie Eggeman will spend her time at Lake Gage, Evelyn Payer at Lake Pleasant, Alma Doctor at Adams Lake, Henrietta Deck at Ridinger Lake, and Florence Rekeweg intends to do some fishing at several lakes. . . . Paul Ginder is going to Minnesota to catch his fish. . . . Speaking of fishermen, Donna Lindly showed them all up when she caught an 11-inch bluegill at Hogback Lake. . . . Lorinda Byerlein and Kathryn Hepker can be found at the Smokies, as can Louie Souers and his family. They are going on East then. . . . Frank Buhr is going to Washington, D. C., to see his daughter. . . . Malinda Gehle will be enjoying the wonderful views of Colorado and so will Grace Ober. . . . Elsie Frede will be visiting relatives and friends in Missouri, and Hazel and Chris Stauffer are visiting friends in Arkansas. . . . Tom Dickerson will be in Chillicothe, Ohio, with relatives. . . . Helen White will spend a week at Hamilton Lake, and Merle Keesler can be seen in Danville, Ill., for several days and then later at Lake Gage. . . . We wonder if Margaret Hilgeman is taking her piano along on her vacation? . . . Ralph Gilbert is going to spend his vacation at Tommy's Beach (Broadway and Taylor.) . . . Henry Grepke doesn't have to worry about this hot weather when he's riding in his new Ford. They say he wears his overcoat when driving. Anybody wanting to buy gasoline for 20 cents a gallon should see Henry. Since he has that new car it makes more gas than he can store! . . . I guess Al Rebber turned out to be a pretty fair cook. . . . Louie Barrow is looking for extra work during his vacation, he wants to get in practice baby sitting, anything 18 years and younger. . . . Ed Boedeker says that he is going to do a lot of painting in the next two weeks. Watch that paint brush, Ed, $8 paint brushes are hard to get, and also watch that hot sun because we want you back in two weeks. . . . The boys in Test and Inspection wonder where Waldemar Schmidt is getting all his money. We hear he is giving $100 bills away. If you have that kind of money to give away how about putting four or five under Alva's door some night and then ring the doorbell? . . . Pondo has a very happy expression for Monday morning. I suppose it is because of that nice two weeks that is coming up, or did you find your voice again and plan on taking up singing again? We hope it is about the two weeks. . . . Herb Braun doesn't look like Waldemar, but I think we will call you Smitty just the same. How about $100? . . . We wonder what kind of tricks Nahrwold is going to teach the baby on his two weeks. . . . Say, Les Hubbartt, will you please make your fish stories believable when you get back from that fishing trip? . . . We suggest that Carl Harmon had better get that car or he will have to get two new pairs of shoes in place of one. . . . Harry Berry says that it won't be long before the boy will be able to carry him. . . . We are wondering how Elmer Koehlinger's car runs. They seem to get along fairly well together. . . . In case you ever make any porcupines for dinner don't ask Thelma Wyss for the recipe. Last week she put one-half pound of hamburger for each pound of rice. Anyone like rice? . . . We all miss Marie DeVaux who has been transferred to Bldg. 4-5. Come back and see us, Marie. . . . A very happy birthday to Mildred Gaffen. Mildred Coleman, Gertrude Bender and Flo Gilmore. . . . If you want any pointers on square dancing just ask Eleanor Kohrman, who is a pro. I hear Irma Huhn knows her stuff, too. . . . Florence Byers' daughter Phyllis had her picture in the brown section the other night. She won a bike on kids' day at Swinney Park. Anyone want to buy her old bike. It's in good shape. . . . I wonder if Dr. Soest still has chickens. No one has heard lately. . . . Marie Griffin and Marie Martz will be found at home most of the vacation time putting the finishing touches on their housecleaning. Clara Patterson and also Florence Byers can be found at home. Everyone else I talked to either was going to stay at home and rest or take short trips here and there. It has been suggested that Clarence Renchler let his wife go away for a vacation, and he stay at home and take care of the children. . . . We all wish a speedy recovery to Freda Farley, who is in the hospital recuperating from an operation, and hope that Elihu Lee is well on the road to recovery. . . . My advice to all is that you make the best of your vacation, enjoy it to the fullest 'cause there won't be another until next summer! . . . P. S. We were very much worried through most of the last week for fear the good record of the above scribe would go by the board. It seems Helen's brother-in-law came in from the lake cottage after some clothing and by mistake picked up Helen's clean laundry she had dampened down for ironing. Although she finally got things pretty well straightened out, she is still looking for a beach towel that seems to have disappeared. However, we are satisfied now that Helen won't have to use all this week's pay in order to be presentable for another week.—Signed, THE INNOCENT BY-STANDER.

600 Fort Wayne Children Receive Treatments To Stop Dental Decay

"Say ah!" About 600 Fort Wayne and Allen County children did—and at the right time and place, too! As a result there are going to be less aching teeth among the small fry. At least that's the idea behind the mass application of sodium fluoride treatments currently being administered under the supervision of the State Board of Health at the YWCA.

Two of the youngsters who will benefit by the treatments and the resultant reduction of dental decay are shown here. They are children recommended for such care by Hospital and Home Service. This Red Feather agency of the Community Chest was instrumental in bringing the demonstration unit to Fort Wayne and has planned and carried out the details necessary for its operation. Four treatments are given to each child. A dental record is kept and parents are advised when dental defects are found.

The demonstration team consisting of a dentist, two dental hygienists and a clerk, arrived in Fort Wayne and commenced treatments at St. Vincent's Villa and at the Allen County Children's Home. Then they moved into the YWCA gym and went to work on their biggest job administering treatments to about 70 children each day. The Girl Scouts, another Red Feather service, helped in keeping the children amused and quiet while they waited their turn in one of the three dental chairs set up in the gym. That's the modern scientific approach to stop that "little ache from growing into a big pain," and eventually cutting down on the number of dental caries in children's teeth.

Hospital and Home Service also has a dental clinic which last year provided dental care for more than 300 children referred by schools, doctors, and other Community Chest agencies.

We could sum it all up by saying —less holes in the teeth—more money in the family budget—and better health for the little guys and gals that are growing up in Fort Wayne.

This is No. 1: Betty and Franklin Ross will celebrate their first wedding anniversary tomorrow. Mr. and Mrs. Norm Oetting will celebrate theirs Sunday. . . . **Golfer's Gab:** Nate Horton bowed to Hugh Folsom in golf last week-end. Now Nate has to carry both bags and shine Folsom's shoes for two weeks. . . . **Birthdays:** Congratulations to Betty Ross, whose birthday is Aug. 1 and Thelma Voirol, whose birthday is Aug. 4. . . . **Wee Bits (not wabbits):** Lou Davis is sporting a new Pontiac. Congratulations, Lou! . . . We are most happy to report that Bob Loveland returned to work after a two weeks' vacation—fishing he said—but no stories. At least he didn't fall in. . . . Happy to have Lee Beard back from a two weeks' vacation in Mexico. . . . We want to wish a happy vacation to Ray Jones and family, who are traveling to California and various points of interest, including Yellowstone, Grand Canyon, Estes Park and Yosemite Park. While in California Mr. Jones will present a paper at the summer AIEE Convention. . . .**Auld Lang Syne:** P. O. Noble was honored by the female alumni as well as active workers in the FHP Engineering Division at a picnic luncheon last Monday noon at Foster Park, in honor of his birthday and approaching retirement. The gals presented him with a very handsome fly rod with this central thought in mind—Congratulations, Paul. Good luck in your future endeavors. We all hope you've enjoyed being with us. We've loved every minute of it. . . . **Reward:** For information leading to the apprehension of the person or persons who plugged in a heater under Ernie Hick's desk. Warm—eh, Ernie? . . . Happy Vacation, everyone!!!!!

Only one ad per employee may be inserted. Each ad must be limited to 20 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday Noon, August 15, 1949

LOST AND FOUND

FOUND—A necklace made of 18 strands of yellow beads. Found in front of Bldg. 18.

FOR SALE

COAL OIL RANGE—Five burners, right hand oven, excellent condition. A-16161 or 1612 St. Mary's Ave.

FRYERS—3½ to 4 lbs., $1 each or $11, dozen; ½ mi. north of Markle, Ind. or Pbone Markle 100-OR.

REFRIGERATOR—G-E monitor top, 6 cu. ft., like new A-69261.

GIRL'S BICYCLE — Good condition, painted blue and white. $20. H-89506.

100 WHITE ROCK AND NEW HAMPSHIRE PULLETS—Six mo. old, commencing to lay. $1.76 each. A-98109.

BEAGLE PUPPIES—Eligible to register. A-19958.

BLACKBERRIES AND SWEET APPLES—H-46047.

CUSTOM BUILT CAR RADIO—For '41-'48 Plymouth. Never Used. Make me an offer. 4107 Lillie St., H-02163.

MAN'S BICYCLE—$18. H-67594.

MISCELLANEOUS

GENERAL HAULING—Gravel, crushed rock and cinders. H-78313.

THANK YOU NOTE

I WISH TO THANK MY MANY CO-WORKERS—At Broadway and Taylor St. for their thoughtfulness. Carl (Slim) Fuller, General Service Div.

Apprentice BROADCAST

by MILDRED ELLIS

The question of the day—What are your vacation plans? Here are a few of your fellow apprentices plans: Dick Frede is going to the lake to do a little fishing the first week and plans to spend the second week at home working in his garden and doing some painting around the house. . . . Don Miller plans to take his wife on a trip through the Smokies and on to Florida. . . . Bob Finton plans to enjoy himself at home and will go to visit some relatives in Cleveland. . . . Mr. and Mrs. Richard Sebold plan to spend a few days fishing, a few days in Detroit and the second week sightseeing in New York City. . . . Paul Wuttke will be taking a two weeks' summer cruise in the Marine Corps Reserve at Camp Lejeune, N. C. . . . John Leffers will take his wife to the beautiful vacation lands of scenic north Michigan. . . . Fred Borton has planned a trip to northwestern Oklahoma where he will do some fishing, range riding and loafing while his wife shows off the baby. . . . Frank Woenker and family will spend a week at the lake, and Frank hopes to take in a couple of big league ball games. . . . Bob Birkenbeul is planning to go to Pennsylvania and hunt bear with some of his ex-army buddies. . . . Homer Carson plans to spend his vacation taking various motor trips with special emphasis on the skyline drive in the Smoky Mountains. . . . Dick Wagner will spend his two weeks fishing in upper Michigan. . . . Carl Hubartt plans to get lots of work done on his house and will still find time to go fishing and sailing in the new boat. . . . Harold Fremion is taking a trip to Kansas City and Denver to visit some of his old army buddies and will end up in Cheyenne, Wyoming to see their great "Frontier Days." The second week Harold will spend at Pretty Lake resting up for summer camp. . . . Garland Roby plans to take his family to Columbus, Ga., where they will spend two weeks visiting one of Roby's army buddies and family. . . . Ronnell Allen plans to go home, (Covington, Ind.) and will do some fishing and just take life easy. . . . Warren Berkheiser is planning a trip to the lake where he will do some fishing. . . . Second Lt. Warren Brown will head an advanced detail of men to make preparations at Camp Atterbury for summer camp. His specific duties will be preparing the camp site which will consist of readying the buildings, cutting grass and putting up "Officers Country" sign. Brown says he will endeavor to inspect the golf course and officers' club daily. First Lt. Wayne Bergman may accompany Second Lt. Brown on his tour of duty. Lt. Bergman is transportation officer. His duties will be concerned with motor transportation. . . . Milt Goeglein and family plan to go to Wisconsin for a few days. After they return Milt will work on their house. . . . Merle Aughinbaugh will go on a two weeks' fishing trip on the Manistee River in Michigan. . . . Everett Schmidt will play the role of full time carpenter and plumber during his vacation. Our hats off to one of our country's new pioneers. . . . Hillard Butcher will really live his vacation. He plans to relax around home—reading, eating watermelon, drinking lemonade and romping with the kids plus a sprinkling of visits to the aunts and uncles. . . . Dick Reinking and friends will head for the West Coast. How far they will go nobody knows. . . . Kenneth Zurbuch, John Clendenen, Emmett Rasor, and Joseph Raupfer plan to spend their vacations at home loafing and getting lots of little odd jobs accomplished. . . . Mark McNulty and family will spend their first week at the lake fishing and spend the second week cleaning the fish they catch the first week (?). . . . Joe Rowan plans to spend his first week at the lake and the second week he will go to Chicago to see an all star game and to visit an old army buddy in Ohio. . . . Jack Kirlin and family plan to take life easy. They will go to the lake and sail their new boat. . . . Lew Davis and wife are planning a big trip to San Jose, Calif. They plan to see the Yosemite National Park and the Rocky Mt. National Park. . . . Ralph Obringer plans to get lots of work done around home the first week and will spend the second week at the farm. . . . Myron Auer will take an extended vacation, pitching horseshoes, fly casting, playing baseball, eating—all activities to be done with the left hand. . . . Charles Mowery will spend the first week getting ready for the big day when he will marry Esther Geels Saturday, Aug. 6. . . . Mr. and Mrs. James Hoppel will be honeymooning for the two weeks.

All those who were not at the office picnic at Pokagon State Park the other Sunday missed a good time. The baseball game was really a "doozy." I haven't been able to find which team won, but Vera Kruge insists her team was always one run ahead no matter how many runs were made. Frank Treece says his team won also by one run. Florence Casey was the scorekeeper but she said she forgot to count the runs. Which team paid you what, Casey? . . . Faye Jordan has decided to give up baseball and take up card playing as a hobby. She only got to first base twice but was still suffering the effects four days later. . . . Florence Casey decided she really could swim if she could keep from bumping her knees on the sand. Wonder where she was swimming—in the lake or in a kiddie's pool somewhere. . . . Herb Jesse promised to do some singing at the picnic, but he spent most of the time on the beach sleeping or else just resting. What's your trouble, Herb, getting old or just tired? . . . No matter what Florence Casey does she always has a problem. She bought a car last week and now she is spending all her spare time trying to find a place to park it so she won't get a little red ticket. She's had several suggestions but none is the solution. Butch Vegalues told her there was plenty of parking space at Municipal Beach. Someone else suggested Zollner's Stadium. Be patient, Casey, maybe someone in the neighborhood of Parkview will build a garage and rent you part of it. . . . I found out why Herb Jesse was wearing his watch on his right wrist the other day—it was a reminder to make a phone call. To me, that seemed rather funny. He never forgets to bring flowers to members of the fairer sex. . . . We extend our deepest sympathy to the Ray Girvin family on the recent death of Mrs. Girvin's father. . . . The Grinding Room gang received a letter the other day from Jim Laisure. We're glad to hear that Jim is home from the hospital and well on the road to recovery. . . . It won't be long before all of us will be starting on our vacation. Have fun, be careful, and hurry back safely.

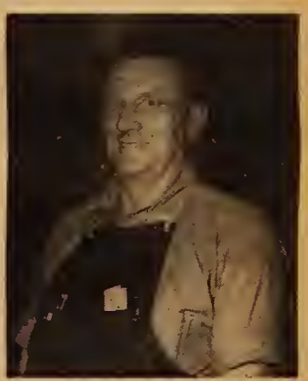
"A man who trims himself to suit everybody will soon whittle himself away."

It was our aim to tell you where everyone on the entire floor was going to spend his vacation but since this was a quite a task and space would not permit the listing of all in one issue we will give you the ones we were able to contact and try and give the balance after vacation. Among the interesting trips planned are those of Nolan Geyer and Erv Lange. Erv and two companions are going to Canada on a fishing trip and after traveling as far as they can by car they will board a plane that will take them to a lake that can only be reached by this means. There should be some fish in such an out of the way place as that, and we will be expecting a big fish story when you come back, Erv. Better take a few pictures for proof. . . . Nolan Geyer said that he is going up into the northern woods of Canada just as far as he can go and is going to stay the entire two weeks. Working in the Punch Press section one can readily understand why he would want the quietness of the woods, but the question is how will he be able to stand the din after the two weeks are over? . . . The others we have classified as follows: FISHING TRIPS Art Maske and Marvin Rutz in northern Wisconsin. . . . Jerry Koehl, Max Clum and Fred Fenner in Michigan. . . . At the Indiana lakes, Herman Wegman, Don Kinn, Don Myers, Homer Hill, Don Shroyer, Gene Wheeler, Archie Evans, Paul Bender, Don Witte and Dave Slater. . . . RAILROAD FAIR IN CHICAGO Bob Esterline, Frances Grimm, Vance Burnau and Paul Koldewey. . . . MOTOR TRIPS Glen Keck, Jack Dobson, Walter McCormick to eastern states including the large cities. . . . Cliff Dowden and Carmilita Fough on southern trips. . . . REMAIN AT HOME. We found quite a few for various reasons are staying at home this year. Al Knight, Frank Valentine, Roy Chapman, Dick Raber, Lena Shaw, B. W. Breeden and Jeanette Blough. . . . Joe Haas will spend the two weeks at Camp Le Jeune with the Marine Reserves. . . . Charley Grim and wife bid their son, Charles, Jr., farewell last week. He is on his way to Germany to serve 31 months with the Army overseas. We wish him Godspeed and trust that his parents will soon be reconciled to his absence realizing that 31 months isn't forever.

As everyone is getting ready to go on vacation, the talk is where everyone is going and what they are going to do. . . . Mr. and Mrs. Verne Dafforn are the proud parents of a baby boy named Jackie Lee. Congratulations, Verne. . . . The report of Wayne Coak who was in an automobile accident is that he is improving slowly and would be glad to see any of his friends. The co-workers wish him a speedy recovery. He is at the St. Joseph Hospital, Room 217. . . . We hope to see Jean Parrish back with us soon. She recently went on a sick leave.

Inquiring Reporter:

WHAT ARE YOU PLANNING FOR VACATION?



MARY MILLER
Decatur

"I'm spending my vacation at the Wisconsin Dells."

GWEN STIENBARGER
Bldg. 4-6

"I'm taking an Atlantic voyage. I sail from New York on the Queen Mary to my native land in North Wales, Great Britain. I know it will be a most glorious vacation. I haven't seen my parents for the past three years."

LUTHER CHILDERS
Taylor St.

"I want to catch up on my work around the house. The first week, I'm remodeling my garage; and the second, I'm figuring on resting and driving up to the lake."

EMMA D. LYTAL
Bldg. 26-4

"I hope to stay home and sew curtains. We are planning on a trip later. There will be plenty of activities in town, as the State American Legion convention will be held in Fort Wayne."

MALCOLM D. BENDER
Bldg. 19-3

"I'm going to take my wife and family on a fishing trip in northern Michigan."

Yippee, it's here! Now all those vacation folders can be put in purses and glove compartments, as everyone starts out for two weeks. However, Maude Goodrich and Pete Heckler jumped the gun a week. They started their vacation this week. (Lucky third weekers). . . . Bob Walt had his first week last week. . . . Let's have a safe two weeks. Don't try to put a year's relaxation in two weeks. It won't work. . . . By the way, I see by the safety board we have had 199 days without a lost time accident. Bet Hap Hazard is down in the dumps over that. Let's try now for 299 days. . . . Bertha Furge hopes that the mice take a vacation too and forget to come back. . . . Leona Scott, Zelma Woods and their husbands are heading for the West. . . . Betty Pressler and husband are New Jersey bound. . . . Dorothy Johnson and husband are going to Rice Lake, Wis. . . . Violet Adams must be going to the moon. She has a new rocket Oldsmobile. . . . Hedy Harrison is going to Tampa, Fla. (Hedy, will you please sit on one of those nice green benches and rest for me?) . . . Virgie Mayer says that the extent of her travels will be a half mile up the Wabash river. Don't get lost! . . . Marie Dunfee is going to swing a paint brush and do her kitchen. . . . Harold Kiel and Erv Lange are also going to paint. That's all the plans that we have heard about at the present time. Hope everyone has a very good vacation. . . . Most people fall out of bed when the alarm rings. Thelma Oswald is different. She falls out of bed at three o'clock in the morning. . . . What is this we hear about Ivan Voirol's lunch bucket being a trading post? . . . Mary Wright has joined the "I gotta new car" club. It's a Nash. . . . Betty Pressler can't watch her figure and eat home made apple pie a la mode. Or can she? . . .

At last! It's here! "VACATION." The boys and gals of Distribution are going to be spread out all over these United States if all the vacation plans revealed are carried to completion. . . . Mr. and Mrs. Clarence Smith announce a new arrival. A brand new shiny Pontiac, and the Smiths are as pleased as punch. Mrs. Smith is our bubbling little Hazel Smith, in case any of you didn't recognize the more formal name. . . . Happy birthday last Tuesday to Xercie Sinish. Also, since we will be missing the WORKS NEWS for two weeks we will just wish a happy birthday to the following boys and gals who are having birthdays during the vacation shut down: They are Anna Sommer and Bob Jellison. Ah, ha, for once we got our wishes out ahead of that special day. . . . Seems that Xercie Sinish really showed the gals a good time over the weekend which they spent as her guest at her lake home. The main topic of conversation was what a terrific fisherman Lenore Hanley turned out to be. . . . Here's hoping you all have the grandest time ever on your vacation.

Lowella Koogle was house hunting in Bloomington again last week. . . . Last Monday Leona Hollis came to work on a wing and a prayer, plus a Model T Ford. Of course, she had to get out and push awhile, but she made it and only one minute late. . . . We think Esther Reiter and Julia Heuer should see about some new tires. Then a flat won't cause them to miss the bingo game. . . . The gal who wanted the grass catcher has one now. But we saw where she had a bandaged toe. She not only cuts the lawn, but her toe nails at the same time. . . . Did you see the mess of fish that Bill Martin had? I do mean mess—all bones. Joe Jensen would like to know where they catch that kind. He is going some place else to fish. . . . It's a happy birthday to Mary Jane Lockner. . . . Our sincerest sympathy to Berdella Welsh in the death of her sister.

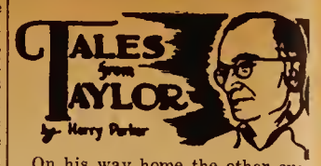
General Service SHORTS AND SNORTS

By Helen McOmber

Hi, everybody, I'm your new scribe! So I can't write! You don't have to tell me, I know it. So you're on vacation and don't want to read the WORKS NEWS anyhow. Good! That gives me a couple of weeks to practice. Only I don't expect to practice because I'm going on my vacation too. . . . Katie Steinman did a wonderful job on this column, I guess you all know. I hope I can continue to dole out the news as well as she has. . . . It's here, that vacation that everyone dreams about. Roger Pierson's dream is over, but he has his memories. He returned from his vacation last week to get back to the old grind. While spending time with relatives in El Paso, Texas, he witnessed a bullfight, visited Juarez, Mexico, and tried to mount a donkey. The latter must have been quite interesting. When he had finally maneuvered himself into an upright position, he found the donkey's tail where the head should be. (Only kidding, Roger.) . . . Rosie Thomas and Lois Ulrey are going to spend some of their time at the lake, taking life easy. Mary Jane Howe and I are planning a trip through the West via Monterrey, Mexico. So much for vacation talk until two weeks from now. . . . Helen Welch was quite abashed when a group of men from Bldg. 20-2 serenaded her the other day to the tune (using the word very loosely) of "Happy Birthday." . . . W. F. Timbrook and Louie Lothammer are interested in any talk about new cars. Timmy bought a new Hudson a few weeks ago, and Louie is the proud owner of a new Buick. . . . Whitie Van Auken says that he will give a little advice to anyone else going fishing in Spooner, Wis. He says that anyone getting there after he does might just as well stay home, cause there won't be many fish left. Optimistic aren't you, Whitie? . . . I hear Howard Boren's wife finally came to the rescue. I guess you'll think twice before tearing down the furnace again, won't you, Howard? . . . Harry Underwood has been on the Safety Committee since 1924. Keep up the good work, Harry. . . . A very happy birthday to Garfield Iverson, Carl Rehling, Juanita Widman, Helen Hlawek, Bill Grush, Ernie Hanauer, Walter Yopst and Yours Truly. . . . We hope everyone has a wonderful vacation. Take it easy though because we want to see you all back healthy and well after vacation.

Beware of a half truth. You may have gotten hold of the wrong half.

The topic of conversation around here this week has been, "Where are you going on your vacation." By the looks of things everyone is heading for Wisconsin to fish and sightsee. . . . Gladys Mosshammer Panazin went to the cemetery last week-end. She must have stayed a little longer than she was supposed to, because when she started to leave she discovered the gates were closed. After some time of struggling, she finally opened them. She says she was really getting scared, as she had no desire to stay in there all night. . . . Earl Fredricks came into work last Friday and he had a set of arms on him like Popeye. He said that he bought some southern bees, but rebel bees never could get along with Yankees. Their stinging him was just to prove the point. Earl says as far as he's concerned the Civil War has started all over again. . . . Clark Holmes returned from his vacation this week. He went up to Maine on the Canadian side and back through Boston. He says he traveled 2,600 miles, and the next two weeks he can rest.



We are wondering just how many will read the columns this week? . . . Everyone all prepared for a wonderful two weeks' vacation? We are hoping you all have a grand time, and a word to the wise—Let's All Be Careful. . . . Johnny Wilson has just informed us he is going to California, instead of the Smoky Mountains. . . . Billy (Boy) Swafford has finally decided to go back to the "Foot Hills" of good old Tennessee to spend his vacation. He says that it will bring back memories of his boyhood days. . . . Theron Kitchen has invented a "Bluegill stretcher" so he will have a good supply of fish by vacation time. . . . Anyone in the need of exercise during their two weeks of relaxation, see Si Alspaugh. He is going to put in a new driveway. . . . Mr. Skevington is planning to visit his son in California and also Cleon Oyer is heading that way. Oyer said if Mr. Skevington would like to stop off in Yellowstone Park he and his wife will share a cup of tea. It seems Oyer has rigged up a "cooler" in the front seat of his car just in case the Mrs. should get too thirsty while traveling through the desert. . . . We have heard Clarence Shroeder is tired of carrying his dinner bucket to work. He rolls it now behind his car. By the way, Clarence, just what was in your bucket? . . . Everett Cox, after months of waiting, is now sporting his new "store teeth." . . . Russell Runkel is one proud fellow. He is raising some prize winning tomatoes this year. They are beauties. . . . We hear through the grapevine Harry Ross is going in the shoe shining business after his retirement. . . . Dallas Corson has finally gotten rid of the jiggers. At least that's what he thought they were. . . . When Mr. Bobay was asked who was supplying him with his fishing bait, he asked why? Some of the boys figured Earl Strong must be delivering the bait as he always seems in such a rush after work, and Art Torbeck seemed to have the evidence of digging them on his shoes and trouser legs. . . . Myrtle Barfell is certainly elated and very proud, her son Tom has made the Zollner Piston fastball team. Tom was chosen among the many rookies who tried out for the team. He is a catcher and has been doing a very fine job. . . . What's this we hear about Bill Weber never missing a carnival? . . . Alice Rodgers makes special trips downtown to get hamburgers for her cat Carnation. Alice was afraid her cat was gone for good, and when she found her she gave it a special treat. . . . Marceil Bantel fell asleep in her hammock and came to work "blistered" but good. . . . We wish to express our deepest sympathy to the family of Ralph Viland who died last week.

Tricks In Transformer

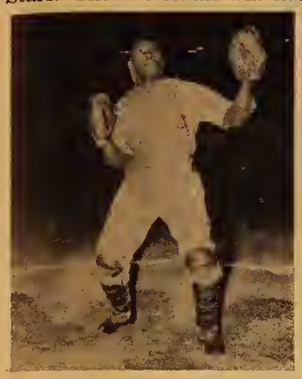
—FROM DIVISION 91—

By Johnny McMaken

Boy, oh boy, here we are starting that wonderful vacation we have been looking forward to for the last year. . . . Wilbur Shaffer, the big washing machine king, will probably spend all his vacation buying up old second hand washing machines. . . . Joseph Ort, who is quite a softball player, seems to always be taking all the glory. The other week Joe forced a man out just so he could score any runs they might make. . . . Bill Gepfert's wife would like to know if any of you fellows might have a WORKS NEWS from three weeks ago, as Bill didn't have enough pictures to go around. . . . Melvin Leykauf will soon be headed for the wilds of Wisconsin. He bought a special shirt just for the occasion. . . . Anyone having any old junky outboard motors see John Kennell. He would like to have one for his vacation. . . . We would like to wish Evelyn Schnepp a speedy recovery from her illness. . . . Paul Conrad plans to spend the biggest part of his time in Canada. . . . Robert Quinn is going to spend one week at the lake and the other one moving. . . . Russell Aker says he's going down in the hills of old Tennessee. . . . "Vacation Daze" is now coming close to reality. Division 91, Bldg. 26-2 office personnel are planning the following jaunts: Herman Conrad, Waldron Lake; Kenny Disler to Florida, then a side trip to Cuba. . . . Mildred Fett plans to stay at home. . . . Phil Cartwright will still try to catch turtles at the lakes in Michigan; Louis Swager, no vacation planned, just getting married then on a honeymoon. . . . R. L. Mann is planning a Michigan motor trip; Joan Foltz, just a short trip to California. . . . W. D. Giltz is going to Florida. He wants to see French bathing suits on the beach. . . . Ed Grote is digging up maps so he will be sure of getting lost on the way to the Smokies. . . . Johny Wagner will be a home girl on her vacation. . . . Dusty Rhodes is going fishing at Wall Lake. . . . Carl Stout is staying home and thinking of last year's trip to Texas. . . . Eula Black is going to Wisconsin, Illinois and Michigan. . . . Mildred Sadler is going to the Lake at Colon, Mich., (the magic capital of the world). . . . Howard Fritz will take short trips from Fort Wayne. . . . Leonard Harsch will do baby sitting for two weeks. . . . Sam Macy will be home most of the time, maybe a short trip over in Ohio and Danville, Ill. . . . Roy Dierstein plans to hold down the fort on Kinsmoor. . . . Remember, folks, a vacation is not a road race, drive carefully, so it will be a pleasure trip.

On his way home the other evening Henry Bubb purchased a dozen doughnuts. His wife placed them under a cake cover until mealtime when they consumed a few of them. Before retiring Henry thought he would eat one or two more, which he did, and then went to bed. His wife had the same idea, but when she lifted the cover she noticed the doughnuts were completely covered with tiny red ants which Henry had failed to detect. She called to him to come and look at them. He did and said that he thought they tasted a trifle sour and that doughnuts with ant frosting were not to his liking. . . . Clarence Stove, our eccentric fisherman, sometimes baffles us. For instance he has some property at Big Turkey Lake, keeps his boat at Crooked Lake, his bait at Loon Lake, then does his fishing at Snow Lake. Now figure that one out, if you can. . . . Phillip Schroeder has been duly mugged and is now ready to be initiated into the ranks of Quarter Century Club members which includes a ducking off the end of the big pier at Oliver Lake at the time of their annual picnic. While having his picture taken he asked if it would be permissible to have inscribed upon his photo these words, "I am also an eligible bachelor." . . . Kenny Miller was telling us a story about migratory ants. He said that last fall while working in his yard he noticed a continuous procession of extra large red ants headed in a southerly direction. This spring he happened to be out in his yard when he noticed a long line of these ants headed in a northerly direction. He told us that he really gave them a tough time. He said that he knows that these were the very same ants as he had put his initials on some of them at the time they passed through last fall. . . . Every time the candy wagon comes around Al Timme always takes a half dozen or so soda straws from the dispenser and puts them in his pocket. When asked the reason for this, he explained that he likes to use them as tapers to light his pipe as he sits by the fireplace during the long winter evenings.

Two close matches and one forfeit were the order in the last outing of the Owl Golf League. For a while it looked like the whole program would be a washout. "Ole Jupe" wanted to give Brookwood a bath.



The damp weather didn't hinder Warren Wickliffe as much as his poor tee shots. He still managed a 38 to lead the Hot Shots in a two-point victory over the high flying No. 3 team. Frank Uhrick led his team No. 2 with a 40.

Earl Stauffer's "Cold Shots" picked on Walt Pook's team No. 5 to snap out of a slump. John Starke led team No. 1 with a 40-breaking 38. Bill Hein led Walter Pook's team with 42.

Team No. 4 won the first forfeited match of the year over the Jolly Boys, who didn't have soap and towels along for their weekly baths with the compliments of Jupiter.

Voltmen To Tackle Philadelphia Stars

The Voltmen will have an opportunity Saturday night to revenge their 5-0 loss several weeks ago to the Philadelphia Stars. The two teams will clash again at Dwenger park.

Catcher Stanley Glenn

Outfielder Ben Littles

The Stars were organized in 1932 by Ed Bolen, former manager and part owner of the nationally-famous Hillsdale team. The Stars were in the Negro National League for 16 years prior to their entry this year in the Negro American League.

The Stars are managed by one of the greatest Negro players, Oscar Charleston. He broke into baseball with the 24th Infantry in World War I. After leaving the service, he joined the powerful ABC's of Indianapolis. Through his brilliant playing with such teams as the Chicago American Giants, Lincoln Stars, Hillsdale, Homestead Grays, and Harrisburg Giants, Charleston became known as the hardest hitting player of his time. He is at present in his second season at the helm of the Philadelphia Stars.

G-E GOLF

By Hugh Dubdit

Last Wednesday, the Brassies picked up eight points while the group-leading Spoons were dropping one. As a result, the two teams are tied for first place with 14 points. Mashies are third, with 10, and Putters are fourth, with nine. John Skevington led the scoring parade with 38, Don Lynch had a 40, and Verne Foulks shot a 41.

We wonder what the attraction was in the Monday night league this week. There must have been something to watch besides the ball. Ralph Wickliffe, Don Dimke, George Hoopingarner and Bob Rowe all had 44, for the low score of the evening. The Apprentice team is in first place, with a total of 45. Lost Balls are second, with 15, and Dark Horses, third with 11. The stage seems to be set for a rousing finish, as the Apps play the Dark Horses next time out. They finish the season with the Lost Balls.

The fight for first place in the Tuesday evening group has tightened a little more this week. Optimists still lead, with 26; Dubs are second, with 25, and Nineteenth Holers are third, with 20. It appears anything might happen there. "Red" Braden must have been rather warm (before and after) when he fanned the one, and only on one attempt. "Red", however, came in with a good 37. Other good counts were turned in by Bob Hall, with 39; Jim Walley, at 40, and Dick Tobias and Bob Dent, with 41. Jack Jennings wishes us to warn the farmer near No. 14 to keep his barn door closed. It seems that Jack didn't know his No. 4 wood's strength and put his tee shot neatly through the open door.

Auscos Roar To 6-0 Win Over Voltmen

By Bill Hunt

The St. Joe Auscos topped the Voltmen, 6-0, on two hits last Saturday night at Dwenger Park.

Southpaw Lee pitched six and two-thirds perfect innings before Les Lockett singled to left. Then he allowed only pinch hitter Lee Pfund to hit also for a beautiful two hitter. Charlie Shipman deserves nearly as much credit when, after a bad first inning in which two hits scored a run, he allowed only two more hits until the fateful eighth. With two out, Hedinger dropped a mediocre throw by Stramm. Then he threw wild to the plate to allow a run to score. Two more runs followed on a hit by Callam.

Shipman fanned five, walked only two while allowing eight well scattered singles and allowed one earned run; errors at critical times gave St. Joe the rest. John Dudick's absence was very noticeable. His shortstopping might have made the difference.

Southpaw Lee might have been pitching the game for the Voltmen, except for the great managerial ability of Carl "The Manipulator" Kennedy, manager of the Auscos.

Buds Down Voltmen In Array Of Errors

By George Hemmeter

The Voltmen were in hot water right from the start when they met the Benton Harbor Buds Friday, July 22, at Dwenger park.

Charlie Shipman, unable to find the plate, soon filled the bases by walking the first three men to face him. Snyder, of the Buds, flied out to right field, but then Richel dribbled a bunt down the first base line. While the Voltmen infield played London Bridge, the runners advanced one base. The next man hit into a double play.

The Voltmen perked up after the squelched Bud rally and managed a run of their own on a double by Les Lockett. Les has been playing heads up baseball both in the field and behind the bat.

After this brief spark, however, the fire smoldered and went out. Barney Morris, the Bud's pitcher, had the boys confused. He gave them only five more scattered hits.

Rash of Errors

Meantime, Charlie Shipman could not find the plate and a couple of more walks, five more hits, two of them home runs, combined with the ever present errors handed the Buds a nice lead of eight runs.

Cary took over in the sixth inning for the Voltmen. He pitched two hit balls, which combined with the ever present errors, accounted for two more runs for Benton Harbor.

Owls Edge Eckrich, 12-11

Wearing their hitting clothes, the G-E Owls softball team won over Eckrich by the score of 12-11.

The "wiener stuffers" led 11-8 going into the last of the seventh. Then old reliable Baker, the Owl shortstop and game-breaker-upper, hit a scorcher down third base line with three on base to end the game.

Stauffer, Drayer, Boyer and Greeno formed the batteries for G-E.

*Double-header, starting at 7 p. m.

Regular games are scheduled for 8 p.m. in Dwenger park.

Voltmen Nip Clowns In Ninth Inning, 2-1

By BILL HUNT

The Voltmen played one of their best games of the season in beating the Indianapolis Clowns at Dwenger Park Wednesday night, July 20. Six hits, seven walks, and a very important error by Clown Shortstop Sherwood Brewer allowed Braden's boys to beat the very tough outfit from Indianapolis, 2 to 1.

The Clowns were rough to start with, as they slammed out three singles in the first inning to fill the bases with one out. John Dudick speared Sam Hairston's drive between short and the bag, tossed to Hedinger, who relayed it to Bobilya for the double play. They got lone singles in the second, third and fourth innings. Then in the fifth, Brewer walked, Drake forced him at second himself, and scored on Neal's line drive single down the left field line. Lee Pfund really got tough then and set them down with only one hit in the final four innings.

The Voltmen threatened from the start, but it took two walks and two singles to get their first run. In the seventh, Chinewicz led off with a walk and Hedinger dittoed. Then Morgan singled to right with Chinewicz stretching for home. Lacking mud cleats, he was out by a hair at home, as was Morgan trying to make it to second. Hedinger, however, scored from third easily on Lee Pfund's healthy single down the left field line.

Ninth Inning Decision

The game was won in the ninth when Morgan walked, was sacrificed to second beautifully by Pfund, went to third on pinch hitter Holland's infield out and scored when Gabby Hormann placed a hard roller between the shortstop's legs, after fouling off a dozen balls ala Appling.

The play of the game was John Chinewicz' running catch of Sam Hairston's low, hard liner to end the fifth. Also Les Lockett's running, leaping catch in the fourth of Len Pigg's drive.

Most unusual and deserving of praise was Gabby Hormann's throw to Bobilya in the sixth to turn Len Pigg's sure single to right into an out, right field to first.

Hilarious Comedy Acts

The Clown's floor show, which went on while their ball team played superb ball, was excellent and worth the price of admission.

King Tut made his appearance in a crazy-quilt, ball suit and his bag of tricks. He topped his act by appearing in the audience near the end of the game in street clothes and nearly had trouble before they decided he was not just a fresh spectator.

Joe Taylor juggled everything, except the midget BeBop, including eight baseballs. During the pepper game, he caught and threw the ball from practically any part of his anatomy.

Peanuts "Step and Fetchit" Davis split the crowd's collective sides in his painfully slow trek from the dugout to the first base coaching box at the start of each inning.

Goose Tatum got in the acts plus clowning on the ball field without hurting his excellent field at first base.

Works Lab, Apprentice Top League

In the Interdivision Softball League, Works Lab got eight of their 10 runs in the first inning. They defeated Winter St. last week, 10-7. This was the Lab's fifth win without a loss.

The Apprentice School scored three runs in the seventh inning to down Squares, 7-4, for their fifth straight win. The Apprentices will meet the Works Lab this week to decide the championship of the first half.

In the third game played last week, the Firemen outlasted the Fractional team to win 7-6.

Main Office drew a bye.

WHO WANTS PROFITS?

WHO GETS THEM?

OWNERS?—The people who have risked their savings in a business venture certainly *want* profits to repay them for the use of their money and for the risk they take.

But they don't always *get* profits, Ours is a profit *and* loss system. All too frequently a business hasn't anything left after paying all expenses.

But when there *are* profits, who gets them? Wall Street? The "filthy rich"? Let's see.

There are about 13 million stockholders in just the 428 larger companies which report their ownership. The hundreds of thousands of other corporations, which do *not* report their ownership, have entrusted to them the savings of further millions and millions of stockholders.

Two of every three dollars of dividends from these companies go to people who have less than $100 a week total income from all sources and who, after personal income taxes, retain 83 per cent of all dividends paid by corporations.

Any of these dividends that go to that rabble rouser's delight—the "filthy rich"—are promptly taken by federal income taxes averaging about 80 per cent. Actually, after income taxes, the "rich" get to keep only 4 per cent of all dividends paid by corporations.

There are an additional 10 million owners or "proprietors" of businesses which are not incorporated. These, too, are trying to do better than break even—trying to "make money."

There must obviously be some duplication in the above numbers. Once a fellow develops the saving habit, he may not invest in just his own business or in some one corporation's stock, but may think it prudent to spread the risk of his savings over two or more ventures and thus not have all his eggs in one basket. But still there must be easily better than 25 million individual citizens who are risking past savings or a portion of present income in one or more business ventures in the hope of profits.

But still more people are interested in profits.

SAVERS?—There are 78 million—three out of every four adults in the U. S.—with life and other insurance policies. The funds of insurance companies are to a large extent risked with business concerns or in investments directly affected by whether or not certain businesses, or businesses on the average, are operating profitably. Profits help make insurance safe and low in cost.

There are around 80 million citizens who own government bonds directly. About one-third of the assets of the insurance companies and of the banks are in government bonds. There are 70 million people with savings accounts, millions more now on pension or contributing toward a pension, and other numberless folks with future income in fixed amount of dollars. All these are interested in keeping the dollar good . . . keeping it from dropping in buying power as it steadily has in 15 of the past 17 years. Profits are one of the strongest agencies to prevent this damage to the value of money and hence to such savings.

GOVERNMENT?—Uncle Sam is greatly interested in profits—in fact, largely dependent on business profits to keep the government sound and keep the economy free.

Government income is high and its expenses for various kinds of aid and relief can be low when most businesses are profitable and only a minority are losing money. Profits provided between one-third and one-half of government income last year.

Profits are down this year, the relief load is up, and the government is already going to "deficit financing" which simply means it is living beyond its means and damaging again the value of everybody's income and savings.

Profits shared, in reason, with the government provide federal income that results not from higher prices to citizens but from the ability and energy applied by those managements able to operate within a given market price which is not profitable for others. Government likes such income.

Government has liked it too much. Profits have been taxed to the harm of the whole country. Company profits have even been taxed twice—as business earnings and again as dividends. This has prevented anything like the full progress possible.

Our standard of living is raised only by putting profit and other savings into new designs, equipment, and methods. The increase has averaged 3% over the past 40 years. Our standard of living cannot be raised 10% or 15% or 18½% in a year by trick legislative or other such means.

If our country is to progress faster, there must be renewed hope of profits to act as an added incentive to competition. And the profits needed for progress will come as the reward to those who succeed in operating efficiently within prices that are attractive to the public on products the public wants.

EMPLOYEES?—The well-being of employees is largely dependent on profits. Jobs are steady in times when most businesses are making a profit. Jobs are uncertain in times when most businesses have losses or even shrinking profits.

How much can be bought by employees with their pay is dependent on how steadily profits are reinvested in the means for each of the 62 million of us in the work force doing more for each other with the same, or even less, physical effort.

And almost all of the savers and owners mentioned above are, of course, employees. They are more and more recognizing that there are two ways to make money. One is in return for the interest, skill, care, and effort put personally on the individual job. The other is in return for intelligent risking of savings to back plans of a management thought likely to make a profit. One is pay for the work the employee does himself. The other is pay for the work his savings do.

EVERYBODY?—Who *wants* profits? . . . Who *gets* them? . . . Who profits from profits? . . . DON'T WE ALL?

135 EMPLOYEES RECEIVE AWARDS FOR SUGGESTIONS

A total of $2,297.50 in suggestion awards were received by 135 employees recently. The top award of $265 went to Niland Ochsenrider of the Decatur plant. Mr. Ochsenrider's idea involved improvements to the conveyors.

Paul Raitz and Russell I. Semer, both of Tiffin, shared the second highest award of the week. Their suggestion on testing four stators, instead of one, netted them $200. John Wood, FHP Motor Div. 13, headed the local suggestors with an $170 award for his suggestion concerning loose stator iron.

Two awards of $135 each, went to Doyle D. Miller, Specialty Transformer Div. 91, and Homer A. Markley of the General Service division. Mr. Miller's suggestion pertained to scroll steel for shunts, whereas Mr. Markley received his award on his idea involving the boilers at the Taylor St. plant.

Next on the list was Louis F. Frankart of the Tiffin plant, who received $60 for his suggestion on checking resistance of wound coils. Fifty-five dollars went to Raymond R. Crippen, Specialty Transformer Div. 94, for his suggestion for treatment trays. Mildred Strickler, Specialty Transformer Div. 93, received $50 for her idea on coil saws.

M. W. Brosius, Motor and Generator division, was given $35 for his idea of steel substitution. Joseph Griffin, FHP Motor Div. 16, earned $35 for his idea on friction discs.

Walter Gibson, DeKalb plant, received $30 for his suggestion about the Cone automatic screw machines. Another $30 award was

(Continued on page 3)

Niland Ochsenrider, Decatur plant, led the list of suggestors this week with a $265 award. His money-making idea was to change the conveyor to the packing table, so that motors come down one line instead of two. He is shown in the picture receiving his award. Left to right are: E. W. Lankenau, Decatur Plant Manager; Mr. Ochsenrider, and Charles Langston, his foreman.

John Wood, FHP Motor Div. 13 at Taylor St., is shown pointing out features of his $170 suggestion to his foreman, Joe Wyss.

Q-C Club Members Urged To Return Questionnaires

All members of the Quarter Century Club were urged today to return their questionnaires, telling whether or not they plan to attend the club's outing at Camp Limberlost Saturday, Sept. 10.

Self-addressed envelopes were included with all invitations. These must be returned by mail to A. C. Hartman, secretary, in order to assure a reservation. Thursday, Aug. 25, has been set as the absolute deadline.

BROKAW IS ELECTED TO PRESIDENCY OF DECATUR G-E CLUB

Fred Brokaw, Bldg. 1, has been elected president of the Decatur G-E Club.

Other newly-elected officers are Charles Cook, vice president; Barbara Roop, secretary, and William Kohls, director. Irene Holthouse is the appointed treasurer of the club.

Along with Mr. Kohls, the board of directors will also include former President Leo Hackman, Carl Smith, Mina Lampe, and E. W. Lankenau.

G-E Club To Hold Election Of New Officers Aug. 29-30

The election of 1949-50 officers of the G-E Club will be held Monday and Tuesday, Aug. 29-30. Every employee is eligible to cast a ballot.

Foremen and time clerks will distribute the ballots Thursday and Friday, Aug. 25-26. Any employee who fails to receive a ballot should contact his foreman.

Everyone should mark the ballot with an (X), voting for one candidate for each office. Completed ballots should be deposited in the clock-card boxes and will be returned to the G-E Club lounge.

All ballots from the Broadway plant will be returned to the G-E Club lounge by the time clerks, while the ballots from Taylor St. will be returned by the clerks to M. N. Brayer in room 351.

Time clerks will return the Winter St. ballots to William O'Neill.

The clerks will see personally that the ballots are delivered to their proper place before 9 a.m. Wednesday, Aug. 31.

Test Engineers Elect Ruth Shull "Miss Ft. Wayne"

Ruth Shull

Ruth Shull, Bldg. 8-2, has been elected Miss Fort Wayne Works by the test engineers, it was announced today by Henry Lehmann, editor of News Letter issued weekly for all Fort Wayne test engineers.

(Continued on page 3)

Partizans Plan Family Picnic

The Partizan Chapter of Elex will hold a family picnic Tuesday, Aug. 23, at 10:30 a.m. in Foster Park, pavilion No. 2. A potluck lunch will be served and each member should bring a covered dish and table service.

Marie Ehringer is chairman of the outing. She will be assisted by Anne and Marie Fox and Kathryn Cullen.

LOOK Magazine Features Stories Of Interest To G-E Employees

Two stories in the latest issue of **Look Magazine** are of special interest to Fort Wayne's G-E employees.

The lead article in the Aug. 30 issue is about "America's Happiest Town—Fort Wayne" and on page 96 is an article by President C. E. Wilson entitled "What Happens to a Corporation's Profits?"

The five-page illustrated article on the Summit City was written by Dr. Martin Gumpert, a specialist in sociological research, following an exhaustive survey of all communities in the U. S. with a population fo more than 100,000. Author of "You Are Younger Than You Think," medical hooks, fiction and poetry, Dr. Gumpert is also a practicing physician.

After establishing certain standards and measuring other com-

American Industry Is Owned By Millions Of Americans

Probably no fallacy is more widespread or persistent than the mistaken belief that only rich people are stockholders.

In America this is far from the truth. As might be expected in a country where the ownership of homes, automobiles, radios, refrigerators, and so many other things is commonplace in all economic groups, there also is broad ownership of industry.

No one knows exactly how many stockholders there are. But on the basis of income tax statistics and other sources of information, it is estimated that about 15 million people are the direct owners of stock. Furthermore, additional millions who pay insurance premiums and have bank accounts are indirect owners of stocks and bonds, because insurance premiums and savings are largely invested in the securities of American business.

The total number of security owners—direct and indirect—is placed at well over 50 million. The income and financial security of this large number of persons, representing the big majority of American families, depends to some extent on stocks and bonds—and, therefore, on the profit-making ability of American industry.

The stockholder is one of America's real forgotten men. He gets little sympathy from anybody—probably on the theory that if he can afford to own stocks, he is doing all right. Yet he has real grounds for complaint. If business conditions are poor, his income may be cut to little or nothing, and the value of his investment may be reduced and even wiped out. If business conditions are good, his income, as a rule, does not increase in proportion to that of other groups. In addition each dollar he receives is taxed twice—first, as earnings of the corporation, and second, as personal income when he receives it in dividends.

Who is the stockholder? He is one of millions of Americans in all walks of life. He is the fellow whose willingness to risk his savings has made it possible to equip the American worker with the most and best power and machinery in the world—which have made possible an increase in productivity to such an extent that today's worker earns real wages that are more than twice as large as those of his grandfather with only two-thirds as many hours of work. Further advances in the American standard of living must come as always from further increases in productivity . . . which means constantly improving skill and efficiency on the part of workers and more power and machinery through investment by stockholders.

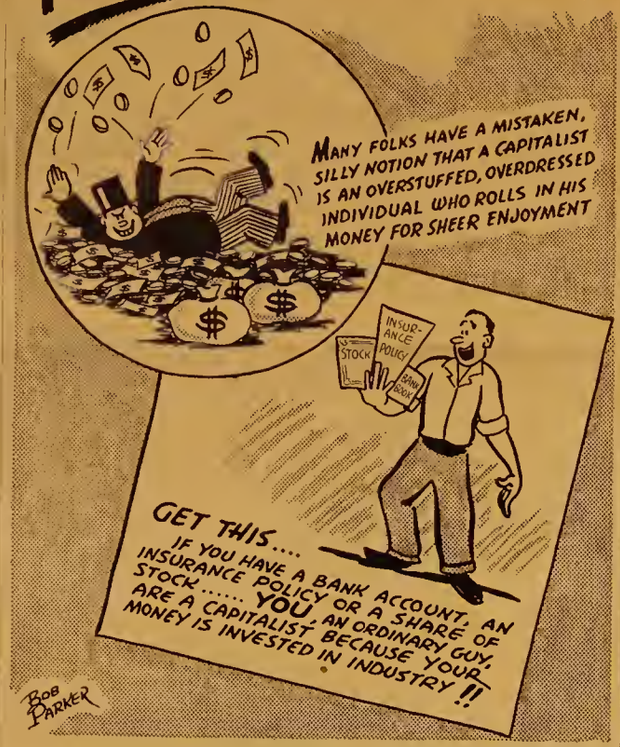
Under present conditions, people are showing an increasing reluctance to become or remain stockholders. They need an incentive that would be simple to give. That incentive would be provided: by public recognition that the stockholder performs an essential service . . . . by acceptance of the stockholder's right to a fair return on his investment . . . . by support of a tax program which would remove from the stockholder the burden of double taxation which he alone bears.

Fair treatment of the stockholder is an excellent way to assure improving standards of living for all of us.

—EMPLOYEES BULLETIN, Weirton Steel Company

Every Workman Is A Miniature Corporation

What it costs you to just get by—enough to keep body and soul together—is what corporations call the "break-even point". Whatever you earn above that is "profit" you can use as you like—for savings, a car, a better home.



It's the same with a company—what they earn above the "break-even point" they spend for better equipment, or save for carrying them through depressions, or invest in new products. (Only a small part goes to the investor, who made the company possible.)

Since 1929, the "profit" of the average American—the excess over necessities—has increased 302.7%; the profit of the average American corporation has increased 134.5%. Worth remembering, when the soap-box orators scream about "excessive profits". When will they begin objecting to yours?

YOU ARE a Capitalist!

WHAT'S NEW IN PLANTS & LABS

A machine which used 2,000,000-volt X rays to inspect bombs and shells in the war will be adapted for work in cancer treatment and research, the X-Ray Corp. has announced. The machine will be installed this summer in the Hospital for Joint Diseases, New York City, and is the first of its type as well as the largest ever produced by the Company for medical use. Medical opinion is that the unit will concentrate on the cancer a tremendous quantity of destructive radiation without subjecting intervening tissues to excessive amounts, and it is expected to reduce treatment time. A special building will be constructed to house the equipment for protection against radiations.

The world's first mobile betatron, a 10-million-vole X-ray generator whose rays are capable of penetrating 16 inches of steel, is now being installed at the Naval Ordnance Laboratory, White Oak, Maryland. The massive betatron is uniquc in that it may be aimed in any direction, whereas all other betatrons, cyclotrons and similar nuclear research equipment of this type are held in a fixed position. It will be used at White Oak principally for studying the complex internal assemblies of mines, torpedoes, and other items of Naval Ordnance.

A new device for measuring the energy distribution of 100,000,000-volt X-rays, produced by the giant betatron in the research laboratory is announced. The new technique makes it possible to obtain in a few months data which would have required 300 years working time by older methods.

BRIDGEPORT—A radically new-type heater cord, known as Preen-X, and a heater cord-set incorporating Preen-X, are announced by the Construction Materials Department. The new insulation utilizes an entirely new principle, eliminating the asbestos applied over individual rubber insulation on older-type cords. The new development is the outgrowth of a highly successful ignition cable developed by G-E.

SCIENCE QUESTION BOX

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY

Q. What is the best way to train one's memory? Does it help to memorize long lists of facts?

A. We consulted Dr. Ernest M. Ligon, Chairman of the Department of Psychology at Union College, on this question. He says: "The term 'memory', has about dropped out of our psychological terminology. We now speak more functionally of the capacity for memorizing. Probably it can be applied but not appreciably improved. What this means is that memorizing long lists of facts as such is of little or no value. What is valuable is memorizing materials in the area in which the person needs to memorize. The only person who would profit by memorizing telephone numbers is someone who had to remember telephone numbers. If he needs to memorize research data, that is what he should practice with. The apparent improvement is due to increased organization of the data of this field—that is, he has more things to tie to—and not to the improvement of some mythical faculty called memory."

Q: How does the Moon control the tides?

A: They are caused by the gravitational attraction of the Moon, and also of the Sun. The water on the side of the Earth toward the Moon being nearest that body, is pulled most and bulges out above the mean water level. The water on the far side of the Earth from the Moon is pulled least, even less than the body of the Earth itself. The Earth is pulled away from that water, leaving another bulge in that side. As the Earth revolves each day, these bulges go past causing high tides, and between the bulges then are low tides. Local conditions, and the pull of the Sun, which has a tide-raising force about half that of the Moon, cause considerable complication to this simple picture.

OUT OUR WAY

By J. R. WILLIAMS

135 Employees Receive Awards For Suggestions

Joseph Griffin, FHP Div. 16, received a $35 award for his suggestion to change the friction discs on winding machines.

(Continued from Page 1)

made to Blanch E. McDonald, Specialty Transformer Div. 94, for an idea on clamping fixtures.

Twenty-five dollar awards went to Dale B. Peden, FHP Motor Div. 15; Perry C. Walters and Jacob S. Sappington, FHP Motor Div. 19; and Wilson P. Jones, Specialty Transformer Div. 93.

The employees receiving awards ranging in various amounts from $5 to $20 are listed below:

FHP Motor Div. 1: Howard C. Taylor (three awards), and Frank Brindle.

FHP Motor Div. 13: Donald I. Macon, Louis A. Gocke, Lois J. DeLong, Paul L. Brandt, John P. Bastian, Hubert Sherlock, John O. Weaver, Brice Martin, Robert W. Hendrickson, and H. G. Cowan.

FHP Motor Div. 14: Martha J. Lee, Louis Hinen, and Walter F. Hinrichs (two awards).

FHP Motor Div. 15: Margie Y. Rall, Dale B. Peden, Lynn L. Crawford, Harold Blauvelt, Leonard Jenne, Joe Parent, Merl E. Bryie, Virgil Allmandinger, Walter Amacher (two awards), Edwin C. Rodenbeck, and Willis K. Dillman.

FHP Motor Div. 16: Earl Yoquelet, A. E. Maske, Ida Sinn, Eugene M. Rosswurm, Robert L. Schuelke, Eldin E. Roby, Roy W. Molthan, Garland K. Keister, Thurston Howell, Joseph Griffin, Charles Grim, Ross M. Domer, Nina C. Clifton, David H. Bastian, T. Michael Walker, Eugene J. Dahman, Burdella M. Welch (two awards), Maude M. Goodrich (two awards), Stephen A. Sallot, Jr., and Donald H. Witte.

FHP Motor Div. 17: William Wiegman, Allen W. Telschow, Robert L. Krugh, Joseph E. Kramer, Walter J. Koehlinger, Fred E. House, Raymond C. Fulghum, Harold H. Fletter, Joseph Eifrid, and Cloyd P. Carder.

FHP Motor Div. 19: Nora Williams (four awards), Harold D. Orr, John R. Miles (two awards), Ruby A. McBride, Mary A. Herb, Lloyd Runyan, Jacob Sappington, Clarence Roth, Elmore R. Hurt (two awards), and Elmer Jockel.

FHP Motor Div. 10: Robert J. Shirey, Vesta Good, Cleon O. Oyer, and Daniel D. Geary.

Decatur Plant: Raymond Franz, Ambrose Gase, Frank Rowley, and Clarence F. Drake.

Tiffin Plant: Walter R. Lonsway, Hillis H. Askan, and Earl N. Krause.

DeKalb Plant: Lorraine Roof, Russell Robinson, and Walter Gibson.

Specialty Transformer Div. 91: L. F. Harsch, Charles F. Holtsclaw, Robert A. Bunyan, and Donna Backofen.

Specialty Transformer Div. 93: Levona M. Porter (two awards), Nona M. Hedges, Ernest Clark, and Wilson P. Jones.

Specialty Transformer Div. 94: Norma Voelker (two awards), Donald E. Waldrop, Murray J. Sherman (two awards), Robert Schmeling, and Frieda C. Kaiser.

Danville Plant: Dan Parker, Roland W. Montgomery, Claude L. McWhorter, Jr., Verlin Biggs, William Townsley, G. E. Tabels, and John R. Doney.

Motor and Generator Div.: Osmer Eix, Dean E. Shaffer, William E. Wittmer, Richard D. Kite, E. G. Marschand, and Robert H. Stute.

Wire and Insulation Div.: William C. Wright, Emmett M. Rasor, Carl M. Junk (two awards), Ray E. Fisher, Alfred E. Eisenacher, and Melvin J. Bill.

General Tool Div.: E. T. Ueber

General Service Div.: Darrell Richmond, George Lamboley, Louis D. Hopper, Robert W. Guingrich, George R. Hughes, John Madden, and Dorsey Wendell.

Distribution: Robert L. Arnett

Miscellaneous: Albert Hutchisson and Mary I. Heymann.

For her suggestion to move the location of the coil saw, Mildred Strickler, Specialty Transformer Div. 93, received $50. She is shown, above, explaining the application of her idea to her foreman, Glenn Hobbs.

Foremen, Safety Committeemen Given Copy Of Anti-Jaywalking Ordinance

Foremen and safety committeemen were given copies of the new city Pedestrian Control Ordinance this week by the Fort Wayne Works safety section.

The anti-jaywalking ordinance was passed recently by the City Council to regulate and control pedestrian traffic and provide a penalty for violators.

Police will begin enforeement of the ordinance Sept. 1. However, they will give only warning tickets until Oct. 1. After that date, arrests will be made.

The new ordinance includes the following two provisions:

When walking, cross at corners and obey traffic signals.

When driving, give pedestrians the right of way on all turns and at any intersection where there are no signals.

The zone to be covered by the ordinance includes the area from the Pennsylvania Railroad to the St. Mary's River, and from Van Buren to Hanna St.

According to MBA statisties, 72% of the disabling injuries to Fort Wayne Works employees during the first six months of this year occurred off the plant premises. It is hoped that many of these accidents will be avoided through the enforcement of this new ordinance.

Test Engineers

(Continued from Page 1)

Each week since April 15 the test engineer's publication has carried the portrait of a girl who they named as Miss Fort Wayne Works of the Week.

The News Letter staff then met and selected four finalists from the list of 14 cover girls. All test engineers at the Fort Wayne Works were then given ballots and permitted to vote for their choice for the title.

The News Letter staff has presented Miss Shull with a gift on behalf of all the Fort Wayne test engineers.

The test engineers' Miss Fort Wayne Works has been with the Company sinee 1943, except for two years when she served in the U. S. Navy Hospital Corps.

She is the secretary for MBA.

Markley Earns $135 For Idea

Homer Markley, General Service division, recently received $135 for his suggestion to change the wiring of the blower motor for the boilers at the Taylor St. power house. This pieture was taken when his award eheck was presented to him. Left to right are: John Lare, William West, Orville Smith, Mr. Markley, Ralph Craig, William Altekruse, and Ralph Latham.

Chet Price is painting his house. That is, he is trying to do the job. But between rains and stirring operations we doubt if he will get done by late fall. He said that everytime he gets his paint stirred up, it starts to rain putting an end to the painting. He also tells us that this has happened innumerable times and that he is about to give up the ghost. . . . Art Brandenberger tells us that if one carries a sprig of rag weed in his pocket this person will never be bothered with prickly heat. George Cowan immediately went outside the plant door and came in with two sprigs of iron weed, thinking that it was of the aforementioned variety. Art said that he also carries a buckeye to ward off the rheumatiz, and a rabbit's foot for good luek. He must be a firm believer in old wives' tales. . . . Kenny Buster Miller's disposition was a little on the owly side the other morning. When asked about it, he explained that he was up all night performing the duties of a midwife for his dog who presented him with five nice puppies. . . . Ward Grim appeared upon the seene Monday morning with another one of those Lake Papakeechie hair euts. This one was the super variety. His face was also adorned by one excellent box car shave. The contrast between the head and the face was so great that one could not fail to notice it.

LOOK Magazine

(Continued from Page 1)

parably-sized cities in the United States accordingly, Dr. Gumpert pegged Fort Wayne as first in happiness. He polled teen-agers on their feeling about their home towns, traveling salesmen about their favorite cities, and made careful checks of the various income levels and per capita buying power in each town. Dr. Gumpert further considered the religious and social activities of the communities under survey and their business diversity.

Spends Three Weeks Here

Author Gumpert compiled his information several months ago when he spent three weeks here with Ben Kocivar, a department editor for **Look**, and Philip Harrington, photographer. The group took pictures and interviewed city officials and local business and labor leaders.

In his article, Dr. Gumpert points out that there is a minimum amount of frustration and no fear in Fort Wayne. He adds that older people are proud of their city, and teen-agers content to stay here.

Dr. Gumpert praises the city's recreational programs, schools, labor relations and industrial progress, and lauds the lack of extreme poverty, widespread slum areas, and organized vice.

Author Gumpert further maintains that while Fort Wayne is two years behind in fashion, it is 20 years ahead in vision.

He states that the majority of people live here to work and raise families, not to retire.

70% Own Homes

In reporting that 70 per cent of the citizens own their own homes, Dr. Gumpert declares, "People think about and spend their money on homes, automobiles, hobbies, children and churches."

"In many factories," he adds, "more than one-third of the workers have been on the job over 25 years."

"All in all, Fort Wayne seems to be a city without peaks and without lows," Dr. Gumpert concludes, "but with an average far above that of other cities."

Included in the 14 photographs accompanying Dr. Gumpert's article, are a shot of Dallas Smith and Cecil Onion, both of Bldg. 4-4, and officers of local 901, UE-CIO, and of Edward Bradbury, Bldg. 17-4, and members of his family. The picture of Mr. Bradbury was taken on his 88-acre farm in Lafayette township as he was showing his son how to operate the boy's tractor.

Wilson Discusses Profits

The article by Pres. Wilson points out that a high percentage of profits must he ploughed back into the business to boost its future earnings.

In a discussion of General Electric's annual report for 1948, Mr. Wilson states that the net income for the year was $123,835,000.

"This figure on net income," he states, "must be viewed through the eyes of three important groups of people: the stockholders, the employees and the customers. Each of these groups has its own appeals and wants."

Pres. Wilson then analyzes the flow of this money to the Company's approximately 250,000 stockholders, 196,798 employees, and to millions of customers who want a better product at a lower cost.

"The daily life of a corporation is a constant effort to balance the wants of these groups. To lift wages and dividends, the corporation must sell more goods; and this means that it must make a better product," Mr. Wilson explains.

Must Advance Together

In conclusion, General Electric's president states:

"All three groups should advance together to a higher standard of living. The short-term benefit of any one group must not be allowed to endanger the long-term benefit to all.

"That is our objective. It is the objective of all business. And that, we believe, is the American way."

Every time you draw a breath Uncle Sam spends sevcral hundred dollars. The taxpayer has one alternative—rather a grim one.

Rounds Out 30 Years At G-E

Floyd Loraine, FHP Motor Div. 15, recently rounded out 30 years with the Company, at which time he received a congratulatory letter. The picture above was taken during the presentation of the letter. Left to right are: T. W. Sheets, H. G. Siebold, E. F. Sonday, Mr. Loraine, Ed Gebhart, and Ivan J. Jones.

Information Clinic

The following is the third in a series of questions and answers selected at random from those asked at the recent Informative Conferences. Additional questions concerning problems relating to jobs, business conditions, or any other matters are encouraged. Employees are requested to use the Information Clinic form below.

QUESTION

Are the branch plant operations proving successful?

ANSWER

The opening of our Decatur, Ind., plant in 1920 was the first attempt by the Company at conducting branch plant operations. Due to the success of the Decatur operation, many more branch plants have since been established. Branch plants have proven highly successful where the production is limited to a single product line. Our Tiffin, O., plant, which manufactures stators and rotors of a common diameter, is an excellent example of the advantages to be gained through a small, branch plant operation.

QUESTION

Is the present recession normal?

ANSWER

We are told that the present recession or re-adjustment period is what might be normally expected to follow a postwar production boom. Industry expanded its manufacturing facilities to meet the abnormally high demand for peace time goods. With the meeting of this demand, it is only natural that there should be a gradual cut back in production to a more normal level. However, it would appear that that level will be considerably higher than pre-war.

QUESTION

How soon will things pick up?

ANSWER

Our market research and commercial experts can predict no substantial increase in business for the next four quarters (one year). Nor do they see reason to predict any general slump below present averages. They do expect a gradual return to higher levels, however, after the next four quarters.

From what we can gather everyone had a very nice vacation in one way or another, at least we hope so. . . . Vaughn Sheets spent his enlarging the kitchen of his home. We are at loss as to the reason. His family is not getting any larger. Could it be, Vaughn, that you plan to have your co-workers out from time to time for a Sunday chicken dinner, or would it be beef and noodles, your favorite? To us it makes no difference, we will come anyway. . . . Harry Beltz visited Canada. Harry says he never knew they raised so much tobacco. . . . Bill Rohe tells us that it always pays to read what the signs have to say. In this way you can keep your face from getting red. . . . If Orval Doherty would have only known, it would not have been necessary for him to go to the lake for a swim. While Orval was at the lake a water pipe burst at home which made it necessary for him to use a row boat up and down the cellar stairs. . . . Truman Buckles enjoyed his vacation at his lake cottage, until he found out that the Indians regained the sewer in Indian Village—then one big headache. . . . Your guess is as good as ours, as to those fish stories. We have really heard some whoppers, but we have decided to wait and tell you about them when they start coming down to somewhere near their actual size.

Insulation News

As we all expected to hear, everyone had a simply wonderful vacation. This roving reporter turned "Nosey Rosey" for today and here are the results of vacations around Bldg. 12-3. . . . Dorothy Baumgartner (better known now as the "Gay New Yorker") is finding it mighty hard to be content in our fair city after being a resident of the Hotel Astor in New York. We are taking a small contribution to buy the "Times" for Dorothy, so that she won't get too homesick. . . . Mr. and Mrs. Earl Gebert joined another couple for a trip to the Smoky Mountains. Earl almost had to stay in Kentucky though. He forgot his razor and he just couldn't convince those hillbillies that he was really from Indiana. . . . The Insulation gang received a post card from Bill Glenn. Now there is a true Hoosier for you. The post card was from Evansville, Ind. It's the thought that counts though, Bill. . . . Marie Gehle went out to inspect the wild and wooly West. Marie won't vouch for the wooly part, but she says it sure enough is wild. . . . We heard rumors that Josephine Balsamo operated a popcorn stand during vacation. We imagine that she got that becoming tan from the bright lights around the popcorn stand. If the truth were known, it was really acquired at Lake Wawasee. . . . Bob Martin and his wife went for the folders that said "See the New England States." Bob says the pilgrims did a bad job of settling, because as far as he could see it was still uncivilized. . . . Joe Kramer said his vacation would be rather dull except for taking his family to the lake for a couple days. Can you imagine a vacation being dull with five children to keep entertained? . . . Hans Muller took his little girl to see the zoo at Toledo. Hans says that the only ones who have more fun than people are monkeys. They were so fascinated that they stayed all day. . . . If you were wondering why Crooked Lake has such a low lake level, we can give you the answer. Bill Hattendorf spent his vacation there. Need we say more? Abe Andrews says that since Bill cleaned out the lake, he advises all you ardent fishermen to stay away from Crooked Lake for the rest of the season. . . . So it seems that all enjoyed their two weeks. To you who may have that "after vacation letdown," we say, cheer up! It's only a year until next August.

The Japanese House of Representatives is sending some members to watch the U. S. Congress in action. This is apt to make them wonder how they lost the war.

Safety Supervisor Inspects Device That Prevents Injury To Fingers

F. T. Clarke, (right), Supervisor of Safety for the Apparatus Department, hears Gerald Crum (left) tell how his finger was saved by using a hook (indicated by arrow) instead of his fingers in removing material from a punch press die.

Mr. Clarke is holding the damaged material and the hook, which was badly chewed-up when the press unexpectedly tripped.

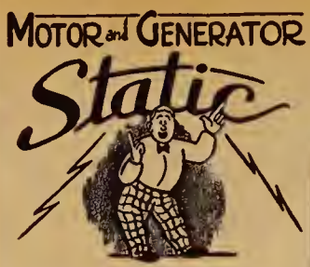
Paul Noffze, (center), die setter, has a right also to be pleased with this "no injury accident." This hook is part of his collection of tools and gadgets which are used as mechanical fingers to place material in the die. Paul and the other employees working on punch presses in Bldg. 26-1, Transformer division, never try to make one plier design handle all kinds of materials. They make the tool fit the material. These tools range from simple duck-bill pliers to 110-V electric magneto.

Mr. Clarke made an inspection tour recently of the Broadway and Taylor St. plants.

Apprentice BROADCAST

by MILDRED ELLIS

James E. Hoppel, son of Mr. and Mrs. James B. Hoppel of 1534 Taylor St., became the bridegroom of Maxine Rinehold Saturday evening, July 30. The ceremony took place at the Westfield Presbyterian Church.



As the groom approached the altar, he was the cynosure of all eyes. Blushing prettily he replied to the questions of the clergyman in low, but firm tones. He was charmingly clad in a two piece suit consisting of coat and pants. The coat of some grey wool material was prettily draped above the shoulder and had a very tasteful fullness under the arms. A pretty story was current among the guests that the coat was the same one worn by his father and grandfather on their wedding days. Mr. Hoppel would neither affirm nor deny this sentimental touch. The groom's pants were of the same grey wool material and were suspended from the waist falling in a straight line almost to the floor, revealing just an artistic glimpse of blue hose worn right above brown leather shoes with lacings of the same color. The effect was very chic. Beneath the coat the groom wore a snow white shirt, encircled with a collar, under which he wore a loosely knotted blue tie, which gave a studied effect of carelessness, which marked supreme artistry in dress.

The groom's man's costume was essentially like the groom and as the two stood at the altar, a hush of awed admiration enveloped the audience. Neither Mr. Hoppel nor the groom's man wore a hat.

After the clergy man pronounced them man and wife, Mr. Hoppel presented his bride with a cavemanish kiss.

As the bride led the groom from the nuptials, it was noted that she wore orange blossoms.

MOTOR and GENERATOR Static

Thought For the Week: An intelligent man seldom needs advice; an unintelligent man can't use it.

Ed Foley, our "Greek" division editor, is enjoying a third week of vacation. We miss his happy smile and ability to get news but the poor old man really needs the rest. . . . News is scarce—everyone seems to have enjoyed their vacations, but have nothing to say about them.

Ramblings 31-2

Back to our desks and the drafting boards, we find the majority of us are here. The exceptions include a few lucky people who get three weeks vacation in a row, namely, Ray Hamilton, "Tiny" March, Joe Shelly, Ross Van Horn, Claude Charles, and Charles Thompson. . . . On our sick list we have Charles Waltemath, Sam Stillwell, Art Fruechte, and Paul McKeeman. Paul sprained his ankle during maneuvers for the National Guard. . . . Speaking of maneuvers, Don Kent is maneuvering for the Air Guard this week and next. . . . On checking further we find another face missing, that of Paul Gratny:

He was born in Kansas
He was bred in Kansas
And when he gets married
He'll be wed in Kansas
To his little Sunflower
From the Sunflower State.

Paul was married to Shirley Varnum August 14 at Yates Center, Kans. . . . Three apprentices who worked with us before are back again for another session with M-G drafting. They are H. C. Fremion, C. Z. Hubartt, and Ralph Obringer. . . . "Curly" Mannan almost lost his bathing trunks while demonstrating one of his dives for his daughter at Lake James. The dive must have been a fancy one.

. . . Bob Walworth has some new techniques in mountain climbing to show "Tiny" March. While motorcycling in Pennsylvania, Bob avoided getting jammed between cars by making his cycle climb up a mountain. Rough riding; Bob and his wife were thrown from the motorcycle. They ruined the front wheel of the cycle and their new riding boots, but they are O.K.

We have finally discovered what Dr. Gumpert was talking about in his article, when he said that Fort Wayne is two years behind the times in fashions. As we went from one news stand to another this week, we kept getting the same explanation from all the clerks: NO NEW LOOK!

Appointments Announced In FHP Motor Divisions

H. B. Carter

J. H. Behm

The appointments of H. B. Carter as Assistant Manager of Engineering, Fractional Horsepower Motor divisions, and J. H. Behm as Division Engineer, A.C. Motor Engineering division, were announced recently by J. J. Clarkson, Manager of Engineering, Fractional Horsepower Motor divisions.

Mr. Carter is a graduate of Kansas State College, receiving the BS-EE degree in 1927. After his graduation, he entered the Company's test course at the local works. The next year he was assigned to the FHP Motor Engineering division in charge of split phase motor design.

In 1939 he transferred to the Decatur plant as a section engineer. Mr. Carter returned to Fort Wayne in 1941 as an engineer in the Magneto division. He later became Section Engineer of that section.

Went To Kokomo Plant

He then became Supervisor of Engineering at the Kokomo plant, and in 1945 came back to Fort Wayne as Section Engineer of the A.C. Motor section. Since 1948 he has been Division Engineer of the A.C. Motor Engineering division, FHP Motor divisions.

At the present time Mr. Carter is a director of the G-E Club, a member of the G-E Squares, Fort Wayne Engineers Club, American Institute of Electrical Engineers and the Reserve Officers Association. His hobbies include fishing and photography.

He is married and has two children. The Carters live at 1707 Fairhill.

Behm Is Syracuse Graduate

Graduating from Syracuse University in 1929 with a BS-EE degree, Mr. Behm first came to General Electric as a test engineer at the Schenectady Works.

He came to Fort Wayne in 1931 and until 1943 did design engineering work in the FHP Motor Engineering division. From 1943 until 1945 he was Assistant Section Engineer of the Aircraft Motor section. He then was appointed Assistant Section Engineer of the A.C. Motor section, and when the section was made a division he became Assistant Division Engineer.

Mr. Behm is a Professional Engineer, a past president of the G-E Squares and a past president of the Kirkwood Park Civic Association. His hobby is redecorating his home.

He is married and has one son. He lives at 3415 Kirkwood drive.

Roebel Receives Retirement Gifts

On his last day with General Electric, John Roebel, of the General Tool division, received several retirement gifts from his co-workers and friends. Left to right in the picture are: Lloyd Welbaum, Hubert Suelzer, Lowell Welker, Ralph Foust, Frank Druhot, Gus Rodenberg, Mr. Roebel, Carl Einseidel, Rein Lepper, George Hartman, Charles Abbott, Edwin Kammeyer, and E. D. Steward, his foreman.

Quarter Century Club To Celebrate 35th Anniversary

H. C. BEERS
Employed 1887 - Died 1923

FRED F. MILLER
Employed 1887 - Retired 1924

The 35th anniversary of the Fort Wayne Works Quarter Century Club will be celebrated Saturday, Sept. 10, at the club's annual outing at Camp Limberlost, Oliver Lake.

The club had its beginning on Oct. 2, 1914, when 30 employees met to organize a section of the General Electric Quarter Century Club of the Schenectady Works.

The first formal meeting of the club was held at the Anthony Hotel on Jan. 17, 1916, when A. F. Rohrer, president of the club at Schenectady, suggested that the Fort Wayne members form their own chapter. There were 27 members present at this meeting.

Barnes Is First President

E. A. Barnes was elected as the club's first president and M. S. Wilson, its first secretary.

In some way it happened that the name of William Driftmeyer does not appear on the list of charter members, although he was an active participant in every stage of the plant's early development. He took part in the arrangements for

CHARTER MEMBERS

Tricks In Transformer
—FROM DIVISION 91—

By Johnny McMaken

Everyone looked quite refreshed this week, as they came back off their vacations. . . . Paul Conrad was in Canada fishing. He says he really got the walleyes. . . . Bill Gepfert spent his time relaxing on the farm. . . . Melvin Leykauf said he had a wonderful time in Wisconsin. . . . Herman Conrad stayed at home so he could beat the drums in the American Legion parade. . . . Doyle Miller spent his time at the Allen County Fair. In fact, he liked the Hep Cat show out there so well that he wanted to buy it and wanted Jim Stauffer to go 50-50 with him. He liked Baby Dumplin's act the best. . . . Joe Collis went to Chicago and had quite a time. . . . Carl Deitsche also went to Chicago for a few days. . . . Russell Peabody spent the biggest part of his vacation listening to the juke box at Monroeville. . . . Richard Kramer went speed boat riding and the boat turned over, giving him quite a scare. . . . We would like to extend our belated sympathy to Paul Stiverson upon the death of his father. . . . We are all very sorry to hear of the illnesses in the families of Howard Oesch, Alrich Johnson and Rowand Parker, and would like to wish them a speedy recovery. . . . Paul Noffze says he will be honest, no fish. . . . Fred Thieme, in driving down the center of the highway, hit a flower bed and blew out two new tires.

Sample Shop News, 26-2

Now that vacation is over maybe I can scare up a little news from the Sample Shop. . . . We are glad to see Brownie back to work so soon. She had a minor leg operation during her vacation. . . . We are sorry to hear that Jean Fry's boy was taken ill during her vacation, but he is feeling better now. . . . Harry Brattian spent his vacation at his summer lake home. . . . Millie Strickler spent her vacation seeing the sights of Chicago. . . . Mr. Hobbs would like to take up laying linoleum for a pastime as that is what he did during his vacation. Please don't take me serious on that remark. . . . Lucille Stover spent some of her vacation mixing concrete so her Dad could make her some new steps. How about coming out to my place, we need some new steps. . . . I went to the great land of Northern Michigan and I caught plenty of fish, too, but I don't go into detail as you know how fish stories go. I did see a baby cub bear about 150 pounds which stayed right behind the cabin we occupied.

35th Anniversary

(Continued from page 6)

the Langley dynamo and arc lamp in July, 1881, which resulted in the organization of the Fort Wayne Jenney Electric Light Company, the predecessor of the present Fort Wayne Works of the General Electric Company.

At the present time, three charter members of the club are still living. They are E. A. Barnes, A. L. Hadley, and F. S. Hunting. Mr. Hunting left the company in 1922 and is the organization's only Honorary Member.

Charles E. Becker, Harry Prange, S. E. Palmer, W. N. Wehrs, and J. H. Rehrer are 50-year members.

First Woman To Join

The first woman to join the Fort Wayne Quarter Century Club was Jennie Wright, who was elected to membership on March 21, 1917.

The club's first outing was held at Tri-Lakes on Sept. 11, 1917. The outings have been held every year except during the war period. This year will be the fourth year that it has been held at Camp Limberlost.

As of January 1, 1949, the total membership was 1,520. This includes:

Men, active	1,144
Men, retired	246
Women, active	103
Women, retired	27

The latest figures show a total of 1,554. Up to July 1, a total of 47 new members were added to the roster. Thirteen deaths have been recorded during the first half of this year.

Congratulated For Long Service

Edwin Kammeyer, General Tool division in Bldg. 19-4, completed 30 years' service with General Electric recently. At that time, he received a congratulatory letter. Attending the presentation of the letter were: (seated, l. to r.) Lowell Welker, Mr. Kammeyer, R. C. Renfrew, foreman; and Frank Druhot; (standing, l. to r.) C. A. Brenner, Division Supt.; Charles Abbott, Reinhold Lepper, Ralph Foust and Harry Mitchell.

"1949 Vacation Shutdown" — those magic words have now lost their charm. All we have to do now is rest up from our vacation, accumulate a little in preparation for the next big events, first Labor Day, then Thanksgiving and Christmas. We look back and wonder just where the year has gone and what we have accomplished. Speaking of the passing of a lifetime in such a hurry—here are a few words of wisdom by the "great philosopher" Garland "Sid" Raney of Bldg. 18-3

"I strove with none for none was worth the strife
Nature I loved, and next to nature—Art
I warmed my hands before the fire of life.
It dwindles—and I am ready to depart"

The girls in Bldg. 18-2 had a luncheon in the dining room for Mary Brouwer on Thursday. She is leaving us to await a "Bundle from Heaven." Best of luck, Mary, and we all offer to be baby sitters for you. . . . Our good friend Jerry Simpson is at home after a sojourn in the hospital. He would like to have us tell all of his friends who called upon him in the hospital that he really appreciated their visit. . . . Chester Lichtenberg and his family enjoyed a trip to Colorado during the vacation time. . . . C. H. Weber and family spent their vacation in California, making their headquarters in San Francisco. . . . The A. S. Johnsons headed south. They don't mind the hot weather. . . . Jean Ehringer, Bldg. 18-1, who left the Friday before vacation, was presented a very pretty Eisenberg pin by her friends. . . . We would like to offer our very best wishes to P. O. Noble. From all reports he must have had a grand farewell and it will take him the greater part of his leisure time to look over the many useful gifts presented to him.

Vacation News From Bldg. 18-4

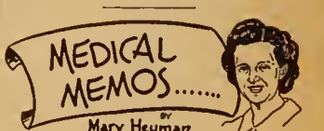
Gloria Koebel and her husband vacationed at Lake Gage. . . . The fish did not bite very well, but Mr. Kellermeier enjoyed his fishing spree in northern Minnesota. He said he would like to live there—only—the weather is too cold. . . . Carter McLaughlin combined painting with his fishing. . . . The Leiningers (John of Bldg. 18-4 and Dorothy of Bldg. 18-1) travelled to Boston, Mass., and the New England States. . . . Phil Singleton and family enjoyed the comforts of Lake James instead of traveling. Little 10 month old babies would rather stay put than travel. . . . A. Reynolds visited his alma mater—Iowa State, attended All Star football and baseball games in Chicago with a little golfing in between. . . . The Shields, of course went home to South Carolina. . . . Annabell Redding, with her family, enjoyed a beautiful motor trip to Mackinac, through Northern Michigan and then to Chicago. . . . Esther Sears did some vacationing at Rome City and Chicago too. . . . Jean Grant did a lot of resting, as did Betty Mueller. . . . Marjorie Meyers really did things up brown. She and her family travelled over 2,617 miles to Cleveland, Buffalo, Niagara Falls, through to Montreal, Grand Island in Canada, on to visit the New England States. Oh yes, New York City, then to the boardwalk at Atlantic City for some bathing then back home. . . . Paul Lenz "did" Chicago too, and said he saw many people from Fort Wayne. . . . Virginia Worden spent a week in Colorado where she visited Pikes Peak, Garden of the Gods, Estes Park, etc. "Nothing like the grandeur of the West." . . . Edna Welch visited relatives in Indianapolis and at Sylvan Lake. . . . H. F. Volmerding "just rested," he said. . . . Mr. and Mrs. Doyal White just enjoyed being home and relaxing. . . . Fred White had a wonderful vacation. Where? When? It doesn't matter, just a wonderful time. . . . It is impossible to cover the "post vacation" news thoroughly—but from all reports it would seem that the weatherman was wonderful, the highways wonderful, the fishing wonderful! So—isn't it wonderful to be alive?

The most popular brand of cigarets in many homes is pop's.

Store Begins To Fill Reservations For New Models Of G-E Mixers

The Employees' Store is now filling reservations for G-E mixers, Ray Fischbach, store manager, announced today.

To date 75 reservations have been filled. Notices will be sent to those on the list as soon as more mixers are made available.



A shortage of mixers was created earlier in the year when a new model was designed and production changes were needed. These new models are now in full production and contain many improvements over the old style. The completely redesigned, portable

mixer (shown above) weighs only 3½ pounds without the base and occupies considerably less space.

Hope you have missed our column recently but will look forward to it each week in the future. . . . From all reports of our co-workers in Personnel their vacations were a huge success. The majority returned a few shades darker than before, due to the contacts of "Old Sol". "Go West for a grand vacation" is the advice of many this week. Those who enjoyed the beauty and natural splendor of the Golden West were Jean Smith, who journeyed to Colorado, and Marian Davies, who is exclaiming over Los Angeles and a breathtaking horseback ride through the mountains. Laurene Procise and Marian had exciting experiences while horseback riding and are quite content to stand for awhile. . . . Mr. Freeman is vacationing at Rocky Mountain National Park. . . . Cora Polhamus rested at the Sand Dunes. . . . Don Campbell went home to visit his folks. . . . Ceal Romary went to the lake, but is a little modest about telling fish stories. . . . Again we hear the pitter patter of little feet in the hall — those of George Waldschmidt, whom we all welcome back after an operation. . . . We wish a speedy recovery for Irene Meyers' father, who is still a patient at Lutheran Hospital. . . . Believe it or not, Herschel Smith has proven himself to be quite a trapeze artist and for proof he has a sore chin. What about those muscles, Herschel? Aren't they sore? . . . Our choice for a "quickie" this week was Ivan Rinehart's reply to Irene Meyers' exclamation "You're wonderful." He very matter of factly stated, "I know; all the girls tell me." . . . Your former reporter, Iris Knapp, is now the proud mother of a darling baby girl. Congratulations, Mom and Pop! . . . These are busy days for Al Hartman, who is keeping occupied making preparations for the Quarter Century Club picnic. Sounds like they are going to have a good time. . . . Happy birthday, Ceal! . . . We will leave you for this week with this thought, "Happiness is not something you find; it is something that must be created."

Here's to the chigger with a head no bigger
Than the point of a tiny pin.
But the welt he raises hurts like blazes
And that's where the rub comes in.

We hope everyone had a grand vacation. Even though there may have been a few cases of sunburn, poison ivy, chiggers and such minor discomforts, they were small in comparison to the relaxation and happiness we received. . . . Dr. Garton mixed some fishing and relaxing along with work at his home. . . . Dr. Murdock was subject to call, so his vacation will be later in the season. . . . Lakes in Michigan beckoned Olive Walters. . . . Lyle Rupert took life easy, except for a few short trips. . . . Mabel Wilson headed towards her cottage at Turkey Lake. . . . Just to be different, Berneta Welbaum was on duty in Bldg. 21 during the shutdown. . . . Alta Bishop was in the clouds and on her honeymoon as Mrs. Lou Mayle. . . . Bertha Schrader's sister from Napoleon, O., was a visitor. . . . Imo Jean Schwartz and Florence went to Niagara Falls and Canada. . . . As for me, accompanied by three nurses who were classmates, we turned the Plymouth south and were New Orleans bound.

4-1 Floorage

By Marie Lantz

It's back to the work bench—now that the two-week recess, more commonly called, "our vacation," has ended. But has it? For many memory will keep those happy hours alive and revive reminiscing. Many were lured lakewards in response to rod and reel; some traveled to distant or different places; others were content to stay at home to catch up on tasks undone. Fisherman's luck ran rampant for some; for others it lagged. George Hahn and Ray Flueger, of "Oh where, oh where did our little worms go" fame, actually beat the bait problem and fished. Luck was theirs at Big Lake for George and Wisconsin waters for Ray. . . . Bill Oberlin, who stayed at Lake James, motored to Michigan for his heavy catch. . . . It is now appropriate to call him "Big Bass Berdleman." For proof Roy plans to show a snapshot of the 5¼ pounder he caught at Pretty Lake. . . . Paul LeCoque divided his time between the angleworm and the birdie. He fished in Michigan, but his greater love, golf claimed most attention. . . . Avery Spayde was another angler not content with Hoosier fishing. Hamilton Lake was his habitat and Michigan his fishing spot. . . . Richard Polston, a newcomer from the Winter St. plant, was devoted to the paint brush and the fishing pole. His house got a coat of paint; Dick got a coat of tan and Barbee got a fisherman. . . . At Rome City, Howard Hoffman was another lucky angler as was Ray Dotzer at Big Long Lake. Ray also was a visitor at the Henry Cluts home at Shriner, Tri-Lakes. According to Henry, Ray was busy watching beach belles, but Ray insists he watched Henry handle hot-stuff. In other words, Henry installed a furnace. . . Among those unfortunate anglers whose luck lagged was George Bear at Blue Lake, Galen Kreigh at Ridinger, Maurice Humphrey at West Lake and Harry Kokosa at Clear Lake. . . . Not long ago but far away was Ruth Nordyke's trip through the scenic Smoky Mountains. . . . Jane Crisemore and husband got gills in Wisconsin, where they visited the Dells. Jane came back to bad news; an eight-year-old nephew, who lives in Muncie, became a polio victim. His condition is reported "fair" at present. . . . Chicago cast a come-hither invitation to Chester Hill who had an enjoyable visit with relatives at the Windy City. . . . Herman Baumgartner spent three weeks traveling through the great Southwest. He saw Hollywood and six national parks. . . . New Orleans was the destination for Kurt Trapp, who traveled by train to visit his daughter there. . . . Howard Taylor was westward bound, visited brethren away out Ogden, Utah way. Howard reports that they believed everything he told them—and, we suspect, his tales may have been as tall as their mountains. . . . Ed Green, another newcomer from Winter St., painted his house, then made a trip to New York and Niagara Falls in his new Chevrolet. . . . The board walk beckoned to Jim Rohlman who drove to that famed Pageant City, Atlantic City, and back. . . . Another "motor-minded" is Ed Johnson who drove down to Southern Illinois. . . . It is rumored that Kenny Zinc enjoyed his Michigan trip so much he went back for the second week. . . . Then again, there were a number of stay-at-home vacationists. Among them we list Alva Barker who put a basement in—under his year-around home at Little Cedar, Tri-Lakes; Fred Higgins who painted his house and Adam Flager, Kuzler, Howard Koehl, Yours Truly, Carl Brehmer and Lois Waterson who just puttered about the premises. Lois, who lives in Huntertown, visited in near-by localities, spent a day at Bixler Lake. . . . Lest we forget—there's more on Moore. Jess went fishing at Old Lake, and, remembering his wife's plea to bring home some fish—he did—ones he purchased at a local grocery store.

Celebrates 30th Anniversary

Adele Wietfeldt, FHP Motor Div. 17 at Taylor St., recently celebrated her 30th anniversary at General Electric. She received a congratulatory letter on her long service with the Company. In the picture are: (l. to r.) Mary Green, Mildred Behler, Virginia Emerick, Harley Springer, Mary Beihl, Nellie Williams, Luella Ternet, Adele Wietfeldt, Mabel Moser, B. B. Gausepohl and Rebecca Fogwell.

Who's Excited: On Monday morning the exciting stories of places our members visited began to unfold, and what a tale it is. . . . Seems the Smoky Mountains was the leading point of interest. Mr. Saurbaugh, Dot Fletter and Betty Millhouse were our representatives to that scenic spot. . . . Hazel Smith and Del Bucher gave Niagara Falls and Canada a look-see, and Helen Elbert visited Mackinaw City, Mich. . . . Del Bucher had a little trouble keeping on roads that went as far as he was going. Generally speaking the trip was a success. . . . Teresa Arend took in Cleveland and Lake Erie. She's a wee bit stiff from carrying a boat to the lake so she could go boat riding but it was fun anyway. . . . Hilda Krause went way out yonder to the Sunflower State, then down to the big rabbit country of Texas. Hilda says no state in the union has rabbits as big as Texas, in fact she sent a picture to prove it. . . . Buck Buchanan also went out where men are men, etc., and took in Mother Nature's panorama of beauty. . . . A card from Eileen Fitch revealed that she spent her vacation taking in the sights of Fort Wayne, Ind. . . . Lenora Hanley had a G-R-A-N-D time in the Big Town (New York, that is). . . . The rest of the boys and gals spent their 10 days in and around Fort Wayne and its numerous lakes.

INCREASE IN STOCKHOLDERS IS REVEALED

The General Electric Company has a total of 250,591 stockholders as of June 17, 1949, the record date of the dividend payable July 25, William W. Trench, Company Secretary, announced recently.

This notes an increase of 1,134 stockholders over the total of 249,457 reported for the corresponding period of 1948, and an increase of 705 stockholders over the total of 249,886 reported for the previous record date of April 25, 1949, Mr. Trench said.

More than 25 per cent of the stockholders are small holders owning from one to 10 shares, the Company Secretary said. Brokers, banks, bank nominees, and other business enterprises total less than two per cent of all stockholders, while trustees, guardians and other fiduciaries number about 10 per cent.

LeLeury Dies

Aarwood R. LeLeury, 46, of 1645 Steup St., died at 1:30 a.m. Monday in St. Joseph hospital. He had worked in FHP Div. 17 at the Taylor St. plant.

Survivors include his widow, Edna; mother, Mrs. Ruth LeLeury; a sister, Mrs. Dale Harbaugh, and three brothers, Jack, Robert and Bean, all of South Bend.

Services were held yesterday at the Pasco funeral home, at Greenfield, Ind. Burial was in Park Cemetery, Greenfield.

Scientists reveal that the chirp of the cricket is not a love call. Just a nuisance.

A mockingbird in Mobile, Ala., built her nest on a ferris wheel. Guess she wants her young ones out in the best circles.

Ho-hum another vacation gone with the wind! Only 343 days until the next one. You can start marking them off one by one, save your pennies for that trip next year and look over the pictures you took this year and enjoy your vacation all over again! . . . Les Hubbart says that there is every kind of fish that you can think of in Crooked Lake, but that they don't bite very often. . . . Mardo Tobias had good luck with his fishing. He caught all he could use and brought some home. . . . Paul Ginder said they only had to fish about half an hour a day to catch all the fish they wanted to eat. He was fishing in Minnesota. . . . Marie Griffin kept calling all day long trying to get an appointment at W. & D's so she could get her hair cut, when suddenly she remembered that it was Monday and they were closed. . . . Alva Foulks is sporting a new Chrysler. He says that he is a salesman too. Anyone needing a car, see Alva. . . . Carl Smith has gone back up to Bldg. 4-4. Sorry to see you leave 1x29, Carl. . . . Evelyn Petgen has moved into her log cabin and says it is wonderful in the country. . . . Frank Brindle was in an auto wreck and has a banged-up ankle. Hope you will soon be back to work, Frank. . . . Edna Hergenrader is in the Methodist hospital recuperating from an operation. Hurry and get well, Edna. . . . Jerry Kraft who formerly worked with us was married August 6. Lots of luck and happiness to you and Mildred. . . . Speaking of "The Egg and I," Eleanore Kohrman was slightly late one morning just before vacation so she threw some lunch in a sack. Among other things she threw in was a fresh egg. Some cook! . . . We are sorry to hear of the death of the mother of former co-worker Carol Eastes. . . . Our sympathy to Louie Barrow whose grandchild died while we were on vacation. . . . THE INNOCENT BYSTANDER advises Mr. Mettler if he wishes his picture in the Roto-gravure section in the future not to depend on just one picture—but to have more than one shot taken.

Only one ad per employee may be inserted. Each ad must be limited to 20 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday Noon, August 22, 1949

LOST AND FOUND

LOST—Pair of glasses with clear plastic frames. Lost in Bldg. 4 or Fairfield parking lot.

FOUND—Gold stick pin with gold chain. Turned in at Bldg. 19 gate house.

FOR SALE

WARDROBE TRUNK—E-1345.

GREEN HOBNAIL BEDSPREAD—Pressure canner, small electric heater, black formal, colonial dress, garage windows, screen; name your price. E-38782.

WOOD LATHE—Dunlap, 38 in. with 9 in. swing and Craftsman highest quality cutting tools, like new, $30. H-32035.

1937 DESOTO SEDAN—Radio, heater, recently overhauled. H-60781.

TWO-PIECE LIVING ROOM SUITE—H-58213.

G-E WASHER—Good running condition. 3235 South Harrison.

SIX STORM WINDOWS, 28x71—Six window screens, 28x71; two-wheel trailer. A-69482 mornings.

EXTENSION LADDERS—36 ft., reasonable. A-85972.

HORTON IRONER—Portable model, in excellent condition, reasonable. H-37843.

MAN'S BICYCLE—26 in., good condition. $10. H-66332.

AXMINSTER RUG—9x12, light blue and rose pattern, about seven years old but kept in good condition. $10. H-03238.

FOR RENT

COTTAGE AT WALL LAKE—Refrigeration, inside toilet facilities, two boats. H-3470.

ONE ROOM MODERN COTTAGE—Sleeps four, Oliver Lake, Aug. 27 on. A-70951, 615 Sturgis.

TRANSPORTATION

WANTS TRANSPORTATION — John Kinnell, from New Haven. Works in Bldg. 26-1 from 7-3 or 3:30. 938 Power St. or New Haven 6613.

The Partizan Chapter of Elex extends a cordial invitation to Elex members who have retired or married and are no longer employed at General Electric to join the Chapter. The club meets once a month.

Anyone interested in joining should contact Kathryn Cullen, president of Partizan, H-0571, or Margaret Tomson, the secretary, H-44134.

Some of the highlights of vacations and of the fishermen's stories are: Al Rondot and wife were fishing one day and they started into the cottage with 27 fish, but when they arrived at the shore he only had three left. Al, you had better watch for the holes in the bag. . . . Wedding bells rang for Evelyn Johnson to George Sanson Wednesday, August 3. Best wishes, Evelyn. . . . Those bells also rang for Don Rose. Congratulations, Don. . . . If anybody is interested in golf see Art Bashelier. He won a new set of golf clubs last week.

"Stup"—I want to apologize for my error "Female Alumni" in the last issue. Can't make any excuses—should have known better. . . . Shower: The girls of the Production Division honored Deloris Soule and Celest Moran with a bridal shower on Monday evening, July 25. The party was held at the home of Irene Whelan. Towels were hemmed for the two bride-elects and several contests were enjoyed. Deloris was presented with a waffle iron and Celest, a light weight electric iron. . . . Vacations Across the Nation: The Tabulation Section was well represented. Mary Olsen spent her time at Glenwood Springs, Colo. Dorothy Balens journeyed to Washington, D. C., and went by plane from there to Norfolk, Virginia. Ella Cox, Joan Cormany and John Oldenkamp went out to sunny California. Ella tells us that the weather in Los Angeles was marvelous, but she was happy to return home. Frances Jailor saw the straits in Northern Michigan. Reba Coffock met with misfortune at Toledo, Ohio. She and her husband crashed into a telephone pole in order to avoid crashing into a car, which had stopped suddenly in front of them. They really wrecked their new Nash. Reba escaped with severe bruises. They were on their way to upper Canada, but had to return to Fort Wayne via train. We all hope you are feeling better, Reba. Better luck next year! . . . Leonard Krumbigel visited the Toledo Zoo. Irene Whelan and Abbie Hartman were two "stay-at-homes". . . . Al Voltz had a nice vacation tanning and fishing at Webster Lake. Keith Ross spent his vacation in Colorado and the Black Hills. Bob Sharrow vacationed in the West, Grand Canyon and Yellowstone National Park. . . . Delores Giltz visited Florida and the Smokies. She caught a bucket full of fish while in Florida. . . . Mabel Waggoner, Wilma Kirby, Marge Walker and Betty Rose were New York visitors. Mabel also visited Northern Michigan. . . . Ray O'Keefe visited South Dakota and Colorado. Stanley Tomkinson and Julian Stark spent their vacation at the National Guard encampment at Camp Atterbury. . . . Forrest Carlson took what was supposed to be a short cut on his drive to Des Moines, Iowa. It turned out to be 40 miles longer. . . . Misfortune: Dick Heard has been driving his car with a hole in the windshield for a long time. During his vacation, in Northern Michigan, he had a new windshield mounted on his car. You guessed it! The following day while driving on a gravel road, a rock bounced up and put a hole in it. . . . Wedding Bells: Mary Ohlwine, Developmental, became Mrs. Wilmer Leitch in Albion, and Deloris Soule beeame Mrs. William Koch Saturday, Aug. 6; also Carl McKay was married during vacation in Georgia. Best wishes to Deloris, and Mary. Congratulations, Carl. . . . Frank Moody seems to have "gotten the clue" from the gals—shoes off equals comfort in hot weather. . . . Sympathy: We all extend our sympathy to Lou Davis whose mother died while he was vacationing in California. . . . Cricket: Norm Oetting uses his bathtub for a cricket cage. This works fine except that they keep Norm awake at night. Does anyone know how to "De-Noise" crickets? . . . Water Wings: Ask Paul Ohnesorge about swimming lessons. It seems that after taking two lessons Paul was given a refund. They gave him up! . . . Odds and Ends: Wier Anderson still has three puppies for sale. . . . Happy birthday to Walter Gerke, August 6. And we all hope you like your new home. More Vacations: D. C. Reek and family, Wisconsin. Carl Vizithum and Judy Clark, Pennsylvania. Mary Ellen Duer, home in Ohio. Ruth Burris, home in Western Kansas. Nate Horton, Oklahoma. It was so cold there that they had to use blankets at night. Mildred Heinkle and family, Detroit. They saw the Chicago-Detroit baseball game. Kate and Joe Gardt, Saulte Sainte Marie, Mich.; also Mackinac Island and Traverse City. Kate acquired a new hobby, making bears sing. See Kate for details. . . . O. R. Foltz and H. C. Bradley went fishing in Northern Michigan. All Mr. Bradley "got" was a sunburned lip.

What supervisor called his own telephone number and couldn't understand why he got the busy signal? . . . Congratulations to Mr. and Mrs. Virgil Snyder; their baby was born July 22. A girl, weighing 7 lbs. 12 oz. Janet Lou and mother are both doing nicely. . . . If "Pappy" Grier didn't have such big feet, he wouldn't have so much trouble letting up on the accelerator. We thought he would break this new Buick in right. . . . Walt Neimeyer laid over a day in Denver, Colo., so Mr. Skevington could catch up with him. We also hear Walt was showing his traveler's checks to the gang and his wife's name appears on them. Poor Walt won't be able to go any place alone. . . . Wilbur Poehler worked last Saturday and then went to Wabash to buy a new suit. What's the matter with Fort Wayne, Wilbur? . . . Russell "chop-chop" Scherrer has his new set of teeth. It's amazing how well he can eat an apple. . . . We hear Mrs. Fred Vogt still has a tough life. Her husband Fritz, purchased a new lawn mower and she still has to use the old one—poor woman. . . . Walt Niemeyer is going to the great state of California, and we imagine he will still talk shop if his old buddy is on the same train. . . . The big City of Zanesville will get a new family now. The Forest Grims intend to live there. . . . Fritz must be getting old. We saw a bottle containing a liquid from the Fountain of Youth. Is it that bad, Fritz? . . . We don't imagine Mrs. Daniels will carry the door key in her purse since Danny had to remove the hinges from a door in order to get in the house. He didn't work last Saturday and Maxine did. . . . Louie Botteron is still asking Herb Sesslar how he should go about overhauling the family car. What's the matter, Louie, won't it run yet? . . . Myrtle Barfell took an extra long walk last Saturday. She got off at the East Gate and found it locked. . . . Tom Edison (Bill Lavine) plays at inventions. Don't forget, Bill, sometimes neighbors object to loud noises. . . . We've all heard of a horse throwing a man, but Ife Holmes has that story beat. Last Saturday morning his chair threw him—right on the floor. . . . Belated birthday wishes to Mr. Holloway and Mr. Bobay. . . . Happy birthdays for August go to Louise Roberts, Bertha Witte, Russell Runkle, Walter Kritzman and August Zollinger. . . . The Van Hoozens and Curtises had a lovely time last week-end except for upsetting the picnic table on the men. Iced tea flew all over the place.

"A big heart is better than a big house."

Vacation was not long enough for Hilmer Drayer. He didn't awaken until 9 a.m. last Monday. He had driven 900 miles to get home in time for work and then didn't get in until noon. He wants to get used to working gradually so a half day is enough to start with. . . . Jim Kavanaugh did better than most of the tool room boys. He got as far as Chicago where he ran into a bridge tournament and he was lucky enough to come out with a first in the Chicago Cardinals Open Pair game. . . . Joe Haas survived two weeks of intensive training at Camp Lejeune. He claims the worst obstacle was the heat. It was over 100 degrees every day. . . . We extend our sincere sympathy to Jerry Koehl whose father died while attending a Daisy ball game. Jerry was sitting with his dad during the game. . . . Ed Bienz took a trip down the east coast. . . . Steve Sallot went to the Lower Peninsula in Michigan to do some fishing. The size of his fish are used for bait around here. . . . For you housewives interested in a different way to cook potatoes, Gene Wheeler has discovered a new way quite by accident. To conserve time he cooked them in a pressure cooker and tried to hurry them by removing the lid a bit too soon. I believe they could be called a sort of "upside down" potato. They went to the ceiling, where parts of them remained, and others came zooming down all around the place. Me?—I'll take 'em fried. . . . Owen Cartwright took a trip through the Smokies, Virginia and North Carolina. . . . Mary Beaman is back to work after an illness of almost two months. . . . Herb Langer went to the lake for a few days and can only say the neighbors' "drinks" were cold. . . . Some are wondering why Floyd Garland hasn't mentioned his golf score recently. . . . Dale Springer visited friends in Pennsylvania during vacation. . . . Harold Hohman spent a restful two weeks at the lake. The fish didn't even bother him. They didn't seem to bother Walt Buesching either, but he tried to get them. . . . Ralph Walda had a good time on his trip to Arizona and New Mexico.

M. B. A. SICK LIST

James Mitchell, Donna Backofen, Luella Bixler, Goldie Kelly, Frank Romanowski, Milford Toney, Loraine Moran, Rosella Farrell, Warren Jackson, John Banks, Kenneth Beek, Opal Brayton, Olnie Kincaid, Mildred Snyder, David Kelker, A. C. Fruechte, F. W. Cooper, Kathryn Beltz, and Lillian Kidder.

Left Hospital

Edward Hauke, Sherman Stilwell, Kenneth Beck, Norbert Hans, Freida Farley, and Elihu Lee.

Returned To Work

Alice Nichens, Elmer Zelt, Joseph Middendorf, William Glenn, Theodore Roehm, Genevieve Manecke, Herbert Bobay, Catherine Parkins, and Robert Skinner.

A Boston judge told a ventriloquist he'd have to choose between his dummy and his wife. He chose the dummy. Probably just wanted the last word in any argument.

Inquiring Reporter:

WHAT DO YOU THINK THE VOLTMEN'S CHANCES ARE FOR RETAINING THEIR CHAMPIONSHIP TITLE?

WILLIAM C. MILLS, JR.

Bldg. 26-5

"In my opinion, it is hard to predict the future of any ball team, for so many things can happen. However, I think the Voltmen's chances will be good, with luck and loyal support from the fans."

DOROTHY JOHNSON

Bldg. 17-3

"Yes, I think the Voltmen will retain their Championship title in 1949. With good management, great team work and all G-E fans behind them, they are bound to come through."

HENRY PAPENBROCK

Bldg. 19-1

"Chances are good. They have good pitching, rather light hitting. The fielding at times is very good. They are members of the strongest semipro league in the country, and I don't believe they have quite as tough competition in Wichita."

BILL DOEHRMAN

Bldg. 20-1

"Getting away to a poor start in the beginning of the season, they are now playing better ball. To retain the Championship again this season, however, they will have to improve the infield. They are a little weak at short and need a good left-handed first baseman. Pitching is good and they have a good catcher, and I would say the outfield is fairly good."

LOIS DREWETT

Taylor St.

"I think that once they can start to click, there is no reason why they can't retain the title. If anyone can bring them through, I think Manager Braden is the man for the job. I'd certainly like to see them do it."

Majors Win Four Games

Drop Second Bid At ASA Tourney To Ossian, 4-0

The G-E Majors' softball team won their first start in the ASA sectional tournament at Ossian, Tuesday, July 9, from Diehl's of Garrett by a score of 1-0.

The only run of the game was scored in the second inning on two hits and an error. Feldheiser, the pitcher, got two of the club's three hits.

Ewing came up with the fielding play of the night when he took a low line drive to right and threw it to second for a double play.

Line score:

		R	H	E
G-E	010 000 0	1	3	1
Diehls	000 000 0	0	3	2

Feldheiser and Baals; Deibele and Bowman, Lobb.

The Majors lost their second game in the ASA tourney Thursday, July 11, to the Ossian Boosters by a score of 4-0.

Ossian scored two runs in the fourth on two hits, an error, two walks, and a fielder's choice and two more in the fifth on a single and a hit to right that bounced in the parked cars for three bases and scored one error. Stanski got two of the Club's three hits.

Line score:

		R	H	E
Ossian	000 220 0	4	4	2
G-E	000 000 0	0	3	2

Hoopengarner and Young; Waltke and Baals.

In a game Thursday, July 28, the Majors defeated Harvester, 7-0.

There was no scoring until the second, when Somer led off with a single. Bucher struck out, then Lawson doubled, scoring Somers. Feldheiser singled, scoring Lawson. Following that play, Anderson struck out and Stanski singled. Baals flied out to third. There were two runs and four hits in that inning.

Stanski's single, Baals' sacrifice and Yarman's double scored another run in the fifth.

In the sixth, Bucher led off with a walk, Lawson singled, and Feldheiser struck out. Anderson then singled scoring Bucher. Stanski singled, scoring Lawson, while Baals fouled out to the catcher. Yarman then singled, scoring Anderson and Stanski. The final play was Morkoetter's out, third to first. The tally for that inning was four hits and four runs.

The hitting for the game was led by Stanski with three hits and a walk in four times up. Yarman had a double and two singles in four trics. Lawson had a double and single in three times at bat. The game was called at the end of the sixth at the time limit.

Line score:

G-E	020 014	7	11	0
Harvester	000 000	0	3	1

Feldheiser, Hower and Baals; Leffers, Van Way and Bohay.

The Majors' next game was against City Light Thursday, Aug. 4. They won, 4-3.

Morkoetter led the hitting with two 3-base hits in three times up.

Line score:

		R	H	E
G-E	010 030 x	4	4	2
City Light	002 100 0	3	3	3

Sitko and Walker; Waltke and Somers.

Again the Majors chalked up a win. They defeated Zollner Reserves Tuesday, Aug. 16, by a score of 3-2.

Two runs were scored in the second on a walk to Stanski, a three-base hit by Baals, and a single by Yarman. The winning run was scored in the sixth when Yarman was hit by a pitched ball. He went to second on a wild pitch, took third on an infield out, and scored when Larson was safe on an error.

Zollner scored one run in the third on three singles and scored the other run in the seventh on a walk, single, wild pitch, and a long fly to center.

Line score:

		R	H	E

Completes 30 Years Of Service

Clarence Meeks, General Tool division in Bldg. 19-5, recently celebrated his 30th anniversary with the Company. A number of his co-workers attended a presentation of a congratulatory letter to him. In the picture are: (l. to r.) Julian Franke, Jr., August Rodenberg, Mr. Meeks, C. A. Brenner, Division Supt., Glenn Staight and Chester Burgette.

G-E Hams Drop Magnavox, 11-4

The Magnavox softhall team suffered their first defeat of the season at the hands of the G-E Hams at Packard park recently. The Club handed the boys from the East End a thorough thrashing with a 11-4 victory.

Magnavox's loss enabled the Hams to enter a three-way tie for the league lead. Harvester, who lost only one game this season, is the other team tied for first place.

The play-off will be held after the completion of the double elimination tournament which began Tuesday, Aug. 16.

The Hams, ranging in age from 37 to 56 years old, have shown a marked improvement during their last several games, and have good hopes of winning the league title this year.

You're sure of a world of prosperity if you work hard, save—and attain success.

G-E GOLF

By Hugh Dubdit

The second half, final standing in the Winter St. group shows the Brassies on top, with a point total of 32. Putters finished second, with 26, and Drivers were third, with three. John Skevington led the individual scoring, with a 37. Don Lynch, W. S. Kirke, and M. F. Patrick turned in cards of 42. The leading individual averages were held by Dick Szink, with 39.2; John Skevington, 39.3, and Don Lynch, 39.6.

The Dubs of the Tuesday night group shot 18 strokes under average to trim the Optimists by 15 points and move into first place, with a total of 40 points and one night yet to play. The Nineteenth Holers picked up 12 points to move into second place, with 32 points. The Optimists, former leaders, now are third, with 11 points. Bob Hall came in with the best card of 37, followed hy Red Braden, 38; Dick Tobias, 40, and Paul LeCoque and Bob Dobbins, with 41.

G-E has again entered the annual Midwest Industrial Golf tournament to be held Saturday and Sunday, Aug. 20 and 21, at Mount Clemens, Mich., with Briggs Manufacturing Co. as host. This tourney was held at Akron, O., last year and drew 28 teams, with more expected this year. Firestone Tire and Rubber Co. was the winner, with a 619 count. Studebaker was second, with 620. The scoring is based on the 36 hole total for a team of four. Denton Manecke, golf chairman, announced that this year's team will include Willie Adams, Red Braden, Dick Szink, and Warren Wickliffe.

Plans are also underway for the annual Studebaker and G-E match to be played in Fort Wayne this year.

Saturday, Sept. 17, has been set as the date for the Blind Bogey. This is open to all G-E golfers, whether they play in the league or not. All that is required is payment of green fees by the golfers. Many good golfing prizes are awarded each year. Let's all make plans to get into this year's Blind Bogey.

Hanna Appointed Station Manager Of G-E Stations

R. B. Hanna, Jr., a native of Fort Wayne, has been appointed Station Manager of the G-E radio broadcasting, frequency modulation, and television stations WGY, WGFM and WRGB, Robert S. Peare, Vice President in charge of Public Relations, has announced.

As Station Manager he will be responsihle for all non-technical functions of the three stations. He joined the Company after his graduation from Butler University in 1929 as a student in the business training course. He later transferred to the Publicity division. He was then placed in charge of the "House of Magic" at the New York World's Fair of 1939 and 1940.

During the war he was a member of the Signal Corps, holding a captain's rank when placed on inactive duty in 1945. In February, 1946, he was named head of the conventions and exhibits work in the Advertising and Publicity Department. Since September, 1948, until his recent appointment, Mr. Hanna has been Manager of the Exhibits, Lectures and Services division.

WORKS LAB TAKES FIRST HALF TITLE IN SOFTBALL LEAGUE

In the feature game of the week for the Interdivision Softball League, the Works Lab played heads-up ball to defeat the classy Apprentice team, 6-4, and win the first half championship. This was a hotly-contested game, with Works Lab taking advantage of Apprentice errors to come up with four runs in the sixth inning to put the game on ice.

In another close game, Winter St. defeated the Squares, 10-8, to earn a third place tie with Squares and Firemen.

The Firemen ran all over the Main Office team to the tune of 18-3. Fractional drew a bye.

Due to the number of games rained out, the second half will be played in a single elimination tournament. The winner of this tourney will meet the Works Lab in a two out of three play-off for the season championship.

Voltmen To Defend Title At Wichita

Oldtimers To Play Annual Game Aug. 25

The annual Oldtimers' baseball game will be played at Dwenger park Thursday night, Aug. 25, starting at 8 p.m. At the present time, 27 players have signed up for the G-E Oldtimers and the Carrington team.

The two teams will consist mainly of players from General Electric, but will include some outside the Company. The G-E'ers will be managed by Elmer Wagner, Bldg. 19-3, secretary-treasurer of the Fort Wayne Baseball Federation, and Red Carrington, president of the loop.

The game is sponsored by the Federation as an annual benefit for baseball. Funds obtained from admissions will be used to pay doctor and hospital bills for young amateur players in the Federation League. Last year's game proceeds covered the bills of the boys throughout the year, and the surplus will be used to huy new equipment for the players.

The game will continue until each team runs out of players who are able to take the field. Attendance prizes will be given again this year.

Tickets for the game are 50 cents. Any old G-E players interested in participating Thursday should contact Elmer Wagner, Bldg. 19-3, Ext. 2108.

The Standings

ODD

No. 3, Shanahan	+55
No. 1, Stauffer	—13
No. 5, Pook	—32

EVEN

No. 6, Craig	+100
No. 2, Stanger	—39
No. 4, English	—71

With the greatest of ease and contempt for convention, Walt Pook, Butch Junk, Bill Hein, and John Arnold knocked the high flying Hot Shots down a peg or two with a convincing nine point pasting. This was the first time this season that the boys from across the street (and Bldg. 27) tasted defeat. None of the Hot Shots broke 40 and played only even with their team average. Pook's boys took advantage of this and shot 17 under their average to gain the victory.

The currently hottest team in the Owl League, John Shanahan's Team No. 3, gave Bernie English's boys a 17 point beating. Fred Urich led Team No. 3 with a cute 41, while Bernie English was low with a 51 for his boys.

Team No. 1 (they can't win for losing) took it on the chin by three points from the Jolly Boys. Ray Stanger led the winners with 43, while Earl Stauffer led the losers with the same total.

Atkinson Wins State Pistol Championship

Ray Atkinson

Ray Atkinson, sharpshooter extraordinary of Bldg. 31-2, won the state pistol championship Sunday, Aug. 14. The state matches were held at Bristol, Ind., Saturday and Sunday.

Mr. Atkinson, president of the Indiana State Pistol Association, came in fifth at the regional matches at Flint, Mich., held July 16 and 17.

The G-E Voltmen will leave next week for Wichita, Kan., to defend their national semipro baseball title, it was announced today by the G-E Club management.

The following statement was released by the club's management to accompany the announcement:

"The Voltmen will defend their National Semipro Basehall title held since 1947 again this year.

"The G-E Club management made every attempt to give Fort Wayne a winning ball club during 1949. The personnel from the winning teams of the past did not choose to remain with us another year and entered professional ball. The rebuilding program is only now beginning to show results.

"That is what makes baseball the great game it is today. The champion yesterday is not always the champion tomorrow. Competition is a great thing.

"The Michigan-Indiana League is one of the strongest in the country. It is better than most of the minor leagues and could dominate the Wichita Tournament. The competition was just too keen for the Voltmen during most of the season.

"The management was very hesitant about sending a team to the national tournament that is not capable of truly representing the General Electric Club and Fort Wayne, the City of Champions. Neither can Fort Wayne be accused of being afraid to defend their championship.

"With recent additions to the Voltmen and the further addition of pitching strength, they may be championship contenders. They are going back to Wichita to win further honors in seeking their third straight national championship."

Buds Hand G-EVoltmen 8-2 Defeat

By Bill Hunt

The Voltmen hitting and pitching was ineffective Tuesday night at Dwenger park as the Buds outhit the G-E team, 15 to 5.

Scott Cary did an excellent fireman job, as he allowed only four hits and no runs in four and one-third innings. The damage was done, however, hy that time despite slight uprisings by the Voltmen in the sixth and seventh innings.

Barney Morris allowed no further hitting after the sixth wben Hormann led off with a single, Corriden douhled, then Lockett scored Hormann on a long fly to center. Stramm reached third on a walk, an infield out and passed ball, was thrown out at the plate after Morgan's fly to center.

John Corriden kept the Buds in hand for a little while, as he made brilliant catches for the first and third outs in the second inning. The first drive was ticketed for the fence between right and center, but John raced over and stabbed it backhand to steal a hit. The other was back and to his right. He sprinted back and took that going toward the fence.

The new infielder, O'Farrell, looked good in the field; as did Stramm, Dudick and Bobilya, who managed an errorless, plus one double play, game.

Box score:

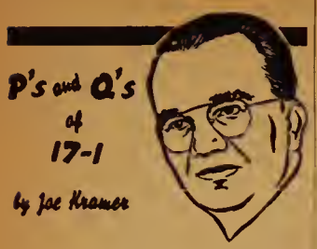
A Chicago man, married 50 years, says he has had a happy life because he has never quarreled with his wife. Obviously, neither plays bridge.



G-E Club Softball Team Battles For League's Championship Title

The G-E Club's Ham League softball team is now playing in a double-elimination tourney to determine the league championship. The team, after a successful season of only one loss, is now tied for first place with Magnavox and Harvester.

This is the third season for the Hams, who are all over 35 years old. The G-E nine finished in first place the first year and last season was runners-up for the championship. The league plays Tuesdays and Wednesdays at Packard park.

The 1949 team is manned by: (l. to r., back row), Coach Sam Baumgartner, Leo Almandinger, Pres Slack, Carl Reiter, George Langenberg and Manager Bill Schible; (l. to r., front row), Georgc Ort, Fritz Bergman, Elmer Hazelett, Tony Wichman, Clarence Waterson, Orlando Surface, Clyde Musser, Bill Holloway, and Oscar Rodenheck. The bat boy is Ronnie Wichman.

We hope everyone has gotten rested up from their vacation by today and will be able to decipher some of the Yiddish which is to follow. As you know, it is necessary to write the column on Monday and we weren't quite rested up, so please excuse the mistakes. . . . The fellows in Group 19x71 and 19x72 want to thank Ed Brosche for the card he sent them from Florida. Ed is taking his third week vacation completing his trip to Florida and the Southwest. . . . From the looks of Leo Nyboer's forehead, we would say he spent a considerable part of his time in the sunshine. Was the fishing any good, Leo? . . . Ed Arthur reports that there is a tree at Holton Lake in Michigan that is so tall and straight that you have to lay on your back to see the top. . . . We are sorry to report Cliff Coombes did not catch any fish during his vacation. . . . Clarence Doctor returned from the hills of the north country with new ideas of farming. Doc says it refers to stripping. We hope he doesn't mean strip teasing. . . . Congratulations to Clyde Crabill on completing 30 years with the G-E. . . . Henry Wichren was seen motoring south to the Beerman rancho near Poe. . . . Joe Collins reports watermelons are ripe and in good shape from Hope, Ark. . . . George Silk spent his vacation adding to his house. He has moved outside activities to the inside. . . . We are sorry Ernie Riley didn't see San Francisco Bay this year. Instead, Ernie went to Bay City, Michigan. . . . Ed Martin is reported to be looking around for spaghetti business. Further details on this development next week. . . . Vic Leakey is going to take some lessons in casting. Vic made a mistake and threw his fishing plug at his partner's head instead of in the lake. . . . Even with the number of G-E people on vacation there was still a goodly number to be seen downtown shopping on dollar day. E. P. Tickel was seen hright and early Thursday morning going into W&D's but from the avalanche of women encountered at the door, we don't know if Tic was able to get in or not. . . . Paul Geiger took over telephone repairs out near Hoagland while Clarence Doctor was on his vacation. . . . Loyal Decker reports he made a trip to the north and put his tag on a deer which he intends to go after this winter. . . . Believing that he needed practice in arising early in the mornings after his two weeks' vacation, Ray Epperson started the last few days of the second week by getting up at 5:30 a.m., the normal time he usually gets up when working. This was evidently too hard on Ray's system for when Monday morning came around he failed to awaken even though he had set two alarm clocks. . . . Red Braden made a pretty good showing in the recent golf tournament even though he had trouhle on a number of holes. Red finished just 11 strokes out of first place. . . . Virgil Hartman reports that the deer in Pennsylvania are very plentiful this year. He had an enjoyable two weeks. . . . Frank Hickman reports fish in Crooked Lake are still plentiful. Frank evidently didn't have too much luck with the cane pole these past two weeks. . . . Addie Masbaum has promised to bring in some of the pictures she took on her trip to Colorado Springs. Addie says that they traveled in real style—slacks, pedal pushers and shorts. The only reason she hated to come back to work was that she had to start pinning her hair up again. . . . We wonder why Wally McKay didn't bring back a sack full of Arkansas sand for Vic Hall's tired aching feet. . . . Tavie Popa reports that the State of California is all that their C. of C. claims it to be. While we were sweltering back here in this Indiana heat, Tavie was enjoying herself in nice cool breezes of San Diego. Tavie was visiting her sister Ann and seeing the town. . . . Colorado Springs was also visited by Miriam Valentine, who reports the scenery was beautiful. . . . Anyone knowing of a woods that contains squirrels, please contact Joe Kramer as he is looking for a place to go squirrel hunting come Aug. 22.

A New York doctor has worked out a reducing plan that's simpler than adding two and two on your fingers. It requires no diet and no exercising . . . which should make it number one on the hit parade of ladies who like to reach for a sweet and still be able to touch their toes. It's all in your mind. You stretch out on a couch and concentrate on your muscles . . . and if you don't fall asleep you start building muscles, while the bulges disappear like hotel towels. We wonder what happens if you get sleepy and start thinking of bulges instead of muscles?

Noble Is Honored At Two Parties

P. O. Noble was honored on his retirement from General Electric Tuesday, July 26, at the Squares hall. Many of his associates and friends throughout the Company attended the party and presented him with a camera and tools for his workshop. In the above picture Mr. Noble and Joe Staak, of FHP Sales, are seeing who can "shoot down the most ducks."

Fifty-five girls from FHP Motor Engineering and former employees of the division held a combination surprise birthday and retirement party for P. O. Noble, former FHP Motor Engineering Manager, at Foster park Monday noon, July 25. J. J. Clarkson and Howard Miller were guests at the picnic. Following a comical skit, the girls presented Mr. Noble with a flyrod and line.

Now that everyone is back from vacations, they all have a lot of interesting things to tell. Here are a few of the places each one visited: Marion Hardwig, California; Bill Crouse, New York and went deep sea fishing; Berniece Kratzsch, New York and Washington; Wayne Weimer, Big Star Lake; Jackie Boxberger, Charles Elzey, Lawrence Klaren, Clara Cohagen, and Cecile Hinton, Niagara Falls; Pearl Barry, New York City; Gladys Williams, Jim Baker, Frances Batzner, Oral Hiser, Minnie Mennewisch, Fletcher Cumbey, Miller, Pat Lahr, and Freddie Lein-George Harmeyer, Mary Mann Miller, Pat Lahr, and Freddie Leinker, Chicago; Jerry Bevan, Rust Gick, Paul Gressley, George Gorrell, Phyllis Borkenstein, Pauline Malone, Tom Woodward, Oliver Schafter, Rollie Fawcett, and Roger Bebout, Michigan; Gladys Getts and Arthur LeCoque, Florida; Zella and Kenny Disler, Florida and also flew to Cuba; Agnes Reinking, Pikes Peak; Joe Troendly, Kermie Griffith, and Rosalie German, Wisconsin and Minnesota; Hilda Vance, Washington, DC; Orval Smith, Marian Boerger, and Bill Mooney, Randall Lake; Tom Hildebrandt, Lake James; Al Topp, Hamilton Lake; Norb Sordelet, Lake Everett; Mr. and Mrs. Franklin Pape, Crooked Lake; Louise Perry, Green Lake. . . . Mr. and Mrs. Francis Nelson spent their honeymoon in Canada. . . . We expect Faye Russell back about Christmas. He went to Oregon in his Kaiser. . . . Opal Runnion bought a new home. She is being married Sept. 10. . . . Martha Foelber has left the cost section to be a full time housewife. . . . Ced Persing looks well fed lately. He won dinner-winner a week before vacation. . . . Clarence Raney went down in the hills so he could take off his shoes. . . . All the boys want to know when Bill Fowler is going to roll up his sleeves. . . . Bob Enz proved to be a horseshoe champion during vacation. . . . Al Oeschle couldn't take his vacation because he was a dime short on his check. . . . If you see a flashy new black Dodge going by you know it's Maradean Bucher. . . . The Borkensteins also have a new Oldsmobile. . . . Ralph Van Osdale won the prizes at the Coldwater Lake boat races. What do you mean, Ralph, making such big waves so the little boats can't get over them?

Speed Champ

Ralph Van Osdale, Bldg. 26-4, is shown shortly after he won the Class C Service division of the recent regatta on the St. Joe river. He then went to Toledo to enter the races at that city. His boat, a pleasure runabout, is powered by a 22 h.p. Johnson outboard motor, and can attain a speed of 50 miles an hour.

Back from vacation
With a smile and a grin
Two weeks of pleasure
Then here we are back again.
We hope you enjoyed
Each hour of the day
And as ready for work
As we were for play.
If you went to the lake
The East or the West
We are glad to be back
But we did enjoy the rest.

The poem was submitted by one of the girls. We thank you very much. . . . Some vacation activities were: Ivah Grandstaff went to Missouri. Alice Brockmeyer went to Kentucky and Tennessee, going through Mammouth Cave and other points of interest. Mabel Schaaf went to Chicago to the Railroad Fair. Mary Foster went to Detroit and Cleveland. Burdella Welsh went to Yellowstone park; Josephine Motter to California, and Caroline Becker to Niagara Falls (Second honeymoon?) Elizabeth Wert, Edith Bohde and Jenny Zimmerman took a motor trip through Michigan. Ellen Dittlinger joined the paint slingers and painted her house. . . . I can't figure out why Betty Lupton was advising people not to go to Kansas City on their vacation. . . . Guess Lewie Hoffman was really ready for vacation. Friday the last day before vacation and the big events coming up, one of the girls asked him to fix her machine. He told her the only way he could make it down the aisle was via piggy back. . . . It's a happy birthday to Mary Zirkle, Augusta Boehm, Pauline Kirchner, Mildred Schoenlein and Charlie Rice. . . . Sorry to report that Hilda Jensen is on our sick list. . . . It is reported that Delores Wonderly is just going to have to get a pair of stilts. . . . Mary Wright was so excited about her vacation to Iowa that when she went to the candy lady, she walked off without paying her bill. . . . Can you imagine this? Leona Hollis and Naomi Robinson were laughing so hard they nearly lost their teeth (so they say). . . . It's howdy to all our newcomers on the early bird shift. Hope you like us. . . . Line 562 gave a surprise potluck for Lowella Koogle, who is leaving us the last of August. They also gave her a going away gift. Happy landings.

LOSE A DOG?

There is a small, black, rat terrier at the Frank Haflich farm that would like to be united with her owner. Last Thanksgiving Day, a hunter employed at G-E, took "Tiny," as she is now called, hunting with him on the Haflich farm, two miles east of Bluffton.

While hunting, he lost the dog. All searching proved futile and the dog was believed to be dead. However, as most stories end, this one too has a happy ending. After several months, the dog appeared at the Haflich home, and has made her home there ever since.

Mr. Haflich would like very much to have "Tiny" reunited with her master. Her owner can obtain further information by contacting Ross D. Haflich, 3101 S. Broadway, or calling H-9433.

It's a shaky reputation that is built on things you are going to do.

Burglars who stole a crate of corsets may be letting themselves in for a long stretch.

Suggestion System Contest Is Announced

Elex Opens Membership Drive

The Elex Club membership drive will open Tuesday, Sept. 6, and continue until Friday, Sept. 16.

With "Build With Elex" as the slogan of the drive, the contact members will ask each girl during the 10 days to join the club for the 1949-50 season. Dues for the year, as in the past, are $2.

Plan Membership Session

A "kick-off" breakfast will be served at 8:30 a.m. Tuesday, Sept. 6, in Bldg. 16-2 for all first-shift contact girls. At the breakfast, they will receive the material necessary for the membership campaign. The second-shift girls will have a similar snack session at 1:30 p.m. in Bldg. 16-2.

I. H. Freeman, Supervisor of Personnel, will select a "lucky" membership card again this year. The girl having the winning num-

Ballots Are Distributed For G-E Club Election

Harold Carter

Erven Huth

Harold Carter, Bldg. 4-6, and Erven Huth, Bldg. 20-2, are candidates for the presidency of the G-E Club. The election will be held Monday and Tuesday, Aug. 29-30.

Foremen and time clerks distributed the ballots yesterday and today to all employees.

The completed ballots should be deposited in the clock-card boxes, and will be returned to the G-E Club lounge.

Candidates for the other offices are shown on page 4.

Deep-Sea Lamps Flown Here From Cleveland

Through the efforts of the Fort Wayne Works and local lamp department representatives, two special, deep-sea diving lamps were flown here Wednesday morning from the G-E Lamp Dept. headquarters in Cleveland for use by Navy divers to aid them in the search for the body of Bernice Bremer, 6. The little girl, her sister, brother, and cousin drowned August 14 while attending a reunion at Clear Lake.

Fred Waring Show To Salute Wilson

Fred Waring and all his Pennsylvanians will salute Charles E. Wilson, President of General Electric, on the anniversary of his 50th year with G-E on the "Fred Waring Show" Thursday night, Sept. 1. Among the selected arrangements for the special occasion will be a new Livingston Gearhart composi-

Employees To Receive Bonuses In Addition To Regular Awards

For the period extending from Sept. 1 through Nov. 15, a total of $500 in merchandise certificates will be awarded as bonuses for the best suggestions contributed by employees of the Fort Wayne Works of the General Electric Apparatus Department, according to an announcement made today by A. C. Hartman, chairman of the Fort Wayne Works suggestion committee.

A total of 10 certificates, each redeemable at the Employees' store for $50 worth of merchandise at employee prices, have been allocated to the Fort Wayne divisions, according to the following schedule:

"Fractional Horsepower Motor divisions, two certificates; Specialty Transformer and Ballast divisions, one certificate; Motor and Generator divisions, one certificate; Works Service divisions, one certificate. Employees in all divisions may compete for the remaining five certificates.

Eligibility rules which have governed the submission of suggestions in the past will be followed in this contest. All suggestions must be submitted to the suggestion system committee not later than Nov. 15. There is no limit to the number of suggestions that an employee can submit.

Commenting on the special awards for which suggestors will be competing, C. H. Matson, Works Manager, stated:

"Never before has the competition for business been so keen. In

Supervisors' Meeting To Feature Professor, Aeolian Choir Sept. 12

The G-E Supervisors' Club will open its fall series of events at a meeting Monday, Sept. 12, at 8 p.m. in the Squares hall.

Louis H. Dirks, dean emeritus of DePauw University, will speak on the topic, "Horse Sense."

The program will also include music by General Electric's Aeolian Choir. The choir is composed of employees at the Decatur plant and is under the direction of David Embler.

A short business session will open the meeting.

Foreman Plan Stag Picnic

The annual stag picnic of the Foremen's Association will be held Saturday, Sept. 17, at Voigt's Retreat, near New Haven.

Latest Issue Of ADVENTURES AHEAD Will Soon Be Mailed To Subscribers

A "how-to-make-it" article is a leading feature in the September-October issue of *Adventures Ahead*, General Electric's bi-monthly magazine for teen-aged children of employees.

This article, titled "Silver Lines a Cloud," not only tells how to make silver jewelry step-by-step, but also relates how C. A. (Bud) Traphagen, of the Company's Erie Works, got started on a silver sideline.

Tuberculosis struck Bud. At a sanitorium, while he was recovering, he took up silver jewelry making. During his recuperative peri-

Over 800 Expected To Attend Quarter Century Club Outing

More than 800 members have signified their intentions of attending the annual Quarter Century Club outing, which will be held Saturday, Sept. 10, at Camp Limberlost, Oliver Lake.

Yesterday was the deadline for all reservations.

Name badges and meal tickets will be issued after 8 a.m. on the day of the outing at the Broadway gate. Those driving direct to the lake will obtain their badges and tickets there.

All attending the outing will receive a special gift as a souvenir of the event. Members must be at the onting to receive one of these

(Continued on Page 3)

Barbara Meyer, Bldg. 6-1, and Doris Downs, Bldg. 4-6, are shown with the 10 G-E toasters that will be presented as attendance prizes at the Q-C Club outing.

An Idaho Schoolboy Says: "Dad's Safety Means My Safety"

The following essay was written by an Idaho schoolboy. It's so simple and right to the point, that we ask all fathers to take the time to read it. Children think Dad is pretty special. Don't spoil the picture.

"Dad's safety is something that the average boy or girl doesn't think about until they've been asked that question. Then as they try to give reasons they realize just how serious a question it is.

"The first thought that came into my mind was that Dad's safety means happiness instead of sorrow.

"As long as my Dad is safe I know I can go to school every day and give my whole attention to my studies. After school I can take part in athletics or other events. This gives me the chance to build up my body as well as my mind.

"Dad's safety means my safety. What Dad has learned about safety he can teach me, by telling me and also by example.

"As long as my Dad is safe we can do things together. But if he should have an accident, then I might not get to have fun with my Dad any more."

—From the National Safety Council

Do You Know About Your Contacts With Social Security?

Every General Electric wage and salary earner has two points of direct contact with the Old-Age Survivors Insurance system of the Social Security Administration, under which employees in commerce and industry are earning insurance protection for themselves and their families.

Your first point of contact is the job you hold as an employee of the General Electric Company. Because you hold the job you do, you are a participant in the Old-Age and Survivors Insurance program. You are contributing part of your wages under the program, and the General Electric Company is matching your contribution. Through your work, you are earning wage credits to qualify yourself or your family for future benefits.

Your second point of contact is the field office of the Social Security Administration in room 305 of the Post Office Bldg. The field office has three main functions. They are:

1. Handling claims for Old-Age and Survivors Insurance payments. This is the most important function, since no benefits may be paid until the qualified person files his application.

2. Issuing new and duplicate Social Security account number cards.

3. Helping to make sure that the Social Security record for each wage and salary earner in commerce and industry is complete and accurate.

Every employee should safeguard his Social Security account number card. Your Social Security record is kept under the name and number on that card. Each employee should have one number, and one only, for a lifetime. Thus, if you lose your card, you should ask the field office for a duplicate card, bearing your old number, so that wages earned in the future in covered jobs will be recorded in the account where your past wages are recorded.

All of the services of the field office are free. The field office is prepared to answer any questions you might have.

There are two times in particular when the field office should be consulted by you or your family. They are:

1. By you, when you reach the age 65—to discuss the filing of a claim for benefits.

2. By your dependents when you die—to find out what benefits may be payable to them.

For further information, stop in at the Social Security Office in room 305 of the Post Office Bldg.

GUILTY!

POLIO

Editor's Note: The following is the first in a series of questions and answers regarding the current polio situation. They have been prepared from reliable sources by Dr. L. E. Burney, State Health Commissioner. Every effort has been made in the following questions and answers to furnish authoritative information on the subject with the object of relieving undue fear and alarm through the presentation of accurate information and knowledge.

What is poliomyelitis?

A common communicable disease. Poliomyelitis usually runs a mild course, without paralysis. The majority of cases will go unrecognized.

What are the usual symptoms?

Common symptoms are fever, sore throat, headache, stiffness of neck and back, nausea, vomiting, and constipation.

What causes polio?

Poliomyelitis virus. Other diseases caused by viruses are measles, mumps, and chickenpox.

How is polio spread?

By contact with nasal discharges, sputa, and fecal discharges of infected persons. The virus of polio is so widespread that contact with it sooner or later is inevitable. Flies have been found to carry the virus but there is no reliable evidence of spread by insects, food, water or sewage.

What is the time period between exposure and onset of the disease?

Usually 7 to 14 days, but may be as short as five days or as long as 35 days.

How long is the patient contagious?

Probably not longer than seven days from onset of disease. State Board of Health regulations require 14 days isolation of the patient.

Should families having a member with polio be avoided by neighbors?

No, except children should not come in contact with the patient until 14 days have elapsed since disease began. There is absolutely no reason for adult neighbors to avoid parents of a poliomyelitis patient or refuse to visit their business establishments.

Who is susceptible to the disease?

The greatest number of cases occurs among children from infancy through the ninth year. It is rare in babies under six months of age.

Average age at time of contracting the disease is higher in rural areas due to postponement of exposure at earlier ages.

Why don't more grown-ups get the disease?

By the time most people have reached the age of 20, they have developed an immunity through having had the disease in a mild form or having had repeated contacts with the virus.

What is the risk to pregnant women during the polio season?

Some authorities believe pregnant women are more susceptible to polio than non-pregnant women. The difference in susceptibility is not great, if any. Normal babies are born to women having polio during pregnancy or at time of delivery.

Do operations bring on polio?

No. Unless an emergency exists, nose and throat operations and dental extractions should be postponed during a high incidence of the disease. Nerve endings exposed by such operations may permit entry of the virus and conceivably cause a more severe form of the disease.

WHAT'S NEW IN G-E PLANTS & LABS

SCHENECTADY—Complete ready-to-install substations designed for use on rural systems and available in any one of four basic arrangements are now available from the General Electric Company. The new "Rural Package Substations" are designed and manufactured as a unit. The fabricated steel structure, transformers, switchgear, lightning arresters, all components, necessary hardware, erection diagrams and drawings are included in each installation.

* * *

LYNN—General Electric has announced a fluorescent street light which engineers say provides the most comfortable light yet devised for motorists and pedestrians.

"A product of almost two years engineering development, the new fluorescent street light supplies a softly diffused, virtually glareless light," according to A. F. Dickerson, Manager of the Company's Lighting and Rectifier divisions.

"It was developed for public demonstrational use by electric power companies and municipalities," he said.

These pioneer installations will enable them to investigate, at first hand, the possibilities of fluorescent street lighting and to compare its performance and characteristics with present-day lighting."

He described the new street light as a cigar-shaped aluminum tube in which two pairs of eight-foot-long fluorescent lamps are mounted. Two long, highly-polished reflectors, mounted back to back, direct the light from these lamps through clear plastic windows to the street pavement.

OUT OUR WAY

By J. R. WILLIAMS

Membership Drive

(Continued from Page 1)

ber will be admitted free to all Elex parties during the year.

As was voted at the 1948 Fall Conference, girls desiring to join Elex must do so during the month of September. After Oct. 1, the membership will be closed for the balanee of the elub year.

Election of Offieers

The first big event of the club will be the election of offieers, to be held from Sept. 19 until Sept. 23. The slate will be announced in the WORKS NEWS later, and ballots will be counted Sept. 26. Installation of officers will he held Monday, Oet. 10.

Eva Tucker, Bldg. 16-1, is ehairman of the eleetion eommittee. Her committee members are Dewey Wiekliffe, Bldg. 19-2; Susie Jones, Winter St.; Mamie Allen, Bldg. 4-2; Loretta Bloom, Bldg. 26-5; Eva Fisher, Taylor St.; Margaret Taylor, Bldg. 4-6; Mable Schaaf, Bldg. 17-3; Helen Coddington, Bldg. 31-2; and Helen Bilski, Bldg. 8-2.

A few of the outstanding programs planned for the coming year will be a one day trip to Chicago, possibly to the Railroad Fair, in September; a program featuring Elsa Maxwell in November; the annual Christmas party, and Kathryn Turney Garton's book review in January.

The annual conferenee will be held in Chicago at the Palmer House in Oetober.

Suggestion Contest

(Continued from Page 1)

order to maintain a steady flow of orders upon which is based our production schedules and our employment, it is necessary that we keep the prices of our products competitive and be able to guarantee reasonable shipping dates.

"In the past, suggestions from employees have been very helpful in accomplishing these purposes. It is especially important now that more suggestions relating to the business of the Company be received. These suggestions may be: (1) to improve the quality of our products; (2) to propose suitable new products to manufaeture; (3) to improve methods of manufaeture; (4) to improve equipment including tools, jigs, fixtures, etc.; (5) to reduce the costs of produetion, (6) to eliminate eonditions that are hazardous to health or safety."

In 1948, one out of four General Electric employees, company-wide, submitted a suggestion, and one out of every three suggestions submitted was accepted and paid off in suggestion awards, for a total of more than $277,000.

"Suggest a Better Way" is the slogan for the current contest and all employees are urged to partieipate.

STORE AT TAYLOR ST. TO SELL SAFETY SHOES

Safety shoes will be available at the Taylor St. Employees' store beginning next week. The shoes will be sold from 12:30 to 1 p.m. daily. These speeial hours are being instituted to make possible the purchase of safety shoes at a different time than the regular store hours, so that adequate serviee can be given all customers.

Friends Give Joe Mougin Big Send-Off

When Joe Mougin left the Company recently to retire, his friends of the Motor and Generator division in Bldg. 19-3 gave him a big send-off. Left to right in the above pieture are: Ed Schaeher, Mr. Mougin, Harry Skevington, Cliff Mugg, August Busse, James Riehardson, Charles MeClure, Walter Wolf, Jr., Russell Grim, and R. M. Hartigan, Manager of Manufacturing, Motor and Generator Div.

Information Clinic

QUESTION:

A few days ago a person called at my house and asked my wife a number of questions concerning General Electric. He stated he was making a public opinion survey. Is such a survey heing sponsored hy General Electric?

ANSWER:

Yes, for the past several weeks an employee and public opinion survey has been conducted throughout Fort Wayne under sponsorship of Fort Wayne General Electric.

In 1946 a similar survey was conducted. At that time it was revealed that there were a number of our aetivities and programs with which our employees and the public were not very familiar. Some unfavorable attitudes were being influenced by misunderstanding resulting from misinformation and laek of information.

Sinee 1946 the Company has inaugurated a number of new programs, the purpose of which has been to make General Electric an even better place in which to work and to contribute more towards the betterment of the community. In an effort to determine how successful these programs have been in improving employee and public attitudes towards our industry, a survey was started during the vacation shutdown and should be concluded by the first of September. The results of this survey will be published in the WORKS NEWS and the local press as soon as they have been tabulated. Persons conducting the survey include six high school teachers and two public school principals.

QUESTION:

I would like more information ahout Calrod units on electric stoves. How can they be repaired when hroken?

ANSWER:

The Calrod heating unit, itself, cannot be repaired. It must be replaced by a new unit. Orders for this unit may be made at the Employees' store or by contacting your G-E appliance dealer.

QUESTION:

Since you have published an editorial on "Keeping Fit," why not publish lists of exereises for the various occupations of your people?

ANSWER:

Material on the subject of exercises for various oecupations is now being prepared by Dr. H. W. Garton, Works physician. This feature will be published in the WORKS NEWS as soon as this report is completed.

QUESTION:

It is rumored that employees of the Fort Wayne Works may be required to wear identification buttons, as was done during the war. Is this true?

ANSWER:

At several of the plauts of the General Electric Company where apparatus is being made under contract for the armed forces and rating a confidential or secret classification for security purposes, the wearing of identification buttons has been resorted to. At present no such equipment is being manufactured in the various divisions of the Fort Wayne Works. For this reason, employee identifieation buttons are not required. However, if and when any such contracts are received, it is likely that such a procedure will be required.

Dry pavements would be safer if so many of the drivers weren't all wet.

gifts, for none will be available following the outing.

Ten G-E toasters will also be presented as attendanee prizes.

A star-studded program of entertainment has been proeured as a feature of the day. Headlining the variety show will be a featured entertainer from the Paramount Attraetions ageney, in Chicago; a barbershop quartet will provide a eoneert of old-time melodies; and Mrs. Mildred Germanson and Robert Coeherille, favorites of the Q-C outings for the past several years, will again delight the crowd with a group of semi-classieal songs and ballads.

Other novelty aets are still being booked and will be announced later.

The numerous recreational faeilities, whieh will be available throughout the day, include:

Softball, horseshoe, shuffleboard, badminton, card games, tennis, basketball, table tennis, boating, bathing, and golf.

Apprentice BROADCAST

by MILDRED ELLIS

Our "southern friend" Ron Allen is having quite a time adjusting to our northern ways. Two days in a row after he passed through the chow line he discovered he had forgotten his silverware. . . . All year around we hear about the seasonal "eatches" which Morton has made. But this time he has come up witb something a little different—a large owl. We hope the game warden doesn't catch him for catching owls out of season. . . . We extend our deepest sympathy to Lewis Davis whose mother died quite suddenly during vacation. . . . Frede and Schmidt have been having thumb pounding contests at Schmidt's new house. To keep from pounding holes in the plaster Schmidt had Frede lay his thumb over the nail heads while driving nails; then Frede was chastised by the contractor for putting plaster board upside down. . . . We hate to spoil your week-end by mentioning the fact that elasses will start September 6. . . . Since Miller is in Transformer drafting he has a clean floor on whieh to patter his bare footsies. . . . Bergman had an eventful vacation with his summer camp. First, someone stole his jeep; then the polio bug got one of his men, otherwise everything was "ship shape" or whatever the army uses for a "well done" job. . . . It was a big day last Friday for Harry Meads who graduated from the Apprentice Sehool as a Machinist-Toolmaker, and today is the big day for Leon Lahrman who is the first Draftsman Apprentice to finish the course. Good luck, fellows. . . . "It's all right to put roofing shingles on upside down if the house is tall and no one ean see the shingles," says Frede. . . . Ralph Obringer is the proud papa of a Studebaker. His meehanieal past times are of better quality now—for the latest thing in valve settings on autos see Ralph. The car will run afterwards—as far as New Haven, that is. . . . What is Harry Meads' attraction at Crooked Lake? Normally one would think it was the fish, but observers say it's a brunette. . . . Our congratulations to Millie on her engagement. The draftsmen ask just one favor of you—Millie, and that is to stay on the job until all of us are through with the VA and all its records.

Wilson Points To Favorable Outlook For Business Future

In a quarterly message to General Electric stockholders recently, Charles E. Wilson, G-E President, emphasized the favorable long-term outlook for an expanding economy, despite the adverse effects of the current period of readjusting to a buyers' market.

"Because of its varied lines, General Electric is feeling the effects of the readjustment in varying degrees," Mr. Wilson said in a report on "The Business Outlook" which accompanied payment of the Company's 208th dividend. The dividend was 50 cents per share of common stock.

"There is still a substantial backlog of orders for our lines of heavy apparatus. But in our lines of consumer goods, with the possible exception of the rapidly growing field of television, supply has caught up with demand," he said.

Consumer Pipelines Filled

"In consumers' goods," Mr. Wilson said, "the pipelines of supply, which in the early stages of the struggle seemed so inadequate for the demand, have at last been filled. It is a matter of logic that if the sources of supply had not been expanded beyond a normal growth, the job of filling the pipelines would never have been completed. To that extent a period of readjustment is both necessary and desirable. While facing the inevitable difficulties of readjustment, it is important to remember the objective. We are not readjusting permanently downward. We are readjusting from a period of abnormal growth to one of normal growth and expansion.

"The problems of readjusting today are complicated by a cautious attitude on the part of the consumer. No longer impelled by a fear of inflation, the harassed consumer, so long accustomed to waiting in line and then having to take whatever was available, is today doing some waiting of his own choice.

Ahead Of Buyers' Market

"Now that the consumer can get what he wants without waiting, he is willing to wait and see if he cannot also get it at a lower price. It imposed a temporary problem for the producer. But it is not a lasting problem for the producer who has a continuing policy of offering a good product at a fair price. That has been the policy of General Electric, and the record reveals many examples of our effort to keep prices as low as possible long before the arrival of the buyers' market."

While the falling-off in volume buying has made some lines of products unprofitable at present prices, Mr. Wilson said the situation was not serious unless aggravated and prolonged by other factors. One factor, he added, "which would have disastrous results, would be any increase in wage levels." Increased labor costs "would force prices up again, narrow the market, and put some real iron in the public's decision not to buy what we have for sale. The inevitable result would be further curtailment of production and employment."

No Reduction Advocated

Although the Company opposed previous rounds of wage increases because of their inflationary effects during a period of shortage, Mr. Wilson said that General Electric is not advocating a reduction in wage rates at this time. "So long as there is a fighting chance for us to overcome the adverse psychology of this market and make our adjustments to decreased demand in terms of lower costs and harder selling, we feel that wage rates should not be lowered."

Mr. Wilson reiterated an earlier forecast that the decline in industrial production, now well started, may continue until about the second quarter of 1950, when production is expected to turn up.

"If we can convey to consumers our own conviction of the soundness of today's product values, and if business men can avoid the extreme pessimism which would lead them to cut drastically their expenditures for additions and improvements to plant and equipment, then there seems to be no reason for more than a relatively mild production decline during the period of readjustment," Mr. Wilson said.

Store Announces Price Reductions On Coffee Makers

Price reductions ranging from $1.35 to $3.40 at employees' prices for G-E coffee makers were announced today by Ray L. Fischbach, store manager.

The new employees' price schedule for coffee makers is as follows:

	New Price	Previous Price
P14 (range)	$1.30	$ 2.70
P16 (non-automatic)	3.45	4.80
P15 (non-automatic)	4.15	6.20
P17 (semi-automatic)	5.50	7.60
P18 (fully-automatic)	9.00	12.40

The price reductions became effective this week at all G-E Employees' stores.

The fully-automatic G-E coffee maker is shown above.

Watch the Voltmen flag pole for results of the games at Wichita.

Latest Issue

(Continued from Page 1)

od at home, he continued making pins and rings. His wife and teen-aged sons became interested. Now, Bud is too busy with his job as Personnel Manager at Erie to take much part in the jewelry business, but it's carried on by the teen-aged sons. Patterns for two simple jewelry designs are included with the article.

Technical Course Explained

Nineteen-year-old Bernard Wemple has written a first-person account of activities and the work involved in the technical course for laboratory assistants that General Electric conducts under the General Engineering and Consulting Laboratory. It's the lead article, titled "I'm Going to Be a Lab Assistant." Bernard is one of a group of teen-aged high school graduates taking the course.

Full Of Adventure Stories

Other features in the forthcoming issue stress the romantic side of the life and adventures of other young General Electric employees.

One, "Of Cannibals and Mutineers", recounts the thrilling story of Ray Moeller, commercial engineer in the Meter and Instruments division of the West Lynn Works, who has only recently returned from an 18-month sailing cruise around the world.

Another story, "Portias of the Present," is about Ruth E. Bennett, in Schenectady, and Lucile Lomen, in Richland, Wash., who are the Company's only girl lawyers.

Motorless Planes

In "Soaring Is a Science" young readers will learn all about gliding or soaring in motorless planes as told by Hans-Rene'Comte of IGE.

Another IGE man, Thomas Tudor Loveday, now undergoing training at Nela Park, is the subject of "By Any Other Name." This article tells of his youth in Switzerland and of his exploits as an undercover man for the Army in Europe.

Traces History of Light

Nela Park also comes in for attention in the first installment of "The Story of Light," which traces illumination from the days of the cave man to the present.

"Afloat Ashore" tells about the Sea Scout Ship Stanley, sponsored by the Stanley Club at the Pittsfield Works, and of activities supervised by the skipper, R. Neil Dalton.

James A. Steele and G. B. Olson of the Works Laboratory at Bridgeport have written two interesting experiments that can be made at home, under the title, "Science in Capsules."

Cartoons, photographs and drawings are used to illustrate the magazine which will be mailed soon to the homes of young subscribers. "What's on Our Mind" jogs the memories of those readers who have not yet turned in the questionnaires that appeared in the July-August issue.

Bldg. 18-5 bids farewell to Patricia Waterman, Patricia Beebe, Dorothy Klug and Dorothy Ehrsman, we will miss you all. . . . Pat Olinger is now ready to face and mount a horse again after her vacation on a dude ranch in Colorado. . . . Everyone has now had time to rest up from their vacation, and it is a good thing for Goldie Archibold, Bldg. 18-5, that we did not have more than two weeks' vacation. She would have died of malnutrition, for she went to Mexico and just couldn't eat since everything was fried in goat butter. Goldie had a diet of iced tea! (ye scribe had better spend sometime in Mexico!) . . . Pity the poor mice—just think in the Photographic Section they have mice of the Popeye variety, strong enough to open a drawer and eat candy (Norma Jean Snyder can vouch for the statement) then—could find nothing but empty larders. Conditions must have been very bad for they were noticed around Mr. Diven's desk feasting on Tums. . . . Herman Kappell painted his automobile during vacation. He stated that the car is good to look at—but he would much rather work at G-E. Wonder if he has a painter's license? . . . By the by, did you notice that it was none other than a G-E truck that carried "Miss Indiana" in the Legion parade? . . . Marie Mueller, Bldg. 18-5, went to Grand Haven, Mich., on her vacation. She intended to stay only one week—then come home and clean house. At least she had honest intentions — anyway, housecleaning can be done anytime and vacation only comes once a year. . . . Our good luck to Al Bassett, test engineer, transferred to Motor and Generator. Hope he will not forget his friends in Bldg. 18-5. . . . Fonda Cook, Bldg. 18-4, reports a very profitable vacation. Anytime you do not have to pay a painter $3 an hour, that is profit! . . . The A. E. Leiders, Bldg. 18-4, spent the weekend in Chicago. They were accompanied by Mrs. Leider's parents who are returning to their home in California after a brief visit here.

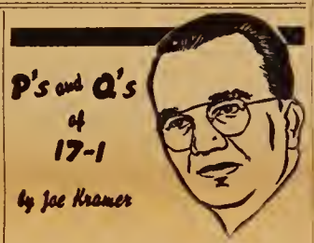
Bldg. 18-3

Eugene Miller is now the proud uncle of Joan Elaine, the week old daughter of his brother, E. P. Miller of Bldg. 31-1. . . . Rose Smead spent the vacation time doctoring a cold. May we suggest "an apple a day etc." . . . At various times during the shutdown Niagara Falls was visited by Irene Draper, Doris Rohnemus and Phil Arick of Bldg. 18-3. . . . Prewarned —Delores Brinker of Bldg. 18-3 and Mary Brinker of Bldg. 26-2 vacationed at a resort about 40 miles from Chicago. I understand the name of the resort is "Recharge." Girls, you can't say they did not warn you in advance that they were going to charge you double for everything! . . . Arnold Konow spent all of his vacation painting—returned Monday to recuperate. . . . Emily Guth is vacationing in Michigan this week.

Bldg. 18-1

Looking the Payroll group over Monday morning—it would seem they all had a grand and glorious time on their vacation. They are a few shades darker, but have a world of pep to tackle the job of paying us all. . . . Mildred Whitmer is absent due to illness. . . . Works Service Accounting said farewell to Marion Smith last Friday. It is the consensus that the children in the Waynedale Schools are very fortunate in having her as their new school marm. . . . Next week we say our farewells to Chester Lichtenberg who will assume new recreation duties after September 1.

Foreman Completes 30 Years



Martin Macke, Foreman of the Salvage section, recently completed 30 years' service with General Electric. On his anniversary, he was presented a letter congratulating him on his long Company service. In the picture, which was taken at the time of the presentation, are: John Lare, Ed Trahel, Mr. Macke, Chester Johnson, William Altekruse, and Jake Holle.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dikty

This being our first reporting since before vacation, we can only now report Ted Schlup's involvement in an auto accident about four weeks ago. It is alleged that Mr. Schlup got behind the wheel of his low-slung powerful vehicle and roared away, and then—Wham!!! After the dust had died down and echoes of chashing fenders had ceased, the officers of the law asked Ted to favor the city court with his presence the following morning, which Ted did, accompanied by his legal counselor. What happened after that event as yet we don't know. You might ask him if you're curious. . . . Elmer Wagner's office girls have a habit of having a certain thing happen to them, but after due deliberation Susie Wagner says that she doesn't believe the chair could be responsible. . . .

Mrs. Ralph Perry (Neoma Klaehn) is back with us after marriage, a honeymoon and vacation. We're glad to welcome her back. . . . Frank Elder has finally got his '37 Packard "Old Ironsides" going, and Ken Hart, his chief engineer, reports everything ship-shape in the engine room for the time being. . . . Frankie Enderle visited a while in St. Louis on his vacation, and we heard that he stopped in Chicago just long enough to learn a lesson in big city life. "It was a bit expensive, but live and learn," says Frankie. . . . As for vacations Shirley Cunningham, Ada Phillips and Fayne Harter visited the Black Hills. Lee Anderson and family toured Northern Michigan and Yellowstone National Park. Manford Lee and wife enjoyed three weeks in sunny Florida. Bill Wittmer and wife looked over the Smoky Mountains. Eileen Gault visited in San Francisco and Sacramento, Calif. Joe Laisure, wife and granddaughter, Edna Etzler, Wymond Ritter and family, Henry Muehlenbruch, Robert Buck and family, Gladys McMillan and Robert Stute and family visited Sault Ste Marie. Irene and Wayne Nichols and Frank Kartholl and wife visited Cincinnati. Robert Lauer and family spent their vacation at Lake Gage and Detroit. Bill Hale and his wife were at Coldwater Lake and Ralph Smith was at Big Long Lake. Frank and Marilyn Schlink visited the railroad fair in Chicago. Fred Friedman is on a fresh water cruise for two weeks in Lake Michigan. Bill (hurry up) Hoke made a fast trip in a few days to Rocky Mountain National Park. The Armature Winders are wondering why Al Johnson needed an extra day for his vacation out West. Did he get lost or just tired? These vacations are a great thing. I don't know which brings the greatest amount of pleasure, anticipating before we go or reminiscing after we get back. Nevertheless if you want to know what "Home Sweet Home" really means, go away, but don't lose the key. . . . We extend our sincere sympathy to Mr. and Mrs. Willis Bunyan in the death of their son.

George Mosshammer has left the truck gardening business and is now engaged in house repairs. George recently purchased a house and is busily engaged adding the modern conveniences. At the present time, he is doing necessary plumbing and electrical work. George is looking forward to the time when the peach trees in the back yard will cast enough shade so that he can sit in the shade of the old peach tree and partake of liquid refreshment from an ice tub. . . . We were all glad to welcome Ed Brosche back from Florida. Ed must have spent a great deal of his time basking in the vitamin-filled air of Florida. . . . Ed Martin has switched from spaghetti business to car business. Ed is in the market for a good used automobile. He has been seen recently sitting on his front porch because he does not trust the tires on the old car. . . . Clarence Doctor was so anxious to use his new combination salt and pepper shaker that he went into a neighbor's garden and picked some half ripe tomatoes to bring in his lunch to show the gang in 19x72 the unique way the lid slid back and forth. . . . It is a new addition at the Kramer rancho. Mike Kramer's pet cow, Mary Jane, recently had a calf. Mike is now asking for suggestions of a name for the new calf. . . . We are glad to see Carl Fisher back to work in the automatic section after his recent accident. Carl said even though his arm was in a sling he still had time for a little fishing. . . . We wondered what happened to our friend Red Braden last Friday until we learned of the golf tournament being held in Michigan. Playing conditions up there were excellent but Red just couldn't get the ball where it should be. . . . Orval Haver reports that he had a wonderful time during his vacation in New York and Atlantic City, but the heat in Atlantic City was 10 degrees hotter than what it was in Fort Wayne. . . . John Quinn also returned from his vacation last Monday. We don't know whether John was just too modest to talk about the fish he caught or whether he experienced the luck we usually do and caught no fish at all. . . . Congratulations were in order to Elmer DeVaux. He is a proud papa of a baby boy. . . . Ray Epperson is showing pictures of some large bluegills that were caught during his vacation. We wonder if the fish were caught by Ray or if his young daughter caught them. . . . Frank Martin is trying to get two more converts to his long black cigar smoking league. He has passed out cigars to Clyde Crabill and Ed Brosche. Now we are waiting to see which of these two pass out first. . . . We are happy to report that it was a baby boy at Henry Gollmer's house. Henry is a former co-worker in Division 19. . . . Jack Lewis is through with Model "T" Fords. It seems Jack bought a 1937 Dodge and was experiencing some difficulty keeping it running until his young son explained to him that the gear shift was there for a purpose and not to hang his hat on. Jack spent a couple of days in the southern part of the country practicing the shifting of gears. Now that he has found the routine of starting and getting into third, he is quite happy about the whole thing. . . . We have heard of throwing bad candy bars away, but there is some discussion in trying to reason out why Clarence Doctor threw a Goodbar away last week.

"Many people are 'dolling up' on a 'dollar down'."

Things have really quieted down in and around the tool room since vacation. George Miller and Charlie Layman are both gone now. The one had as much "wind" as the other, but George had tbe edge with his line. . . . Your reporter with Hilda Krause enjoyed the 20th Annual Music Festival in Chicago last Saturday night with 94,998 other people. . . . There are a few owls working on the first trick again: Steve Sallot, Frank Bly and Owen Cartwright. . . . Paul Bender is back after three weeks' vacation. . . . Our foreman in group 16x42, Vance Burnau, lieutenant in the CAP joined with other members of CAP in searching for the little girl who drowned in Clear Lake August 14. They used a portable generator and an underwater light. They were equipped with two-way radio communication from the cabin cruiser to shore. . . . Walt Buesking looks like a pretty tough guy, but it is a well known fact that he isn't wearing the pants in the family. As proof we offer this story. Walt and a few of his cronies in the tool room were down at the corner the other day enjoying some refreshments when who should come along but Mrs. Buesking. "Let's go," says she, and Walt went without as much as a goodbye. . . . Virgil Foyle is a very busy man these days. He is building a five room and bath ranch-type house. His wife is giving him a great deal of assistance. Fred Fenner went out to see it one day and he said they are doing an excellent job. Good luck to you, Mr. and Mrs.

Veora Habig Edits News Column For Personnel Division Employees

Veora Habig

Veora Habig, Bldg. 8-2, is the new Division Editor for "Personnel-ities." A G-E employee since 1934, she first worked as an inspector at the Winter St. plant, then transferred to the Transformer division. Before coming to Personnel in 1945, Veora was a leading operator and instructor in the Miscellaneous Inspection section, Bldg. 17-1.

Reporting is no new task for Veora. At one time she edited a WORKS NEWS column, "Feminine Viewpoint." She also was an assistant Division Editor while she was in the Transformer division. Her previous WORKS NEWS assignment was Division Editor of "P's and Q's in 17-1."

Veora has also been active in General Electric clubs. She has held every office except treasurer in Elex. She was president of Elex in 1938-39. She still is a member of the executive board and does all the "book work" for Elex. She has also served several years as a director for the G-E Club.

Sports, in general, is her hobby. Veora especially likes football, baseball, basketball and bowling. Recently she has added fishing to her many talents in sports.

Although she has not as yet set up a reporting staff, Veora has been assisted by Ceal Romary of the Works Library.

Floor Lore from 41-41

by BOB MOBBERLY

Road maps, travel folders and vacation advertisements have all been put away once more for another year. Of course, the memories of those two weeks shall linger on for many a month, of two weeks well spent and well enjoyed. . . . Old Mr. Stork paid Herb Jehl a visit Monday, August 16, and left Herb and his wife a baby boy as his calling card. Congratulations to both of you, Herb, and we hope Betty and the newest Mr. Jehl will continue doing well. . . . Harold Mettler, pardon the pun, brought forth the fruits of his labor in the form of apples from his orchard. From our samples, we agree that they were very good, Harold. . . . We welcome Charlie Griffith as our new second shift foreman as of last week. Best of luck, Charlie! . . . We are glad to see Elmore Hurt made it back from that long western jaunt. Really takes time doesn't it, Elmore? . . . The Repair and Return section rated high in the recent Look Magazine article on Fort Wayne. Two members of our section, Dallas Smith and Cecile Onion, were pictured in the article. . . . For the first time we have some feminine members on the second shift. We welcome Ethel Fabian and Jeanette Conrad into the "Night Owl" group.

Top Floor Topics Bldg. 26-5

by WALT POHLER

Vacation is over and everyone reports a fine time. Some of our people traveled quite a few miles. Alma and Frieda Kaiser drove to the Black Hill country. L. N. Sordelet fished in Minnesota. Walt Mertz went to Hot Springs, Ark. Bill Braun fished in Michigan. Bill Mills fished at Lake George. Since there were no unreasonable fish stories, we are inclined to believe that some fish were caught. . . . In a very pretty ceremony, before members of the immediate families and some friends at the Methodist Church at Poneto, Ind., at 12:30 p.m., Sunday, July 31, Ruby Musselman became the bride of Herbert Rapp. After the ceremony, the families enjoyed a wedding dinner. The newlyweds then departed on a wedding trip to San Francisco, Calif. They followed the northern route going, and the southern route coming back. Mr. and Mrs. Rapp are building a house in Churubusco and will make that their home. All of us extend our very best wishes to the bride and our congratulations to the groom. . . . Most of you have heard about the new golf league we have on the floor. This is a handicap league and the members are Walt Mertz, Howard Winters, Richard Pierce, Richard Hurst, Howard Shipman, Francis Gnau, Carl Hanson and Walter Pohler. Bill Braun is the official photographer of the league. Bill Mills was Howard Shipman's caddy. Francis Gnau won first prize with a net score of 29. Walt Mertz and Howard Winters tied for second with a net score of 35. We would be very happy for any other fellows on the floor who play golf to join us. We play at Brookwood at 4 p.m. Thursday evenings.

Notes About People

Betty Harkenrider, after working on radio for a long time, is now working on luminous tube and ignition units. . . . Dorothy Campbell spent her vacation visiting Grand Rapids and vicinity. She gained 12 pounds so she must have been resting. . . . Mary Ely spent part of her vacation in the vicinity of Washington, D. C. She reports that the trips to Mount Vernon, Alexandria, Va., and Arlington National Cemetery were most interesting. . . . Your Division Editor, having lived in Washington, D. C. for one year while still in the military service, joins Mary in recommending this area as a vacation spot. . . . Thelma Henry reports a very interesting trip to Omaha and vicinity, especially the day spent in Council Bluffs. . . . Edith Johnson and husband were at Torch Lake, Mich., for a week. They caught plenty of fish and hunted snakes and lizards. . . . Ruth and Bob Whonsetler visited Niagara Falls, New York City, and Washington, D. C. They especially enjoyed driving through the mountains. . . . Ron Koldewey and his family vacationed in Colorado and Idaho. He reports that the mountains out there are really beautiful. . . . The vacation rush is over and we promise that we will try to have an article each week.

Division 141's News Beams Raconteur

by MARTHA BRENNER

News has really been flying after our vacation. . . . Walt Niemeyer sent a card to Mildred Orr saying he had a date with Betty Grable August 18. . . . Being warned about trying to drive his Buick to California, the latest report from Cleon Oyer states he is trying to make a deal to trade the Buick off for a "Burro." We are sincerely hoping he makes it back in time so he doesn't lose his service. . . . Walter Doctor went to Cincinnati, to visit his relatives. (He went to the zoo.) . . . Herb Wise had an outing all planned in Wisconsin, but we hear his wife changed his mind and they went to Oklahoma City. For the proof ask Johnny Wilson to see the card he received from Herb. . . . When it comes to rushing things Katherine Norr certainly did. She went to see Santa Claus on her vacation up in New Hampshire in the White Mountains. She wasn't seeing things either; you could pet the reindeers. . . . Ann Johnston, Zella Sheehan, and Rosemond Schooly have decided that sitting on the upper deck of boats will give you quite a sunburn. . . . Bill Lavine went fishing and caught the limit. . . . We hear there are "Fancy Speed Boat Rides", on Shriner Lake by Garwood Arnold for $25 each. (If he gets his motor back). . . . Herb Seslar spent his two weeks at Devil's Lake, Wis. The first night a "night flyer" blew its whistle, and poor Herb thought the train was coming right through his tent. . . . Elmer Buck wanted to see some "wild country" and drove to Northern Michigan. In fact he drove so far he got on a dead end road and trying to get back to civilization he burned up the generator in his car. After a lay-over of a couple of days a dog team brought him a new one. . . . Alice (Wrong Way Rogers) due to a "down pour" was so excited she got on the Huntington bus instead of the bus to Bluffton. Thanks to the driver, he informed her of her error. . . . George Miller took advantage of the rain last week when he got his landlord out in the rain and pointed out the places the spouting, etc., leaked. . . . Bob Kissinger and Ernest Cutter we hear are quite chummy these days. . . . Forest Grimm sold his farm. Poor Mrs. Grimm had to do all the hard work. . . . We wish to congratulate Joe Cochoit who was married July 26. Much happiness to you both. . . . "Grandpappy" Holloway is all smiles the past week. His first grandchild was born. He now comes up with the story it takes the baby's grandfather to put her to sleep.

Personnel-ities

by VEORA HABIG

Our congratulations to Ruth Shull who was elected "Miss Fort Wayne Works" by the Test Engineers, which proves that they are excellent judges of feminine pulchritude in addition to mechanical technicalities. We heartily agree with their selection and would also give her an additional vote for having a pleasing personality. . . . Much comment has been made this past week about LOOK magazine's article on our "Happy City." Naturally we are proud to have the national spotlight focused on Fort Wayne, but we were nevertheless a little disappointed when none of the pictures that were taken at our Elex Mother and Daughter party appeared with the article. However, one of them was shown in W&D's window display and it was easy to recognize our Audrey Thomas in a group picture. . . . It is being rumored that Herschel Smith is starting a matrimonial bureau and can readily advise anyone interested on all the reasons why they should forsake the role of single blessedness and middle aisle it. Herschel is a good salesman, we will admit; so be careful, Herschel, you may have to look for a new secretary. . . . The employees and friends of Col. Chester Lichtenberg met Wednesday to bid him farewell and wish him every happiness as he retires. On behalf of the group, John Welch and Ray Hoffman presented the Colonel with a gift and a scrapbook as a token of their esteem. We hope that as he pursues his many activities, he will find time to pay us an occasional visit. Good Luck, Colonel. . . . We wouldn't care if Ceal Romary had birthdays more often, as the cake she served as a treat to her co-workers was delicious. The singing telegram delivered by the "Personnelity Trio" was out of this world—but not far enough out! . . . Our division seems to be operating in full swing as Mr. Freeman, Irene Meyers and Bill Allen return from their vacations. . . . Our thought for this week is "It's not by man's purse, but by his character, that he is rich or poor."

Serves Company 30 Years

Celebrating his 30th anniversary with General Electric, John Neukam of the General Tool division, recently received a congratulatory letter. Attending the presentation of the letter were: (l. to r.) C. A. Brenner, Division Superintendent; John Roemer, Louis Paluszak, Clarence Wiedelman, Mr. Neukam, Chester Reynolds, Carl Schone, and George Spittler, Foreman.

GENERAL ELECTRIC
NEWS SUPPLEMENT

Candid Camera

VOLUME 14 AUGUST 26, 1949 No. 8

AT THE CONTROLS . . . Charles E. Wilson, right, president of G.E. and Robert B. McColl, president of the American Locomotive Company, wave from the cab of the nation's first gas turbine-electric locomotive. Developed by G.E. and American Locomotive Company, the 4500-horsepower locomotive was officially unveiled recently at the Erie Works.

CATCHING BUTTERFLIES . . . These scientifically-designed plastic forms are used by G-E lighting engineers to demonstrate patterns of light emitted from various types of street lights and to show how light can be distributed effectively on the street. Resembling huge butterflies, they are displayed by model June Raymond at world's largest outdoor-lighting center, Lynn, Mass.

GLASS CHEWER . . . Highlight of one of the sessions of the Apparatus Department Safety Conferences held recently at the Erie Works was the demonstration of a machine for disposal of used fluorescent light tubes. Members of the Safety Committee watch F. T. Clarke, Supervisor of Safety for tne Apparatus Department, feeding tube into the machine which chews it into tiny particles.

TEXAS BEAUTY . . . Winona Cox of the G-E Dallas Office was selected Dallas-Ft. Worth queen during recent contest sponsored by National Press Photographers Association; she later represented Texas, New Mexico and Arizona in Atlantic City. With her are Jimmy Adair, Manager of the Dallas Eagles and Dick Burnett, Owner.

FIELD DAY . . . Thousands of Schenectady Works employees, their families and friends, turned out for recent GEAA Field Day, featuring stage shows, midway rides and field events. Here W. A. Gluesing amuses the youngsters with his G-E House of Magic show, one of highlights of the Day.

G-E High Quality Helps To Bring in the Sales

The traditional high standards of quality built into all General Electric products are being stressed more than ever today, when we need every bit of business we can obtain to keep our factories busy. Since sales make the jabs, every additional item sold makes that much more work for some G-E employee. Able but reluctant buyers must be tempted back into the market by offering them products af such high quo they will buy eagerly once mor

All of us can help in th even higher values into the p Pictured on these pages are ployees whose special job it is maintain and constantly improv of all G-E products.

High quality starts with good design. Henry Fliegler, engineer, Anthony Yourkovik, draftsman, and William Schettler, drafting supervisor, Erie, work on assembly drawing for new Under Car Power Plant equipment.

Proper plant layout contributes to high quality products. Warking on scale model of plant layout for new Turbine Building at Schenectady are from left: A. McCorquodale, plant layout man, and J. B. Klopp, supervisor of manufacturing layout and appropriations.

In the hands and hearts of every employee rests the General Electric reputation for quality products. Only through the skill, care, and effort of each one of us will this reputation be sustained, and jobs made more secure. George Koch, above, typifies the production worker, key man in the Company's quality program.

The accuracy of the tools, dies, and molds is vital to the quality of the finished product. Sheldon Crocker, in the tool room at Pittsfield, produces precision mold for television cabinet on Keller machine.

Regular inspection on the production line eliminates defective products. Virginia Hart and Ruth Pierson, inspectors, carefully check plastic lamp shades at the Decatur, Illinois, plant.

Aircraft transmitters and receivers are tested in a cold chamber at zero temperature. Shown emerging from the "cold box" is M. F. Capri, test trouble shooter ot Electronics Pork.

At Bloomfield, air conditioning equipment is tested for compressor leaks, motor vibrotions, ond noise. Testers here are M. Moyerick, W. Naruki, C. Siebert, W. Thomos ond M. Klos.

J. E. Betts, laboratory engineer of the Construction Moteriols Deportment, tests rubber compound in milling operation on wire and coble insulotion ot Bridgeport.

No G-E product is too smoll nor too large for quality testing. Test engineers at Schenectady ore shown moking commutation odjustments and heat run on two 5000-hp steel mill motors. At control panel are O. L. Shoy and P. D. McGuire, ond on platform above, from left ore: G. R. Roth, E. N. DeVoult ond P. B. Boswell.

This testing laborotory ot Nelo Pork contains sockets for over 12,000 incandescent lomps of all types ond sizes. Life test racks burn doy and night on a regulor schedule, ore time recorded ond ore constontly patrolled by veteran inspectors.

Quality does not stop ot the factory door. To insure many years of trouble-free service, General Electric backs up its products with service facilities across the country. Here Peter J. Walsh, right, supervisor of Appliance Service Center at Boston, and H. H. Herbert, clerk, ossist a customer who has dropped her iron.

Candid Camera

ACE TRUCKER . . . Elected to represent General Electric, Melvin Beuchler, center, truck driver at Fort Wayne Works, recently won first place in the first annual Truck Roadeo in competition with nine other trailer and semi-trailer truck drivers. Here he is showing Ed David, foreman holding trophy presented to Mr. Beuchler, and C. D. Uncapher, Superintendent of Distribution, certificate he received last year from General Electric for having driven 29 years without a chargeable accident.

'49er SPIRIT . . . On their way to the annual All States picnic were these be-whiskered General Electric employees of Ontario, Calif. Works: Floyd Dotson, Melvin Coker and Jake Breaux. G-E men grew beards for the city-wide contest and women donned period dresses and sunbonnets as part of the '49er activities sponsored by local Chamber of Commerce.

FUN IN THE SUN . . . These bathing beauties didn't skip any of the merriment at Somersworth, N. H., General Electric Employees Social and Athletic Association Outing held recently under cloudless skies. From left to right, they are: Carrie King, Joyce Flint, Doris Slayton, Louise Eschmann, and Mary Berry.

OLD-FASHIONED JOY RIDE . . . Frank Randall, artist in the General Office, is on his way to picnic celebrating his 40th anniversary with the General Electric Company. With him are Rita Jovais, artist formerly with his division, and Chris Rugh, also of General Office, at the wheel of his 1913 Ford museum piece.

FLOWERY WELCOME . . . Sales representatives, visiting Allentown Works to see how toasters are produced, were met by lovely receptionists who distributed flowers from toaster-shell baskets. From left: Margie Tenchia, Jeannette Kriegsman, Eleanor Schaffer and Joyce Kershner.

Celebrates 30th Anniversary

C. F. William Oberwitte, Receiving section in Bldg. 6-1, recently celebrated his 30th anniversary with General Electric. He received a congratulatory letter for his long service with the Company. Those friends who attended the letter presentation were: (l. to r.) Richard Robertson, A. E. Leider, Production Manager; Dewain Freshwater, Barbara Meyer, Harry Beaty, Ruby Flaugh, Dale Porsch, Mr. Oberwitte, Marie Alleger, Marie Renz, Paul Klage, James Vevia, Mary Warren, Ruth Schroeder, Tom Dent, and Doyal White.

MEDICAL MEMOS.....

by Mary Heyman

Vacations are over and isn't it fun to think of the good times we had, and to begin to plan what we would like to do next year! . . . Alta Bishop changed her name to Mrs. Louis Mayle in a beautiful ceremony July 31 in the South Wayne Baptist Church. The reception was held at the Chatterbox at the Hotel Van Orman. Best wisbes are sent from the entire section to both for many happy years. . . . It took more than flash floods and showers to keep some of the hardy folks from attending the street fair in Ossian. Lyle Rupert, Berneta Welbaum, Mae Mulvane, Minnie Fryback, Imo Jean Schwartz, and Florence Hoevel were busy taking in some of the sights of the midway—and some food too without a doubt. . . . We are all looking forward to the day when Mrs. Orff will be recovered and back with us. . . . Imo Jean Schwartz has been having a busy time this week. Her sister and husband, Mr. and Mrs. Lawrence Radner arrived Sunday from Seattle, Wash., to spend a few weeks before going on to Princeton, N.J., where Lawrence will attend Princeton University. . . . Berneta Welbaum will be spending her vacation in Kansas. She was on duty during the shutdown, so is taking life easy while the rest are back on the job. . . . Mary Woods, retired matron who was employed in the Medical Section for a number of years, was recently inquiring about our folks here. We are so glad you haven't forgotten us, Mary. . . . Dr. Garton was at the Danville Plant on business on Monday of this week. . . . Minnie Fryback entertained as house guests over last week-end, Mr. and Mrs. Phrot Mills of Mount Clemens, Mich. . . . Ethel Carriger, former nurse at Winter St., has returned to the city after spending the past eight weeks at the Epworth Forest Camp at Lake Webster. . . . These few lines are dedicated to all who suffer from hay fever:

I sneezed a sneeze into the air,
It fell to earth, I knew not where,
Hard and cold were the looks of those
In whose vicinity I snoze!

Transformer Tattles

BLDG. 26-4

by Mary Ann Miller

Faye Russell finally came back from his vacation. He said he would have been back a week earlier, but he had to push Chryslers over the mountains with his Kaiser. . . . John St. Claire got his hair cut, at last. . . . Ask Faye Russell if he thought he saw anything in Oregon that Tom Hildebrandt hadn't seen. . . . Fletcher Cumbey got all dirty last Tuesday night changing a tire, because his wife wasn't there to do it for him. . . . Dutch Norwalt took Archie Rian to the lake fishing and Archie broke all of Dutch's fishing equipment on six inch bluegills. . . . We hear Frank Keck is buying a new home. Good luck to you, Frank. . . . Dutch Norwalt is all set for the fishing season. He has plenty of crickets to last him the rest of the summer. . . . Mary Moses is leaving us today to be a full time housewife. . . . Lucille Neviles has a new pet rabbit. . . . Ray Horstman and Claude Hughes were eating huge ice cream cones in Albion on vacation. Can you imagine that? . . . Say, George Harmeyer, the boys want to know who your buddy was when you were at the races up at Rome City. . . . Al Helwig and Benny Keller just came back from a three weeks' vacation. . . . Ralph Smith went fishing last Saturday, and all he came back with was the usual suntan. . . . Ask Dutch Norwalt why he and Archie Rian rowed all over the lake taking his champion motor for a ride. . . . Good carpenter wanted: See Jelly Mennewisch. John Mueller need not apply. . . . We hear that Marian Boerger is sporting a new car. . . . The "Busco Kid" built a two-car garage and needs a name plate for over the door. Can anyone help him? . . . Bessie Chapman came back to work from a three weeks' vacation. . . . Congratulations to Bill Rectanus on his new trousers. . . . Speaking of being absentminded, we think Bill Rectanus is the one. He had Glen Hobbs call him at 1 a.m. to tell him the name of a good lake to fish. By morning he had forgotten the name and had to go to a different lake. . . . Forgot to mention last week that Nora Coburn went to Clear Lake on her vacation. . . . Sorry to hear about Helen Hunt's sudden illness. We wish her a speedy recovery and that she will be back to work soon. . . . We hear Mike Dunscombe is recovering nicely from his operation. . . . Mr. and Mrs. Kenneth Fosnaugh (the former Doris Henry) announce the birth of a son, Gregory Allen.

Idea Brings $55 Award

Raymond Crippen, Specialty Transformer Division 95, recently received a $55 suggestion award for his idea to redesign treating trays, thus reducing the damage of transformer coils. He is shown at the right explaining the suggestion to his foreman, R. J. Koldewey.

Spiritual muscles are as dependent on exercise as physical ones.

WIRE RAVELINGS

by AL HAMBROCK

Something we seldom see: Clarence Coulter, Bill Rohe, Lou Maier and David Bastian without a cigar between their teeth; Vaughn Sheets, Bill Irwin, Carl Hankel, Forrest Gill and Jack Fyock without a pipe. Oh, yes we forgot Ray Kierspe is a cigar smoker too, that is, if someone is good or dumb enough to furnish the cigars. Some things we do see: In Wimpy Lemper's desk drawer. Powder, powder puff, two boxes of snuff and a pair of old shoes. What no lipstick? . . . If Guy Oberlin had all the money he has spent on that old jalopy for repairs, etc. he could now be the proud owner of a brand new Cadillac Deluxe. Get wise to yourself, Guy, and junk that junker. With a new Cadillac, folks would think you were in the chips. . . . Since Truman Buckles is having so much sewer troubles, Wimpy Lemper says he will help him out temporarily by loaning him one of his WPA projects. That's mighty nice of you, Wimpy. . . . Rumors indicate that Herb Scherer will soon be the owner of a brand new Chrysler. . . . Jake Arnold has had another operation and is already back to work. You just can't keep a good man down. . . . Loretta Geradot has returned to work and is looking fine. Happy to see you back, Loretta. . . . Congratulations to Mr. and Mrs. Cy Ort, who were married 25 years ago August 19 in a double wedding ceremony. Mrs. Ort being a twin her sister was married to Cy's cousin. Our congratulations to them too. . . . We haven't heard of anyone leaving this good old U.S.A. lately. We mean those people who believe, preach and practice Communism.

It's Windy Here

by JOAN AUBREY

First of all we want to congratulate Mr. and Mrs. Henry Gollmer on the birth of their son Stephen John born Aug. 17. Both mother and son are doing fine. . . . Some people carry this idea of rest on a vacation just a little too far. Charlie Gable started his resting when he arrived home after work Friday before vacation. He sat down on the back steps and looked at his lawn and decided it should be cut but thought he should rest a little first. The reports on just what awakened him from his "little rest" are quite varied but the most reliable one has it that the neighbors called the pulmotor squad after the fourth day of immobility thinking he had passed on to the great beyond. However, they found that he was just doing a Rip Van Winkle, and after some effort were able to arouse him. He looked around through a five day growth of whiskers and decided the grass was too high for him to cut with his hand mower. He very conveniently remembered that one of his coworkers was equipped with both rotary and sickle bar power mower and managed to get into his car and drive out and suggest to the co-worker that he come in and cut Mr. Gable's grass as part of his vacation. Therefore, one afternoon several days later tractor, rotary mower and sickle bar were loaded into a trailer and transported to Mr. Gable where operations were carried on until dark. Not being able to complete the job before dark the equipment was left there and arrangements were made to finish the job in the morning. Upon arriving in the morning the friend found that Mr. Gable had already left for Indiana Dunes State Park on his vacation. Fortunately the friend has a third week later during which he will take a vacation. . . . We want to wish Marg Stodgell a happy birthday August 22 and Dorothy Heinzelmann August 26. . . . What happened to all the big fish stores we were expecting to hear after vacation? For some reason no one was very proud of their fishing trips. Even Mr. Dennison could only say the weather and scenery were wonderful.

2-2 TALES

By BELLE BUCHAN

Now that vacation is over, we are looking over and enjoying dozens of pictures and listening to many fish stories. . . . And speaking of vacation, Perry Esterline reminds us that it is only 48 more weeks until next vacation. Isn't he a cheerful guy. . . . Ralph Armey spent a part of his vacation running between the Municipal Beach and the fair grounds. It seems that he and Ina started for the fair, but got on the wrong bus. By the time they discovered their mistake tbey were nearly to the Beach. Oh well, walking is never crowded. . . . Norma Krall returned to work this week after several months' illness. Welcome back, Norma. . . . Vern Castle is combing his hair now with a wash cloth, due to a crew cut. Says he can sleep five minutes longer now. . . . While we are talking of hair, has everybody noticed the cute little "Charley Chaplin" that Jack Welch grew during vacation. It is a good thing that we only had two weeks or Jack would have had to join the House of David.

After a two weeks' vacation, we are all knuckling down to another year of work. It was a fast two weeks for a lot of us, according to reports, fishing was very good. . . . Wisconsin and Minnesota can't be beat. Bluegills were Edna Callow's favorite bites and good ones, too. Her family toured and fished in upper Wisconsin. . . . Mina Lampy and the Forest Owens family had a scenic trip in Wisconsin and did some fishing. Forest posed with a beautiful catch. Hayworth, Wis., was their most talked of place. . . . A cousin in Florida was really happy to entertain Ed Hesher and family. He has some fine tales to report on, especially, the one on the razorback hogs. . . . Chicago, with its Railroad Fair was quite interesting this year. Ralph Cauble, Lloyd Ahr, Andy Andrews, and Ray Schott had a time in the Windy City. They all came back in A-1 shape. . . . The Decatur golf course was frequently visited by local employees. Willie Morgan and Esther, George Womack, and Annie were putting on those greens. . . . Vida Lammert was at home remodeling her adobe. It will be quite snazzy when it's finisbed. . . . Mary Fenning and family enjoyed a few days at Turkey Lake. Haven't heard whether fishing was good or not. . . . Milton Brown visited his sister in Chicago and put part time in fishing on Lake James. . . . There were several marriages performed. One was Linda Bultemeier who took Richard Striker for her husband. The treat was fine, Linda. Linda is planning to live on a farm around Geneva, home of our famous Indiana writer, Gene Stratton Porter. . . . Columbus, Ohio, has some fine features. Bob August and wife spent several days with relatives, also the little wife did some shopping. . . . Alvera Lose, did you get anywhere during your vacation? So far there's no report on it. Nora Smitley, did you keep entertained on the farm? . . . Evelyn Thurston treated her group on her birthday. Many more happy ones, Evelyn. . . . We have another birthday. Happy birthday, Mable Eyanson. Did your hubby buy you something pretty? . . . A little on the flying vacation trips, Kenny Beard flew to Detroit to a ball game. Josephine flew to Flying Farmers Field Day at Glenview Navy Base, Chicago. . . . A proud G-E father was Laverne Sprunger. His wife presented him with a daughter. Laverne is building a new home for his family and is doing most of the carpenter work himself. . . . Everyone is pretty well back in harness after the two weeks' vacation, but you still hear some talking about the wonderful time they had and pictures are still being shown that were taken. . . . The new Oldsmobile is owned by Kenny Gaunt. . . . Barbara Roop had to take another week off work, due to an automobile accident, but she is able to be back with us again. . . . George Myers and Bob Striker are still on a diet, we understand. . . . The voice of experience—Ray Leitz—speaks: "I didn't know it cost so much to give a wedding for a daughter." Now Ray says he wouldn't mind if he had another daughter to get married in a couple more years as he would have time to save up a little money for the occasion. . . . Oh yes, Margaret Wolpert became Mrs. Wilbur Lengerich during vacation. Best wishes, Margaret. . . . The other day Leonard Meyer tore his pants quite badly, and he had to go around holding his pants and hunting for Hilda. So finally he did find Hilda and she had to take some tape and tape the hole shut for Leonard, but gee, the embarrassment until he found Hilda. Some on Leonard's line suggested that Leonard bring an extra pair of pants to work in case of emergency. . . . Our sympathy to Abe Richert upon the death of his father during the vacation shut-down. . . . We also extend sympathies to the families of Raymon Johnston and Lohnas McIntosh. Two young sons of Raymon's were struck with polio, and one son of Lohnas also has recently contracted the dreaded disease. At this writing the boys' conditions are not considered critical. All of us hope for complete and speedy recovery.

Receives Congratulations For Service

Clyde Crabill, FHP Motor Div. 19 in Bldg. 17-1, recently completed his 30th year at General Electric. At that time he received a congratulatory letter, as well as the best wishes of his co-workers. Seated in the picture are: (l. to r.) Frank Quinn, Foreman; Ernie Riley, W. H. Franke, Division Superintendent; Mr. Crabill, Frank Gitter; Ed Kronmiller, Foreman; and Henry Wichern. Standing are: (l. to r.) Marion Spague, Paul Geiger, and Norman Bender, General Foreman.

Our deepest sympathy to Edna DeLeury in the sudden death of her husband. . . . We wish to announce that Ernest Clark was the guy who had the first lucky number in our vacation pool and Thelma Loveless held second. . . . Lavona Porter has moved to the city and is having trouble in keeping her shoes on now. . . . Garnett Currie is planning her new fall wardrobe from the Glamour Magazine and the help of her co-workers. She may turn out to be a fashion plate. . . . We hear that Lois Bailey is saving her money to buy a farm. In the meantime she is shopping around for a good manager. Here is a chance for some ambitious fellow who can pass the test and enjoys outdoor life. . . . We bid farewell to Homer Huffman, Melvin Boercherding and Dan McCrea. Good luck, fellows. . . . Hazel Scott has a little dog she calls Caesar. Oh how that dog rates. We are told that the comfort of the dog comes first. . . . Ruth Freeland has a soft spot in her heart for all living things, be it man or mouse. Her sympathies were given to a little mouse that got caught in the trap that she herself set for him, and it goes like this, Sorry little fellow, the funeral is tomorrow. . . . Dan Reuille doesn't want his name in the news anymore, so he has promised to be a good little boy. . . . When Whitey Leiberenz goes to the cement room, he pops through the first swinging door he comes to. The ladies room looks very nice since being redecorated, doesn't it, Whitey? . . . The gang gave their best wishes to John Collins by presenting him with a wool blanket and some towels for his wedding gift. We wish you many years of married bliss. . . . Elaine Lingerich has left us to start on a bigger and better career. She is waiting for her little bundle from heaven. The best of luck, Elaine. . . . Dale Stuckey purchased a farm and as far as he was concerned everything was in order. Later a little item turned up about a bill for the lightning rods. The next time, Dale, it might be better to read all the small print first.

Office Offerings

Sorry, we haven't much news from the office this week. The big move was made last Saturday and everyone is singing, "Where are you now that I need you." Maybe by next week, we will have located most of them.

Safety Section To Distribute Leaflets Explaining Portions Of New Pedestrian Ordinance

A series of six leaflets explaining the new city Pedestrian Control Ordinance will be distributed to all foremen and supervisory personnel by the Fort Wayne Works safety section starting this week.

Each leaflet covers portions of the ordinance, as well as cartoons illustrating each section. These leaflets are also being distributed by mail, at civic meetings, on street corners in the business district, and to employees at other business and industrial firms in the city.

The new ordinance provides essentially that all pedestrians cross at corners and walk according to the traffic lights, and that drivers must give the right of way to pedestrians at all intersections where pedestrians are complying with the terms of the ordinance.

The Fort Wayne Police Department will begin warning violators of the ordinance on Sept. 1. The department will then inaugurate strict enforcement of the regulations on Oct. 1. Fines for violation of the ordinance will be not less than $2 nor more than $10.

Well what do you know—two weeks already in toward your next vacation. Before you know it, time will fly by and it will be vacation again. Oh, happy day. . . . Ida has the right idea. She is going to start her Christmas shopping now so she will be done early. Such ambition. . . . Congratulations are in order for Mary Ohlwine who became Mrs. Wilmer Leitch August 6. All our best wishes for your happiness. . . . Congratulations too are in order for Polly Van Horn who has a new daughter, Linda Kay, born Saturday, August 13. Best wishes to mother and daughter from all the gang. . . . Some people traveled miles down South during vacation, like Cy—while others traveled from the back to the front of the house putting sidewalks in, like Larry Reed. Some fun. . . . Herman Deister says he got all the way to Decatur on vacation. Wonder how he could stand such a long trip. . . . Ruth Baker's vacation wasn't so pleasant, at least the part where she met suddenly with an anchor and knocked herself out. Ruth was standing on the edge of the boat and meant to step back to secure her footing but missed her step, fell and cracked her head on an anchor in the bottom of the boat, and really saw stars. Hope you feel better now, Ruth. . . . While Don Gerardot and family were on vacation they stopped at a cabin in Albany, N. Y. Early next morning they ate breakfast there and started on with their trip. After about 70 miles Don stopped to put oil in the Chevy, you see he carries his oil with him, and discovered that the suit cases were missing. They drove back to the cabin in Albany to pick them up and since it was nearly noon decided to eat lunch at the same place they had eaten breakfast. This little trip cost them a day of their vacation. However, they must have liked the food to drive all the way back to eat dinner in the same place they had eaten breakfast. What about it, Don?

Too many people look upon marriage as a beau knot—and untie it!

Only one ad per employee may be inserted. Each ad must be limited to 20 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday Noon, August 29, 1949

LOST AND FOUND

LOST—Brown cosmetic bag with draw string top, mirror bottom. Gift from husband while in service.

LOST—Pair prescribed ground, green sun glasses.

LOST—Pair ground safety glasses in a brown case.

FOUND—Fountain pen, black trimmed with gold. Found on Lindley Ave. near gate house.

FOUND—Padlock on Lindley Ave. parking lot.

FOR SALE

FOUR TIRES—5.50x16, in good condition, reasonable. H-25182.

PEDIGREED COCKER PUPPIES—One male, two females, from champion stock. Ideal for show pets, hunters or breeding stock. E-37203.

SMALL JOHN DEERE TRACTOR—with attachments, good as new. A-19931.

RAT TERRIER PUPPIES—Six weeks old, paper broke, $5 and up. H-70355.

BABY SCALES—Daybed, lamp, davenport with slip cover, reasonable, 3024 S. Hanna.

DARK GREEN COAT AND LEGGING SET—Size 8-9, princess style, nearly new, $7. A-95064.

SMALL HOUSE TRAILER—Sleeps four, refrigerator, sink, wardrobe chest of drawers, cupboard; priced for quick sale. H-76272 or 3937 Hoagland.

WALNUT 3-PIECE BEDROOM OUTFIT—Including mattress and springs, good condition, reasonable. E-38901 Saturday or Sunday.

MALTED MILK MIXER—H-01322.

G-E SWEEPER—Good condition, very reasonable. H-66483 after 4 p.m.

STEVENS SEMI-AUTOMATIC—22 calibre, like new, $25; RCA portable, ac, dc, radio, like new, $29. A-3724.

TWO-PIECE MOHAIR LIVING ROOM SUITE—Three-piece bedroom suite, coil springs, felt mattress. A-60743.

1937 DODGE COUPE—Good condition, new tires, $225. 1209½ Boone.

G-E MONITOR TOP REFRIGERATOR—5.5 cu. ft., $75, good condition. A-1888.

GIRL'S BIGYCLE—Standard size, good condition. $12. H-60951.

LOT—N.E., 107x135, cash or contract; two bows, 60 lb., quiver and arrows; 20-gauge shotgun, box of shells, $12. H-74081.

KITCHEN SINK $5—Gas stove, $15, right hand oven, both good condition. H-65522.

COW—H-28539.

BABY BUGGY—Reasonable. H-81565.

GIRL'S SCHWINN BICYCLE—Good condition; upright piano, mahogany. H-74891.

SOUTHWIND GASOLINE AUTO HEATER—With attachments, like new, $18. A-2035.

WANTED

SIX-ROOM UNFURNISHED HOUSE—Any location. A-80171 and ask for Devona Clayton.

THREE-ROOM UNFURNISHED APARTMENT—For one lady. E-32712 after 4 p.m.

PAIR OF OLD FASHIONED SAD-IRONS—With handles attached. A-63042.

BOY'S 20 or 24 IN. BICYCLE—Second hand. A-65133.

THANK YOU NOTE

JOE MOUGIN WISHES TO THANK—His co-workers for the many nice things that were done for him on the last few days before his retirement, and also for the splendid gifts he received.

FOR RENT

SLEEPING ROOM FOR MIDDLE-AGED LADY—Large, newly decorated, large closet, innerspring, new rug, hot water, telephone and breakfast privileges. H-91512.

TWO ROOMS AVAILABLE TO GENTLEMEN—Near bus line. 1144 Oakdale drive. H-3822.

TRANSPORTATION

WANTS RIDE—Ruth Bonewitz, from Columbia City. Works for Mr. Schuman, Bldg. 26-3, from 7-3:30. Extension 418.

MOTOR and GENERATOR Static

Thought For the Week: "Work for all you are worth and you'll be worth more."

AIN'T: Sam Baumgartner listened to so many soap operas during his vacation that he was almost at the point of believing that "Life Can Be Beautiful." Sam was really riding high, fishing was good weather fine. He was with some very pleasant acquaintances, had money in his pockets and no worries. For the sake of publication we will say that Sam and one of his pals were in an ice cream parlor drinking malted milks. About the time they started their second malted, two young ladies entered and took the booth back of Sam. Suddenly the boys heard one of the girls remark, "Sam, will you come here?" Sam's expression changed from bewilderment to pride. He had been called. As he turned to arise, in trotted a little black dog which had looked at him in a scornful manner as if to say, "Me, not you." Sam sank back in his seat, "Nice dog," he remarked to his pal. Part of life's beauty was gone. Later they drove over to visit Art Druce and Sam chose to sit in a large rocker at the cottage. As he leaned back the rocker tipped and our hero did a turn and a half. By this time wounded in spirit and body, Sam decided that life ain't so beautiful. . . . LICKED: Dick Hobson, our baritone, met us in the aisle. "How was fishing?" we inquired. "Fishing," he remarked, "I had so many I am tired of the name, 'fish.' I caught them with every type bait, even on a bare hook and had so many I didn't know what to do with 'em. But the best way to catch them was by clapping my hands." "Clapping your hands," we asked, looking dumb. "You realize that I am a musician," he replied, "then you realize that I understand the effects of sound on man, beast, fowl or fish. I discovered that by going out in a boat on a dark night and clapping my hands in a certain way the fish would jump in the boat. I had a boat full in a few minutes." We looked at him in a manner intended to convey doubt, murmured, "yep" and walked away. We were licked. . . . THE HORN BLOWS: Pete Dannecker now has a complete understanding of the recent movie, "The Horn Blows at Midnight." Peto bad his pride and joy, his new Ford, parked in the Dannecker driveway. The family was tucked in bed and suddenly the wee hours of the morning were shattered by the blast of an automobile horn. Muttering threats against the wretch who would disturb decent citizens at that hour, Pete rolled out of bed intent upon giving the culprit a piece of his mind. When he rushed out of the door, he discovered that it was his own car. With the aid of Junior and under the glares of the neighbors watching from their windows, he finally stopped the noise. Next morning he decided to drive to the garage and as he stopped at each red light he was awarded more glares when his horn began to blow whenever he stepped on the brakes. . . . HATS OFF to Betty Eisenacher who recently won the "Gold Star" driving award. It is reported to be safe to pass anyone who has received this award as an extended arm will mean either a right turn, left turn or stop. All kidding aside, Betty, we are mighty proud of you and still say, "Hats Off." . . . CONGRATULATIONS are in order for the new fathers in our section. Eddie Horman became a father of a boy named, Michael Thomas.

We wish to Announce
the Second Miller Production
"An Angel from Heaven"
starring
JOAN ELAINE MILLER
First Appearance, August 20, 1949
5:30 A.M.
Weight 6 lbs., 5 oz.
Director, Ernest P. Miller
Producer, Rita Ann Miller
Technician, Dr. Harvey L. Murdock
Asst. Tech., Mary Buchheit
Now appearing at 1315 Jackson St.,
Fort Wayne, Ind.

Sleuthing

IN BLDG. 4-6

By Gil Baker and Walt Gerke

HOUSE WARMING: Everyone who could locate baby-sitters and could get away for the evening attended Walt Gerke's house warming last Friday evening. Everyone enjoyed themselves. . . . WELCOME: The DC Division welcomes Johnny Leffers back into their fold. The AC Division wishes to welcome Test Engineer Robert Ziese to their division. . . . SPOILED FISH: Judy Clark and Marge Walker ate at the Belmont Flagship last Friday noon. As they were about mid-way through their lunch, the manager rushed up and informed them the fish was spoiled and not to eat it. Later Judy said they had noticed a "cheesy taste." . . . FLOOR SITTER: Jim Capps is another member of the floor sitters club. They say he had great poise. . . . BIRTHDAYS: Happy birthday to Claude Voss, August 17; Harry Balz, August 25; and to Wally Clayton, August 29. It is extremely difficult to decide whether Harry or Claude received the nicest (?) and the most birthday cards. . . . ENGAGEMENT: Bernice Fisher became engaged last week to Jerry Freiburger. The wedding will take place October 22. . . . IT'S A LONG WAY TO WAYNEDALE: Anyone wanting to know about a shortcut to Waynedale through Poe see Milt Goeglein and Jack 'O' Kirlin. . . . SOME HAPPINESS, SOME SADNESS: All the members of Bldg. 4-6 wish to congratulate Joan Poos on her announcement of her wedding. The ceremony will take place September 24. We are sorry to hear that she will be leaving us a week prior to her wedding day. She has always done a great job in writing "Sleuthing in 4-6." All the luck in the world to you and your husband-to-be, Joan. . . . VACATIONING: Ray Jones has been bombarding members of his office with picture cards of the beautiful west and making us all have that "Wish we were there" feeling. Ray again passed on his favorite remark to us when he was on vacation and we were slaving, "Give the place back to the Indians." . . . WOT HOPPENED? Harry Balz seemed poised for any fast job Friday, for he was figuratively setting on the edge of his chair. Thursday night while hunting crickets for a weekend fishing trip, he stirred up a hive of wasps. He was stung three times with two of the places on his hands. See Harry about the third. . . . GLAD TIDINGS: We are happy to hear that Gordon Goodrich and his wife have located a new apartment.

Rain: That stuff that falls at 3:25 when your umbrella is home. . . . Are you in the groove yet? We noticed Gertie Wheat was. She had her usual afternoon lunch of a banana and doughnuts. . . . Ida Sinn, Helen Biddle, Thelma Oswald and Stella Kemp were on their third week of vacation last week. . . . Erma Landes was also off to Canada taking in the sights. . . . Mary Wright is on her third week taking in the sights of Kentucky. . . . Mabel Schaaf spent last weekend at Grand Rapids, Mich. . . . Gertie Dammeyer reports that they caught plenty of fish on their vacation. She was the first to report that. Most have said, "they weren't biting." . . . Glad to report that Grace Jones, Rosella Farrell, Hilda Jensen and Ann Kensill have returned to work after being on the sick list. . . . We had to bid goodbye to Harry "Curly" (Kokomo bull story) Chism last week. Our loss is Bldg. 4-4's gain. Just don't forget your friends in Bldg. 17 though. . . . Don't know what else George (Abraham Isaac) Soule did on his vacation, but he did raise a cooky duster. His wife said she knew that he didn't shave it off because his name hadn't been in the NEWS for a long time. That will do it, Abie. . . . Ethel Keller is going to change the song, "All I Want for Christmas is My Two Front Teeth." Her version will be one tooth by Labor Day. . . . Alice Brockmeyer might have made it to work on time when they had a flat tire, but Ted jacked up the wrong side of the car. . . . It's a happy birthday to Helen Kaminski and Edith Paxson. Edith received many cards and hankies. . . . During vacation Lorena Buuck was a bridesmaid for her cousin's wedding. Did you catch the bride's bouquet? However, we won't breathe a word about city life getting you down. . . . Floetta Zartman doesn't think it pays to cut weeds with a sickle. . . . It's congratulations on the blue bootied tax deduction at the Bill Worden's. Bill was a former co-worker. . . . Leona Hollis kept the Kendallville fair going last week. She was there every night. . . . Some of the main winders had a party and went to see Helen Weigle Schiffli. There were no pictures taken because Lorena Buuck forgot the flash bulbs. . . . Naomi Robinson was certainly busy last week. She just didn't have time to take in a fire drill. . . . We wondered what all the excitement was down by Rose Dowling's machine. It was a locust paying a visit. Herschel Case showed the visitor the door and everything was peaceful again. . . . We noticed that "Pop" Castle has a new short hair do these days. . . . Does anyone have a picture of a hootin-nanny? If so, give it to Delores Wonderly. . . . It's howdy to the newcomers on the early bird shift. Those who came from second shift will probably find that the old pillow wants to wrap around their necks when the alarm rings, but they'll get used to it. . . . Verda Deal must have been upset. She came to work wearing one stocking, and the other was around her neck. . . . Delbert and Marcille Thomas celebrated their fourth wedding anniversary last Friday.

A dude ranch is where it's too painful to ride horseback by the time you learn how.

Inquiring Reporter:

DO YOU THINK THE STORY IN "LOOK MAGAZINE" GIVES A TRUTHFUL PICTURE OF FORT WAYNE?

ROBERT TILL

Taylor St.

"Yes, I think the story does give a true picture because Fort Wayne is a city of opportunity. Where could you find a happier group of people than in a community where everyone has an equal opportunity?"

GEORGE HORNER

Bldg. 26-1

"Not necessarily. I was born in Fort Wayne and I imagine I will stay here the rest of my life. I agree with part of the article, but not all of it. I don't see where we are 20 years ahead in vision, and I would have liked to have had the writer explain his reasons for making that statement. I guess I don't know the right people. I don't know a family which makes the average income they say we make in Fort Wayne. It seems to me they put that a little high. The story wasn't too bad, but I think they built it up a little too much."

HERMAN SEXTON

Bldg. 27

"Yes, I think so, as far as it went with the story. But for a city that's supposed to be the happiest, I think there is lots more that could have been added."

MARY BEAMAN

Bldg. 17-2

"From an 'over all' picture and generally speaking, yes. Our town is a good example of our American way of life. A personal thought from song and verse, 'be it ever so humble, there's no place like home,' and 'ain't God good to Indiana, our own Fort Wayne'."

ILENE HARDISTY

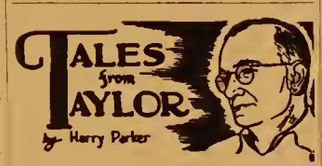
Bldg. 28-2

"I think Fort Wayne is a happy town, but not without fear. I thought the article was good and interesting, but was disappointed in that I thought it would be longer and especially have more about the General Electric Company."

General Foremen Cite Leaders In Safety Inspection Reports

Charles Fisher, foreman of the punch press section at the Decatur plant; Harold Hart, foreman of Div. 13 Test at the Taylor St. plant, and Joe Mougin, foreman of Motor and Generator maintenance, (above) rated the highest of all foremen for their safety attitude, accident investigations, consideration given shop safety committee and inspection reports, and for encouraging safety committeemen activity.

The safety inspection reports of all general foremen were announced today by Herschel L. Smith, safety engineer, for the first quarter of this year.



The reports contain the standings of each foreman, whose safety activities are analyzed by the general foreman of each division at the Fort Wayne Works.

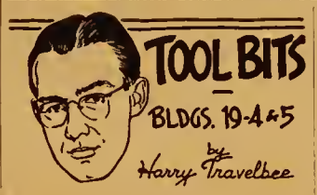
The report from every general foreman is based and each foreman graded on the following items:

Foreman's safety attitude and personal conduct; accident investigation, potential and lost time; consideration given shop safety committee reports; consideration given safety inspection reports; safety committeemen activity; safe practices, discipline, instructions; working conditions, ventilation, light; physical hazards, guards, etc.; housekeeping; equipment; building conditions; planning, and dress of employees.

The following foremen were rated highest in their division or plant during the first quarter of this year:

Fred Castor, FHP Div. 1; Loyal Liddy, Div. 13; Lowell Arnold, Div. 14; Jess Hahn, Div. 16; Clarence Gardt, Div. 17; Loyal Decker and Victor Hall, Div. 19; Wilbur Putt, Div. 20; Harold Hart, FHP Test; Walter Wolf, Div. 91; Don Hirschfelder, Div. 94; Joe Mougin, Motor and Generator; Otto Rodenbeck, General Tool; Robert Hatfield and Martin Macke, General Service; John Ruhl, Wire; Earl Gebert, Insulation; Paul Merkert, Distribution; Richard Gebert, Apprentice; Charles Fisher, Decatur; Galen Simon, Tiffin; Don List, DeKalb, and Wilbur Bonebrake, Danville.

As the writer of this column, I wish in this manner to express my sincere gratitude for the many beautiful cards sent to me by my friend "Dimples" on her mad dash around the country. Being an airline hostess she must have been using a jet job in touring the country as I received cards from coast to coast and border to border. Not being able to get away this year outside of attending the Chicago Railroad Fair, evidently she felt sorry for me so in this manner she thought perhaps that she might make up to some degree what I had missed. . . . Mable Miller informed me that she had some of my property over at her home. Asking what it might be, she told me that it was a pair of bats. They were cavorting around over her bed one night last week, driving her nearly frantic until her husband got up and succeeded in eliminating the flying rodents. . . . Kenny Miller could not afford to take a vacation trip this year and gives us the reason. Since the arrival of five new puppies at his home, he said that now that he has five more mouths to feed and groceries being at their present figure he had to forego a trip this summer. . . . We have heard a good many fish stories since the vacation period ended, but none of them were of a sensational nature with one exception. This has to deal with Sam Allmandinger and Quentin Romy's fishing trip into Canada. It seems that they were fishing on one lake without much success, so they made a portage to another of goodly size. They proceeded to the center of this body of water when their motor gave one loud snort and quit. Being a long way from shore without gasoline and oars they stood up in the boat emitting lusty yells for help until they were finally rescued by the Canadian Mounted police.



Another vacation is gone, but not quite forgotten. Everyone is pretty much in the groove again, looking forward to next year when traveling, fishing, and just plain resting will be the highlights. . . . Has everyone noticed Tez Trump's new "China Clippers"? With those bow ties and that "Million Dollar Smile," he is quite a guy. . . . Anyone wanting linoleum laid, see "Boodles" Bendel, that is if you're not in any hurry. . . . Harold Canfield has returned to work after spending some time in an Indianapolis hospital. Welcome back, Harold. . . . Carl Fuller, who was injured, paid us a visit the other day. He is looking good, but won't be back for some time due to a cast on his back and one on his ankle. Hurry back, Slim. . . . Harry Rohrbaugh didn't have any fish stories to tell after vacation. That really has us stumped. . . . From the looks of the bandage on Gilbert Hilt's finger, he really drives a mean hammer. (Wonder what he said.) . . . We are happy to learn that Virgil Kline hasn't lost his appeal. Too bad, though, the appeal had to be wasted on the canine species. Now, why don't you hite the dog, Virgil? That would be NEWS! . . . The fellows say that Whitie "Joe College" Van Auken is wearing the special tee shirt so he can go to Spooner next year, Cabin Free. . . . The question is: How much will it cost Arnold Landis before his wife wins a figurine at the Ossian Street Fair? . . . The new aeoustic ceiling in the Engineering room is going to be rather tough on John Lare and Dick Gallmeier. It seems they can't make themselves heard from one end of the office to the other now. . . . A very happy birthday to Andy Frank, Harry Feaser and "Hoot" Gibson.

G-E Team Enters Midwest Industrial Golf Tourney

William Adams, Harold Braden, Dick Szink, and Warren Wickliffe (l. to r.) represented the G-E in the annual Midwest Industrial Golf tournament held last week-end. Briggs Manufacturing Co. was host for the event staged at the Hillcrest Country Club at Mount Clemens, Mich. Although the final tallies are not in yet, it is estimated that G-E placed tenth among the 30 or 35 teams entered. Mr. Adams paced the team with a low score of 150 for the 36 holes. Szink was next with 159 on the two-days' playing. Braden scored 162, and Wickliffe, 164.

The fellows with whom Bill Mowery rides have tried for the last few months to tell him of the hazards of matrimony, but Bill couldn't see the boys' side of it, especially since they are all married. He got married August 6. We wish you and your bride all the happiness in the world. . . . Charlie Bracht was married during vacation, too. All the best, Charlie. The office girls all say "thanks" for the nice box of candy, too. . . . Did you notice the tough time Harold Hoffman had walking after he came back from his vacation? He went horseback riding with his daughter at Pokagon State Park, and he says that the trouble was that when the horse was coming up, he was going down. . . . Russell Sage not only talked about the fishing in Wisconsin, but he brought back pictures for proof. . . . Herb Thiele is a mighty proud grandfather as a new granddaughter came into his life. We hear the little girl is now blessed with enough toys to last practically a lifetime. . . . Pearl Sehoaf and his wife had a fine vacation at Big Star Lake in Michigan. If anyone doubts the fish stories ask Elmer Auman about them. We did hear that Pearl is thinking of changing outboard motors. Why? . . . John Neukam celebrated his 30th year with the Company last week. We congratulate you, John, and wish you many happy and healthful years to come. . . . John Roemer had high hopes of becoming a violinist until he saw his picture (in John Neukam's 30th year picture) and realized that he had a double chin. His problem was that he didn't know which chin to put the violin under. . . . Docs John Hensler like fish? If you don't think so just ask him. We hear that he is considering going fishing himself. Maybe some of these fishermen in Bldg. 19-5 will get you a mess, John. . . . Jack Schemehorn really pulled a fast one. He orders a malted milk, drinks two-thirds of same, and then throws in a fly. He called the waitress over and she with a cry of horror, immediately runs and makes our friend Jack another malted. . . . Jim and Jean, the much talked about twins of Mr. and Mrs. Jim Ehresman were seen riding down the street in a new red wagon. . . . Paul Weaver says the pike are so big up north where he vacationed that they pulled his boat over. . . . Agnes Ditlinger flew to Mexico City on a 15-day tour. She said she had a wonderful time. . . . Mrs. Forest Whonsetler wasn't taking any chances of being called a liar. She brought snapshots of her fish. . . . Carl Einsiedel was reported hiding out since the game warden caught his dog hunting ducks out of season at the lake. . . . Elmer Bly, who has retired, was presented with a sander at a farewell party given for him by the office and foremen at Foster Park recently. We all join in wishing you the very best, Elmer. Mr. Brenner showed his moving pictures of his trip to California and we all enjoyed them very much. We lost count of how many hotdogs George Spittler ate at the picnic. Good, weren't they, George.

Most of us give advice by the bushel, but take it by the grain.

Monday Night Ladies' Bowling League

Bowling time is here again! Any girls interested in bowling for the Monday Night Ladies' League should fill out the blank below and send it to either Voyce Brumbaugh, Bldg. 4-4, Ext. 2356, or Melinde Gehle, Bldg. 4-3.

Touching The Bases

by Walter Histed

In answer to many inquiries about the advertising of Luke Appling, Dave Philley and other ball players coming to Fort Wayne with the Chicago White Sox for the exhibition game Tuesday night, July 12, and then not showing up, the following are excerpts from a letter sent to G-E Club officials recently by Charles A. Comiskey:

"I am very sorry that this unfortunate incident occurred. As you realize, it is entirely up to the Field Manager to select what players will play in exhibition games."

"I am very sorry that our Publicity Director had sent you mats (photographs) of Luke Appling, Dave Philley, Wight and the other boys who did not make the journey to Fort Wayne on July 12. I can understand your situation and I do feel that it was an injustice on our part in informing you that these men would be there and then not having them show up."

"If our Publicity Director had been more accurate he would have first checked, and then rechecked with Manager Onslow in finding out what players would make the trip to Fort Wayne to play the Voltmen in the exhibition game. A fellow like Luke Appling, after being billed and publicized as going down with the White Sox, should have at least made the trip, even though he did not play in the game, so that the kids would have a chance to see him around the stands and get his autograph.

"I was in the East at the time the White Sox went down to Fort Wayne to play the exhibition game, otherwise I would have suggested to Manager Onslow that Luke, at least make the trip down to Fort Wayne just so the Fort Wayne fans could get a glimpse of him. After all, I believe, as do millions of fans, that 'Mr. White Sox' is Luke Appling. For the past 20 years it has been the battle cry here on the South Side of "Come on, Luke," and any time a fan hears this expression he only thinks of one person, and that is 'Old Folks Appling.'

"I certainly hope that you can excuse us for giving you the wrong information as to what men would attend the July 12 exhibition game, and I certainly can assure you right now that if at any time in the future, our ball players are publicized to be present at an exhibition game, that they certainly will be there."

Small Motor League

All persons interested in bowling in the Small Motor League are requested to contact Joe Kramer, Ext. 406.

Friday Night Ladies' Bowling League

Any girls' desiring to bowl in the Friday Night Ladies' League are requested to fill out the blank below and send it to either Virginia Mollett Bldg. 31-2, or Bess Potts, Bldg. 4-2.

Michigan City Buds Shut Out Voltmen, 7-3

By George Hemmeter

The Michigan City Cubs defeatcd the G-E Voltmen by a score of 7 to 3 last Friday night, Aug. 19, at Dwenger park.

The toughest break for the Voltmen came in the second inning when, with two outs and a man on third, Lockett dropped an easy pop fly in left field. The Cubs then got a free pass and two singles to put three runs across the plate. An error by O'Tarrell and a double gave the Cubs two more in the third inning, followed by a single and a triple, accounting for two more the fourth inning.

The Voltmen scored in the second, when Johnny Corriden's single followed a double by Chuck Bobilya; and scored again in the third, when Shipman doubled and Dudick drove a clean two-bagger up against the center field fence. In the eighth, Lockett started what appeared to be a rally by hitting a clean single and scoring on an infield error. However, the next three men were retired in order.

After the fourth inning the pitching for both teams became quite effective. Shipman allowed only five scattered hits and Wallace allowed only three for the remaining five innings.

Wallace, the Cubs pitcher, was outstanding both on the mound and at wielding the wood, gathering a single, double and triple in four times at bat and striking out eight Voltmen.

G-E Voltmen Edge Benton Harbor, 3-2

The G-E Voltmen nipped the Benton Harbor Buds, 3-2, Tuesday night at Dwenger park in their final home game of the season in the Michigan-Indiana League.

Bill Ricks, star pitcher picked up by the Voltmen from the Philadelphia Stars, held the visitors to four hits.

Star of the ball game was Johnny Corriden, who came to bat four times and hit safely all four trips with three singles and a triple, driving in two runs.

The Buds took the lead in the first inning on two singles by Todhunter and Phipps and a long fly by Joe Mack. The Voltmen were not able to tally until the sixth inning, when O'Farrell led off with a single, Ricks fanned and Hormann drew a base on balls. Corriden then singled, sending in the tying run.

The Voltmen lost the lead in the eighth. Richel drew a walk to second on a balk by Ricks. Orphan was out from Ricks to Bobilya. Todhunter walked after Green was safe on a fielder's choice in which Richel was forced at second. Phipps singled in the run, to put the visitors back in the lead.

With one out, Hormann walked, and Corriden tripled, scoring Hormann with the tying run in the bottom of the eighth. Ebranyi was out on a line drive to first and Les Lockett sent a long double to left, scoring Corriden with what proved to be the winning run.

Box score:

G-E Owls Take Double Header

The G-E Owls won a doubleheader Wednesday, Aug. 17. The first game pitted G-E against Indiana Rod and Wire, winning 4-1. Zollner was the second victim of the day, by the score of 13-9.

Baker, the peppery Owl shortstop, slammed a home run in each game to pace the Owls.

The summaries:

		R	H
G-E	201 100 0—4	5	
Ind. R&W	000 010 0—1	2	

G-E, Stauffer and Crosley; Ind. R&W, Sowers and Seilers.

		R	H
G-E	520 411 0—13	9	
Zollner	402 030 0— 9	8	

G-E, Stauffer and Crosley; Zollner, Schrimp and Hall.

Salisbury broke the victory skein of the Owls to the tune of 3-2 in a well-played game. Joe Pettrie held the Owls in check after a snappy double play with the bases full in the first inning, ending a G-E threat.

The summary:

		R	H
G-E	200 000 0—2	1	
Salisbury	101 010 0—3	7	

G-E, Stauffer and Greeno; Salisbury, Pettrie and Holmes.

G-E GOLF

By Hugh Dubdit

Plans are now complete for the G-E Studebaker match. Approximatcly 30 players from each team will tee off at Brookwood Sunday, Aug. 28, from 12:30 to 1 p.m. This will be an 18-hole match with a player from each team opposing each other.

On the last night of play, the Nineteenth Holers of the Tuesday League turned in a convincing victory over the Divot Diggers to move into first place. Led by "Red" Braden and Bob Kayser, shooting a pair of one over par 37's, the league winners picked up 18 points for a season total of 50. The Dubs, who had led the league, dropped a single point to finish second, with 39. The Optimists, Divot Diggers, Gas House Tigers and Forty-Niners finished in that order. Individual low cards were turned in by Bob Hall, 37; Bill Wickliffe, 39; Paul LeCoque, 39, and Jim Walley, 41.

Don't forget to make plans for the Blind Bogey, Sept. 17.

Ladies Bowling League At Taylor St. Organizes

All those desiring to bowl in the Taylor St. Ladies' Bowling League are asked to call Evelyn Blakley, Personnel office, Ext. T-488, or Jackie Elder, on Ext. T-433. Those wishing to bowl in this league should have their names in no later than Tuesday, Sept. 6.

Zollner Reserves Down G-E Majors

The Major League softball team lost to Zollner Reserves Monday, Aug. 22, by a score of 6-3.

Waltke and Morkoetter each hit a home run with no one on the bases. Stanski hit a double and scored on the rightfielder's error.

Benecke led the hitting for the winners with a douhle and a homc run.

Line score:

		R	H	E
G-E	101 100 0—3	4	2	
Zollner	100 221 x—6	9	2	

Waltke and Somers; Landquist and Ramage.

Averages:

Each week this scribe promises himself and everybody else to push the Hot Shots into a far corner of the column and write about the other 20 golfers in the Owl Golf league. So help me it's an impossibility. Herewith is their latest attempt at making a shambles of the league records and convention. Lloyd Grider, Jim Sternberger, Warren Wickliffe, and Bob Craig shot six strokes over par for a total of 150. That, fellow dubs, is very fancy golf. For the statistics-minded, the average was 37½ strokes per man. How can golf like this be pushed into the background? It was incidental that team No. 1 fell by the onslaught to the tune of 11 points.

The Jolly Boys didn't care about the reputation of John Shanahan's High Flyers by pasting them with an 18 point beating. Jim Young led the winners with a 44, while Dick Bierbaum was low for the losers with 47.

Irvin "Butch" Junk turned in his best league effort of the year, a neat 44, but it wasn't enough to win for team No. 5. Bernie English, minus Bernie, won a three point victory.

G-E Ties Zollner For Second-Half Horseshoe Title

The G-E horseshoe team tied Zollners for the second-half championship in the City Horseshoe League in a match held Tuesday night at West Swinney Park. The score of the game was 1,392-1,329.

The two teams will meet next Tuesday night to determine the title. Since Zollners hold the first half crown, winning this match would give them the league championship. If General Electric wins the game Tuesday, another match must be pitched for the loop championship.

Congratulations to Clarabell Sapp and Robert Pence, who recently became members of the Quarter Century Club. . . . Gilbert Walker is back from his long vacation, and one of the interesting things that happened to him was the hail storm he got into out in Nebraska. He said the hailstones were as big as golf balls but soft and would smash as they hit the windshield. . . . Albert Flory retires September 1. He says that all he wishes for is that he and his wife have good health so they can enjoy themselves at the summer home at Little Cedar Lake. All we can say is that "we hope you get your wish." . . . Gloria Mechling is back from her trip to California sporting a new Mexican jacket. It sure is a honey! . . . Donna Lindley went fishing up in Michigan over the week-end and came back with a beautiful sunburn and not too many fish. . . . Bonnie and Jim Bireley drove all the way to Springfield, Ill., just to see some motorcycle races. All you have to do is come out on the Bluffton Road and you can see all the races you want and it won't cost you a penny! . . . "Si" Slater really knows how to catch the big cat-fish! She catches such big ones that they eat up her bluegills she has in the livebox! . . . Louie Clark has his dog trained just right. Whenever he can't catch the fish he just sicks his dog on them and he, the dog, never fails to get it. . . . Here is a sight that I would have liked to have seen—Ruth Tutwiller spent some of her vacation with her sister in Hartford City and her young nephew took her for a motorcycle ride! Imagine that! . . . Frieda Knoche has a hobby of collecting salt and pepper shakers and glasses, especially those she can get without paying for, like the kind a restaurant has! . . . Marlow Shepler, otherwise known as "Shep," isn't a lover of pigeons, or is he? . . . Carl Harmon, you had better keep your mind on that car when you go to the Drive-In Show. The next time your horn may not work or maybe your wife will take a walk and then what would happen to poor Carl? . . . Frank Brindel didn't look when he came back to work on Monday, but you had better watch that walking. . . . Wendell Heckley looks good after a week of the Ossian Fair. I think he will make it O. K. . . . Pinky Barnes was glad to welcome home her two boys who spent most of the summer visiting at Marion, Ala. . . . Look for several more broomstick skirts! Clarice Woodruff just bought some more material and it seems as if that is all she knows how to make. If she has an old one she doesn't know what to do with, Reggie Eggeman would appreciate it, as she would like to make herself a few formals. . . . We're all happy to have Eleanor Whitehouse back with us again. . . . Carrie Edgar was up visiting us last week. Hope you get back soon, Carrie. . . . Ray Soest declares that farmers are really smart business men. This time he's buying chickens. Give the poor farmer a break, Ray! . . . Ruth Ann Schilling is getting fed up with bacon these days, especially since her mother won some groceries on, "I've got your number" program. . . . I hear Irma Henny is an enthusiastic square dancer too. She dances 'till sometimes 5 in the morning, and I had imagined she kept that figure by doing her own housework! . . . Marie Martz and her husband spent some time at Chicago, Milwaukee, and Muskegon on their vacation. . . . Lorinda Byerlein and Kathryn Hepker expect to attend the Railroad Fair at Chicago over Labor Day. . . . Don't believe everything Paul Bunyon tells you girls. Especially the one about putting a pound of popcorn in your pancake batter so the flap-jacks will turn over by themselves. It won't work; a friend of ours tried it!

Rounds Out 30 Years' Service

Herbert Mennewisch, General Tool division, recently completed 30 years' service with the Company. In the picture are a few of his friends congratulating him. Left to right are: Charles Backofen, Charles Bracht, Frank Glenn, E. J. Schafenacker, foreman; Glen Kline, Mr. Mennewisch, Paul Yentes and C. A. Brenner, Superintendent of the division.

Jackson Dies

Dee O. Jackson, 63, 2949 Reed St. died at 7:55 a.m. Sunday at the Lutheran hospital after being ill for several months. Mr. Jackson first came to G-E in 1919 and was working at Taylor St. when he retired last February.

Services were held at the Jule Schone funeral home at 1 p.m. Wednesday. The Rev. Orland Golden officiated and burial was in the Maplewood Cemetery at Decatur.

The Credit Union Way

It's your Credit Union speaking,
And what we have to say;
May save you lots of dollars,
It's the Credit Union Way.

Does baby need a pair of shoes,
Or Mom a new chapeau;
Must sister have a brand new dress,
To entertain her beau.

Are you going on vacation,
Does your car need some repair;
Is there some old obligation,
Which is turning gray—your hair?

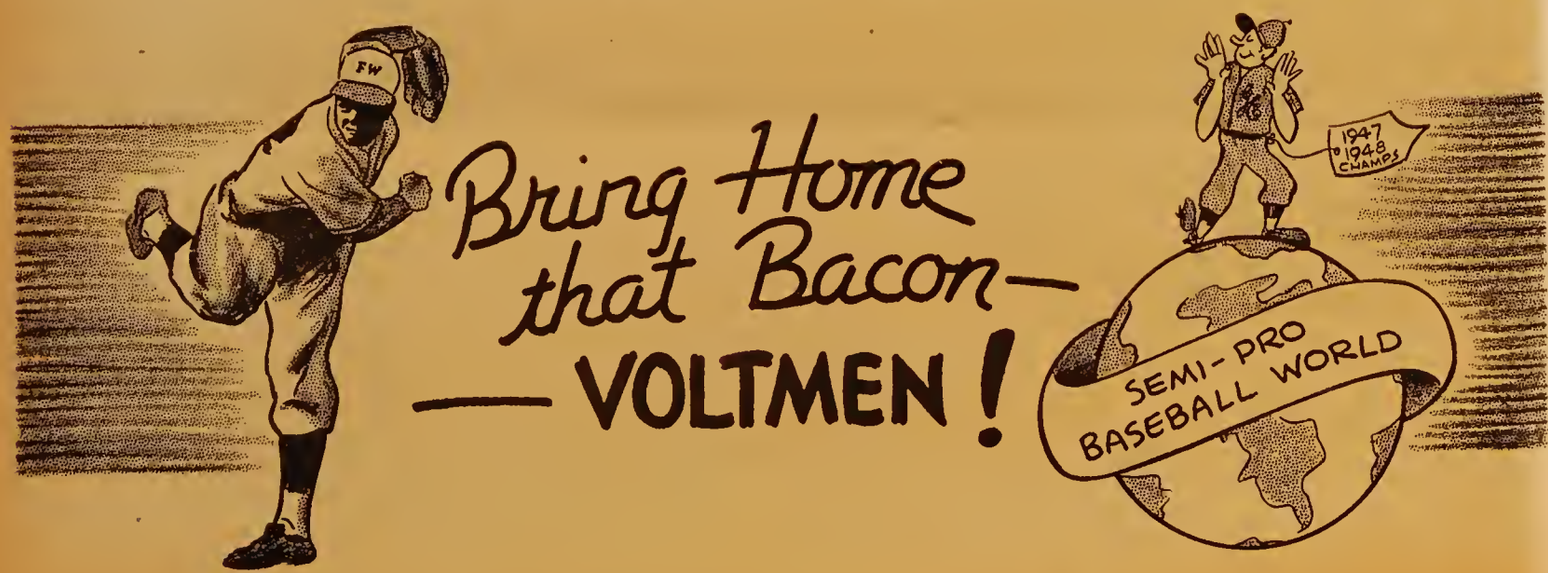
Why not join the Credit Union,
A good idea we'll say;
And pay up those outstanding bills,
It's the Credit Union Way.

You can borrow when you need it,
You can get it right away;
With no embarrassing questions,
It's the Credit Union Way.

It only takes two bits to join,
And just five bucka a share;
Your dividends come every year,
Which certainly is fair.

For thirteen years we've carried on,
Many Hundred Thousand Grand,
Is what we've loaned to you and you,
Of the Credit Union Band.

The pay-roll "Deduct" plan is smart,
You'll never miss the dough;
And if you'll only try the plan,
You'll see your Savings grow.



Let us finance your new auto,
And you will plainly see;
That our motto is "Good Service,"
For a very modest fee.

We've helped a lot of guys and gals,
Go merrily on their way;
We'd like to do the same for you,
It's the Credit Union Way.

Employees Credit Union
1021 Swinney Avenue

Harold Whonsetler now has a new theme song, "I'm Forever Blowing Bubbles," since his recent stage triumph at a local theater. Congratulations, Harold, but you will have to watch out for those Hollywood scouts or we will be losing you from the tool room. . . . Russell "Hot Shot" Deveny brought in a large bluegill after his vacation to verify some of his luck, but everyone is wondering who the taxidermist was that he purchased the fish from. . . . John Driver is back this week after taking his three weeks together. John looks quite refreshed and rested. . . . Ernie Brown is attending the Moose national convention and isn't due to return until next week. In the meantime Jake Harshman, better known to his fellow workers as "Dimples," is giving us a lift with the welding. It has been nice to have you with us; we hope to see you again sometime. . . . Gurney Lindley, the man of many escapades, went to set his emergency brake on that new Kaiser while on his vacation. To his surprise, he found that he had the whole assembly in his hand. Was he surprised! . . . We recently had several visitors to the group, Cecil Forest and Ray Matthews. . . . Last Friday several of the fellows and their wives were invited out to Jack Pollock's house for the evening, but Jack forgot about the party and took his family to the police picnic. When he returned home he was reminded of the party, by the condition of his front porch, which was cluttered by considerable building material from a nearby construction project. . . . John Bastian, Walter Schelper and their families took in the Railroad Fair in Chicago while on their vacations and report it well worth seeing. . . . The most mileage was reported by Charles Myers who took his famliy on an 8,000 mile trip through the West. . . . Birthday greetings to Walter Schelper, who celebrated his while on vacation, and to Dewey Erne who celebrated his this week. . . . Last Saturday night, Ed Smethers and Belva Imel, with a number of other youngsters, were having the time of their lives riding the merry-go-round at the Ossian Street Fair.

G-E Voltmen Roar Toward Third National Semipro Championship

(Special to the WORKS NEWS)

The G-E Voltmen, national semipro baseball champions of 1947 and 1948, served notice that they are out to break all national tournament records, by scoring a 6 to 4 victory over the Bellingham, (Wash.) Bells, in a game Wednesday night at Lawrence field in Wichita, Kan.

No team has ever been able to win more than two years in a row, but the Voltmen have a chance to accomplish the record feat starting tonight when they play the Golden, (Colo.) Coors to begin the series of games that will determine the tournament champs.

The G-E team already lays claim to being the second to ever win the championship title more than once.

Ring Bells To Tune Of 6-4

The Voltmen tallied two markers in the bottom of the first inning. A single by First Sacker Ebranyi and George Todhunter's sensational home run swat engineered these early counters. In the top of the third stanza, the Bells countered with a single run as Hurler Bill Aranson's double was followed by a sharp safety by Billy Hofeditz.

The G-E semipro champs then added two more runs in the sixth. Singles by Les Lockett and John Corriden, topped by Horman's double to the right-field wall, highlighted this uprising.

Going into the seventh frame, the Bells trailed by a 4-1 score. Then came the Volts first big test of the 1949 tourney. The rallying Bells scored three runs. Lee Pfund was then sent in to relieve Shipman. Pfund disposed of one hitter, but then dispensed a pass and a single. Braden then pulled another trick out of his bag by sending Bill Ricks out onto the hill. Ricks saved the day by zooming three straight strikes over the plate to retire a troublesome batsman and call a halt to the uprising.

(Continued on page 11)

Harold Carter Is New President Of G-E Club

REYNOLDS, SIEDEL, KENT, LINDEMUTH ARE ELECTED

Harold Carter, Bldg. 4-6, was elected President of the G-E Club at the election held this week at the Fort Wayne plants.

Mr. Carter is the Assistant Manager of Engineering for the Fractional Horsepower Motor divisions. He will replace Charles Wilt, who has completed his third term this year as president.

Other officers elected were:

First Vice President—Carl Reynolds, Taylor St.

Second Vice President—Sue Siedel, Taylor St.

Secretary—Dick Kent, Bldg. 18-5.

Mr. Reynolds, Supervisor of Production in Div. 14, and Mrs. Siedel, receptionist, will both be serving their third terms. It will be Mr. Kent's second term as secretary. He is supervisor of the reproduction and photographic section.

G. R. Lindemuth, Division Engineer of the Technical Service division, was re-elected as a member of the Board of Directors.

Program Is Announced For Foremen's Picnic

The Foremen's Association will hold its annual stag picnic Saturday, Sept. 17, at Voigt's Retreat, near New Haven.

The picnic will start at 1 p.m. and a special program has been arranged for 3:30 p.m.

Ernie Hanauer, G-E Fire Chief, will give a demonstration of fire extinguishing techniques, and Custer Dunifon will present his dog obedience show.

Mr. Dunifon is noted throughout the city for his school safety work. He has given numerous talks on safety at most of the schools in this area and has illustrated each talk through the use of his trained dogs.

LABOR DAY

The Decatur, Broadway and Taylor St. plants, in general, will close on Labor Day, Monday, Sept. 5.

Works Manager

C. E. Wilson Completes 50 Years' Service

—Copyright by Karsh

Charles E. Wilson, President of the General Electric Company, today celebrates 50 years of service with the organization which he joined in 1899 as an office boy.

Born Nov. 18, 1886, in New York's lower west side, he left school when 12 years of age to help support his widowed mother, rose steadily through the years to positions of increasing responsibility, and in 1939 was elected President of General Electric. Except for his wartime government service, when he served as Executive Vice-Chairman of the War Production Board with full authority over all war production, Mr. Wilson has spent his entire career in the G-E organization.

In commenting today on Mr. Wilson's anniversary, H. V. Erben, G-E Vice President and General Manager of the Apparatus Department, stated:

"Every employee of American industry today can find in the career of Charles E. Wilson a design for living and working. It is a story of 50 years of devoted and intensely loyal service to his Company and to his country. Particularly it is a story that should inspire each employee of the Company, whose progress has been so materially helped by his genius.

"For 50 work-packed years, Mr. Wilson's great enthusiasm and drive have been directed toward making our Company a better one in every way for the hundreds of thousands of Americans, who are the Company's employees, stockholders, and customers.

"In the Apparatus department, it is fitting that we pay tribute to Mr. Wilson as he marked the fiftieth year in an unselfish and productive career. This tribute can best be paid by each member following the lead of Mr. Wilson in continually striving to make General Electric an increasingly better Company.

"I propose that during the next four months our department carry on a program of activities with this objective in mind. It is my sincere hope that each and every employee will participate in such activities and by so doing help contribute to the progress of the Company."

Starts As Office Boy

Starting as an office boy at the Sprague Electric Company, New York City, one of the organizations which went to make up General Electric, Mr. Wilson moved from position to position, learning everything he could. At night school he learned cost accounting, general accounting, and enrolled in successive correspondence courses in engineering. The cost of his course in electrical engineering he balanced by tutoring backward students in physics, mathematics, and other courses he had already completed.

He moved gradually up the ladder, becoming factory superintendent. When 21 years old, he married his childhood sweetheart, Elizabeth Maisch. They have an adopted daughter, Margaret.

By 1923, Mr. Wilson had become managing engineer in charge of General Electric's wire and conduit business with headquarters at Bridgeport, Conn.; and in 1930, had become manager of the merchandise department, in charge of engineering, manufacturing, and sales.

Elected A Vice President

He was elected a vice president of the Company later that year, and in 1937 was named Executive Vice President, a new position involving responsibilities for all Company departments. He moved to New York.

In 1939, he was elected President, and he took office on Jan. 1, 1940, succeeding Gerard Swope. Thus he

Congratulation, Mr. Wilson, We Are Proud Of You

Late yesterday afternoon, in his office 45 floors above the turmoil of New York's Lexington avenue, a big, dynamic man ended another day of work. As he checked off his calendar, he marked the completion of 50 years of service with an organization which has grown, as he has, from humble beginnings to a position of great responsibility.

In 1899 Charles Edward Wilson and the General Electric Company both had next to no pasts, but limitless futures. Charles Wilson was 12 years old; G-E was seven. In the ensuing half century Charles Wilson has risen from office boy to president. The Company has grown from three plants to more than 100; there are more than 250,000 stockholders.

The same 50 years have seen the electrification of American industry, farming, and the home, and the rise of this industrial nation. Power, lighting, communications, entertainment, industrial processes, transportation, heating, refrigeration, have been transformed. Every article of daily life has been touched somewhere by the magic of electricity; newspapers and carpets, dams and blankets, skyscrapers and morning coffee.

During this increasing influence of electric power, and the consequent rising standard of living, the work week of the average American has been cut from 61 hours in 1900 to 40 hours today.

Thus, the Wilson story is not concerned with General Electric alone, but with the entire expansion and diversification of American industry, and all the forces that have made the country unique and strong.

It is also significant that in half a century Mr. Wilson has risen from his starting job as office boy at the old Sprague Electric Company to the position of President of General Electric. In this span of years he has grown with the magic of electricity and has left a path of greatness through his living and work for others.

That he made it the hard way is important to know. But that his life has been devoted to improving human relations is also important. Benefiting mankind has meant much to Charles Wilson, and helping the other fellow get ahead or overcome odds has been his primary concern.

His own credo exemplifies this way of life better than the thoughts of those who would eulogize him in the press.

Mr. Wilson once said:

"If there is anything that I can do in the conduct of my life and business to alleviate injustice, promote opportunities for all, and remove some obstacles in the road to human brotherhood, I will seize such chances and implement them to the best of my ability."

Monday We Pay Tribute To The American Workman

The Fort Wayne Works will be closed Monday in observance of Labor Day; a day which has gained the status of a national holiday, set aside principally to honor the millions of citizens who work with their hands.

It is eminently fitting that in this country a day has been set aside for this purpose. Our history from the very beginning has been that of men, who by the labor of their own hands, have carved homes for themselves from the wilderness —built roads, villages, factories and cities.

Our forefathers acquired by hard labor those things which we now consider the bare necessities of life and left us a heritage of honest endeavor and high purpose.

Gradually, at first, but with increasing effectiveness, conveniences and luxuries were added until today we enjoy more of the good things of living than any other people.

But the need of honest, effective work has not been diminished and the workman today enters new fields of endeavor with the same pioneering spirit displayed by the builders of this nation. The American workman does not subscribe to the creed that idleness is a blessing and work a disgrace.

In our observance of Labor Day Monday let us give serious thought to the many advantages which we enjoy as individuals and as a nation which have come to us because of the honest endeavors of the American workman.

POLIO

Editor's Note: The following is the second in a series of questions and answers regarding the current polio situation. They have been prepared from reliable sources by Dr. L. E. Burney, State Health Commissioner. Every effort has been made in the following questions and answers to furnish authoritative information on the subject with the object of relieving undue fear and alarm through the presentation of accurate information and knowledge.

What are your chances of contracting polio?

Indiana has averaged annually six known cases per 100,000 population during the past 10 years. Leaving out the age factor, this means you have approximately one chance in 16,666 of contracting the disease.

What are the chances of my child having polio?

For those under 20 years of age and based upon rates of some of Indiana's worst polio years, the chances are approximately:

1 in 1,000 of contracting polio
1 in 1,500 of contracting paralytic polio
1 in 3,000 of having permanent paralysis
1 in 10,000 of dying of polio

Should children be permitted to travel?

There is no objection to travel provided physical exhaustion due to long trips is avoided. It is undesirable to take a child into an area of high polio incidence.

Since so little is known of polio, what should local communities do to prepare themselves for situations in the future?

Plan for year around full-time public health programs. Improve community sanitation. Don't wait for a crisis to take action for community health measures.

Strive for sound health education programs to keep well informed in polio and all other health problems. The press and radio merit commendation for their splendid efforts in presenting factual and objective information on the polio situation in Indiana this year.

What is the death rate in polio?

It varies from 5-20 percent. The greater the number of non-paralytic and abortive cases reported, the lower the death rate. The greater the number of bulbar cases, where the virus attacks the stem of the brain, threatening the cells that control breathing and circulation, the higher the death rate.

What are the possibilities for recovery in poliomyelitis?

In an average group of 100 cases it has been found that:

50 will recover completely
25-30 will show slight after-effects

Should children be allowed to go to camp?

Yes, providing the supervisors follow the suggestions made above. However, children from epidemic areas should remain at home until high incidence subsides.

(Continued Next Week)

SCIENCE QUESTION BOX

Q. How is it possible for an aviator flying around the Earth in, let us say, three days to see four sunrises?

A. This will occur if he flies toward the east, for the motion of his plane is added to that due to the rotation of the Earth. Suppose he flies around the Equator, where the days are always 12 hours long with sunrise at 6 a.m. local time. If he starts at noon, he meets the Sun sooner, and sees it set after 4.5 hours, while the people back at the airport will not see sunset until 6 hours after he left. Nine hours later, when he has flown 45 degrees of longitude to the east, he will see it rise. His second sunrise will come 18 hours later, instead of the usual 24. The third will occur after another 18 hours and the last, hours more, a total of 72 hours, he will be back at his starting 18 hours after that. After 4.5 point, at noon of the third day, having witnessed four sunrises while the people who stayed home saw only three. Flying westward, conditions would be reversed and he would see only two sunrises. These would come 36 hours apart.

Q. Is the use of leaded gasoline in an auto likely to plug the carburetor jets?

A. No. Leaded gasoline does not plug the carburetor jets, although plugging may be caused by gum in the gasoline. Such gum may be present in gasoline that is improperly made or handled regardless of whether it contains lead. In a gasoline stove, however, leaded gasoline may plug the jets where they are in close contact with the flame. At present about 98 per cent of the gasoline sold in the United States contains lead (in the form of tetraethyl lead), resulting in much greater overall efficiency than if this compound were not used.

OUT OUR WAY

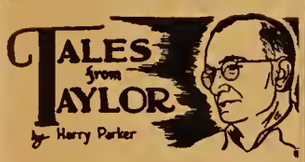
Partizan Chapter Names Slate Of Candidates For Election

The Partizan Chapter of the Elex Club will hold its annual election Tuesday, Sept. 20. The nominating committee has selected the following slate of candidates:



President
Margaret Tomson
Mildred VanHorn

Vice President
Selma Rodemeyer
Faye Voss

Secretary
Myrtle Bennett
Ann Fox

Treasurer
Helen Thiele
Catherine Wise

Edna Berdleman is chairman of the nominating committee, which includes: Lillian Wolf, Nora Kern, Agnes Schlotter, Annette Hastings, and Kathryn Cullen.

Vacation stories are still pouring in. Some have merit, some do not, so we try to bring you the best of the lot. This one has to do with the activities of Ralph Dunlap, who with his wife accompanied by Harold Hart and Co., went on a fishing trip into Wisconsin. Before leaving one morning on a trip into town for supplies Ralph wrote a note to the women asking them to clean the "dedd" (note the spelling of the word "dead") fish out of the live box in the boat. Upon his return he asked them if they had cleaned the fish. They told him that they took them out and buried them. Whereupon Ralphie had to rescue the fish from an untimely grave. On their return trip to Fort Wayne, he and his wife were driving ahead of Harold. Arriving in Gary, Ind., he ran past the switch taking the wrong highway. Harold gave him the high sign so Ralph dashed into a nearby filling station and after circling the pumps three or four times finally got back on the beam. . . . Most of the summer Marion Oman has been wearing shirts to work. They seemed to be made of a very queer looking material. In fact we have never seen any quite like it, but the secret leaked out. He salvages what is good out of the old lace curtains and has it made into these shirts. . . . Cecil Gordon in preparing to move out of her present four-room apartment found out that the moving van the trucking company sent was not large enough to accommodate furniture for an 11 room house. They had to send a second one to take care of the overflow. The wonder of it all is how in the world did she stack it all in those four rooms. . . . Now that Clarence Stove has his new Oldsmobile, Ed Moodie and myself thought that perhaps we might ride with him in style to the Quarter Century Club picnic this year. But Clarence has begun to offer all manner of excuses as to why he will be unable to attend.

Col. Lichtenberg Leaves Company For Retirement

Col. Chester Lichtenberg

Col. Chester Lichtenberg, retired Thursday under the General Electric Amended Pension Plan, has had a long and active career in General Electric and in civic, state, and national organizations.

His training at Columbia University in the City of New York, at the Army Industrial College, and the Army War College has been evidenced by his outstanding contributions to electrical engineering, refrigeration engineering, and military engineering, for Col. Lichtenberg is essentially an engineer.

Col. Lichtenberg has been a member of the Fort Wayne organization of General Electric for over 18 years. He was in charge of Commercial Refrigeration work at the Winter St. Plant from 1931 to 1940, and since then has been a member of the Staff of the Manager of the Fort Wayne Works. During most of this time, he was Chief of the Chicago Engineer Procurement District, Corps of Engineers, U. S. Army.

Previous to coming to Fort Wayne, Col. Lichtenberg was Assistant Engineer of the General Electric Company's Switchgear Department at Philadelphia, and concurrently Chief of the Philadelphia Engineer Procurement District, Corps of Engineers, U. S. Army.

Col. Lichtenberg saw service during World War I as a member of the Staff, Chief of Engineers, U. S. Army, and during World War II was an expert consultant to the Chief of Engineers, U. S. Army.

Col. Lichtenberg is currently Executive Director, Fort Wayne Civil Defense Council, a member of the Executive Board of the Indiana Society of Professional Engineers, Senior Vice President of the Department of Indiana, Reserve Officers Association of the United States, and a Director of the National Society of Professional Engineers. He is a Fellow of the American Institute of Electrical Engineers, a Fellow of the American Association for the Advancement of Science, a Life Member of the Franklin Institute of Philadelphia, an active member of the Society of Sigma Xi, a member of the Fort Wayne Engineers Club, and a member of practically all Masonic bodies.

Colonel and Mrs. Lichtenberg reside at 4624 Tacoma Ave.

Berghoff Explains New Pedestrian Ordinance At General Works Safety Committee Meeting

The new city Pedestrian Control Ordinance was discussed by Fred A. Berghoff, chairman of the Board of Safety for the City of Fort Wayne, at a meeting Wednesday of the General Works Safety Committee in Bldg. 8-2.

Mr. Berghoff outlined the main points of the ordinance and explained why it was introduced and passed by the City Council. He also listed the city's "hot corners," where most of the accidents and fatalities have occurred.

"Due to the size of Fort Wayne, a city of 130,000 people, a pedestrian ordinance is absolutely necessary in order to cut down accidents, as well as deaths, by jaywalking of pedestrians and carelessness of drivers," Mr. Berghoff stated.

The ordinance provides that all pedestrians must walk according to the traffic lights and that drivers must give the right-of-way to pedestrians at all intersections where they are complying with terms of the ordinance.

Yesterday the Police Department started giving warning tickets to violators. Then starting Oct. 1, a fine will be levied.

According to a new regulation pending passage by the City Council, violators will pay their fines at a cafeteria court on the second floor of the City Hall where parking tickets now are paid.

G-E Merchandise Certificate To Be Given As Bonus Awards In Suggestion Contest

"Take your choice."

That's what the Employees' store salesman will say to you if your idea is selected by the suggestion system committee as one of the 10 best between now and Nov. 15.

A total of 10 certificates, each redeemable at the Employees' store for $50 worth of merchandise at employee prices, have been allocated as bonuses, in addition to regular awards, for the contest to be conducted by the suggestion system. The certificates have been designated, according to divisions, as follows:

Fractional Horsepower Motor divisions, two certificates; Specialty Transformer and Ballast divisions, one certificate; Motor and Generator divisions, one certificate; Works Service divisions, one certificate. Employees in all divisions may compete for the remaining five certificates.

Eligibility rules which governed the submission of suggestions in the past will be followed in this contest. All suggestions must be submitted to the suggestion system committee not later than Nov. 15. There is no limit to the number of suggestions that an employee can submit.

Each item of merchandise shown above and at the left sells for less than $50. The certificates can be used to purchase or apply to the price of any merchandise on sale in the store.

Anyone who is educated in the art of lip reading should watch Tom Blackwell for a few minutes each day and try to learn what he says to himself about so much. . . . Dorothy Jensen reports she was in the burricane of Florida last Friday. She spent her vacation at Miami and Cuba. Reports are tbat she enjoyed her vacation very much. . . . We hope Forest Brunner has a speedy recovery. He is in the Lutheran Hospital. . . . Dick Young is a fancier of homing pigeons. That is he was until he began to release his birds. At the present time 18 of his 20 releases have winged tbeir way to new homes. Better luck next time, Dick. . . . Leola Carrier said it wasn't the refreshments she had the otber night. She did have a real-for-sure bat in the house.

Art Everett isn't going to let us down on the fish stories tbis year—no sir! Art spent his vacation at Bemidji, Minn., and really caugbt some dandies—such as a 36½-inch pike, weighing 11 lbs. 13 oz. That one won him a prize, incidentally. He does regret not using the pistol he had in the boat though. Can't you just see Art sitting in tbe boat with an itchy trigger finger waiting for some 20-pounder to go gliding by? . . . George Coplen reached a new high in fisb stories. Says a three-pound smallmouth bass jumped into his boat. Not that we don't believe it, but as long as tbey're jumping in, why not ban any under 10 pounds? . . . Can it be that A. R. Vegalues has tired of the moniker "Butch" affectionately bestowed years ago? The recently acquired hue of his trusty Packard might indicate that he wants to trade "Butch" for "Kelly" or maybe "The Green Hornet." Incidentally Butch, did the new green improve the pick-up of the old bus? . . . In case anyone has been wondering about the haze in General Service Cost and Payroll office, it isn't on fire. It's just Forest "Bug Bomb" Somers on the prowl for unsuspecting flies. . . . Since vacation is over we hear about Pete Carpenter's generosity with bouquets of the Power House petunias. . . . All who went to the outdoor show of tbe "Taming of tbe Shrew," saw Pete's tumbling act. Real good, Pete. . . . How about showing us that letter of commendation you received on your vacation work, Joe. Not everyone is so lucky and you haven't even told us of the gift. . . . 'Taint safe, Don, when a box of matcbes explodes. That was our advice when we saw Don Porter come to work with his hand bandaged. . . . Vacation mail has been coming from Louie Krinn and others, reporting good fishing and some not so good. One card says, "Work, you slaves," another says, "Having a good time, glad you're NOT here." . . . Sam Mastro's garden is furnishing the good vitamins for many a fellow workers' table. . . . Bud Meese is now living in his new home in Highland Gardens. . . . Scotty is enjoying his new air conditioner so much he nearly decided to take it with him on his Chicago vacation trip. . . . Ernest Lowe, Ray Morse and Arthur Ream celebrated birthdays during August. . . . One look at Grover Walker's yard shows his ability in raising beautiful flowers. Have you been taking lessons from Sam or Scotty, Grover? . . . Ray Bailey tells us Emily is all excited about school now. She has recovered from her siege of virus pneumonia. . . . We are a little late in telling you about Dayton Franklin who arrived at the home of Mr. and Mrs. Arthur Ream. Congratulations, he is a fine baby.

Celebrates 40th Anniversary

Alfred L. Ulmer, Bldg. 4-6, celebrated his 40th anniversary with General Electric Tuesday, Aug. 23. Attending a presentation of a certificate to commemorate the occasion were: (l. to r.) J. J. Clarkson, Mgr. of FHP Engineering Divisions; R. H. Johnson, Mr. Ulmer, and L. R. Beard.

Information Clinic

QUESTION:

I would like more information about the vacation shutdown period. Would it be possible to schedule the annual shutdown at an earlier or later date so that vacation time would not coincide with the peak of the annual polio epidemic? Children are undoubtedly exposed more to infection on vacation than at home.

ANSWER:

This inquiry has been referred to several doctors who have been active in the local polio campaign. It can be a very serious problem and deserves serious consideration. In view of the facts available, it is difficult to state whether or not such a change in the schedule of vacations would lessen the probability of polio infection. Considering the recent epidemic, the peak occurred during the vacation shutdown. As there is usually a two-week period between the exposure to polio and the appearance of polio symptoms, it can be said that the majority of the cases reported locally were contracted prior to the shutdown while the victims were supposedly at home. This might deny the suggestion that the possibility of contracting polio is greater while children are on vacation than while at home. However, it is unfair to pass judgment on this suggestion based on only one year's experience.

The records show that in previous years the peak of the epidemic has varied, which would make it very difficult if the suggestion was correct to anticipate the best time to close the Fort Wayne General Electric plant.

The doctors contacted remarked that the best known means of guarding against polio would be through the educating of parents to more closely supervise their children during the epidemic period. This would require keeping them from exposing themselves unnecessarily in crowded places or where the likelihood of becoming infected is the greatest. This is true whether the children are at home or on vacation with the family.

The medical advisors for Fort Wayne General Electric will keep themselves advised of any new developments so far as polio prevention is concerned and, as in the past, local management will take such action in the future as the medical authorities advise for the good of employees and employee families.

Ward Staley has acquired several goats, and now he is having difficulty in selling the milk. Mr. Wolf agreed to purchase half of his supply, but Ward is still attempting to persuade his uninterested fellow workers to buy the remaining half of his wares. Of course, he still has one small problem and that is how to entice the animals to let him get close enough to even try his skill at milking. Good luck to you, Ward. . . . Belated congratulations to Jim and Loriene Pugh. They are the proud parents of a baby girl named Sharon Elaine. The happy event took place July 27. . . . If there are any of you who don't laugh at your own jokes see "Light Bulb" Ecenbarger. He thinks his new jokes are so funny he's thinking of writing a joke book. . . . Dick "Double or Nothing" Wagner was up bright and early Monday to go squirrel hunting. He claims he shot three squirrels, the first two witb the same shot and around the corner at that. Hmm! . . . Others who have squirrel hunting this week are Don Dimke, Dick White and Bill Smith. Apparently hunting is good this season because all the fellows said they brought home the bacon. When you go squirrel hunting and bring home bacon when it's 69¢ a pound, that is good. . . . Another great hunting expedition to the wilds of Northern Indiana had to be called off last week when Aughinbaugh had to play ball. . . . The way Morton tosses gears around it's a question whetber Gebert will have more or less teeth in his head. . . . It's easy to understand how some of the fellows acquire their nicknames, but why they call Dick "One Shot" Wagner when it takes eight shots to get one poor little squirrel or why they call Bill "Dead Eye" Smith when he can't hit the broad side of a barn is beyond me.

Last week in the column we had a tale told by Gordon Smith about Charles Gable. Here is Mr. Gable's story in response: It seems that Mr. Smith is quite talented in the art of story writing and telling of tall tales especially about grass cutting for fellow co-workers. However truth is always stranger than fiction. It seems that besides cutting grass for fellow co-workers—during vacation, Mr. Smith was also building a shed on the back of his lot. The neighbors feeling sorry for him offered to help and also called some friends in who were carpenters in order to protect the scenery of the community. The friends upon arriving at the scene of activity and confusion immediately set to work while Gordon directed activities from his chair under the tree while talking to and entertaining the women folk. Some hours later the neighbors and carpenters emerged from the shed well pleased with their efforts to still find Gordon visiting with the women and enjoying the refreshments which one of the working neighbors provided, but did not get a chance to enjoy. . . . We want to say hello to Paul Horstmeyer and hope that he is feeling much better. . . . Happy birthday to Bill Caston Sept. 4. . . . Have you noticed the number of new gold ball point pens floating around the office this last week. There must have really been a super salesman around.

Elex Club To Hold Election, Membership Drive

17 Are Named As Candidates

The Elex Club's 1949-50 election of officers will be conducted from Monday, Sept. 19, until Friday, Sept. 23. The following slate has been picked to vie for the various offices:

PRESIDENT

Mary Lieter, Winter St., was the travel chairman for the club's 1948 season.

Betty Puff, Bldg. 4-6, acted as the first editor of the club's magazine, the "Echo."

FIRST VICE PRESIDENT

Eva Creigh, Taylor St., has served as a contact girl for the club.

Bea Lantz, Bldg. 17-3, has been a member for about 20 years.

SECOND VICE PRESIDENT

Alice Dahman, Bldg. 4-5, has been associate editor of the "Echo" and also a contact girl.

Mary Wyss, Winter St., was a contact girl and the Thanksgiving Dance chairman.

SECRETARY

Geraldine Schmidt, Bldg. 31-1, has served as a trustee on the board.

Thelma Stone, Bldg. 18-1, has been a contact girl.

DIRECTORS

Jo Alles, Bldg. 4-2, has served as a contact girl.

Lois Drewett, Taylor St., has worked on the utility committee.

Mabel Miller, Taylor St., also has served as a contact girl.

Lucinda Pettit, Bldg. 4-5, has been contact girl for her floor.

Loraine VonBehren, Bldg. 26-3, was the artist for the club's bulletins last year.

TRUSTEES

Helen Engle, Bldg. 4-3; Alice Fuchshuber, Bldg. 16-1; Betty Garber, Bldg. 4-6; and Helen White, Bldg. 4-4, all have served as contact girls in their various sections.

PRESIDENT

Mary Lieter
Winter St.

Betty Puff
Bldg. 4-6

SECRETARY

Bldg. 26-3

Jo Alles
Bldg. 4-2

Mabel Miller
Taylor St.

Lois Drewett
Taylor St.

Contact Girls Start Campaign

The annual Elex Club campaign for members will begin Tuesday, Sept. 6, and continue until Friday, Sept. 16.

During this period, contact girls will see all potential members and invite them to join the club for the 1949-50 season. Membership can be obtained by paying the $2 dues.

Membership will be open two weeks following the end of the drive. After that time, membership will close for the remainder of the club year. This decision was made during the 1948 conference.

A "lucky" membership card will be selected again this year by I. H. Freeman, Supervisor of Personnel. The girl holding the winning card will be presented free tickets to all Elex parties during the year.

The drive will officially open Tuesday at a "kick-off" breakfast, served at 8:30 a.m. in Bldg. 16-2, for the day girls. The second shift contact girls will commence their drive with a snack period at 1:30 p.m. in Bldg. 16-2. At each session the contact girls will receive their material for the membership drive.

A number of outstanding programs have been planned for the coming season. Some features planned so far are a trip to Chicago this month, the installation of officers, an Elsa Maxwell program, the annual Christmas party, and a book review by Kathryn Turney Garton.

Elex To Sell Cook Books

The Elex Club has a number of illustrated cook books for sale. The book can be purchased for $4 from contact girls, the Personnel office at Taylor St., from Evelyn Blakley, or at Irene Meyers' office in Bldg. 8-2.

Plans are being made by everyone for the Labor Day vacation. Isn't it wonderful what you can do with just one extra day. Most everyone is going to take a fling at fishing again. From all reports it's getting better, how could it be worse? . . . Ed Klomp was to have received some roasting ears from one of the girls, but Roger Crabill's hunger got the best of him. He suggested cooking them and finally won out. Imagine Ed's surprise when the corn disappeared and he didn't even get an ear. Of course, Roger wasn't hungry any more. After all this corn he decided to sell his lunch and Bill Schultz paid 35 cents for Roger's chow, which consisted of two carrots, one tomato and half a sandwich. Now the last we heard, Roger's lunch bucket was for sale —complete with thermos for 40 cents. Such high finance. . . . If you want to know when and where they are biting, see Tony Miller. He is the only one that knows the secret and is always willing to go. Especially on Saturday morning so he doesn't have to help his wife with the washing. . . . Cy Seymour seems to be in good spirits. He still thinks Boston has a chance to cop the title. . . . Roger Crabill finally bought a car, or a reasonable facsimile thereof. It's one of those "If I would of known that before I got in I would never of taken a ride" cars. It serves two purposes; one, is transportation; two, butter churn. Put your can of cream on the seat, start the motor and you are guaranteed butter in three minutes. . . . Did you gaze at the fishing trophy awarded to Wilford Fett for catching the largest (?) bass on Peron Lake? It is said the fish in this lake are so large a 50-pound test line is suggested. One of our fellows decided to try this Angler's Paradise—result one tiny bass not yet out of babyhood. The question now is—was the bass Fett caught the only one of its kind and is the lake now empty of "keeper" size bass or was his just another fish story? . . . Norm Jones is trying to talk his girl friend into marrying him and is looking for a ring. How about the one you get with a merry-go-round ride? Will this do? . . . Mrs. Lowe has received several awards at recent shows for her beautiful flowers. Congratulations. . . . We now have a local thespian in the crowd. "Emmie" Stock is now appearing with the Civic players. He played in "Taming of the Shrew" at the News-Sentinel outdoor theater and will appear in "House of the Sea," which will be presented soon. Good luck from the gang. . . . Fritz Stauffer enjoyed this week as his third week of vacation and Maurice Crow will be "resting" next week. These lucky people. . . . That was some fish Don Thomas caught. In fact it was almost as big as Don, 16½ pounds and 39 inches long. A real whopper. . . . Happy holiday, folks.

For the answer to the question as to what happens when the immovable object meets the irresistible force, take a good look at Kitchen's Chevy. . . . This week the tool room was invited to Vondy's for a fish fry. . . . Someone should inform Joe Sallot that the railroad company sells round trip tickets. . . . We are assuming that the Fort Wayne Police are too busy to look for these people who swipe melons. At least, Waldo Martin is still with us. . . . Little Long Lake is cleaning itself, and by now John Heine should need a new supply of shear pins for his outboard motor. . . . Birthday greetings for September go to Ruth Curly, Martha Lee, Victoria Walzer, Ina Armey, Zella Sheehan, Fred Kiel, Jes Devaux, Carl Heemsoth, Clarence Rothgeb, and Paul Shive. . . . The Earl Mossburgs have an addition to the family. A baby girl. Congratulations, Mom and Pop. . . . Gay Huey found out how hot it really gets on the desert. When she went to take pictures she found her camera had melted. . . . Elmer Buuck is looking forward to being grandpa. His son got married recently. . . . Just why is it Fritz Volgt goes out to play golf one night and shoots a 41 then turns around the next night and shoots a 48? Could it be his opponent Mr. Campbell shoots a 45. The boys still think he threw the match. . . . Also Fritz is trying to rent a room to have money for bowling. Could it be that he bets with the wrong party? . . . Believe it or not but Louie Botteron must have his hot rod in shape. He drove all the way to Chicago and back during vacation. . . . Johnny Wilson has a real system. He wants all his friends to buy his favorite beverage just in case there is any left over so he can have it. P.S. Bill Curtis, however, never obliges. . . . When Walter Niemeyer was visiting in California he had quite a chat with "Cully" Nieman, a former employee of Bldg. 4-5. . . . Eugene Blew was getting honey out of a bee hive, and it looked from all indications that the bees got him. . . . Cleon Oyer has been bragging to some of the gang that his Buick really performed "but beautiful" he said it was nothing to get 15 and a half gallons to a mile. No wonder he bought the burro to come back in.

Helen McOmber Edits Column For General Service Division

Helen McOmber

Helen McOmber, Bldg. 20-2, is the new Division Editor of "Shorts and Snorts, General Service Division." She succeeds Katie Steinman who is leaving the Company soon.

Helen has been working for the General Service division since she came to G-E in 1947. She is now a time clerk in Bldg. 20-2.

Her spare time is taken up by sports and dancing. Helen enjoys basketball from the spectator viewpoint, and bowling. A girl who "gets around," Helen journeyed to Mexico for her vacation this year.

PRODUCTION SERVICE SUPERVISORS, FOREMEN SEE SOX-YANKEE GAME

Twenty-five supervisors and foremen of the Production Service division left early Sunday Morning for Chicago to see the White Sox and Yankees battle it out.

Although it rained all the way to Chicago, the sun came out in time for the double-header. The Yankees took both games, and the last one was called because of darkness.

According to those who went, there wasn't a dull moment from the time they left until the time they returned to Fort Wayne. To pass the time away enroute, the boys played cards continuously, and even when they ate lunch and dinner. One of the main reasons for attending the games was to see Joe DiMaggio, and he didn't let them down, because he hit a home run for the Yanks.

It takes a girl to find out that a gay blade often is very dull.

Now that things have settled down for a while, we will start having our column in the WORKS NEWS again. . . . Charlie Penn was in the cafeteria one day talking about his fishing trip up in Wisconsin. He told the boys while they were sitting on the lake they lost their anchors. Harold McVay, who had been sitting there taking it all in, asked Charlie what they used for anchors. Charlie said it was no problem, that he started fishing, caught two perch, knocked them in the head and used them as boat anchors. Charlie then told them that they ran out of bait, and, of course, again Harold McVay wanted to know what they did then. Charlie told him that he looked in his tackle box, saw a rubber band, put it on the hook and fished over the side of the boat. A fish saw the rubber band, grabbed it and swam off with it. When it got the rubber band stretched out far enough the rubber band flipped it back against the boat. The impact knocked it out and all Charlie had to do was to reach over and put the fish into the boat. McVay's face of course, is red for biting twice, and Charlie is still chuckling to himself. . . . Jackie Elder and Peggy Bandt went to Chicago to take in the Railroad Fair. Before Jackie left she noticed in the paper that anyone going to the Fair would be given free tickets if they stayed at the Sherman Hotel. Jackie was all smiles as she never received anything free in her life and sure was going to take advantage of this. When she got to Chicago she noticed where the tickets were selling for 25 cents each. She was very unhappy so she never applied for her free tickets. She said she knew there would be a catch to it—$10 for a room and a 25 cent ticket free. . . . Walter Colchin had a nice vacation up in Canada. According to reports he was among the big wigs. . . . Ed Brockhall took Andy Anderson out and taught him how to fly fish. When Andy got so good he was catching more than Brockhall, Brockhall decided to get a new student, so he took Andy's son out. When the day was over Andy's son also had caught more fish. Ed isn't looking for any more students, we hear he's fishing by himself now. . . . Ruth Cavender went to Texas for her vacation, but it seems she had all her trouble before she left Fort Wayne. She started off with a flat tire (on her car) and never had any trouble after that. That's pretty good luck for a Ford, Ruth. . . .

Wilson Completes

(Continued from Page 1)

became the fourth president of the Company he had joined 40 years earlier. The other presidents were Charles A. Coffin, Company founder; Edwin A. Rice, Jr., and Mr. Swope.

For two and one-half years, Mr. Wilson served as President. Then, in September, 1942, with the United States struggling to increase production of war materiel, Mr. Wilson resigned all private business connections and went to Washington at the request of President Roosevelt, to become Executive Vice Chairman of the WPB. Mr. Wilson was again elected a director and President of General Electric Sept., 8, 1944.

Ralph Keller was asked what he did on his vacation. He said he went fishing, but no fish. . . . It is nice to see Elmer Scheer (he went to Manistee River to fish for pike with a fly rod and claims he did all right). Ed Brockhall (who claims he went fishing too) and Wayne Worman (he didn't say what he did) back to work after their third wecks' vacation. . . . Little Georgie Ryan is getting his home all fixed up for his son who is coming home on leave in the near future. . . . Have you noticed the black eye and peeled nose Kenny Bainbridge has been wearing the last few days? He says he got into an argument with a socket wrench. . . . Jackie Elder was having quite a time getting around last Monday. The story is she went home over the week-end and while her dad met her at the bus station, the cows got tired waiting at the barn and decided to go back to the field. Jackie told her dad that instead of walking both ways she would drive him to the field and he could walk back. She must have been so excited about driving her dad's car that she started running and her dog thought she was playing so he ran in front of her and she went sprawling head-over-heels. The person who told this story wasn't sure but we would like to know if you were still able to drive the car after that. . . . Wanted—An A1 secret service man to catch the culprits who robbed Charlie Engle's watermelon patch at Crooked Lake. Charis wondering how they might have tasted. . . . Ruby Stoops has forgotten how to "baby-sit." Leave it to the grandson to let her know when it is time to eat. . . . The big Ossian street fair was a huge success due to the appointment of Ed Donaghy as one of the Deputies of the affair.

Charles Edward Wilson

American Industrialist

GENERAL ELECTRIC

Charles Edward Wilson

American Industrialist

by KENT SAGENDORPH

PUBLISHED ON THE FIFTIETH ANNIVERSARY OF MR. WILSON'S FIRST EMPLOYMENT IN THE GENERAL ELECTRIC FAMILY, SEPTEMBER 2, 1899

A FELLOW named Charlie Wilson came out of his office one night, not long ago, and hailed a cab to take him to a restaurant. It was only a short trip—a few blocks. But Wilson didn't arrive as soon as he usually did. There was an interruption. Oblivious to the passing of time, Wilson was hunched forward in the seat of the taxicab, arguing with the driver hot and heavy.

The driver had nonchalantly made some comment over his shoulder to the effect that the little fellow had no chance in America any more. At this, his gray eyes flashing behind his rimless spectacles, Charles Edward Wilson went into action.

The driver didn't know that his passenger was president of the General Electric Company, and himself one of the nation's most conspicuous examples of the little fellow who made good. Wilson didn't care who the driver was, as a person. He was championing a cause, defending the bright field of American opportunity. To Wilson, the driver's cynical and somewhat defeatist viewpoint needed immediate correction. In his view, being right demands that a man get up and say so. He doubts that old proverb which says that truth will prevail. He knows, better than most men, that truth will seldom prevail, unless ably, sincerely, and continuously defended.

The ability to recognize the truth in a morass of equivocations and the nerve to defend it any time, anywhere, has distinguished the Wilson career for the past 50 years. He is a conscientious seeker after the simple truth—the basic facts about everything he does in industry, officially in his numerous public capacities, and personally as a man.

For more than 30 years he has been credited with possession of a crystal ball of some kind. He has been right in his forecasts many and many a time when he was simply being honest and direct. Long ago, according to his friend Dr. Daniel E. Poling, Wilson developed a talent for measuring every problem on a queer kind of scale. It is just a scale of values: what's right or what's wrong. Wilson wants to know whether it's good or bad—will it help the Company, the people of the organization, and the country in general.

Wilson is not the only top-ranking industrialist who has advocated more consideration for the forgotten "little guy," whether he be customer, stockholder, or employee—but he was one of the first. He has consistently kept his eye on a hypothetical, composite citizen of the United States, and has directed his activities toward that one man, always. Since the war Wilson has emerged as a symbol of the new social consciousness of Big Industry toward the people of the country. He has been faithfully personifying that viewpoint ever since Teddy Roosevelt was in the White House.

Nature has equipped Wilson splendidly for his role as a defender of human rights in the field of industry. He's big and impressive, prodigiously strong, possessed of something a reporter once called an "electric personality." Wilson's handclasp is likely to be more crushing than he realizes. While thus greeting a stranger his probing eyes hold and scrutinize him as if the man were under an x ray. He is not conscious of this piercing quality in his glance. Wilson's spectacles are rather thick-lensed, and magnify the size of his eyes. Actually he is as much interested in every new personality as the visitor is in Wilson himself. This visual scrutiny tells him as much about the man as anything that is said.

He talks in a resonant voice reminiscent of FDR's, but faster in cadence and much more emphatic. His broad shoulders and strong hands point up his physical size, which is further emphasized by his erect, shoulders-back posture. He was once described as "erect as a major of infantry," which is an understatement. He looks more like a major general.

Entirely lacking in subtlety, Wilson usually drives straight for the point of a conversation and keeps his mind focussed on it. Associates can tell what he thinks of a new situation by his hands. They are seldom still, sweeping upward in emphasis, outward in circles of frustration, running over his forehead and brown hair in moments of thought, and meditatively rubbing his neck while he is delivering one of his quieter comments. His body rocks back and forth in his chair as he finds fresh arguments. To add emphatic exclamation points to his con-

versation he often brings his huge fist down on the top of his bare desk, which once belonged to Thomas A. Edison, with a resounding thwack which can be heard out in the hall. The desk top has warped under this pounding until it's loose, but Wilson is unaware of the sound.

Keeping Fit

Even sitting in a chair, Wilson squeezes 60 seconds' worth of action out of every minute. For a man nearly 63 years old his energy seems boundless. Associates sometimes break into a run trying to keep up with his long legs on the street. He packs 210 pounds on his six-foot-two frame so unobtrusively that the only bulge that is ever noticed is a slight double chin. People seldom see that, either, unless he drops his head to look for something in a desk drawer. Most of the time his calm manner conceals whatever inner nervousness he might feel. Occasionally he smacks one fist into the other palm, a gesture he acquired years ago as an athlete.

Keeping fit, to Wilson, is the secret of keeping going. When he was in his middle forties he was working out in the ring, regularly, with Jack Delaney, at that time a leading light-heavyweight contender. He plays a fast round of golf, in the eighties. But it doesn't relax him; handball and similar aggressive sports do that. A fight with a 180-pound marlin is his idea of a delightful afternoon. Every year he tries to spend two weeks off the Florida keys looking for the big ones; the only regular vacation he permits himself.

Being president of General Electric is a 24-hour-a-day, seven-day-a-week job, which Wilson regards little differently from that of assistant plant superintendent or office boy, both of which he once held. His scale of living certainly has not kept pace with his expanding income and responsibilities. He lives comfortably but simply in Scarsdale, like many another Westchester suburbanite.

There is a cook in the house, but he and Mrs. Wilson don't need a staff of servants; they value their privacy. They live alone in the house now that their daughter Margaret is away attending a university. There is only one car in the garage. That's a Cadillac in which Mrs. Wilson is driven to the stores, and to pick up her husband at the Scarsdale suburban station or the airport.

At the house, Wilson himself answers the phone. He may come to the door if the bell rings, newspaper in hand, peering quizzically at the visitor like a million husbands everywhere. To him, the day of the millionaire industrialist with his vast estate and his yacht is gone forever. Wilson is not a wealthy man, not even close to being a millionaire. He lives on a more modest scale than some of his own associates, but probably enjoys less time at home than they do.

This note of modesty, mixed with actual reticence about his home and family, disappears when he finds public or private rights at stake. Ever since he was a child he has been quick to challenge official arrogance or indifference. He comes by that trait naturally. He was born on the lower west side of New York, in a dingy house on Leroy Street near Hudson Street, on November 18, 1886, in the notorious Eighth Ward.

His father, George Wilson, had been a foreman bookbinder by trade; his earnings were modest, and he and his wife Hannah and the baby Charles just managed to live in a semblance of comfort. Charles was the only survivor of several brothers and sisters who died in infancy.

George Wilson was an American of Irish parentage. Hannah was English, of pure New York stock for three or four generations. About the time of Charles' birth his father talked of moving to Australia. He felt that there were greater opportunities on that continent, and his closest friend at the bookbindery agreed with him. They planned to make a new start "down under," and grow up with the new country. Charlie's mother talked him out of it, at least temporarily. While the decision was still pending, George Wilson joined the milling throng celebrating the opening of Brooklyn Bridge to the public, on May 30, 1883. While the bridge was crowded, a woman fell downstairs at the Manhattan approach, precipitating a mob scene which turned to panic when someone screamed that the bridge was falling.

Starting School

Thousands of persons were crushed in the melee; twelve were killed and scores injured. One of those injured was George Wilson. He never completely recovered, and he died six years later, in 1889.

Hannah Wilson forthwith went out to make a living for herself and her child as a practical nurse. Charles grew up in a most unusual environment—a fine Christian home which, oddly enough, was located in "Hell's Kitchen," a region of violence, crime, and debauchery.

When he was six, he started primary school on West 28th Street, and later attended P.S. 32, on West 35th Street between Eighth and Ninth Avenues. There he became conscious of his environment for the first time. That waterfront area, from Ninth Avenue to the Hudson River, and from Canal to 33rd Streets, produced more Sing Sing convicts than any other part of New York, according to Lewis E. Lawes. It was the toughest part of town in a day when stevedores carried knives and brass knuckles just to go across West Street for a beer in a waterfront saloon.

Charlie's mother was a remarkable woman, of more than ordinary courage and resourcefulness. A boy on the streets didn't have much chance in that place. She determined to keep him off the streets and out of trouble. She implemented her home training with what few neighborhood facilities there were, mostly the Sunday School of the Central Baptist Church. At that time it was situated on the south side of West 42nd Street, between Seventh and Eighth Avenues, just off Times Square.

"Know what's right. Do what's right. Then you'll never go wrong," she repeated.

Keeping a boy on the right path in such a neighborhood was a long, hard campaign for any mother. "Hell's Kitchen" boys were surrounded constantly by drunks, thieves, brawlers, and cop-fighters. In P.S. 32 the police were always bursting in and carrying away some boy from Charlie's class as a petty thief or a delinquent. Every time this occurred, Hannah Wilson's determination grew stronger.

P.S. 32 was an old-time school that kept pounding away at

grammar-school fundamentals, hoping to salvage some of its problem-children before they became incurable. It was full of rugged individualists. Charlie was one. One of the teachers, John F. Condon, the "Jafsie" of the Lindbergh case, was another. Nobody knows what happened to most of those boys. Sing Sing and Clinton Prison might supply some of their names. Charlie's, happily, wasn't there; he kept clear of trouble.

When he was in the seventh grade he was a "pretty brash kid"—oversize for his age, pretty tough, already noted for his readiness to battle any time for what he thought was right. There were probably a number of reasons, good or bad, but one day, during this term, Charlie decided, impulsively, to quit school. He left P.S. 32, and that was all the formal education he ever had.

Later one of the teachers met him on the street and asked him to come back, at least for the graduating exercises of his class. But Charlie couldn't. He was 12 years old, big enough to go to work, and now he had a job. That was all he could see at the time. He craved a chance to earn a few dollars a week and ease the burden on his overworked mother.

It was some time later in the year when Charlie gave up his odd jobs and went down the block on 34th Street to the smelly factory of the Sprague Electric Company, between Tenth and Eleventh Avenues. The place was making electric conduit and fittings and smelled like a case of spontaneous combustion in an old suit of painter's overalls. It brewed a weird concoction of asphalt and other compounds for insulation, boiled in vats in which great piles of conduit were dipped.

Bill Ruete, the six-foot-two superintendent with the handlebar mustache and the derby, roared with laughter when he saw that Charlie was serious. But he gave the lad a job as office boy for three dollars a week. The wall calendar said the month was September, 1899.

2

Charlie Wilson and the Sprague Electric Company began their careers together. The company was only four months old, a corporate "marriage of convenience" between Frank Sprague and Edward H. Johnson, his business partner. Sprague was a former U.S. Naval officer, thin and wiry, with blond hair and mustache, and a prominent Adam's apple which bobbed up and down inside his stiff-starched collar.

Sprague was a brilliant electrical engineer, while Edison was an inventor. So back in the early days of the electrical industry, it was Sprague who figured and experimented and learned how to apply much of Edison's electricity to the practical problems of power and light companies, electric streetcars, and in 1897, an electric locomotive.

Sprague invented the first practical electric cable, and used it in Edison's original Pearl Street, New York, generating plant. He developed the first real electric motor, so good that Edison withdrew from the manufacturing end of electricity and turned it all over to Sprague. Then appeared Sprague's electric elevator, his electric streetcar, his mine hoists, and industrial power devices.

Johnson built the devices Sprague invented. His interior conduit and insulation company manufactured the cable that Sprague worked out for Edison. Johnson was Sprague's partner in the Sprague Elevator Company. They had sold out to Edison once before, in 1889, when the Edison General Electric Company was formed. They aimed to sell again, and soon, with a fully developed railroad electrification system. Sprague was hard at work testing a control system for an electrified

train. It was the basic development of the future New York Interboro Subway and the New York elevated railway system. Intrigued by a miniature train model which was at the plant, Charlie Wilson did his first inventing—he developed an idea for an electric switch control. However, he was unable to interest more mature minds in the project. Later another inventor sold substantially the same device for a million dollars. Thus did Charlie's "first million" slip through his fingers.

The Sprague Electric Company was a combination of all these activities. Its cable and insulating devices were manufactured in the former Johnson loft building on 34th Street, a seven-story brick structure with a tiny office on the ground floor. Charlie Wilson was the errand runner, the message bearer, and the special-delivery department for everything up to and including coffee and cake. Few offices had telephones in 1899, and customers sent messenger boys to the factory with rush orders which Charlie delivered.

In 1899 and early 1900, at the time when Charlie first went to work there, Sprague was seldom seen in the plant. He was usually at the Sprague apparatus plant in Bloomfield, N. J., supervising the construction of a test train for demonstration to the New York Elevated System. In 1900 he began running the train experimentally, and Charlie sometimes had to rush cable and control boxes out to the test track. In the morning Charlie distributed mail throughout the various offices. The rest of the time he followed Bill Ruete, gazing up at the huge man in open-mouthed admiration.

Charlie scarcely remembered his own father, who died when he was three. He adopted Bill Ruete as a synthetic father, which flattered the big, bluff boss beyond words. Their liking for each other grew into a firm friendship which lasted as long as Bill Ruete lived.

Charlie's great ambition was to be just like Ruete—just as big and strong, just as good a boss, and just as rich. At least Charlie thought that Bill was rich; he had a diamond stickpin that loomed up on his big four-in-hand necktie like the headlight of an Erie locomotive. That diamond fascinated Charlie. Desperately he wanted one like it. Ruete grinned and flashed it at him often, to make him work harder.

Charlie had little time to run with the gangs of "Hell's Kitchen." His pent-up energies were released in an improvised boxing ring at the Sprague plant. Later there was another ring at Christ Church House on 36th Street. In between times he was enrolled for exercise courses at the West Side, 57th Street, and 23rd Street YMCA's—and could even be caught doing roadwork in Central Park. Back to P.S. 32 he went, taking a course in stenography, and others in shop practice and physics at Mechanics Institute. Within a year or two he was graduated

from office boy to assistant shipping clerk, with a boost in salary to $8 a week.

"That," he said many years later, "was the happiest day of my life. No other promotion except one has meant so much to me." The other promotion was to his present job.

He plunged into his job with renewed energy. He was working a 59-hour week, but drawing pay for 60 hours because the bookkeeping was easier. He put in enough overtime to balance out, and more. He enrolled in more night-school courses.

In 1903, General Electric purchased Sprague's interest in the company, which became known thereafter as the Sprague Works of the General Electric Company. Soon afterwards Ruete said, in an offhand way: "Charlie, you're the new cost accountant." Charlie Wilson didn't even know what accounting meant. He had never heard of cost accounting. Ruete said he'd better learn, so Charlie signed up for another night-school course, at Universal Business Institute.

Year after year, in dogged work, Charlie learned. "Ruete was pretty good at that," Wilson chuckled recently. "He gave me all sorts of jobs." Combined with his shop and accounting courses he also kept up with his academic education as well as he could. He grew out of adolescence into early manhood. At 18 he was as tall as Ruete: six feet two.

First Patent

"The finest thing Ruete ever did for me," Wilson says, "was to make it possible for me to divide my time between office activities and shop jobs." Part of the time he would be on payroll work, for example, and part in the toolroom. It was in large part the experience he derived from the latter that enabled him in 1919 at Maspeth, to develop and gain his first patent on the Wilson cable machine, which made possible an increase of from 3500 to 17,500 feet per day.

Wilson's robust constitution and his size singled him out for attention as an amateur boxer, too. As boys will, he sometimes played with the idea of going into the professional ring, but his mother wouldn't hear of it. He turned instead to basketball, then developing rapidly as a gymnasium sport, and played on some of the early teams with the famous Johnny Beckman and against Nat Holman.

He went bowling with Bill Ruete and played handball with some of the YMCA crowd. Ruete taught him how to tie a tricky knot in his necktie, and the importance of keeping his fingernails clean. To this day Wilson's hands are immaculate, as white and carefully kept as a surgeon's. He met a few girls, among them a brunette named Elizabeth Maisch. He was surprised to learn that she lived only a few blocks from him. He was 19; she was a year or two younger, so small that she came up only to his shoulder. After he met her, he wasn't interested in any other girl.

They kept company for two years. He was making $21 a week by that time and felt confident that with prudence he could afford to get married. Elizabeth felt the same way. They were married on his 21st birthday, November 18, 1907. He had been working for Sprague for nine years.

Shortly after their marriage, the Wilsons formed a firm attachment that had an important and lasting influence in their lives. Mrs. Wilson saw pretty clearly what the church had done for him. It became their habit, and pleasure, to attend church regularly. When Wilson became a man it became plain to him that two influences—his mother and the church—had kept him on the right path and out of the alleys of "Hell's Kitchen."

"Religion has been part and parcel of my living," he told the Baptists. "I got started early, thanks to a wonderful mother who knew her church and loved it, and who took me by the hand and led me to Sunday school and church. I was too young at first, to know what it was all about, but she kept me there until I found out what it was all about, thank God. I have never been able to get away from either of them—Sunday school or church."

Every Sunday for 15 years, Charlie and Elizabeth Wilson went to the Central Baptist Church. From attending a Sunday school class, Charlie graduated to teaching one, and then to the post of superintendent of the Sunday school. Throughout his boyhood and early manhood the Central Baptist Church knew him as a loyal and enthusiastic worker. As long as he lived in New York he attended faithfully.

At the Sprague Works, Charlie Wilson slowly progressed from one job to another a little bit harder, and then to several jobs simultaneously. He held the title of factory accountant, but at the same time began straightening out production bottlenecks. Year after year Charlie Wilson sweated, and improvised, and worked out better production methods, and learned how to get a job done. In 1914 he became Ruete's top assistant with the impressive title: "Assistant General Superintendent."

For a while Charlie Wilson and Bill Ruete stood about the same height and weighed approximately the same. Then Ruete's girth expanded, as older men's will. His hair grew white as snow and more luxuriant than ever, parted neatly on the right and combed back away from his leathery forehead. Bill Ruete's mustache was a white, neatly clipped banker's model by World War I. The diamond stickpin flashed as proudly as when Charlie first saw it. Ruete wore it every day where Charlie couldn't avoid seeing it.

When the sales of Sprague building-equipment type of electric panelboard and switchboards needed a boost, it was Charlie Wilson who was handed the assignment. Selling was something else he had to learn.

His first harsh taste of sales work came in 1914 when the Company summarily dumped the switchboard problem in his lap. Wilson plugged along with it until 1923, when he could report that sales of all the catalog list of industrial electric supplies were several hundred per cent above the old figure.

More Work

World War I found Wilson ready to take on more work. Immediately after the Armistice, General Electric bought a new conduit plant at New Kensington, Pa., which was added to the group. Wilson found himself next to the top man in these plants, plus carrying the extra burden of sales manager of the panelboard and switchboard divisions. All these administrative responsibilities slowly matured him in three of the basic branches of industry—manufacturing, sales, administration.

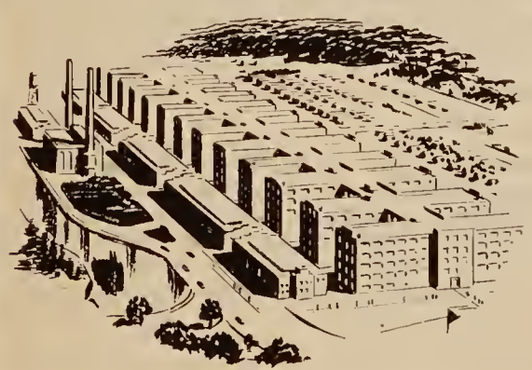
General Electric accomplished a major change shortly after World War I. The Company's first phase of growth had come to an end. Charles E. Coffin, electricity's pioneer merchant and the founder of the General Electric Company, held the presidency until 1913. In that year he became chairman of the Board, being succeeded as president by E. W. Rice, Jr. In 1922, both Coffin and Rice retired. Owen D. Young succeeded Coffin as Board chairman, and Gerard Swope replaced Rice as president.

Thus was born a smooth-running industrial team which for 18 years established new records and made new friends for General Electric throughout the world. They brought the Company into the top rank of American business and kept it there, increasing its sales, its output, and its earnings. Both men became internationally famous—Young especially so because of his historic connection with the "Young Plan" to rehabilitate Germany after World War I.

Swope had no sooner taken over the presidency than he made a swing around the country visiting each General Electric plant. In the fall of 1922 he arrived at Maspeth, Long Island, where he found the erstwhile Sprague 34th Street plant installed in a bigger building. Wilson was out in the plant. Swope gazed up at him, shook his powerful hand, and felt the impact of Wilson's eyes upon him in that characteristic swift appraisal.

Gerard Swope never forgot the meeting nor the impression Wilson made upon him. Wilson passed quickly to something else; he was too busy to stop and chin with the new G-E president, even though it was nice to see what such a big tycoon looked like. It is plain that in 1922 Wilson regarded the presidency of General Electric on somewhat the same plane as the presidency of the United States, and almost as unreachable for an ordinary fellow like himself.

Swope kept quiet as was his custom. He just made a mental note. Wilson had worked for the Company 23 years, and had risen to the post of assistant general manager of two plants. He had a good record in the sales of panelboards and switchboards. It was a good, steady record of progress from office boy to assistant general manager, but General Electric was full of similar case histories.



For 17 years Gerard Swope never referred to that meeting, and he never let Wilson know that he remembered it. But there came a day when he made a speech in which it became apparent that Swope remembered very well.

3

Bill Ruete didn't live to see his protege begin his remarkable rise in General Electric's national organization. The genial old boss had begun to feel his age by 1923 when Swope directed that the Maspeth plant be moved to Bridgeport, Conn. It was to be amalgamated with the larger plant there under the title: Bridgeport Works. Thus it was Charlie Wilson, now 37 years old, who commanded the removal operations. Wilson carried on his multiple functions the same as ever, but took more and more of the burden from Ruete.

Wilson was heartily in accord with Swope's decision to move the plant. He saw the necessity for centralizing as much production as possible, so that all work on one product—design, development, and manufacture—might be carried on at one point. Electrical equipment, by its very nature, grows obsolete long before it wears out. Changes came fast, and Wilson wanted to keep his cable and insulating devices ahead of the market.

Ruete wasn't sure the move was a wise one. He felt lost in Bridgeport. He no longer held the resounding title of general superintendent of this enormous plant. He had become consulting engineer of the conduit and wire division. Wilson took over the administrative load with the title of managing engineer. The inactivity of a consultant's life aged Ruete more rapidly than ever. He lived only until July 7, 1924, and died with Wilson at his bedside.

As his life ebbed, he took Wilson's hand. "You know, Charlie," he said, "that stickpin of mine has been the secret of your success. It's done more for you than it ever did for me. You worked your head off. Now look where you are. So, here it is. Take it, to remember me."

He closed Wilson's fingers over the stickpin. Then he added: "And I want you to give my micrometer to Sam Powell, in the conduit shop. I want him to remember me, too."

If that micrometer had been made of solid gold, Sam Powell couldn't have treasured it more. Charlie Wilson reverently took the diamond stickpin home and locked it up. Nothing but the most important occasions could induce him to wear it. Something of Bill Ruete's magnetism passed from him to Wilson with the gift. More than ever, Wilson determined to be like him.

The following year, 1925, Wilson stepped up to the assistant general managership of the Bridgeport Works. A dozen new headaches descended upon him, besides his cable, outlet box, and conduit divisions. Electric fans, among the first consumer devices bearing the familiar G-E monogram, began to be made now in Bridgeport instead of in Pittsfield, Mass. Scores of wiring devices were added to the line—sockets, switches, terminal blocks, all sorts of gadgets electricians needed to install service.

It was an unglamorous, really drab sort of business. It had none of the excitement of the Schenectady Works, where every week bigger turbines and spectacular motors and generators made news. Wilson stubbornly plugged away at a long list of colorless wiring supplies. His challenge, then as today, was mostly from within himself. He had only himself to satisfy about faster production, wider sales coverage, and better design. No one was prodding him. To electricians, a conduit was a conduit, and they weren't expecting it to look any different.

Home appliances, however, fascinated Wilson as they did Swope, because they gave direct access to the buying public and increased the need for electric power. Washers and other appliances slowly appeared in the catalogs as an answer to the changing times. There was a domestic revolution in progress in America. The hired girl was vanishing by the thousands, every year. She had a better job. Housewives perforce had to do their own work. They turned by the hundreds of thousands to what Swope called "the electric servant." Soon there were millions of women doing their housework largely by electricity. The conclusion was implicit that in appliances lay a magnificent future for the Company.

A New Trend

Gerard Swope was the first General Electric man to sense this trend. The emphasis up to that time had clung to turbines, generators, and power-company equipment: what the Company called "apparatus." In the early days, electricity was used entirely for lighting. Streetcars came clanking along about 1885, followed by subways, elevators, mine hoists and other industrial and commercial applications. Originally, in the early days, it was customary to run a skeleton force at generating plants in the daytime; just a few men to take care of the streetcar load and a few factory installations. The amount of current used by housewives was microscopic, and largely accounted for by the incandescent lamp.

The domestic load grew very slowly. Houses were wired for lights exclusively at first, then an outlet was added in the

kitchen for the iron, and one in the basement or on the back porch for the washer.

"Broaden the base!" demanded Swope in 1925. "Take the services of electricity to more people. That will get you more customers." Every appliance, even every electric iron, multiplied by a thousand homes in a city, meant more kilowatts on the lines, more transformers and meters, new generators on long-line transmission towers. Domestic demand evened out the peaks and valleys in the industrial consumption of power. Swope computed that not more than 25,000 customers bought apparatus for commercial and power-plant use. But some 25,000,000 customers were ready for new devices for their household floor plugs.

"Industrial load may vary," Swope declared, "but that household demand will remain. No matter what changes in their fortunes confront them, people will not go without the advantages of electricity."

Hard-knocks School

From 1930 onward General Electric planners lived and worked to cover America with appliances. Wilson started to school again—the hard-knocks school of national merchandising. He and his associates drew a lead on appliance customers by the million—in homes, stores, offices, hotels, every place where people needed the extra boon that electricity could bring to their living and working conditions.

Year by year more appliance production came to Bridgeport. Ironers came in 1931, domestic washers in 1935, and domestic radio receivers the same year. Wilson grew right along with this appliance volume. He became assistant to the vice president in charge of the merchandising department in 1928, and by 1930 he was up to his ears in appliance development, production, and sales.

In 1930 when the volume of capital goods fell off all over the country, General Electric was fortunate in having laid the groundwork for a big-volume business in consumer goods. General Electric's apparatus business fell off 82 per cent below 1929 levels, but sales of household electrical items were less affected than other lines. Meanwhile, the Company was forging ahead with the "monitor top" refrigerator, and a growing list that included cleaners, electric ranges, and radio sets.

Swope's prediction came true. When the depression began to pinch, people sold their stock, their cars, their other luxuries, but they used more domestic current than ever. The appliance volume appeared just in time. In December, 1930, Wilson was named a vice president of the General Electric Company, and took his seat as a charter member of the newly formed Appliance Sales Committee to help draft policies for bigger sales.

When Wilson's promotion was announced, he was 44 years old and apparently at the peak of his physical vigor. Today, 19 years later, he looks just the same. Why this is so, and why the pressure and pace of Wilson's life haven't aged him, no one can explain. When he came to Bridgeport in 1923, as soon as he and Mrs. Wilson had located a house, Wilson signed up with the famous physical trainer, Andy Parker. Here he renewed his interest in handball and boxing. Andy Parker's gym enthusiasts numbered many handball experts, among them the then light-heavyweight boxing champion, Jack Delaney, who, teamed with Wilson, took on all comers.

By that time, about 1925, he was still a pretty good amateur heavyweight, enthusiastic about the sport. He found time to follow Dempsey's title bouts from ringside seats. During the Firpo fight Wilson was so close to the ring that Dempsey almost landed in his lap, when the "Wild Bull of the Pampas" knocked him through the ropes. Wilson was one of the thousands who got soaked in the thundershower that historic night at Philadelphia, September 23, 1926, when Tunney took the title from Dempsey.

Boxing, larruping a golf ball, bowling a little, Wilson kept his body tough and his wits sharp. In Bridgeport he emerged gradually as one of the city's well-known personalities. His fame was helped along by his fondness for makes of automobiles which promptly became orphans. His income was enough to provide more modern vehicles had he desired them. Instead, he coaxed and prodded a succession of touring cars whose names have long been forgotten—"vintage models" at that.

For a time after moving to Bridgeport Mr. and Mrs. Wilson attended the First Baptist Church, going home after service. It was not difficult, however, to persuade young Mr. Wilson to teach a Sunday school class. It was a different church, in a different community, from that he had known in New York. Some General Electric shop workers attended regularly, along with a few Bridgeport business men and a teacher or two.

Gradually this class evolved into a community discussion group called the Young Men's Forum. "We had just about every type Christian you could think of," Wilson recalls. "We had some who weren't even Christians at all. They came from every denomination, but we never had any trouble over that. We'd give a month to studying Roman Catholicism, for example, then a month looking into Christian Science. We even roamed around in Mormonism. And, believe it or not, we got something out of all of them. I learned then that I could never hate anybody, be he Protestant, Catholic, or Jew."

Wilson likes to lean back and recall his 18 years of active church work in Bridgeport. "I learned," he says, "that the time to get rid of racial and religious discrimination and intolerance is in the days of our youth. It's all right to preach sermons to those of us who are older. But that's getting there too late. The time to plant ideas is when the mind is young."

On December 16, 1937, Wilson was transferred back to New York and given a new title and a new job, which had never existed before—executive vice president of the General Electric Company. He was elected to the Company's Board of Directors, and he thus emerged from the operating departments into the topmost-level administrative bracket in the whole General Electric enterprise.

4

Charles Edward Wilson was on his way to becoming a nationally known industrial figure. The creation of an executive vice presidency seemed to most business observers a device to groom Wilson for the presidency. Reporters asked Swope about it, irritating him and embarrassing Wilson. Swope said no, he was not grooming anybody. Advancement in General Electric, declared the sharp-minded president, was on merit alone. Wilson had come up through the ranks and merited his title.

But the speculation about Wilson continued. Swope and Young wrote a paper for the Harvard Graduate School of Business Administration. Therein they explained the Company's principle of succession; how it was a continuing process with every responsible official developing others to take his place, but leaving the final decision to the Company officers.

Swope frequently addressed himself to regional meetings attended by G-E managers and executives. One such meeting was held in Schenectady in December, 1937, about a month before Wilson's promotion was officially announced. Swope

led up to the subject gradually, describing the Company's expansion and its prospects for the next 20 years. Just how vast that was to be, not even Swope could foresee. He described the Company's 87,000 employees, and its $150 million annual payroll.

After some remarks on the virtues of thrift, Swope launched into a personal theme. He had recently observed his 65th birthday, he said. He felt fine. The doctor had examined him that morning, and pronounced him in good shape. But "one never knows what is going to happen," he added, "so I have selected two young men to help me carry the burdens. The first is C. E. Wilson, executive vice president, and the second is Philip Reed, who is to become assistant to the president."

He explained how Owen D. Young and he had developed a policy about executive retirement at, or near, age 65. It was now time to apply that policy to themselves. He recalled that day in June, 1922, when he first met Charlie Wilson in the Maspeth plant when he was assistant general superintendent. "His progress since then," Swope remarked, "you know."

With a wry smile and a chuckle, the great man looked down at the audience, which contained a smattering of engineering and scientific degree-holders. "One very interesting thing," he mused, "and I glory in it, to you highbrow people particularly, is the fact that *he is not a college man.* It shows that it is the man himself who is coming through."

Informally, speaking as one of the General Electric family to his fellow-executives, Swope proclaimed in the most sincere terms his great admiration for Wilson as a man. "Maybe Charlie would have been a better man with a college education," he said, "but he has done the best he could without it. He has had a broad experience . . . he has sympathy for the basic fundamentals of the General Electric Company."

Swope concluded with these words: "I am still going to act as president . . . I hope!"

Nothing he could have said would have expressed more lucidly the relationship between the famous Gerard Swope and his comparatively unknown right-hand executive. The business world turned to look at Wilson more carefully. "Who is Wilson?" was the great question in U.S. industry. "What is he going to do?" He was not listed in *Who's Who* but it was not hard to explain him.

Cushioning Period

Wilson was the operating man who had been selected to bring the Company into tune with the times, which in 1938 sounded ominously warlike. It would be Wilson's job to guide the Company through whatever chaos might lie ahead.

The year following Wilson's new honor was a sort of cushioning period for both men. In effect, Wilson ran the Company as a sort of general manager, while Swope helped him fit his hands more firmly to the controls. Ruete had been a second father to Wilson. Now there grew up between Wilson and Swope an intimate and affectionate bond based on mutual respect on a high plane, mutual confidence, and Swope's feeling of satisfaction that the Company was in good hands.

Accordingly, on November 17, 1939, Swope and Young announced their resignations: "We took up our burden together and we wish to lay it down together." Simultaneously, the Board of Directors elected Wilson to the presidency and Philip D. Reed to the chairmanship of the Board . . . one day short of the double celebration of Wilson's 53rd birthday and 32nd wedding anniversary.

News of the change in General Electric's administration made headlines in all the big-city business pages, in spite of competition from the Nazi war machine abroad. At the time it was announced, the Nazis were winding up their whirlwind invasion of Poland. The French and English were mobilizing, and once more a disastrous conflict broke loose upon the western world.

Wilson's aged mother joined his wife in smiles, hugs, and congratulations. "I always knew you'd get there, Charlie," his mother declared. "You've got the right stuff in you." The celebration at the Bridgeport Works, which had always claimed Wilson as its own, was noisy and hilarious. General Electric's New York headquarters was kept busy answering newspaper appeals for photographs and biographical data. The calmest figure in the lot was that of Wilson himself.

Somehow the $90,000 salary and other benefits that went with the job didn't impress Wilson as much as the flood of good wishes that poured in from General Electric plants and offices all over the world. Most of those names were those of men Wilson knew personally. Hundreds of them were on friendly first-name terms with him. The magazine *Fortune* opined that the change in management had incidentally welded the whole organization somewhat closer together—alerted it for the big job to come, and given it new spirit.

Effects of War

If ever a huge, scattered organization had to pull together in harmonious teamwork, the time was 1939 and 1940. General Electric was one of the first firms to feel the effects of the oncoming war. Slowly at first, then faster, military demands marched in on the Company, requiring it to find space for new production and men to handle new jobs.

At every turn Wilson had found himself stymied by the conventional production procedures which had evolved through the years. Some products, especially appliances, actually spent more time in transit than in assembly. He thought about refrigerators, as an example. The compressor unit was made in Schenectady, the motor in Fort Wayne, the box in Erie. Assembly took place in Erie, and the completed product was sold from Cleveland.

For years General Electric management had been wanting to integrate manufacture of these appliances, each in its own plant. Managers of various works might get orders for small parts for new devices, parts which they were especially equipped to make. They could make the parts and ship them, but they had little opportunity to improve the whole appliance. Now, with so much stock crated in box cars and stalled on railroad sidings throughout the country, Wilson knew he had to stop the system and substitute something else, as a step to greater productive efficiency and lower costs.

Stopping it, in normal times, would have been an industrial nightmare. It would mean moving huge factories—resettling an army of employees, most of whom owned their own homes

and were important people in their communities. Stopping this intricate and increasingly expensive criss-cross of assemblies in transit entailed building up again from the foundations—new plants, new tools, new working forces. But a catastrophic world war, with all its confusion and tragedy, with its need to convert every plant into part of the arsenal of democracy, was about to force such a stoppage upon General Electric anyway—and eventually it would mean starting all over—and starting right.

Wilson did what he could to reduce the time lost in transit, meanwhile sparring for an opening to attack the main problem. He had a beginning in the radio division at Bridgeport. There, the appliance division set up a little laboratory of its own, and went forward with development. Design, improvement, and constant change went along smoothly with actual production. Sales and accounting were handled from the same point. The success of the division proved Wilson's theory.

"Wilson faces a huge task in rationalizing the engineering, production, and merchandising of the myriad products in appliances, where margins are thin and improvements come fast," commented *Fortune* in 1940. "Before he is done, he will have full need of the beef and brawn he built up boxing in the Bridgeport YMCA."

Wilson smiled grimly when he read this. He felt that the burden which appeared so staggering to these industrial commentators was simply a test of patience and quickness in taking advantage of an opportunity. Forty-one years with the same problems had case-hardened him. His top-level associates were not worried about his need of beef and brawn.

Simple Habits

They knew he had a strange side to his character, mostly hidden from the world behind the facade of his title and his impressive surroundings. At heart, he thought of General Electric in terms of the Sprague plant. He had a happy faculty for breaking the huge organization up into convenient chunks for easy analysis. Bigger though it might be, General Electric was a manufacturing business just like Sprague's. Essentially the two were the same, and Wilson refused to be cowed by mere size. He has the same habit today in thinking of the problems of almost 200,000 employees in terms of their impact on the individual.

Not even his title and his expanded executive status affected Wilson's ingrained habits of simplicity. When he was transferred to New York in 1937, he and Mrs. Wilson had to leave Bridgeport. They rented a house in Scarsdale, which they occupied happily for some years until the height of the housing shortage right after the war. They eventually had to buy the house in order to keep it—an experience a million other tenants have gone through.

Wilson commuted to Grand Central every day that he wasn't traveling—one of 30,000 people who arrive and depart on the crowded commuter trains. He enjoyed the eight-minute walk from the terminal to his office, and wouldn't think of taking a cab for that short distance. After he became president of General Electric there was no change in his scale of living or in his social outlook. He continued to see himself as just another fellow going to work in the morning, without special distinction—just with a few more jobs to do.

However, such an exalted post imposes a severe strain on any man's sense of restraint. Wilson could have joined New York's most exclusive clubs, bought a yacht, and blossomed forth as a self-propelled public figure. He did none of those things. Once he was recognized in a New York night club which he had visited for lunch, in company with a group of friends. He had been there only once before, but the head waiter bowed and said: "Do you wish your same table, Mr. Wilson?" This embarrassed him. "How do you like that?" he erupted. "It sounds as if I'm a regular customer. How did he happen to remember me?"

In his presidential office, Wilson lost no time settling down to the steady grind of decisions, conferences, and new projects. He tried to keep his time as productive as possible. He saw as many people as he could, trying to limit himself to a certain time to talk with them. Usually his self-discipline didn't work. It was not uncommon for a man who had a five-minute interview to so arouse Wilson's interest that he would be kept an hour, while the outer office filled with people waiting to see him.

Frequently the careful schedule for the day would be blown out the window when Wilson developed a sudden interest in something new. Shortly after taking office as president, in the midst of a very busy day, one of Wilson's helpers got a call from him . . . "come at once." Upon entering the office, he found the boss rummaging around in the bottom drawers of his desk, riffling through papers, looking completely baffled.

"It's gone!" he said. "I can't find it. What the Sam Hill did I do with that material I was collecting for Margaret's school paper? Did I give it to you?"

On his frequent trips he was the same Charlie Wilson so many General Electric people had always known. Sometimes he would telephone a plant manager from the railroad station, or the local airport:

"Bill, this is Charlie Wilson. I'm in town; can you see me if I drop out a moment? I should have written you, but I just came on anyhow."

Wilson always visualized his nation-wide force of employees in terms of the faces of his friends in the plants. He saw in each employee a friend whom he knew and understood. His solicitude for them as individuals explains much of his success, and some of his disappointments in labor matters. Thousands of General Electric employees don't realize the personal, "shopman's" angle from which Wilson approaches the problems of wages, benefits, and developing the pride of craftsmanship which distinguishes the General Electric worker.

Everywhere he went, old G-E employees crowded around him in the shops. "Hi, Charlie" . . . "Hello, Mr. Wilson. Remember me? I worked for you in Bridgeport." And Wilson did remember. He could remember what happened at their weddings, and when their boys fell out of apple trees and the later time they asked for days off to attend their sons' weddings.

His first year as president saw General Electric run up a 34 per cent lead on the previous year's sales. He was in good shape, and so was the Company, for the big fight that lay ahead. General Electric had not a dollar of bonded debt. It

had paid a dividend every year since 1899. Wilson was thinking of these things, of how matters stood, when he read the headlines in May, 1940, about the Germans breaking through at Sedan and streaking for the English channel. He picked up the telephone in his office. At the other end was Chester H. Lang, in Erie, attending a meeting of apparatus division sales managers.

"Chet," said Wilson, "unless I miss my guess, all hell's going to break loose. We will be in war work before you know it. I'm appointing a committee to bring the Company into readiness to go all out on government work. You're chairman."

He called it the Defense Projects Committee, to streamline General Electric and clear its decks for action. After Pearl Harbor it became the War Projects Committee and forged ahead without a break until after V-J Day. But from that moment when the Company committed itself to war work, until long after World War II was over, Charles Edward Wilson knew no more peace.

5

Within a year after taking office, all of Wilson's early work in simplifying operations went overboard. But the blueprint for the big job was still there. The Army and Navy, as well as various European and Asiatic governments, practically mobilized General Electric. Washington looked to Schenectady scientists and engineers more and more for solutions to "insoluble" problems. This was especially true of those long-range development projects which called for special engineering and scientific skills which the Company had in such abundance. Wilson had foreseen this, and had taken steps. For example, he froze designs of radio receivers so that electronics engineers could be freed to work on war problems, such as the then secret radar. Civilian production slowed down, and after Pearl Harbor virtually stopped completely. Later there would be complete mobilization for such things as fire control, turbosuperchargers, jet propulsion, destroyer escorts, and bazookas.

At Erie, there was a huge celebration as the last refrigerator went down the assembly line. The plant workers addressed a monster letter to Hitler, saying, in the good old American way: "Oh, so you didn't think we'd fight, eh?"

Wilson and his staff men were everywhere, covering the country in great airborne bounds. The administrative job was tremendous. Demands for new devices came down on the Company like an avalanche. General Electric's production people advertised for, and signed up, thousands of subcontractors to make little parts, sub-assemblies, castings, and other portions of the astonishing electric implements of war.

To outsiders it looked as if Wilson was buried under the burden, but he appeared to thrive. Space was found, labor was recruited, contracts were accepted, and incredible and intricate devices started through development into production. Somehow, the huge organization was re-geared for a wartime task that far exceeded any peacetime effort it had ever known.

Frequently during his most crowded moments, Washington was on the phone. "The Navy wants———." "The Army's got to have———." "The aircraft program is bogged down because it lacks———." "The President wants to see you. Please come at once."

With a sigh, Wilson flew to Washington. En route, he admitted that, for a Republican, he was on fairly good terms with FDR. This was something Wilson couldn't see in terms of politics at all. From the moment of the first radio flash news from Pearl Harbor, he knew that the United States was involved in a serious emergency, perhaps the gravest crisis since the Civil War. He was prepared to do whatever he had to do.

Wilson found President Roosevelt in a serious mood. The demands of the armed forces were mounting every hour at a rate which seemed simply fantastic. The President had appointed Donald Nelson, of Sears Roebuck, as chairman of the new War Production Board. Nelson was a merchandiser, a man hardened in the competitive grind of national retail selling, and accustomed to thinking in millions. Roosevelt saw him as a good administrative head for the new Board, with Charles Edward Wilson doing the hard work of organizing and leading the wartime drive for Army, Navy, and Air Force production.

It seemed to Wilson, as he sat in the White House listening to FDR's persuasive voice, that he was being asked to take over an impossible job. Not at all, said FDR. The President regarded the War Production Board as a partnership; a team wherein Wilson was to run up the field with the production football while Nelson took out the tacklers and ran interference. Wilson's big initial advantage was the confidence reposed in him as a production man by the armed forces. Also, he brought with him that priceless gift for simplification, and penetration of almost any kind of a production problem. FDR laid it on the line without dramatics: it was Wilson's duty to accept. On that basis, he could hardly refuse.

In September, 1942, just after this White House conference, Wilson told the General Electric directors of his intention to accept Roosevelt's insistent plea. The directors agreed that badly as the Company needed him at that moment, the nation undoubtedly needed him more. They reluctantly accepted his resignation.

A Government Employee

Wilson immediately telephoned his wife in Scarsdale.

"Well," he sighed, "they accepted my resignation. It took me 43 years to become president of General Electric—and 43 seconds to get out of the job." It was as simple as that.

It took some time for him to adjust himself to the new state of affairs. His life since childhood had been the General Electric Company. He had never worked anywhere else, and had never wanted to. He had grown as the Company had grown.

To free himself completely from outside pressure, he voluntarily resigned from all connection with General Electric. He laid down his title of president, and his post as chairman of the Board and director of the General Electric Supply Corporation. His $175,000 income from salaries and bonuses vanished. In its place he became a Government employee at $8000 a year, a sum hardly enough to cover the expense of a small hotel apartment he occupied in Washington.

Travel mileage, plus the Government's ridiculous $7 a day living allowance, actually cost him many times that from his personal funds, and he was on the road continuously. Sometimes by direction, sometimes by custom, sometimes just because it seemed better that way, he picked up the check at numberless luncheons and dinners in Washington and elsewhere, which ate further into his capital. He had to maintain two residences, in Washington and at home. Serving the Government cost Wilson a large part of his savings, not considering his lost salary.

Senator Truman's investigating committee brought to light the most serious failures in gearing the industry of America to war. Wilson went to work on those problems first, trying to find out for example, why some aluminum extrusions took so long to fabricate and shape; why certain aircraft plants were chronically behind in their production quotas. He found out—and performance improved.

Everything he learned at General Electric about "rationalizing" production was just a beginning in this prodigious task. In addition, he had to gain the active co-operation of all the top men in both the armed services and industry. They had to trust him and follow his judgment. Admiral Robinson said: "Wilson was a better umpire than Bill Klem." General Somervell, General Arnold, Admiral Vickery, and Senator Truman sat with him day after day while they dug deeper and deeper. Jointly, they gradually unraveled the snarled situation.

Wilson successfully funneled critical materials into the channels where they were most needed. In early 1943 he rescued production quotas and began reaching out for bigger ones—more tanks, planes, aircraft, landing craft, escort vessels, and carriers. It was necessary to find materials to flow into the staggering Manhattan District project, later known as the Atom Bomb. He slept in the vibrating innards of big bombers, and grabbed sandwiches from the lunch counters of war plants. His name was becoming familiar to the people who worked in the plants, and to the millions who kept to their regular jobs and helped carry the war effort along. They read about him in the newspapers.

Split Functions

Later in 1943, the President split up the functions of the War Production Board. Out of this emerged the Production Executive Committee and the Aircraft Production Board. Wilson was chairman of both, and continued as executive vice chairman of the WPB.

Some weeks after D-Day the great question mark about the outcome of the war was settled. American production was so enormous that Europe was literally flooded with it. Official Washington suddenly realized that the war of making things was won; that victory was just a matter of time. Wilson decided to resign.

He wrote a long letter to the President recalling several prior occasions when he felt his emergency service was over and his resignation was justified. On each of those occasions the President had demurred, insisting that Wilson remain. By August 24, 1944, the date of Wilson's resignation, the issue was no longer in doubt.* He felt that the time had come for him to step out. What he accomplished, he left for others to judge.

He was applauded in editorials and hailed by commentators as one of the chief saviors of the nation. Out of this flurry of national gratitude came a movement for Wilson in the pre-convention phases of the Democratic national campaign of 1944. His name was mentioned as a possible candidate for Vice President. Wilson didn't think anybody was serious about it, and caused his name to be dropped when he found the party took it very seriously indeed. Wilson was still a staunch Republican, so he asked his friends to forget about the idea.

The nation joined the electrical industry in answering the question about what Wilson had accomplished during the war. He was awarded honorary degrees and medals of honor for achievement. He accepted few of these tributes, believing that he didn't justify any special attention. After a brief rest he came back to the General Electric Building on Lexington Avenue, in New York City, and made the rounds. He shook hands with his old friends and asked if they still remembered him. As if they could forget.

A Directors' meeting was in progress when he arrived. It turned out to be a testimonial session which, according to the minutes, "honored Mr. Wilson with expressions of great pride in the service which he had performed in the war effort of the nation."

Gerard Swope had been called out of retirement to return to the presidency, temporarily. Swope beamed up at Wilson, shook his hand, and graciously submitted his resignation at once. The Directors unanimously re-elected Wilson to all his old posts and titles. On that day, September 8, 1944, Wilson again became president of General Electric—in not much more time than the 43 seconds it took him to resign some two years previously.

6

Before the War, General Electric had 34 plants with 29 million square feet of space. When Wilson came back, the Company had grown to 69 plants with 41 million square feet. Employment jumped from 76,000 to 170,000, and in addition there were probably an equal number of men and women dependent upon the Company through more than 2000 subcontractors.

More than $155 million in new plant construction had been started, and some of it finished. All of this new building was allotted to war work, and still there was not enough space.

The president of the General Electric Company sat in his plainly furnished office on the 45th floor of 570 Lexington Avenue and indulged in a bit of prognostication and recollection. His mind went back to the planned reconversion, the "blueprint for action." He tried to see the Company as it might be, five years hence. In his imagination he saw some of these new war plants bearing General Electric signs, while inside them, new products were born, developed, manufactured, and sold. In each of these new plants Wilson determined to incubate the germ of his reconversion plan—"integration"—the creation of a single product at a single point. There was also a tremendous amount of managerial integration to be accomplished.

Integration Starts

He lost no time. Integration, to him, meant the complete and harmonious co-ordination of the Company and its people, working together toward the common goal of better products in greater volume. It was the culmination of a campaign which began years before—long before Wilson took office. The vice presidents and the various committees had just gotten off to a fair start when the war came and turned everything topsy-turvy. The end of wartime production, then, must see the real beginning of peacetime, Company-wide integration.

Throughout the months just preceding the war a number of General Electric executives met occasionally at night, away from the plants, on their own time so that no criticism could be directed toward them for neglecting the burgeoning defense effort. Patiently they compiled surveys, analyzed products, made suggestions, and drafted the reports which were to guide General Electric through the reconversion labyrinth. They set forth what they would like to do if they had a free hand to locate manufacture at the points where common sense said it

*On August 24 the President wrote: "Dear Charlie: I have your letter tendering your resignation. You are correct in stating that originally I requested you to come to Washington to solve some of the problems connected with the aircraft and shipping programs. The wonderful record we have made in aircraft production and shipping construction is evidence of the splendid contribution you have made to the war effort. . . . With reluctance I accept your resignation. In doing so I wish to express my sincere appreciation of the patriotic service you have rendered at great personal sacrifice to yourself. At a critical time in our war effort your expert knowledge of mass production methods contributed to the success of vital programs that today are reflected in our successes on many battle fronts. Those who are charged with the direction of our armed forces have frequently expressed to me their appreciation of your intelligent co-operation. I am sure I speak for them and for the people generally when I say you have rendered outstanding service to your country. Sincerely yours, Franklin D. Roosevelt."

ought to go. So thorough was this technique, so directly did it concern the problems that all industry knew it must face up to after the war, that over 80 other companies sent representatives to Schenectady to meet with Wilson's "post-war planning committee"—laying the groundwork for what was later formally organized as the Committee for Economic Development.

Wilson took up these reports eagerly, and interlaced them with some later suggestions of his own. He watched the progress of these voluntary efforts with the greatest satisfaction. During the war he had developed, to an even higher degree, the true executive talent for delegation—a gift more priceless than rubies in a man who really understands the meaning of teamwork. He inspired committees, which in turn energized all their people to more "integrated" effort.

General Electric Team

This had the effect of "integrating" Wilson himself—into the General Electric planning team. That's really what it was. Research, engineering, plant location and layout problems, and a hundred kinds of riddles bobbed up in these meetings, and gradually were defined, charted, and filed away as projects.

The "General Electric team," as one executive described it, is apparent throughout the organization today. Its development can be traced easily to these prewar and postwar conferences, in which Wilson and the vice presidents, plant managers, sales and administrative executives, and everyone else who had a voice in the problem gathered about the table and aired their views. The final decision about plant locations and functions, of course, lay in Wilson's hands. But he did not speak until he was satisfied that everyone had had his say.

With him, the planners worked out a new concept of how to build electric products and put them together. The products were grouped into departments, each with a vice president who became, in effect, the operating president of an autonomous enterprise. Under him, plant managers and sales executives and directors of engineering worked closely with each other to build the department into a smooth-running operation, directed at various customer markets—since the objective was to sell more goods, not just to make them.

Company-wise, committees of several plant managers and executives were set up to consider the bigger problems. In every city where the Company operated a plant, local authorities were called in for consultation. General Electric had the expanded facilities and the increased personnel; now the rapid progress of the integration plan helped to put these to work effectively in postwar production. As a result, there began to appear a new postwar line of refrigerators, home freezers, radio-phonograph combinations, and pretty soon television receivers.

One of Wilson's constant goals was the employment of every possible wartime G-E worker in postwar civilian production. Immediately after the war, at Schenectady and at Lynn, Pittsfield, Erie, Philadelphia, Fort Wayne, and other major plants, the great shops set to work building the generators which America needed to replace outworn equipment, some of it 35 years old. Diesel-electric locomotives appeared at Erie, to give the nation more brand-new streamliners and retire the war-weary steam "teakettles."

In each of the cities which built these new products, Company policy tied in with community policy. Every department of General Electric, furthermore, had its own "bureau of standards" to check the quality of materials that went into its product. Each had its own development laboratory and its own sales and promotion sections. And each department became an individual entity, proud of its people and what they had accomplished.

Finally, some time during 1946, Wilson realized that he was tired. The reconversion job was far enough along so that he didn't need to watch it every day. He thought about taking a rest. He flew to Florida and went fishing off the keys with his friend Gene Lowe, skipper of a Miami cruiser. He appeared at a few dinners given him by professional and business groups where he revealed, on one occasion, that General Electric plants had multiplied from 34 to 112.

"They make everything from electric blankets to turbines," he stated. "We have a wonderful opportunity for bettering employee and community relations. We intend to get one foot in the door of every community where we do business, and aggressively seek understanding and support for the American enterprise system."

He became preoccupied with the dizzy inflation spiral and the wartime curbs which Washington still clamped tight on business and people in general. But more of his speaking time, after the war, was devoted to forthright pleas for common, basic human rights. At every opportunity he came back to the fundamental theme of tolerance, of equality of opportunity, of belief in an expanding economy, of the right of a man to make his own way in the world without governmental interference, and above all, he pleaded for real national unity, without bitterness and hostility.

Government Boards

If Wilson thought that his service to the nation was finished when he resigned from the War Production Board, President Truman hastened to correct that impression. At Truman's insistence, Wilson accepted appointment to the National Security Resources Board. That, he felt, was something he ought to have a hand in. Shortly thereafter, in 1947, Truman also appointed him to the National Labor-Management Panel, to help Cyrus W. Ching bring some sort of order into the chaos of labor-management relations.

"What goes on here?" demanded Wilson, in effect. It seemed to him that a precedent was being established. He appeared at a dinner of the Protestant Fund of New York with a comment on Truman's habit of appointing businessmen to Government boards. "The Electrical Workers' Union," he said, "might feel that Charlie Wilson ought to stay home and tend to the interests of his employees instead of running around trying to solve the world's problems. And I suppose certain stockholders of the General Electric Company feel that officers of the Company are not elected primarily to serve long weeks and months on Presidential committees. Finally, our Company

has customers, as you know. Satisfied customers rarely say anything, but dissatisfied customers seem to be sitting on a corner of your desk, or even perched on your shoulders, making a frightful racket for all the world to hear."

President Truman read Wilson's comment in the newspapers. He digested this protest for a while, and then characteristically added Wilson's name to another commission set up to study Universal Military Training. Before Wilson could reply to that, Truman followed through with an appointment connected with one of the most controversial issues of his first term in the White House—the chairmanship of the Civil Rights Committee.

Spare-time Statesman

News of this appointment again brought Wilson into the headlines. "Spare-time Statesman," *Collier's* called him. "Wilson has a bigger hand in the government of the United States than many senators and cabinet officers."

"We have customers in the southern states," Wilson replied. "This had made some of them violently unhappy; some took the position that I was personally responsible, and some are not too subtle in drawing a direct line between their unhappiness and their future relations with the General Electric Company."

Charlie Wilson tried in vain to get Truman to appoint someone else. "I'm not an expert on anything," he pleaded, "I don't claim to know any answers." But pressure from persons and groups who felt that he alone *could* come up with some answers changed his mind. He spent countless hours trying to rationalize his position on the whole subject of being a businessman in government. When he decided what to do, his answer was characteristically penetrating and to the point.

"There was a time," he said, "when managerial attention was concentrated almost entirely on making goods and selling them—on prices and wages, manufacturing techniques and selling techniques. Today we cannot give our whole attention to these things, any more than today's stockholder has a right to confine his interest to a regular dividend check, or an employee to keep one eye on the time clock and the other on his pay envelope. Industry is neck-deep in the sociological implications of its maturity.

"Look at it this way," he went on. "Managers are trustees for employees, investors, and the public. The morals and motives of business are on trial. It has been said that the whole enterprise system is on trial. Maybe so; it has always been so and it has never shrunk from trial. It doesn't seem to me that any businessman has the right to refuse an invitation from the Chief Executive, or from Congress, for that matter, to serve to the best of his ability."

Civil Rights

He accepted the chairmanship of the Civil Rights Committee and helped draft its report. He didn't take any position in the controversy surrounding the issue. He merely asked people to read the report, which defined the problem and outlined some proposed legislation. "I think," he remarked, "that if people would read the report, more good would be accomplished than if the program were legislated."

All these activities were carried on in what Wilson laughingly refers to as his "spare time." If he were booked for an important address somewhere in the East, he found a few hours during the trip to stop off in Washington and continue his committee work. Thanks to the speed of the Company's plane, which ferried him from one appointment to another, he often saved a day in travel time which he could devote to this purpose. In that way, he still continues to carry on a certain amount of "spare-time statesmanship."

Wilson is piqued at first, then amused, whenever commentators call him an "industrial statesman." That's because he feels the real need of the country is to grow up to industrial citizenship, with every citizen assuming his share of the responsibility for American economic leadership. He comments: "I'm as close to being the average person as could be imagined. I'm just a fellow who has watched a lot of others fail to get what they want in life because they wouldn't work hard enough to get it. Believe me," he declares, "there isn't any golden chariot to get you there."

After 50 years in General Electric and its predecessors, Wilson finds a little time, occasionally, to philosophize about the glowing opportunities still present in this wonderful land, and the manifold ways in which an energetic person can raise himself to success. Daily, instances occur which reveal that in the midst of national and industrial troubles, Wilson still keeps his mind pretty firmly concentrated on human beings, human problems, and a human perspective. Associates see him becoming more and more genial.

The other day a brand-new mail girl entered an elevator in New York headquarters with a load of office mail. She saw a big man in an unbuttoned double-breasted coat standing there, and innocently asked him if he were getting off at the 45th floor.

"Yes," said Wilson.

"Well, would you mind carrying this mail in there?"

"Not at all." And Wilson appeared before his office staff weighed down with bundles.

In England

In the character of Mr. Average American Business Man he visited England in the spring of 1949, for the first time. In a single week—all he could spare—he inspected factories and saw members of his foreign organization. He also saw the plays at the Shakespeare Memorial Theatre; he window-shopped along Oxford and Bond Streets, and it was his idea of a good rest. When he returned he found that somebody had sent him a clipping about the "Billion-Dollar Club"—a list of 56 American firms with assets of over a billion dollars each. The writer hinted that if all these assets were liquidated at full value the resulting money would pay half of the national debt.

"It's time to stand up and fight!" Wilson declared. "This is the opening gun in a war to nationalize U.S. industry. Meet this attack with action!"

About that time Geoffrey Crowther wrote in the *London Economist* a prediction that in 20 years American socialism would surpass in severity that of the British. Said Wilson: "We're going to make a poor prophet out of him!"

Suiting the action to the word, Wilson set forth on a crusade again. He's championing the bright field of American opportunity, to stockholders, employees, citizens' committees, church groups, and boards of industrialists—and an occasional taxi driver. He knows, by now, that under whatever name it might be known, or whatever the commentators choose to call it, some kind of industrial citizenship is sorely needed. He feels that he is one of the men who ought to work at it.

Inside General Electric there seems to be a feeling that all is well. Judging by the sentiment throughout the 112 plants of the great organization, Wilson's newest campaign brings him closer to his people than ever before. They're proud of him. "He's our kind of guy," they say. On his fiftieth anniversary in General Electric, Wilson finds words like these the pleasantest honor he has ever received.

Colonel Chester Lichtenberg: Saturday, Aug. 27, marked the birthday of our friend, Colonel Chester Lichtenberg, and we wish to add our congratulations on the attainment of this decisive year. This date also is the start of a new era in his life. I will not say an era of reereation and relaxation (knowing him as we do we are quite sure this is not true) so we will say—his energies will be directed in a different channel. During the past two weeks there have been many groups who have feted Mr. Liehtenberg. Wednesday of last week, members of his organization together with all of the supervisors who worked with him during the war, when Mr. Liehtenberg served as Administrator of Product Quality, gathered in Bldg. 8-2. R. J. Hoffman presented him with a scrap book of written testimonials from eaeh of his present and former supervisors. J. J. Welch of Decatur presented him with a power lawn mower, as a gift from the group. (They were taking every precaution that he could well occupy his leisure time.) Friday, the Personnel Girls with Hazel McDougall and Edna Neiber entertained with a very nieely appointed luncheon. They presented him with a memory book that will be a treasure to him. Tuesday, the management entertained with a luncheon is honor. Reminiseing with some the boys who have worked with Mr. Lichtenberg during his war and postwar years with the Company, heard many expressions of loyalty and sincerity which can be summarized briefly: Speaking of the war years: "Those were trying times for us all, but it was made easier by having Mr. Lichtenberg as our guiding spirit. His unimpeachable policies and constant surveillance of our work kept us on the straight and narrow path of high quality and perfect understanding. His fertile mind, his keen observation, his accurate diagnosis and fair decisions kept us forging ahead. His intimate knowledge of the organization and routines of the armed forces was one of outstanding help to us. His personal interest in those working for him and his readiness to help them will ever be remembered by those closely associated with him." Colonel, I am sorry my editorial ability is so limited. There are many things that eould be said, all of which I shall try to embody in our sincere wishes for a long, happy and prosperous life ahead and may your new avocation be as enjoyable as your vocation. . . . Last Wednesday we were very happy to see J. W. Crise, who was calling on friends in Bldg. 18. He is very happy over his home in Florida and will soon return for the winter months after a visit with their son in New Jersey. . . . E. F. Waldschmidt returned Monday from a vacation in Michigan. . . . The weatherman smiled, the doubleheader was a thriller and the bus ride was something on Sunday, when 20 some members of the Works Service Production group traveled to Chieago. From all of the reports they must have had a good time. . . . We extend a welcome to Richard C. Sebold who has joined Mr. Matson's staff and will keep the statistical records up to the minute. . . . William Spahr, Bldg. 18-1, and family are moving this week into their new home in Anthony Wayne Village. . . . We still miss seeing Veda Orff and do hope that she will soon be able to return. . . . Nila Hanson, Bldg. 18-1, and husband will spend the Labor Day vacation in Wisconsin (hope the new Buick will survive the gas shortage in the Chicago area.) . . . Opal Burns, Payroll, will be on hand at the state fair over the holiday week-end. . . . Word received from Hazel Meyers, Bldg. 18-1, that she is still ill in South Bend at the home of her brother. . . . Suggestion: Let's start a "G-E Write Your Congressman Club." They seem to need guidance from not a few of us but from ALL of the people. Even a postal card stating your views will not only help him in his decisions, but will at least give YOU the satisfaetion of knowing that you tried to do something about this "mad money spending." . . . We are sorry to learn that the 4-year-old nephew of Dorothy Long, Bldg. 18-4, is in the Lutheran Hospital with polio. . . . Al Tharp's family keeps growing. He acquired a new daughter over the week-end, his son Donald being married to Willa Smith. They will reside at West Lafayette, as Donald has one year at Purdue. . . . Flossie Chapman's father is a patient at the Lutheran Hospital recuperating from surgery. Best of luck to your dad, Flossie. . . . Would you like a holiday suggestion? Why not go to Chicago for the Railroad Fair. If you have children—the fair will help them in their school work—besides it is always fun to go to Chicago. So—happy holiday to YOU and our adieu to Colonel Lichtenberg.

The 25 minutes it takes to cover a roll eall of the U. S. House of Representatives is cut sharply when there's a double-header in town.

Serves Company 30 Years

Vera M. Fetro, Bldg. 4-3, eompleted 30 years' service with the Company Thursday, Aug. 25. A number of her friends gathered to congratulate her on the anniversary. Left to right are: O. J. Mettler, FHP Div. 1 Supt.; M. G. Pugh, Assistant Supervisor of FHP Test and Inspection; T. F. Bain, FHP Div. 1 Supervisor of Test and Inspection; Vera Fetro, Anna Ruth Clements; W. H. Sunier, Supervisor, FHP Test and Inspection; Mae Heit, and Ruth Tutwiler.

Harry Meads Graduates From Apprentice School

H. D. Meads

Harry D. Meads is a recent graduate of the Apprentice School. He completed the Machinist-Toolmaker course Aug. 19.

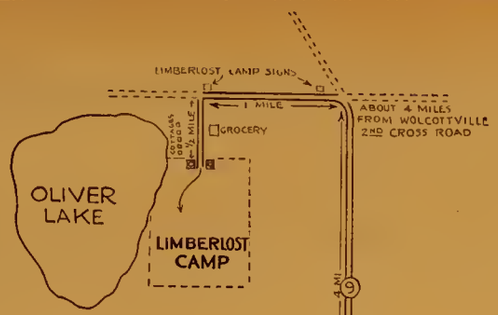
A 1941 graduate of Central high school, Mr. Meads entered the Apprentice Sehool in April, 1942. In February, 1943, he left to enter cadet training in the Air Corps, receiving his eommission as a Second Lieutenant in June of the next year. He then continued his training as a pilot in the bombardier and pathfinder group. Mr. Meads was advanced to First Lieutenant in the spring of 1946 and went overseas to the South Pacific.

He returned to the States and received his discharge in April, 1947. The next month he re-entered the Apprentiee School to eontinue his training.

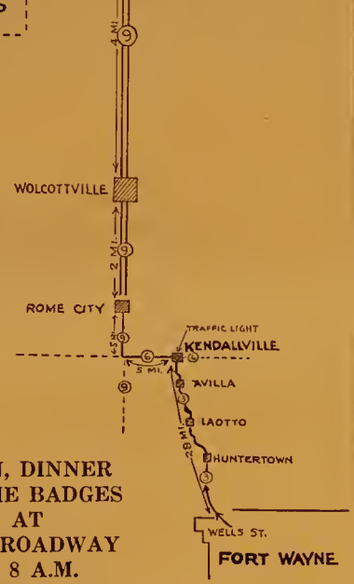
Sleuthing IN BLDG. 4-6

By Gil Baker and Walt Gerke

BRING 'EM BACK DEAD OR ALIVE — Monday morning Wier Anderson reached in his drawer for a package of gum he bought last Friday. To his dismay the package had already been opened. Not by him but by a four-legged creature. Then and there Wier made up his mind to catch him. Wier went over to Joe Gardt and acquired his mouse trap. Then he happened to think he needed bait. He hunted around but couldn't find any. Then it came to him—if they liked the gum once they might like it again. So he tied half a stick of gum on the tray and set it in his drawer. The bell rang and everybody went home. The next morning when Wier opened his desk drawer, to his surprise he had caught the mouse. This shows it doesn't take cheese to bait a trap. . . . ANNOUNCEMENT—Carl Leitch has announced that he and his Rhythmaires are going to play for a dance at Cromwell, Ind., in their Labor Day Homeeoming celebration. . . . ONE MORE YEAR—Happy birthday to Ray Jones today; also to Margaret Taylor of the DC Division. To Wilma Kirby, AC Division, who will have a birthday next Wednesday, September 7, and to Millie Blievernieht of Payroll Division. . . . PROUD PAPPY—Congratulations to Woody Thompson, who beeame the proud father of a bouncing baby boy. They selected the name of Martin Davis. Dorothy Gebhart, formerly of the Renewal Parts Sales Division, also was welcomed with a wee bundle of joy called Riehard Paul. . . . LATE RETURNS—Ruth Gumpper has returned from California. She says she had a wonderful time. . . . TRUE OR FALSE? It is said "Dog is Man's Best Friend", but ask Betty French how true this is. . . . LUNCHEON — Mary Leiteh was honored at a dinner in the Works Restaurant Tuesday for her recent marriage. . . . JITTERS—Joan Poos is really getting nervous about her wedding. After returning from the grocery store, she put a bottle of milk in the cabinet and the box of cereal in the refrigerator. . . . DEPARTURE — George Knackstedt left us Friday for the Chieago offiee. Best of luek, George. . . . VISITORS—Ruth Kramer, former Engineering Assistant of the Aircraft Division, visited us Friday. Ruth has her senior year left in the medical eollege at the University of Illinois. . . . Rosemary Pond, former employee of Bldg. 4-6, also visited the office last week. Rosemary is headed for Dallas, Texas, where she is accepting a eonsuling position on the faeulty of a college there.



The Kaiser sisters, Alma and Frieda, returned this week from their vaeation trip to the Black Hills and Bad Lands of South Dakota. They state that the mountain seenes were beautiful and the Bad Lands almost indescribable. Some of the roek formations resemble cities with palaces and towers. Some of the outstanding sights were Mount Rushmore and its presidents, buffalo and antelope in their natural habitat, a trip through a gold mine, where a ton of ore produees 4/10 of an ounce of gold, reptile gardens with snakes from day-old rattlers to immense pythons. We are all happy that they had sueh an enjoyable vaeation. . . . The Donald Waldrop family vacationed at Twin Lakes, Mieh. As dinner was coming to a close at 3 p.m. on the first day, Mrs. Waldrop commented that Don and Don, Jr., could go fishing while she had to do dishes before she could fish. Don, Sr., suggested to Don, Jr., that this was mother's vacation also, and it would be niee if the men would wash the dishes, then mother eould go fishing sooner. This proeedure was followed, after whieh the father and son went fishing. After about 10 minutes at the favorite fishing grounds, Don, Sr., hooked a large fish. On being landed, the fish proved to be a 33-inch northern pike. Don Junior's comment was something like this, "I just know, daddy, that washing the dishes for mother brought us good luek. Can't we do it each day before we go fishing?" . . . We are happy to report that our golf league has grown to three foursomes. New members are Bill Mills, Courtland Anderberg, Jaek Lea (no relation to the southern general) and Orville Langohr. Bill Mills and Carl Hanson tied for first plaee with Howdy Shipman taking third money. We are interested in a name for the league. Anyone with a suggestion, please give same to your Division Editor. . . . Norbert Sordelet has recently been painting his house. Norb, being one of these individuals who has trouble standing on a high ladder, improvised an extension for his paint brush by fastening a fish pole to the handle. We understand his brother-in-law came to his rescue and painted the high points. . . . Norma Smith has been having trouble keeping her dog home at night. We all wonder if Bootsy is mad at mama.



This week-end, Labor Day, marks the close of summer activities. The kiddies will be on their way to school again. The highways will be jammed with folks taking advantage of the holiday, so take it easy. Remember the slogan, "The life you save may be your own." . . . Speaking of accidents, we were sorry to hear that Esther Fox was in an auto accident last Friday. . . . Several from our floor attended Pauline Hartman's wedding. She was a former co-worker. . . . We bid goodby to Ralph Armey. He has gone to Taylor St. . . . Virginia is back with us. . . . Gertrude Martin is on line 562 coming from Bldg. 2-2, and Lilly Schock came from nights. Hope you like us. . . . Willo Dean Hall and Audrey Coulardot have taken a leave of absence. . . . Lorena Buuck had a party at her home. . . . If Jack Dennis reads this, we want him to know that there IS a bridge at Poe. . . . We hear that Kate Weigle is saving her dimes. When the pedestrian law goes into effect, she knows that she will jaywalk. . . . Margie Drake is back after being ill with the flu. . . . Luella Stabler also picked up the flu bug, and we hope she is back by the time this goes to press. . . . Nettie Huhn couldn't figure out why the noon whistle was blowing. She was so absorbed in her work that she thought it was only 11 o'clock. . . . Ella Arn was busy too. She couldn't read her postcard. . . . Getting up in the mornings must be bad for Evelyn Krueger. The other morning she bought street car checks. She used one, but still doesn't know what happened to the others. . . . Happy birthday to Julia Heuer, Geraldine Crabill and Irene Blank. . . . Marie Bowers visited us last week. . . . We hear that Edith Beaty, Doris Ryan and Floetta Zartman are going up to Michigan to learn how to dance Indian style. Watch out for the war whoops now. . . . We also heard that Harold Kiel has disposed of his fertilizer plant. I suppose that would be a non-profitable business with winter heading in our direction. . . . Dorothy Johnson spent last week-end in Indianapolis. . . . Ivah Grandstaff learned her safety lesson while on vacation. She used an electric hot plate out in the yard to heat water for scalding a chicken. Water had spilled on the ground and burners. When she put the chicken in the kettle, she couldn't remove it or get her hands off the chicken. When she did she was really frightened. A good safety lesson. We are glad it wasn't serious. . . . One evening when Luella Mason went home from work, she found her husband had gone to the Railroad Fair in Chicago. He knew she wouldn't go anyway, so he didn't ask her. . . . Our sincerest sympathy to Mary Foster in her bother-in-law's death.

35th ANNIVERSARY CELEBRATION

TRANSPORTATION, DINNER TICKETS AND NAME BADGES AVAILABLE AT MAIN GATE ON BROADWAY SATURDAY AT 8 A.M.

A large tent has been acquired in case of bad weather.

In our midst we have Herman the new character in the "Tillie the Toiler" comic strip. What a physique, according to the photograph! Bob Owens has a picture of him in trunks holding one of his prize catches he was lucky in pulling in during his fishing vacation. . . . Another classification of the meanest man: We just can't get over how a man can get such a kick out of laughing how he got by without treating since his birthday happened during vacation. Fork over the sweets, Chet. . . . While Joe Weber was vacationing in Chicago, he bought a bad meal. After missing several days work he recovered from the effects. . . . Another carpenter, Buck Johnson worked on his homestead improving it during his two weeks' vacation. . . . Erman Johnson, we hope your little girl's arm heals soon after her fall from the swing. . . . This man doesn't realize how lucky he is. Osterman claims he has no troubles. . . . Our sincere sympathy to the Bird family upon the death of John J. P. Bird, who was an employee until recently. . . . Several people have returned from sick leave, among them are Dwight Kimble of the tool room, Merrill Weaver, and Rita Herndon. Good to see you folks back. . . . Have you heard? Henry Krueckeberg finally got that new Pontiac after all these months of waiting, worrying, and talking. Henry, do you think it was worth it? Now, let's see you drive it to work so we can get a good look at it. . . . Our sympathy goes to Ralph Roop of the tool room upon the death of his grandchild. . . . Fred Busse has added six gray hairs to his few remaining. Reason—Duffy Heller returned from vacation with a black eye. Duffy tells Fred he got hit with a ball—b-u-t other sources claim he got "belted" by another cottage guest. . . . Dave Embler has also joined the "New Car Club" and is driving a Kaiser. . . . GeCode Club Girls, don't forget the big Conference which will be held at Oliver Lake Sept. 17 and 18. If you want to know your GeCode Club or have some new ideas the Conference is the place to go. . . . The newly elected officers for 1949-50 for the GeCode Club are President, Mary Fennig; Vice President, Norma Bower; Secretary, Dorothy Schumm. . . . Another holiday is coming up so let's remember to put "safety" first. . . . The bowling season is rapidly approaching. The G-E alleys are in tip-top shape and preliminary interest indicates that the G-E Club alleys will be filled every evening. Bowling will be at the usual price of 25 cents per line.

Before it slips our mind again, we want you to know that Elaine Allen is our Co-Division Editor. Elaine does most of the writing for our Insulation Division and doing one swell job. We understand she had a wisdom tooth pulled last week, but we also know that this will not have any affect in her writing of the news. Keep up the good work, Elaine. We want you to know we appreciate it. . . . Cleo Crowe is the slick one. After pleading with Vaughn Sheets and Virgil Nash to help him put in his cement driveway and they are good enough to do it, Cleo really gives them the works. When it came to the finishing and you had to get down on your knees, Cleo claimed he got a stitch in his back and it gave out. Who did the finishing? You guess. They say there's one born every minute. . . . Know of a good way to keep flies out of one's hair? If so, please let Orval Doherty know. He's tried bug bombs, fly swatters, shooting at them with rubber bands, then finally wore a dust cap, but none of these seem to have any effect on the flies. They seem to find Orval's hair as attractive as ever. Do you suppose it's the hair tonic he uses? . . . Belated birthday greetings to Charley Brubaker. . . . Guy Oberlin is on his vacation this week. No doubt he will spend most of it in the garage getting repairs on that old rattle trap of his. . . . Quarter Century members don't forget your picnic at Oliver Lake Sept. 10. We know you will have a good time and meet many old friends again. . . . Everyone can have a good time Labor Day, that is if you drive and practice safety-first. Please do this won't you? . . . Have you noticed Carl Hankel's new engineer's cap. All he needs now is a big Diesel.

Insulation News

Earl Gebert has returned from his trip to Norfolk, Va., with reports of a very fine trip. Mr. and Mrs. Gebert visited their son, Donald, who is with the U. S. Navy. . . . Josephine Balsamo has learned never to share a secret with another woman. The other day she very secretly went up to Dorothy Baumgartner and confided that she had hidden an eraser belonging to Bob Martin. "Don't tell Bob," said Jo to Dot. "Why should I?" said Dot to Jo. "It's my eraser." Jo just walked away, slowly turning the prettiest shade of pink. . . . If there is such a thing as "after summer fever," we think that Dorothy Lebrecht has it. Either that or she is still dreaming of that wonderful vacation. It must be known as that back to work after vacation look. One consolation, Dot, is that you certainly aren't the only one with that lackadaisical look. . . . We hope that Ray Fisher is having a good "second vacation." We'll be looking forward to hearing all about it, Ray.

Bass, Carp, Or Sucker?

What do you say it is? "Fatty" Morris says that it's a BASS. Boy those CARP really get away with murder. They tell us "Fatty" is also a SUCKER when it comes to rowing a boat for his fishing friends. He always seems to get that middle seat.

Only one ad per employee may be inserted. Each ad must be limited to 20 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Tuesday Noon, September 6, 1949

LOST AND FOUND

LOST—Parker 51 pen and pencil set. Green in color with stainless steel (silver) caps.

FOUND—Top part of a Wearever fountain pen. Found by candy counter in Bldg. 18-B.

FOUND—Red Eversharp pencil. Found in yard by Bldg. 8.

FOR SALE

HOT AIR FURNACE—With pipes and 200 cu. ft. Marshall blower and ¼ hp motor. A-68274.

16 IN. TRICYCLE—Excellent condition, ball bearings and chrome handle bars, $8. A-65133.

FRIGIDAIRE REFRIGERATOR—6 cu. ft., runs good, $75; also hair drier, professional model. H-8496 or 4625 Avondale.

MUSKRAT COAT—Hollander mink-dyed, purchased here for $300, make offer. A-65941.

BOWLING BALL—And bag, 15 lbs., one year old, $15. A-39267.

SIX-ROOM HOUSE — Southwood park section, one block to car line, hardwood throughout, carpeting, copper plumbing, new hot water heater. H-46684.

GIRLS' DRESSES—Size 6x, good condition, reasonable. E-37682.

LADIES' COATS — Green fur-trimmed and brown sport, size 10, very good condition, reasonable. H-15723 ofter 6 p.m.

THREE-PIECE COATS—Sizes 12, 16, 20, good condition. A-3724.

1939 BUICK EIGHT—Attractive, black, with good tires, radio, heater and rebuilt engine, priced to sell. 4023 Webster or H-75805.

FOR RENT

ROOMS—For couples or singles, close to Broadway G-E, breakfast if desired. A-97213.

FURNISHED APARTMENT — Three rooms and bath. A-36455.

MISCELLANEOUS

HAULING DONE—Dirt, sand, gravel, cinders, crushed stone. H-78313.

WANTED

YOUNG GIRL TO SHARE APARTMENT—Three rooms, bath, downstairs, private entrance, near General Electric. E-32603 after 6 p.m.

120 BASS ACCORDION—H-50672.

Personnel-ities

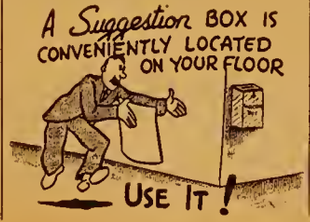
by VEORA HABIG

If you hear an unusual little noise don't be too startled. It is probably none other than George Waldschmidt who is rapidly becoming known as "Cricket." That nickname seems to describe him rather accurately, don't you think? . . . Bill Allen was noticed yawning quite frequently but he had a very good excuse. They are remodeling their home which necessitated the tearing down of a chimney. Bill was awakened by Mrs. Allen's screams early one morning. He quickly turned on the lights and found a bat in the room. After quite a battle, Bill climbed back into bed and was soon fast asleep. In a short time he was awakened by a sharp shriek. He jumped out of bed and found another bat had entered the room. When he was able to return to bed he was exhausted. It wasn't too long until the familiar ring of the alarm clock reminded him that it was time to rise and shine. Bill says he understands the expression "bats in the belfry." . . . This one is too good to keep. I was looking through the "S" file of MBA members and just happened to notice that Ruth Shull's card was missing. I asked Ruth if she was a member. When she answered in the affirmative, I told her that her card was not in the file. Was her face red when she discovered that her own card was misfiled. Don't worry, Ruth, we all make mistakes. . . . While Herschel and his sons were on vacation, they were traveling along the highway as fast as his '37 Buick could travel (safely, of course) when a new car passed him with ease. The occupants shouted, "What will you take for it, Bud?" I guess they didn't wait to hear his answer and from all reports we wouldn't be permitted to print it. . . . Ivan Rinehart stopped by the office to inquire if we knew the Employees' Store had some real bargains in coffee makers. Sounds like they are worth investigating. . . . Our former co-worker, Gene Moss, is now in New York studying music. We wish her much happiness and success in her new life. . . . Hope you all enjoy the Labor Day week-end. Did you ever stop to think "Few things come to him who wishes; All things come to him who works."

Motor and Generator Static

Thought for the Week: "A parrot is known to be quite a talker, but a poor flyer."

ODDS AND ENDS: What some people don't know about driving would fill a hospital. . . . Drive carefully: it's better to have grass under your feet than over your head. . . . All play and no work makes Jack scarce. . . . Miser: person who lets the rest of the world go buy. . . . News is just a little scarce in Motor and Generator, but don't give up as we still have Art Druce, Frank (Twinkle Eyes) Rathert, Joe Neal, Pappy (Eagle Eye) Archbold and a host of others.



Ramblings, 31-2

Business is on the "up-beat." Two of our engineers, Claude Penn, and Ray Atkinson traded in their old model cars for late models. Bill Purman bought a '48 Studebaker and now has three cars. Bill has a 1940 Studebaker, a 1948, and a 1950 "model" (small model, that is). . . . We are very glad to see "Chick" Waltemath working again in the drafting room. Chick has been off work many months because of illness. . . . Sam Stilwell recovered from his operation and came back to put in a couple more weeks of service before retiring. Sam has worked for G-E for 32 years and started his retirement Sept. 1. Today or any day he may be found working in his flower garden. We certainly will miss the beautiful bouquets of daffodils next spring. When deer season opens, Sam plans to take a house trailer to Michigan. He likes to hunt with bow and arrow, at which he is an expert. . . . We had a charming visitor from California this week. None other than Mildred (Van Hoozen) Bieberstein who used to work in the service bureau. Mildred and her husband and baby boy, Jerry, are visiting relatives here. They plan to buy a car and drive back West. . . . Elgy Ginder has been telling about all the fish he caught while vacationing in Minnesota. The report is that he pulled in one fish right after another and caught the limit. The best of the tale (or should we say the worst) is that the fish bit on a tiny piece of red rag. Gosh, those fish must be hard up for something to eat. Indiana feeds their fish too well.

TOOL BITS — BLDGS. 19-4-5

by Harry Travelbee

Warning to all farmers around Albion and Wolf Lake: Joe Mettler, Carl Moser, and their sons are going camping in that vicinity this week-end. Joe says he refuses any responsibility for cut fences or dead cows. . . . Cary Baker was passing out cigars recently, celebrating the marriage of his daughter, but as far as I could determine, Carl Einsiedel was the only receiver of the free stogies around here. . . . Frank Druhot claims you shouldn't laugh at someone for being absent-minded and wearing house slippers to work instead of shoes. It might happen to you. . . . Glen Ramsey tells me to never let Elmer Sauerwien have your key ring to unlock your tool box. You might get out in the parking lot after work and be without an ignition key or be home without a door key. . . . The fellows of the Tool Division recently voted Mart Walsh the most safety-minded person. . . . Ray Mutton and his family have just returned from a 10-day motor trip to Salt Lake City, Yellowstone Park and back through Denver. Ray was deeply impressed by the beautiful Mormon Temple at Salt Lake City—especially the giant pipe organ and the master workmanship in the construction of the temple. . . . Ed Kaiser had better eat a lot of spinach this week 'cause we hear that he is going to give his daughter away in marriage Sunday. . . . Don Alcott has a new pickle ready for market just as soon as it is out of the experimental stages. 'Tis a cedar flavored (hard cedar) dill. . . . "When it rains it pours" for you see Bill Wedler had just washed his car and then changed his clothes to go to a party. When he and his wife started to the car, they noticed a flat tire. Bill dashed into the house — changed his clothes — changed the tire — changed his clothes. After the party, again the car wouldn't start, this time a dead battery, so he had to push the car. Bill stopped on the way home to pick up the tire at the filling station, but the attendant had given Bill's tire and wheel to someone else and when he did receive it, instead of matching his car, the wheel was a fire engine red. That happened on Thursday. Friday, Bill was called home to fix the roof, the plumbing, and a few other emergency jobs. WOW!

P's and Q's of 17-1

by Joe Kramer

Ed Brosche left Florida in such a hurry that he created quite a vacuum. It is rumored that this was the cause of the recent high winds they have been experiencing in the sunny state. . . . We were glad to see Bill Hanley when he paid us a visit last week. Bill was looking good but said that loafing isn't all it is cracked up to be and he will be glad to get back to work. . . . Believing that preparedness is a best motto, Clarence Doctor wasn't taking any chances on losing his pants. Doc had on a belt and also some bright red suspenders. Due to the shortness of the suspenders, it was necessary to lengthen them. Doc's ingenuity paid off when he used tag wire as means of fastening the suspenders to the buttons. . . . The pictures Harry Kessler brought in of some fish he caught while vacationing in Wisconsin looked very familiar. In fact, it is quite possible they might have come from Fuller's Fish Market. . . . Frank Martin, partner of George Mosshammer, spent his vacation learning the cement trade. Frank put a new cement dock in at his lake cottage. The only thing that caused a mishap was the cement mixer falling over into the lake. . . . If Red Braden could have seen the old timer's game last Thursday night, he might have taken a different team to Wichita for the semi-pro championship battle. The first baseman playing for the G-E was none other than our own Bill Franke. Bill made a couple of good catches on some throws from Joe Henry who was playing third base. Bill got a well-placed hit that should have gone past the shortstop, but one of those odd bounces put it right to the shortstop's hands. Due to the slippery conditions between home base and first, Bill assumed a perpendicular position half way to first base. All in all, everyone had a good time and we bet the majority of the players had some mighty sore muscles Friday morning. . . . Bill Walt, foreman in the plating section who generally waits until the girls bring the payroll checks to him, decided to pick them up himself the second Wednesday after vacation. It seems everyone but Bill knew that checks would not be distributed that day. Of course, maybe Bill is playing too much euchre during the noon hour and that is what caused this momentary lapse.

Inquiring Reporter:

WHAT DO YOU ENJOY MOST ABOUT THE QUARTER CENTURY CLUB OUTINGS?

HILDA WALDA

Bldg. 4-2

"I enjoy meeting old acquaintances at the outing most of all."

J. F. FORMANEK

Bldg. 31-2

"Meeting old friends, especially those who have retired. Of course, that swell chicken dinner and that delightful Limberlost Camp help to make this outing a very enjoyable occasion."

BESSIE CHAPMAN

Bldg. 26-4

"I like the meeting of old friends. I also enjoy the ride down to the lake and the dinner."

LOUIS D. HOPPER

Bldg. 10-1

"Last year I attended the Quarter Century Club picnic and enjoyed the dinner and the sociality of the people."

DEWEY ERNE

Taylor St.

"The Club has good entertainment, sports, and dinner. In fact, I enjoy the whole outing."

Merry-Making Macaronic Men Make Macerated Muscles Malignant Midst Mimical Melee

With the creaking of bones, the Old Timers' benefit game got under way Thursday with the G-E oldsters edging Red Carrington's nine to the tune of 13-12. Although the game was not played according to Hoyle, it was nonetheless an enthusiastic affair.

There wasn't a dull moment from the time Elmer Wagner and Red Carrington, team managers, led the umpires to their stations blindfolded; until the last inning, when Wagner came home on Sam Baumgartner's hit, thus winning the game for G-E.

Approximately 60 Old Timers were rubbing their aching backs the next day, but they were just like young sandlotters discussing batting positions. One time before the "play ball" call, at least 20 of the players lined up in single file to bat.

The game gained momentum slowly and after the third inning the rule book was tossed out and the corner vegetable stand thrown in for good measure. From that time on it wasn't a matter of "who's on first" but "who's at bat," but that didn't dim the fun on the diamond or the nostalgia in the dugouts.

Don Martin mimicked Thelma Eisen, with Daisy uniform and all, most of the game and did a grand job amusing the fans. Hub Hart, one of the oldest men present, was seated in a rocking chair to do first-base coaching duties until Martin took over the chair for his clowning.

The game not only gave the fans a good show for their money, but the proceeds help to foot the doctor bills for injured younger players. By the way, it was rumored that the youngsters are thinking of staging a benefit to get liniment for the oldsters' sore muscles.

Owls Score Victory Over Eckrich Packers

The G-E Owls' softball team wound up the season with an eight won and seven lost record. Eckrich Packers went down in defeat before the G-E-ers. The score was 9-0.

Good team play dominated the game for G-E.

G-E was eliminated from the playoffs by Indiana Rod and Wire. The score was 5-4.

Line Score:

		R	H
G-E	005 022 0	9	11
Eckrich	000 000 0	0	3

"Our eyes are where they are for seeing opportunities ahead—not for looking at our mistakes behind."

Glen Keck, took a "sweet" side-trip while on his vacation in the East. He stopped several hours in Hershey, Pa., and toured the Hershey Chocolate Corp. He said that it was a very interesting experience. The best part of going through a plant of that type is the samples. He said they were given all of the chocolate milk they could drink besides sampling the candy along the way. How I'd like to be let loose in a place like that. . . . Mary Beaman has set the record for touring the United States on less than $5. She covered over 6,000 miles on $3.57. No, she didn't hitchhike either. She drove a car for some Detroit friends. All expenses were paid in exchange for her driving. I'm sorry, I forgot to ask her what she bought with the $3.57. . . . We were sorry to say farewell to Irene Bristol, who has been transferred to another building. We will be hoping to see you return some day soon, Irene. . . . Paul Koldewey has joined the first shift again. This time for "keeps" he hopes. . . . Bill Straub and wife report a wonderful time on their trip to the Smokies. . . . Kenny Hyman is getting to be a home movie enthusiast. He took his family to the Wisconsin Dells and says that he captured some good scenes in full color. . . . Carmilita Fough visited Miami, Fla., at just the right time. It would have been "sorta windy" down there last week. She also enjoyed her trip to New Orleans and would like to go to the Mardi Gras sometime. . . . Eldon Roby and friend went to Chicago with his brother and wife a day during vacation. They went to the broadcast, "Welcome Travcler," and enjoyed it but he and his brother beat a hasty retreat after the women got them into the broadcast of "Ladies Be Seated," and discovered they were the only men present. They went to the ball game where they felt more at ease. . . . Frank Bly is just about ready to move into his new home. We haven't heard anything about a housewarming yet. . . . Frank Brohman has returned to work after a few weeks' absence. Welcome back, Frank. . . . Everett Stoffer has returned to the second shift in the tool room.

Clowns To Play Voltmen Sept. 8

Pepperball and an exhibition of their original "Shadowball Infield Workout," will be highlights exhibited by the nationally famous Indianapolis Clowns, when they face the Voltmen in an 8:30 p.m. game at Dwenger park Thursday night, Sept. 8.

The Clowns are famous for their side-line antics on the diamond that have made them so popular as the "Zanies of the Diamond."

King Tut, Juggling Joe Taylor, and Spec Bebop are the added attractions offered by the Negro American Leaguers.

Junior wants to know why dry goods designers don't make a black towel.

One more week and the Owl Golf League for 1949 will be history, with the exception of the playoff.

The playoffs are cut and dried with the exception of second place in the Odd side, where Earl Stauffer's team No. 1 lead Walt Pook's No. 5 by a scant four points. The final week's play will determine who will tangle with John Shanahan's Hi-Flyers in the playoffs.

The Hot Shots will meet the Jolly Boys in the other playoff of the semi-finals.

Last week's play gave those Hot Shots notice not to take things so lightly. The Jolly Boys handed them their second loss this season. They did this by shooting 17 strokes under their average. On the other hand, the Hot Shots got 12 strokes over their 150 effort of last week.

Johnny Stark shot an even par 36 to pace team No. 1, but they still took it on the chin from team No. 4. "Windy" Boester and "Fuzzy" Fosnaugh shot 18 strokes under their averages to turn the trick. Dave Mumma gave a hand with a 46. Dave, incidentally, just purchased clubs this year.

The Hi-Flyers felt the sting of defeat for the second week in a row at the hands of team No. 5. The result was six plus for Walt Pook's boys.

The Standings

OND

No. 3, Shanahan	+31
No. 1, Stauffer	—25
No. 5, Pook	—29

EVEN

No. 6, Craig	+99
No. 2, Myers	— 9
No. 4, Fosnaugh	—67

Owls' Softball Team Completes Season With 8 Wins, 7 Defeats

The G-E Owls' softball team, of the YMCA Owl Industrial League, closed its regular season last week with eight victories and seven defeats. The team was nosed out of the playoff in the first game by Indiana Rod and Wire. Final score was 5-4. Team members are: (front row, l. to r.) Chuck Stone, outfield; Ray Sherrer, third base; Bob Crosley, outfield; Harold Baker, shortstop; and Max Greeno, catcher; (back row, l. to r.) George Lambroff, utility; Fred Phillips, first base; Paul Boyer, manager; Jerry Jacobs, outfield; and Earl Stauffer, pitcher. Players not present when the picture was taken were: Clarence Koepke, second base; Kenny Ford, utility, and Harold Blauvelt, pitcher.

Fall Registration At Purdue Center To Open Sept. 6-7

Management, Production Courses Are Offered To Many G-E Employees

Registration for the fall term classes at the Purdue University Center will be held Tuesday and Wednesday, Sept. 6-7. Fall term classes will begin Sept. 8 and close Dec. 7. Late registrations will be accepted until Sept. 21.

Of special interest to many G-E employees, the following management and production courses are being offered during the fall quarter:

ECONOMICS OF INDUSTRY, Mon., Wed.; 5:30-7:30 p.m.
Economic principles as applied to major industrial problems. Fee—$20.

TECHNICAL REPORT WRITING, Mon., Wed.; 5:30-7:30 p.m.
Appropriate use of the venacular in the preparation and presentation of industrial reports. Fee—$20.

FUNDAMENTALS OF PRACTICAL SPEAKING, Wed.; 7:30-9:30 p.m.
Organization and presentation of material, mannerisms, voice and audience reaction. Fee—$10.

CONFERENCE SPEAKING, Thurs.; 7:30-9:30 p.m.
Training and practice in ronducting and participating in small group conferences, shop committees, instructional groups, problem-solving groups. Fee—$10.

PSYCHOLOGY APPLIED TO INDUSTRY, Mon.; 7:30-9:30 p.m.
Fundamentals of psychology of interest to indostrial and technical personnel. Fee—$10.

PERSONAL ADJUSTMENT, Wed.; 7:30-9:30 p.m.
Application to psychology to selection of employees, training, etc. Fee—$10.

FUNDAMENTALS OF INDUSTRIAL PRODUCTION, Tues., Thurs.; 5:30-7:30 p.m.
Detailed survey of industrial organization, duties or management, planning, quality control, personnel problems, safety, wages and policy. Fee—$20.

PRINCIPLES OF ORGANIZATION & MANAGEMENT, Mon., Wed.; 7:30-9:30 p.m.
Survey of organizationai structures, operational, financial, marketing, and accounting activities; and human factors necessary for effective management. Fee—$10.

INDUSTRIAL SAFETY, Thurs.; 5:30-7:30 p.m.
Economics of accident prevention, mechanical safeguards, fire prevention, occupational disease, hygiene and first aid, safety codes, workmen's compensation, educational programs. Fee—$10.

HUMAN RELATIONS FOR SUPERVISORS, Wed.; 7:30-9:30 p.m.
Individual analysis of human relations problems arising from induction, training, discipline, grievances, absenteeism, promotions, transfers, discharges, etc. Fee—$20.

INDUSTRIAL ACCOUNTING FUNDAMENTALS, Tues., Thurs.; 5:30-7:30 p.m.
Accounting from the viewpoint of the industrial corporation. Designed primarily for supervisors, engineers, and others who feel the need for an understanding of accounting; as well as accountants who wish to improve their knowledge of industrial practice. Foundation course for COST CONTROL and PRODUCTION COST ANALYSIS in the second and third semesters.

Non-technical courses in Purdue's Adult Education program include:

Music Appreciation, Fundamentals of Bridge, Purdue Hunting School, Home Decorating and Furnishing, Advanced Interior Decorating, Photography for Beginners, School for Parents, School for Homemakers, Audubon Screen Tours, and Swimming Instruction.

Fees for these courses range from $1 to $5.

G-E Voltmen Roar Toward Third National Semipro Championship

(Continued from Page 1)

In the bottom of the eighth frame, Johnny Corriden maneuvered a base on balls to launch the Volt's victorious rally. Frank Morgan then plated Corriden by caroming a double off the left-center field wall. Morgan managed third base on a fielder's choice and scored a moment later when the Bellingham shortstop booted an infield tap.

Box score:

Champs Defeat Weimar, 4-2

The Voltmen swept to their third straight triumph Monday night by turning back the powerful Weimar, (Tex.) Herder Truckers by a 4-2 score.

Jumping into a 4 to 0 lead in the first, the defending champions almost cinched it then and there.

Weimar simply started the wrong pitcher. Murray Wall was just smacked right and left.

Relief Pitching Wasted

Then the veteran Jiggs Kana, former Texas league hurler, went in and pitched a great relief job, blanking the Voltmen the rest of the way and doing an uncanny job of getting out of trouble.

Winning pitcher was Bill Ricks, first Negro player signed for pro ball. He hurled a mighty steady game, fanning 15 batters and mowing down the Texans on all but two occasions and on those two he held the rally to one run.

How They Scored

Austin led off with a single, Todhunter doubled him to third, and both rode in on Dudick's line single.

After a foul-out at first, two more singles rattled off Voltmen bats like sparks off a pole. Bobilya and Ebranyi cracking hits, good for another run and Murray Wall was withdrawn in favor of Jiggs Kana.

A walk loaded the sacks, and an infield roller scored a fourth run before a double play via the box got the side out.

Weimar partisans cheered for the first time in the third, as Bell doubled to deep right to drive in a mate who had walked. Bell was thrown out at the plate a half minute later on a hard collision with Catcher Morgan trying to score on Kneuper's single to left. Les Lockett threw a strike to the plate and thus put an end to the rally.

Voltmen Muff Chance

The Voltmen muffed a big chance in the last of the third, pushing runners to second and third with none away to two hits and a passed ball. But Kana pitched out of it beautifully on two pop-ups and a strike-out.

Weimar escaped in the fifth when again the Voltmen pushed a runner to third with none out, on a hit batsman and a single by Ebranyi, his third straight. But Kana bore down and pitched out on a strike-out, pop-up, and a force-out.

The Texans scored again in the eighth, when with two away Kana got to second on a two-base overthrow. He scored on Bell's single. Ed Kneuper drove one up against the right field wall for a double, the blow lacking only a foot of going over. Bob Brock, who had fanned three times, sent a screaming liner to right; but Bobilya plucked it off his shoes.

Box score:

WEIMAR, TEX	AB	R	H	VOLTMEN	AB	R	H

Voltmen Down Penn. Champs

The Voltmen notched their second victory of the tournament last Sunday afternoon, when they defeated the Hummelstown, (Pa.) Athletics, 9-1, in a seven-inning contest.

After three scoreless innings, the Pennsylvanians went ahead in the third. With one out, Finney walked, moved to second when the shortstop threw wild to first while trying for a double play on a short pop. Malehorn singled over second to score Finney.

The G-E team tied it up in their half of the inning. Todhunter got life on an error, went to second when Dudick was walked and was sacrificed to third. Bobilya's fly to left field scored Todhunter from third. Corriden fanned to end the inning.

Volts Score Four Runs

The Voltmen pushed over four runs in the fifth, with George Todhunter's single, which sent two runners home, one on an error at home plate, the key blow.

The Volts picked up three more runs in the sixth on three hits and an error.

Scott Cary, former Washington Senator hurler, went the route for the Voltmen, holding the Hummelstown club to six hits.

Box score:

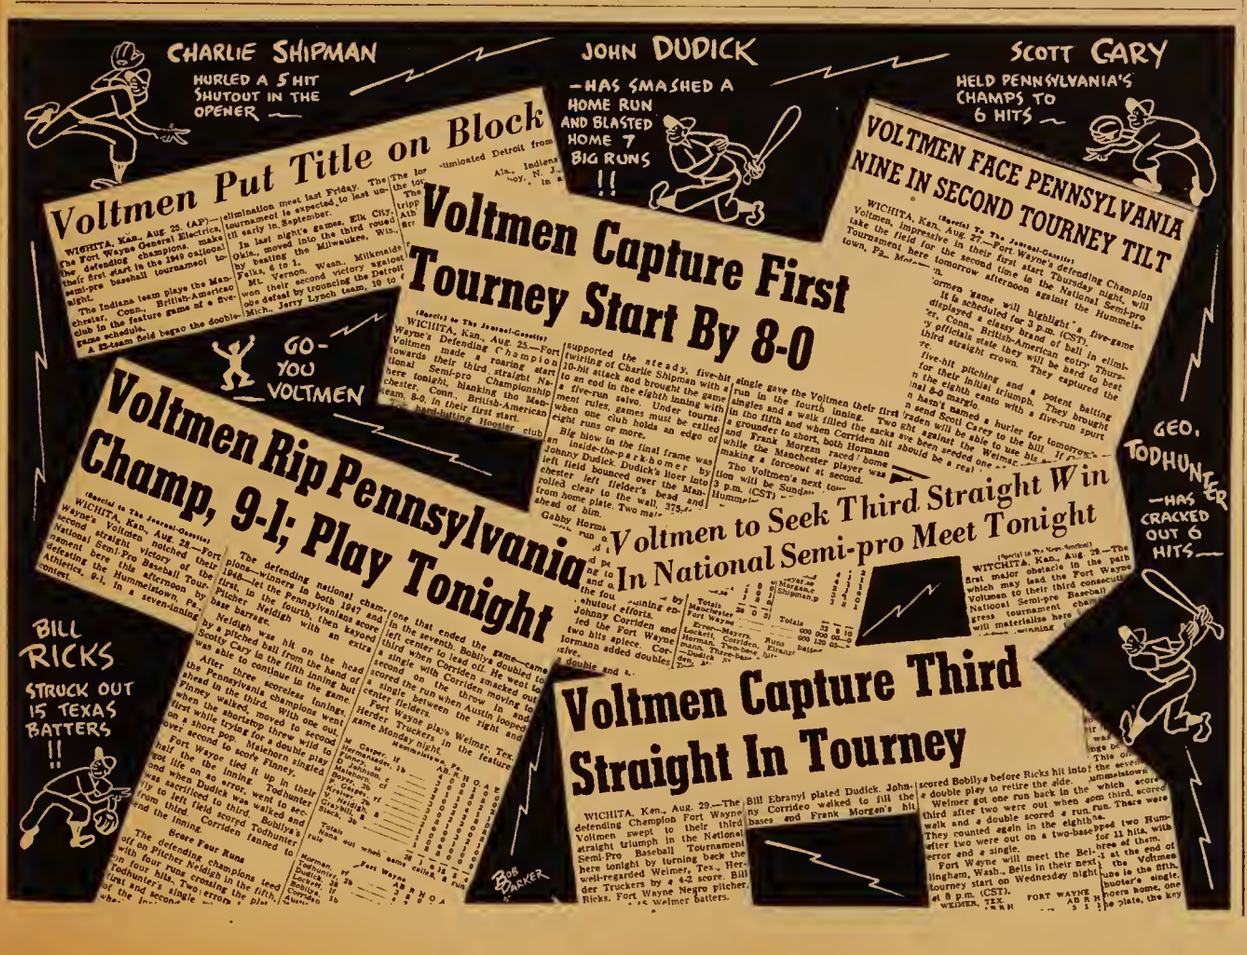
Voltmen Take First, 8-0

The Voltmen blanked the Manchester, (Conn.) British-American team, 8-0, in their first start.

The Braden-men never looked better as they smashed the Connecticut state champions. It was a ball game for three innings and it was still close at the end of seven, but it was all over at the end of eight innings under the 8-run tournament rule.

Centerfielder Corriden scored G-E's first run. He led off with a double in the fourth. It was the first hit of the game off Carl Lyles, Manchester starter. Les Lockett, batting out of the cleanup spot, sent a sizzling single over second to score Corriden.

In the fifth, the Voltmen's speed on the base-paths paid off. With the bases loaded, Corriden stroked a grounder to the shortstop who made the play at second for the force out. However, both Morgan, who was on third, and Horman, who was on second, scored on the play when the keystone sacker momentarily held the ball.



Dudick's inside-the-park homer accounted for three of the five runs scored by the Volts in the fifth. Dudick's ball landed in front of the leftfielder and bounded the wall. Dudick chased two men home ahead of him.

Charley Shipman pitched the victory. He gave up only five hits.

Post 330 Downs Majors To Take Champion Title

Post 330 combined four hits with three G-E errors to score five runs to win the game Wednesday night at Memorial park. The final score was 5-2 in the Post's favor. This victory clinched the championship of the Major League for Post 330, as they also won the first-half championship.

Friday night the Majors and Post 330 tangled in the opening game at Municipal Beach in the Class A division of the City Softball Tourney.

Manager Esterline started with Waltke pitching and all the offensive strength he could muster. His choice paid off when the Majors blew the game wide open in the third inning. They scored six runs and added three more in the fourth to win by the score of 9-0.

Somers and Baals led the offensive with two hits each, while Waltke was hurling a neat three-hit shut-out.

Line Scores:

	R	H	E

Post 330	000 000 0—0	3	4

Waltke and Somers; Glick, Adams and Hanefeld.

Program Is Announced For Q-C Club's Outing

Robert Cocherille and Mrs. Mildred Germanson are shown, above, at last year's outing. The duet has been billed again this year.

Arrangements were being completed this week for the annual outing and 35th anniversary celebration of the Quarter Century Club, which will be held Saturday, Sept. 10, at Camp Limberlost, Oliver Lake.

Free transportation will be provided to the camp for those who desire it.

Badges and meal tickets will be issued after 8 a.m. on the day of the outing at the Broadway gate. Those driving direct to the lake will obtain their badges and tickets there.

Sports, Confab Start Early

Scheduled to start officially at 10 a.m., the remainder of the morning will be spent in sports events and a general get-together of all members. A refreshments stand will provide free candy and soft drinks throughout the day.

Sports facilities will include softball, horseshoes, shuffleboard, cards, and boating.

Over 800 Meals Planned

Then promptly at 12 noon, the dinner bell will call the more than 800 Q-C members to the dining hall.

Meals will be served on trays and three or four lines will be used to handle the large crowd that is expected. The menu will include fried chicken and dressing, mashed potatoes and gravy, salad, green beans, sliced tomatoes, bread and rolls, milk or coffee, ice cream, and cake. Cigars, cigarettes, and chewing gum will also be distributed, along with a special souvenir of the event.

The 25-year employees will then assemble at 2 p.m. in the open air pavilion for a short business meeting and a gala variety show.

Vic Perry

Vic Perry, an entertainer from the Paramount Attractions Agency, will headline the show.

Mr. Perry has appeared in prominent cities throughout the country and abroad. His most recent engagements include the Hollenden Hotel in Cleveland, the Pierre House and Roxy Theatre in New York, and Grovenor's House and the Palladium in London, England.

The show will also feature two special acts, a quartet and duet, through the sponsorship of Jack Wainwright, proprietor of Camp Limberlost. Both were featured acts of last year's outing and received large ovations from the crowd.

The first will include a group of old-time melodies by the Nobelaires, an outstanding barbershop quartet from Kendallville.

The second act will be furnished by Mrs. Mildred Germanson and Robert Cocherille, accompanied by Mrs. Wainwright. The duet will again delight the audience with a program of semi-classical songs and ballads.

Mrs. Germanson has played numerous leading roles as a star with the Independent Players of Columbus, O. Mr. Cocherille has been a member of both the Pittsburgh and Detroit Civic Opera companies.

Several other novelty acts are also being arranged.

Ten G-E toasters will be presented as attendance prizes.

The Nobel-aires, above, will present a group of barbershop ballads at the Quarter Century Club's annual outing at Camp Limberlost.

Almost everyone is doing some canning but not all the husbands are helping like Harold Painter who peels the peaches for Fern. . . . Mildred Gaffer sure had a swell time up at Loon Lake! She had to do all the cooking. She loves to cook. . . . Clarence Rentschler has five children and four of them look like him. That's a pretty good average. He's got a boy who is very bashful. Takes after his father. . . . In case you think you're seeing Sherlock Holmes on the street some day, relax it's only Ted Bain with his hat pulled down to his nose. . . . Clara Patterson is getting to be quite a carpenter. It seems her young son likes to jump on beds. Sometimes it proves disasterous. . . . Merle Keesler had some things to buy in a book store lately—but he reports the clerks are so indignant. Maybe you'd better try a different approach, Merle. . . . We finally discovered the reason for the strange behavior of Eleanor Kohrman. She came to work one morning wearing a beautiful diamond ring! The lucky man is Thomas Krouse of Yoder. . . . Reggie Eggeman is getting all set for the big wedding of her son, Dallas Zuber. . . . Malinda Beerman will soon be sporting a new Plymouth with all the trimmings! Wish I could have a ride, Malinda. . . . We are all sorry to hear Elsie Frede is on the sick list. Hurry and get well, Elsie. We miss you! . . . Elihu Lee is back after a very serious illness. . . . Edna Hergenrader has left the hospital and is recuperating at her home at 339 Brandriff St. . . . Ilene Lantz has a dual personality. Looking at her, one wouldn't think she was a farmer's little helper but every once in awhile you can find her down on the market behind one of the stands. Yes, she's working not buying! . . . This souvenir collecting is really getting to be something. Now Edna Rohrbach is collecting things from the church steps and we have never found out just what she did with her collection. . . . Mary Nute is back with us again. Hope you can stay longer this time, Mary. . . . Birthday greetings to Pauline Elick and Margaret Fuelling. . . . Henry Weigman wrecked his car again last week—he hit some loose gravel and then hit the ditch—better be careful or you might not get any more insurance. . . . Ralph Weikart is enjoying the third week of vacation with his family at Lake James. . . . Dick Bradley is our new packer in black armature. . . . Grace Ober and her husband enjoyed the horse races at Muncie Monday night—she also attended the races at Hicksville last week. . . . Paul Ginder said that we wouldn't believe some of his stories about that fishing trip to Minnesota, but here is one that I heard and you can believe it or not. He was fishing with frogs (they don't use worms up there) and he threw his line in with the frog on the end and got a strike right away. Before he could pull the line in he got another strike this time a bigger fish had mistaken the first catch for bait. So Paul says he got two fish with one frog. . . . Ann Hershberger was carrying a dishpan full of water across her basement floor when she stepped into a small hole and down went Ann completely covered from head to foot with water. She is nursing a bruised ankle today.

"Hello people! Now that vacation is over and things are back to normal we will take a look and see what's been happening around General Stores. . . . Last Sunday Lloyd Platt, Herb Jesse, Ed O'Neil, Chris Reiz, Harry Beatty and Dick Robertson, along with several others, journeyed to Chicago to witness the double-header between the Chicago White Sox and the New York Yankees at Comiskey Park. From all reports a good time was had by all. . . . Once again we find that Karl Soest has hidden talents. Last Saturday night found him at one of the popular night spots calling for square dancing. I guess there just isn't much that guy can't do. . . . Here's one for the Fort Wayne Police Department: Who was the grinder that had ground a piece of drill rod in place of carboloy and didn't know the difference? The suspects have dwindled down to two, so it shouldn't take too long to find the guilty party. . . . A most welcome visitor to Bldg. 8-1 last Friday was our old friend and former co-worker, Margaret (Furrell) Chance. Margaret, as most of you know, left the Company about two years ago and is now making her home in Saginaw, Mich. . . . The General Service gang had another one of their famous bowling parties last Monday night at Bowman's alleys. So far, I haven't heard too much about it, maybe the Bldg. 20-2 gang carried off all the honors. . . . Byron Simmons sure is the absent-minded guy these days. Yes, it has happened again—he lost his car again last Friday night but this time he found it over at his sister's house. . . . Birthday greetings this month to George Welker, John Hensler, Frank Treece, Bob Van Horn and Melba Kelly. . . . "People are paid wages for doing the things they are told to do and paid salaries for doing whatever is up to them to do without being told. The difference in words is small, but the difference in dollars is amazing."

Everyone all set for a big Labor Day week-end? This usually is regarded as the end of the summer season. School bells will be ringing for the youngsters, mothers are busy with canning and school clothes, and, of course, the fathers worrying about the winter coal bill. Anyway, it was a grand summer, wasn't it? . . . Olive Walters will be enjoying another week at the lake. She probably had such a fine time during the regular vacation period that she decided that the third week would be better yet. . . . Being ill any time of the year is a bad situation. But when a person who loves to fish the way Veda Orff does, and is unable to try to catch any of our finny friends—now that is trouble. She did ask me to tell all that she is doing much better and hopes to be marked "present" when the fishermen call the roll at Gilead Lake. . . . Mary Heymann attended the annual Elex Club Board Meeting at the Colonial August 29. . . . Lyle Rupert has acquired her annual hay fever jag. We sympathize with the sniffin' and snuffin', Lyle. . . . From our joke book: An old man was asleep on a truck at the railroad depot. The fellows decided to play a joke on him and dropped some Epsom Salts in his wide open mouth. Presently he awakened, gulped a couple of times and ran across the street to the Doctor's Office, and said: "Quick, Doc, give me something! I think ma gall's busted." . . . Merely thinking out loud: Progress always involves risks. You can't steal second base and keep your foot on first.

Voltmen Retain Championship Title

FORT WAYNE WORKS
G-E NEWS

Volume 32 | FORT WAYNE, INDIANA, FRIDAY, SEPTEMBER 9, 1949 | No. 36

Win Over Coors, 5-4, In Tourney

THEY DID IT AGAIN! The G-E Voltmen, national semi-pro baseball champions, broke all tournament records by being the only team to ever win the championship title more than twice, when they downed the vaunted Golden, (Colo.) Coors by a 5-4 score Wednesday night at Lawrence field in Wichita, Kan.

Frank "Lefty" Ververka's seven-hit mound effort coupled with superb all-round play brought victory to the G-E team. Ververka had the Coors completely throttled in seven innings, but suffered two temporary setbacks that almost presented the title to the lads from Colorado. After yielding no safety for the first four innings, Ververka was nicked for five straigbt hits and four runs in the top of the fifth stanza. Tben, following tbree more hitless rounds, the southpaw allowed two more in the ninth and was forced to summon up tremendous hurling prowess to bligbt what loomed as the possible tying or winning rally.

In fashioning their narrow victory, the Voltmen took advanta... of a fumble by one of thei... teammates, Bill Hardy, in cou... the winning tally in the seve...

Johnny Corriden led off that inning by taking a third strike. Then Todhunter took command and sent a single rocketing into the hole between short and third. Then Dudick rifled a double into deep left field.

Meetings Pay Tribute To Wilson

Friday, Sept. 2, was recognized throughout General Electric as the 50th Anniversary of service for Company President, Charles E. Wilson.

As a special tribute to the man who grew from the humble position of office boy to the responsibilities of President of General Electric, meetings were held by Fort Wayne Contributing and Works Service divisions, Product divisions, and Branch Plants for the purpose of determining ways and means whereby Fort Wayne G-E could be made an even better place in which to work and the steps to be taken to assure higher em-

(Continued on page 5)

Scenes at some of the meetings held Friday are shown, above. The sessions were conducted by the Fort Wayne Contributing and Works Service divisions, Product divisions, and Branch Plants.

Dean Dirks To Present Humorous Address At Supervisors' Meeting

Dean L. H. Dirks

Prof. Louis H. Dirks, dean emeritus of DePauw University, will deliver a humorous address on "Horse Sense" at a meeting of the G-E Supervisors' Club Monday, Sept. 12, at 8 p.m. in the Squares hall.

Author, educator and lecturer, he is widely-known as a participant in civic, religious and educational functions throughout the Midwest.

General Electric's Aeolian Choir will also be featured on the program. The choir is under the direction of David Embler.

A short business session will open the meeting.

Committee Completes Arrangements For Quarter Century Club Outing

Camp Limberlost at Oliver Lake was being made ready today for the more than 800 persons expected to attend the Quarter Century Club's annual outing tomorrow.

The affair will be the largest turnout of the group since its founding 35 years ago.

Preparations for the feast call for 600 chickens, 125 loaves of bread for dressing, 200 quarts of beans, eight bushels of potatoes, several crates of tomatoes, as well as other commodities.

The menu will include fried chicken and dressing, mashed potatoes and gravy, salad, green beans, sliced tomatoes, bread and rolls, milk or coffee.

The food will be served on trays and three or four lines will be maintained to handle the large crowd. Ice cream and cake will be served separate from the rest of the

(Continued on Page 4)

The committee for the Quarter Century Club's annual outing and 35th anniversary celebration is shown, above, completing arrangements for the big event. The members include: (l. to r.) Irene Meyers, women's activities; James V. Johnson, entertainment; Lloyd Platt, program; W. W. Dreyer, treasurer; George Waldschmidt, transportation; A. C. Hartman, secretary, prizes; F. L. Schafenacker, president; E. C. Koch, traffic and parking; Frank Quinn, director; George Prince, director; Alma Witte, director; Harry Zimmerman, refreshments and playing cards; Ford Zimmer, director, and Walter Sunier, vice president, publicity. Committee members not present at this meeting were: E. C. Miles, director; Joe Grosjean, food; Carl Reynolds, athletics, and Harry Rohrbach, public address system.

Socialists Ask Us To Help Rebuild Their Tottering Welfare State

The appearance of two British cabinet ministers in Washington this week might well be considered along with the reports from England concerning their welfare plans and new measures to socialize the country.

The two diplomats are austere, bleak-visaged Sir Stafford Cripps, erstwhile problem child of the British Socialist movement and now its financial brain-truster, and ponderous, stubborn, aspirateless Ernest Bevin, one-time farm boy who became trade union boss and foreign secretary. With them came the hopes of Britain's 48,000,000 long-suffering men, women and children and the national balance sheet drawn up in a vivid red.

The Cripps-Bevin mission is one of the most crucial in Britain's long and chequered history for they seek a solution to the latest and most serious of the postwar economic crises which have hit their country, threatening it with complete financial and political disaster. The two cabinet ministers are now sitting around a table with United States Secretary of the Treasury John W. Snyder and Secretary of State Dean Acheson and Canadians Lester B. Pearson and Douglass Abbott to try to chart a course which will bring Britain safely through the blizzard.

The United States shows symptoms of getting tired of dipping into the bank roll to keep Europe on its feet.

Socialism Marches On—To Bankruptcy

Most of us agree that Britain's best chance of survival lies in standing squarely on her own feet. That she hasn't before this is no one's fault but her own.

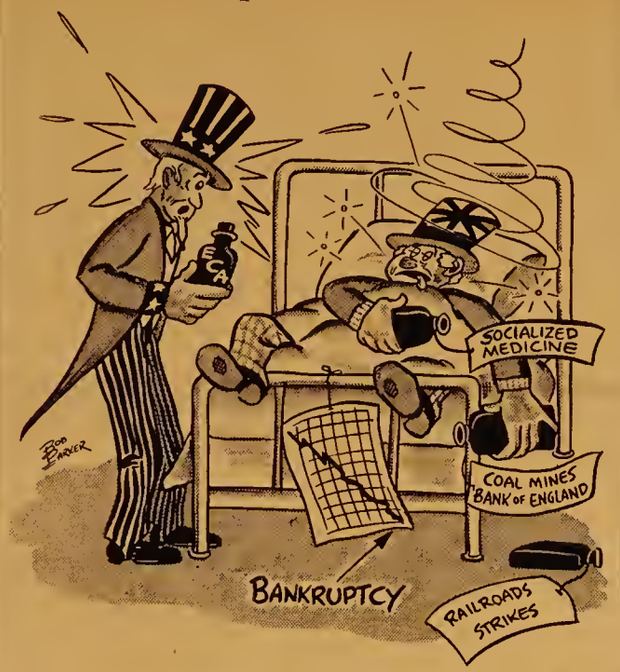
Instead of forestalling bankruptcy, the Socialists have been pushing Britain further and further into debt with their welfare and nationalization schemes. Coal mines, the Bank of England, and railroads have been taken over by the state; the much-publicized health plan was started.

The Socialists can't be blamed for all of their errors. The people voted for Socialists and presumably expected socialism.

But the Labor government, knowing the country was to all intents bankrupt, ought to have considered postponing these schemes to more propitious times, or, having started the health plan, for instance, ought not to have gone so far so fast.

Undoubtedly, there are benefits to some persons, for vast numbers are being properly taken care of through Britain's National Health Act. But inevitably, such welfare schemes and nationalization plans are accompanied by a swollen bureaucracy. Tens of thousands have been taken out of productive work to master-mind the rules, regulations and form-filling, on top of all the wartime rationing officials and regulation enforcement snoopers. It takes huge sums to pay the salaries of the hordes of civil servants, to cover the losses sustained in state enterprise and to make up the cost of food subsidies.

Taxes in Britain have soared till they strangle nearly all ambition and initiative. In the top brackets $3.90 is taken by the government out of every $4. The smaller income earners, comparatively, are hit just as hard. To top it all is the crippling purchase tax from around 20% on so-called essentials to 100% or more on luxuries.



Socialists Fail to Engender Confidence

The setup in Britain when the Labor government came to power in 1945 was a natural for Socialists. The legacy of six years of war was a mass of regulations and orders, scarcities in everything that made life pleasant and even possible, and an utterly exhausted people. The only fly in the Socialist ointment was that the country was broke. Here the Socialists were guilty of their major mistake. They failed to take the people into their confidence.

They had promised nationalization of the basic industries and the building of the welfare state. The people were ready to grasp at the vision of Utopia after the horrors of the blitz. But Utopia isn't found in the bargain basement, and the Socialists were without the money to construct it. Then they should have made the situation starkly clear even at risk of alienating some support and of welshing on their promises. They should have tried to clear away the rubble before putting up the new building.

The result is, today Utopia is tottering on uncertain foundations. Cracks are appearing in the walls and only ECA props from the United States have kept the building from toppling over altogether. It would have been no disgrace to the Socialists to reveal the true state of affairs and postpone the welfare state.

A Hopeless Case?

WHAT'S NEW IN PLANTS & LABS

SCHENECTADY — A gigantic planer and milling machine, which can shave a sliver 1/1,000th of an inch thick from a steel block the size of a railroad box-car, has been placed in operation at the General Electric Company's Schenectady Works.

Built by the Consolidated Machine Tool Corporation, Rochester, N.Y., and powered by General Electric motors, the machine will be used in the manufacture of equipment for industrial and power generating applications.

The machine is a 27-foot high arch with a 40-foot long table which slides through the archway. Capable of functioning as either a planer or milling machine, it eliminates the task of transferring materials to two machines, when both operations are required. The table will carry loads up to 200 tons, and, because of its size, will permit several parts to be bolted together and handled as a single unit.

The machine is set in a foundation, which required 30,000 pounds of steel and enough concrete to lay a sidewalk more than two and a half miles, G-E engineers said. Regulated from two pendent push-button stations, the machine is completely controlled by electronic equipment. The stations, one for each operation, hang from the top of the arch. They can be easily carried to different locations, enabling the operator to control the machine with a minimum of difficulty.

An emergency lever, which responds to a slight touch of a finger, protrudes from the bottom of the pendent station and will stop the machine instantly when touched, according to the engineers.

A single switch converts the machine to either the planing or milling operation. When performing as a planer, a 100-horsepower motor moves the table at speeds ranging from 10 to 150-feet per minute. During the milling operation, the table travels from 3 to 45 inches a minute, while two 50-horsepower motors operate the cutters. Maximum length of material which can be milled is 30 feet.

* * *

ERIE—Savings at the rate of more than $100 a day are being shown by two diesel-electric switching locomotives in the Calco Chemical Division of American Cyanamid Co. in Bound Brook, N. J. Total savings are averaging more than $40,000 a year. The locomotives, one 44-tonner and one 65-tonner, both built by G-E, replaced two steam locomotives and are used for transfer work and intra-plant switching. One official at Calco stresses the value of the diesel-electrics in operating safely in inflammable areas. The steam locomotives were constant dangers in the highly volatile atmosphere of some parts of the chemical plant.

POLIO

Editor's Note: The following is the third and last in a series of questions and answers regarding the current polio situation. They have been prepared from reliable sources by Dr. L. E. Burney, State Health Commissioner. Every effort has been made in the following questions and answers to furnish authoritative information on the subject with the object of relieving undue fear and alarm through the presentation of accurate information and knowledge.

Are there any drugs, chemicals, vaccines or sera effective against polio?

No. However, research is progressing in this direction.

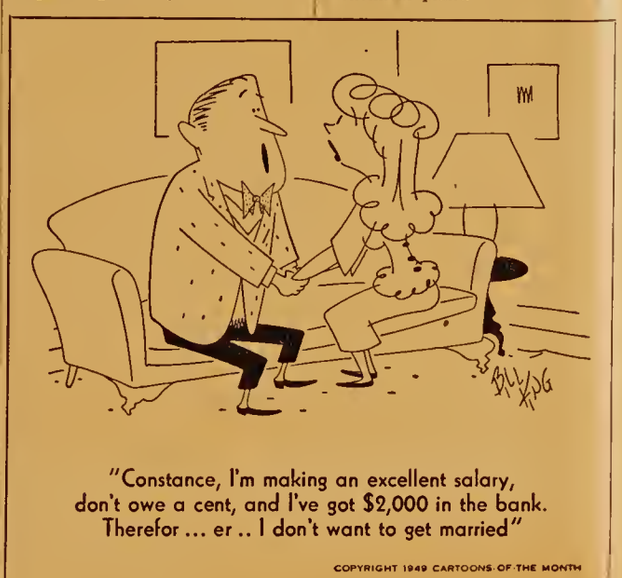
What can I do as a parent to reduce the chances of my child's contracting polio?

Make sure your child avoids excessive fatigue and chilling.

Encourage good personal hygiene, including handwashing with soap and water before handling food or drink.

Protect your child from unnecessary contacts with persons other than their usual associates.

Put your child to bed immediately if fever, sorethroat, upset stomach or headache appear and call your family physician at once.



Should my child be allowed to go swimming?

There is no objection to swimming in non-epidemic areas provided the pool, lake or creek is free of pollution. Avoidance of fatigue and chilling is important. Crowding should be minimized.

In epidemic areas, children under 18 should be discouraged from swimming.

What about picnics, reunions and other public gatherings?

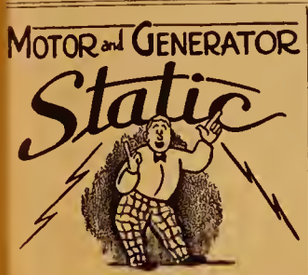
Talk it over with your local health officer. He knows fully the situation in your community; he is aware of the problem in the entire state through his relationship with the State Board of Health; and his medical training and experience well qualify him to answer your questions in the light of present knowledge concerning poliomyelitis. He also merits your full support and cooperation in his efforts to do everything possible to protect you and the other people of the community and state.

"Constance, I'm making an excellent salary, don't owe a cent, and I've got $2,000 in the bank. Therefor ... er .. I don't want to get married"

COPYRIGHT 1949 CARTOONS-OF-THE MONTH

Fort Wayne, Decatur Elect New G-E Club Officers

New Officers have been elected to both the Fort Wayne and Decatur G-E Clubs. They are shown, above, at their first meetings following the plant-wide elections.



In the picture at the left are Fort Wayne's newly-elected officers:

Seated (l. to r.)—Sue Siedel, second vice-president; Harold Carter, president, and Dick Kent, secretary. Standing (l. to r.)—G. R. Lindemuth, director, and Carl Reynolds, first vice-president.

Officers and directors of the Decatur G-E Club include:

Seated (l. to r.)—Irene Holthouse, treasurer; Barbara Roop, secretary; Fred Brokaw, president; Leo Hackman, director, and E. W. Lankenau, director. Standing (l. to r.)—Bill Kohls, director; Charles Cook, vice-president; Mina Lampe, director, and Carl Smith, director.

The balloting at the Fort Wayne plants was held Monday and Tuesday, Aug. 29-30, while the Decatur election was conducted during the week of July 25 to 27.

"A man who wouldn't be trusted to lead a mule can leap into an automobile and take over 100 horses."

ODDS AND ENDS: The man who gives in when he is wrong is wise: the man who gives in when he is right is married. . . . A woman spends the early part of her life looking for a husband and the latter part wondering where he is. . . . PIGS IS PIGS: You can always expect the unexpected when Roscoe Markley is involved in any activity. The other day Roscoe was out looking over the hogs which constitute his pride and joy and decided that he wanted to move them to another location. Most of Mr. Markley's hogs are well trained and obey like children, but one porker decided she wanted to be like the mean little kid and refuse to move. Mr. Markley coaxed and begged, did everything but get down on his knees and sing "Mammy," but the contrary critter just stayed put. Finally Roscoe's temper took over and he let go with a well aimed kick at the offending hog. True to form the critter picked that time to move and when his foot reached the spot where she was supposed to be, she wasn't. However, there was a fence post just beyond the spot vacated and Mr. Markley's foot came in contact with it, fracturing his big toe. . . . FISH STORY: The other day Jim Stouder came over to our desk and asked if we heard about the fellow catching a 180 lb. trout. He claimed that some of the fellows went fishing and one hooked this trout, Mike Trott, that is. In fact they hooked him in the head and had to visit the doctor to have Mike unhooked. This was the worst fish story we ever heard. . . . IT PAYS: Jack Hively reports that after the story of his adventures with his two horses appeared in the WORKS NEWS, a man came out to see the person who could train animals to do tricks. After looking at Jack the man bought one of the horses. So you see it pays to get your name in this column. . . . FALLING DOWN: Alex Makraes, vice-president of Ed Foley's American Greeks', is now the proud possessor of a "Junior G-Man" badge. However, his fellow Greeks feel that Alex is falling down on the job, as Tony Deck's five and ten store was robbed without our "Junior" officer knowing anything about it. . . . NOTHING TO CHANCE: Since this column reported that "Big John," president of the "Greeks," went to Toledo and lost his shirt, he is leaving nothing to chance. On the last trip he mailed his shirt home and it arrived two days before he did. . . Your Roving Reporter.

A writer says that women who think no man is good enough for them are probably right. And likely left, too!

Information Clinic

QUESTION:

Could employees accumulate the third week of vacation for any number of years?

ANSWER:

It is presumed that this inquiry refers to the possibility of deferring the third week of vacation, to which employees with 20 years of service are entitled, for a number of years permitting an extended vacation at their discretion.

Under certain conditions, it is possible for employees to arrange for the deferring of a portion of a vacation to the following year. Such special consideration is given to permit employees to make extended trips to visit distant relatives and meet other family obligations not otherwise permitted by the ordinary two-week vacation period. Each case must be considered on its own merits and the Pension Board has delegated certain authority to the managers of the various Company activities in handling matters of this nature. It is very unlikely that the deferring of portions of vacation over a period of years would be permitted.

Dick Schnitz is the proud father of a baby boy, results, cigars Aug. 25. . . . Buford Dull believes in a "quickie bath" at Hotel Leland with his shoes on. . . . Leo Hackman recently posed for the "birdie." . . . Kent Geisler is all smiles as he passes cigars on his baby girl—The first addition. Reggie Geisler of Bldg. 2 and Bessie Geisler of Div. 7-51 are the proud grandparents. . . . Ezra Brandyberry will teach anyone the Indian dance. Please rush as it's good. . . . Daily greetings to Aldine Luginbill, Ruth McCristy, Miriam Meyers, Helen Byer, and Dwight Little. . . . Have you noticed Wilma Ross's new hair-do? Quite becoming, huh? . . . Agnes Nesswald reports a nice vacation in and around Chicago. . . . Evelyn Plasterer spent Saturday, Aug. 27 in Milwaukee, but lost her way this side of South Bend. I think Evelyn needs a compass. . . . Curlie Reynolds and Harriet Pollock have been transfered to 7-51 from 7-50. . . . We all hope for a speedy recovery for the mother of Effie McGill who recently was in an accident. . . . Eileen Reed was seen enjoying a coke with a friend. Eileen said hello to all her G-E coworkers. . . . My, my, Henry Krueckeberg, and you only bad that new Pontiac one week. Who did you say was driving it—son Bob? . . . By the looks of things everyone—almost everyone at least—is getting a new car. Yep, that's Tom Haubold you see in that Hudson. . . . We are happy to report that Lohnas McIntosh's son and also Ray Johnston's two boys were brought home from the hospital. . . . And there was the day Frank Braun saw Barb Roop coming from the stationery room doing quite a dance step. At least he thought it was a dance—but it was all caused by a tiny little mouse. . . . Gurgle, gurgle—blurrp—the new pop machine sure is a refreshing gadget. Have you folks tried the soft drinks yet? . . . McDonald, Assembly Line, has been bragging to the boys about the present his wife gave him. What was it, Mac, a new rifle for squirrel hunting? . . . The Flange Section had one absentee this week. Betty Reichert was sick for a day. . . . On second trick we see Waymon Patrick operating the Reynolds machine. He seems to be an expert in maneuvering the controls. . . . Our blonde, Evohn Snider, returned to her job in the switch section. Sure glad to see you back. . . . We gathered a little extra late news concerning vacation. Figly and Earl Mounsey had a time at the Landeck Car Race in Ohio. Did the cars make all those curves, boys? Kokomo Joe, Wilbur Suman, and daughter spent several days fishing in Northern Michigan. . . . Among our midst there are quite a few new employees. Merle Riley back on Flanges, Forest Roop, who is helping in the flange section. Girls, just overlook Forest's bashfulness, he's really a nice country boy. . . . Our former newsman is also back. This time on tbe mechanical press. Bob Shoup how about news for the WORKS NEWS? . . . Let us not forget. Dick Myers, of the Assembly Section, had a birthday a week ago. We hated to miss mentioning it, but Dick, we finally got to it. Happy birtbday to you, Dear Dick. . . . When it comes to mathematical figures see Buckley on solving your Einstein problems. . . . The other day Carl Bucher asked a couple friends over to hunt for a fox. So Forest Kenworthy and Ambrose Gase accepted the invitation. They were hunting for quite sometime when suddenly Carl and Ambrose heard a big crash and a bang. They looked around and saw Forest on the ground. Forest said, "I shot a fox and it sure was a big one." Of course, Carl and Ambrose didn't believe it so they looked around and saw some blood by a hollow tree but no fox. So they decided to cut the tree down to get the fox, after so doing, they still couldn't reach the fox so there was just one thing left to do and that was split the tree open. All the time they were doing this Forest kept saying it was the biggest fox he had ever seen. When they finally got the tree split open—lo and behold to the three's disappointment it wasn't a fox just an overgrown groundhog.

The results you get out of doing things with your hands seem better when you also use your heart and soul.

Seven G-E Men Are Instructors At Purdue Center

Seven men from the General Electric Company are instructing courses at the Purdue University Center during the evening sessions of the 1949-50 school year. Fall term classes started yesterday and will close on Dec. 7.

A course on industrial safety is being taught by William J. Hockett, the only member of the G-E group who is now retired. Mr. Hockett started with the Company July 1, 1909, and went on retirement in June last year. A graduate of Purdue University with a bachelor of science degree in electrical engineering, Mr. Hockett has served General Electric as Engineer of the Switchgear division, Engineer of Control Service, instructor in the Apprentice School, Supervisor of Personnel, Supervisor of Safety and Employees' Activities, and was General Chairman of MBA before his retirement.

Teaching Two Courses

Keith E. Ross, Bldg. 4-6 in the FHP Motor Quality Control section, is the instructor of two courses in quality control by statistical methods.

An instructor of similar courses at Purdue last year, Mr. Ross has had more than 10 years of experience in the development and use of statistical techniques. He is a graduate of the General Electric apprentice course and holds a bachelor of science degree from Manchester College. He started with the Company Dec. 20, 1927.

An honorary member of the Society for Quality Control, Mr. Ross is a charter member of the Northeastern chapter, as well as a founding member and director of the American Society for Quality Control.

Offers Trigonometry Course

A course in trigonometry is being offered by Lew Z. Gossman, design engineer in the FHP Motor divisions. Mr. Gossman started with General Electric in 1926 as a student engineer and is a graduate of Purdue University.

Raymond L. Hupp, design engineer in the FHP Motor division, Bldg. 4-6, is teaching a course on A.C. machinery.

A graduate of the University of Illinois, Mr. Hupp started with the Company in 1927 as a student engineer. He was an instructor in the Apprentice School the same year and later was an electrical tester in Bldg. 17-4; engineer in Bldgs. 18-4 and 17-3; and Supervisor of Inspection and Test from 1942 to 1944, when he was named as a design engineer.

Rowe Teaches Sales Methods

Arthur E. Rowe, Assistant Manager of the Ballast Sales division, Specialty Transformer and Ballast divisions, is offering a course in technical sales.

A graduate of Indiana University, Mr. Rowe received his A.B. in industrial psychology. He also graduated from the Graduate School of Business at Harvard University during his service in the Navy. He left the Navy in 1946 and came to General Electric as a sales engineer.

New Course Is Announced

A new course, fundamentals in industrial accounting, is being taught by Robert O. Brown. Supervisor of Accounting in the Parts Sales and Product Service division for the Air Conditioning Department, Mr. Brown started with G-E June 1, 1948. He graduated from Del'auw University and has 12 years of industrial accounting experience and three years of certified public accounting practice.

The course, physics-mechanics, is being offered by Richard E. Seely. A design engineer in the FHP Motor divisions, Mr. Seely has been with the Company since Feb. 12, 1942. Although he was a stockkeeper here in June, 1937, he left to finish school. A process engineer before returning to G-E, he has his bachelor of science degree in electrical engineering from Purdue University. Mr. Seely also attended Indiana University two years.

Who can remember when you used to be able to tell if the motor was running by watching the tail light shake?

Henry Stegmann Retires

Henry Stegmann, FHP Motor Div. 14 at Taylor St., was honored last week before he retired. Mr. Stegmann has worked for General Electric since 1921. In the picture are: (l. to r.) Jesse Devaux, Joe Roebuck, Les Green, Emil Bertsch, Russell Johnson, Earl Strong, William Kaiser, William Alton, Mr. Stegmann, John Heine, Harold Blauvelt, Joe Monahan, and Ray Bobay.

Contact Girls Conduct Drive For Elex Members

The Elex 1949 membership drive is underway and will end next Friday, Sept. 16. Contact girls are seeing all G-E girls and asking them to join the club.

Dues, as in the past, are $2. Following the end of the drive, membership will remain open until Oct. 1. After that date, membership will close for the rest of the year, except for new employees. This decision was voted on at the conference last year.

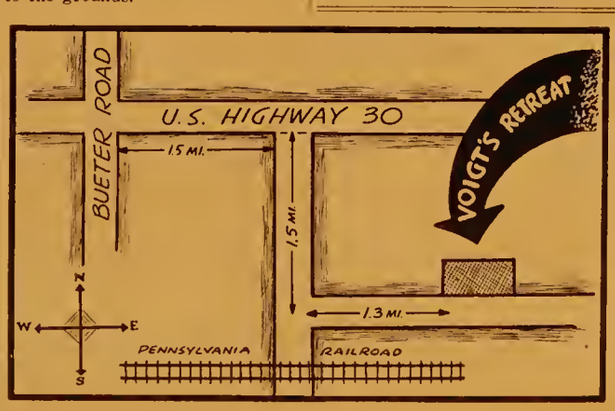
Elex Club To Sponsor Trip To Chicago's Railroad Fair

Elex Club will sponsor its first trip of the season Saturday, Sept. 24, to Chicago. The main feature of the excursion will be the Railroad Fair and its pageant, "Wheels are Rolling."

Train time is 7 a.m. at the Nickel Plate station. The group will arrive in Chicago at 10:10 a.m. The girls will then have free time until 7 p.m., when they will meet to attend the pageant. The group will return to Fort Wayne at 11 p.m., arriving here at 2:10 a.m. Sunday.

The cost of the trip is $9 for members and $10 for non-Elex members. This price includes train fare, transportation to the fair grounds, admission to the fair, and a reserved seat at the pageant.

Reservations can be made now at Irene Meyers' office in Bldg. 8-2, or Evelyn Blakley's office at Taylor St. The deadline for reservations is Wednesday, Sept. 21.



A 100-year-old Tennessee woman has used the telephone only once. My gosh, when is she going to hang up?

FOREMEN'S ASSOCIATION TO HOLD ANNUAL PICNIC AT VOIGT'S RETREAT

The Foremen's Association will hold its annual picnic Saturday, Sept. 17, at Voigt's Retreat, east of the city.

Starting at 1 p.m., the picnic and outing will feature outdoor games and a special program. Ernie Hanauer, G-E Fire Chief, will give a demonstration of fire extinguishing techniques, and Custer Dunifon will present his dog obedience show.

The picnic grounds have been improved and now afford a greater variety of sports facilities. Games will include horseshoes, volleyball, softball, basketball, and cards. Below is a map showing a direct route to the grounds.

Committee Completes

(Continued from Page 1)

meal at another location on the grounds.

As the processions wind through the meal lines, everyone will be given either cigars, cigarettes or chewing gum. All will receive a special souvenir of the event.

Sports Planned For Morning

Sports events will provide the entertainment during the morning. Games will include softball, horseshoes, shuffleboard, and cards. Both motor and row boat facilities are being made available.

A refreshment stand will provide free candy and soft drinks throughout the day.

The annual business meeting and variety show will take place at 2 p.m. in the outdoor amphitheater. The show will feature Vic Perry, famous entertainer from the Paramount Attractions Agency in Chicago; the Nobel-aires, an outstanding barbershop quartet from Kendallville; Mrs. Mildred Germanson and Robert Cocherille, noted duet accompanied by Mrs. Jack Wainwright, and several other novelty acts. Ten G-E toasters will be presented as attendance prizes during the program.

TOP FLOOR TOPICS BLDG. 26-5

by WALT POHLER

Most vacations are over now and everyone is looking forward to an active winter season. At least these last several days make us realize how close winter actually is and also how fast time flies. . . . Ray Feller is taking his third week of vacation this week. His hardy laugh has been missed. . . . The Golf League is progressing with a lot of enthusiasm. The winners this week are Anderberg and Gnau tied for first place with net scores of 38. Hanson and Mills tied for third with scores of 41. Anderberg furnished some excitement by breaking his club on his cart. Our recruits are making considerable progress and are giving the old heads considerable trouble. . . . Last week the personnel of our floor presented Mrs. Rapp with several nice wedding presents which included an electric mantel clock and a twin waffle iron. . . . We are happy to have back with us several employees who had previously been laid off or transferred. These people are: Edna Chiddister, Evelyn Miller, Grace Hoon, Anita Slusher, Betty Niedermeyer, Lillian Krudop, Berniece Johnson, Rae Carnahan, Chloa Weitzman, Alma Darnell and Joneal Gunkel. . . . Mrs. Gunkel is the proud mother of a fine baby girl. . . . We are also happy to report that Dorotha Gaff has returned to work after being off with an injury.

Divot Diggers

Members of the Bldg. 26-5 Divot Diggers' golf league paused in their play long enough to pose for the above picture. They maintain that while they may not be the best golfers in the world, they have a lot of fun. Standing (l to r.) are: Orval Langohr, Courtland Anderberg, Carl Hansen, "Nifty" Hurst, Howard Shipman, Dick Pierce, Bill Mills, Jack Lea, and Walt Mertz. Kneeling are: Francis Gnau, Walt Pohler, and Howard Winters.

Meetings Are Held

(Continued from Page 1)

ployment, and greater security for all.

In keeping with the spirit of the occasion, representatives of management met with staff, supervisory, and engineering personnel to review established programs and consider wherein these programs could be improved and their goals—many of which are of Mr. Wilson's own creation—more readily realized.

As a result of these meetings, it was decided that for the next four months a greater effort than ever will be turned toward achieving the purposes of the following programs:

(1) **Revitalization of the 9 Point Job Improvement Program with special emphasis on creating even better human relations among all people in all divisions.**

(2) **Elimination of waste.**

(3) **Keeping first shipping promises.**

(4) **Safety.**

(5) **New product development.**

Since the Friday meetings, all section and divisional personnel are being informed of the various steps that will be followed in attaining the desired goals. Enthusiastic cooperation is being urged of everyone because of the benefits that each will enjoy through the successful achicving of the objectives of the various programs.

In tune with the general Apparatus Department plans to make General Electric an increasingly better Company, M. E. Lord, Fractional Horsepower Motor Divisions' Manager, stated that this objective has long been a matter of continuous study.

However, he said, special attention will be given to this effort throughout the balance of the year, particularly from the standpoint of getting more orders and improving customer relations. These objectives, he said, can be achieved only by being competitive or better in present market conditions which demand more economical prices and faster service to the customer.

Such programs as Mr. Lord referred to are those which would reduce waste of materials, shorten shipping schedules, improve safety records, reduce red tape and paper work, and a special sales program now being conducted in all Apparatus Department sales offices to get more orders.

Voicing his confidence in the success of those programs, Mr. Lord stated that the Fractional Horsepower Motor business should show all around improvement for the balance of 1949.

W. C. Wichman, Manager of the Specialty Transformer and Ballast divisions, stated:

"Too often and too easily we forget that the greatness of a country or the success of a business on which we depend for our happiness and livelihood is the personal responsibility of each of us. Many of the programs at General Electric, created for our benefit, can very easily become neglected and fail of their good purposes because we expect somebody else to make them produce. There is no better time than the present to take a greater personal interest in doing better those things that we know must be done if the business on which our jobs depend is to continue to succeed. None of us care to be associated with an unsuccessful enterprise."

In his talk at "Kick-off" meetings, J. M. Crawford, Manager of the Large Motor and Generator divisions, stated:

"With the changing aspects of the times and their effect on our business, it is opportune to consider with renewed vigor, all those things which permit us to manufacture a quality product, at a price that is attractive to our customers, within the time he requires and with satisfaction to the employees and the Company.

"To this end, the management of Large Motor and Generator are directing their efforts. It is sincerely believed that with the cooperative and enthusiastic support of all of the employees in the division, much progress can be made."

C. H. Matson, Manager of the Fort Wayne Contributing and Works Service divisions, stated:

"We can best pay tribute to Mr. Wilson on this occasion through the dedicating of ourselves to the redoubling of our efforts for the next four months to the improving of established programs and the achieving of those goals considered essential to the happiness of our people and the continued growth of our business—without the enthusiastic participation of everyone, no single phase of our program can be achieved."

Weldy Receives Gift At Retirement

When Elmer Weldy, Bldg. 17-1, left for retirement, his friends and co-workers presented their best wishes to him along with a gift of luggage. He has worked for the Company 28 years. Left to right are: Orville Haver, Ruby McBride, Francis Bennett, John Miles, Norbert Meyers, Herbert Kellermeier, W. H. Franke, FHP Motor Div. 19 and 20 Supt.; Jim Geistwhite, Mr. Weldy, Clayton Schultz, Joe Schible, Raymond Rodenbeck, William Knuth, Neil Allen, Foreman; Pete Schible, Harce Harmon, and Ted Brockmeyer.

One of our lathe men is really an authority on baseball as well as a fan. We hear that he is going to take up a collection to buy the manager of the Voltmen a present now that they won the semi-pro championship again. We think that this is a very nice gesture. . . . What, we wonder, happened to Carl Beerman the other morning as he came to work late without his lunch. Carl must have a lot of influence at home because his wife brought his lunch to him later that morning. Tell us how you do it, Carl. . . . Steward Boer is happy these days and we just found out the reason. His son is getting married soon, and Steward says that he always did want a daughter in the family. . . . Russell Sage and the Mrs. were on their way home the other night when things began to light up back of Russell's car. He thought someone was taking his picture, so he put on a big smile, hut closer observation showed the light coming from a meteor which fell close to his home. No damage done. . . . Guy Wagner told his grandson he'd pay one penny a piece for crickets for his Labor Day fishing trip. Wednesday evening Guy arrived home from work to find his grandson and 10 neighbor kids gathered in his garage awaiting their pay-off. No, it wasn't as bad as you would imagine. They only had a total of 583. . . . Glen Ramsey came out from behind bushes to settle an argument on whether he was Pete the tramp or Farmer Jones. P.S., he's trying to buy Mart Walsh's razor since he found out how good it cuts. . . . Lloyd Welbaum is reconditioning his Nash for the trip to New York to meet his daughter arriving home from an extended tour of Europe. . . . Why did Art Dicke's granddaughter make fun of him the other evening at Elmer Sauerwein's house? . . . Al Stecker is mighty proud of his new Ford 6. He will give you a ride by appointment and a 50-cent cover charge. . . . Our harmonica virtuoso Paul Brinkroeger didn't mind it when "Pestbrook Wegler" called his ideal harmonica player, Larry Adler, a communist, but when he said his playing sounded like a person with asthma, that was when Paul demanded "Wegler" to be ousted from the Republican Party. . . . Joe Mettler almost didn't go camping over Labor Day with Carl Moser until at the last minute Carl consented to do all the cooking and dishwashing.

C. L. Pope To Address Lubrication Engineers At Meeting Thursday

The Fort Wayne Works of the General Electric Company will be host to the members and guests of the American Society of Lubrication Engineers at a dinner meeting Thursday evening, Sept. 15, at the Broadway plant, Bldg. 16-2.

C. L. Pope will be the speaker. He is one of the best known authorities on lubricants and lubrication in the United States. His subject will be, "What Lubrication Means to Management."

Mr. Pope is Chief Lubrication Engineer and head of maintenance of the Eastman Kodak Company at Rochester, N. Y. He has served in this capacity for the past 25 years. He is a Cornell graduate of 1926, and served apprenticeship at Wright Aeronautical. He has his masters degree in mechanics, and is president of the American Society of Lubrication Engineers and first chairman of Lubrication Co-ordinating Committee of the American Society of Test Materials. He is also a member of the American Society of Mechanical Engineers, Rochester Engineering Society, and Cornell Club of Engineers.

J. W. Bucker, Plant Engineering in Bldg. 20-2, is vice president of the local chapter of ASLE.

Beverforden Dies

Clarence Beverforden, 65, died at 9:30 p.m. Wednesday at his home, 4701 S. Lafayette St. He began working for G-E in 1916 as a punch and die setter and later as a machine hand in Bldg. 4-1. Mr. Beverforden left the Company because of illness in 1925.

Tales from Taylor

by Harry Porter

As you all know George Cowan is building a cottage at Lake Gilead just over the line in Michigan. Last Saturday and Sunday he invited several of the boys up to help him put the shingles in place. We learn that George instead of doing some of the work himself, stood in the shade of some trees while the rest of the gang braved the hot sun and completed the roof. He gave as his excuse that he never was much good with a hammer, having to use both hands to pound in a nail; and trying to put nails in place on a roof was just out of the question. . . . It is with deep regret that we bid our old friend Wilbur Boltz goodby as he departs for the Broadway plant. We will surely miss his shining pate, radiant smile and lastly those elegant flashy neckties that he wore. He seemed to have an abundant supply of those cravats. Evidently he received a bale of them last Christmas. . . . Paul Gensel has come forth with a brand new Ford. He has been driving one of the light models for years and is just a little afraid of this larger and speedier model. We have been wondering about Paul for years, as he has always been a confirmed bachelor and never did seem to care about the looks of the car he drove. Now that he has blossomed forth with a brand new job, all of us are wondering if there might be a possibility of him doing a little angling for a mate. . . . Joe Turley attended a women's wrestling match one evening last week. So enthused was he over the show that he had to tell mama all about it when he arrived home. A few days later he reported for work with a smoked lamp. All of us are wondering if he and his wife might have been practicing some new holds with the result that one of Joe's eyes became blackened. He tells us that his wife is very much interested in the sport and that he had to promise to take her to the next bouts.

Medical Memos.....

by Mary Heyman

Has the variety of styles and designs of nurses' caps ever puzzled you? Recently I read an article on the subject. To a nurse, her cap is a symbol of her profession, and a "trademark" of her school. Many years ago women wore caps indoors. Some authorities believe that the nurses' cap is a descendant from the headdresses worn by nursing nuns. But to be more practical, it was a tedious business to wash hair in the olden days, so keeping the hair covered while caring for patients was a hygienic measure. A typical dust cap was most often worn and soon there were more attractive types of caps. The fact that each school desires a distinctive cap has resulted in many different styles. Pleats, ruffles, tucks, frills, creases and stitching all help to make each cap unique. Using materials, like organdy, voile, broadcloth, linen and muslin also adds variety. They are constructed in many styles such as Dutch caps, pointed caps, and some have black bands. Nurses' caps are cherished by their owners, admired by friends and respected by the public. A nurse's cap is a distinctive feature of a nurse's uniform and a traditional symbol of an honorable profession. . . . Now that Labor Day is over we can begin thinking about winter and some of its activities. Plans are under way for having a bowling team in the Ladies' Owl League. . . . Mr. and Mrs. Lawrence Mulvane spent the long week-end in Illinois. Your author was the guest of friends in Canton, Ohio. The Plymouth complete with seatcovers provided transportation. . . . Veda Orff recently underwent surgery at the St. Joseph Hospital. The entire group is pulling for you, Veda. . . . Florence Martin is working second trick at Taylor St. Alta Mayle is replacing Olive Walters on days. Hope you enjoyed your extra vacation week, Olive. . . . Lyle Rupert has been watching the daily pollen count. She is one of the many who will welcome the first frost. . . . Just wondering: If golf is rated as the fourth most dangerous sport. There certainly wasn't much havoc caused by my last game. . . . Wouldn't this be ideal weather for a wiener and corn roast? . . . If there ever could be a substitute for a county fair.

Two Editors To Sleuth For News In Bldg. 4-6

Two new Division Editors, Gil Baker and Walt Gerke, have taken over the writing of "Sleuthing in Bldg. 4-6." They replace Joan Poos, who soon leaves G-E to be married.

Gil came to General Electric in June, 1946, as a helper in Bldg. 19-5. He later transferred to Bldg. 4-6, where he is now doing drafting work in the DC section. Beginning his G-E career in 1946, Walt has been in FHP Motor AC drafting since that time.

Both fellows are interested in sports. Gil prefers basketball and football, while Walt's favorites include hunting, fishing, and bowling. They both have photography as a hobby.

Thisa and Thata "Specialty Motor"

by Helen Engle

This is NEWS—Ted (Skin-head) Bain is driving a new car. It may sound like a Buick but it still is a Nash. Ted was driving down the street the other day when someone yelled at him to put out his lights. The lights were not on, he just had his hat off! . . . Louie Barrow and Hank Shirley went fishing out to Cedar Creek, but when they got there they found out that they had forgotten the worms. Our advice is that you leave the "bottle" at home and take the worms—you can catch more fish that way! . . . Our friend Ross Strodel is going out to the Taylor St. Plant. Hope you like it out there, Ross! . . . Congratulations to Vera Fetro who had her picture taken the other day. She completed 30 years with the Company. . . . It is too bad that Frieda Knoche's birthday is over but then Christmas is coming, maybe then she will get a supply of hankies. . . . Harry Meyers can't understand that when your big toe goes through your sock that when you put it on the other foot the big toe sticks out there too. Someone else explain it to him, I can't. . . . Birthday greetings to Tom Dickerson and Hazel Herron. . . . Asthma is driving Emery and Eva Tucker to the tall timbers, hope you feel much better when you get back! . . . Congratulations to "Red" and Bertha Markley who are the proud parents of a baby girl. Both were former co-workers. . . . They tell me that Marie Griffin is going into a new business. She is planning to wrap a towel around her head and gaze into a crystal-ball! . . . You should hear Gilbert Walker sing "The Freckles song." He does it better when he has someone to play the piano for him! . . . Attention: Ralph Gilbert and Florian Korte, Tommy's beach will be open all winter! . . . Harry Hedglin, how does it go to be on days. Can you see better after dark or do you like the daylight just as well? . . . Wendell Heckley says he likes to test SMY motors the best, guess he likes his chair. . . . Pondo is still looking for that job as a singer! Won't someone please give the poor boy a break? He really is OK! . . . We never hear Carl Harmon talking about his dog. Wonder if he traded it in for the car? . . . Lester Hubbart dashes in here just about seven every morning. He gets up in the middle of the night but by the time he kisses his wife and all the children good-bye he's really almost late. They say he doesn't speak when he is in his car, guess he has to watch the road. . . . Johnny Ormiston was seen frantically picking up some things in the stock room the other day. He was down on his hands and knees. At first we thought that his money belt broke but it was only some little doo-dads for some motors! . . . It's nice to win things, but Art Bobay's wife would like to know what it is she won. Maybe she'll find out in time for the income tax collector, Art! . . . Ervin Zollinger, Jr., certainly is a serious quiet little man since he became a father. I believe he worries about having to wash out all those little unmentionables. Don't worry, Erv, the boy will soon grow up and help you. . . . Florence Rekeweg and her husband are going to spend the week-end at Knapp Lake. They love to fish but the fish never bite on Sundays and holidays. . . . Clarice Woodruff will soon be leaving for California. . . . Joan Brawn was up to see us the other day and so was Hazel Dilworth. Both looked swell! . . . The "Welcome Mat" is out to Walt Dreyer who has returned to Division 1. . . . Al Flory was given a billfold with some money in it when he retired, hope you get yourself something that you will always remember us by. We hope you enjoy yourself to your heart's content!

No Fish Story

These fish were just part of the ones Gurney Lindley (right), and his companion from Kokomo, made sure didn't get away. The catch was made during vacation at Loke Manitou.

Flory Is Honored At Retirement

Albert Flory, Bldg. 4-3, left last week for retirement. On his last day, his co-workers in FHP Div. 1 gathered to say so-long and give him a gift. Mr. Flory is shown on the platform with O. J. Mettler, Div. 1 Supt., while his friends are looking on.

W. F. Meyers Dies

William F. Meyers, 78, died at 9:30 a.m. Sunday in the Lutheran hospital after an illness of two years. He was an employee of General Electric from 1912 to 1932, when he retired.

Mr. Meyers was a charter member of the Independent Order of Red Men, a member of the Minnewa Council No. 67, Degree of Pocahontas, and the Macabee Lodge.

Survivors include one daughter, Irene Meyers, Bldg. 8-2; five brothers, George, of St. Joseph; Charles of Detroit; Alver and Otto H., of Pasadena, Calif., and Henry, of Omaha, Neb., and three sisters, Mrs. William Dedolph, Mrs. Henry Streittmantter, and Mrs. Catherine Merriman, all of Detroit.

Services were held Wednesday at 10:30 a.m. in the Tom Mungovan funeral home, the Rev. W. J. Kermott officiating. Burial was in the New Haven IOOF Cemetery.

When Ray Kierspe still owned that old junker we used to see his better half drive it back and forth to the grocery, but now since he's got a brand new Nash who toddles along and does the driving, yes, it's 5x5 himself. May we suggest to his better half that she take advantage of the time he's out of town to disconnect the speedometer and drive it for all it's worth. . . . If you would like your necktie tied like those three cornered affairs, Herb Thompson will be glad to accommodate. . . . We have finally found out why Clarence Coulter is so mean and hard to get along with at times. He's being fed raw meat. It seems that one day last week he had raw meat in his sandwiches, which naturally someone forgot to cook. In order to stay out of trouble we will not mention names. . . . Boys and girls, it's school time again. Some of you are happy and anxious to get back others are not. Take it from us who have gone through those years that your school days are among the happiest days in your life, so give it everything you got. You will really need a good education in your later years; it's becoming more and more so every day. While you have to put in the time anyway get out of it all you possibly can. You will never be sorry and you will find out some day we were right. A good education is something that no one can take from you. Happy School Days, Kids.

Insulation News

We hope that all the good standing members of the Quarter Century Club are busy toning those muscles for the annual outing. With all those strenuous activities taking place, we're a bit afraid that the absentee list will hit an all time high on Monday following, what with the achin' backs, etc. We also hope that someone will surprise us as Lawrence Gardt did last year and come home with a big prize. . . . Everytime we have a thunder shower (and lately that's every day) we have to calm Bob Martin. Bob is building a new home and he can just see that dream house "Cruising Down the River." . . . I hear tell that the two B's of Bldg. 12-3 (Balsamo and Baumgartner) are scheming again. Dorothy wants Jo to accompany her on a trip to Chicago, but it seems that the popcorn business is simply booming and Jo can't tear herself away. If only the machine were portable, Jo, you could take it along and set up business on the train. Where there's a will there's a way, you know. . . . Poor Ray Fisher! Here I thought he was enjoying a week of rest on his vacation. But my star reporter tells me that he is working as stand-in on the Olsen-Johnson show. Everybody wants to get in the act, ch, Ray?

Prize Pig

Richard Bridge is shown, above, with his Grand Champ Duroc Barrow, which took first prize out of 85 head shown at the Whitley County 4-H Club Fair. Richard is very active in 4-H work. He is the son of Russel Bridge, a machine operator in the Wire Mill.

Mrs. Reddin To Report On Conditions In Japan

Eileen Reddin

Mrs. Vernon Reddin, secretary in Bldg. 6-2, leaves the Company today to join her husband in Osaka, Japan.

She will journey to Seattle, Wash., and will leave from there on Sept. 20 either by boat or, if a transport is available, by plane. Eileen will then make her home at an American-constructed village for the families of soldiers at Miho Air Field.

Her husband is a staff sergeant in the Army Air Force. Before joining the service, Vernon worked in the tool maintenance section of Bldg. 17-1. For the past 14 months, he has been located at the air field near Osaka.

Mrs. Reddin expects to live there for at least a year. Her experiences and a report on the conditions in Japan will be carried in the WORKS NEWS to continue the series of first-hand reports on foreign countries which was started by E. James Battrick. Mr. Battrick, an assembler of master motors in Bldg. 4-5, received a leave of absence from the Company to journey to England several months ago. During his visit with relatives, he traveled throughout England and interviewed persons in all forms of occupations. He then reported their views and his experiences in a series of dispatches mailed to the WORKS NEWS every few weeks before returning to his job Aug. 15.

Applications For Vet's Insurance Dividends Are Made Available

A supply of National Service Life Insurance applications for special dividends are available now to veterans at the Employment office, Bldg. 21, and at Hubert Myers' office, Taylor St.

"Where one goes hereafter depends largely upon what one goes after here."

It certainly is a grand and glorious feeling to see the fellows coming back on their old jobs again. Kenny Johnston and Eddie Hines started back on second shift after several months of "vacation." . . . The rotor inspectors welcome two newcomers, Roxie Miller and Ruth Hines. . . . Ed Meyers was called to Washington, D.C., last week because of serious illness of son Bob. He went down on the Liberty on Monday night and rode all night on return trip on Tuesday and was in for work on time Wednesday morning. At this writing Bob is better. We hope he will be fully recovered soon. . . . Who is this Mary that Ed Bienz is talking about all the time? . . . Herb Langer has been driving for almost a month without an accident. We believe he is deserving of some sort of a medal, but we can't quite decide what kind. . . . It looks like group 16x42 prefers yellow tomatoes to the red variety. The group doesn't know who to thank for the treat so takes this means, hoping that the person who brought them will read of their appreciation. . . . Did you ever try to clean the paint out of a brush with plain ordinary water? Harold Hohman did just that. Ask him for the secret. . . . Mrs. Dave Slater doesn't recommend her method in getting a new wardrobe, but it works. She lost so much weight (almost 50 lbs.) that she can't wear any of her clothes. She is selling all of them and buying new. . . . John Johnson is still trying to learn the game of euchre. At times he seems to have improved but at other times it appears as though all lessons were in vain. . . . Frank Bly, the tool room's new chicken farmer (35 chickens), claims he will be competing with the best of them in the near future. Give him your orders now. . . . "Dutch" Schulke, a former grinder in Bldg. 17-2, paid us a visit last Friday. He has been a resident of San Bernardino, Calif., for the past four and a half years. He is working on his brother-in-law's ranch. . . . We send greetings via this column to Clara Fulmer, who is still confined to her bed after several months' illness. We hope you will soon be better, Clara.

Hope you all enjoyed the holiday week-end. We hear that Jean Smith had a grand time at the YMCA Labor Day Camp at Camp Potawatomi. . . . Ruth Shull journeyed to St. Louis. . . . Cora Polhamus went to Fostoria, Ohio. . . . Ivan Rinehart enjoyed several days at Lake Wawasee. . . . Ed Witte motored to St. Louis to take his charming daughter back to school. . . . Mr. Freeman reported that he took advantage of the opportunity to do a little work around home. . . . Don Campbell visited his folks in Ashland, Ohio. He left the office on the run five minutes before train time. From all reports he made it on time. . . .We were all happy to see our former boss, Ray Zook, who was a welcome visitor while on vacation this week from his duties in Schenectady. . . . Evanell Holman was delighted when her husband bought her a pillow for the car and she is now able to drive with the greatest of ease. . . . Just a reminder to you gals, now is the time to renew your Elex Membership. Don't forget that if you do not join by Sept. 30 your opportunity will be gone for another year. . . . We extend to Irene Meyers our deepest sympathy on the death of her father.

Draftsman Retires After 32 Years

Sherman Stilwell, draftsman in Bldg. 31-2, retired last week after 32 years' service with General Electric. On his last day at work his friends in the Motor and Generator division gave him a going-away gift of luggage. Left to right in the picture are: H. F. Butcher, H. E. Garrett, R. H. Hickman, C. E. Mannan, P. S. Strough, Manager of Engineering; E. E. Lenz, J. A. Meeks, R. A. VanHorn, Supervisor of Drafting; G. A. Lewis, H. L. Kern, Mr. Stilwell, and E. P. McKeeman.

YEA, AUBURNITES. All the guys and gals formerly from Auburn are having a picnic at Sears Pavilion, Sept. 18, starting at 11 a.m. They would like to see about 300 formerly from Auburn attend. Don't forget your table service and, of course, the eats. We'll see you there. . . . Did you shiver over our "squaw" winter last week? Don't get the "longies" out of the moth balls yet. We are still slated for some Indian Summer. . . . When September rolls around, that means joining Elex for the girls. Let's see your name on the roll this year. . . . Does anyone have a slightly used adding machine or a discarded abacus? Walter Kryder is in the market for one. . . . Frances Eckrote has been having her troubles by being transferred. So she put it in rhyme.

Most anytime, most any day
I'm apt to hear my foreman say
"You're transferred."
From two to four, from four to three
Then back to two. Oh, woe is me.
And yet I only smile and say
"I'm glad to have a job, OK."
And then again, I'm on my way
Transferred.

Cute, isn't it? . . . It's "howdy" to all our newcomers on the early bird shift. . . . Sorry Bea Lantz and Rita Zuber left us to return on nights. . . . It's pretty hard to convince Doris Lontz that she can't drive a car backwards. . . . By the way, we finally found out why Mabel Buker likes to ride backwards. She doesn't care so much where she is going, but where she's been is what counts. . . . We hear that Lola McCague is having a well deserved vacation in Arizona. Lola has retired sometime ago. . . . We are sorry to hear that Thelma Oswald's husband is very ill again; also that Mildred Huntine's daughter is in the hospital, and that Genevieve Ayers Cleland's husband is very ill. Genevieve was a former floorlady when we were in Bldg. 17-2. It would be nice to drop her a "cheer up" card. Her address is 2100 University Blvd., Lima, Ohio. . . . Our sincerest sympathy to Marie Alleman in the death of her husband. . . . We are glad to report that Florence Kowal is improving. Hurry back, Blondie. . . . Psst, did you hear about the goose that bit Jerry Snyder? . . . We had a lot of wedding anniversaries this week. Naomi Robinson chalked up the 23rd one; Marcella Lawrence the 19th; Lewie Hoffman, 12th; and Dorothy Johnson and Mabel Buker, their first. Hope you all have many more of them. . . . It's a happy birthday to Josephine Motter and Elvira Diller. . . . Wonder why the main winders are afraid of birthday cards? Surely not old age. . . . It took four bits worth of experience to convince Hershel Case that he must not play with dice. . . . Harold Kiel has a new side line—fixing electric razors. Work not guaranteed. . . . Bill Miller has gone in for barbering too. . . . Leona Hollis locked her keys in her car Wednesday, but lucky for her she had a sister who came seven miles to the rescue! . . . Velma Seibt is going to take a tent along the next time she goes to see the Daisies play. You mean the rain was wet? . . . Hedy Harrison looks real pert after a month in Florida. . . . Toy Haymond, Goldie DeLong and Eva Reiter were up to visit us last week. . . . Jo Ann Kemery has another dog. Hope you have good luck with this one.

Middendorff Enters Retirement

Joe Middendorff, FHP Div. 14 at Taylor St., completed his G-E career last week. He retires with 24 years service. On his last day, a number of his friends joined with their good-byes. Left to right in the picture are: Albert Eichler, Robert Warnement, Lucy Witlock, Harold Baihler, Jerry Carr, Virgil Foland, Russell Johnson, Lester Richter, Victor Jacobs, Darwin Grover, Mr. Middendorff, Paul Burnau, Harold Springer, Walter Holloway, William Shoemaker, Jerry Uhl, and Roy Burris.

Sleuthing IN BLDG. 4-6

By Gil Baker and Walt Gerke

FIRE DEPT.—What is this we hear of Judy Clark wanting to join the fire department? That red suit she wore Thursday was definitely a fire engine red. . . . APARTMENT HUNTING—Bob Zuske of the AC Division has been hunting for an apartment for weeks. Anyone hearing of one may contact him on 379. . . . DEPARTURES—A few of Maxine Lonergan's friends entertained her at lunch last Wednesday. She is taking a month's leave of absence. Mildred McQueen left the Payroll Division last Friday. We will all miss you, Mildred. . . . ANNOUNCEMENTS — Payroll girls honored Frieda DeVaux, who was married during vacation, at a dinner last Friday noon. Frieda was presented with a lovely gift and corsage. . . . SYMPATHY—All the friends and co-workers extend their deepest sympathy to Mr. and Mrs. Dwight Willits on the death of their son, Steven, who died at the Lutheran Hospital at 6:45 p.m. Thursday, resulting from an auto accident. . . . SUFFERING—Norm Oetting did just a little suffering Friday noon. He had two teeth filled. We feel for you, Norm. . . . ENTHUSIASM—You can tell that the bowling season is about to start. The office fellows are getting real excited. One more week, fellows. . . . BACK AGAIN—Life in the southeast corner of the DC Division is "back to normalcy" again with the return of R. D. Jones from the Golden West. We should ask him to give us a talk about all the places of interest he visited—how about it! . . . Then too, the "Big Four" — Adolf, Paul, Stape and Toby are all back at it again. Your reporter has come to the conclusion that the absence of anyone of the Big Four (no special one deserves this honor) makes a big difference in the tranquility of the prevailing atmosphere. . . . ADDITIONS—We welcome Eileen Hennen to the AC Division as our new typist. She came here from Bldg. 2-2. . . . NEAR MISS—What's this we hear about Gil Baker dropping a bottle of ink near Mary Smoke and just about getting it all over her. Had you worried for a minute, Gil? . . . LONG WAIT—Last Tuesday Jack Kirlin wrote out two vault slips. He stapled them together and laid them on his desk. Then he picked up the rest of the pad and laid it in the basket. It will be a long time before you get those prints, Jack.

Now that summer is officially over, have you made up your mind to enjoy fall? Those long, golden days of September and October are really worth waiting for. A trip to the Brown County hills within the next two months will repay you for struggling through those miserable wet days called summer. . . . Betty McPherson joined the 50 cent club and now parks on the lot. Seems like that club has a lot of members. . . . Everyone was greeting Ray Solga with "Good Morning, Judge" or "Have a Cigar, Judge?" How come? . . . The cigarette hawking on the floor has almost come to a standstill. Could it be that Jay Hensler finally bought a pack. Oh well, "A penny saved is a penny earned," Jay says. . . . Have you noticed the sparkle in Norb Lose's eyes lately? Could it be that he is awaiting the fishing trip to Northern Michigan like a kid awaits Christmas? . . . The latest addition to that fish trophy we told you about is a pair of glasses on the fish's nose. Are these to help the fish see who is fishing for him or so he can see the hook better? For a real fish, Wilford Fett should see Howard Brooks' proof. . . . If all the folks who admired the ironers in here for test bought one, we would be sure to have a business boom.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dikty

L. P. (Larry) Larenitis was a visitor on our floor last week. He was both surprised and embarrassed when he caught Frank Elder working. Said it never happened when he was Frank's foreman. . . . By the way, Frank Elder's Packard has been renamed. It is no longer "Old Ironsides" but the "Blue Racer." . . . Clayton Dafforn and family enjoyed a trip to California on his vacation. "No motor trouble at all," Clayton reports, "the old Ford took everything in its stride." . . . Joe Adam, one of Charlie McCormick's boys, is off sick. Hope you can get back soon, Joe. . . . Howard Musselman, who along with other Pokagon Park summer habitants is facing mass eviction from his prize camp spot at the Park. He has threatened to take the matter as high as Gov. Schricker, and believe me, Howard is just the lad who'll do it. . . . Leroy Cook has been temporarily chief coach of the St. Joe Athletic Club football team. The sterling qualities of our boy, Leroy, are being recognized. . . . Squirrels, beware! With the opening of the squirrel season, our hunters, Killer Hart, Dead Eye Reed, and Sure Shot Lichtsinn, are bound to decimate the squirrel population of the county. . . . Jerry Stanger says that he enjoyed his three weeks at the lake. Says he caught some fish and added materially to the profits of certain malt beverage workers. . . . We are glad to hear that Charles Hughes has improved and is now at home and would welcome visitors. He wishes in this way to thank his friends for the kindness showed him while he was in the hospital. . . . We are glad to hear that George Ealing has his little girl home from the hospital and that she is recovering from polio. . . . Somewhere along the line, Paul Scotton dropped the name of "Pete" and is now known as "Sunshine" Scotton.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday Noon, September 12, 1949

LOST AND FOUND

LOST—A rosary. Lost between cafeteria, Bldg. 16 and Bldg. 26-2.

FOR SALE

FOUR CHROME CHAIRS—$2.50 each, red trim; baby swing, never used, $2.50. H-57155.

FOUR ROOM COTTAGE—Sealed and furnished at Big Lake, lake front, plenty of shade trees, boat and motor, $1600. H-81107.

LOT—Northeast in Bellair addition, 107x135, cash or contract; 20 gauge shotgun, box shells, $12. H-74081.

DEEP FREEZE — Two compartments, storage compartment, eight cu. ft., reasonable. H-81553.

TWO TIRES AND TUBES—6.50x15, $10. 2412 Fillmore St.

STORKLINE CRIB—With innerspring mattress, waxed birch. H-8653.

BABY BASSINET—Inside plastic cover and mattress, in excellent condition, reasonably priced. A-60523.

1941 V-8 ENGINE—Good condition, very reasonable. A-49404.

HORTON WASHER — Good condition, $10. 3330 Robinwood Dr. or H-67935.

MODEL E ARGOFLEX CAMERA—Like new, Anastigmat f4.5 lens; speeds from 1/10 to 1/200, $50. H-48475.

OIL HEATER—Coal heater; late edition Encyclopedia Britannica; 26 in. boy's bicycle; porch swing; glider; reed stroller, reasonable. A-99555 or 804 Third.

ELECTRIC STOVE—Full size table top, four-burner, oven and storage space, three years old, looks like new. $65. H-44952.

TWO METAL PORCH CHAIRS—$4 each; floor model Philco, $40. H-48112.

BOY'S OR MAN'S BICYCLE—Balloon tired, Schwinn, bell, light, stand and license, good shape, size 26, reasonably priced. E-2635.

MEN'S REGULATION BOWLING BALL—For fairly large hand; also oil drums and baby carriage, reasonable. 3218 Raymond Ave.

TYPEWRITER—Excellent condition, just completely overhauled, reasonable. H-79603 after 5:30 p.m.

FUEL OIL HEATING STOVE—New condition, heats 4-5 rooms. $65. Wade Tyler, Hoagland, Ind.

MAGIC CHEF ¾ GAS STOVE—With or without bottle gas. H-74748.

HAND CROCHETED TABLE CLOTH—7½ ft. x 8½ ft., never used, took three years to make, a bargain. H-91681.

NAVY BUNK BEDS — Complete with mattresses, very clean. 3615 Lafayette St. or H-70322.

BOY'S BICYCLE—Gas stove, high hand; '46 Ford sedan. A-85834.

BOYS' COATS—Covert cloth with leggings, Eaton cap, size 4; brown topcoat, size 4; two wool twill short overcoats size 12-16. A-60182.

DURABLE FIVE PIECE WALNUT BEDROOM SUITE—Make me an offer. E-38901, evenings, Saturday or Sunday.

FOR RENT

ROOM—And private lavatory in modern adult home, close to G-E, for refined gentleman, references. H-37945.

NICELY FURNISHED SLEEPING ROOM TO SHARE WITH GENTLEMAN—Twin beds, innerspring mattress, shower and private entrance, $5.50 per week. 207 W. Dewald or H-83574.

NICELY FURNISHED SLEEPING ROOM—In strictly modern home, quiet surroundings, south side, gentleman preferred. H-2916 before 11:30 a.m. or after 8:30 p.m.

WANTED

CHILD'S TABLE AND CHAIR SET—Small bicycle and other toys. A-75442.

APARTMENT—Three large or four medium rooms, unfurnished, prefer lower, near bus line, prefer downtown, west end for two elderly ladies. H-2915 or E-1629.

THANK YOU NOTES

I WISH IN THIS MANNER TO THANK ALL—Of my General Electric Company friends for their understanding messages and floral offering sent at the time of the death of my husband, Lt. William Tanner. Phyllis Tanner, Bldg. 18-1.

I ACKNOWLEDGE WITH GRATEFUL APPRECIATION—Your kind expression of sympathy. Marie Alleman, Cafeteria.

CORRECTION

THE PHOTOGRAPHS OF EVA CREIGH AND BEA LANTZ—were transposed in last week's WORKS NEWS story about the Elex candidates.

Anyone seeing Frank Fann standing beside a drinking fountain with a bewildered look will be doing him a favor by telling him where he is. He sometimes gets lost. . . . Since Milt Roller moved to the country he has his wife drive him to work. On the way in the last week the car went dead. After a few minutes of fussing and fretting he hailed a ride into town, and called a garage to fix the car. Before the garage service man arrived a passerby stopped and offered his assistance to Mrs. Roller. In a couple of minutes he had found and replaced a loose distributor wire. He charged $2 and Milt still has to pay the unused service man. . . . The "new car" fever is very contagious on the floor. Bob Morris is driving a new Plymouth and Clarence Watson, Herb Laudstoffer and Berniece Lund are driving new Chevrolets. . . . Fred Rathert, Bldg. 4-5 weather man, predicted we would have a cold winter by the "hair on the broom."

The apprentice bowling team is now and always ready for new members. The team will bowl on Tuesday at 8:30 P.M. with the first game scheduled for the evening of September 13. Any interested men see Homer Carson or Don Dimke. . . . "Dan'l Borton" went hunting and shot a persimmon tree out from under a squirrel. . . . The prize trick for this week goes to Joe Rowan. He tested his flash bulbs in a lamp socket. . . . Whitie Fremion made it back from his soldiering activities. He finds it hard to wield a pencil after throwing a rifle around. . . . For "Available Jones" service see Schmidt and Frede. . . . Obringer asks to retract a statement. He said he didn't set the valves on his car with a crow bar. . . . Mark McNulty is all thrilled since his cousin "Knothole" McNulty and his cousin "Nifty" McNulty have made the Abbie and Slats comic strip. . . . Paul Wuttke finally took his vacation. He went to Minneapolis and Mankato over the long week-end. . . . Anyone wanting to sell a row boat should see Harry Ecenbarger. He has heard that the cisco are running at Snow Lake. (It should be interesting to watch a fish run.) . . . Everyone seems to worry about where they are going to get books for the present semester. Look no longer, men. Ron Allen has all the reading and study material necessary to make a dull morning bright. . . . You have heard people talk about working their fingers to the bone—we have an apprentice who actually did—but not at work, Clendenen is building a chimney for his new home. . . . Wagner has acquired Merle Aughinbaugh as a hunting partner and the latest reports are that they each got four squirrels with three shots. (?) Maybe they should start giving lessons to some of the less fortunates. . . . The fish at Goose Lake made a gander of Bill Smith over the week-end. He was on the lake all day with nary a nibble. . . . If Reinking can't shoot squirrels he still makes good use of his time as a marksman. He bagged seven trees and a few bushes. . . . Opinions vary about taking extra studies from different available schools and classes. As a help the column would like to relate the desires of some of its readers. Some apprentices talk about Architecture, Heating and Ventilating, Time and Motion Study, Cost Accounting, Labor and Business, Personnel Relations and any number of studies which will broaden a man and make him a more versatile worker. Remember that the more jobs a man is capable of doing, the more jobs will be available for him. As they use to say in the Naval Training Program "A LITTLE learning is a dangerous thing." . . . Millie was stood up last Friday night. While waiting for her boy friend, he passed her up like a dirty shirt, but things turned out pretty well anyway because two of the handsomest apprentices happened by and offered to take her home.

With very silent thanks to E. H. Martin of West Lynn Works I would like to offer the following—

The Critics

Some people just dote when our columns emote,
In styles of the better romancers;
While others just hrood if we do not include
Some lines on Ecdysiast dancers.
Some critics will carp if our adjectives harp
On virtues of Soxian heroes,
While others will smile at a Gossipy style.
And give other methods their sneer-ohs!
The featherfoot hrain thinks we should entertain
With essays on nuclear fission;
And then there are those who hiuntly propose
The column's eternal omission.
Though all have their say in deciding the way
This column should stay in existence.
This critical group leaves us right in the soup,
When it comes to some conorete assistance!

All of that—just to say the last two lines! . . . So Sorry—to say goodbye to Delores Connin, Bldg. 18-4. She has served so capably as reporter for this column from that floor. Taylor Street, please note, you have a new reporter in your midst. We are happy that Fonda Cook of Bldg. 18-4 who has been assisting Delores will serve as reporter. Your continued cooperation will be appreciated. . . . Last week, Ed Trabel of Bldg. 10-1 and Paul Lenz of Bldg. 6-2 spent the week-end in Chicago attending the Railroad Fair and a double-header game. . . . L. C. Swager was away from his duties part of last week as a victim of influenza. . . . We are sorry to learn that it was necessary for Veda Orff to undergo surgery last Friday. . . . W. E. Holmes is now located in Bldg. 18-2 in the office with Howard Miller. . . . Hazel McDougall has been transferred to Mr. Matson's office. . . . Our congratulations to the new officers of the G-E Club. . . . Carl Brandt has purchased a new gasoline stove for outings. The first time he used it was last Sunday when it rained too much to fish and on Monday it was almost too much to listen to him regal the wonders of cooking on this stove. . . . The Purchasing Division extends a warm welcome to Betty Jane Toole, who comes from the Works Lab in Bldg. 28. . . . Dorothy Long is asking who marks her scratch pad all over and any other papers handy during the night hours.

Congratulations

While we are far away, not only in miles but position, we would like to add our best wishes and congratulations to our Company President, Charles E. Wilson. We can all do our part to help make the 50th Anniversary year of his employment with General Electric, a memorable year in performance.

Congratulations to Hilda Walda, who on July 31 celebrated her 30th anniversary with the G-E. . . . When Paul Monroe was questioned recently about how he lost his thumb, he told his gullible listener that he wore it off shucking corn when he was a mere lad of 14. How can a guy think up such quick and far-fetched answers? . . . It's to be hoped Johnnie Craig and Harry Sebold finally recovered their breath after their quick sprint in the direction of Bldg. 6. . . . Joe Trentadue says he is getting to that mellow age where life is beginning to show its mark. We're quite sure time will be kind to him and he may yet be our "Man of Distinction." . . . Our congratulations to Florence Offerle, who is wearing a new sparkler on her left hand. . . . We express our sympathy to Margie Rall whose father died recently.

A group in General Service had a little bowling tournament last Monday night, Aug. 29 at Bowmans. Members of the winning team were Rosie Thomas, Joan Florstedt, Bernie Kain, Tez Trump and Harold Fanning. During the evening, "Boodles" Bendel had a difficult time keeping track of his shoes. Tez wonders if this could be old age, Boodles. . . . Bob Kelker says he will soon have his basement ready for a shindig. . . . Ernest Bultemeyer returned to work the other day after a long illness. Good to have you back with us, Ernie. . . . We hear that Albert English has trouble with his chickens laying down on the job. . . . It's a standing joke that a plumber will often go to a job and forget his tools, but when he sits down to eat and forgets them, it can be quite embarrassing. Don't you think so, Leo? . . . For expert advice on cement block laying, be sure to ask Ralph Bande the proper way. If he builds the rest of his house as well as he has his basement, it should be a nice place. . . . Herman Bertsch paid us a visit the other day while convalescing after a serious operation. We're anxious to have you back, Herman, so get well quick! . . . It seems like old times to see the bright and shining face of Forest Carr around Standardizing again. Glad you're back, Forest. . . . No, folks, it's not a new hotel being erected on the property of Walter Nitz. It's just that he is building a large chicken house that sure is a beauty. Why not find something to do, Walt, that doesn't take so much work? . . . What does Art Buchwald do with all his obsolete catalogs? Do you live in the country, Buck? . . . What Andy Frank didn't know was that he had a very interested audience. Cheer up, Andy. They all admitted that they didn't learn any new ones from you. Anyway, thanks for going outside the office. We'd hate to see this new paint blistered so soon. . . . Everyone would like to know what Pete Helmer finds so fascinating about this place, that he would spend his vacation here too. Or were you just checking up on things in general, Pete?

Hard luck is what other people bore you talking about.

Inquiring Reporter:

WHAT IS YOUR OPINION OF THE NEW CITY ORDINANCE TO REGULATE AND CONTROL PEDESTRIAN TRAFFIC?

ARNO M. TAYLOR

Bldg. 19-2

"Any law which tends to prevent human injuries is obviously a good law. However, due to buses picking up passengers in the middle of the blocks I would say that there may be some difficulty in the enforcement of this law."

ROBERT E. HOWER

Bldg. 26-3

"A jaywalking ordinance is all right if it is drawn up right. If it is true that just because you step down off of a curb accidentally you get a ticket, then I think that they are running safety in the ground. Besides who is going to tell the postman where he can cross the street, the city or the federal government? And if they make exceptions, to whom do they apply?"

MARGARETHE ARONSON

Taylor St.

"I think the new city ordinance that forbids jaywalking is a very good idea. It will help us to remember safety first and to practice it."

MILLICENT McHENRY

Bldg. 4-5

"The ordinance in itself seems to serve its purpose, but such an ordinance would be unnecessary if thoughtless and careless citizens would stop using themselves to test the brake reaction time of downtown motorists."

DANIEL LUEBKE

Bldg. 18-4

"This ordinance is a desirable traffic regulation for our own protection. Sensible compliance and sensible enforcement should make our community a safer one."

The fish stories that Charlie Penn and Ducky Drake told when they returned from their vacation last month has gotten them into trouble. Last Friday they left for Lake Alice at Tomahawk, Wis., and they took Ralph Keller, Hubert Meyers, Tex Sloan, L. Gale, and Dal Patten with them as they have to prove to these guys that there are really fish up there and plenty of them to be caught yet. Hope we will be able to tell you next week what the outcome was. . . . Louise Sinn has a new nickname. She is now known as "Peaches." It seems that she gets into Doyle Sheets' lunch pail every morning and eats all of his peaches. . . . "Cozy" Walper celebrated her birthday last Friday and passed out candy. She wouldn't say just how old she was, but by the way that she was blushing, it couldn't be too old. . . . Herb Richter says that so far Old Man Hay Fever hasn't caught up with him. . . . Did you see the pictures that Eddie Bandt was showing around last week? If not you must do so by all means, as they were of Ed when he was young and(?) . . . Mel Riley has been wearing out his shoe leather lately as his car decided to take a vacation. . . . Pat Perry is getting ready for cold weather. She has her "longies" on, one arm that is, but she says she puts them on by degrees. . . . Charlie Engle doesn't go on pension until November 1, but he says that as far as he is concerned he is starting as of right now. . . . Ruby Stoops really went places and did things while on her vacation. She traveled a total of 9000 miles. . . . Marguerite Stahl spent last week-end at Colon, Mich., on a fishing trip. . . . Our sympathy to Ed Donaghy in the death of his aunt. . . . It isn't much this week, folks, but it was all of the news that could be gathered, hope it will be better in the future.

Agnes Reinking and Jeanette Kigar attended the Indianapolis state fair last Friday. . . . Lucille Nevills is back to work after suffering an attack of the measles. . . . Orval Smith's wife planned a birthday party in his honor and sent invitations. Well, no one came to the party. A day after, the invitations came back, she had forgotten to put on the addresses. . . . What do you know, Dutch Norwalt's motor still isn't running. . . . We hear Ralph Braden missed the boat again. What's the matter, Ralph, trigger happy? . . . We see Brother Rian eating his dinner with the boss now. . . . Anyone having an old rocker, see Tom Hildebrandt. The older the better. Frankie Schlatter thinks he needs a wheel chair instead. . . . Why is it that Tom Freeman always uses big words when he gets around a crowd. . . . Dick Moore had better get more acquainted with his wife. . . . Sheepherder Keck smiles every time someone looks at him. . . . We hear Al Topp is chasing sheep on the farm too. . . . Sept. 10 is the big day for Opal Runnion. She will say "I do" to Kenneth Wisel. . . . Joe Troendly went to Illinois last weekend in his new Packard. . . . Benny Keller has a cheap hair do. He grows hair like hay, puts a little mash on it and the cows lick it off while he's milking. Which gives him that trim look. . . . Ed Koontz has a new job, and his hay fever is gone now. . . . Ask Harold Rhine to see his baby picture. . . . The boys want to sign Frankie Schlatter up with the Daisies. He wants to make a wager he can throw or run as fast as they can. . . . Bill Fowler flushed all the antifreeze out of his radiator and then noticed the label on the car said, "do not drain." . . . Mel France is watching his P's and Q's lately. . . . Ask Frankie Schlatter what he was doing powdering his nose in the ladies restroom. . . . Roy Hostler, champion flycaster, can throw a fly 75 ft. and hit a bucket two times out of three. . . . Want to ride in a new car? See Joe Troendly. He has just purchased a brand new maroon Packard. Joe says it rides just like a Packard. . . . Farmer Wayne Weimer heard if his hay got wet, it wouldn't be any good. So he's looking for a circus tent to cover over it. . . . Agnes Brunner has left the Company to be a full time housewife in their new home on Pemberton drive. . . . Glad to see Pat Moran back to work since her recent accident.

Rounds Out 30 Years At G-E

Bernard Parent, Bldg. 4-4, recently rounded out 30 years with General Electric. A number of his friends gathered to offer their congratulations on his long-service record. In the picture are: (l. to r.) A. L. Knoll, Ed Robin, Robert Hermely, O. J. Mettler, Supt. of FHP Motor Div. 14; Mardo Tobias, Orville Coleman, Mr. Parent, Gareth Homer, George Prince, W. W. Stocks and Florian Korte.

Mike (Toreador) Brayer, had gone squirrel hunting, and while he was waiting for the little fellows to appear, he suddenly was aware he was being watched. He turned around and much to his amazement there stood a bull. Our friend wound up on top a large pile of wood, pale as a ghost. . . . It seems Louie Botteron is having a little trouble these days. Every time he fills in his back yard his neighbor does likewise. How about you two boys getting together, Louie? . . . Walt Doctor is still looking for a car. . . . How come Elmer Buuck is rolling his own now days? . . . Harold Somers celebrated his fourth birthday last week and treated his fellow employees to an all day sucker. . . . What's this we hear about Katherine Erwin falling for Harold? . . . Walt Niemeyer, here of late has been reading blue prints upside down, and invariably they turn out to be inverted mounting. . . . While Gay Huey was in North Dakota she saw a former employee of our division Margaret

Schooner or Later

Cleon Oyer, FHP Div. 14, at Taylor St., was warned about driving his Buick to California, but he insisted the trip could be made. However, this is how he made his return trip—via prairie schooner.

Magsman. . . . We wish the best of luck to Joseph Mittendorf and Henry Stegmann, who retired Aug. 31. Each was presented with an attractive gift. Come back and see us fellows. . . . We understand the British have taken over the repair section—Walt Niemeyer has a spot of tea each noon. . . . Wish someone would ask Herb Wise about his lost week-end. . . . Elmer Buuck finally had the street in front of his house paved—but much to his surprise he can't park on his side. . . . Must be a steel shortage—Bill Shumaker has a heavy beard again. . . . The boys in assembly almost called Virgil Hammon to assist George Miller in removing a kink in his leg. Must be from sitting down, George. . . . Mike O'Grady and Gus Weisenburger are very much in a dither. Gus's daughter married Mike's wife's brother's child. Now the question is, are Mike and Gus their own grandpas?

A pat on the back often eliminates the need for a kick in the pants.

Herschel Smith, our genial safetyman, deputized me as one of his good will ambassadors in the "Home Stretch" safety campaign and pinned one of his badges on me for the occasion. And it was with a feeling of satisfaction of having accomplished something when everyone came up and read the wording on the badge. Even Bill Johnson said he would make a special effort to keep his fingers out of the washroom windows. As you remember how Bill smashed those fingers. But all joking aside Fractional Horsepower Motors has a very fine record and Division 13 under Mr. Koehlinger is leading the parade. So let's all do our part to make this year the best safety year. . . . Billy Rose in his column of "Pitching Horseshoes" isn't the only horseshoe pitcher for when it comes to tossing those shoes Art Kraft has the G-E Club tossers in the winning mood. They hope to win the bacon as well as the Voltmen at Wichita. . . . Jerry Knight asked Jack Pollock to pick him up on his way to work last week one day. He explained the block of the street he lived on and said he would be sitting on the front porch. Jack claims he drove down the street but was unable to see anyone sitting on the porch. It being a cool morning, Jerry decided to wait inside the house and watch through the window. He did and he would still be watching if it hadn't got so late he thought he had better get to work. Jerry watched a new maroon Chevy go by, but insisted that Jack had an old black one. But if you knew how good Jack was at standing people up on dates you wouldn't think much of it. . . . Twice now Louie Watt has been saved being skunked by the whistle this week. He and his partner Ernie Brown threw in the cards with the score nine to zero and the last deal completed and their opponents having declared the trump. . . . A number of the fellows have traded cars, but only Bill Herring has been guilty of walking all over the parking lot looking for his old car. . . . Bob Hendrickson is on days now in the lathe section. . . . Birthday greetings to Walter Schuler who celebrated his last week and (but I don't know why) to Jack Pollock who celebrated his this week.

4-1 Floorage

By Marie Lantz

Autumn's about to emerge, yet, believe it or not, we'll still see those last days of summer. Here's hoping everyone enjoyed the season's last holiday—with labor lost to loafing. . . . Those ever-famous fish fables still come in. Avery Spayde, who week-ends at Hamilton Lake, is an aspiring bass angler. For some unknown reason he can't seem to get a sizeable catch and has to be content coveting his next-door neighbor's fishing luck. Avery's failure to fish can't be blamed on the locality, as we once thought, since his friend brought in bass, time and again. It has been suggested that Avery have his picture taken holding the other fellow's fish—just to show friends who work here. May we suggest that if Spayde had a nocturnal engagement with a spade, then followed that with break of day fishing, he might attain success. 'Tis said the early bass gets the worm. Or, else, he might take lessons from Big Bass Berdleman, who, it is claimed, caught the only bass in Pretty Lake. Roy has shown us snapshots of his famed 5¼ pounder. We deem it a pity, indeed, that Harris of Fulk's Lake hadn't heard of Berdleman; he might have had his beast of Busco now. . . . Lois Waterson, who is studying to be an organist, takes her music lessons from Mrs. Gaston Baihle. Saturday, August 27, marked a special event for Lois—she played at a wedding at the Huntertown Methodist Church. My Hero and The Lord's Prayer were the musical selections played. . . . Noting his absence, we asked about Bill Tennyson. Told that he was on vacation we still queried. "Singing?" we asked. "Well, he ought to," came the answer. Yes, he should, but Tennyson sometimes sings at square dances. We wonder why that phase of terpsichorean art is so called; seems as if the dancers twirl round and round. If one wonders where the square comes in—he might be put on a pun, told, "through the door, of course." . . . We extend belated welcome-back greetings to Paul Madden from Bldg. 26-2, and Bill Oberlin, from nights to days. . . . Virgil Bobay is courting a limp, he fell from a step-ladder and twisted his knee. . . . At the time of this writing, we're informed that our nurse, Veda Orff, from dispensary, Bldg. 8-1 underwent an operation at the St. Joseph Hospital. May we wish Veda a speedy recovery—that she'll be back real soon.

Voltmen Retain Championship Title

(Continued from Page 1)

With one down and two on, the Coors' strategy called for an intentional pass to Hormann. Then Lockett almost played into the hands of this defensive gesture; but, Hardy juggled Lockett's double-play tap and had to settle for a force out at second, while the lead run scampered home.

Then singles by Vic Austin, who had three safe blows in the tilt, and Frank Morgan were combined with an intentional pass to Lockett and two costly errors by Ley, the Coor's shortstop, provided Braden's men with what then seemed to be too great an advantage for the Colorado crew to surpass.

The Golden clubbers countered, however, in the top of the fifth, with four runs. After two men were retired, Ververka found himself under a blitz that subsided only after five consecutive batsmen had delivered safeties. Big blows in the uprising were Hardy's single and a booming double by Paul Dyke, another ex-Voltman.

The Coor's defensive collapse represented a tough blow for their lefthander, Clayton Freese. The portsider tossed a nifty seven-hitter, walked only three men unintentionally, and downed a quintet on strikes.

G-E Club Softball Team Wins Runner-up Trophy

Loses To Zollner Reserves, 2-0

By Bill Allen

Before about 350 well-chilled spectators at Municipal Beach, the G-E Club's Major softball team met defeat at the hands of the strong Zollner Reserve Club by a score of 2 to 0.

Manager Perry Esterline had previously guided his charges to a 15-won, 5-lost record for the season. The team finished in a tie for second place in the Main Auto Supply major league, Fort Wayne's strongest softball circuit, and will soon engage in a playoff series for the second place slot.

Although throwing one of his best games of the season in spite of severe weather, G-E Hurler Bud Feldheiser was the victim of loose fielding as the G-E team made a brilliant effort to capture the Class "A" Division of the city tournament. With his change-of-pace pitching and well-placed slow ball, Feldheiser avoided trouble in every inning except the second.

Burgette, Reserve club centerfielder, opened the inning with a single. On a ball-one, strike-two count on Saalfrank, Burgette broke for second base and was trapped with a beautiful throw from Catcher Somers to Tony Stanski, veteran shortstop, who forced the runner back to Perry Esterline at first base, for the put out. Saalfrank then walked, Ramage forced Saalfrank at second to set the stage for what proved to be the winning marker. Kowal, heavy-hitting second baseman, lifted a long fly down the right-field line for a home run, scoring Saalfrank for two runs. Erv Huth, former North Side athlete, then fanned to end the Reserve club scoring.

With the game moving errorlessly along at a fast pace, it wasn't until the home-half of the seventh inning that the G-E Club showed signs of pulling the game out of the fire.

After Morkoetter, heavy-hitting left fielder, lifted a long fly ball to deep centerfield for the first out, Harold Somers lined a sharp double to left-center field. Ewing, pinch-hitting for Bud Feldheiser, laid down a perfect sacrifice. This placed Somers on third base, while being called out at first on a very close play. At this point the Reserve club rallied, holding Somers at third while retiring the side.

In a brief ceremony following the game, Manager Esterline received the runner-up trophy from Paul Congdon, representative of the City Softball Commission.

Box score:

WORKS LAB, FIREMEN, SQUARES SURVIVE FIRST ROUND OF SOFTBALL TOURNAMENT

Works Lab, Firemen and Squares survived the first round of the elimination tournament to determine the second-half champion of the Interdivision Softball League.

In a close, hard-fought game, Squares defeated Winter St., 4-3. All the runs were scored in the first two innings. Winter St. loaded the bases in the seventh inning with one out, but Benecke lined to DeCrappeo, who doubled Frasor off third base to end the game.

Main Office gave Works Lab a scare before bowing 7-4. Lore Ferverda was the mainstay for the Lab with a perfect day at bat, getting four hits in four attempts.

Firemen won from Fractional in the other game played, 10-2, as Blauvelt allowed only three hits.

G-E Golfers Are Invited To Join Annual Tourney At Brookwood Sept. 17

The annual G-E Blind Bogey golf tournament will be held Saturday, Sept. 17, at Brookwood country club. All golfers are invited to enter the tourney and compete for the prizes to be presented by the G-E Club. Although there is no entry expense, contestants must pay the green fees.

G-E Rod, Gun Club Events To Be Fired At Local Range

The G-E Rod and Gun Club coming events, in the .30 caliber category, will be fired at the Fort Wayne Rifle and Revolver Club Range.

OUT OUR WAY

By J. R. WILLIAMS

Only the playoffs stand between the Owl golfers and another completed season. Without reservation it can be stated that as usual the Owl Golf League has been a success. It goes without saying that we all are looking forward to a bigger and better year next season.

The first week of the playoff pairs together the first two places in each division who will play nine holes, with these winners playing over the 18-hole route for the Owl Golf League Championship. For the past two years the crown has been held by the Hot Shots from across Broadway.

John Shanahan's Hi-Flyers, the winners of the Odd Division, will meet Earl Stauffer's Cold Shots in one match; while Bob Craig and the Hot Shots, the winners of the Even Division, will meet Garland Myers and the Jolly Boys in the other match.

The final week of league play didn't produce any outstanding fireworks. The Even Division contenders had been established weeks ago. Earl Stauffer's Cold Shots won the right to a playoff by whipping their playoff rivals to the tune of 8 points while Walt Pook's boys took one on the chin at the hands of the Jolly Boys by six points. Bob Craig, with a snazzy wind blown 38, led his team to a four-point victory over Fuzzy Fosnaugh's team No. 4.

The following data is the complete league record for 1949:

		ODD				
Team	Captain	Pts.	W	L	Tie
3	Shanahan	+23	7	5	2
1	Stauffer	—17	4	9	1
5	Pook	—35	6	8	0
		EVEN			
6	Craig	+10$	11	2	1
2	Myers	—3	6	6	2
4	Fosnaugh	—71	5	9	0

Won and Lost have no bearing on final outcome.

LEAGUE STATISTICS

Team	Captain	Total Games	Total Strokes	Nine Hole Avg.
6	Craig	61	2483	41.4
1	Stauffer	60	2721	45.4
3	Shanaban	60	2810	49.3
5	Pook	59	3031	51.3
2	Myers	60	3133	52.1
4	Fosnaugh	*49	2602	53.2
	Totals	349	16780	48.

Total games include last year's average as one game.

*Team 4 played with three men on four matches.

The average of 48 per each nine holes is nothing to be ashamed of.

DOES YOUR JOB HAVE A FUTURE?

The answer is no—if the business you work for cannot show a profit.

Any business may go through lean years, especially at the beginning, when profits are slight or non-existent.

But unless the trend is reversed, and the company begins to make money, your future is brighter elsewhere. That business is heading for trouble—and so are its employees.

Why is this so? Why is management's ability to make a profit the best kind of job security?

Because every function of a profit is job protection for everybody down the line.

Profits protect jobs by attracting investors. People with money saved will risk that money only in hope of some return. If investors hold back because profits are scanty, jobs suffer.

Profits protect jobs by supplying money for plant expansion and replacement of equipment—for the new tool, the new shop, the new research center. 60% of all money spent by U. S. corporations last year for this purpose came from retained profits and depreciation allowances.

And profits protect jobs by guarding against emergencies. Sooner or later the rainy day will come. Profits put aside are umbrellas.

Does your job have a future? That depends on two things—whether you:

—Have picked an employer who is making a profit.

—Are helping him to continue to make a profit.

The above discussion of the value of profits to the employee is reproduced here through the courtesy of N. W. Ayer & Son, Inc., a fine old leader in advertising of integrity.

CHARLES E. WILSON Anniversary 50 years with GENERAL ELECTRIC

Volume 32 | FORT WAYNE, INDIANA, FRIDAY, SEPTEMBER 16, 1949 | No. 37

Community Chest Drive Opens Oct. 3

$45,000 IS SET AS GOAL FOR WORKS; K. W. MICHAEL IS NAMED CHAIRMAN

The participation of the Fort Wayne Works in the Allen County Community Chest drive swings into high gear Monday, Oct. 3, with a goal of $45,000 to be raised exclusive of the Company's contribution. Due to the drop in employment since last year, individual giving must be higher than in 1948 to achieve this goal. To finance the essential services of the 20 Red Feather agencies, this year's goal for the county is 12% higher than last year's contributions.

K. W. Michael, Assistant to the Supervisor of Personnel, has been appointed General Chairman of the drive for the Fort Wayne Works. He will head the coordinating com-

(Continued on Page 3)

104 Suggesters Receive Awards

One hundred and four employees shared $1,862.50 in suggestion awards this week.

Earl J. Shultz, Tiffin Plant, took the top award of $450. His idea pertained to the re-use of spacers used in packing and shipping large parts. This was the largest suggestion award ever given at the Tiffin plant.

Next on the list was Donald Welty, also of Tiffin. He received $175 for his suggestion concerning the brackets for mason winders. John Wood, FHP Motor Div. 13, earned $145 for his idea involving the gauging presses.

George R. Simons, Danville, was awarded $75 for his suggestion on

(Continued on Page 4)

John Wood, FHP Motor Div. 13, received a $145 suggestion award this week for a suggested change in the gauging press to eliminate spiral stator cores. The change eliminates a considerable amount of scrap and rework. Mr. Wood is shown at the right, above, being congratulated by his foreman, Joe Wyss.

Annual Inventory

The Annual Physical Inventory will be taken on Friday, Sept. 30, at the Broadway and Taylor St. plants. This plan will be followed by all divisions except the Decatur plant and certain divisions at the Taylor St. plant, which will conduct the inventory Saturday, Oct. 1.

In general, all shop operations will cease for the day, except for emergency production and service requirements. Such exceptions will be announced by the separate divisions as early as possible.

All employees who will be scheduled to take the Physical Inventory will be notified.

800 Attend Annual Outing Of Quarter Century Club

Approximately 800 members of the Quarter Century Club traveled to Limberlost Camp at Oliver Lake Saturday for a day filled with sports, entertainment, eating, and visiting.

Favored by ideal weather, the outing was attended by nearly 100 more than the total last year. The annual event commemorated the club's 35th anniversary this year.

Registration was scheduled to start at the Broadway gate at 8

(Continued on page 8)

Foremen's Association To Hold Picnic Saturday

The annual stag picnic of the Foremen's Association will be held Saturday at Voigt's Retreat, near New Haven.

The picnic will start at 1 p.m. and a special program has been planned for 3:30 p.m.

Central Standard Time

At midnight Saturday, Sept. 24, the Daylight Saving Schedule will end and clocks throughout the city will be set back one hour, returning to Central Standard Time.

The Broadway and Taylor St. plants, however, will not change their clocks until midnight Sunday, Sept. 25.

Any third shift operators working on Sunday night will ring in on Daylight Saving Time and ring out on Central Standard Time so that the interval worked will be one hour more than the clock card registration. The Payroll sections will take notice of this adjustment in time.

The Decatur plant will change to Central Standard Time on the same week-end as Fort Wayne.

C. S. Matson

Works Manager

G-E Voltmen Return Home

Manager John "Red" Braden receives congratulations from C. H. Matson, Fort Wayne Works Manager, for guiding his G-E Voltmen to another National Semipro Baseball Championship. They are shown with the 48-inch Coca-Cola trophy symbolic of the 1949 title. Having received similar first place awards in the two preceding years, Manager Braden and his champions gained the distinction this year of receiving the biggest trophy in the tournament's history. The photograph was taken shortly after members got off the train from Wichita, Kan., and were greeted by a throng of fans, including Fort Wayne's Mayor Henry E. Branning, Jr. Left to right are: Scott Carey, pitcher; Dee Hamilton, coach; Mr. Matson, Charles Bobilya, first baseman and outfielder; Manager Braden, Charles Shipman, pitcher; Donald Hormann, outfielder; Mayor Branning, and Bill Ricks, pitcher.

Cancel North American Tournament; Japan To Host 1950 World's Series

General Electric's Voltmen returned home last week after annexing their third consecutive national semipro baseball crown at the National Baseball Congress tournament held at Wichita, Kan.

A throng of fans met the train when it pulled into the Pennsylvania station Thursday night, Sept. 8.

The team had with it the huge Coca-Cola trophy awarded by the National Baseball Congress, which also honored John Corriden for his individual sportsmanship and Bill Ebranyi, as the leading infielder at the tournament.

All-Star Team Is Named

The congress also named five Voltmen to places on the 1949 All-American sandlot team, chosen from players participating in the

Donate Your Blood To Help Save The Lives Of Others

All employees who are able to donate blood should do so. Medical science has shown that the use of blood and blood derivatives in everyday medical practice is essential if physicians are to do everything possible to save the lives of the people of our country.

The last war emphasized the tremendous value of blood. Records show that 97.3 per cent of the wounded survived, and the military medical authorities believe that the availability in quantity of plasma, and later whole blood, was a major factor in this low mortality rate.

The National Blood program was worked out when it was noticed there had been no national agency to supply the blood needed to physicians for their civilian patients. Surveys showed that only 35 per cent of the hospitals in the country had private blood banks, and that these banks were not able to supply the total amount of blood needed for their hospitals.

Also there had been no provision for a national supply of blood to be used in case of disaster or national emergency.

By participating in the national program, Allen countians may secure free blood or blood derivatives at any hospital in the country, upon application stating that Allen county is an active participant in the program.

Register today at the Red Cross Blood Bank on Berry St. The blood which you give to your fellow men through the National Blood program of the American Red Cross may be put to many and varied uses, all of them capable in almost miraculous ways of helping the people of your community when serious illness threatens their well-being or their lives.

The schedule of hours for the Red Cross Blood Bank is as follows:

Mondays—1 to 4:30 p.m.
Tuesdays—3 to 8:30 p.m.
Wednesdays, Thursdays, and Fridays—9 a.m. to 2:30 p.m.
Saturdays—9 a.m. to 12:30 p.m.

These hours have been maintained in consideration of the all-volunteer help.

RUMORS: HOW THEY GROW

One day when we were very much younger and still in school, the teacher gave us an example of rumor. She stooped and whispered a story into the ear of the first boy in the row.

"Now," she said, "I want you to whisper this story just as I told it to John, next to you, and he in turn to Sally, and so on throughout the class."

The story she whispered was that a man, who had been robbed, fell and broke his leg when he was running to a cop for help. When the story finally went the rounds of the class and emerged at the end of the last row, it had changed somewhat.

A man who had robbed a bank shot a cop in the leg as he was escaping and got away with two million dollars!

"That," said our teacher, "is an example of rumor and how it spreads."

We have never forgotten that example, and so we usually don't pay much attention to rumor. If a story would change so much in a class of a few kids, think what happens when it gets going in places where several hundred people are involved.

ARE BLONDES SMARTER?

Don't answer that, mister. You see, whether you say "yes" or "no," you're convicting yourself of unreasoning prejudice. Because no two people are alike—blondes, brunettes OR redheads.

Each is different because God has never made two people alike. So never imagine that you'll find the same good or bad qualities in any two blondes. Or in any two people in any national, religious or racial group . . . brunettes, redheads, Protestants, Catholics, Jews.

So, for your own sake, for America's sake, don't let unreasoning prejudice trap you. Don't make the wrong answers—think first!

DID YOU KNOW?

Pensioners retiring with ten years or more continuous service are eligible for the benefits of the G-E Pensioners Hospitalization Plan FREE OF CHARGE.

In the first six and a half months of the Plan's operation, 399 pensioners received $30,591 representing 5,073 days of hospital care.

DON'T OVERLOOK YOUR BENEFITS. INVESTIGATE TODAY.

GENERAL ELECTRIC

WHAT'S NEW IN PLANTS & LABS

PITTSFIELD — Planes surrounded by all-metal "skins" are practically immune against lightning strokes, according to Julius H. Hagenguth, G-E lightning expert. In a paper prepared for presentation before the summer convention of the American Institute of Electrical Engineers at San Francisco, he described results of experiments on lightning stroke damage to aircraft conducted throughout several years in collaboration with the National Advisory Committee for Aeronautics. The G-E scientist is engineer in charge of the Company's High Voltage Engineering Laboratory here, world's largest artificial lightning center, where the tests were conducted. Subjects investigated during the study were listed by Hagenguth as the burning of holes in the "skin" and metallic parts of planes, lightning damage to fuel tanks, breaking of safety glass in windshields, effect of current flow through ball bearings of the control systems, effect of lightning on the pilot's vision, relationship of exhaust gases to lightning, and the effects of lightning on nonmetallic planes.

BRIDGEPORT — A new smaller Disposall designed especially for the elimination of food waste in homes where existing plumbing complicates installation of the standard Disposall is now in production, it has been announced by C. J. Enderle, Manager of the G-E electric sink and cabinet division.

By employing a recently developed plumbing trap, the new Disposall, designated the FA3-JP, can be quickly and conveniently installed in old or new sinks if the distance between the center line of the wall drain and the bottom of the sink is at least seven inches. The new Disposall is particularly adapted to small kitchens where storage space is severely limited, Mr. Enderle said. Because it is only 16 inches long, the under-the-sink area can be used to store wastebaskets, soaps and other supplies. Mr. Enderle pointed out that another advantage of the appliance's size is reduced installation cost.

Wednesday Is Deadline For Elex Reservations

Wednesday is the deadline for reservations for the Elex Club's trip to Chicago Saturday, Sept. 24. The Railroad Fair with the pageant, "Wheels are Rolling," will be the feature attraction of the excursion.

The group will leave Fort Wayne at 7 a.m. from the Nickel Plate station. They will arrive in Chicago at 10:10 a.m. With free time for shopping, the girls are to meet at the fair at 7 p.m. to attend the pageant. The group will leave Chicago at 11 p.m. and will arrive in Fort Wayne at 2:10 a.m.

The fare is $9 for Elex members and $10 for non-members. Railroad passes will be honored on the trip. The cost then will be $8.82 for pass-holders. Children between the ages of five and 11, inclusive, can go for $6.40. The cost includes train fare, transportation to the fair grounds, admission to the fair, and a reserved seat at the pageant.

Reservations are now being taken at Irene Meyers' office in Bldg. 8-2, or Evelyn Blakley's office at Taylor St.

SCIENCE QUESTION BOX

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY

Q: When was DDT discovered?

A: This valuable and potent insect-killer has come into widespread use only during the past decade. However, the chemical compound (of which the full name is dichlorodiphenyltrichloroethane) was first prepared in 1874 by Othmar Zeidler, a graduate student of chemistry at Strassbourg, Germany. Its insecticidal properties were discovered in the 1930's by Paul Muller, a chemist in Basle, Switzerland. The first reports of its efficacy reached the United States in 1939, and the needs of the armed services led to a rapid extension of its use.

OUT OUR WAY

By J. R. WILLIAMS

There are quite a few new faces appearing at work the past few days. One is Pearl Kreischer who returned Wednesday afternoon. In the switch section we have Bernice Miller back after a three-month sick leave. Nice having you back, Bernice. . . . Betty Reichert and her sister had been Sunday visitors at Portland. . . . We extend our sympathy on the death of Ruth Tinkham's father and Pat Abbott's grandfather. . . . A chubby youngster has arrived at Mr. and Mrs. Clarence Morgan's home. That makes two boys. Congratulations, Pop and Mom. . . . A Buckeye visitor has been seen taking in the sights with Cecelia. Celia, are there more at home like him? . . . What's this—Fanny Amstutz passing candy? Oh, yes, she's scored another birthday. Happy birthday, Fanny. . . . What is the matter, Ezra, didn't the fish like your crickets? We expected to get an invitation to a fish fry but we don't even get a good fish story. . . . Anyone wishing to hear about the state fair should contact Revia Stauffer or Jo Ivetich. They really did have some time and enjoyed every minute of the trip. . . . Our sympathy to Cleotus Miller and Harold Baughn upon the death of their fathers. . . . Labor Day was "Hunter's Paradise" for many. . . . Kate Fennig spent Labor Day at the State Fair. . . . Seen at the Van Wert Fair were Doris Shaffer, Margaret Waltke, and Forrest Roop. . . . Doris Resh is the proud grandmother of a little baby girl. Thanks for the treat, Doris. . . . Erna Weiland's display of hankies is beautiful. . . . Paul Briede, G-E Club Room manager, invites all bowlers, who are not yet on teams, to contact him to be placed on a team. The management of the G-E Club has again decided on a minimum bowling fee of 25 cents per game—let's boost our G-E Club—let's make this a banner year for our bowling leagues.

SINCERELY: Our very best wishes for a very speedy recovery go to Miss Somers, who is suffering from a broken bone in her foot. We all hope to see you up and around real soon. . . . WEDDING BELLS: Yes, those weddin' bells are about to chime for Shirley Hughes, and to keep festivities at a fever pitch the gals had a lovely shower on Shirley Thursday night. . . . FRESH AS A DAISY: Boy, what a peppy step Dutch Wilson displayed on his return from that two weeks' vacation of his. Of course, he insists he didn't rest at all, but just worked, worked, worked. WELL? . . . ABSENT: Hilda Krause who left us last Friday, is now with Lloyd Platt's office force. Don't forget to come see us real often, Hilda. . . . BIRTHDAYS: My, September is one of the big three months, at least as far as birthdays are concerned. The fellows and gals celebrating that important day are as follows: Mr. Uncapher (who has an Aug. 31 birthday); Lenore Hanley, Sept. 1; Buck Buchanan, Sept. 9; and last but not least Viola Haiber Sept. 15. A very, very happy birthday to each and everyone of you boys and gals.

Three Men Enter Retirement

S. B. Stilwell

Sherman Stilwell, Bldg. 31-2, retired Thursday, Sept. 1, after 32 years' service as a draftsman.

Mr. Stillwell began his drafting career in 1917. Since that time he has followed his profession in Bldgs. 18-5, 16-3, 19-3, 19-5, and 31-2.

Last week John Driver cornered the councilman and took off on the Nickel Plate elevation. If they ever get the elevation one-tenth as high as Johnnie was when he was at the height of his arm swinging it will really be elevated. John came down real easy when told that his troubles could be solved by moving to the south side of the city. . . . Fred Boehm was giving a demonstration of car pick up to one of his friends. After about a two mile run he had the car up to 50 mph. His temper went quite a bit higher after learning that his accelerator pedal was broken. . . . Gene Werling spent one whole evening last week repairing the wiring on his car. Then the next day the guard at the gate called for him to come out and shut off his horn. When he disconnected the horn, the lights came on; when he turned the light switch the heater started running, and when he turned the heater switch the starter took off. He stood back looking a bit amazed and said, "I guess I've got crossed wires someplace." (We wonder where.) . . . Whitie Suelzer was telling the boys that a neighborhood dry goods store was going to sponsor his bowling team and furnish them with shawls to wear bearing the sponsor's name. This should be an added attraction at the bowling alley. . . . Louie Watt was pacing the floor last Friday night impatiently waiting for Buck Adams to call and set the time for their departure on one of their eventful fishing trips, and after I had told him he should go to the Quarter Century Club outing. I've been told that he lamented to Buck all the way home that he hadn't listened to my advice. Yep, you guessed it, no fish again. . . . Jack Pollock again invited some of his friends out for the evening last Friday. The fellows kept calling at short intervals keeping him on the phone until the first guests arrived. The party was in honor of Jack's birthday. He now claims he is the same age as Jack Benny.

A. R. Flory

Albert Flory, Bldg. 4-3, left Thursday, Sept. 1, for retirement after 18 years with General Electric.

Starting his G-E career in 1931, Mr. Flory has held numerous jobs throughout the works, including Winter St. He has worked as a screw machine operator, drill press operator, Gridley machine operator, P and W automatic lathe set-up work, spray and dip operator on stators and rotors, shaft lathe operator, and bench lathe operator. Prior to his retirement he worked on a thread mill.

There have been some changes made in 1x29. Marian Miller, Stella Mailand, Joyce Schraeder, Pat (Stabler) Buckholtz, Betty Kummer, and Olive Elliott are back and some new ones added, Sarah Meagher and Audrey Brindle. Ann Hershberger has gone on nights. . . . From all reports the Quarter-Century outing was a huge success, plenty to eat and drink and the program was wonderful. . . . If you all thought something new had been added, you're wrong. It is Thelma Purdue with a new hair-do! . . . Bill Wickliffe was on his vacation last week. He took his son to Butler University where he enrolled as a student. . . . Carl Metker is really good in getting the cork out and getting things rolling. Wonder what Bill Wickliffe did with the cork that Tom Dickenson gave him? . . . Freddie "Bashful" Schrader is a really good square-dancer and from all reports he isn't as bashful as he lets on. . . . Frances Fitch went over to the Employees Store to get a replacement for her coffee-maker. Much to her surprise she was able to get a real bargain, a whole coffee-maker for the price of what the part would have cost her. Several others got in on the bargain too! . . . Clara Patterson, Anna Ruth Clements and Toni Dickenson all celebrated their birthdays on the same day last week. Congratulations to them and also to Babe Donehue and Ervin Zollinger who had birthdays last week too, to Paul Ginder and Hazel Stauffer who have a birthday coming up! . . . Our sympathy goes to former co-worker Bea Helma whose mother died this week . . . Mildred Green and Winnie Osthrimer are back in the field with us again. Glad to have you back, girls. . . . Wilbur Stocks went to Paterson, N. J. to see his son. He also hoped to see the "Yanks" play, but guess he will have to settle for the Brooklyn "Bums". . . . Bob Blee really has an accommodative bus driver! He toots three times before he gets to the corner, and by that time Bob gets there too. Since the bus stop has been moved you will have to move on the double, Bob! . . . It is OK with us, Waldemar, if you smoke your new pipe, but we want to see you smoke it, Schmidt! . . . Say, Ed Boedeker, what was the reason you put out so much work Friday? Could it be the big weekend you were thinking about? We just found out who is the boss at Harry Berry's house, neither, Harry or his wife but that big boy of theirs! He really rules the roost and one of these days he'll be taking care of Harry! . . . Just what kind of a "shot" was it that Frieda Knoche got at the Quarter-Century picnic last Saturday that she couldn't make it to work on time Monday morning?

Henry Stegmann

Henry Stegmann, Taylor St. Div. 14, retired Thursday, Sept. 1, after a service of 28 years with the company.

His service date was 1921 and he has been a punch press operator during the entire time. Some of the various places he has worked are Bldgs. 19-3, 19-4, 26-4, 27, 17-3, 4-2, 4-1, 4-4, Winter St., and Taylor St.

Payroll Deductions for Additional Group Life Insurance Suspended

The suspension of payroll deductions for the Additional Group Life Insurance has been declared for the months of November and December, 1949. Employees who have been continuously insured since Dec. 31, 1948, and who are still in the Company's employ will have their contributions waived for the months of November and December, 1949, for the Additional Group Insurance currently in force.

This suspension of contributions will be equivalent to a 16⅔ per cent dividend on the basis of a full year's contribution and it will reduce the cost of the insurance to employees during 1949 by nearly ¾ of a million dollars.

Community Chest

(Continued from Page 1)

mittee, which is in charge of making the arrangements for the plant-wide campaign.

Chairmen of the drive for the divisions include:

R. J. Duras, FHP Motor divisions at Taylor St.; D. H. Hanson, FHP Motor divisions at Broadway; Dwight M. Myers, Motor and Generator division; R. L. Soughan, Specialty Transformer and Ballast divisions; Dick Kent and J. V. Johnson, Works Contributing and Service divisions, and Roger Grant, Winter St. plant

The solicitation will be conducted again this year by nearly 500 persons throughout the plant. These solicitors will be selected by the superintendents in each division.

This year's slogan is "Care Enough to Share Enough."

There are 20 local Red Feather agencies and the USO that benefit from the Allen County Community Chest. The agencies include:

Associated Catholic Charities, St. Vincent's Villa, Boy Scouts, Children's Day Care Association, Family and Children's Service, Fort Wayne Humane Society, Fort Wayne Jewish Federation, Fort Wayne Urban League and Wheatley Community Center, Girl Scouts, Hospital and Home Service Association, Lutheran Social Service League, Mental Hygiene Clinic, Parent Teachers' Council Fund, Pixley Child Welfare, Public Health Nursing Services, Rescue Home and Mission, Salvation Army, School Milk Fund, Workers for the Blind, and YWCA.

Of late, it's been hard to keep track of Carl Stadelman's living quarters. We just have him settled in a new house when he ups and moves again. Now he has a new home in Ossian. This time it looks like it really will be permanent for he's spending plenty of time going through catalogues making selections of roses for fall planting. . . . Ray Lepper is in the market for a new home and has been looking around for an ideal spot. His idea of an ideal place is a farm surrounding a well stocked lake where he can raise bait, rent boats and spend his spare time fishing. In case anyone should happen to know of such a place please get in touch with him immediatey. . . . Ed Glusenkamp was seen hunting his pipe one day recently and after an almost unsuccessful search found it right in his own mouth! . . . Bob Klingel was looking at the new Studebaker with a wishful look in his eye last Saturday. Did you put your order in yet, Bob? . . . Paul Kennerk has a free grandstand seat for all the games played in the New Haven High Shool Stadium. It's in his own home overlooking the playing field where he can relax in an upholstered chair in comfort and quiet, protected from any unpleasant weather conditions. No doubt he will become a popular host when there are especially interesting games. Anybody want the hot dog concession? . . . Oliver Bowman was seen hobnobbing with royalty at the Quarter Century picnic. It isn't often he condescends to do so but there are times when a feller just can't help himself.

104 Suggesters

(Continued from Page 1)

eyclet presses. A Decatur employee, Frank Bohnke, received two awards, $65 and $25. For the first award he suggested to change the rotation on turrets, while his second suggestion pertained to winding machines.

A thirty-dollar award went to Herbert C. Seider, FHP Motor Div. 13, for his suggestion about the plates on K and R shell rollers. Edward Cristallo, DeKalb, made a suggestion about rotor and stator magazine feeds and was awarded $25. Robert H. Stute also received $25 for his coil insulation idea.

Those receiving awards in various amounts from $5 to $20 are listed below:

FHP Motor Div. 1: Howard C. Taylor, James F. Sarasien, Frank N. Brindle, Frances J. Fitch, and Avery Spayde.

FHP Motor Div. 13: Theodore H. Weber, P. A. Schoppman (four awards), Charles W. Scarlett, Robert W. Guingrich, Charles K. Winans, and A. H. Brandenburger.

FHP Motor Div. 14: Herbert F. Seslar, Clarence Seslar, Clarence W. Rothgeb, William R. Kiser, Novice Hopkins, Emma Heinrich, Louis Hinen, and Walter Hinrichs.

FHP Motor Div. 15: Dale B. Peden, Forrest R. Allman (two awards), and Walter Amacher.

FHP Motor Div. 17: Kathryn L. Pfister, Ben Fleek, Emmit J. Owens, Dorothy Richard, Lester Beck, William Wiegman, Kathryn O'Connor, Fred B. Adams, Fred R. Boehm (two awards), Denver L. Coolman, Robert F. Bennett, Ollie M. Ragan, Robert J. Boone, Esther Schladenhauffen, and Carl P. Sweeney.

FHP Motor Div. 19: George A. Silk, Edward Huhn, and James J. Carey.

FHP Motor Div. 33: Clarence Wickliffe, Earl D. Stauffer, Phillip H. Kraft, M. A. Gotsch, and Solomon Andorfer.

FHP Motor Div. 10: Marilyn Franke, Joseph Jensen, and John Stickley.

Decatur: Joe Weber, Robert Nyffeler, Guy Koos, Anna Ivetich, Harvey Hileman, and John Baumann.

Tiffin: Carl Weimerskirch, Elizabeth Malone, Ralph Grunden, Russell L. Semer, and Robert E. Kruse.

DeKalb: Beulah Moore and Jesse D. Ramsey.

Specialty Transformer Div. 94: D. E. Waldrop (four awards), Max W. Lydy, Olen I. Lehman (two awards), Wilson P. Jones, Mildred Bowers, Cecilia Carrig, Russell W. James, Ernest A. Kern, Francis J. Gnau, Mabel M. Nelson, J. Virgil McKeeman (two awards), Miles Dunscombe, Lee Mohr, Raymond R. Crippen, Evelyn V. Brunkhart, Walter D. Mertz, Edward M. Dullaghan, Gladys Bracht, Levi C. Carpenter, Eugene F. Mettler, Mildred E. Leazier, Robert W. Knoll, Mary M. Wiedman, Robert E. Hower, Wayne R. Colvin, and Lenna V. Ferguson.

Danville: Peter Szollosi.

Motor and Generator Division: Edison M. Burry and James E. Mitchell.

Wire and Insulation Division: Gerald Kummer, Arthur G. Gardt, and Amel D. Beck.

General Service Division: William M. Waggoner and John Madden.

Miscellaneous: Elizabeth Carnell.

Baker, Pumphrey, McDougal Receive New Appointments

The appointments of M. A. Baker as Assistant Designing Engineer, Large Motor and Generator Engineering divisions, Fort Wayne; R. E. Pumphrey as Division Engineer, A.C. Motor and Generator division; and K. R. McDougal as Division Engineer, D.C. Motor and Generator and Dynamometer Engineering division were announced today by P. S. Stough, Manager of Engineering, Large Motor and Generator Engineering divisions.

M. A. Baker

Mr. Baker is a graduate of Iowa State University, receiving his B.S.E.E. degree in 1935. After his graduation, he entered the Company's Test Course at the Schenectady Works.

He entered the Motor and Generator Engineering division in 1937 as a design engineer of DC apparatus and has successively held the positions of Group Leader, Assistant Section Engineer and Section Engineer prior to his present appointment as Assistant Designing Engineer.

Mr. Baker is a registered professional engineer, a member of the American Institute of Electrical Engineers, Fort Wayne Engineers' Club, G-E Squares, and the Supervisors' Club.

R. E. Pumphrey

R. E. Pumphrey is a graduate of Purdue University, receiving his B.S.E.E. degree in 1911 and, prior to coming with the General Electric Company, entered the Test Course of the Fairbanks-Morse Electrical Manufacturing Company. He came with the General Electric Company in 1916 as a design engineer in the A.C. Apparatus Engineering Department.

When the AC and DC Apparatus Departments were merged into the Motor and Generator Engineering division, Mr. Pumphrey became Group Leader in the AC section and later Section Engineer in charge of the AC section prior to his present appointment.

Mr. Pumphrey is a registered professional engineer, a member of the American Institute of Electrical Engineers, the Fort Wayne Engineers' Club, the Fort Wayne Association of G-E Engineers, the General Electric Supervisors' Club, and the YMCA.

K. R. McDougal

K. R. McDougal is a graduate of the University of Wisconsin, receiving his B.S.E.E. degree in 1928. After his graduation, he came with the General Electric Company on the Test Course at Fort Wayne.

He transferred from the Test Course to the AC Apparatus Engineering Department in 1929 as a design engineer on the AC Apparatus. Mr. McDougal subsequently entered the Motor and Generator Engineering division as a design engineer on dynamometers and later was made Section Engineer of the Dynamometer and Printing Press Drive section, which position he has held until this present appointment.

Mr. McDougal is a registered professional engineer, a member of the Fort Wayne Engineers' Club, G-E Squares, General Electric Supervisors' Club, and the Fort Wayne Association of General Electric Engineers.

We see by the papers that Jesse Easterday will appear in person on the Palace Theater stage over the week-end. Nice going, Jess, maybe we will get a chance to see you. . . . We are told that when Leo Elward was still a bachelor his word was as good as gold. If he promised to help you in any way he was always little Leo on the spot, but it seems time and things have changed since he took unto himself a helpmate. Oh yes! he still makes those promises but his word seems to be just a lot of flappin of the lips and hot air. When there's work to be done he never shows up. How come you're slipping, Leo? Are you Man or Mousey? . . . Steve Bobay tells us he is the only one who can walk up to that old nag of his without her trying to bite him. We can understand her feelings, Steve. She is probably hungry due to lack of food, and takes every advantage of getting a little something to eat. Now in your case she knows you are made up of only skin and bones and would be only wasting her time chewing around on you. Besides she might of got that poison ivy you had.

Who's Chasing Who or What?

Richard Hensler was playing golf at the Elks Country Club last Saturday. He drove one over by the ninth green which happens to be near the road. As he started to continue his playing he noticed several cows coming across the road and up into the greens. Quickly Dick took his driver and was going to shoo the cows away. However, one of them had a different idea and started after Dick, who then dropped his driver and started running like a deer. From last reports Dick was still out running the milk giver. . . . All who attended the Quarter Century outing report they had a very nice time. A swell dinner and the entertainment was great. . . . By the way the Jesse Easterday we mentioned in the beginning of this column is not our own Jesse Easterday of our Wire Fabric section. Sorry, folks. Just wanted to see if you really read all of the column. Jess Easterday will appear hut vaudeville is his business. . . . Congratulations, Harry DeWitt, on your completion of 25 years' service with the good old G-E.

Insulation News

The old traveling bug really bit the Wood Section in Bldg. 12-3 over the big Labor Day week-end. Both Ray Sink and Dorothy Lebrecht took to the open road. Dorothy went to St. Louis. She was going to the outdoor opera one night when St. Louis started to act like Fort Wayne and threatened a rainstorm. Now Dot is a girl who likes to be prepared, so she invested in a raincoat. Proud of the fact that neither rain nor storm would spoil her evening, she settled back to enjoy the performance, feeling sorry for the poor people who forgot their raincoats. When the lights were dimed, Dorothy says every star in the St. Louis sky came out to laugh at her. What happened to the raincoat? Dot folded it up and sat on it, naturally. . . . Ray Sink took the wonderful trip to Mackinac Island. If you want to hear about heaven on earth, just let Ray describe the island to you. You can just picture Dorothy Lamour swimming around gathering water lilies. Not content with one taste of paradise, Ray says he is sure going back again. . . . Some people are crazy for exercise. Take Joe Kramer, for instance. Joe bought a new Ford and then rides his bicycle to work.

If Fritz Vogt doesn't get rid of his cold, the fellows are going to send him to Hollywood to make a W. C. Field's picture. . . . We hear Helen Miller has been knocking herself out lately. . . . Bill Lavine sure hasn't been having any luck fishing lately. As a result he has been practicing casting by throwing his hat in the lake and pulling it out. . . . Russ Beamer and family recently made their second trip to Niagara Falls. This time he says he saw the Falls. . . . Lois DeLong claims she ran into a door. That's her story for a black eye and she is sticking to it. . . . Gus Weisenburger's son is now home from the Navy. Now we are wondering just what kind of excuses he will have for not participating in his outside (stag party) activities. Don't let him work you too hard, J. D. . . . Esther Watson is now carrying a torch; burn that is. . . . Sept. 13, is now a new holiday in Germany, Ground Hog Day. This year the ground hog came out early and got his nose burned. How about it, Fritz? . . . Dale Irwin has been bragging about the mileage he gets to a gallon of gas. However, the other evening he was taking a couple foremen home and ran out of gas. . . . How come Walt Niemeyer has been "batching" it since he and his wife returned from California? . . . Mike O'Grady sure is proud of his new Ford. However, "Pappy" Grier was asked his opinion of the car; and, brother, can he deflate one! . . . Congratulations to George England and his wife. They are proud parents of a baby girl, Sharon Lynn, born Sept. 6.

"The consciousness of duty done gives us music at midnight."—George Herbert

Things look much brighter in Bldg. 17-2—we have new fluorescent lights. The repair men replaced all burned out units last week. . . . Joe Haas had a severe tooth ache last week and had a hard time getting a dentist to relieve the pain. After finding the dentist he relieved Joe of a tooth pronto. . . . Cliff Smead wore a pair of bright green trousers to work last week, but accidently tore a large hole in them. His wife had to bring a pair over to him so that he could get home. . . . We extend belated birthday wishes to Paul Koldewey, whose birthday was last week. . . . We welcome Wilborne Garton who has joined Group 16x 42. . . . Anyone interested in playing golf with Herb Halley should call his wife first. She is taking care of Herb's golf engagements. . . . We didn't know that Ralph Walda was a dog fancier, but it seems he has gone in for a new breed. Anyone ever hear of a pink poodle? . . . Gene Wheeler must have had a diesel in mind when he used three-in-one oil in his cigarette lighter. . . . Dick Madden took his two sons, Gene and Ronnie, fishing at Rome City during Labor Day to catch some of those fish Gene Wheeler has been telling about. It was a bad day for fishing evidently because none of them caught any fish, including Mr. Wheeler.

FHP Motor Divisions Conduct Meeting Here For Men On Advanced Production Program

Twenty-three members of the program attended the three-day meeting, which was conducted by the Fractional Horsepower Motor divisions.

The Fractional Horsepower Motor divisions were host this week at a three-day meeting here for men on the Company's Advanced Production Program.

During the course of the meeting, the trainees heard talks on production by men from the Fort Wayne and Decatur plants.

The conference opened Tuesday morning with a short talk by A. J. Rose, Production Manager. A history of the Fort Wayne Works was then presented by J. H. Oman, Assistant to the Production Manager in charge of production operations.

L. D. Hodell, Manager of Manufacturing, discussed the matching conveyor system for the remainder of the morning.

Tour Decatur Plant

A talk on branch plant operations by J. F. Welch, Assistant Plant Manager at Decatur; a tour of the Decatur plant, and discussions on material ordering, warehousing and shipping, by R. R. Schuster, Supervisor of Production, Receiving and Shipping at Decatur; and shipping, by H. W. Foos, Assistant Supervisor of Production, Receiving and Shipping, completed the day's session.

The group then had dinner at the Orchard Ridge Country Club.

A. V. Feigenbaum, Supervisor of Manufacturing Training for the Company, conducted the entire session Wednesday. Mr. Hodell was the luncheon speaker.

Discuss Inventory Control

The Thursday session opened with a tour of the Taylor St. plant, followed by talks on inventory control presented by F. T. Gamec, Assistant to the Production Manager, and R. E. Bangert, Assistant to the Purchasing Agent.

J. E. Estabrook, Assistant to the Works Manager, was the luncheon speaker.

A discussion of clinical methods and procedures was presented during the afternoon session by C. B. Smith, Supervisor of Procedures; and R. R. Hofmann, Supervisor of Office Methods, also addressed the group.

Mr. Rose concluded the meeting Thursday afternoon.

Program Has 24 Members

Members of the Advanced Production Program and their sponsoring works include:

R. J. Geiter, L. W. Rank, J. W. Fry, R. G. Loecher, R. Medros, C. Dodge, Jr., H. Norris, and R. F. Richard, all of Schenectady; W. F. Fachet, K. E. Agan, and C. W. Gerni, Philadelphia; C. B. Anderson and J. P. Sheperdson, Pittsfield; Emerson Elwell and E. R. Nelson, Erie; E. C. Hazelwood and W. L. Scanlan, Lynn River; E. H. Lovequist and R. J. Perron, West Lynn; A. E. Monahan, Fitchburg; William Welch, Holyoke, and W. R. David, E. S. Sembroski, and B. F. Brickley, Fort Wayne.

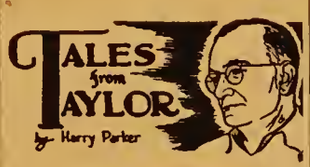
The Advanced Production Program is designed to give advanced training in production to those men who have demonstrated outstanding leadership qualities in the production programs at the various works. This program is approximately 18 months in duration.

Assignments Are Made

During this time, the trainee is usually rotated between two divisions in addition to his home division. Short assignments of a specialized nature may also be included in the 18-month period.

The Division and Works Service Production Managers recommend men for this training to the Apparatus Manufacturing Training office. Those who are selected for the program are placed on the General Office payroll for the duration of their training period.

For those men who have had considerable experience, the major assignments are of a project nature. These are designed to acquaint the trainee with the over-all picture of production. A typical assignment is to establish an inventory control system. A project of this nature would bring the trainee in contact with the engineering department so that standardization of design could be established. The project would also bring the man in close contact with the Purchasing section to assure arrival of material as to quantity and due date as requested by the Production division.



There are also included in the program, short assignments in the General office, district offices, district warehouse, and sales. It is through assignments of this nature that the man obtains a fundamental knowledge of the commercial activities as applied to production.

Members of the Advanced Production Program are shown, above, at their first luncheon meeting Tuesday in Bldg. 16-2.

Our "we wish you happiness" mat is out for Louise O'Connell. She was married Sept. 2 to Homer Koomler. . . . Also congratulations to the Bill Millers on their new pink-bootied tax deduction. . . . What is this we hear about Violet Brower? Seems as if she is going to either start carrying a lantern or wearing her safety shoes to bed. . . . Katy Salmon attended the horse races at Paulding. We hear she got the bird—at the horse races. . . . Freddie Reinking came in with a brand new hat last week. He was still seen wearing it in mid-morning. 'Smatter, Freddie, was your head cold, or did you think you'd get your hat dirty? . . . We thought we had Ethel Keller all fixed up for Labor Day. She had her new front tooth, but now she had to go and lose another one. . . . It sure is tough luck when you own four radios and want to hear a ball game, to find you can't get the station that is broadcasting the game. How about that, Walter Kryder? . . . Irene Blank has some new pets. She brings food to feed the mice every day. Bet they miss you when you aren't here. . . . Speaking of pets, Mary Zirkle has a new canary. However, the birdie hasn't any tail feathers and has a hard time trying to balance itself on the perch. . . . Iley Souder and Hallie Hosler are lucky third week vacationers this week. Hallie is off to the fishing grounds of Wisconsin. Wonder if we can plan on a fish fry? . . . Has anyone heard anything about Charlie Francies' tomato crop? We haven't seen any samples. Maybe he is saving them to have fresh frozen tomatoes for Christmas. . . . We bid goodbye to Lowella Koogle last Friday. She and her hubby Rex (also a former co-worker) are moving to Bloomington where he will finish his schooling. . . . It's a happy birthday to Naomi Robinson. . . . Also "How dee doo dee" to all our newcomers. . . . JoAnn Kemery must be a good cook. Her husband gets up in the middle of the night for a snack. One night he got up twice. The tapioca was so good that he had to finish it. . . . Wonder what makes Leona Hollis so happy these days? Are you holding out on us? . . . We were glad to see Blanche Mountz the other day. Hope you are back with us soon. . . . Need a new excuse for being late? Gene Hutsell came up with a new one last week. Coming home, he left the car idle while helping his wife with the groceries. He forgot all about the car. The result next morning was an empty gas tank and one dead battery. . . . When Ivah Grandstaff hits something she really hits it. The other day she ran into a man. He told her if she hit a post as hard as she did him she would cash in her checks. . . . Kate Weigle had the misfortune of being bit by a dog. . . . If you see Harold Kiel walking around carrying a load of stators, think nothing of it. He is trying to break the habit of waving his arms while talking. . . . Don't forget to join Elex. Also about their trip to the Chicago Railroad Fair next Saturday. . . . We from Bldg. 17-3 extend our sincerest sympathy to Irene Meyers in the death of her father.

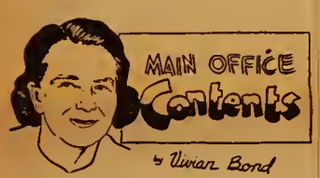
Kenny Miller's wife backed his car into a utility pole and tore one door off. Then she hurried home, packed her keester and left town to visit mother until the storm that she knew was coming had subsided. Kenny told us that from now on if she wants to go anywhere she will have to drive the truck. We do not understand why he would raise such a fuss—one door more or less off that old clunker would not make much difference. The car is pretty well ventilated as it is now. . . . Buck Adams is the latest one to forsake the shores of Big Long Lake. He said that the reason is that the roar of the motors of Admiral Brandenburger's flagship is too much for him. At times it drove him nearly frantic. It is expected that by next summer the Admiral will be the sole inhabitant of the shores of this lake. . . . The boys of the punch press section are looking for a deck of indestructible playing cards. Frank Blotkamp, while playing, gets so excited at times and a little perturbed. In doing so he gets a little rough with the deck, such as tearing some of the cards in half, throwing them on the floor and jumping on them. . . . Charlie Richardson has gone modern. He now has one of those famous "Beetle Brow" hair cuts that is so popular among all of the young fellows. But where he got that gorgeous green shirt that he is now wearing is beyond us.

Of course, you've all heard about the major operation performed on Bob Hatfield last week, or at least according to him it was a major job. We just know it's the first time it ever happened, that anyone bad three teeth extracted at the same time. He even took gas, to boot. Yes, Bob, it takes a real he-man to go through an ordeal like that. . . . We don't think the varnish job improved Bill Schible's looks any. Guess he didn't either when he had to call his wife and have her bring him another pair of trousers so he could finish the day. If anyone wants a pair of trousers, cheap, there is a pair for sale in Bldg. 20-1. . . . Doc Harold, "Daniel Boone", he is called by his fellow Guardsmen, caught an oppossum in Bldg. 26-5 the other day with his bare hands. Wonder if it's open season. . . . We had no idea Harry Davis was so utterly fastidious. He was seen in Bldg. 20-2 the other day, very daintily flicking his ashes into an ashtray. Most of the fellows just knock their ashes on the floor since there is so much debris due to the remodeling, but not Harry. . . . Talk about getting your foot in it, Rog Pierson did. You can't say Rog doesn't make an impression. Wonder what the guy who poured the cement thought about that dainty little footprint.

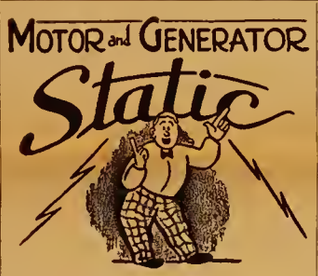
New Paint Job

After having a drab coat of paint for a number of years, the Packard belonging to A. R. (Butch) Vegalues, Works Police Chief, now has a new coat of green.

. . . We have heard quite a few stories about fishing and hunting, but the tale Chet Swartz tells about the potatoes he grew can't be beat. He says that one person can't eat all the French fries that one potato makes—or—three potatoes to a peck. . . . Even though the tonk players celebrated "Be Kind to Fenimore Day", Vance just can't seem to come out ahead. . . . Friday afternoon is a busy time in the Taylor St. shop. Everyone helps to clean it up, except Anthony Crow, who just can't seem to get into the swing of it. One Friday Anthony cut his thumb rather badly on his machine, and although the fellows felt sorry for him, they thought this was going to extremes to get out of cleaning. In a very impressive ceremony later in the afternoon, Anthony was presented the Purple Heart. Just for those interested, Anthony's thumb is healing nicely. . . . Margie Ditmar, who left the Company some time ago, recently received a bundle from Heaven, name of Claudia Diane. Both are doing nicely. . . . Wedding bells will soon be ringing for Katie Steinman and Bob Blaine. We're sure going to miss you, Katie, but we know you'll be happier at your new job. . . . A happy birthday to Blanche Patton, Josephine Heller, and Charlie MacKay.



Walter Kryder needs a new radio. He has several sets, but when he tried to get the ball game the other night, he had to beat a path between sets trying to catch a word now and then. He finally gave up and listened in on his neighbor's set. Anyone want to buy a good crystal set? . . . Larry Gase is getting so proficient in filling the duplicator that he now can get a little more than half of the fluid inside. That is a pretty good average. . . . Harold Boles is now an experienced sleeping-bag enthusiast, since his Labor Day trip up North. Harold can give you all of the ins and outs mostly outs of the art of sleeping in a bag. . . . Vance Burnau went to the Cleveland air races. While he didn't bring any trophies home, he did bring back a peach of a wind burn. Now you can't tell where his face stops and his hair (?) begins. . . . The Birthday Club held their regular meeting at the Berghoff Gardens with Dorothy Askren as hostess. The girls having birthdays were Lucile Werling, Anna Lapadot, Joan Bailey and Belle Buchan. Those present were: Kate Scherer, Eileen Hennen, Marilyn Roehm, Olga Welch, Dorothy Askren, Anna Lapadot, Lucile Werling, Jean Pappert, Joan Bailey, Norma Krall, Audrey Hickernell and Belle Buchan.



Celebrates 30th Anniversary

Hilda Walda, Bldg. 4-2, recently rounded out 30 years' service with General Electric. At that time, she was honored by her co-workers and G-E friends. In the above picture she is shown (second from the left) reading the congratulatory letter she received on her anniversary. Left to right are: Mamie Allen, Miss Walda, Lelia Byall, M. J. Pugh, Asst. Supervisor of FHP Motor Inspection and Test Divisions; W. L. O'Brien, Supervisor of Inspection and Test for FHP Div. 15, and W. H. Sunier, FHP Motor Inspection and Test Supervisor.

CONGRATULATIONS to our third time winners—The G-E Voltmen. Each year the Coca-Cola trophy gets a little bigger. Let's keep on until we have to enlarge the Club to take care of them. The game was thrilling and I am sure all Fort Wayne listening heaved a huge sigh of relief in that last fraction of a second of play. The Wichita announcer was very complimentary about Long John "Red" Braden's sportsmanship. I will voice our "thank you" for the broadcast. . . . Lenore "Lee" Strausser, Bldg. 18-1, will leave today for her home in Niles, Mich. She will be replaced in the Payroll section by Margaret Tennison of the Specialty Transformer Payroll, Bldg. 26-2. . . . We are sorry that Gladys Forst, Bldg. 18-1, is ill. . . . Dale Amstutz, a manufacturing course attache, left the General Superintendent's Office for an assignment in Motor-Generator. . . . Reports from the Quarter Century picnic were all favorable—a good time was had by all. There was a good crowd and everyone reported a bumper serving of chicken! . . . Tomorrow the G-E Foremen's Association will have its picnic at Voigt's Retreat. If the weatherman is kind I am sure they will have a fine time. . . . Visited Schuler's at Marshall, Mich., again Saturday—it is just as nice as ever, in case you are interested in statistics. . . . Belated one week—Happy birthday to Jean Rose, Bldg. 18-1. . . . Just a Thought—better start making your Brown County plans—it won't be too long now! . . . Our Hope is that by the time this paper goes to press that Dorothy Long, Bldg. 18-4, is on the road to recovery. She is a patient at St. Joseph Hospital being treated for polio. Our prayers are with you, Dorothy. . . . Al Tharp, Bldg. 18-4, was not cut out to chisel stone. Ask him about his sore thumbs. . . . Did everyone see the boat races? The Boat Club surely deserves a big hand for putting on such good entertainment. There are some snappy boats from Fort Wayne and one in particular that was a winner in the races held at Albany, N. Y. All in all, I would say that Fort Wayne is right on top in the sports world. . . . We understand that Ruth Fritz, Bldg. 18-1, with her husband, and Dorothy of Bldg. 18-1 and John of Bldg. 18-4, Leininger, were among the visitors at the Railroad Fair, Chicago, over the week-end. . . . We extend our sympathy to Irene Meyers in the death of her Father. . . . News—Last Sunday on the "Stop the Music" program there was actually a woman out in the west who did not know the trend of fashions for the coming season—now that is news! . . . News of Bldg. 18-3—Gerald Snowberger is vacationing this week—just fishin' and things. . . . Cordelia McSpadden left Saturday for a two weeks' visit in her home town, about 70 miles from Dallas. . . . Dorothy Motter and husband entertained friends from Pennsylvania over the past week-end. . . . Peggy Ford and husband worked on their small ranch near Roanoke. . . . Joyce Buchner spent the week-end attending shows at Fort Wayne and Huntington. . . . Vivian Eller went to her home in Marion, Ind., to make plans for her wedding in two weeks. . . . Sophia Jesse is having quite a trip. She accompanied her sister and husband to Durham, N. C., where their son will enter Duke University. Jessie seems to think she is smarter than some—she "went through Duke University in one day" then on to Florida. . . . I believe that General Motors' Charles E. Wilson is accredited with saying "A good boss is one who makes his men think they have more ability than they have, so they consistently do better work than they thought they could." That quotation is food for thought!

Thought For The Week: "It's astounding how much fog can settle on a narrow mind."—Olin Miller.
